NEW! TRANSISTORIZED POWER MEGAPHONE

Portable Sound Broadcaster

- IDEAL FOR OUTDOOR HAMFESTS
- EFFICIENT HORN PROJECTS SOUND 1000 FT.
- MICROPHONE DETACHABLE ON 3 FT. CORD
- SHOULDER STRAP FOR EASE OF USE

29.50

A transistorized power megaphone with many unusual features and many applications. Basically a highly efficient sound projector horn with a built-in microphone capable of amplifying and projecting the voice with a range of 1000 feet. The microphone is a telephone-type element, easily replaceable, and may be detached and extended up to 3 feet from the horn. The reflex-type horn is extremely light weight, of sturdy spun aluminum construction with a strap for carrying or placing on the shoulder. A press-to-talk switch on the handle provides

for economy of power use—power is used only when actually talking. No warm-up time required—amplification is instantaneous. Has control for setting three different volume levels to suit any environment. A patented non-linear current limiting device restricts current flow to safe levels for longest battery life. Uses a 9-volt transistor battery. Access to battery can be easily reached by removing the microphone unit. Size 12 1/2" long overall; horn mouth is 7 1/2" diam. Shpg. wt., 3 1/2 lbs.

NEW! "ELECTRO-STRIKE-OMETER"®

- WARNS THE ANGLER OF THE BITE
- BEST FITTED FOR ALL KINDS OFF-SHORE FISHING
- EASILY ATTACHED TO RODS
- ACCURATE METER READING

Modern angler's dream materialized at last! Successful fishing requires patience, alertness and excellent timing. Many good strikes have been missed due to reliance upon mere sixth sense. Illustrated above is a simple device that is the result of researches made to develop an easier and more dependable way of fishing. Now, with this new ELECTRO-STRIKE-OMETER any novice angler will be able to catch timely and exactly the warning of fish bite. Fish bite is indicated by the movement of a meter needle. When fish strikes, the needle will swing within the "Care" section of the dial. As the fish proceeds to swallow the bait further, the needle will come to the "Pull Up" section on the dial. The fish will surely be caught if the line is pulled up promptly. A separate adjusting knob permits adjustment of maximum swing as well as sensitivity of needle. Screw type adjustment in the back permits adjustment of zero position of the needle. This light-weight unit can be easily mounted on any reel rods or short rods for off-shore fishing. The 1.5V dry cell can be replaced easily. The whole unit is housed in a rugged metal-grey plastic body. Can be used under any weather condition. Size 6x1x1". Shpg. wt., 4.5 oz.

Included is a clutch-type Volume Balance control for independent or simultaneous control of both channels, concentric Bass and Treble controls which provide independent tonal control of each channel and a 4-position switch which selects phono, tuner, auxiliary or tape head stereo inputs. Simple slide switches provide channel reversal and phase reversal—or you can reproduce either channel through both amplifiers. A loudness switch permits the volume balance control to function as a compensated loudness control. The LA-250 also features a 3rd channel output which may be used to feed a 3rd single channel amplifier and speaker to provide a wider sound spread, a

Tape Output jack for recording purposes, plus dual terminations for 4, 8 or 16 ohm speakers. Advanced circuitry includes DC operated preamp and tone control tube filaments for hum-free operation, premium 6CW5/EL86 push-pull output tubes, individual bias and balance adjustments on each channel and a hum balance control.

SPECIFICATIONS: POWER OUTPUT: 50 watts—25 per channel (speech & music rating). FREQUENCY RESPONSE: 17-21,000 CPS \pm 1 db (at normal listening level). HARMONIC DISTORTION: less than 0.25%. SK-131—LAFAYETTE SPHERICON SUPER TWEETER Net 19.50

At long last the breakthrough in High-Frequency Speaker design. Here is a tweeter with unequalled performance, engineered for today's high compliance stereo speaker systems. The Lafayette Sphericon represents a complete departure from Electrostatic tweeters, which are extremely inefficient — in fact so much so that it is often necessary to utilize an L-pad on the woofer in order to hear the tweeter properly, thereby lowering the efficiency of the woofer to the same level as that of the Electrostatic tweeter. In the case of many high compliance low effi-

ciency units this is disastrous, as an already inefficient speaker is made even less efficient. The Lafayette Sphericon, due to its high sensitivity may be coupled to any speaker system with no loss in speaker efficiency. As a result less amplification is needed assuring lower distortion. Equipped with a built-in 3000 cycle crossover network the Sphericon produces a smooth linear response from 3,000 cps to beyond 40,000 cps; within plus or minus 1 db from 3000 cps to supersonic frequencies. A specially designed domed phenolic diaphragm delivers

phenomenally smooth, silky, faithful highs radiating a pattern of 120° in all directions, vertically as well as horizontally—with no trace of stridency or harshness. Power capacity is 30 watts. May be used with any 4-16 ohm speaker. Beautifully styled with an acoustically designed gold anodized aluminum grill set in a sturdy satin black plastic case. Shpg. wt., 3 1/2 lbs.

