SECOND EDITION

HOW TO ORDER

All Prices in this Bulletin are NET, and are NOT SUBJECT TO U. S. EXCISE TAX. Send remittances with order in the form of money orders, checks, stamps or cash (the latter by registered mail).

C. O. D. ORDERS

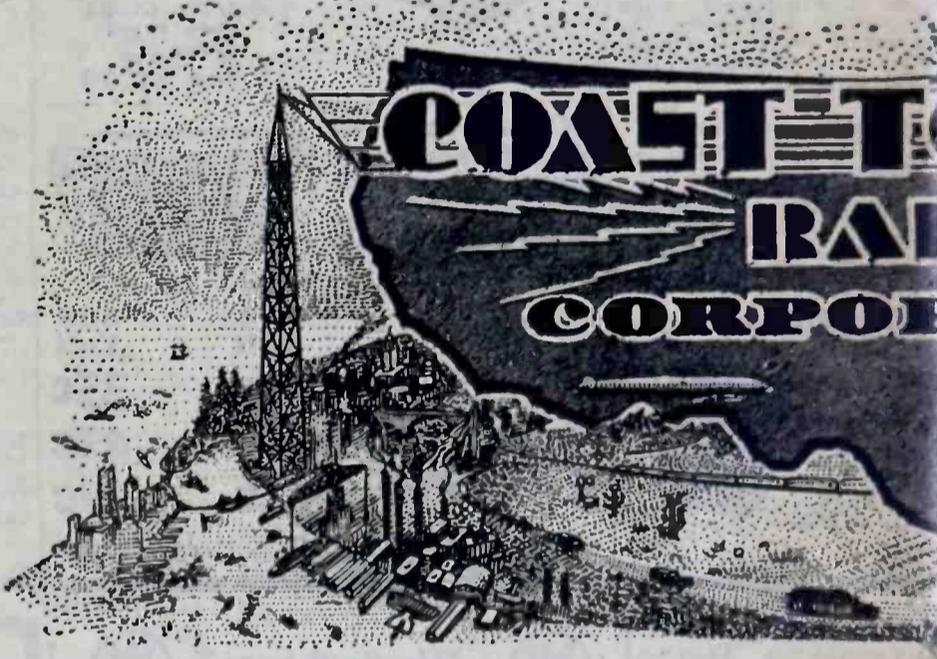

All C. O. D. orders must be accompanied by a 20% deposit remittance. All goods shipped F. O. B. our Warehouse in New York. For shipment by parcel post, include an approximate sum for such charges—any excess will be immediately refunded. In the absence of such instructions, shipment will go forward express collect.

GUARANTEE

We guarantee that all our goods are illustrated and described accurately! Should you be displeased with any of our merchandise, please return same for prompt adjustment!

PROMPT SHIPMENTS

Most of our orders are despatched from within 6 to 24 hours after receipt! Our huge stocks, thoroughly trained Personnel and smooth functioning systems make our unparalleled, speedy shipping service possible!

"SUPER-COMPACT" RADIO RECEIVER

Requires These MODERN TUBES: 1-57, 1-58, 1-247, 1-280

Cat. No. C1287
\$9.95 Complete With Four RCA Tubes \$11.95

Features Galore: Tuned Radio Frequency Circuit—2 Gang variable condenser—equipped with a full fledged ELECTRO-DYNAMIC-SPEAKER, which will amaze you with its ability to reproduce surprisingly great volume in a realistic manner. Equipped with an illuminated FULL VISION DIAL, with SPOT TUNING FEATURE. Note simplicity of operating controls—just one tuning knob and a Volume Control (with self-contained on-off switch).

5 Tube Triple Grid, Super Control Pentode A. C. Midget Receiver

Requires 2-58 Triple Grid Super Control, 1-57 Screen Grid, 1-247 Pentode and 1-280 Tubes

Featuring satisfactory performance, stability, ease of operation and inconsequential operating cost. Illuminated dial—individually compensated 3 Gang variable condenser. Fully shielded throughout. Tone Control, Volume Control and self-contained A.C. Switch. Attractive Cabinet. True Reproducing Utah Dynamic Speaker. Volume enough to warrant keeping it under control. Selectivity and sensitivity that will delight you . . . in short, here is a receiver to warrant your complete approval! For 110 volt 50-60 Cycle A.C.

Cat. No. C1297
\$14.95 COMPLETE WITH FIVE RCA TUBES!

5-Tube Dual Wave 75 to 550 Meter Super-Heterodyne Receiver

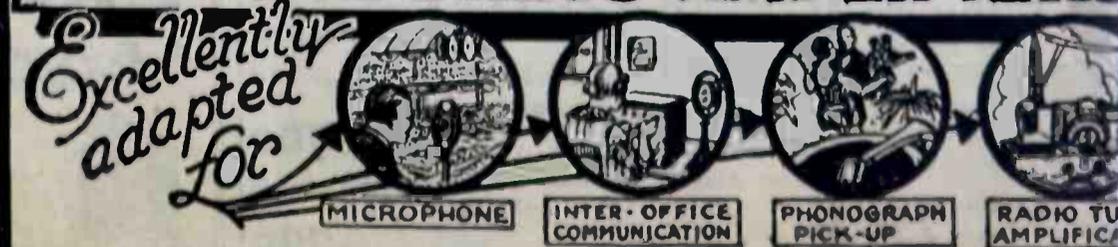

Employs These Highly Efficient Tubes:

ARRANGEMENT SALE!

