Introduction

This is Grey House Publishing's first edition of the retitled *Complete Television, Radio & Cable Industry Directory*. First published more than 70 years ago as *Broadcasting Yearbook*, and later as *Broadcasting & Cable Yearbook*, this reference work has consistently filled the need for current, comprehensive television, radio and cable industry information for both U.S. and Canadian markets. Grey House acquired the database from Bowker, and is pleased to continue to offer authoritative information in both print and online formats.

New Features

This 2013 edition covers the same valuable data fields researchers are used to, with a number of significant differences to the content—there is more of it, it is more current, and it is presented in a fresh, new look. This edition has a new name, a new cover design, and important changes to the arrangement of data and the page design, so that even the smallest of details—and there are lots of them—are easier to find.

Previous editions interspersed U.S. and Canadian data. This edition clearly separates U.S. and Canadian material for television, radio and cable, so that users interested in either market will find a comprehensive section with everything from market areas, call letter lists and station profiles in one place.

Instead of all station data running together in one paragraph, we have separated important elements, such as web sites, ownership, and programming. Not only are key contact names indented for quick recognition, but there are nearly 5,000 more names in this edition, for a total of 72,549. And each station profile includes new, relevant data, like television's virtual channel and radio's Arbitron market area.

The *Complete Television, Radio & Cable Industry Directory* includes eight major sections, with the “big three”—television, radio and cable—arguably the most detailed and most significant. But this directory is so much more than station data, with all the professional services from producers to engineers, from equipment manufacturers to legal services, including those who produce, distribute, manufacture, engineer, consult, and advocate for this diverse industry.

Television

U.S. television starts with TV statistics—ranking of TV markets, top TV programs, growth and transactions of TV stations, and television sales.

Following these statistics are detailed listings of national and regional networks, and group owners. Detailed listings of 1,909 TV stations are arranged by DMA (Designated Market Area). These station listings include dozens of technical details direct from the FCC, such as digital and virtual channel numbers, hours of operation, frequency, and antenna height. Corporate information follows, including licensee, owner and network—plus names of important decision makers, such as President, Station Manager, Program Director and more. Users will find thousands more names than in the previous edition.

Following the U.S. stations are informative lists—TV stations by call letters, by digital and virtual channels, and a list of U.S. stations that broadcast in Spanish.

Comprehensive Canadian TV information follows the U.S. sections—including networks, group owners, detailed station listings, and lists by call letters and channels.

Radio

U.S. radio starts with an updated Arbitron Metro Survey Area Ranking, which ranks each of the 300 U.S. radio markets by its population.

Following radio market information are detailed listings of national and regional radio networks, and group owners, all with current key contact names. Detailed listings of 15,725 radio stations are arranged by state of license, then city within the state. Like the television stations, these listings include dozens of technical details direct from the FCC, such as power, frequency and hours of operation. New to this section is the station's market area. Users will find type of programming and special programming, including hours of news programming, and target audience. Long lists of key contacts follow, many more than the previous edition, assuring you will always be able to reach the right person.

Following the detailed station listings is information on international radio, satellite radio, and call letters listed by AM and FM and frequency. The U.S. radio section ends with detailed programming information—putting each radio station into one or more of 48 total categories, from Adult Contemporary to Vietnamese. This programming index is followed by special programming, where you will find specifics, like which stations in Portland, Oregon offer jazz as part of their program mix.

Comprehensive Canadian radio information follows the U.S. sections—including networks, group owners, detailed station listings, lists by call letters and frequency, and programming.

Cable

This section starts with a variety of updated statistics on U.S. cable programming, followed by detailed listings of national and regional cable networks, with a separate section on regional cable sports networks.

Cable data for Canada follows, with detailed listings of Canadian cable networks. New to this section are industry statistics.

Technical Equipment and Services

Following the detailed station listings, the *Complete Television, Radio & Cable Industry Directory* goes on to include current, comprehensive information on those who provide services, materials and equipment to the industry. From major television syndicators to radio news services, from producers to distributors, from equipment manufacturers to cable audio services, this edition will help you find the product or service you need.

Professional Services and More

This comprehensive directory goes on to include more valuable industry information, from employment services to technical consultants, from legal services to talent agents. There is a separate section on associations, trade shows and vocational schools and, finally, complete listings for the FCC and other regulatory agencies. New to this edition is Canadian agency information.

This directory is your key to this dynamic industry, all in one place, with more than 22,600 listings, valuable lists and indexes. Find out specifics of any station in the U.S. and Canada, including their audience, how to reach them, what school offers industry training, where to find the latest studio sound board, and how to keep up on the latest industry regulations.

Online Database

For even easier access to this information, the *Complete Television, Radio & Cable Industry Directory* is available by subscription to our online database—G.O.L.D. For more information or a free trial, call 800-562-2139 or visit www.greyhouse.com.

From Isaac Newton to the iPad: A Chronology of the Electronic Media

1666

Sir Isaac Newton performs basic experiments on the spectrum.

1794

Allessandro Volta of Italy invents the voltaic cell, a primitive battery.

1827

George Ohm of Germany shows the relationship between resistance, amperage and voltage. Sir Charles Wheatstone of England invents an acoustic device to amplify sounds that he calls a "microphone."

1844

Samuel F.B. Morse tests the first telegraph with "What hath God wrought?" message sent on link between Washington and Baltimore.

1858

First trans-Atlantic cable completed. President James Buchanan and Queen Victoria exchange greetings.

1867

James Clerk Maxwell of Scotland develops the electromagnetic theory.

1875

George R. Carey of Boston proposes a system that would transmit and receive moving visual images electrically.

1876

Alexander Graham Bell invents the telephone.

1877

Thomas A. Edison applies for a patent on a "phonograph or talking machine."

1878

Sir William Cooke of England passes high voltage through a wire in a sealed glass tube, causing a pinkish glow—evidence of cathode rays. It's the first step toward the development of the vacuum tubes.

1884

Paul Nipkow of Germany patents a mechanical, rotating facsimile scanning disk.

1886

Heinrich Hertz of Germany proves that electromagnetic waves can be transmitted through space at the speed of light and can be reflected and refracted.

1895

Wilhelm Conrad Roentgen of Germany discovers X-rays.

Guglielmo Marconi sends and receives his first wireless signals across his father's estate at Bologna, Italy.

1896

Marconi applies for British patent for wireless telegraphy. He receives an American patent a year later.

1899

Marconi flashes the first wireless signals across the English Channel.

1900

Constantin Perskyi (France) coins the word television at the International Electricity Congress, part of the 1900 Paris Exhibition.

1901

Marconi at Newfoundland, Canada, receives the first trans-Atlantic signal, the letter "S," transmitted from Poldhu, England.

1906

Dr. Lee de Forest invents the audion, a three-element vacuum tube, having a filament, plate and grid, which leads to the amplification of radio signals.

1910

Enrico Caruso and Emmy Destinn, singing backstage at the Metropolitan Opera House in New York, broadcast through the De Forest radiophone and are heard by an operator on the SS Avon at sea and by wireless amateurs in Connecticut.

United States approves an act requiring certain passenger ships to carry wireless equipment and operators.

1912

The Titanic disaster proves the value of wireless at sea; 705 lives saved. Jack Phillips and Harold Bride are the ship's wireless operators.

1920

On August 20, 8MK (later, WWJ) in Detroit, owned by the Detroit News, starts what is later claimed to be regular broadcasting.

The Westinghouse Co.'s KDKA(AM) Pittsburgh broadcasts the Harding-Cox election on returns November 2 as the country's first licensed commercial radio station.

1921

The Dempsey-Carpentier fight is broadcast from Boyle's Thirty Acres in Jersey City through a temporarily installed transmitter at Hoboken, New Jersey. Major J. Andrew White was the announcer. This event gave radio a tremendous boost.

1922

The superheterodyne circuit is demonstrated by its inventor, Edwin H. Armstrong. It dramatically improves AM radio reception.

WEAF(AM) New York broadcasts what is claimed to be the first commercially sponsored program on September 7. The adver-

tiser is the Queensborough Corp., a real estate organization.

WOI(AM) Ames, Iowa, goes on air as the country's first licensed educational station.

1923

Dr. Vladimir K. Zworykin files for a U.S. patent for an all-electronic television system.

A "chain" broadcast features a telephone tie-up between WEAf(AM) New York and WNAC(AM) Boston.

1924

The Republican convention in Cleveland and the Democratic convention in New York are broadcast over networks.

1925

President Calvin Coolidge's inaugural ceremony is broadcast by 24 stations in a trans-continental network.

1926

President Coolidge signs the Dill-White Radio Bill creating the Federal Radio Commission and ending the chaos on the radio dial caused by the wild growth of broadcasting.

National Broadcasting Co. is organized on November 1 with WEAf(AM) and WJZ(AM) in New York as key stations and Merlin Hall Aylesworth as president. Headquarters are at 711 Fifth Ave., New York.

1927

The Columbia Broadcasting System goes on the air with a basic network of 16 stations. Major J. Andrew White is president.

Philo T. Farnsworth applies for a patent on his image dissector television camera tube.

1928

NBC establishes a permanent coast-to-coast radio network.

1929

William S. Paley, 27, is elected president of the Columbia Broadcasting System.

Vladimir Zworykin demonstrates his kinescope or cathode ray television receiver before a meeting of the Institute of Radio Engineers on November 19.

1930

Experimental TV station W2XBS is opened by National Broadcasting Co. in New York.

1931

Experimental television station W2XAB is opened by Columbia Broadcasting System in New York.

The first issue of Broadcasting magazine appears on October 15.

A Chronology of the Electronic Media

The National Association of Broadcasters reports that more than half of the nation's radio stations are operating without a profit.

1932

CBS, NBC, and New York area stations, notably WOR(AM), go into round-the-clock operations to cover the Lindbergh kidnapping, radio's biggest spot-news reporting job to date.

NBC lifts its ban on recorded programs for its owned-and-operated stations, but continues to bar them from network use.

NBC withdraws prohibitions against price mentions on the air during daytime hours; two months later, both NBC and CBS allow price mentions at nighttime as well.

1933

Associated Press members vote to ban network broadcasts of AP news and to restrict local broadcasts to bulletins to stipulated times with air credit to member newspapers.

The American Newspaper Publishers Association declares radio program schedules are advertising and should be published only if paid for.

CBS assigns publicity director Paul White to organize a nationwide staff to collect news for network broadcast. General Mills agrees to sponsor twice-daily newscasts.

