 AM Superhet Tuner to go
 with above Amplifier!

**\$25.00
 VALUE**

\$6⁹⁵

Exceptionally good tone quality, unbelievable low price. For use with Record players and Radio tuners such as the Browning tuner listed elsewhere in this Catalog and the Lear tuner listed at right.

It is Model A472 Lear Amplifier used with their WC-311-D wire recorder. Uses 6SJ7 driver amplifier, 6SJ7 phase inverter and push pull 6V6 power amplifiers. Has inverse feed back. Output 6-8 ohms. Input is high impedance direct to grid. Volume control can easily be added if the record player or tuner used does not have one.

Power supply has reserve output, (in addition to power used in the amplifier), of 290 volts DC at 100 MA and 6.3 volts at 8 amps, and approx. 20 volt negative bias. Original schematic diagram is furnished with suggestions for adding volume control.

Overall size 14" long, 6 3/4" wide and 6 1/2" high. Weight 20 lbs.
 No. 35A199. Complete with Tubes and plugs.
 NET EACH \$13.88 ^{3 Lots} Each... \$12.88

QUALITY AM SUPERHET TUNER

A really "Hot" broadcast tuner with good sensitivity and excellent tone quality.

Made to use with the Lear wire recorder amplifier Model A472 listed at left.

It may also be used on any phono or PA amplifier system. Requires 250 V. DC at 20 MA. and 6.3 V. at .9 amp. Output is high impedance with shielded lead and pin plug. Circuit does not include volume or tone controls allowing full use of such controls on the amplifier to be used. Original schematic diagram with full explanation is furnished. Tubes used are 6BE6 RF and Mixer, 6BA6 IF Amplifier and 6BF6 second detector and audio amplifier. Has simple shock mounting, overall size 5 1/2" wide, 6 1/2" high, and 6 1/2" deep. Wt. 3 lbs. Furnished with Bronze metal dial escutcheon, over all size 6" x 2 5/8". Cutout required 5 1/4" x 1 3/4".

No. 35A198. With Tubes and Diagram.

 (F) Model 92 Extension. Attractive chrome-plated screw base tubular construction with locking top nut and clamp to provide 16 inches of length adjustment for resonating antenna. Overall length 18 3/4". Use with series 106 Rods and spring mounts above. No. 38B37. Wt. 14 oz. each \$2.91

STANCOR'S ST-203-A MOBILE TRANSMITTER KIT

Designed primarily for mobile operation, the ST-203-A is also useful for fixed station service. You can operate this small, compact transmitter in your car, then quickly transfer it for use at your regular shack, or other fixed location.

Mobile Transmitter Model ST203-A. A 25-watt crystal controlled phone transmitter 27 to 32 MC, designed for your car or fixed station operation. Requires 400/500 DC volts at 200 MA and 6 volts AC or DC at 2.8 amps, which can be supplied from dynamotor, vibrator power supply or regular AC supply. Uses 6V6 osc. working from 7 MC crystals, 2E26 class C amp., 6J5 grounded grid speech amp. and P.P. 6V6 Modulators. Press-to-talk Mike switch operates the unit. Osc. amp., and antenna controls are on front panel as well as antenna jacks, mike and meter jacks with meter, and crystal switch, allowing choice of two crystals. Size, 8 3/8" wide, 7 3/8" high, 6 3/4" deep. Weight, 9 1/4 lbs. Has base mounting clip fasteners. Less tubes and crystals.

MORE BIG SAVINGS FOR THE RADIO AMATEUR!

Harvey - WELLS BANDSWITCHING TRANSMITTER

PUT REAL PUNCH IN YOUR MOBILE RIG OPERATION!

\$111.50

COMPLETE WITH TUBES WIRED AND TESTED

- 40 to 50 watts on all bands 80 thru 2 meters.
- Band switching—no plug in coils.
- The dynamotor featured on opposite page will furnish ample power.
- Small size—8" wide, 12" high and 8" deep.
- Use for fixed station operation with AC power supply.

This new improved Bandmaster Senior has many new features including switching for internal crystal oscillator or external VFO. Broad tuned exciter circuits do not require retuning when changing frequency. Work either Phone or CW, eight bands, 80-40-20-15-11-10-6 and 2 meters. A power supply of 450 volts up to 275 MA is required and for the filament, 6.3 volts at 4 amps.

Tubes used are 6AQ5 crystal oscillator, 6AQ5 buffer multiplier and 807 final amplifier with two 6L6 class B modulators. Requires only a low priced T17B or Learadio carbon microphone for full modulation. Comes complete with tubes, is wired and tested ready to go. Shpg. wt. 18 lbs. No. 37A123. Complete as described, less crystal and Microphone. **\$111.50 EACH.**

NEW! SECOND EDITION

TELEVISION INTERFERENCE HANDBOOK

Only 50¢

Helps to determine and eliminate sources of television interference. No. 16B249. EACH. **50¢**

NEW EFFICIENT BYPASS SPRAGUE CAPACITORS

ELIMINATES TELEVISION INTERFERENCE ORIGINATING FROM AMATEUR OR COMMERCIAL TRANSMITTERS, DIATHERMY OR OTHER HIGH FREQUENCY HEATING APPARATUS.