- FREQUENCY RESPONSE 35 TO 18,000 CPS
- UNIQUE 8" WOOFER-MIDRANGE ASSEMBLY
- COMPRESSION — HORN TWEETER
- 6 DB PER OCTAVE ELECTRONIC CROSSOVER WITH LEVEL CONTROL
- SOLID 3/4" VENTED DUCT PORT BOOKSHELF ENCLOSURE

"Triovette"—The perfect blending of attractive bookshelf cabinetry and advanced audio design (years ahead of other engineering efforts along these lines). The exceptional smoothness and cleanliness of the bass and midrange is the product of a unique 8" woofer-midrange speaker design employed in a solid 3/4" acoustically lined vented duct port enclosure. Two separate cones are coupled through a common voice coil, with the outer edge of the midrange cone attached and floating on the flexible corrugated edges of the woofer cone. This results in a mechanical crossover with an absolute minimum of distortion, so that both cones operate in phase at low frequencies, but only the midrange cone transmits the midfrequencies. The heavy magnets provide high efficiency and excellent transient characteristics. Smooth extended high frequencies are brilliantly reproduced by use of a com-

pression horn tweeter utilized with an electronic crossover and level control provided for balancing the system according to individual listening tastes. Impedance 8-16 ohms. Integrated power handling capacity 20 Watts. Dimensions: 23" W x 11 1/2" H x 11 1/2" D. Complete with easy to follow speaker installation instructions.

- FREQUENCY RESPONSE 40-16,000 CPS
- HIGH QUALITY SEAMLESS CONE
- BUILT-IN CROSSOVER NETWORK WITH BRILLIANCE LEVEL CONTROL
- HEAVY DUTY CONSTRUCTION

This speaker must be considered as one of the foremost High-Fidelity values today. Its tonal quality and features equal that of speakers many times its price. The woofer section is constructed of a one piece seamless cone with a 1 1/2" voice coil set in a rigid non-resonant frame. Employing a unique dual cone wide-angle tweeter assembly (approximately 125° horizontal dispersion angle) which electrically crosses over at 2500 cycles. A brilliance level control is provided making it possible to vary tweeter level according to personal taste. The speaker has an overall frequency response of 40-16,000 cps. Voice coil impedance 8 ohms. Shpg. wt., 8 lbs.

Now you can obtain what is conceded to be the greatest performance value on the hi-fi market—and save up to 29.50. Available with either SK-111 15" 3-way speaker with 1 1/2 lb. magnet or SK-113 3-way with 3 1/2 lb. magnet. These are both highly efficient integrated 3-way speakers made by world renowned Goodmans of England. Supplied complete with genuine 12 db/octave crossover network with L-pad high frequency level control.

The enclosure is the renowned Lafayette bass reflex in either highboy or lowboy styling and in a choice of mahogany, walnut or blonde. Solidly constructed of 3/4" stock, these units have picture frame moldings, attractive plastic grilles, tapered legs, brass ferrules, internal acoustic linings, and are finished in genuine wood veneers. Size of lowboy (less legs) 28 1/2" w x 23 1/2" h x 16 1/4" d. Same size for highboy with height and width interchanged.

THE ELIPTOFLEX

THE PROBLEM: With the advent of stereo, the use of two massive unwieldy speaker systems became unfeasible in most of today's combination living room—music room areas. One answer to this problem was the air-tight bookshelf speaker systems of which there are many excellent variations. However this design is inherently inefficient and requires costly high wattage amplification.

THE SOLUTION: The "Eliptoflex" is the latest development from Lafayette's acoustic laboratories. It is the result of an intensive research program to develop a bookshelf enclosure that may be utilized with any efficient 12" full range, coaxial or triaxial speaker. It may also be used with a 12" woofer, separate tweeter and crossover. Utilized with a proper speaker the "Eliptoflex" achieves a degree of natural smoothness coupled with low distortion and a rich, robust bass hitherto found only in large speaker consoles or inefficient bookshelf systems many times its price powered by large amplifiers. With the "Eliptoflex" there is no need for costly high wattage amplification due to its highly efficient design characteristics.

There are two departures from convention which contribute to the excellence of the "Eliptoflex" performance:

one, the elliptical port, and two, the diffracting ring. The loudspeaker is mounted on a baffle recessed in the cabinet shell with the front plate extending partially across the front surface of the baffle forming ducts or tubes from the port openings to the outside air. The elliptical cutout changes the effective length of the duct across its area. This variation in path lengths provides an extremely smooth transition from duct to free air, broadens the frequency response at which it is effective and provides better transient response. Mixing the front and rear radiation from the loudspeaker diaphragm in this manner produces a truly coaxial presentation over the complete frequency spectrum. The tonal unity is such that no separation of source can be detected between high, middle and low frequencies. A triangular shaped diffracting ring mounted on the front of the baffle board virtually eliminates undesirable cancellation effects normally produced by close coupling of front and rear cone radiation. The result is a "lens" effect, changing relative particle velocities and consequently, phase relationships so as to produce a smooth transition from front to rear radiation.

Comparative laboratory and listening tests indicate that "Eliptoflex" performance is demonstrably superior throughout the audio spectrum.

The "Eliptoflex" is beautifully finished in a variety of hardwood veneers for attractive room placement. Dimensions are 14" H x 23-7/16" W x 13-5/16" D.