1934

Congress passes the Communication Act, which, among other things, replaces the Federal Radio Commission with the Federal Communications Commission.

1935

RCA announces that it is taking television out of the laboratory for a \$1 million field-test program.

1936

A year of TV demonstrations begins in June with the Don Lee Broadcasting System's first public exhibition of cathode ray television in the U.S., using a system developed by Don Lee TV director Harry Lubcke. One month later, RCA demonstrates its system of TV with transmissions from the Empire State Building, and Philco follows with a seven-mile transmission in August.

FM (frequency modulation) broadcasting, a new radio system invented by Major Edwin H. Armstrong, is described at an FCC hearing as static-free, free from fading and cross-talk, having uniformity day and night in all seasons and greater fidelity of reproduction.

A.C. Nielsen, revealing his firm's acquisition of the MIT-developed "Audimeter," proposes a metered tuning method of measuring radio audience size.

1937

WLS(AM) Chicago recording team of Herb Morrison, announcer, and Charles Nehlsen, engineer, on a routine assignment at

Lakehurst, New Jersey, records an on-the-spot account of the explosion of the German dirigible Hindenburg. NBC breaks its rigid rule against recordings to put it on the network.

1938

Broadcasting publishes the first facsimile newspaper in a demonstration at the National Association of Broadcasters convention.

1939

After 15 years of litigation, the patent for iconoscope-kinescope tubes, the basis for electronic television, is granted to Dr. Vladimir Zworykin.

A telecast of the opening ceremonies of the New York World's Fair marks the start of a regular daily television schedule by RCA-NBC in New York.

The first baseball game ever televised—Princeton vs. Columbia—appears on NBC.

1940

The FCC authorizes commercial operation of FM, but puts TV back into the laboratory until the industry reaches an agreement on technical standards.

CBS demonstrates a system of color TV developed by its chief TV engineer, Dr. Peter Goldmark.

1941

Bulova Watch Co., Sun Oil Co., Lever Bros. and Procter & Gamble sign as sponsors of the first commercial telecasts on July 1 over NBC's WNBT(TV) New York (until then W2XBS).

President Roosevelt's broadcast to the nation on December 9, the day after war is declared, has the largest audience in radio history—about 90 million listeners.

1942

The Advertising Council is organized by advertisers, agencies, and media to put the talents and techniques of advertising at the disposal of the government to inspire and instruct the public concerning the war effort.

1943

Edward J. Noble buys the Blue Network from RCA for \$8 million in cash. RCA had two networks, NBC Red and NBC Blue.

1944

With the FCC approval of the transfer of owned stations, the Blue Network assumes the name of its holding company, the American Broadcasting Co.

1945

Pooled coverage of the Nazi surrender in May brings the American people full details of the end of the war in Europe. Peace heralds a communications boom: Not only will programming restrictions end, but new station construction, frozen for the duration, will proceed at an explosive pace soon after V-J Day in August.

1946

A telecast of the Louis-Conn heavyweight title fight, sponsored by Gillette Safety Razor Co. on a four-city hookup, reaches an estimated 100,000 viewers and convinces skeptics that television is here to stay.

RCA demonstrates its all-electronic system of color TV.

Bristol-Myers is the first advertiser to sponsor a television network program—Geographically Speaking—which debuted October 27 on NBC TV's two-station network.

1947

Radio comedian Fred Allen uses a gag, which NBC had ruled out, about network vice presidents, and is cut off the air while he tells it. The story is front-page news across the country as the sponsor's ad agency demands a rebate for 35 seconds of dead air.

1948

Texaco puts an old-style vaudeville show on NBC TV; the hour-long series stars Milton Berle.

1949

The Academy of Television Arts & Sciences presents the first Emmy Awards at ceremonies televised by KTVL(TV) Los Angeles.

1950

General Foods drops actress Jean Muir, who denies any communist affiliations or sympathies, from the cast of *The Aldrich Family* (NBC TV) after protests against her appearance by "a number of groups." The Joint Committee Against Communism claims credit for her removal, announcing a drive to "cleanse" radio and television of pro-communist actors, directors, and writers.

The FCC approves CBS's color TV system, effective November 20. The network promises 20 hours of color programming a week within two months. TV set manufacturers are divided, however, over whether to make sets, since the CBS system is incompatible with black-and-white broadcasts. In the meantime, RCA continues work on its color system.

1951

Witness Frank Costello's hands provide TV's picture of the week as he refuses to expose his face to cameras covering New York hearings on organized crime of the Senate Crime Investigation Committee, chaired by Senator Estes Kefauver (D-Tenn.)

Sixteen advertisers sponsor the first commercial color telecast, an hour-long program on a five-station East Coast CBS TV hook-up.

Bing Crosby Enterprises announces the development of a system for recording video and audio programs on magnetic tape. The pictures shown at demonstrations are described as "hazy" but "viewable." A year later the images are described as improved "more than 20-fold."

1952

By rushing equipment across the country, from Bridgeport, Connecticut, to Portland, Oregon, KPTV(TV) Portland goes on the air as the first commercial UHF TV station.

1953

With the end of daylight-saving time, CBS TV and NBC TV inaugurate "hot kinescope" systems to put programs on the air on the West Coast at the same clock hour as in the East.

RCA demonstrates black-and-white and color TV programs recorded on magnetic tape. RCA-NBC Board Chairman David Sarnoff says two years of finishing touches are needed before the system is ready for market.

The FCC approves RCA's compatible (with black-and-white transmission) color TV standards. System supplants the incompatible CBS system.

1954

CBS President Frank Stanton broadcasts the first network editorial, urging that radio and TV be allowed to cover congressional hearings.

1955

A contract between the DuMont TV network and Jackie Gleason Enterprises calls for Gleason's *The Honeymooners* to be done as a filmed program for CBS TV on Saturday nights.

1956

Ampex Corp. unveils the first practical videotape recorder at the National Association of Radio and Television Broadcasters convention in Chicago. The company takes in \$4 million in orders.

1957

Videotape recorders are seen as the solution to the TV networks' daylight-saving time problems.

1958

Subliminal TV messages are put under the spotlight at hearings in Los Angeles and Washington.

The BBDO ad agency converts live commercials to videotape.

1959

Sixty-eight TV stations defy the broadcasters' code of conduct by refusing to drop Preparation H commercials.

The quiz show scandal climaxes when famed Twenty-One prizewinner Charles Van Doren admits to a House committee that he had been provided with answers and strategies in advance. The sad ending to the quiz show era prompts cancellation of big-prize shows and vows by NBC and CBS to end deceptive practices.

1960

A satellite sends weather reports back from a 400-mile-high orbit.

RKO-Zenith plans a \$10 million test of an on-air pay TV system in Hartford, Connecticut.

Sam Goldwyn offers a package of movies to television.

The last daytime serial on network radio ends.

The opening Kennedy-Nixon debate attracts the largest TV audience to date.

1961

FCC Chairman Newton Minnow shakes up the National Association of Broadcasters convention with his assessment of TV programming: Although it occasionally shines with programs like *Twilight Zone* and *CBS Reports*, it is, more than anything, from sign-on to sign-off "a vast wasteland."

Off-network shows become popular as syndicated fare.

The Ampex "electronic editor" permits inserts and additions to be made in videotape without physical splices.

ABC TV engineers develop a process for the immediate playback of videotape recordings in slow motion.

1962

John Glenn's orbital space flight is seen by 135 million TV viewers.

Telstar, AT&T's orbiting satellite, provides a glamorous debut for global television.

1963

Astronaut Gordon Cooper sends back the first TV pictures from space.

All radio and TV network commercials and entertainment programming are canceled following the assassination of President Kennedy. In the same week, the first trans-Pacific broadcast via satellite previews live TV coverage of the 1964 Olympics in Tokyo.

1964

The government and the tobacco companies each ponder their next move after the surgeon general's report links cigarette smoking and lung cancer. Within weeks, American Tobacco drops sports broadcasts, radio stations begin to ban cigarette ads and CBS TV orders a de-emphasis of cigarette use on programs.

1965

Early Bird, the first commercial communications satellite, goes into stationary orbit, opening trans-Atlantic circuits for TV use.

1966

Fred W. Friendly quits as president of CBS News when his new boss, John Schneider, CBS group vice president for broadcasting, cancels coverage of a Senate hearing on the Vietnam War and runs a rerun of *I Love Lucy* instead.

Network TV viewers see live close-up pictures of the moon—sent back by Surveyor I—as they come into the Jet Propulsion Laboratory.

1967

ABC Radio introduces a radical plan: four networks instead of one, each tailored to suit different station formats.

President Johnson signs the Public Broadcasting Act into law, establishing the Corporation for Public Broadcasting, federal funding mechanism.

1968

The Children's Television Workshop is created by the Ford Foundation, the Carnegie Corp., and the Office of Education to develop a 26-week series of hour-long color programs for preschool children. *Sesame Street* is the result.

The U.S. Supreme Court gives the FCC jurisdiction over all cable TV systems.

Pictures taken inside Apollo 7 in flight and sent back to Earth revive public interest in the space program.

NBC TV earns the life-long ire of sports fans when it cuts off the end of a *Jets-Raiders* game to air its made-for-TV movie *Heidi*. Viewers miss the Raiders' two-touchdowns-in-nine-seconds defeat of the Jets.

1969

The Corporation for Public Broadcasting plans the creation of the Public Broadcasting Service to distribute programming to noncommercial TV stations.

In the same week that ABC-TV announces its \$8 million Monday Night Football deal (games to begin in 1970), Apollo 10 sends back the first color TV pictures of the moon and of Earth from the moon.

The world watches live coverage of Neil Armstrong's walk on the moon.

1970

House and Senate conferees agree on legislation to outlaw cigarette advertising on radio and TV, but change the bill's effective date from January 1, 1971, to January 2, so commercials can appear on New Year's Day football telecasts.

The FCC rules that TV stations in the top 50 markets cannot accept more than three hours of network programming between 7 and 11 p.m., and bars them from domestic syndication and from acquiring subsidiary rights in independently produced programs.

1971

National Public Radio debuts with a 90-station interconnected lineup.

1972

Judge Benjamin Hooks of Memphis, Tennessee, is nominated to the FCC. He becomes the first black to serve on a federal regulatory agency.

Home Box Office Inc., New York, is formed as a subsidiary of Sterling Communications to provide pay-cable TV systems with live and film programming.

1973

Western Union becomes the first company to receive federal permission to launch a commercial communications satellite in the U.S.