Meets requirements outlined by headquarters of ARRL and featured in QST and CQ. Unlike conventional bypass capacitors which are self-resonant at relatively low frequencies and are consequently ineffective for V-L-F filtering and bypassing. The Highpass Capacitors in most cases are far more effective than ordinary choke-capacitor filters. The design is a simple 3-terminal feed-thru device used in series with the circuit being filtered. The case is the third terminal to ground.

Type 48P9 is used in power line and filament circuits up to 20 amps. Circulating current for 47P16 and 47P15 2 amps. — 47P13 and 47P14 is 3 amps. — 47P12 is 4 amps.

TV CHASSIS

PICTURE TUBE INCLUDED!

THIS IS NOT A KIT!
But a Factory Custom Engineered, Factory Wired and Tested, Factory Aligned TV Chassis THAT'S READY TO USE—JUST PLUG IT IN AND IT WORKS!

We agreed not to mention the name... but you've seen it Nationally Advertised... a name you respect for "know how" and quality. You get the identical Chassis regularly priced at \$259.50 for only \$149.88! Big Picture Television at a cost as low as usually quoted for pictures half as large... plus the convenience of a custom installation.

Mount it in a cabinet of your own choosing—in a wall—in any location that meets your own requirements.

Unit construction makes it easy to fit odd spaces... the chassis, power supply, picture tube and speaker are all separate and interconnected with leads which may be extended as desired. The tuner chassis may be mounted with controls horizontal or vertical. The reinforced wood frame (illustrated) protects the units for shipping and allows the picture tube and chassis to be packed in one carton for economical handling. If desired, this frame with all units

mounted except speaker may be slipped right into a cabinet or built-in. Overall dimensions are 19 1/2" high, 23" wide, 21 1/4" deep.

15" direct view tube gives a 130 sq. in. picture. The all channel switch gives instant station selection. Also has fine tuning control on front panel. The circuit is highly engineered, using inter-carrier sound and allowing maximum sharpness of picture detail—definitely not to be confused with cheap AC-DC short cut construction now so common. 8" electro-dynamic speaker provides rich tone. Supplied complete with 19 tubes plus 3 rectifiers and 15DP4 Dumont picture tube. Completely factory wired and tested—ready to operate on 110-120 V. 60 cy. AC. Shpg. wt. 80 lbs.

Quantities are limited—all orders subject to prior sale. Order Now!

PUSH BUTTON CONTROLS FOR POPULAR LATEST MODEL CARS **\$49⁸⁸** PUSH BUTTON CONTROL FOR ANY MAKE OR MODEL CAR **\$46⁸⁸**

VERY SELDOM DOES A VALUE LIKE THIS COME ALONG . . .

It was made possible because Tucker in his plans for an outstanding car, purchased from Motorola, Inc., the tops in an Auto Radio to use as a part of an accessory deal to be offered with it. When the Tucker plans "blew up" there were no Autos to sell but the radios were on hand. B-A made a "good buy" and here it is passed on to you. Brand New—untouched—still in the original factory cartons bearing the Tucker name. The set itself as pictured above is inscribed with the name MOTOROLA Model 708. It's an 8-Tube set (including rectifier) using a 6BA6 RF amp., 6BE6 osc. mod., 6BA6 IF amp., 6AT6 Det. AVC AF., 6AT6 audio inverter, two 6V6GT PP audio and 6X4 rectifier. 3-Gang permeability tuning with tuned RF stage provides razor sharp selectivity. The superhet circuit uses latest miniature tubes, iron core IF and diode coils. Other features include a heavy duty vibrator power supply with tube rectifier,—delayed AVC—built-in noise filter—variable sensitivity control. Speaker conceals behind dash. **PUSH-PULL AUDIO SYSTEM** — Uses 2-6V6GT beam power tubes, heavy duty Alnico V dynamic speaker and provides a surprisingly rich tone with emphasis on a natural mellow bass response. . . . remote solenoid operates tone control.

EXTREMELY COMPACT—Size 9 5/8" wide x 6 1/2" high x 5 1/2" deep. Wt. 18 lbs. Easy to mount in latest model cars. **ELECTRIC PUSH-BUTTON TUNING CONTROLS** to exactly match and fit space provided in the late and popular cars as listed below are included with each set. Also included is the mtg. hdwe., speaker baffle etc. needed for custom installation. Custom Controls with Custom Speaker Baffle are available for the following Cars: Please specify make and year of Car when ordering. Shpg. wt. 18 1/2 lbs.

REVOLUTIONARY NEW WINDOW FAN!

WIND-O-COOL 20 INCH \$35.69 LIST PRICE \$49.95

FAN TILTS TO BRING FRESH, COOL AIR IN AT ANY DESIRED ANGLE

NO OTHER FAN HAS THESE OUTSTANDING FEATURES!

- The ONLY window fan with white opaque PLASTIC cloth expanders, supported by four adjustable aluminum tubes to ANY window width from a minimum of 25" to maximum of 45". Aluminum adjustable rods have rubber pads on their ends, provide sound insulated support to sides of window frame.
- FITS ANY WINDOW from 25" to 45" in width; fan is 24 1/2" high.

