The Lafayette Priva-Com 10 is a boon to users of multiple mobile or remote stations. Now you can reach a specific mobile unit in your fleet at the push of a button. No need to continuously monitor the air...you save time and money. Expertly designed solid state circuitry features push-button selection and communications with any one of 10 mobile stations at any one time, or with any assorted quantity of remote stations using up to 10 different dual tone frequencies. The remote mobile remains quiet until the call signal from the Priva-Com 10 activates the receiver. When the remote or mobile station initiates a call to the base station, the Priva-Com 10 indicator lamps signal and identify the call. The indicator lamps remain lit until the

reset button is depressed. With a remote speaker or horn connected to the external speaker/horn terminals an audible signal can be heard with the incoming call. A standby switch permits continuous active operation with a minimum of current drain. AC convenience outlet for lamps, etc. Attractively styled with brushed aluminum panel and oiled walnut wood case. Real Tiny: 1¼ H x 3½ W x 6¼ D. • Compatible with Lafayette Priva-Com IV and Priva-Com 10

Using a new ingeniously designed ceramic and resonant tuning fork circuitry instead of conventional reed relays, the Priva-Com III is exceptionally adaptable for reliable mobile as well as fixed station performance. Its tiny size makes it a handsome mate for even the smallest solid state CB transceivers. Its dual tone signal minimizes the possibility of the transceiver speaker being turned on by stray ignition and power line signals. The Priva-Com III mutes the receiver. When its call switch is activated, either at base or mobile stations, the transmitted dual tone is received by the other Priva-Com III. The CB receiver is activated and the indicator light goes on. This light

stays on until manually reset. Both base and mobile units can initiate calls at any time. The Priva-Com III features simple-to-operate push-button switches for Standby, Normal, Call and Reset; a Volume Control; Indicator Light; and a sturdy mobile bracket for mounting under dash, under transceiver, etc. Supplied with 2 plug-in selective ceramic and resonant tuning fork filters, one for 817.5 cps, and one for 997.5 cps tone frequencies. - 1) MANUAL**—Same as any tape recorder, but permits manual reverse at any point by depressing a button. Sensing metallic foil is disregarded.
- 2) AUTOMATIC 1:** Tape moves in one direction and stops at end of tape where sensing metallic foil is located.
- 3) AUTOMATIC 2:** Single Reverse—Tape playing or recording from either left or right reel feeds to opposite take-up reel, reverses itself at the end of the tape where metallic sensing foil is located and then feeds back to starting reel and automatically stops.
- 4) AUTOMATIC 3:** Continuous Reverse—Tape continues changing (reversing) its direction at each end of the tape where the metallic sensing foil is located.

LAFAYETTE 13 1/4" VECTØRLOG® SLIDE RULE

For Communications Engineers and Physicists

- Laminated Bamboo Construction • P, P', and Q Scales • For Direct Vector Addition • Hyperbolic Sine and Tangent Scales; Two Sine Scales—One Marked in Degrees, One Marked in Radians • 5 Log Log Scales Plus a Voltage DB Scale • Complete with Belt Carrying Loop and Leather Case • With 10" Scale

The Lafayette VECTØRLOG Slide Rule provides a new concept in scientific calculation, incorporating scales and arrangement designed for quick-easy-manipulation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. VECTØRLOG is the result of extensive tests for ease of manipulation. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units: A problem-tested location of scales; and adjustment screws to allow variable tension on the slide. Scales include: (FRONT) TR-1, TR-2, P', P. Q. ST, S-1, S-0, C, D, LLO1, LLO2, LLO3, LL1'; (REAR) Sh-1, Sh-2, DF, A, B, Cl, CF, Th, C, D, LL3, LL2, db. Model PF-175

An advanced FM receiver that is outstanding in performance and features. Covers two VHF communications bands with super-sensitivity—fully tuneable or can be crystal-controlled for reception on a single frequency in either band. Also tunes to 162.55 Mc and 163.275 Mc U.S. Weather Bureau reports and disaster alarms in many parts of the country. Superheterodyne circuit includes tuned RF and mixer stages. Four IF stages, each using an advanced space-age Integrated Circuit (IC). No larger than a tiny transistor, each IC is actually a complete circuit with 5 transistors and 2 resistors—you get the equivalent of 20 transistors in the IF stages alone! 100% solid state design offers top reliability too! "Instant-on" transistor circuit permits immediate response to emergencies! Built-in universal power supply assures continuous monitoring under any conditions—the unit also operates from a 12VDC battery supply for field use or as an emergency portable if AC power fails. Front panel controls include a 4-position selector for choice of Xtal or

Tuneable reception on either of the two VHF bands. Variable squelch control lets you silence the receiver during no-signal conditions to reduce monitoring fatigue. Also equipped with illuminated slide-rule dial, plus handy on-off volume control. Has a handsomely styled vinyl-clad steel cabinet in a simulated walnut wood-grain finish, and equipped with built-in 4" front-mounted speaker and external phone jack.