Broadcast media around the world open their coverage of the Senate select committee's investigation of the Watergate scandal.

1974

RCA inaugurates the nation's first domestic satellite communications service, using a Canadian satellite.

More than 110 million viewers watch President Nixon announce his resignation.

1975

Home Box Office, Time Inc.'s pay cable subsidiary, announces that it will inaugurate a satellite delivery network in the fall.

1976

Ampex Corp. and CBS develop the electronic still-store system, which uses a digital recording technique to store 1,500 frames in random mode, each accessible in 100 milliseconds.

Cable network launches include Showtime and Univision.

1977

ABC's eight-day telecast of the miniseries *Roots* becomes the most watched program in television history, with ratings in the mid-40s and shares in the mid-60s. Eighty million people watch at least some part of the final episode.

Sony unveils its Betamax videocassette in August and later the same month RCA introduces its SelectaVision home videotape recorder.

1978

The U.S. Supreme Court upholds the FCC in the "seven dirty words" case involving Pacifica's WBAI(FM) New York. The ruling says the FCC may regulate and punish for the broadcasting of "indecent material."

1979

Ampex demonstrates its digital videotape recorder at the Society of Motion Picture and Television Engineers conference in San Francisco in February. Sony unveils its version two months later.

Cable network launches include C-SPAN, ESPN, The Movie Channel, and Nickelodeon.

1980

"Who Shot J.R.?" episode of *Dallas* garners the highest rating for any program in modern TV history, with a 53.3 rating and a 76 share.

Cable network launches include Cable News Network, Black Entertainment Television, the Learning Channel, Bravo, and USA Network.

1981

With five ENG cameras rolling, the shooting of President Reagan becomes history's most heavily covered assassination attempt.

The first U.S. demonstration of high-definition television (HDTV) takes place at the annual convention of the Society of Motion Picture and Television Engineers. The Japanese Broadcasting Corp.'s (NHK) 1,125-line analog system draws raves from engineers and filmmakers.

Cable network launches include MTV: Music Television and the Eternal Word Television Network.

1982

Having reached a settlement with the Justice Department to divest itself of its 23 local telephone companies, communications giant AT&T hopes to lead the country into the "information age." The National Cable Television Association, Congress, and the FCC wonder what the agreement has wrought.

Cable network launches include the Weather Channel and the Playboy Channel.

1983

Reagan appointee Mark Fowler, chairman of the FCC, tells a common carrier conference that the U.S. is heading toward a regulation-free telecommunications marketplace.

In February, the two-and-a-half-hour final episode of CBS's *M*A*S*H* is the most watched program in TV history, garnering a 60.3 rating and a 77 share.

Cable network launches include the Disney Channel and Country Music Television.

1984

The U.S. Supreme Court rules that home videotaping is legal.

Congress passes the Cable Telecommunications Act of 1984, landmark legislation deregulating cable. Law accelerates the growth of cable.

Cable network launches include the Arts & Entertainment Network (A&E), American Movie Classics, and Lifetime.

1985

Ted Turner makes inquiries at the FCC about a possible takeover of CBS. Later, in March, media company Capital Cities Communications purchases ABC for \$3.5 billion. Turner's efforts to acquire CBS fail by the end of July, when a federal judge approves the network's stock buyback plan.

The Advanced Television Services Committee (ATSC) votes in favor of the NHK HDTV standard: 1,125 lines, 60 fields, 2:1 interlace, 5.33:3 ratio. This standard is put forward by the U.S. to the International Radio Consultative Committee (CCIR) for consideration as the international standard. The CCIR adopts the recommendation later in the year.

Having lost his bid to buy CBS, Ted Turner makes a \$1.5 billion offer for MGM/UA.

Cable network launches include The Discovery Channel, Home Shopping Network, and VH-1.

1986

MGM and Color Systems Technology sign an agreement for the conversion of 100 of the studio's black-and-white films to color.

Cable network launches include C-SPAN2 and QVC.

1987

Fox Broadcasting Co. introduces its primetime lineup with 108 affiliates in its bid to become the fourth major U.S. commercial television network.

The National Association of Broadcasters and the Association for Maximum Service Television broadcast HDTV over standard TV channels during public demonstrations in Washington.

President Reagan vetoes legislation to write the fairness doctrine into law. The doctrine required broadcast stations to allow opposing views of issues, but critics claimed that it discouraged open debate.

Cable network launches include Movietime (renamed E! Entertainment Television in 1990), The Travel Channel, and Telemundo.

1988

The FCC adopts preliminary ground rules for HDTV. It tentatively decides to require HDTV broadcasts to be compatible with NTSC sets and says it will not make additional spectrum available outside the VHF and UHF bands for HDTV because there is enough already available to accommodate the service.

Cable network launches include Turner Network Television.

Max Robinson, first African American broadcast news anchor, dies.

1989

Time Inc. and Warner Communications agree to swap stock and merge into what will be world's largest media and entertainment company.

1990

Digital audio broadcasting is demonstrated at the National Association of Broadcasters convention and is heralded as the HDTV of radio.

General Instrument revolutionizes the development of high-definition television by proposing an all-digital system. The video compression system also has implications for satellite transmissions.

Cable network launches include CNBC and The Inspiration Network (INSP).

1991

The U.S. air attack on Iraq begins January 16 with dramatic live coverage from network reporters in Baghdad. CNN is the lone network to maintain contact with its Baghdad reporters through the night.

Free to move around Moscow and ready to commit resources to coverage, television and radio provide gripping details of the short-lived Soviet coup and the collapse of communism.

in the Soviet Union. During his detention in the Crimea, Soviet President Mikhail Gorbachev keeps track of events by listening to the BBC, Voice of America, and Radio Liberty.

Cable network launches include Court TV, Comedy Central, and Encore.

1992

In March, the Supreme Court let stand an appeals court ruling that struck down the FCC's around-the-clock ban on broadcast indecency as unconstitutional and requiring the commission to establish a safe harbor—a part of the day when few children are tuning in and during which radio and TV stations may broadcast without fear of FCC sanctions for indecency.

General Instrument and MIT show the first over-the-air digital HDTV transmission to Washington lawmakers and regulators. The 12-minute transmission of 1,050-line video was broadcast by noncommercial WETA-TV Washington.

The FCC raises the limit on radio stations a single company may own from 12 AM and 12 FM to 30 of each, then backpedals and lowers the caps to 18 each, with no more than two AMs and two FMs in large markets and three stations—only two in the same service—in small markets.

Fox expands its programming lineup to seven nights a week, ending its status as a "weblet" and becoming the fourth full-fledged commercial TV network in the U.S.

The FCC unanimously approves allowing broadcast TV networks to purchase cable systems that serve no more than 10 percent of U.S. homes and up to 50 percent of a particular market's homes.

The FCC tells TV broadcasters they will have five years to begin broadcasting in HDTV once the agency adopts a standard and makes channels available.

Cable network launches include The Cartoon Network and the Sci Fi Channel.

1993

Warner Bros. announces it will launch a fifth broadcast TV network in 1994.

The FCC expands the AM band's upper limit from 1605 kHz to 1705 kHz.

General Instrument, Zenith, AT&T, and the ATRC join forces as the "Grand Alliance" to develop a single HDTV system. Later in the year, the Grand Alliance announces its support of the emerging MPEG-2 digital compression HD system: six-channel, CD-quality Dolby AC-3 music system; 1,920-pixel by 1,080-line interlaced scanning picture; and progressive scanning.

Paramount Communications begins talks with TV stations about forming a fifth broadcast TV network.

Southwestern Bell and Cox Cable form a \$4.9-billion partnership.

Cable network launches include ESPN2 and the Television Food Network.

1994

Two companies, Hubbard's United States Satellite Broadcasting and Hughes's DirecTV, begin direct broadcast satellite transmissions to 18-inch home dish antennas from a shared satellite.

Paramount and Viacom merge in a deal worth \$9.2 billion, forming the world's most powerful entertainment company. Viacom's Sumner Redstone becomes the new company's chairman. Later in the year, Viacom adds Blockbuster Entertainment to its portfolio.

Cable network launches include FX, Home & Garden TV, the International Film Channel, Starz!, Trio, the Game Show Network, and Turner Classic Movies.

1995

Seagram pays \$7 billion for the 80 percent of Hollywood studio MCA Inc. owned by Matsushita Electric Industrial Co. Seagram is controlled by the Bronfman family and is headed by President/CEO Edgar Bronfman Jr.

The Megamedia Age begins when, in the same week, Walt Disney Co. announces it is buying Capital Cities/ABC for \$18.5 billion and then Westinghouse Electric Co. releases word of its purchase of CBS Inc. for \$5.4 billion.

Time Warner and Turner Broadcasting System agree to merge in an \$8 billion stock swap deal.

Live television coverage of the verdict in the O.J. Simpson murder trial sets viewing records when 150 million people watch the jury return a "not guilty" verdict.

Microsoft buys 50 percent stake in NBC's cable channel America's Talking for \$250 million. AT's talk format will be dropped and the network will become a news operation after being rechristened MSNBC.

The FCC repeals its Prime Time Access and Fin-Syn rules. These rules restricted the major broadcast networks from owning interest in their own primetime programming.

Cable network launches include CNN/fn, The Golf Channel, Great American Country, the History Channel, and the Outdoor Life Network.

1996

Congress passes—and President Clinton signs—the Telecommunications Act of 1996, the first major overhaul of telecommunication legislation since 1934. Its key provisions include: replacing the 12-station TV ownership limit with a national home coverage cap of 35 percent; eliminating the national ownership limits on radio stations and allowing one company to own different numbers of stations locally, depending on the market size; requiring TV sets sold in the U.S. to be equipped with a V-chip to enable blocking of channels based on encoded ratings; deregulating cable rates.

Westinghouse/CBS buys Infinity Broadcasting for \$4.9 billion, creating the country's largest radio station group in terms of earnings. The deal results in Westinghouse/CBS owning 83 radio stations in 15 markets.

The FCC releases its first list of proposed digital TV channel assignments for all U.S. analog television stations.

In July, WRAL-HD Raleigh, North Carolina, begins HDTV transmission on channel 32 under an experimental FCC license, making it the first HDTV station to broadcast in the U.S.

The Washington-based Model HDTV Station Project demonstrates live, over-the-air digital TV transmission and reception. A few months later, it bounces digital signals off a satellite and displays them on a receiver.

Cable network launches include Animal Planet, Fox News Channel, MSNBC, the Sundance Channel, and TVLand.