THE ONLY TURNABOUT WINDOW FAN

... permitting instant adjustment for WARM AIR OUT or COOL AIR IN without removing fan from its frame, mounting!

Quiet, Rubber grommets completely insulate the fan, guard and motor housing from the frame—provide a cushioned "rubber ride" for all moving parts. Rubber feet on bottom of fan frame insulate entire assembly from window sill!

20-Inch balanced aluminum 4-blade Fan moves 3500 Cu. Ft. of air per minute—in or out as desired—at fan speed of 1050 rpm; Three speed switch provides selective speeds of 650 rpm; 850 rpm; or 1050 rpm.

Heavy duty "GE" motor is lifetime lubricated—No oiling—motor housing is vented for cooling; has On-Off switch with THREE "On" speeds. 8-foot plastic cord and plug will not deteriorate from sun or heat!

"No tools" installation—Easily installed in grooves where window slides by placing under raised window and extending expanders and plastic curtains on both sides to fill out window width—or—may be installed on face of window casing, to allow window to open and close behind fan.

Spiral coil design Chrome Plated Guard completely covers fan blades front and back, front easily removed for cleaning. Thumb nut adjustment allows complete turnabout of fan from "warm air out" to "cool air in"—may be set at any angle for "cool air in"!

Beauty—Ivory enamel finished frame, blades and motor housing; Chrome Plated fan guard and trim! Low cost operation—approx. operating cost on high speed, 1/2c per hour!

For operation only on 110-125 volt, 60 cycle AC current, requires 228 watts at high speed of 1050 rpm. to move air volume of 3500 Cu. Ft. per minute.

20-Inch "WIND-O-COOL" Adjustable Window Fan. (List Price, \$49.95) No. 40A103. Shpg. wt. 30 lbs. \$35.69 3 @ \$33.80

ANCHOR 2-STAGE TV BOOSTER MODEL ARC-101-100
LIST VALUE \$44.95
ONLY

\$26.43

Increases Original TV Signal Strength 5 Times.

Features TWO stages of amplification in the most stable non-regenerative circuit available—delivers sharp snow-free pictures even under the most difficult conditions. Single knob control of tuning and switching provides great ease of adjustment. Engineered for extra-wide band-width to cover both video and audio channels without loss of picture or tone quality. Modernly styled with streamlined illustration.

minated dial with plastic escutcheon. Case is all metal with two-tone soft mahogany leatherette finish. For operation with 300 ohm twin lead lines. Supplied with 2-6AK5 tubes and selenium rectifier for 105-125 V. 50-60 cy. operation. Size 4 1/8 x 8 3/8 x 4 3/4" Spp. wt. 6 lbs. List \$44.95

DECIMETER "PROFESSIONAL" TWO STAGE TV PREAMPLIFIER
LIST PRICE \$59.50

\$35.77

WITH BEAUTIFUL WALNUT WOOD CABINET.
Incorporates every refinement of technical design to assure maximum useable amplification.
All tuned elements of the circuit have been factory aligned for uniform broad band coverage.

Special attention has been devoted not only to increasing the signal without distortion, but also to excluding all types of interference which mar reception. The circuit incorporates two stages of balanced push-pull amplification using stable double triode 6J6 tubes. A gain switch allows less amplification for local stations if desired. Its use on locals reduces interference and actually improves picture quality. Response has been engineered to

eliminate extra tuning controls yet avoid picture and sound distortion. Channels are selected by the turn of a switch. An ingenious shadow dial shows channel in operation. Cabinet is handsome walnut wood to harmonize with most furniture. Size 9" x 7" x 7 1/8". H. Operates on 105-120 V. 50-60 cy. AC. Shpg. wt. 9 lbs. List \$59.50.

THE \$\$\$ SAVING ANTENNA VALUE OF THE YEAR!

\$13.80 Each
Lots of 3

For Long Distance TV Reception this 6 Element Stacked Yagi Antenna Gives 8 1/2 DB Signal Boost

- Developed especially for extreme distance reception and maximum rejection of interference noise.
- Inherent directional characteristic of the Yagi design prevents interference from other TV stations where the ordinary type antenna would allow signal pickup from the rear or side.

Electrically, the array consists of two 3 element Yagi bays phased and matched by means of a special transmission line made of aluminum tubing. A very good impedance match is thus provided for 300 ohm twin lead. The band width is such that adjacent channels to the one for which the array is tuned may be received with approx. 6 db. gain, but maximum performance (8 1/2 db. gain) can be had only on one specific channel. Mechanically designed to give maximum strength and withstand severe ice and wind conditions. Made

throughout of full-hard aluminum alloy tubing. The mast sections and the crossarms are 1 1/4" diameter. All elements are 7/16" .035 wall tubing. All hardware including screws are cadmium plated. Insulation is tough phenolic. Assembly is easily completed. Full instructions included. Supplied with two 5 ft. mast sections, less transmission line. Shpg. wt. 10 lbs. Available for channels 2 thru 6. Specify channel when ordering. No. 39A9. Your Cost Each \$14.95 Lots of 3, Each \$13.80