NEW! LAFAYETTE SK-125 HI-COMPLIANCE 3-WAY SPEAKER SYSTEM

8" Woofer - 6 1/2" Mid-Range 2 1/2" Tweeter

INCLUDES 3-WAY CROSSOVER NETWORK

- HIGH COMPLIANCE SPEAKERS
- VARIABLE BALANCING CONTROL
- FREQUENCY RESPONSE FROM BELOW 35 TO 18,000 CPS
- SOLID VENTED, DUCTED-PORT TYPE ENCLOSURE
- PERFECT FOR STEREO

Lafayette has succeeded in achieving a standard of performance formerly associated only with very large speaker systems. This complete 3-way speaker system, incorporates advanced Hi-Compliance speaker design in an extra rigid vented, ducted-port type enclosure, lined throughout with acoustic material. The natural, full bass, faithful mid-range and clear sparkling highs are startling from a speaker system of such small proportions. Employing a 3-way LC crossover network with a variable 10-position balancing control, it is possible to match the speaker system to individual room acoustics and listening tastes. Frequency response is from below 35 to 18,000 cps. with a power handling capacity of 25 watts. Impedance 8-16 ohms. Finished on all 4 sides in attractive hand-rubbed mahogany or walnut veneers (please specify). Dimensions are 24" W x 11" H x 10 1/4" D. Shpg. wt., 26 lbs.

A SMALL MIRACLE FROM LAFAYETTE—THE NEW SK-124 ULTRA-COMPLIANCE MECHANICAL 2-WAY SPEAKER SYSTEM

- FREQUENCY RESPONSE 40-16,000 CPS
- ESPECIALLY DESIGNED VENTED, TUNED, DUCT TYPE ENCLOSURE
- UNIQUE MECHANICAL 2-WAY SPEAKER WITH EXTRA HEAVY MAGNET
- EXCELLENT FOR STEREO

\$17⁵⁰ OUTPERFORMS SPEAKERS DOUBLE LAFAYETTE'S LOW PRICE

Lafayette has indeed wrought a small miracle in engineering such acoustic excellence into so small a package. Smooth, distortion free response with a deep fundomer bass and clean pure highs that give no indication of small size and price. The perfect speaker for that high quality installation in your home, office or restaurant—two are ideal for stereo.

The speaker features unique dual cone construction with extra heavy magnets. Both tweeter and woofer "float" on flexible, corrugated edges with the outer edge of the tweeter cone attached to the mid-section of the woofer cone. This results in a mechanical crossover so that both cones operate in phase at low frequencies, but only the tweeter cone operates at high frequencies. The same type of wide-range frequency response normally found only in true coaxial or multiple speaker systems is provided. Frequency response of 40-16,000 cps. Impedance 8-16 ohms. Cabinet is finished on 4-sides in hand-rubbed mahogany and walnut for attractive horizontal or vertical placement anywhere in the room. Dimensions are 10 1/2" H x 18-7/16" L x 8-7/16" D. THE NEW ULTRA-LINEAR SK-128 FULL RANGE 8-INCH DUAXIAL SPEAKER WITH NEWLY DEVELOPED TWEETER BAFFLE DESIGN.

- 40 TO 16,000 CPS—FLAT WITHIN 3 DB
- HIGH EFFICIENCY
- HIGH EXCURSION WOOFER WITH UNIQUE "CONICAL STIFFENER"
- HANDLES HEAVY BASS PASSAGES WITHOUT "DOUBLING"

Eccentric Tweeter Mounting & Unique Elliptical Baffle Completely Eliminates Interaction Between Woofer & Tweeter

The SK-128 combines the best features of a multiple speaker system in one compact and economical unit. It offers full, even coverage of the entire audible range, with no distortion or coloration to mar your listening pleasure. The specially treated woofer cone has a unique "Conical Stiffener" at the apex which, coupled with its high compliance, enables the cone to operate in a piston-like manner—delivering a clean, powerful bass response. The 2-inch tweeter has its own voice coil and magnetic field. Special treatment of cone and cone edge provides even distribution of the high frequencies, with no peaks or resonances. The unusual off-center mounting of the tweeter and its elliptical baffle minimizes interaction between tweeter and woofer and insures an overall response free of intermodulation distortion. Electrical crossover from the woofer cone to the tweeter unit is provided by a

built-in network. An adjustable brilliance control permits matching of sound to room acoustics. Efficiency of the speaker is such that it will operate from any amplifier with an output of 1 watt or more. Installed in a bass-reflex type of enclosure, it performs outstandingly, and is recommended for all high-quality music systems—whether monaural or stereophonic. **SPECIFICATIONS:** Overall Response: 20-20,000 cps (40-16,000 cps \pm 3 db). Free air Resonance: 45-65 cps. Impedance: 8 ohms. Power Rating: 20 watts Integrated Program Material. Crossover: 2,500 cps. Overall Diam. 8-5/32". Overall Depth: 5-17/32". Baffle cut-out: 7-1/32". STEREO AUDIO ANALYST SINGLE NEEDLE—DUAL CHANNEL VU BALANCE METER

- UNIQUE TWO COIL GALVANOMETER TYPE PRECISION METER MOVEMENT
- SEVEN RANGES OF METER SENSITIVITY
- EFFORTLESS BALANCING OF STEREO SYSTEMS
- PROVISION FOR USE AS VU METER AND TAPE RECORDER LEVEL INDICATOR
- MAXIMUM METER SENSITIVITY 120 μ a

The TM-66 provides the solution to all stereo balancing problems. This unique precision meter movement utilizes 2 separate coils set in a single magnetic field. Each channel feeds a separate coil through a full wave bridge rectifier. When both signals are equal and balanced the resultant deflection on the scale will measure 0. Unlike conventional stereo indicators having two unrelated movements, calibration of one meter against the other (channel A vs. channel B) is unnecessary. Since the two separate coils interact within a single magnetic field, the single needle movement acts upon channel A and channel B simultaneously, automatically maintaining the unit in constant calibration. Individual channels may be measured by

means of the two slide switches. An extremely stable meter action and protection from peak voltages is provided by special damping networks. Since the unit is in continuous calibration the need for individual range controls are eliminated. The single seven step range control serves for both channels and facilitates the use of the meter with all amplifier power levels. By properly positioning this control the movements may be used as VU meters when terminated across the 600-ohm load. The scales are calibrated in "Volume Units". Sensitivity is 1.2 volts, for 0 vu or 100 percent indication. The metal case is finished in a rich satin gold. Overall size is 4 1/4" L x 5 1/4" H x 4-3/16" W.

