Note: Dollar volume figures represent total considerations reported for all transactions with exception of minority interest transfers in which control of stations did not change hands and stations sold as part of larger company transactions. Although all states have been approved by the FCC, they may not necessarily have reached final closing. Prior to 1978, combined AM-FM facilities were counted as one station in compiling total number of stations traded. Now AM-FM combinations are counted as two stations.

*Starting in 1993, the Radio only column includes only stand alone Am and FM deals and the Group column contains AM-FM combos and all other multiple station deals. In previous years the AM-FM combos were included under Radio only.

2001 Station Sales

The following are 2001 radio and television station sales with transactions of \$3 million and above. All transaction information is listed as reported in *Broadcasting & Cable* magazine's "Changing Hands" column and is current to December 31, 2001. For more detail on television sales, see *Television Ownership Transfers* in this section.