1997

After several starts and stops, the TV industry unveils content-based V-chip ratings to mixed reviews. Recalcitrant NBC maintains it will not implement the new ratings.

Paxson Communications chief Bud Paxson announces plans to launch a new television network, Pax Net, using his 73 owned UHF stations as a base and airing family friendly off-network programming.

ABC Television Network President Preston Padden and Sinclair Broadcasting President David Smith say broadcasters ought to consider using DTV channels for broadcasting multiple channels of conventional TV rather than a single channel of HDTV.

Hearst Corp. (8 TVs) and Argyle Television (6 TVs) join their TV stations and create a new company, Hearst-Argyle Television Inc., that is valued at \$1.8 billion.

The FCC gives TV broadcasters a second channel for the delivery of HDTV and other digital services and said that all network affiliates in the top 10 markets have 24 months to start broadcasting a digital signal; those in markets 11-30 have 30 months; all other commercial stations have five years. Noncommercial broadcasters have six.

DTV service provider EchoStar plans to launch two satellites that will give it the ability to provide local broadcast TV signals to about 43 percent of the U.S.

Cable network launches include WE.

1998

The National Association of Broadcasters agrees to support plans by satellite TV providers to retransmit local TV station signals into their markets as long as the satellite services carry all a market's signals.

At 2:17 p.m. on February 27, WFAA-TV Dallas broadcast what it claims is the first non-experimental HDTV signal (in 1080i, 16:9 format). The broadcast began with a half-hour of taped HD programming, followed by a live

simulcast of the station's NTSC programming that was upconverted to HDTV. The next month, Sinclair Broadcasting becomes the first TV group owner to broadcast multiple digital channels.

AT&T pays \$50 billion for cable system giant Tele-Communications Inc.

Paxson Communications launches its broadcast television network, now called Pax TV, with a lineup of 90 stations covering about 75 percent of U.S. TV homes.

Rádio group owner Clear Channel Communications purchases competitor Jacor Communications for \$4.4 billion. The deal gives Clear Channel 453 stations in 101 markets. The year's other big deals include: Chancellor Media's purchase of Capstar Broadcasting for \$3.9 billion; Hearst-Argyle Television's purchase of Pulitzer Broadcasting for \$1.85 billion; Chancellor's purchase of LIN Television for \$1.5 billion; and Sinclair Broadcast Group's purchase of Sullivan Broadcasting for \$1 billion.

CBS is the first broadcast TV network to air a live HDTV sports event with its Nov. 8 telecast of the New York Jets-Buffalo Bills NFL game. It is carried by CBS stations in New York; Philadelphia; Washington; Cincinnati; Charlotte, North Carolina; Raleigh, North Carolina; and Columbus, Ohio.

Hughes Electronics Corp., parent of DBS provider DirecTV, announces deal to buy rival U.S. Satellite Broadcasting from Hubbard Broadcasting for \$1.3 billion. The DBS business now has three providers: DirecTV, EchoStar, and Primestar.

Cable network launches include BBC America, the Biography Channel, Cinemax, Tech TV, and Toon Disney.

1999

Hughes Electronics Corp., parent of DBS provider DirecTV, buys rival Primestar for \$1.1 billion plus stock. The DBS business now has two providers: DirecTV and EchoStar.

Paxson Broadcasting sells its 30 percent interest in The Travel Channel to the cable channel's 70 percent owner, Discovery Channel.

MSO Comcast offers \$58 billion for MediaOne Group's cable systems. AT&T then comes in with a \$69 billion offer that has AT&T swapping and selling Comcast systems with 2 million subscribers for roughly \$9 billion. In return, Comcast agrees to withdraw its \$58 billion offer.

CBS pays \$2.5 billion for syndication giant King World Productions, whose properties include the hit shows Oprah, Wheel of Fortune, and Jeopardy!

FCC votes to allow a broadcaster to own two TV stations in a market under certain conditions and liberalizes its radio/TV cross-ownership restrictions. A flood of station deals follow.

Viacom Inc. buys CBS Corp. for \$36 billion, merging Viacom's Paramount Station Group, UPN network, cable networks, and other properties, with those of CBS.

Clear Channel Communications pays \$23.5 billion in stock and assumption of debt for the 443 radio stations of AMFM Inc., the country's largest radio broadcaster. Clear Channel will have to divest about 100 stations to comply with FCC and Justice Department regulations. Those spinoffs will bring Clear Channel \$4.3 billion.

Legislation takes effect allowing satellite delivery of local television stations in their markets, increasing DBS providers' ability to compete with cable.

Digital recorders are introduced, allowing a viewer to watch one TV show while taping another.

2000

America Online Inc. and Time Warner merge in a deal worth \$181 billion. The merged company, AOL Time Warner, combines the company that serves the largest number of Internet users with the largest producer of TV shows and movies and cable programming, plus cable systems passing 20 percent of U.S. homes.

Tribune Co. buys Times Mirror Co. for \$6.5 billion, acquiring seven daily newspapers and various magazines. The deal will give Tribune co-ownership of TV stations and major daily newspapers in the top three markets and the assets to sell packages of multimedia advertising to clients on national, regional, and local levels.

Harry Pappas, head of Pappas Television, the country's largest privately held TV station group, announces plans to launch Azteca America, the third U.S. Hispanic television network (Univision and Telemundo are the others) in 2001.

Cable network launches include Oxygen.

2001

FCC approves the \$5.4-billion sale of Chris-Craft Broadcasting's ten TV stations to Fox Television.

DBS operator EchoStar Communications engineers a \$26-billion bid for competitor DirecTV, owned by GM's Hughes Corp. The move follows attempts by Rupert Murdoch's News Corp. to acquire DirecTV. But regulatory reviews keep the deal in limbo.

XM Satellite Radio begins broadcasting a nationwide radio service of 200 channels from two satellites—"Rock" and "Roll"—in orbit above the equator. The Washington-based company charges subscribers \$9.95 a month for the service. A rival, New York-based Sirius Satellite Radio, plans to launch a similar service later in the year.

The September 11 terrorist attacks on New York and Washington result in around-the-clock news coverage, dropping commercials. It's estimated that the networks

lost \$200 million-\$300 million in the first four days of coverage. Four FM and nine New York TV stations whose antennas were on top of the World Trade Center are knocked off the air and several stations lost employees who had been manning the transmitters in Tower 1. Across the country, broadcasters raised money and arranged blood drives. The fall TV season is delayed, late-night talk/comedy shows are put on hiatus, the Emmy Awards are postponed, and several industry gatherings are canceled.

NBC buys Telemundo, the No. 2 U.S. Spanish-language TV network, for \$2.7 billion.

Comcast negotiates \$72 billion merger with rival cable operator AT&T Broadband, topping bids by AOL Time Warner and Cox Communications.

Cable network launches include ABC Family, Hallmark Channel, and National Geographic Television.

2002

Sirius Satellite Radio launches its satellite-delivered subscription radio service in four markets in February, then rolls out nationally in July. Sirius follows XM Satellite Radio to become the second U.S. satellite radio programmer.

Prompted by lawsuits from Fox, Viacom, NBC, and Time Warner, a three-judge panel of the federal appeals court in Washington refuses to uphold an FCC rule limiting a TV station group owner's audience reach to 35 percent of U.S. TV households and strikes down a rule barring a cable system from owning TV stations in its market. The court orders the FCC to rewrite or justify the ownership limit rule.

Tom Brokaw of NBC News announces he will step down as evening news anchor after the 2004 presidential election, to be succeeded by NBC's Brian Williams. Brokaw will then focus on in-depth reporting projects.

The Securities and Exchange Commission begins a formal investigation into the accounting practices of cable MSO Adelphia Communications. Five of Adelphia's top executives—including founder John Rigas and his two sons, Michael and Tim—are arrested on fraud charges, alleging that the family used the company as a "personal piggy bank," financing various personal transactions, including \$3.1 billion in loans for stock and family businesses.

The FCC mandates that all TV sets must be equipped with digital tuners by 2007 and proposes strong copy-protection measures intended to prevent widespread copying and streaming of content over the Internet.

Lifestyle mogul Martha Stewart, whose media empire included TV, magazines, and books, is investigated by the Justice Department for allegedly lying to federal authorities looking into insider trading involving Stewart's sale of ImClone Systems stock the day before it became public that the Food and Drug Adminis-

tration had denied the company's application to market a new cancer drug.

In October, both the FCC and the Department of Justice reject DBS operator EchoStar Communications' proposed \$26-billion purchase of competitor DirecTV, and a revised agreement fails to sway either agency. In December, EchoStar withdrew its merger request from the FCC. Rupert Murdoch's News Corp., whose previous bid for DirecTV had been rebuffed, puts together a new deal.

2003

Rupert Murdoch's News Corp. receives FCC and Justice Department approval of its deal to acquire 34 percent of DBS operator DirecTV's parent company Hughes Electronics for \$6.6 billion in cash and stock.

New York City's Metropolitan Television Alliance agrees to place a new broadcast tower for New York-area television stations on top of the Freedom Tower, a 1,776-foot office tower that will be built on the site of the World Trade Center, where the stations' towers were located prior to 9/11. The MTVA comprises all the city's major TV broadcasters. After the terrorist attacks, most of the stations operated from backup facilities atop the Empire State Building. Ground is expected to be broken on the Freedom Tower in the summer of 2004, and broadcasters should begin operating from the tower by 2008.

The FCC releases new media ownership rules in response to a federal appeals court ruling in 2002. Among the changes: raising the national coverage cap for TV groups from 35 percent to 45 percent; allowing ownership of two TV stations (duopoly) in markets with five or more commercial stations; allowing ownership of three TV stations (triopoly) in markets with at least 18 stations; newspaper-TV cross-ownership is permitted in markets with at least four TV stations; radio-TV cross-ownership now include newspapers in the formula—owners in markets with nine or more TV stations face no cross-ownership restrictions per se but are limited by individual radio and TV limits applicable to specific markets. TV-duopoly owners would not be permitted to own newspapers in markets with fewer than nine TV stations. In markets with three or fewer TV stations, no cross-ownership of TV, radio, or newspapers is permitted. In markets with four to eight TV stations, an owner may form one of the following combos: (1) A daily newspaper, one TV station, up to one-half the number of radio stations permitted to one owner in that market.

(2) A daily newspaper, the total number of radio stations permitted to one owner there, no TV stations.

(3) Two TV stations and the total number of radio stations permitted there.