The Lafayette LA-45 is a complete 14-watt amplifier with built-in preamplifier-equalizer with wide range frequency response and low hum and distortion to ensure sparkling reproduction that will delight you. This undistorted power is achieved from circuitry employing the new premium quality EL84 tubes in a pentode-connected balanced output circuit. 5 inputs are provided for every type of crystal, ceramic or magnetic phono cartridge, for tuner and tape head as well as high level auxiliary input. The front panel function selector and equalization switch gives instant choice of tuner, aux, or phono with proper equalization for all types of records, and tape head. Equalization positions are RIAA (LP), POP for 78 rpm records, and NARTB tape head equalization. A "Monitor" jack and switch permit tape monitoring, provide a high level signal for tape recording, or allow plug-in use of the new stereo adapters. Other features include a 12 db per octave rumble filter, an auxiliary AC receptacle, provision for mounting in cabinet or on a console panel, attractive finish that blends harmoniously with both modern and traditional decor, and a power on-off pilot light. Its appearance matches the Lafayette LT-75 tuner. It comes complete with removable case.

extremely sensitive, low-noise "front end" in a cast housing completely pre-wired, ready to use. This new front end, for the first time, is completely practical even for a novice to use equal to really good professional kits. Employs the broad-band detector circuit. \$169 FM tuners now on the market. Eliminate need for AFC. Drift is less than 0.000 from cold start. Sensitivity is 6 db better than other kit tuners and equals that of the best tuners; it is 1.5 uv for 20 db on suppressed far below FCC standards. DM-70 traveling tuning eye. Input 300 ohm 260 kc, detector separation of 600 cps, 10,000 cps ± 1 db. Audio output 1 v for 5 kc deviation. Hum 60 db below 1 v. and multiplex outputs. Flywheel slide-stabilized low limiting threshold for protection from weaker signals, broad-band improved capture ratio and easier tuning, and heavy filtering, very low distortion. Tubes: 6AQ8, 3-6AU6, 1-6AL5, 1-6C4, 1-DM70, "silhouette" design adaptable to any console installation; optional cabinet. Size 10 1/2" x 12 1/2" x 10 1/2". Operates from 110-125 VAC.

THE MOST FLEXIBLE TUNER EVER DESIGNED!

More than a year of research, planning and engineering went into the making of the Lafayette Stereophonic Tuner. Designed against obsolescence, it incorporates every practical and worthwhile feature that is considered necessary for your complete satisfaction of all present and future types of broadcasting. Already, breathtaking stereophonic programs are being transmitted via FM and AM. It will certainly become more and more the popular method of high fidelity broadcasting. The tuner also provides an output for multiplex FM stereophonic reception, enabling you to enjoy the ultimate in high-fidelity sound reproduction. Since the FM and AM sections are completely independent of each other, this tuner can be used furthermore as a dual-monoaural tuner. In this way, the music lovers are able to listen to concert programs on the FM channel in one room, while the younger-set can listen to a different program on AM in another room. In addition, on a monoaural program which is broadcasted simultaneously via FM and AM, this tuner will enable you to tune in both channels and reproduce them through individual amplifier-speaker systems. The improvement of quality will be immediately noticeable because the sound source is now distributed and at the same time, the hole-in-the-wall point source effect is completely eliminated. Of course, the unit can also be used as an ordinary type of FM-AM tuner, providing you with unsurpassed quality of reception.

Apart from its unique flexibility, this is, before all else, a superior high-fidelity tuner, employing many features found only in the highest priced units. An inspection of the tubes and parts used will reveal that this tuner is engineered without compromise of any kind. With the Lafayette Stereo-Tuner you are assured of noise-free, drift-free, distortion-free performance. You will not only hear this quality, but also sense it even in the mechanical details; in the "feel" on the velvet-smooth easy flywheel tuning, in the professional appearance of the tastefully selected colors that will blend with any decor. The just-right shade of gold-brass escutcheon contrasts just enough with the dark maroon background, and is set off by matching maroon knobs with gold inserts. The design of the cabinet has the simplicity of modern styling, touched by a stroke of traditional elegance. Carefully designed for easy installation in console if desired. Deluxe features include separate FM and AM sections, each tuned with its own 3-gang tuning capacitor, and each has its individual low impedance cathode follower output. This means that long output cables can be used to connect tuner to amplifier or control center without fear of high frequency loss. Also, separate volume controls are provided for each channel so that, when used for stereophonic reception, a proper balance between channels can be achieved. Without this important feature, the wonderful realism of stereophonic sound would be destroyed. Convenient front panel switch changes from stereo to monoaural use. Simplified accurate knife-edge tuning is provided by magic eye which operates independently on FM and AM. Automatic frequency control "locks in" FM signal permanently. Ferrite rod antenna with loading ring is supplied to bring in weak AM stations for quality reproduction. Designed for easy assembly, the kit is built around two printed circuit boards and prealigned IF's, making construction and wiring simple, even for such a complex unit.