NOW LOW, LOW PRICES ON TV ANTENNAS AND ACCESSORIES

(A) FOR ALL CHANNELS
Rad-El-Co. Model RT-40LL Folded Dipoles and Reflectors. An outstanding value. Strongly constructed—easily assembled. Uses 1/2" aluminum elements, 3/8" aluminum boom and 1" steel mast, zinc plated inside and out. The 8-ft. mast comes in two 4-ft. sections that lock together firmly. Included are guy wire ring mast stand-off insulator, a wall bracket and a universal mounting base. Antenna sections may be oriented separately. Less 300-ohm lead.
No. 38A88. Net Each \$6.44
(B) FOR LOW CHANNELS 2-6
Rad-El-Co. Model RT-42LL Folded Dipole and Reflector. Another remarkable value. Uses same materials and construction as above antenna. Supplied with same 8-foot mast and mounting accessories. Less 300-ohm lead.
No. 38A89. Net Each \$5.26

(C) FOR ALL CHANNELS
RAD-EL-CO. MODEL RT-44LL "X" TYPE with Reflector. A great value in all-channel antennas. Very popular in low signal areas. With 8-ft. steel mast and mounting accessories. Less lead.
No. 38A90. EACH \$6.73

(D) ALL BAND STACKED CONICAL
Provides high signal pickup on all channels with minimum noise and less fading. Reduces ghost reflections. Used widely in fringe areas. Elements are aluminum, cross arms and brackets are plated steel. Can be assembled in a jiffy. Less mast and 300 ohm lead.

NEW RADICALLY IMPROVED

Television Booster
Astatic Channel Chief
Model AT-1 Booster

\$29¹¹ Net

- Has Gain Equivalent to Two Ordinary Boosters
- Covers All 12 Channels with Very Uniform Gain
- Dual-Tuning eliminates Sacrifice of Good Sound for Good Picture, or Vice Versa.

The NEW Astatic Channel Chief, Model AT-1 Television Booster, eliminates the common failing of many boosters—showing a "peak" on some channels and "fall-off" on others. The Channel Chief provides extremely high gain, uniform on all 12 television channels. Its dual controls allow separate tuning of picture and sound, with no sacrifice of one for the other. A variable gain control permits reduction of signal strength to prevent picture distortion when the signal input is greater than that required for good definition. Altogether, the results are the considerable extension of fringe areas, good reception in areas previously rated as unsatisfactory, easier tuning and added selectivity on any receiver, elimination of the need for expensive outdoor antennas within service areas. The increased selectivity serves to reduce drastically, or eliminate, interference.

FEATURES!

- 1 Self-contained power supply operating from 115 volt, 60 cycle AC power line.
- 2 On-off switch allows booster to be switched in or out of the circuit at will.
- 3 Recessed pilot light indicates when booster is on.
- 4 Beautiful, furniture-finish mahogany cabinet (8 1/2" wide X 6 1/2" high X 7 3/8" deep) to complement fine home furnishings.
- 5 Simple to install and operate—complete instructions with each unit. Weight, 5 3/4 lbs. No. 37A122 NET EACH \$29.11

ALPRODCO ALUMINUM TOWERS FOR TV-FM AND AMATEUR ANTENNAS

Only
\$8⁵⁶ Factory Assembled 6-Foot Sections

Constructed of high strength spring tempered aircraft aluminum. Very light in weight—only one pound per foot! Will carry top loading of 200 pounds at maximum height of 120 feet and withstand 100 MPH wind. Requires guying every 30 feet. Can be raised from horizontal in lengths of 42 feet. Additional height is obtained by adding 6 foot sections at bottom.

FACTORY ASSEMBLED 6 FOOT SECTIONS. Held to close tolerance and permanently assembled with aircraft rivets. Sections fasten together with aircraft bolts and lock nuts. Wt. 6 lbs. No. 39A7 **\$8.56** Net Each

LOW COST YAGI BEAM ANTENNA FOR EXTREME FRINGE AREA TV RECEPTION

\$20⁵⁸ EA.

Uses 4 elements—2 directors, a double folded dipole and a reflector with length and spacing of elements set by factory for optimum gain and performance on one channel, though considerable gain may be expected on adjacent channels.

The double folded dipole provides impedance step-up for efficient direct feed to a 300 ohm line.

Extreme light weight has been obtained without sacrificing sturdiness of construction. Elements are aluminum. Furnished with 6 ft. mast of 1 1/4" dia. tubing, adjustable roof bracket and guy wire ring. Shipped partially assembled—very easy to complete. Specify channel when ordering. Wt. 9 lbs. No. 39A6. **\$20.58** Less 300 Ohm lead. Each

BRAND NEW! THE RADIART TELE-ROTOR FOR ROTATING TELEVISION AND AMATEUR ANTENNAS

A TRIUMPH IN DESIGN!!

THERE'S NOTHING LIKE IT!!

\$26⁴³

The result of two years of engineering time and many thousands of dollars spent for development and improvements. Nothing has been overlooked, nothing spared in making this the last word in trouble-free rotators.

