## Television Assignments by State

The following table of assignments contains the channels designated for the listed communities in the United States, its territories, and possessions. Channels designated with an asterisk (\*) are assigned for use by noncommercial educational broadcast stations only. A station on a channel identified by a plus (+) or minus (-) mark is required to operate with its carrier frequencies offset 10 khz above or below, respectively, the normal carrier frequencies.

**Footnotes:** 1) Following the decision in docket No. 18261, channels so indicated will not be available for television use until further action by the Commission. 2) Operation on this channel is subject to the conditions, terms and requirements set out in the report and order in Docket No. 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972. FCC 72-19 (Added 72-19, 1/7/72). 3) This channel is not available for use as Elgin unless and until it is determined by the Commission that it is not needed for use at Joliet, Ill. 4) Stations using these allotments shall limit radiation toward stations on the same channel in Puerto Rico, to no more than the effective radiated power which should be radiated by an omnidirectional radio station using maximum permissible effective radiated power for antenna height above average terrain, at the minimum distances from such stations specified in 73.610 (b). The FCC shall consider the status of the negotiations with the appropriate British authorities concerning these allotments when the application for construction permits come before the FCC.

# TV Markets by Nielsen Marketing Research Territory

Nielsen Marketing Research territory groups are another standard way of reporting sales data. The following table ranks TV markets, known as Designated Market Area (DMAs), within each Nielsen territory. This provides a yardstick for determining the number of spots markets needed to achieve a given coverage of territory. For example, if the national media are not delivering sufficient advertising weight in New England, the planner will find that three TV markets (Boston, Hartford and Providence) contain over 75% of New England territory household. The planner can also use the table to get a better idea of what TV markets are needed to cover all of New England. Data is from the Nielsen Station Index with tabulations based on a September 2001 estimate. Copyright 2001 Nielsen Media Research.

# The Empire State Building Tower More Than Just Architecture

**S**ince rolling out the welcome mat to broadcasters in 1931, we've made a tradition of rapid response to the constant challenges of the emerging generations of broadcast technology...from FM radio to commercial television and more recently DTV.

We've had many proud moments in 71 years of service to the broadcast community. None are more meaningful than our ability, in the wake of September 11th, to provide immediate haven, permanent facilities and the necessary power for all TV and FM stations and their broadcast transmissions.

The Empire State Building... more than just architecture.

## More Than Just Architecture

Since rolling out the welcome mat to broadcasters in 1931, we've made a tradition of rapid response to the constant challenges of the emerging generations of broadcast technology...from FM radio to commercial television and more recently DTV.

We've had many proud moments in 71 years of service to the broadcast community. None are more meaningful than our ability, in the wake of September 11th, to provide immediate haven, permanent facilities and the necessary power for all TV and FM stations and their broadcast transmissions.

The Empire State Building... more than just architecture.

## He Comes From Outer Space

### CURIOSLY ENOUGH, HE'S LANDED IN AN AD ABOUT COPYRIGHT LAW.

---

The miniature alien you see above is the proud possession of Allee Willis, vintage toy enthusiast. So if you're in the broadcast or cable industry, why should you want to read about an individual like Allee Willis, let alone her tin collectibles? Because Allee is a major supplier of content to your business: she's a songwriter.

At BMI, our job is to manage the songwriter relationship for you.

Every year, we license billions of public performances of musical works from songwriters, composers and publishers. Operating on a non-profit-making basis, we distribute the fees we receive from broadcasters as royalties to Allee and hundreds of thousands like her. Tasks that would otherwise have to be performed by you.

Now, we have no doubt you'd enjoy doing business with someone as creative as Allee. The question is: do you really have the time to do business with 300,000 different Allees?

Co-owned AM and FM stations are often listed together, even when they have dissimilar call letters. In some instances FM may be listed first.

**(2)** Date station first went on air (regardless of subsequent ownership changes).

**(3)** Frequency in kilohertz; power and hours of operation. WOF operates with one kilowatt in daytime hours, 250 watts at night, and uses a directional antenna in daytime. **(5a)** FTR date. FTR refers to *Broadcasting & Cable* magazine's weekly For the Record column that appeared in the magazine until June 8, 1998, where station sales were recorded as received from the FCC. The column (renamed FCC Actions) has been moved from the magazine to the broadcastingcable.com Web Site.

**(6)** Network, representative and programming. WOF national affiliates are ABC Entertainment Network and AP Network. The regional affiliate is Mountain State. The WOF national sales representative is Jones & Company and their regional sales representative is Penn State. The WOF program format is part middle-of-the-road, part country and western, with three hours weekly of special programming in Spanish. For radio format definitions, see page D-637.

**(7)** Key personnel.

**(8)** Advertising rates. This data indicates the prices the station charges for a one-minute spot, run 12-times-a-week during the following time slots: 6 a.m.-10 a.m.; 10 a.m.-3 p.m.; 3 p.m.-7 p.m.; 7 p.m.-midnight, respectively. If a time slot is not applicable, "na" replaces the rate.

**(9)** Frequency for WOF-FM is 101.1 megahertz, with 3 kilowatts of effective radiated power and an antenna height of 300 feet above average terrain. WOF-FM broadcasts in stereo (see **(3a)**).

An asterisk (\*) preceding station call letters indicates noncommercial stations.