SPECIFICATIONS RANGE: FM 88-108MC, AM 530-1650KC. **FM CIRCUIT:** Armstrong, low noise front end with triode grounded grid amplifier and triode mixer. THE LAFAYETTE KT-600 SOLVES EVERY STEREO/MONAURAL CONTROL PROBLEM

In Lafayette's constant effort to bring you the very latest and most advanced developments in electronics — and particularly in high fidelity — at prices everyone can afford, Lafayette went to the most forward-looking experienced brains in the electronics/high fidelity industry and has now DARED to produce what we think is the MOST REVOLUTIONARY DEVELOPMENT IN STEREO HIGH FIDELITY — A BRILLIANT NEW ACHIEVEMENT — THE LAFAYETTE KT-600 STEREO MASTER AUDIO CONTROL CENTER

The KT-600 provides 4 dual concentric input level controls for balanced use of different types of program sources — such as AM and FM tuners, tape recorder with microphone, phonograph plus microphone, etc., and without overloading inputs; 3 controls are for high level input, and a separate level control is provided for the output of the preamplifier stage. The KT-600 provides separate turnover and roll-off dual concentric switches for 24 possible positions of accurate equalization on each channel; equalization on each channel may be set independently of the other. Furthermore, all inputs can be variably mixed, manually, at will (mix with phono, tape recorder with phono, etc.). The Bridge Control permits cross-channel feed or optionally acts as a volume control for the 3d channel (Bridge) output to eliminate "ping-pong" or "hole-in-the-middle" effects. An audible, sharp, accurate "null" (dip in sound output) is provided by a "Calibrate" position of the Stereo Function Switch working in conjunction with the clutch-type Balance Controls for precise stereo balance — highly important for good stereo performance. The 3d channel output can also serve for mixing any stereo program (stereo record, tape, AM/FM stereo) to produce excellent monaural recordings or to play a stereo program monaurally through a separate amplifier and speaker system in another room. The KT-600 has Electronic Phase Reversal to make up for reversed-phase recordings sometimes found commercially, in which there is a loss of some portions of the frequency spectrum, and to correct speakers connected out of phase. Channel reversal is also present for correct positioning of stereo music to the right or to the left — and this may optionally be accompanied by phase reversal for best overall stereo sound. The KT-600 has a Presence Rise Switch which pulls a solo instrument out of the general musical background with minimum disturbance of orchestral balance.

AND STILL OTHER PROFESSIONAL FEATURES OF LAFAYETTE'S KT-600 ARE: Tape head equalization for the new 4-track stereo tapes; Master Gain Control for individual or simultaneous adjustment of channel levels; inputs for constant velocity (magnetic) and constant amplitude (ceramic, crystal or capacitive) phono cartridges, all equalized by the Roll-off and Turnover selector switches; individual channel concentric bass controls and concentric treble controls which permit pre-setting for good stereo tonal balance and maintaining that balance at other tone control settings; tone control circuits use 5% tolerance components and 2 1/2% tolerance precision potentiometers for accurate centering of their "flat" positions; switched rumble and scratch filters; switched Fletcher-Munson loudness contour compensation; tape monitor output jacks and tape Monitor-Play switch permit monitoring with recorders having special monitor heads and preamplifiers and also permit a stereo/monaural tape deck with 1 or 2 record/playback preamplifiers to be permanently connected to the KT-600 for recording and playback; "plate follower" output stages for low impedance (1500 ohm) outputs with extremely low distortion; special low-frequency power transformer and DC operation of all filaments for exceptionally low hum and cool operation; low-noise deposited metal-film resistors and 7 of the new premium low-noise type 7025 tubes are used for extra-good signal-to-noise ratio. The KT-600 has printed circuit board construction for ease of wiring and maximum performance stability.

LAFAYETTE STEREO CENTRAL REMOTE CONTROL MODEL KT-315

ELECTRONIC STEREO ADAPTER KIT

This self-powered electronic adapter offers exciting features unique even in the fast moving stereo field. Inclusion of low-impedance "plate follower" outputs permits remote operation 50 feet or more from the controlled amplifier. Unusual bridge circuit assures precise balancing of the stereo system by means of audible "null." Objectionable "hole-in-the-middle" effect can be eliminated by cross feeding variable amounts of audio from each channel. Includes controlled third-channel output for driving third amplifier and speaker, if desired. Individual or simultaneous control of each channel. Phase reversal with or without channel reversal. Selective monaural operation. Frequency response 10 to 25,000 cps ± 0.5 db; gain 6 db; cross channel rejection better than 50 db. Premium type 7025 dual triodes. Printed circuit boards for easy error-free assembly. Complete, profusely illustrated manual included. Adapter with cage measures 6 1/2" wide x 4 1/2" high x 7" deep (not including knobs and projections). Shipping weight 7 1/2 lbs.

LAFAYETTE PROFESSIONAL TURNTABLE

WITH AUTHENTIC HYSTERESIS SYNCHRONOUS MOTOR

PERFECT FOR NEW STEREO & MONAURAL RECORDS

PROFESSIONAL 4-SPEED TURNTABLE WITH HYSTERESIS-SYNCHRONOUS MOTOR

The LAFAYETTE TRUE HYSTERESIS-SYNCHRONOUS MOTOR. Since many so-called "hysteresis" motors have appeared and will continue to appear on the market, it is important that you know the difference between the real thing, as provided by Lafayette, and the imitations with partial hysteresis motors.