- Will support and rotate 150 pounds with ease.
- More turning power than you'll ever need.
- Built-in 6 1/2" dia. ball thrust bearing. Additional bearing not required for heavy antennas.
- Takes up to 2" upper or lower masts. (Masts are in line). Has 4 Guy Wire holes.
- Mast, Tower or Flat Platform Mounting.
- Entire housing is high strength aluminum, not zinc. Completely weather-proof.
- 375 degree rotation with positive stop. Reverses instantly when desired.
- Uses Oilite and Ball Bearings. Lubricated for life.
- Has capacitor AC Motor—24 Volt operation. Transformer in control box.
- Direction indicator positively not affected by line voltage changes. Provisions on indicator dial for marking station call letters.

Control box is of pleasing design, made of molded walnut brown plastic, equipped with non-scratch rubber feet. A system of indicator lights shows step by step rotation of antenna. Contained within the control are the direction switch, 24 V. transformer and motor capacitor. Control size overall, 6" long, 4 1/2" wide, 5 1/2" high. Operates on 115 V. 60 cy. AC. Shpg. wt. of rotator and control 14 lbs.

No. 34A192. Model TR2 Rotator and Control. **\$26.43**

FARNSWORTH MODEL P51 WITH THE GE VARIABLE RELUCTANCE CARTRIDGE

\$14.95

INCLUDES THESE TOP FEATURES

- TONE CLARIFIER—FOR THE BEST POSSIBLE REPRODUCTION OF ANY RECORD—OLD OR NEW
- DELAYED DROP PRINCIPLE—FOR POSITIVE RECORD PROTECTION
- SURE ACTING—QUICK ACTION RECORD CHANGE WITH LONG TIME DEPENDABLE SERVICE

B-A sighted the Value! Purchased the lot—Here they go at a fraction of their original cost. Automatically plays twelve 10-Inch, or ten 12-inch Standard 78 RPM Records. Features the popular GE Variable Reluctance Cartridge Type RPX-010 with permanent sapphire stylus famous for its wide range reproduction with uniform frequency response and resistance to temperature or humidity conditions. (Requires use of a preamplifier—see below.) Changer incorporates a TONE CLARIFIER which furnishes the means for compensating for the scratch and noise level in various records. The lever type control has three tone positions—one for old records—one for new records—the other

for wide range. Constant speed 78 RPM motor automatically stops after the last record—tone arm returns to the rest position. Motor switch has—off, manual, automatic, and reject positions. Foolproof mechanism operates on the delayed drop principle. Records are handled only on the edges and are lowered gently to the turntable—eliminates possibility of chipping and marring of record surface. Size of base plate—12x14". Requires 3" below and 5 1/2" above plate. Has RCA pin type jack for connecting of changer to radio or phono amplifier. Operates on 105-125 volts, 60 cycles AC-DC. Shipping weight 16 lbs. No. 39A35. TV-FM SWEEP SIGNAL GENERATOR Model 360-K

Look at These Features!

- Covers all TV-FM frequencies 500 to 228 MC.
- Variable sweep width 0-30 MC with Mechanical inductive sweep. Wide sweep width allows gain comparison of adjacent channels.
- Provides for external signal generator marker injection. Has phasing control.
- Vernier driven dial with easy-to-read calibrations directly in frequencies.
- Can be used with any standard oscilloscope.
- Crystal marked oscillator gives stable clear pattern. Uses new miniature tubes 6XSGT, 12AU7, two 6C4. All components and tubes, less crystal, furnished with etched panel and steel cabinet. Size 10x8x6 1/2 in. with full instructions and diagram. Designed for easy assembly and good performance. Wt. 25 lbs.

NEW! OAK RIDGE TV-FM TESTER

A Miniature Signal Generator

\$29.35
COMPLETELY ASSEMBLED

Use it in the shop or take it on the job for quickly localizing TV or FM set troubles. Here is what it will do:

- It generates a modulated RF carrier on TV channels 2-13—FM from 88 to 108 MC—Audio, 500 cycle signal. Has attenuator controls.
- A generated signal is supplied to quickly locate signal failures in TV or FM sets at any point from the antenna input to the CRT or the speaker.
- Tests RF, Osc. and Mixer, Video and Audio IF's, Video and Audio Amplifier.
- Aligns sound trap and adjacent picture trap.
- Use as marker generator.
- Use for antenna orientation and sensitivity tester.

Extremely compact, only 5 3/4 x 4 x 2 1/4". Sturdy wood cabinet. Comes complete with instructions and directions for its many uses. Operates on 115 V. A. C. Shpg. wt.

TELEVISION FIELD STRENGTH METER

\$79.50
COMPLETELY ASSEMBLED

A MUST for any serviceman or installer! Location survey easily accomplished without the expense of complete TV receiver installation, reducing actual work to a one man operation. Eliminates guess work in determining type of antenna required at a given location.