BULLETIN NO. C-12

Our Prices Are LOWEST —Here Is Why!

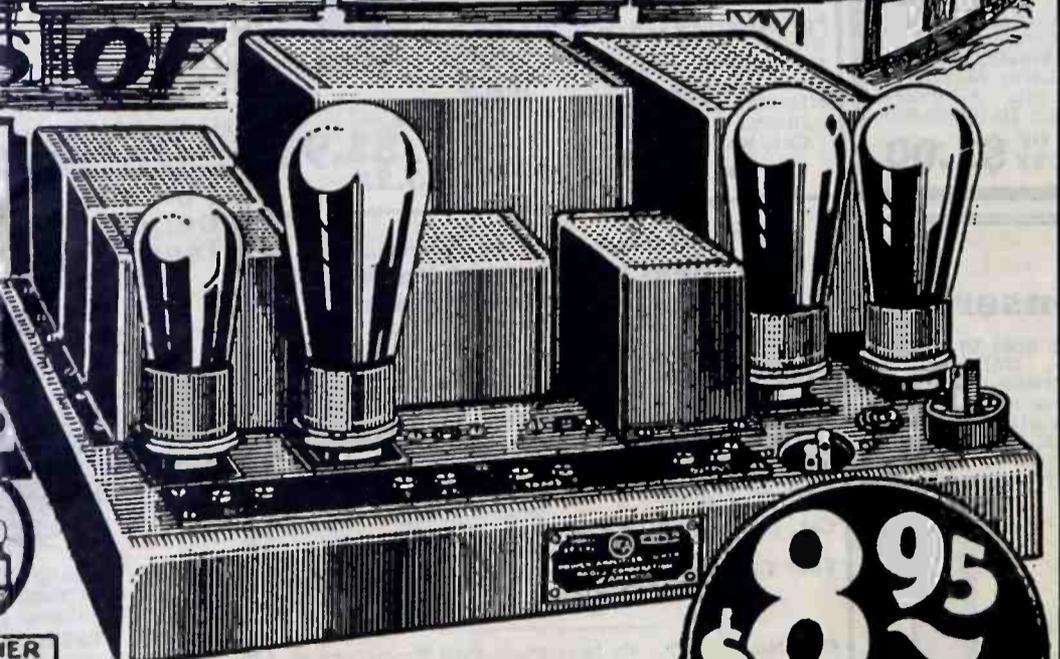

By an arrangement with the various manufacturers of the Radio receivers and of many of the items herein listed, we have agreed NOT to mention their names in this bulletin because of our quotations which are in most instances EVEN LESS THAN THEIR DISTRIBUTORS and JOBBERS COSTS. . . you will of course immediately recognize the manufacturer's name on the merchandise. Were we to mention their names in this Bulletin, their extremely valuable distribution set-up would be impaired. These manufacturers appreciate our HUGE PURCHASING POWER, and accordingly offer us considerably lower prices for a large volume sale—TO FIRMLY RETAIN YOUR GOOD-WILL, WE PASS THESE SAVINGS ON TO YOU!

From present indications, it appears that prices of all commodities are headed for higher levels. . . BUY NOW, and in AMPLE QUANTITIES, while our present stocks and quotations are existent . . . and BUY WITH UNRESERVED CONFIDENCE UNDER OUR GUARANTEE OF YOUR COMPLETE SATISFACTION!

West 17th St.

tribute to Our Huge Purchasing Resources!

\$8.95
Complete with TUBES \$12.75

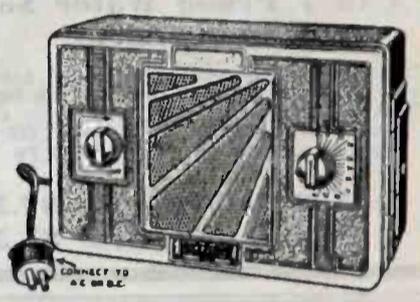

Fully Guaranteed!

Former is of heavy-duty design and will operate indefinitely, even over the filter condenser system to some of its units being A.F. Audio system is indeed of universal utility of application—impedance phono. pick-up. The Input and Output Circuit right out to a terminal strip, as a self-contained pre-phonograph, etc. An external . . .

Many Valuable Applications Are Offered
Due to the "quick heater" action of the 1st A.F. Tube, and in fact of all its tubes, this amplifier is especially valuable for use in INTER-OFFICE COMMUNICATION SYSTEMS, or wherever it is necessary to operate an amplifier "the moment" it is turned on! These amplifiers are also very ideal for use in multi-channel installations, as each such amplifier is entirely self A.C. operated, and furthermore can furnish D.C. Field Current to its own bank of up to . . .

Sweeping the Nation Like An Avalanche!
The "Coast-ette" Miniature Universal AC-DC Radio Sets
Remarkably compact: 8 1/2 in. long, 6 1/2 in. tall, 4 in. deep, and completely Self-contained. Total Weight: 5 1/2 lbs. 4 and 5 Tube Models!