THE LAFAYETTE TRUE HYSTERESIS SYNCHRONOUS MOTOR IS PERFECT FOR THE NEW STEREO AND MONAURAL RECORDS. THE FACT THAT THE NEW STEREO RECORDS CONTAIN VERTICAL MODULATION IMPOSES STRINGENT REQUIREMENTS ON TURNTABLES. THEY HAVE TO BE FREE FROM RUMBLE, FLUTTER, WOW AND SPEED VARIATION. THE LAFAYETTE TRUE HYSTERESIS SYNCHRONOUS MOTOR MEETS ALL THESE REQUIREMENTS WITH EFFORTLESS EASE, RESULTING IN SUPERIOR REPRODUCTION OF STEREO DISCS, AS WELL AS TREMENDOUS REDUCTION IN RECORD WEAR.

ONLY LAFAYETTE'S HYSTERESIS-SYNCHRONOUS MOTOR, in its price class, is made to extremely fine tolerances (on the order of .0001 inches!) Only Lafayette's motor has 16 cores, a high permeability rotor magnet, ball thrust bearings, allite sleeve bearings plus felt oil reservoir, cooling fins as an integral part of the rotor and a hollow rotor core for maximum efficiency and minimum heat. Only Lafayette's motor can be oiled from above, without disassembly, through a unique oil feed system. Only Lafayette's motor has a self-aligning armature.

ONLY LAFAYETTE CAN GIVE YOU A REALLY PROFESSIONAL TURNTABLE WITH TRUE HYSTERESIS-SYNCHRONOUS MOTOR AT SUCH AMAZINGLY LOW PRICES!

Here's THE turntable—the last word in professional high-fidelity performance! A fine precision instrument in every sense. Just look at some of these **OUTSTANDING FEATURES**—**WOW AND FLUTTER**: Less than 0.2% • **TURNTABLE**: Heavy, diecast aluminum. Lath-turned for perfect balance and concentricity, 12" diameter—weighs approx. 4 lbs. and provides amazingly constant speed; the extra-heavy rim acts just like a flywheel to prevent speed variations • **TRUE HYSTERESIS-SYNCHRONOUS MOTOR**: For smooth, low-noise, wow- and flutter-free operation • **RUMBLE AND NOISE**: 50 db below average recorded level • **INTEGRATED SPEED CONTROL**: For all 4 speeds—78, 45, 33 1/3 and 16 2/3 rpm • **2 OVERSIZE, HEAVY DUTY IDLERS**: Precision-ground; provide positive constant-speed rim drive • **SINGLE BALL THRUST BEARING**: Turntable rides smoothly over ball bearing floating on thin film of oil • **FREE-FLOATING, SHOCK-MOUNTED MOTOR** • **RUBBER CUSHION SHOCKMOUNTS** • **AUTOMATIC IDLER DISENGAGEMENT** • **RUBBER MAT** • **STAINLESS STEEL PRECISION SPINDLE** • **POWER REQUIREMENTS**: For 105-130 volts, 60 cps AC; draws 16 V.A. • **ACCESSORIES SUPPLIED**: 45 RPM adapter, Strobe disc • **SIZE**: 2 1/8" above and 4" below motor board; 14 1/4" deep x 12 1/2" wide • **SHIPPING WEIGHT**: 16 lbs.

12.50

- JEWEL BEARING SUPPORT
- INSTANT PLUG-IN CARTRIDGE CHANGE
- AUTOMATIC FLUID CONTROL
- PERFECT RECORD TRACKING
- ACCOMMODATES MOST STEREO & MONAURAL HIGH FIDELITY CARTRIDGES

This Stereo/Monaural transcription arm assures dependable and stable operation, utilizing the floating-action principle of viscous-damping. The arm is supported at a single point by a pivot and jewel bearing having negligible friction. Damping is accomplished by a silicone fluid occupying the gap between a ball and socket. This damping control permits high compliance and negligible tracking error and prevents damage to either record or stylus should the tone arm be accidentally dropped. Low frequency resonance, skidding and groove-jumping are likewise minimized. The tone arm accepts all records up to 12" and accommodates virtually all Stereo or Monaural hi-fi cartridges by means of precisely engineered adapters which simplify installation and provide proper stylus pressure. The arm has a decorative glossy-black finish. Overall length is 12"; height adjustable from 1/4" to 2 1/4" above motorboard; round mounting base is 2 1/4" in diameter. Shpg. wt., 2 1/2 lbs.

- PRECISELY-ADJUSTABLE COUNTERBALANCE WEIGHT
- NON-RESONANT WITHIN THE AUDIBLE FREQUENCY RANGE
- PERFECT TRACKING WITH THE LIGHTEST STYLUS FORCE
- EXTREMELY EFFECTIVE FOR PERFECT REPRODUCTION WITH "45-45" STEREO DISCS

RUGGED CONSTRUCTION — FOOLPROOF — TROUBLE FREE

A remarkable advance in tone arm design is presented in these new Lafayette tone arms. An unusual new principle, utilizing 2 vertical and 2 lateral hardened-steel knife-edge pivots supported by hardened steel bearings, provides extremely low horizontal and vertical friction. This unusual type of bearing provides minimum waveform distortion and no undesirable motion or loose-jointed action as viewed from the stylus end. Groove tracing is smooth, with excellent tracking even with very light pickup weight, due to the absence of frictional losses. Friction in horizontal and vertical directions is low, but mechanical impedance is high at 45°, providing maximum effectiveness with 45-45 stereo cartridges. The unique knife edge bearing construction makes it possible to draw out the 2 shielded leads from the center of the support column, eliminating "stiffness friction" due to the leads. A highly-precise bubble level is provided at the top of the support column; the bubble plus 3 adjustments on the base make for perfect leveling. Height of the arm is adjustable from 1 1/4" to 2 1/4" above motorboard. Overall length of PK-270 12" arm is 12 3/4"; linear distance from support column to stylus tip is 10"; the PK-280 16" arm is 14 1/2" overall; effective length is 11 1/2".