- FEATURES:
- Measures actual TV station signal strength.
 - Orientation of Antennas can be accomplished precisely and quickly.
 - May be used to compare efficiency of various antenna combinations.
 - Television receiver radiation from local oscillator may be checked.
 - May be used to accurately check efficiency of TV Boosters.
- Technical Specifications: 12 Channel High Gain Continuous Tuning Front End; 1-6J6 RF; 1-6J6 Osc. 1-6J6 Mixer, 1-6AK5 1st IF, 1-6AU6 2nd IF, 1-1N34 (Meter Rect.) 2nd Det., 1-6AU6 Audio Amp. for Earphone use; 6" dia. Signal Indicator calibrated in relative microvolts 50-30000; self contained 115 V. 60 cy. AC power supply; panel mounted earphone jack. Cabinet is heavy gauge steel, battleship grey finished. Size 8x12x10" high. Wt. 25 lbs. Approved Electronic Inst. Corp. Model A460.

TRUE HIGH FIDELITY AND EXTREME SENSITIVITY ON BOTH FM AND AM

This Browning Model was the choice of a nationally known manufacturer for assembly in a \$2000.00 Radio Phono combination. They bought more tuners than they needed... we made a good "buy", so here it is passed on to you.

- FM RANGE 87-109 MC
- AM RANGE 530-1650 KC
- HIGH FIDELITY RECEPTION
- TUNING EYE INDICATOR
- SEPARATE RF AND IF SYSTEMS ON BOTH BANDS
- RF STAGE ON BOTH BANDS
- HIGH IMPEDANCE OUTPUT FOR AMPLIFIER CONNECTIONS
- RIGHT FOR "BUILT-IN" APPLICATIONS

Actually, two independent tuners on one chassis, each using miniature tubes and incorporating separate RF and IF systems. The FM section employs Major Armstrong's circuit—one TRF stage, mixer and separate local oscillator at higher frequency to minimize images, two IF's, a dual limiter which successfully removes amplitude noise, and a discriminator stage. The AM section is a superhet with one RF stage, converter, a high gain IF stage and diode detector which furnishes AVC voltages as well as audio. The audio level from both channels is approx. 0.5 volts RMS to a common output connection.

Tubes: 1-6BE6, 1-6C4, 1-6BA6, 1-6SG7, 2-6SJ7, 1-6H6, 1-6SA7, 1-6SF7, 1-6E5, 2-7AG7.

Ruggedly constructed, all components of highest quality.

Panel Controls include eye sensitivity switch, a large edge lighted slide rule dial, smooth vernier control.

VOLUME control and FM-AM switch. Audio output and power supply connections are at rear. Proportioned for easy mounting in book cases, drawers, shelves, and cabinets. Size: 7^{3/8}" H, 13^{1/2}" W, 9" D. Formal edge-lighted easily read dial of slide rule type is supplied with escutcheon. (cutout required 4^{3/4}" x 9").

Power supply requirements are 250 V. DC at 65 MA and 6.3 V. AC at 4 amps.
No. 36B80. Complete with tubes, knobs, escutcheon, etc. (less power supply). Shpg. wt. 17 lbs. Regular Net. Each \$113.78.
Special Purchase Sale Price **\$79.95**

Model MA-10EX—with built-in pre-amp for magnetic and reluctance type pick-ups.

10 WATTS OF HUM-FREE POWER! Provides EVERY feature desired by the "critical" lover of recorded music — Built-in compensated Pre-Amplifier for G.E., Pickering and other magnetic and reluctance type pickups! 4 Inputs: No. 1, Magnetic, .01 volts 92 db. at 1000 cps.; No. 2, Magnetic, .08 volts 78 db. at 1000 cps.; No. 3, Crystal Input, .5 volts, 70 db. gain; No. 4, Radio Input, .5 volts, 70 db. gain. Frequency Response, ±1 db. 40/20,000 cps. Response is flat, ±1 db. over entire frequency range with control at "normal". Four-way individual tone compensator provides: No. 1, Deep bass with high cut; No. 2, Medium bass; No. 3, Normal; No. 4, Treble (normal bass with treble boost). Variable Expander Control, manually controlled from zero to +10 db.; instantaneous — no chopping — no time lag! Heavy duty output transformer with impedance taps of 2, 4, 8, 16, 500 ohms for most any type of Coaxial or Hi-Fidelity speaker. Hum Level is 70 db. below rated output of 10 watts! AC power receptacle on chassis for plug-in of Record Changer or Radio Tuner. Tubes: are 1 6SC7, 3 6SL7GT, 2 6V6GT, 1 5Y3GT (rectifier) for power output of 10 watts at less than 5% distortion; peak power is 14 watts! Heavy steel chassis base is 12x7x2^{1/2}" high, gray Hammertone enamel with two-tone dials. U/L Approved! With tubes and instructions. Weight, 12 lbs. Power required is 75 watts at 117 volts, 60-cycle AC.
No. 32B48. Masco Model MA-10EX Phono Amplifier. NET... **\$49.95**

WEBSTER-CHICAGO 3-SPEED CHANGERS

- Plays all types records — 33 1/3, 45, 78
- Plays all sizes — 7", 10", 12" — automatically
- Simple, foolproof operation

Plays all makes, all sizes and all speed records — automatically. 3 speed switch makes change over to 78, 45 and 33^{1/3} RPM easy. Lightweight arm eliminates necessity to adjust weight when changing from standard to LP records. Pick-up arm returns to rest after last record except on 7" records which keep repeating. 10 spiders are included for insertion in center of 45 RPM records. Shock mounted motor insures smooth quiet operation at any speed.