Congress quickly reacts with legislation introduced by Rep. John Dingell (D-Mich.), which would restore the 35 percent cap. Other critics of the new rules challenge them in federal court.

Liberty Media pays \$7.9 billion for Comcast's 56 percent stake in home shopping giant QVC. With 2002 sales of \$4.4 billion, QVC is not just the largest shopping network, it's the second-largest television network of any kind.

A panel of federal appeals court judges in Philadelphia agrees with public advocacy groups and imposes a stay of the FCC's new broadcast-ownership rules scheduled to take effect on September 4. The stay will remain in effect until lawsuits to overturn the new rules are settled. The Philadelphia court then decides to retain the case attacking the new FCC broadcast-ownership limits rather than granting broadcast networks' pleas to transfer it to a court in Washington.

The Bush White House brokered a surprise compromise over media deregulation by agreeing to permanently set the national TV station ownership cap at 39 percent of U.S. television households. That percentage allows Fox and Viacom to retain all their stations. Wielding a threat to veto a catch-all spending bill over a provision that would roll the limit back to 35 percent, aides to President Bush persuaded Senate Appropriations Committee Chairman Ted Stevens (R-Alaska) to back down from the tighter limit. Stevens's action came less than a week after he had persuaded reluctant House leadership to go along with the old level. The compromise splits the difference between the 45 percent limit set by the FCC in June and the previous 35 percent level that rank-and-file lawmakers on both sides of Capitol Hill had been pushing to reinstate. The agreement is part of a spending bill that funds the FCC and many other agencies in fiscal 2004.

After a 36-year run, the California Cable Telecommunications Association's annual Western Cable Show makes its curtain call in December, citing consolidation in the cable industry and economic pressure.

Cable network launches include Spike TV.

2004

NBC gets Federal Trade Commission approval for its \$14 billion purchase of Vivendi Universal Entertainment, its last regulatory hurdle. The FCC was not required to review the deal because it involved no station licenses. Among other things, NBC acquires USA Network and the Sci Fi Network. The new entity will be called NBC Universal.

Congress and the FCC react swiftly to the "wardrobe malfunction" that bared Janet Jackson's breast during the MTV-produced half-time entertainment in CBS TV's Super Bowl broadcast. Congress passes legislation that dramatically increases the limits on FCC fines for indecency violations.

Congress and the FCC take the first steps toward punishing stations that air "excessively" violent shows. Under orders from leaders of the House Commerce Committee, FCC Chairman Michael Powell by the end of the year will start investigating whether the commission should restrict onscreen violence. Cable can't

count on immunity either. Growing ranks of lawmakers say cable must do more to make sure that children aren't exposed to potentially traumatizing content.

A panel of federal appeals court judges in Philadelphia concludes that the FCC wasn't justified in its June 2003 decision relaxing ownership restrictions in the newspaper, television, and radio industries. The rules, which were blocked from taking effect in September 2003, have been sent back to the FCC for a rewrite. A frustrated FCC Chairman Michael Powell criticized the decision, claiming that it created a "clouded and confused state of media law" and makes it nearly impossible for his agency to design standards for ownership limits.

Cable network launches include TV One.

2005

George W. Bush, on January 20, becomes the first president to have his inauguration covered in HDTV. ABC News deploys 36 HD cameras and four HD production vehicles throughout the parade route to give viewers an unparalleled view of American history.

President Bush chooses FCC commissioner Kevin Martin to be chairman of the agency.

In a King Solomon-like answer to critics that Viacom has become too big to grow, Chairman Sumner Redstone proposes cleaving it in half. The resulting companies would be Viacom and CBS Corp.

Longtime ABC World News Tonight anchor Peter Jennings, 67, died August 7 at his home in Manhattan, four months after being diagnosed with lung cancer.

Following Hurricane Katrina, local TV broadcasters and cable operators in the Gulf Coast area say rebuilding their stations and plants could take several months.

The Disney-ABC Television Group announces that three ABC shows, *Desperate Housewives*, *Lost*, and *Night Stalker* will be available for purchase from the Apple iTunes store for \$1.99 an episode. The announcement prompts the other big media companies to begin "repurposing" primetime programming on the Internet. It's soon clear that the Web is the next big TV medium.

2006

In January, PBS dips into the ranks of its member stations and selects Paula Kerger of WNET New York to succeed Pat Mitchell as president of the noncommercial "network."

After battling to be the broadcasting fifth network for 11 years and mostly lackluster years, WB and UPN stun the broadcasting industry in January by deciding to merge into The CW. To fill the vacuum created by the loss of one network, Fox creates My Network Television, a mini network built around telenovelas, a popular Spanish TV format. Both CW and MNT debut in September.

Two years after the Janet Jackson "wardrobe malfunction" at the Super Bowl, broadcasters

are still feeling the fallout. In March, the FCC issues another round of fines topped by \$3.6 million against CBS affiliates for airing an episode of *Without a Trace*. A few months later, Congress increases ten-fold the base indecency fine to \$325,000 per incident.

Ending a year of speculation, CBS announces in March the hiring of Katie Couric, the popular co-host of NBC's *Today Show*, to anchor the CBS Evening News. With new set and features, she begins her reign as anchor on September 5, becoming the first solo female news anchor. Longtime anchor Dan Rather resigned from the job in March 2005 after botching a 60 Minutes story critical of President Bush's military record. CBS News's Washington Bureau Chief Bob Schieffer anchored the news during the Rather-Couric interregnum.

2007

On January 29 ION Media Networks Inc. changed the name of its TV network from "I" to ION Television.

In 2007 *The Sopranos* ended an eight-year run on HBO. There was much speculation about the final moments of the finale when the show faded to black.

After years of acquiring stations, on April 20 Clear Channel Communications Inc. entered into an agreement to sell its Television Group. And, as of June 30, the company had entered into definitive agreements to sell 389 radio stations in 77 markets.

2008

On July 25 the FCC approved the merger of Sirius Satellite Radio Inc. and XM Satellite Holdings Inc. On July 29 the two companies announced they had completed their merger,

and that the new company would change its name to Sirius XM Radio Inc.

The FCC announced that Wilmington, NC, would be the first market to test the transition to digital television before the nationwide transition to DTV on February 17, 2009. The commercial broadcasters serving the Wilmington market agreed to turn off their analog signals at noon on September 8, 2008. Beginning at noon on September 8 WWAY (ABC), WECT (NBC), WFSX-TV (Fox), WILM-LP (CBS) and W51CW (Trinity Broadcasting) planned to broadcast only digital signals to their viewers in the five North Carolina counties that comprise the Wilmington, NC, market.

Election night viewership sets a ratings record as 71.5 million watch Barack Obama become the nation's first African American president.

2009

The nationwide transition from analog to digital television, scheduled for February 17, 2009, was delayed until June 12, 2009 to allow more time to get ready for the digital transition. The National Telecommunications and Information Administration (NTIA) provided consumers with a TV converter box coupon program to help the consumers make the switch to digital TV. Both the FCC and TV stations across the U.S. made a mighty effort to inform consumers about, and make, the switch. Some TV stations made the switch to digital television early. Notably Hawaii's full-power stations made the switch to digital TV on January 15, 2009. Finally on June 12, 2009 full-power TV stations all over the U.S. became all-digital, when the FCC reported 971 full-power TV stations made the switch.

Later in June 2009 the FCC adopted an order allowing AM radio stations to use FB radio translators to increase their reach within a lo-

cal community. The FCC action gave AM stations an opportunity to overcome technical problems in their coverage areas.

Walter Cronkite, anchor and managing editor of the CBS Evening News from 1962 to 1981, died on July 17, 2009. A memorial service was held on September 9 at Lincoln Center in New York.

2010

Apple, Inc. introduces the iPad, the first mobile computer tablet to achieve worldwide commercial success. Many manufacturers followed with their own tablet.

After 25 years on the air, Larry King announces his departure from his nightly CNN talk show "Larry King Live."

2011

"The Oprah Winfrey Show" ends after 25 seasons, and Oprah Winfrey launches OWN—Oprah Winfrey Network.

Satellite TV provider DISH Network acquires Blockbuster LLC.

Axel Technologies releases Fuugo Video 1.0, which aggregates online video content from multiple sources into a single application, and Fuugo TV, a broadcast digital TV application for computer tablets, smart phones, and other portable devices.

Steve Jobs, influential head of Apple, Inc., dies.

2012

Satellite TV provider DISH Network announces its remote access application, which provides the capability of streaming on-demand movies and TV shows to the iPad.

The following is the FCC's own overview of the laws and regulations that govern TV and radio stations. It is edited and printed here with the permission of the FCC. The agency invites those with questions about its rules and how it operates to visit its web site (www.fcc.gov) or to call 1-888-CALLFCC (1-888-225-5322).

THE FCC AND ITS REGULATORY AUTHORITY

The Communications Act

The FCC was created by Congress in the Communications Act of 1934 for the purpose, in part, of "regulating interstate and foreign commerce in communication by wire and radio so as to make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and worldwide wire and radio communications service...." The Communications Act authorizes the FCC to "make such regulations not inconsistent with law as it may deem necessary to prevent interference between stations and to carry out the provisions of [the] Act.

How the FCC Adopts Regulations

Like most other federal agencies, the FCC cannot adopt regulations without first notifying and seeking comment from the public. The agency releases a document called a Notice of Proposed Rulemaking, where it explains the specific regulations being proposed and set a deadline for public comment. After receiving the comments, the FCC has several options: (1) adopt the proposed rules; (2) adopt a modified version of the proposed rules; (3) ask for public comment on additional issues relating to the proposals; or (4) end the rulemaking proceeding without adopting any rules at all. The FCC also establishes broadcast regulatory policies through individual cases that it decides.

The FCC and the Media Bureau

The FCC has five commissioners who are appointed by the President and confirmed by the Senate. Under the commissioners are various operating bureaus, one of which is the Media Bureau. The Media Bureau has day-to-day responsibility for developing, recommending and administering the rules governing radio and television stations. These rules are in Title 47 of the Code of Federal Regulations ("CFR"), Parts 73 and 74. The rules of practice and procedure are in Part 1 of Title 47.

FCC Regulation of Broadcast Radio and Television

The FCC allocates new stations based both on the relative needs of communities for additional broadcast outlets and on engineering standards that prevent interference between stations. Whenever it looks at a broadcast station application—whether to build, modify, renew or sell—it must determine if granting it would serve the public interest. The FCC expects stations to be aware of the important problems or issues in their communities and to foster public understanding by presenting

some programs and/or announcements about local issues. However, broadcasters—not the FCC or any other government agency—are responsible for selecting all the material they air. The Communications Act prohibits the FCC from censoring broadcast matter and, therefore, its role in overseeing the content of programming is limited. It is authorized to fine a station or revoke its license if it has, among other things, aired obscene language, broadcast indecent language when children are likely to be in the audience, broadcast some types of lottery information, or solicited money under false pretenses.