Regularly **49.95** Special **21.50**

A carefully designed and precisely manufactured professional tape "degasser" for complete erasing of tapes. Just place the tape reel on spindle of demagnetizer, slowly rotate 2 or 3 turns, take off, and that's all—a completely clean tape. The demagnetizer removes every signal on the entire tape—even extra strong sounds too loud to be removed by the recorder's own erase head. Completely clears tape of any prior recordings. In addition, by leaving tape completely unmagnetized, it serves to reduce tape hiss to the level of new "virgin" tape. In fact, tape hiss is so low that subsequently passing it over the erase head of a recorder actually INCREASES noise by 4-6 db. To take advantage of this noise reduction, some users

prefer to permanently disconnect the recorder's erase head, and use only bulk erasure. Two completely separate coils are used for doubly-effective erasure, even of large, 10 1/2" reels. An extra powerful unit for heavy duty use—draws over 6 1/2 amperes. The Lafayette Tape Demagnetizer offers all of these features, and at this special price. Can be used to demagnetize tape, magnetically striped film, plus tools and watches. This professional unit has a heavy, custom finished case, a rugged non-magnetic top, heavy duty on-off switch and power cord. Has built-in fuse. Pilot light prevents accidentally leaving it turned on. Size 6 1/2" x 7 1/2" x 3 1/2". Shpg. wt., 14 lbs. ML-120—Regularly 49.95 Net 21.50

Three complete sets are furnished: straight, 45°, and 90° (right angle), permitting quick and easy use with any tape head. Tape heads need no longer be removed from the recorder so they can be reached by the clumsy polepieces of older head demagnetizers; the Lafayette Demagnetizer's polepieces reach every head.

Far from being a luxury, a tape head demagnetizer is necessary for best tape recorder performance. Among all the possible sources of noise in tape recorders, there is only one which is common to all recorders and is a perfectly natural, common occurrence—tape hiss due to magnetized heads. Although unmagnetized when new, tape heads gradually become magnetized by sharp switching pulses occurring while switching the recorder from play

to record or vice versa. Some audio sources (especially the human voice) produce unbalanced signals containing more power peaks in one direction than in the other. This unevenness is also sufficient to cause magnetization of tape head.

The solution is to use a demagnetizer to remove this permanent magnetism from the head, thus reducing the noise level. Periodic head demagnetization is required for all tape recorders to insure optimum signal-to-noise ratio. For this reason, some professional tape recorders are demagnetized as often as several times weekly. Now, Lafayette enables anyone with even the most modest budget to perform this necessary demagnetization, with a minimum of effort. For 110 volts 60 cycles. Shpg. wt., 1 lb. NEW! EXCLUSIVE LAFAYETTE STYLOCHRON

- PROTECT YOUR PRECIOUS RECORDINGS.
- NO MORE GUESS WORK — KEEPS AN ACCURATE RECORD OF NEEDLE USE.

More precious recordings are ruined by tardy replacement of the needle than by any other cause. Now, there is no need to let this happen, especially to your doubly precious stereo recordings. Lafayette Stylochron lets you know just when to replace your needle. It has been in use so that you can know how long your needle has been in use, before it can do damage to your records. The Stylochron is quickly and easily mounted on your motor board or other convenient place. The moment your record changes or turntable starts, the Stylochron begins to register. It stops when the turntable stops. The 1000 hour dial will tell you at any time how long you have been using your stylus. It is marked off in 50 hour units. You can remove your stylus at any predetermined number of hours. Extends 1 1/2" below for inspection of the face plate is 2 1/4". Diameter of the face plate is 2 1/4". Extends 1 1/2" below or behind panel. Complete with instructions. Shpg. wt., 2 lbs. PK-224

HIGH FREQUENCY TWEETER WITH ACOUSTIC LENS

DIRECT IMPORTATION MAKES THIS PRICE POSSIBLE!

• FREQUENCY RESPONSE FROM 2000 CPS TO BEYOND AUDIBILITY
• LOUVERED ACOUSTIC LENS FOR UNIFORM SOUND DISPERSION
• HANDLES 25 WATTS OF POWER
• PRICED EXCEPTIONALLY LOW

New high frequency tweeter featuring a louvered acoustic lens for uniform sound dispersion and capable of handling up to 25 watts of distortion-free power. The directional tendency of high frequency notes is overcome by the natural wide dispersion angle of the short horn and the acoustic lens which disperses and radiates the high notes smoothly throughout the entire listening area. The lens is detachable for panel mounting, with a separate base for the tweeter furnished for external mounting where desired. Aluminum voice coil has 16 ohms impedance. Size: 4 1/4" long x 3" diameter, lens extends 2 1/2". Requires a crossover network, preferably one with a level control, such as the LN-2. With full instructions. Shpg. wt., 5 lbs.