HEAVY DUTY PHONO AMPLIFIER

With Husky Transformer Power Supply Plus Sturdy Portable Case

ALL FOR ONLY \$9.88

- Originally built for use as a portable music amplifier, this assembly provides many interesting conversion possibilities.
- Easily converted to phono amplifier or PA amplifier.

Only a slight circuit change makes it a top quality phono amplifier. Can also be wired for a mike input to make a dandy PA amplifier or it can be converted for use with a GE pre-amp and GE pick-up. Here is what you get... a two stage amp with 110 V. AC. operated power supply neatly wired to an 8 1/2 x 7" lighted panel. Has tone and volume control, high impedance phono input, 4 ohm speaker output, and two AC receptacles. Supplied with tubes: 6J5 first amp., 6V6GT power output, 5Y3GT, rectifier and a 6SN7GT used in a tone operated relay control circuit (can be altered for use as mike input).

LIMITED QUANTITY!

Portable case, 17 1/4" H, 19 1/4" W, 9 3/4" D, sturdily constructed, black leatherette covered... bottom section cut out for the amplifier and a phono motor (not supplied). Top section has cut out for 6" speaker... Ideal for a complete portable phono player-PA system, etc. The production cost of the case alone is in excess of our price for all—the amplifier plus tubes, plus case. Shpg. Wt. 30 lbs.

Stock No. 40A1003 Case, Amplifier and Tubes. Diagram of Amplifier included. **\$9.88**

Limited quantity—Subject to prior sale.

Model 514

FORMER NET VALUE

\$119.50

THE GLENWOOD COMBINATION ENLARGER & FILTER FOR ONLY

\$89.97

• YOU GET UP TO A 12-IN. PICTURE FOR LESS THAN ONE-HALF THE PRICE OF A 12" SET!

The ideal all-purpose television receiver. Carries easily from place to place, operates from its own antenna—no connections required except plugging in power cord. Antenna is adjustable for length and direction for maximum picture brightness. Brings in crystal clear pictures even under variable conditions of lighting and signal strength.

With the Glenwood Enlarging lens included FREE, you get a picture comparable to that from the 12 inch set. Can be viewed from remarkably wide angle without distortion. Built in filter reduces the glare, permits movie-like vision. Size of lens 9"x12". See below for full description of lens.

18 Tubes plus Picture Tube and 4 Rectifiers, 23 sq. in. rectangular picture on face of the 7-inch tube. Push-button tuning provides instant station selection on any of the 12 tuning channels.

Sturdy wood cabinet covered with tan leatherette. Cover, with carrying handle hinges and snaps to side of set, fully protecting picture tube and controls. Matched antenna carries inside of cabinet. Size overall 20 in. wide, 10 1/2 in. high by 18 3/4 in. deep. Shpg. wt. approx. 53 lbs.

For 105-125 volt 60 cycle AC only. No. 39A20—Hallicrafter Model 514 and Glenwood Enlarging Lens **\$89.97** BOTH FOR

Sensational!

For your Television Set!

it's a Powerful Magnifier **\$8.79** FOR 7-10" TUBES

Magnifies Without Use of Liquids

Clear! Clear! Wide Angle!

Spectacular scientific discovery enables this remarkably thin plastic sheet to perform magnifying miracles of high optical correctness. Contains no mineral oil or other liquids—nothing to spill out. The entire assembly weighs less than 5 lbs. allowing for cosier selling, easier installations and cash-and-carry sales. Easier on fine furniture cabinets and simpler to adjust and focus.

Can be viewed from remarkably wide angle without a bit of distortion and with 92% light transmission which is better than the finest glass. Sizes are 9" by 12" for 7-10" tubes and 12" by 17" for 12-16" tubes.

UNEQUALLED SAVINGS ON FAMOUS MAKE GERMANIUM CRYSTAL DIODE

WE MADE A TERRIFIC PURCHASE—AGREED NOT TO ADVERTISE THE NAME—BUT WE KNOW YOU WILL RECOGNIZE THE VALUE—THE HIGH QUALITY—AND THESE OUTSTANDING FEATURES.

SAVINGS OF UP TO **\$5.00**

PRICED AS LOW AS **49¢**

- Welded Contact Construction... provides maximum mechanical strength. Permits operation at higher temperatures up to +80° C down to -50° C. Improves electrical stability.
- Low Shunt Capacity... 0.8 Mmfd. maximum.
- Insulated Case... mechanically rugged. Simplifies mounting problems.
- Small Physical Size... requires no more space than a 1/4 watt resistor. 13/64" dia., 11/32" long with 1 1/8" tinned copper leads.
- Long Life... 10,000 hours under normal operating conditions.
- High moisture resistance.