Can be plugged into any light socket, 110 Volt D.C., or 110 Volt A.C., 25 to 60 Cycles. New principle employed obviates necessity of power transformer, therefore, break-down possibilities are almost impossible. Employs a remarkably efficient circuit that enables surprising long distance reception. Its reproductive abilities are equally as pleasing—and will assuredly thrill its listeners! Actually operates with its own Self-Contained Antenna System . . . An outside aerial system can be employed if desired. Here are some of the other valuable features of the five-tube model: Equipped with a Volume Control, Screen Grid Power Detector (236), Two Super Control Variable Mu R.F. Tubes, 3 High Gain T.R.F. Stages, Pentode Power Output Tube, Current Consumption Less Than a 40-Watt Electric Bulb, Distortion-free Resistance Coupled Audio Stage, and Automatic Protection, etc., etc. Its exterior will grace the appearance of any table, desk, mantel, bedroom night table, etc. Its compactness permits its insertion into any traveling bag!

Use with P.A. Amplifier Installations Producing up to 30 Watts!
 The engineering design of these transformers is on a par with similar instruments generally offered for the modest cost here with

quoted. The large core of highest grade silicon steel and perfectly designed coils give straight line amplification characteristics, even at small outputs. The windings are highly insulated and are well impregnated and varnished. Can be used in any climate. The average dimensions are 3 3/4 in. long, 2 in. wide, 2 3/8 in. tall—the mounting holes are 2 in. x 2 3/4 in. Please definitely state output tubes you employ.

For Class "A" Amplifiers Will Handle up to 15 Watts Output

Cat. No.	Tubes Matched	Secondary Specs.	Your Cost

Use with P.A.
Amplifier In-
stallations
Producing up
to 30 Watts!
 The engineer-
 ing design of
 these trans-
 formers is on
 a par with
 similar instru-
 ments gener-
 ally offered for
 many times
 the modest cost
 herewith

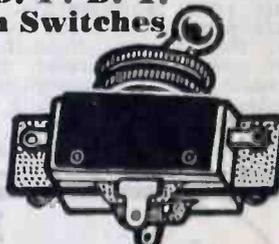

The large core of highest grade
 silicon steel and perfectly designed coils
 give straight line amplification character-
 istics, even at small outputs. The windings
 are highly insulated and are well impreg-
 nated and varnished. Can be used in any
 climate. The average dimensions are 3 3/4 in.
 long, 2 in. wide, 2 3/8 in. tall—the mounting
 holes are 2 in. x 2 3/4 in. Please definitely
 state output tubes you employ.

For Class "A" Amplifiers
Will Handle up to 15 Watts Output

"Slow Speed High Frequency" and "Fast Speed Low Frequency" Full Vision Illuminated Vernier Dial

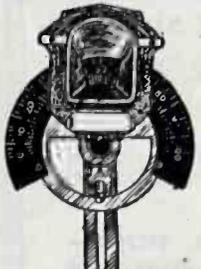

The varying speed permits a better and more uniform separation of the graduations at the high frequency end of the scale. The pointer is operated through a link motion which is positive and in exact unison with the condenser rotor. No slippage can occur. The attractively embossed escutcheon plate is 5 1/2 inches long.

Cat. No. C1616..... **49c**

Spring Action Drive, Illuminated "Fan Type" Vernier Dial

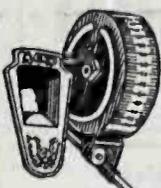

When illuminated, it makes a very pleasing appearance. The Condenser shaft hub accommodates both 3/8 in. and 1/2 in. shafts. The operating shaft is 1/4 in. in diameter.

Cat. No. C1663..... **59c**

Eddy Drum Dial

A drum type dial complete with celluloid tuning scale with 100 divisions and dial light brackets. For 1/4 inch shafts. Die cast construction with phosphor bronze cable and automatic stop adjustment. Screw take-up for tension adjustment. Overall size, 5 1/2 x 2 x 5 1/4 inches.

Cat. No. C1617..... **49c**

Knob Assortment

Consists of All-Bakelite, Wooden, Celluloid Top, Metal Faced, Embossed, and odd shaped knobs, in all sizes. All are equipped with standard 1/4 inch diameter shaft holes, and set screws.

Variable Voltage Dividers

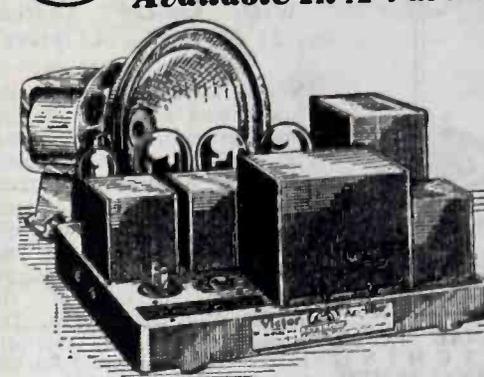

Victor RE-32, 45, 57, 75 TWO STAGE PUSH-PULL JR. "Mike"-Phono-Radio P.A. Amplifier

Available In A Variety of 1933 Improved Models

A Late Model Design RCA Power Transformer Furnished Enables Use of Latest Series of Tubes!