THE LICENSING OF TV AND RADIO STATIONS

Commercial and Noncommercial-Educational Stations

The FCC licenses radio and TV stations to be either commercial or noncommercial-educational. Commercial stations generally support themselves by advertising. In contrast, noncommercial-educational stations (including public stations) generally support themselves by contributions from listeners and viewers, and they may also receive government funding. Noncommercial-educational stations may also receive contributions from for-profit entities, and they may acknowledge such contributions or underwriting donations with announcements naming and generally describing the entity. However, noncommercial-educational stations may not broadcast promotional announcements or commercials on behalf of for-profit entities.

Applications to Build New Stations; Length of the License Period

To build a new TV or radio station, a citizen must first apply to the FCC for a construction permit. The applicant must demonstrate that he is qualified to construct and operate as proposed in the application. After the applicant has built the station, he must file a license application, where he certifies that he has constructed the station consistently with the construction permit. The FCC licenses radio and TV stations for a period of up to eight years. Before the FCC renews a station's license, it must first determine whether it has served the public interest. In addition, to have its license renewed, a station must certify that:

- (1) it has sent us certain specified reports that we require;

- (2) its ownership is consistent with Section 310(b) of the Communications Act, which restricts interests held by foreign governments and non-citizens;

- (3) there has not been a judgment against it by a court or administrative body under federal, state, or local law; and

- (4) it has placed certain specified material in its public inspection file (see below).

Employment Discrimination and Equal Employment Opportunity (EEO)

The FCC requires all radio and TV stations to afford equal opportunity in employment. We also prohibit employment discrimination on the basis of race, color, religion, national origin, or sex.

Public Participation in Licensing Process

Renewal Applications. Citizens can file a formal protest against a station by filing a formal petition to deny its renewal application, or by sending us an informal objection to the application. The citizen must file a petition to deny the application by the end of the first day of the last full calendar month of the expiring license term. (For example, if the license expires on December 31, the petition must be filed by the end of the day on December 1.) Before a citizen files a petition to deny an application, he should check the FCC's rules and policies to make sure that the petition complies with the procedural requirements. Before their licenses expire, stations have to broadcast announcements giving the date the license will expire, the date on which a renewal application must be filed, and the date by which formal petitions against it must be filed. A citizen can file an informal objection at any point until the FCC grant or deny the application.

Other Types of Applications. Citizens may also participate formally in the application process when a station is sold (technically called an assignment of the license), undergoes a major stock transfer (technically called a transfer of control), or proposes major construction. The station owner is required to run a series of advertisements in the closest local newspaper when it files these types of applications. Later, the FCC will also run a Public Notice (all FCC Public Notices are placed on our Internet home page at www.fcc.gov) and open a 30-day period during which you may file petitions to deny these applications. As with renewal applications, you can also file an informal objection at any point until we either grant or deny the application.

BROADCAST PROGRAMMING

The FCC and Freedom of Speech

The First Amendment and federal law generally prohibit us from censoring broadcast material and from interfering with freedom of expression in broadcasting. Individual radio and TV stations are responsible for selecting

everything they broadcast and for determining how they can best serve their communities. Stations are responsible for choosing their entertainment programming, as well as their programs concerning local issues, news, public affairs, religion, sports events, and other subjects. They also decide how their programs (including call-in shows) will be conducted and whether to edit or reschedule material for broadcasting. The FCC does not substitute its judgment for that of the station, and it does not advise stations on artistic standards, format, grammar, or the quality of their programming. This also applies to a station's commercials, with the exception of commercials for political candidates during an election (see below).

Access to Station Facilities

Stations are not required to broadcast everything that is offered or suggested to them. Except as required by the Communications Act, stations have no obligation to have any particular person participate in a broadcast or to present that person's remarks. Further, no federal law or rule requires stations to broadcast "public service announcements" of any kind. The FCC generally does not require stations to keep the material they broadcast.

Station Identification

Stations must make identification announcements when they sign on and off for the day. They must also make the announcements hourly, as close to the hour as possible, at a natural programming break. TV stations may make these announcements on-screen or by voice only. Official station identification includes the station's call letters followed by the community or communities specified in its license as the station's location. Between the call letters and its community, the station may insert the name of the licensee, the station's channel number, and/or its frequency. However, we do not allow any other insertion.

Broadcast Journalism

Under the First Amendment and the Communications Act, the FCC cannot tell stations how to select material for news programs, and we cannot prohibit the broadcasting of an opinion on any subject. We also do not review anyone's qualifications to gather, edit, announce, or comment on the news; these decisions are the station's responsibility.

Broadcasts by Candidates for Public Office (Equal Time)

When a qualified candidate for public office has been permitted to use a station, the law requires the station to "afford equal opportunities to all other such candidates for that office." The Act also states that the station "shall have no power of censorship over the material broadcast" by the candidate. The FCC exempts the following: (1) An appearance by a legally qualified candidate on a bona fide newscast, interview or documentary (if the appearance of the candidate is incidental to the presentation of the subject covered by the documentary); or (2) on-the-spot coverage of

bona fide news events, including political conventions and related incidental activities.

Children's Television Programming

Throughout its license term, every TV station must serve the educational and informational needs of children both through its overall programming. It must also broadcast programming that is specifically designed to serve those needs. The FCC considers programming to be educational and informational if it furthers the educational and informational needs of children 16 years old and under (this includes their intellectual/cognitive or social/emotional needs). A program is considered to be "specifically designed to serve educational and information needs of children" if (1) that it its principal purpose; (2) it is aired between the hours of 7:00 a.m. and 10:00 p.m.; (3) it is a regularly scheduled weekly program; and (4) it is at least 30 minutes in length. Commercial TV stations must identify programs specifically designed to educate and inform children at the beginning of the program, in a form left to their discretion, and must provide information identifying such programs to publishers of program guides. Additionally, in TV programs aimed at children 12 and under, advertising may not exceed 10.5 minutes an hour on weekends and 12 minutes an hour on weekdays.

Criticism, Ridicule, and Humor Concerning Individuals, Groups, and Institutions

The First Amendment's guarantee of freedom of speech protects programming that stereotypes or otherwise offends people with regard to their religion, race, national background, gender, or other characteristics. It also protects broadcasts that criticize or ridicule established customs and institutions, including the government and its officials.

Clear and Present Danger

The First Amendment protects advocacy of using force or of violating the law. However, the Supreme Court has said that the government may curtail speech if it is both: (1) intended to incite or produce dangerous activity; and (2) likely to succeed in achieving that result. Even where this "clear and present danger" test is met, the FCC believes that any review that might lead to a curtailment of speech should be performed by the appropriate criminal law enforcement authorities, and not by the FCC.

Obscenity and Indecency

Federal law prohibits the broadcasting of obscene programming and regulates the broadcasting of "indecent" language and images. Obscene speech is not protected by the First Amendment and cannot be broadcast at any time. To be obscene, material must have all three of the following characteristics: (1) an average person, applying contemporary community standards, must find that the material, as a whole, appeals to the prurient interest; (2) the material must depict or describe, in a patently offensive way, sexual conduct specifically defined by applicable law; and (3) the

material, taken as a whole, must lack serious literary, artistic, political, or scientific value. Indecent speech is protected by the First Amendment and cannot be outlawed. However, the courts have upheld Congress's prohibition of the broadcast of indecent speech during times of the day when there is a reasonable risk that children may be in the audience. The FCC has decided that those times fall between 6:00 a.m. and 10:00 p.m. In other words, stations may only broadcast indecent material between 10 p.m. and 6 a.m. Indecent speech is defined as "language or material that, in context, depicts or describes, in terms patently offensive as measured by contemporary community standards for the broadcast medium, sexual or excretory organs or activities." Profanity that does not fall under one of the above two categories is fully protected by the First Amendment and cannot be regulated.

Violent Programming

Neither the law nor FCC rules regulate violent programming. However, the law requires TV sets with screens 13 inches or larger to be equipped with V-chip technology, which allows parents to program their TV sets to block display of TV programming that carries a certain rating. The rating system, voluntarily created by the television industry, tags programming that contains sexual, violent, or other indecent material programmers believe may be harmful to children.

Station-Conducted Contests

Stations that broadcast or advertise information about a contest that they conduct must fully and accurately disclose the material terms of the contest, and they must conduct the contest substantially as announced or advertised. Contest descriptions may not be false, misleading, or deceptive with respect to any material term. Material terms include the factors that define the operation of the contest and affect participation.

Broadcast Hoaxes

Broadcasting false information concerning a crime or a catastrophe violates the FCC's rules if: (1) the station knew the information was false; (2) broadcasting the false information directly caused substantial public harm; (3) and it was foreseeable that broadcasting the false information would cause substantial public harm. In this context, a "crime" is an act or omission that makes the offender subject to criminal punishment by law, and a "catastrophe" is a disaster or imminent disaster involving violent or sudden events affecting the public. "Public harm" must begin immediately; it must cause direct and actual damage to property or to the health or safety of the general public, or diversion of law enforcement or other public health and safety authorities from their duties.

Lotteries

The law prohibits broadcasting any advertisement for a lottery or any information concerning a lottery. A lottery is any game, contest, or

promotion that contains the elements of prize, chance, and "consideration" (a legal term that means an act or promise that is made to induce someone into an agreement). There are a number of exceptions to this prohibition. Some of the exceptions are: (1) lotteries conducted by a state acting under the authority of state law, where the advertisement or information is broadcast by a radio or TV station licensed to a location in that state or in any other state that conducts such a lottery; (2) gaming conducted by an Indian Tribe under the Indian Gaming Regulatory Act; (3) lotteries authorized or not otherwise prohibited by the state in which they are conducted, and which are conducted by a not-for-profit organization or a governmental organization; and (4) lotteries conducted as a promotional activity by commercial organizations that are clearly occasional and ancillary to the primary business of that organization, as long as the lotteries are authorized or not otherwise prohibited by the state in which they are conducted.