CAN BE USED IN ALL CIRCUITS CALLING FOR THE POPULAR IN34 GERMANIUM DIODE

Widely applied in construction of field strength meters, modulation monitors, signal tracer test equipment, noise limiting circuits, crystal detectors, crystal sets, etc. For comparison, the IN34 characteristics are: Max. Inverse volts 60, Max. average Current 40 MA, Max. Reverse Current 800 Microamps at 50 V. Therefore the

IN48 listed below is practically equivalent to the IN34. The IN52 is somewhat more efficient due to a lower reverse current. The IN63 is much better because of higher inverse voltage and lower reverse current ratings. Either the IN48, IN52 or IN63 will perform perfectly in circuits designed for the IN34.

Type	Max. Inverse Volts	Max. Average MA	Max. Reverse Current Microamps	Stock No.	Regular List Value	B-A's Each	Special Price 10 Lots Ea.

SUPREME MODEL 574 — COMPLETE ELECTRONIC MULTIMETER — REGULAR PRICE \$72.50!

- HAS ALL VOLTS, CURRENT, OHMS, RANGES
- 9006 DIODE PROBE
- 4-INCH METER WITH REVERSE SWITCH

WHILE THEY LAST,

\$38⁸⁸

BRAND NEW! Every One in Original Factory Carton!

Model 574 Electronic (Vacuum Tube) Multimeter and Set Tester is a completely modern Set Tester, indispensable to the Serviceman for accurate measurements in high impedance circuits as encountered in FM, Television, High Fidelity Audio, and the measurement of AC voltages in the RF spectrum up to 100 mc with negligible frequency error! DC input impedances of 40 meg. maximum to 20 meg. minimum for DC volts ranges of 0, 1, 2.5, 10, 50, 250, 500, 2500 volts. AC input impedances at 60 cycles, 9 mmf.—10 Megohms to provide V.T. ranges of 0, 1, 2.5, 10, 50, 250 AC volts with newest type hand-fitting H.F. Diode Probe. AC impedances are 100 mc—20,000 ohms. Low frequency (standard) DC Resistance measurements in ranges of 0, 1, 2.5, 10, 50, 250, 500, 2500 volts by use of standard test leads. Resistance Ranges of 1/1000/10,000/100,000 Ohms, and 0, 1, 10, 100, 1,000 Megohms! DB Ranges of —20 to 0, 0 to +15, +15 to +30, +30 to +45 db. Current Ranges of 0, 1, 10, 50, 250 DC M.A. and 0, 1, 10 DC Amps. The completely modern and stable V.T. circuit of Model 574 assures negligible error due to line voltage fluctuations up to 10% and requires practically no shift in Zero setting when changing ranges. Push-button selectors for all ranges and functions and clearly etched steel panel in white on gray wrinkle enamel finish. Steel cabinet is 5x9 1/2 x 12"; weight, 16 lbs. Complete with easily followed operating instructions, Diode H.F. Probe, high quality standard test leads and AC cord and plug; for use on 100/113-volt, 60-cycle AC current. Schools, Industrialists, Servicemen and Experimenters really "HIT THE JACKPOT ON A WHALE OF A VALUE" on Model 574 at this price! Shpg. wt. 16 lbs.

- Fashioned of Fine SUNTAN VINYL, a material that looks like high grade leather, but is actually much more durable. Positively WILL NOT SCUFF OR SCRATCH. Top grain cowhide leather handle and bindings. Size 8 1/2" x 18" x 21".
- Light-weight, but tough, rugged construction to withstand hard usage.
- Chrome-plated rack with 4 hangers to carry dresses and suits wrinkle-free. Protecting dust curtain over dress rack. Plenty of room for traveling accessories.
- Beautifully furnished, finely tailored rayon lining and dust curtain. Padded bottom and 3 roomy shirred pockets, one felt lined to accommodate shoes.
- Highly polished solid brass locks and hardware. Two keys included.

No, B-A has not gone into the luggage business . . . it's just that one of our buyers stumbled onto this as a part of the Tucker Accessory Kit from which he secured a great value in Motorola Auto Sets.

He bought one only for his lady . . . and in showing it around the B-A offices, all the gals, and fellows too, went into ecstasies over its beauty—its usefulness. . . . were stunned at the amazing low price. The business of the day for that buyer was "get me one"—"get me one"—"get me two"—and so on by practically everybody in the place.

With all this furor over luggage the thought hit us, why wouldn't many B-A customers appreciate the opportunity for such a Bar-

gain Buy on so handsome a piece of luggage for their ladies. The answer was, Sure! So we went for all, a large lot, haggled down to a ridiculously low price . . . down to where you get a **\$42.00 Value** (as it was priced in the Tucker Accessory Kit) for only **\$13.95** *plus Federal Excise Tax.

Buy one or more . . . for personal use or for resale. Shpg. wt. 12 1/2 lbs.
No 40A1007.

Special Each **\$13.95**

*Federal Excise Tax, 20% on luggage, therefore add \$2.79 if buying for personal use. No Federal Excise Tax if buying for resale. Dealers collect tax from their customers and remit direct to Internal Revenue Dept. of U.S. Government.