Every component part in these amplifiers was designed to carry a substantial over-load, to avoid break-down. Its generous construction can be gleaned by its dimensions of 13 1/2 in. long, 10 1/4 in. wide, 8 1/4 in. tall. Mounted upon a sturdy chassis, fitted with all conveniences, such as speaker field provision plug, voice coil outlet plug, tuner voltage outlets, etc., etc. These amplifiers can furnish D.C. Field Current to a 2500 ohm, 110 volt D.C. Dynamic Speaker. (If you desire to use any other type speaker, we will include a special 2500 ohm choke to supplant the speaker field... 90c additional.) An Output Push-Pull Transformer, with a 7-15 ohm Voice Coil Matching Impedance is also furnished—a diagram included shows how to match same to the impedance of 1 to 8 Dynamic Speakers. A Phono-Input Tap is also provided. Highest grade parts make up this very easily assembled kit—such manufacturers as Westinghouse, Victor, General Electric, etc., etc. The utterly simple wiring that remains to be done can be accomplished by anybody with only a slight knowledge of Radio! For 110 Volts, 50-60 Cycles A.C.

Cat. No. C1652

KOLSTER REPLACEMENT COILS AND TRANSFORMERS

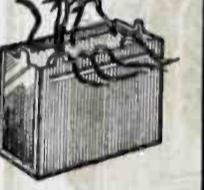

Kolster Power Transformer Coils

Cat. No. C1077. For Model K-20. **\$1.25**
Cat. No. C1078. For Model K-43, 48, B-15, B-16, B-10, B-11. **\$1.65**
Cat. No. C1079. For Model K-24 Sets. **\$2.50**

Kolster Double Audio Transformer

Two A.F. Transformers In One Case!
The compact size, sturdy construction and finished appearance of these units make them ideal for use in most any receiver or amplifier straight audio system. Long leads are provided for direct wiring. Case is finished in crackle green. Size 2 1/4 x 3 1/2 x 2 1/4 inches.
Cat. No. C1364... **\$1.45**

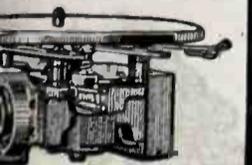

Dubilier Kolster 210-250 Condenser Block

Total capacity: 11 1/2 mfd. Known as PL-455. Contains following sections: 3 mfd., 1000 volts; 4 mfd., 600 volts; 4 mfd., 160 volts; .5 mfd., 160 volts; .25 mfd., 160 volts. For Kolster K-5, 6-H, Columbia 500-901 Receivers.
Cat. No. C1385... **\$1.10**

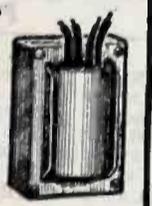

Speaker-Receiver Panel

Highly decorative in appearance — will match most any console cabinet, in which you may desire to mount this undrilled 3 ply walnut finish panel. Overall dimensions: 13 in. wide, 24 1/2 in. tall. The handsomely scrolled grille measures 9 1/2 in. tall, by 9 in. wide, and is backed with a rich golden colored grille cloth. Rich dull finish.

**Excellent For
 Use with P. A.
 Amplifier In-
 stallations
 Producing up
 to 30 Watts!**

 The engineer-
 ing design of
 these trans-
 formers is on
 a par with
 similar instru-
 ments gener-
 ally offered for
 many times
 the modest cost
 here with

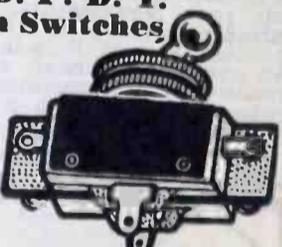

quoted. The large core of highest grade
 silicon steel and perfectly designed coils
 give straight line amplification character-
 istics, even at small outputs. The windings
 are highly insulated and are well impreg-
 nated and varnished. Can be used in any
 climate. The average dimensions are 3 3/8 in.
 long, 2 in. wide, 2 3/8 in. tall—the mounting
 holes are 2 in. x 2 3/8 in. Please definitely
 state output tubes you employ.

**For Class "A" Amplifiers
 Will Handle up to 15 Watts Output**

**RCA-Victor 245-250
Power Pack Choke**

Rating: 200 Ohms, 125 Mil., 30 Henries

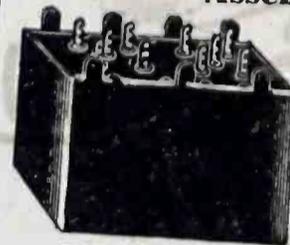

Cat. No. C1008

65c

Excellent adapted for use as the first filter choke, to be followed by a high resistance (approximately 2500 ohms) dynamic speaker field. This choke has an unusually low D.C. resistance of only 200 ohms, causing a low voltage drop across it, thereby permitting a high and well filtered plate voltage to be fed directly to the plates of the 250 tube. This voltage is obtained right after the first choke (this one!) and before the second choke (or dynamic speaker field). 3 1/2 x 3 1/4 x 2 1/2 ins.

Victor Input and Output Push-Pull Audio Transformer Assembly

Cat. No. C1001

\$1.45

Electrostatically Shielded Amplification On All Frequencies. Impregnated against lamination vibration

**SPECIAL "MIKE"
INPUT MATCHING
TRANSFORMER**
95c

A High Grade Instrument—Not To Be Confused With Similar Low Priced Devices!