Soliciting Funds

No federal law prohibits broadcast requests for funds for legal purposes (including appeals by stations for contributions to meet their operating expenses) if the money or other valuable things contributed are used for the announced purposes. It is up to an individual station to decide whether to permit fund solicitations. Fraud by wire, radio or television is prohibited by federal law and may lead to FCC sanctions, as well as to criminal prosecution by the U.S. Department of Justice.

Broadcasting Telephone Conversations

Before recording a telephone conversation for broadcast, or broadcasting a telephone conversation live, a station must inform any party to the call of its intention to broadcast the conversation. However, this does not apply to conversations whose broadcast can reasonably be presumed (for example, telephone calls to programs where the station customarily broadcasts the calls).

BROADCASTING AND ADVERTISING

Business Practices, Advertising Rates, and Profits

Except with respect to political advertisements, the FCC does not regulate a station's advertising rates or its profits. Rates charged for broadcast time are matters for negotiation between sponsors and stations. Further, except for certain classes of political advertisements, stations are free to accept or reject any advertising.

Sponsorship Identification

Sponsorship identification or disclosure must accompany any material that is broadcast in exchange for money, service, or anything else of value paid to a station, either directly or indirectly. This announcement must clearly say that the time was purchased and by whom. In the case of advertisements for commercial products or services, it is sufficient to announce the sponsor's corporate or trade

name, or the name of the sponsor's product when it is clear that the mention of the product constitutes a sponsorship identification.

Underwriting Announcements on Noncommercial-Educational Stations

Noncommercial educational stations may acknowledge contributions over the air, but they may not promote the goods and services of for-profit donors or underwriters. Acceptable "enhanced underwriting" acknowledgements may include (1) logograms and slogans that identify but do not promote; (2) location information; (3) value-neutral descriptions of a product line or service; and (4) brand names, trade names, and product service listings. However, such acknowledgements may not interrupt a noncommercial station's regular programming.

Amount of Advertising

Except with respect to children's television programming, no law or regulation limits the amount of commercial matter that a station may broadcast. In TV programs aimed at children 12 and under, advertising may not exceed 10.5 minutes an hour on weekends and 12 minutes an hour on weekdays.

Loud Commercials

In surveys and technical studies of broadcast advertising, the FCC has found that loudness is a judgment that varies with each listener and is influenced by many factors (such as an announcement's content and style). We have also found no evidence that stations deliberately raise audio and modulation levels to emphasize commercial messages. Broadcast licensees have primary responsibility for the adoption of equipment and procedures to avoid objectionably loud commercials. Citizens should address any complaint about such messages to the station. They should identify each message by the sponsor or product's name and by the date and time of the broadcast.

False or Misleading Advertising

The Federal Trade Commission has primary responsibility for determining whether an advertisement is false or deceptive and for taking action against the sponsor. Also, the Food and Drug Administration has primary responsibility for the safety of food and drug products. Citizens should contact these agencies regarding advertisements that they believe may be false or misleading.

Offensive Advertising

Unless a broadcast advertisement is found to be in violation of a specific law or regulation, the government cannot take action against it. If a citizen thinks that an advertisement is offensive because of the kind of item advertised, the scheduling of the announcement, or the way the message is presented, then he should address his complaint directly to the stations and networks involved. This will help them become better informed about audience opinion.

Tobacco and Alcohol

The law prohibits advertising for cigarettes, little cigars, smokeless tobacco, or chewing tobacco on radio, TV, or any other medium of electronic communication under the FCC's jurisdiction. The law does not ban the advertising of smoking accessories, cigars, pipes, pipe tobacco, or cigarette-making machines. Congress has not enacted any law prohibiting broadcast advertising for any kind of alcoholic beverage. Also, the FCC does not have a rule or policy regulating advertisements for alcoholic beverages. Most broadcasters have voluntarily abstained from advertising hard liquor, although they accept beer and wine advertising.

Subliminal Programming

The FCC sometimes receives complaints regarding the alleged use of subliminal techniques in radio and TV programming. Subliminal programming is designed to be perceived on a subconscious level only. Regardless of whether it is effective, the use of subliminal perception is inconsistent with a station's obligation to serve the public interest because the broadcast is intended to be deceptive. However, it is not specifically prohibited.

INTERFERENCE

Blanketing Interference

Some people who are close to a radio station's transmitting antenna may experience impaired reception of other stations. This is called "blanketing" interference. The FCC requires the station causing the interference to resolve most interference complaints received within the first year of operation at no cost to the person complaining. However, stations are not required to resolve interference complaints based on malfunctioning or mistuned receivers, improperly installed antenna systems, or the use of high gain antennas or antenna booster amplifiers. Mobile receivers and non-radio frequency (RF) devices such as tape recorders or CD players are also excluded. Stations are not financially responsible for resolving interference complaints located outside the blanketing contour.

THE LOCAL PUBLIC INSPECTION FILE

Requirement to Maintain a Public Inspection File

The FCC requires all TV and radio stations and applicants for new stations to maintain a file available for public inspection containing documents relevant to the station's operation. The public inspection file generally must be maintained at the station's main studio. The station must make its public inspection file available at its main studio at any time during regular business hours. A station that chooses to maintain all or part of its public file in a computer database must provide a computer terminal to those who wish to review the file. Stations must keep the following materials in their public inspection file:

The License. Stations must keep a copy of their current FCC license in the public file, together with any material documenting FCC-approved modifications to the license. The license reflects the station's technical parameters (authorized frequency, call letters, operating power, transmitter location, etc.), as well as any special conditions imposed by the FCC on the station's operation. The license also indicates when it was issued and when it will expire.

Applications and Related Materials. The public file must contain copies of all applications that are pending before either the FCC or the courts. These include applications to sell the station or to modify its facilities (for example, to increase power, change the antenna system, or change the transmitter location); copies of any construction or sales application whose grant required the FCC to waive our rules; applications that required the FCC to waive its rules; renewal applications granted for less than a full license term (the FCC grants short-term renewals when it is concerned about the station's performance over the previous term).

Citizen Agreements. Stations must keep a copy of any written agreements they make with local viewers or listeners. These "citizen agreements" deal with programming, employment, or other issues of community concern. The station must keep these agreements in the public file for as long as they are in effect.

Contour Maps. The public file must contain copies of any service contour maps or other information submitted with any application filed with the FCC that reflects the station's service area and/or its main studio and transmitter location. These documents must stay in the file for as long as they remain accurate.

Material Relating to an FCC Investigation or a Complaint. The station must keep this material until the FCC notifies it that the material may be discarded. Since the FCC is not involved in disputes regarding matters unrelated to the Communications Act or our rules, stations do not have to keep material relating to such matters in the public file.

Ownership Reports and Related Material. The public file must contain a copy of the most recent, complete Ownership Report filed for the station. This report has the names of the owners of the station and their ownership interests, lists any contracts related to the station that are required to be filed with the FCC, and identifies any interest held by the station licensee in other broadcast stations.

List of Contracts Filed with the FCC. Stations have to keep either a copy of all the contracts that they have to file with the FCC, or an up-to-date list identifying all such contracts. If the station keeps a list and you ask to see copies of the actual contracts, the station

must give them to you within seven days. Such contracts include network affiliation contracts; contracts relating to ownership or control of the licensee or permittee or its stock. Examples include articles of incorporation, bylaws, agreements providing for the assignment of a license or permit or affecting stock ownership or voting rights (stock options, pledges, or proxies), and mortgage or loan agreements that restrict the licensee or permittee's freedom of operation; management consultant agreements with independent contractors, and station management contracts that provide for a percentage of profits or sharing of losses.

Political File. Stations must keep a file containing records of all requests for broadcast time made by or for a candidate for public office. The file must identify how the station responded to such requests and (if the request was granted) the charges made, a schedule of the time purchased, the times the spots actually aired, the rates charged, and the classes of time purchased. The file must also reflect any free time provided to a candidate. The station must keep the political records for two years after the spot airs. You can find the political broadcasting rules elsewhere in this manual.

Letters and E-Mail from the Public. Commercial stations must keep written comments and suggestions received from the public regarding their operation for at least three years. Noncommercial stations are not subject to this requirement.

Issues/Programs List. Every three months, all stations must prepare and place in their file a list of programs that have provided their most significant treatment of community issues during the preceding three months. The list must briefly describe both the issue and the programming where the issue was discussed. The stations must keep these lists for the entire license term.

Children's Television Programming Reports. The Children's Television Act of 1990 and our rules require all TV stations to air programming that serves the educational and informational needs of children 16 and under, including programming that is specifically designed to serve such needs. In addition, commercial TV stations must make and retain Children's Television Programming Reports identifying the educational and informational programming for children aired by the station. (Noncommercial stations are not required to prepare these reports.) The report must include the name of the person at the station responsible for collecting comments on the station's compliance with the law. The station has to prepare these reports each calendar quarter, and it must place them in the public file separately from the file's other material. Stations must keep the reports for the remainder of their license terms. You can also view

each station's reports on our web site at <http://www.fcc.gov/mb/policy/kidstv.html>.

Records Regarding Children's Programming Commercial Limits. The Children's Television Act of 1990 and our rules limit the type and amount of advertising that may be aired in TV programming directed to children 12 and under. On weekends, commercial television stations may air no more than 10.5 minutes of commercials per hour during children's programming, and no more than 12 minutes on weekdays. Stations must keep records that substantiate compliance with these limits.

Radio Time Brokerage Agreements. A time brokerage agreement is a type of contract that generally involves a station's sale of discrete blocks of air time to a broker, who then supplies the programming to fill that time and sells the commercial spot announcements to support the programming. Commercial radio stations must keep a copy of every agreement involving: (1) time brokerage of that station; or (2) time brokerage by any other station owned by the same licensee.

List of Donors. Noncommercial TV and radio stations must keep a list of donors supporting specific programs for two years after the program airs.

Local Public Notice Announcements. When someone files an application to build a new station or to renew, sell, or modify an existing station, the FCC often requires the applicant to make a series of local announcements to inform the public of the application's existence and nature.

Must-Carry or Retransmission Consent Election. There are two ways that a broadcast TV station can choose to be carried on a cable TV system: "must-carry" and "retransmission consent." All TV stations are generally entitled to be carried on cable television systems in their local markets. A station that chooses to exercise this must-carry right receives no compensation from the cable system. Instead of exercising their must-carry rights, TV stations may choose to receive compensation from a cable system in return for granting permission to the cable system to carry the station. This option is available only to commercial TV stations. Every three years, commercial TV stations must decide whether their relationship with each local cable system will be governed by must-carry or by retransmission consent agreements. Each commercial station must keep a copy of its decision in the public file for the three-year period to which it pertains. Noncommercial stations are not entitled to compensation in return for carriage on a cable system, but they may request mandatory carriage on the system. A noncommercial station making this request must keep a copy of the request in the public file for the duration of the period to which it applies.