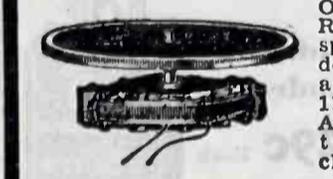

Produces perfectly clear, even and crisp response, with a faithfulness of reproduction that is highly commendable. Provided with a conveniently located "On-Off" button switch, which disengages the "mike" proper from the grid circuit of any amplifier or Radio Receiver, to which it may be connected. It also disconnects the microphone current dry cell. Equipped with a correctly formed wooden handle, and 25 ft. of high grade flexible insulated wire, and necessary connection adapters. The metal shell of the microphone casing is highly nickel plated and beautifully buffed. The sensitive diaphragm is protected by a gilt plated mesh screen.

JENSEN D-9 D.C. DYNAMIC SPEAKERS

11 1/2 in. diameter—Burtex Cone. 8 ohms voice coil impedance. Furnished with any single or push-pull output transformer—state tubes employed. Note convenient mounting stand. Conservative wattage capacity rating—8 watts! The highest price receivers utilize this series Dynamic Speakers. Ideal for P. A. Multi-Speaker installations.

Power Pack Choke**
Rating: 200 Ohms, 125 Mil., 30 Henries

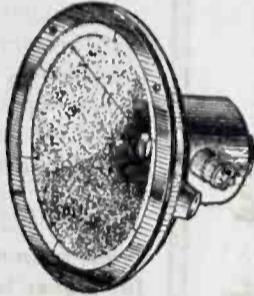

Cat. No.
C1003

65c

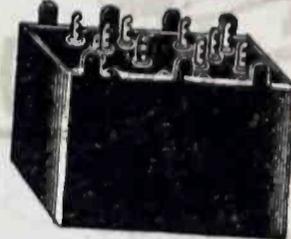

Excellent adapted for use as the first filter choke, to be followed by a high resistance (approximately 2500 ohms) dynamic speaker field. This choke has an unusually low D.C. resistance of only 200 ohms, causing a low voltage drop across it, thereby permitting a high and well filtered plate voltage to be fed directly to the plates of the 250 tube. This voltage is obtained right after the first choke (this one!) and before the second choke (or dynamic speaker field). 3 1/2 x 3 1/4 x 2 1/2 ins.

Socket and Voltage Divider Assortments

Every Service man, Dealer and Set Builder Should at All Times Have These Valuable Useful Assortments On Hand!

4 to 7 Prong Wafer Socket Assortment

Included in this well apportioned assortment are sockets manufactured by such houses as RCA, Cinch, Eby, Alden, etc. Your satisfaction is warranted. **PER ASST. OF 95c**
Cat. No. C1354 100 SOCKETS

**500 Assorted for \$4.25
1000 Assorted for \$7.50**

**All-Purpose Variable Tapped
Voltage Divider Assortments**

Included in this assortment, you may find various types, sizes and styles of single and multi-tapped 10 to 100 watt voltage dividers for some of the following receivers: RCA-Kolster, Stromberg-Carlson, Victor, Zenith, Peerless, Majestic, Philco, Silver-Marshall, Edison, Freed, Freshman, etc., etc. All guaranteed perfect—sizes range from 10 to 250,000 ohms. **PER ASST OF \$1.00**
Cat. No. C1355 12 RESISTORS

Nationally Advertised 500 Volt Peak Dry Electrolytic Condensers

Will actually function under sudden surges of 600 volts... should any harm result from such excessive voltage, the nature of the contents is such that a Self-Healing Action follows! Can be mounted in any position. Can be used in any temperature, or in any climate—they are not subject to any ill effects due to varying extremes of natural heat and humidity conditions. In the multiple units, which are metal cased,

the common connection (which goes to negative) is brought out separately. Unlike most electrolytic condensers, the outside casing is not electrically a part of the condenser itself—the valuable advantages this offers will be immediately apparent—makes them ideal for mounting on metal chassis! Inasmuch as they can be mounted in any angle, their value is further enhanced.

**Mounts Upright—
Connected At Top,
Mounted by
Ring Clamp**

"Jr.-Public Address" Single Button Carbon Hand Microphone

A High Grade Instrument—Not To Be Confused With Similar Low Priced Devices!

Produces perfectly clear, even and crisp response, with a faithfulness of reproduction that is highly commendable. Provided with a conveniently located "On-Off" button switch, which disengages the "mike" proper from the grid circuit of any amplifier or Radio Receiver, to which it may be connected. It also disconnects the microphone current dry cell. Equipped with a correctly formed wooden handle, and 25 ft. of high grade flexible insulated wire, and necessary connection adapters. The metal shell of the microphone casing is highly nickel plated and beautifully buffed. The sensitive diaphragm is protected by a gilt plated mesh screen.
Cat. No. C1496 **98c**

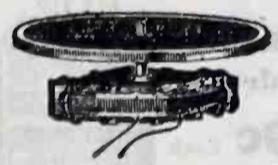

SPECIAL "MIKE" INPUT MATCHING TRANSFORMER **95c**

JENSEN D-9 D.C. DYNAMIC SPEAKERS

1 1/2 in. diameter—Burtex Cone. 8 ohms voice coil impedance. Furnished with any single or push-pull output transformer—state tubes employed. Note convenient mounting stand. Conservative wattage capacity rating—8 watts! The highest price receivers utilize this series Dynamic Speakers. Ideal for P. A. Multi-Speaker installations.

C-H Feed-Thru Switch With Two Female Rectangles

I.C.A. DE LUXE CARBON MICROPHONE

Cat. No. C1285 **70c**
MATCHED "MIKE" INPUT TRANSF. **95c**

A genuine, amazingly efficient, single button microphone, equipped with an ON-OFF button switch. Solidly constructed, white cast metal, neatly gilt finished. An adapter and a 12 ft. cord furnished permit ready installation to ANY Receiver or Power Amplifier. This is a really fine and decidedly efficient piece of apparatus—do not attempt to judge its superior quality by its seemingly ridiculously too low price!

Jensen "Concert" 11 1/2 Inch 110 Volt A.C. Dynamic Speakers

Equipped With Tym-Flex Diaphragm Uses Either a 280 or Full Wave 8 2 Type Mercury Rectifier Tube!

Cone Diameter: 11 1/2 in. Burtex Cloth Diaphragm. Equipped with your optional choice of any output tube matching transformer—state what type output tubes you employ. Capable of handling huge volume, free of blasting or distortion. Excellent for P.A. Multi-Speaker installations—each speaker can easily dissipate up to 8 watts audio energy. Plug into any 110 volt 50-60 cycle A.C. socket.
Cat. No. C1217..... **\$8.75**

Highly Improved—Extremely Sensitive

Brandes 2000 Ohm Phones
Known the world over, and rightly so. Pay a few cents more for the extreme satisfaction you will derive from these amazingly sensitive headphones!

designed on a 7/8 in. square core of high Silicon steel. The core is securely held in an attractively finished strap. Designed in accordance with the latest technique; they can be depended upon to give very satisfactory results! The coils are scientifically treated to be impervious to all atmospherics—a very valuable and necessary feature. The overall measurements of all the units below are 3 3/4 in. long, 2 3/4 in. tall, 2 1/4 in. wide. These generous proportions will indicate the HIGH QUALITY of its ENGINEERING DESIGN!

Universal 4-5-6 Prong Tube Socket

Its placement of 9 holes permits all types of tubes to be tested or used in this one socket. The filament holes are common to all types; the cathode, plate, grid and suppressor holes are individual for each type. Can be mounted in a 1 1/4 in. diameter cut-out socket hole. Can be mounted above or below panel! Solid bakelite moulded—var-colored identification feature incorporated.
 Cat. No. C1493..... **35c**

4 and 5 Prong Bakelite Tube Base Forms

Overall diameter: 1 1/2 in.; length of bakelite form, 1 1/8 in. Brand new—never used. Ideal for home wound short wave inductances as well as tube and socket plug adapters. Ideal for use with above Universal Sockets.
 Cat. No. C1494. 4 Prong. } **10c EACH**
 Cat. No. C1495. 5 Prong. }
Per Dozen, \$1.00

Cadmium Plated Chassis

Made of 1/8 in. thick steel—extremely rigid. 18 in. long, 10 in. wide, 3 1/2 in. tall. Ideal for universal application! Can be easily drilled and soldered to.
 Cat. No. C1114..... **89c**
 Cat. No. C1193
 10 x 12 in. long x 3 1/2 in. **79c**

Adjustable Metal, Bakelite or Wood Circle Cutter

Ideal for Cutting Out Socket and Meter Holes, Etc.
 Cuts holes from 1/2 in. to 4 in. in diameter. Can be used in any hand brace, breast drill or power machine. Drills its own pilot hole.
 Cat. No. C1156..... **\$1.10**

Makes and breaks circuit between two dual conductor cables. Colored identification button.
 Cat. No. C1502..... **19c**
Per Dozen, \$1.75

Three Conductor Shielded Microphone Cable

The finest cable obtainable. Consists of 3 individually insulated cables color coded. Each individual cable has rubber insulating and cotton covering. Woven, flexible tinned copper shield self cotton covered. Cable is finished with spade tips on both ends. A shielded ground lug is provided on one end of cable.
 Cat. No. C1163
 Per ft. (Cut to any length!)..... **3 1/2c**
Per 100 ft. Roll, \$2.95

Heavily Insulated Heavy Duty 5 ft. Dual Conductor Cable and Rubberized Taper Grip Male Plug

 Cat. No. C1511. 7 prong..... **29c**

Bakelite Button Type Socket

Used for below panel connecting and making adapters 1 1/2 in. diameter, 3/8 in. high. Holes for mounting socket can all be drilled with hand drill. Hole in center for No. 6 screw. Socket itself mounts flush against the top surface of a meter panel or chassis.
 Cat. No. C1512. 4 prong—Red Spot. **16c**
 Cat. No. C1513. 5 prong—Green Spot. **16c**
 Cat. No. C1514. 6 prong—Blue Spot. **22c**
 Cat. No. C1515. 7 prong—Orange Spot. **22c**

Excellent For Use with P.A. Amplifier Installations Producing up to 30 Watts!
 The engineering design of these transformers is on a par with similar instruments generally offered for many times the modest cost here with

quoted. The large core of highest grade silicon steel and perfectly designed coils give straight line amplification characteristics, even at small outputs. The windings are highly insulated and are well impregnated and varnished. Can be used in any climate. The average dimensions are 3 3/4 in. long, 2 in. wide, 2 3/4 in. tall—the mounting holes are 2 in. x 2 3/4 in. Please definitely state output tubes you employ.