Glossary of Terms

AM—Amplitude modulation. Also referring to audio service broadcast over 535 khz-1705 khz.

Analog—AA continuous electrical signal that carries information in the form of variable physical values, such as amplitude or frequency modulation.

Basic cable service—Package of programming on cable systems eligible for regulation by local franchising authorities under 1992 Cable Act, including all local broadcast signals and PEG (public, educational and government) access channels.

Cable television—System that transmits original programming, and programming of broadcast television stations, to consumers over wired network.

CC—Closed captioning. Method of transmitting textual information over television channel's vertical blanking interval; transmissions are deciphered with decoders; decoded transmissions appear as text superimposed over television image.

Clear channel—AM radio station allowed to dominate its frequency with up to 50 kw of power; their signals are generally protected for distance of up to 750 miles at night.

Closed circuit—The method of transmission of programs or other material that limits its target audience to a specific group rather than the general public.

Coaxial cable—Cable with several common axis lines under protective sheath used for television signal transmissions.

Common carrier—Telecommunication company that provides communications transmission services to the public.

DAB—Digital audio broadcasting. Modulations for sending digital rather than analog audio signals by either terrestrial or satellite transmitter with audio response up to compact disc quality (20 khz).

DBS—Direct broadcast satellite. High powered satellite authorized to broadcast direct to homes.

Digital—A discontinuous electrical signal that carries information in binary fashion. Data is represented by a specific sequence of off-on electrical pulses.

Directional antenna—An antenna that directs most of its signal strength in a specific direction rather than at equal strength in all directions. Used chiefly in AM radio operation.

Downlink—Earth station used to receive signals from satellites.

Earth station—Equipment used for transmitting or receiving satellite communications.

EDTV—Enhanced-definition television. Proposed intermediate systems for evolution to full HDTV, usually including slightly improved

resolution and sound, with a wider (16:9) aspect ratio.

Effective competition—Market status under which cable TV systems are exempt from regulation of basic tier rates by local franchising authorities, as defined in 1992 Cable Act. To claim effective competition, a cable system must compete with at least one other multi-channel provider that is available to at least 50% of an area's households and is subscribed to by more than 15% of the households.

Encryption—System for scrambling signals to prevent unauthorized reception.

ENG—Electronic news gathering.

ETV—Educational television.

Fiber-optic cable—Wires made of glass fiber used to transmit video, audio, voice or data providing vastly wider bandwidth than standard coaxial cable.

Field—Half of the video information in the frame of a video picture. The NTSC system displays 59.94 fields per second.

FM—Frequency modulation. Also referring to audio service broadcast over 88 mhz-108 mhz.

Footprint—Area on earth within which a satellite's signal can be received.

Frame—A full video picture. The NTSC system displays 29.97 525-line frames per second.

Frequency—The number of cycles a signal is transmitted per second, measured in hertz.

Geostationary orbit—Orbit 22,300 miles above earth's equator where satellites circle earth at same rate earth rotates.

ghz—Gigahertz. One billion hertz (cycles) per second.

HDTV—High-definition television.

Headend—Facility in cable system from which all signals originate. (Local and distant television stations, and satellite programming, are picked up and amplified for retransmission through system.)

Hertz—A measurement of frequency. One cycle per second equals one hertz (hz).

Independent television—Television stations that are not affiliated with networks and that do not use the networks as a primary source of their programming.

Information services—Broad term used to describe full range of audio, video and data transmission services that can be transmitted over the air or by cable.

Interactive—Allowing two-way data flow.

Interlaced scanning—Television transmission technique in which each frame is divided into two fields. NTSC system interleaves odd-numbered lines with even-numbered lines

at a transmission rate of 59.94 fields per second.

ITFS—Instructional Television Fixed Service.

khz—Kilohertz. One thousand hertz (cycles) per second.

LED—Light emitting diode. Type of semiconductor that lights up when activated by voltage.

LO—Local origination channel.

MDS—Multipoint distribution service.

mhz—Megahertz. One million hertz (cycles) per second.

Microwave—Frequencies above 1,000 mhz.

MSO—Multiple cable systems operator.

Must carry—Legal requirement that cable operators carry local broadcast signals. Cable systems with 12 or fewer channels must carry at least three broadcast signals; systems with 12 or more channels must carry up to one-third of their capacity; systems with 300 or fewer subscribers are exempt. The 1992 Cable Act requires broadcast station to waive must-carry rights if it chooses to negotiate retransmission compensation (see "Retransmission consent").

NTSC—National Television System Committee. Committee that recommended current American standard color television.

PCM—Pulse code modulation. Conversion of voice signals into digital code.

PPV—Pay-per-view.

Progressive scanning—TV system where video frames are transmitted sequentially, unlike interlaced scanning in which frames are divided into two fields.

PSA—Public service announcement.

PTV—Public television.

Public radio—Radio stations and networks that are operated on a noncommercial basis.

Public television—Television stations and networks that operate as noncommercial ventures.

RCC—Radio common carrier. Common carriers whose major businesses include radio paging and mobile telephone services.

Retransmission consent—Local TV broadcasters' right to negotiate a carriage fee with local cable operators, as provided in 1992 Cable Act.

SCA—Subsidiary communications authorizations. Authorizations granted to FM broadcasters for using subcarriers on their channels for other communications services.

Shortwave—Transmissions on frequencies of 6-25 mhz.

SHF—Super high frequency.

Signal-to-noise ratio—The ratio between the strength of an electronically produced signal to interfering noises in the same bandwidth.

SMATV—Satellite master antenna television.

STV—Subscription television.

Superstation—Local television station whose signal is retransmitted via satellite to cable systems beyond reach of over-the-air signal.

Teletext—A one-way electronic publishing service that can be transmitted over the vertical blanking interval of a standard television signal or the full channel of a television station

or cable television system. The major use today is for closed-captioning.

Translator—Broadcast station that rebroadcasts signals of other stations without originating its own programming.

Transponder—Satellite transmitter/receiver that picks up signals transmitted from earth, translates them into new frequencies and amplifies them before retransmitting them back to ground.

UHF—Ultra high frequency band (300 mhz-3,000 mhz), which includes TV channels 14-83.

Uplink—Earth station used for transmitting to satellite.

VHF—Very high frequencies (30 mhz-300 mhz), which include TV channels 2-13 and FM radio.

Videotext—Two-way interactive service that uses either two-way cable or telephone lines to connect a central computer to a television screen.

Dollar Volume of Transactions (number of stations changing hands)

Note: Dollar volume figures represent total considerations reported for all transactions with exception of minority interest transfers in which control of stations did not change hands and stations sold as part of larger company transactions. Although all states have been approved by the FCC, they may not necessarily have reached final closing. Prior to 1978, combined AM-FM facilities were counted as one station in computing total number of stations traded. Now AM-FM combinations are counted as two stations.

*Starting in 1993, the Radio only column includes only stand alone AM and FM deals and the Groups column contains AM-FM combos and all other multiple station deals. In previous years the AM-FM combos were included under Radio only.

**Figures for 2000 to 2008 courtesy of BIA Financial Network.

Key to TV Listings

Television listings include TV stations in the United States, its territories and Canada. All collected data for these listings include information current to fall 2012. To use the television key, see boldface numbers and corresponding explanations.

**(1) WOF-TV (2) Digital Channel: 53 Virtual Channel: 17 hrs: 24 2,200 kw vis , 20 kw aur, ant 500t/300g. TL: N36 49 21 W108 47 32 (CP: Ant 750t/550g) (3) On air date: Apr 13, 1952. (4) Box 100, Dothan, AL 36301. Phone: (909) 555-1000 FAX: (909) 999-9999. Web Site www.wot.tv. (5) Licensee: WOF Broadcasting Co. (6) Group Owner: Acme Stations (acq 7-20-69; \$2 million. (7) Population served: 230,000 (8) Natl. Network: CBS. (9) Natl. Rep: Jones, Tri-State. Washington Atty: Goltz & Stick. (10) News staff: 3; 10 hrs wkly. (11) Key Personnel:
 Jud Jones..... Pres & Gen Mgr
 D. Spark..... Chief Engineer**

- (1)** Station call letters as assigned by the Federal Communications Commission (FCC) or Canadian Radio-television and Telecommunications Commission (CRTC)
- (2)** Virtual channel and digital channels, hours of operation, power, antenna, location and construction permit. WOF-TV operates with 2,200 kilowatts (effective radiated power) visual and 20 kilowatts aural. Its antenna is 500 feet above average terrain and 300 feet above ground. N36 49 21 W108 47 32 refers to the geographical coordinates (latitude and longitude) of the transmitter location, WOF-TV holds a construction permit for an antenna height change to 750 feet above average terrain, 550 feet above ground.
- (3)** Date station first went on the air (regardless of subsequent ownership changes)
- (4)** Address and zip code, telephone and fax number, web site and e-mail address.
- (5)** Licensee name.
- (6)** Ownership and date of acquisition (if not original owner). If a station has been sold, any available sale information is listed following the acquisition date. WOF-TV is owned by Acme Stations.
- (7)** Population served refers to the station's potential market.
- (8)** Network programming. WOF-TV's national network is CBS.
- (9)** Representatives and Washington attorney. Sales representatives are listed with the national rep first, then regional.
- (10)** Number of staff providing local news and number of local news aired weekly.
- (11)** Key personnel.

An asterisk () preceding station call letters indicates noncommercial stations*

DMA Cross Reference List

Understanding this report ...

This chart shows the Top 30 TV programs for all national networks and Canadian English specialty networks for the week indicated. Programs are ranked based on their AMA(000). AMA(000) is the average minute audience in thousands. The chart also indicates the broadcast outlet on which the program aired and the program's start and end time (shown in Eastern Time).

www.inuitbroadcasting.ca
info@inuitbroadcasting.ca

Services Offered: The Inuit Broadcasting Corporation provides a window to the Arctic by producing award winning television programming by Inuit, for Inuit. IBC is indeed, Nunavut's public producer. IBC does not produce the regular fare of TV sitcoms and talk shows. Instead, IBC producers make programming about one of the richest and enduring cultures in our nation, the Inuit of Canada, in the language Inuit speak, Inuktitut. We produce shows about our kids, our musicians, our politicians, our humour, our issues, etc. No one else can make these shows for us!