For Class "A" Amplifiers Will Handle up to 15 Watts Output

Cat. No.	Tubes Matched	Secondary Specs.	Your Cost
1519	2-250, 2-245	10 to 15 ohms.	\$1.95
	2-43, 2-171, Etc.	15 ohms tapped at 7 1/2 and 3 3/4 ohms	\$2.75

Producing up
to 30 Watts!
 The engineer-
 ing design of
 these trans-
 formers is on
 a par with
 similar instru-
 ments gen-
 erally offered for
 many times
 the modest cost
 here with
 quoted. The large core of highest grade
 silicon steel and perfectly designed coils
 give straight line amplification character-
 istics, even at small outputs. The windings
 are highly insulated and are well impreg-
 nated and varnished. Can be used in any
 climate. The average dimensions are 3 3/4 in.
 long, 2 in. wide, 2 3/8 in. tall—the mounting
 holes are 2 in. x 2 3/4 in. Please definitely
 state output tubes you employ.

For Class "A" Amplifiers
Will Handle up to 15 Watts Output

Cat. No.	Tubes Matched	Secondary Specs.	Your Cost

phone
als For Sound Truck
and All-Purpose
Public Address
Amplifier Use!

A tribute to American Engineers—a high quality button microphone available for the first time at this price!

Not a toy—a real, serviceable instrument that fills a long felt need. Handsomely and durably constructed. Fully warranted throughout. Resistance 200 ohms per button—amazing frequency range response. Has a very low hiss level. Duralum in non-breakable diaphragm. Huskily constructed—measuring 2 1/2 in. diameter by 1 in. thick. Pure GOLD CON-TACT! Note four mounting rings!

All-Purpose Phone Input

Many auxiliary equipment matches the impedance to any input grid. It also houses the dry-cell voltage in last for several minutes by any novel—warranted its place in the church pulpit, in hall, 3/4 in. wide. Models available for Double Button Micro-100 ohm or 200 ohm. Please see illustrated. Specially Kellogg Hand \$5.95

0 Ohm (Tapped Dynamic Speaker
100 Ohms) D.C.

"Jr.-Public Address" Single Button Carbon Hand Microphone

A High Grade Instrument—Not To Be Confused With Similar Low Priced Devices!

Produces perfectly clear, even and crisp response, with a faithfulness of reproduction that is highly commendable. Provided with a conveniently located "On-Off" button switch, which disengages the "mike" proper from the grid circuit of any amplifier or Radio Receiver, to which it may be connected. It also disconnects the microphone current dry cell. Equipped with a correctly formed wooden handle and 25 ft. of high grade flexible insulated wire, and necessary connection adapters. The metal shell of the microphone casing is highly nickel plated and beautifully buffed. The sensitive diaphragm is protected by a gilt plated mesh screen.

Silver-Marshall Audio, Input and Push-Pull

Cat. No. C1035, 3 to 1 Audio. **\$1.00**
 Cat. No. C1036, Input Push-Pull.

RCA-Victor 245-250 Power Pack Choke

Excellent adapted for use as the first filter choke, to be followed by a high resistance (approximately 2500 ohms) dynamic speaker field. This choke has an unusually low D.C. resistance of only 200 ohms, causing a low voltage drop across it, thereby permitting a high and well filtered plate voltage to be fed directly to the plates of the 250 tube. This voltage is obtained right after the first choke (this one) and before the second choke (or dynamic speaker field). 3 1/2" x 3 1/2" x 2 1/2" ins.

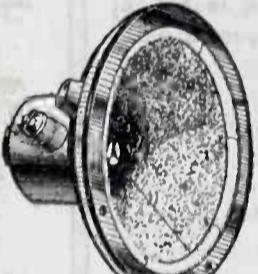

Cat. No. C1008
65c

RCA-Photophone Dynamic Speaker, Complete Cone Replacement With VOICE COIL

A guaranteed replacement for ALL PHOTOPHONE Speakers (both A.C. and D.C. models).

Cat. No. C1676 **\$1.95**

ARMCHAIR SALE

BULLETIN N° C-12

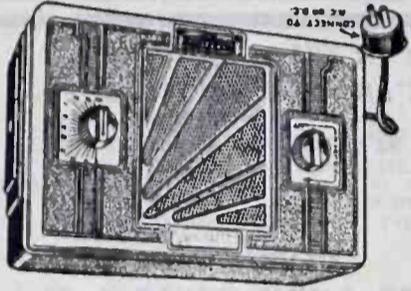

Our Prices Are LOWEST
—Here Is Why!

By an arrangement with the various manufacturers of the Radio receivers and of many of the items herein listed, we have agreed NOT to mention their names in this bulletin because of our quotations which are in most instances EVEN LESS THAN THEIR DISTRIBUTORS and JOBBERS COSTS . . . you will of course immediately recognize the manufacturer's name on the merchandise! Were we to mention their names in this Bulletin, their extremely valuable distribution set-up would be impaired. These manufacturers appreciate our HUGE PURCHASING POWER, and accordingly offer us considerably lower prices for a large volume sale—TO FIRMLY RETAIN YOUR GOOD-WILL, WE PASS THESE SAVINGS ON TO YOU!

From present indications, it appears that prices of all commodities are headed for higher levels . . . BUY NOW, and in AMPLE QUANTITIES, while our present stocks and quotations are existent . . . and BUY WITH UNRESERVED CONFIDENCE UNDER OUR GUARANTEE OF YOUR COMPLETE SATISFACTION!

Sweeping the Nation Like An Avalanche!
The "Coast-ette" Miniature
Universal AC-DC Radio Sets

Remarkably compact: 8 1/2 in. long, 6 1/2 in. tall, 4 in. deep, and completely self-contained.
Total weight: 5 1/2 lbs. 4 and 5 Tube Models!

Cat. No. C1344

\$8.95
 Complete with Four
 RCA Tubes: 1-KR1,
 1-236, 1-238, 1-239

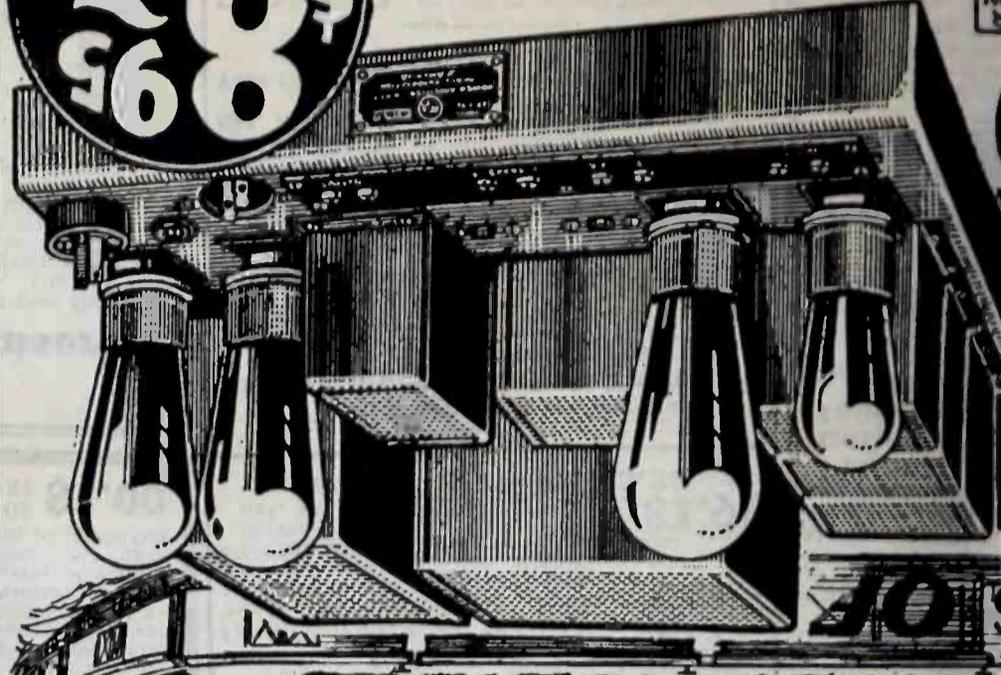

\$13.50
 Complete with
 Five RCA Tubes:
 1-KR1, 1-236,
 1-238, 2-239

Here are some of the other valuable features of the five-tube model: Equipped with a Volume Control, Screen Grid Power Detector (236), Two Tubes, 3 High Gain T.R.F. Stages, Pentode Power Output Tube, Current Consumption Less Than a 40-Watt Electric Bulb, Distortion-free Resistance Coupled Audio Stage, and Automatic Protection, etc., etc. Its exterior will grace the appearance of any table, desk, mantel, bedroom night table, etc. Its compactness permits its insertion into any traveling bag!

We Are the First to Offer the New
5 TUBE COMPACT SETS
EQUIPPED WITH A GENUINE
DYNAMIC SPEAKER

Many Valuable Applications Are Offered
Due to the "quick heater" action of the 1st A.F. Tube, and in fact of all its tubes, this amplifier is especially valuable for use in INTER-OFFICE COMMUNICATION SYSTEMS, or wherever it is necessary to operate an amplifier "the moment" it is turned on! These amplifiers are also very ideal for use in multi-channel installations, as each such amplifier is entirely self A.C. operated, and furthermore can furnish D.C. Field Current to its own bank of up to 10 D.C. Tubes. . . .

Sweeping the Nation Like An Avalanche!
The "Coast-ette" Miniature Universal AC-DC Radio Sets

Remarkably compact: 8 1/2 in. long, 6 1/2 in. tall, 4 in. deep, and completely Self-contained. Total Weight: 5 1/2 lbs. 4 and 5 Tube Models!

Can be plugged into any light socket, 110 Volt D.C., or 110 Volt A.C., 25 to 60 Cycles. New principle employed obviates necessity of power transformer, therefore, break-down possibilities are almost impossible. Employs a remarkably efficient circuit that enables surprising long distance reception. Its reproductive abilities are equally as pleasing—and will assuredly thrill its listeners! Actually operates with its own Self-Contained Antenna System . . . An outside aerial system can be employed if desired. Here are some of the other valuable features of the five-tube model: Equipped with a Volume Control, Screen Grid Power Detector (236), Two Super Control Variable Mu R.F. Tubes, 3 High Gain T.R.F. Stages, Pentode Power Output Tube, Current Consumption Less Than a 40-Watt Electric Bulb, Distortion-free Resistance Coupled Audio Stage, and Automatic Protection, etc., etc. Its exterior will grace the appearance of any table, desk, mantel, bedroom night table, etc. Its compactness permits its insertion into any traveling bag!