 THROWS VOICE 1000 FT.
 SHOULDER STRAP & DETACHABLE MIKE JUST AIM & TALK

A power megaphone with many unusual features and many applications. Basically a highly efficient sound projector horn with a built-in microphone, capable of amplifying and projecting the voice with a range of 1000 feet. The microphone is a telephone-type element, easily replaceable, and may be detached and extended up to 10 feet from the horn. The reflex-type horn is extremely light-weight, rubber-rimmed, of strong, sturdy spun aluminum construction with 2 3/4" air column and is supplied with a strap for carrying or placing on the shoulder. A press-to-talk switch on the microphone provides for economy of power use—power is used only when actually talking. No warm-up time required—amplification is instantaneous. A patented non-linear current limiting device restricts current flow to safe levels for longest battery life. Uses 8 size "D" flashlight cells in series with an approximate life of about 10 hrs. of use. Battery housing serves as base for entire assembly. Battery compartment opens easily by means of 2 thumbscrews for battery replacement. Size 17" long overall; horn mouth is 12" diam. Shpg. wt., 8 lbs. less batteries.

NEW! GENERAL ELECTRIC VR-22 STEREO PHONO MAGNETIC VARIABLE RELUCTANCE HIGH FIDELITY CARTRIDGES

- **FREQUENCY RESPONSE**
20-17,000 cps
- **UP TO 30 DB CHANNEL SEPARATION**
- **VIRTUALLY HUM-FREE**
- **HIGH COMPLIANCE**

MODEL VR-277 with .7 mil diamond stylus. Absolutely the finest of all G.E. cartridges. Combining new design and manufacturing techniques with proven variable reluctance excellence, this cartridge is made virtually hum-free by mu-metal shielding on top, entire front and coil assembly. Harmonic and intermodulation distortion are effectively minimized by a lack of resonant peaks in the audio range, and an essentially linear flux field. Precise tracking and optimum compliance are assured by new stylus and armature suspension system. The stylus is easily changed without the need for special tools. Output is closely balanced over entire frequency range (one db at 1000 cycles) for equal sound volume from both channels. A ground strap allows use of this cartridge with either 3-or-4-wire stereo systems; the cartridge shield may be grounded individually by a separate wire. **SPECIFICATIONS:** FREQUENCY RESPONSE: 20-17,000 cps; OUTPUT: 6 mv. per channel at stylus velocity of 5.5 cm/sec; INDUCTANCE: 420 mh. per channel; CHANNEL SEPARATION: up to 30 DB; LATERAL COMPLIANCE: 3×10^{-5} cm/dyne; VERTICAL COMPLIANCE: 2×10^{-6} cm/dyne; RECOMMENDED LOAD, EACH CHANNEL: 47,000 ohms; RECOMMENDED TRACKING FORCE: 5 to 7 gms; SHPG. THE MOST EXTENSIVE TRANSISTOR LAB KIT IDEAL FOR STUDENT — HOBBYIST — EXPERIMENTER

Lafayette's new 15-in-1 transistor experimenters kit is the most practical introduction to the understanding of the operation of transistors — since it utilizes basic transistor principles and circuitry. Its unexcelled simplicity of construction provides a fascinating and educational program of instruction. You build practical, useful operating transistor devices that teach you transistor fundamentals and applications.

This versatile kit is supplied complete with transistors, relay, photosell, dual headphones and all necessary items including lead wire, solder. You also receive an easily understood instruction manual which explains just how each of the 15 circuits works. Battery powered, the kit is shockproof and safe — ideal for beginners. NEW! EXCITING "EXPLOR-AIR" RECEIVER KIT

4 BAND

18.50

- 4 Bands for total coverage:
- 550-1600 Kc. broadcast band
- 1.7-5.0 Mc., 5.0-14 Mc., 14-30 Mc. shortwave bands
- Complete bandswitching from front panel
- Built-in Big 4" PM Loud-speaker

The most sensational shortwave economy receiver kit ever offered. A complete shortwave and standard broadcast set which covers the entire region from 550 kilocycles to 30 megacycles. Four whole bands of fascinating programming unavailable elsewhere. Perfect for students of languages, radio amateurs and casual listeners.

Only a regenerative circuit can offer such amazing performance and yet be so simple to build. Building this fine kit is an absolute pleasure — it's so well designed you can't go wrong. Kit includes all the parts you need, and the detailed step-by-step instruction book with its giant pictorial drawings shows you just how to put them together.

One front panel knob does all the bandswitching at the flick of the wrist, immediately taking you from band to band. All coils are prewound for greater accuracy. This kit is so easy to build a child who can read could do it (and many already have!). The chassis is completely isolated from the circuit, so there is no shock hazard.

This precision radio kit is just full of extra features. Complete 4 band coverage of broadcast stations, international broadcast bands, amateur, maritime, fire and police services, yes, even satellite signals! Big 4" speaker and sensitive circuit with 50C5 output stage and 12AX7 regenerative detector and amplifier stages give you all the volume you want. Phone jack for privacy automatically disconnects speaker. All controls are on the front panel: On-Off Volume, Main Tuning, Band Spread, Bandswitch, Antenna Tuning, and Regeneration. 110 Volt 50-60 cycle AC-DC power supply lets you use this fine set anywhere. Size: 10" x 7" x 5". Everything needed for unexcelled reception is combined in a compact, economical package.

- WITH CLAIREX CADMIUM SULPHIDE PHOTOCELL
- ADJUSTABLE SUPER SENSITIVITY—WORKS WITH JUST A FLASHLIGHT AT 250 FEET!
- NEEDS NO SPECIAL HIGH-INTENSITY LIGHTS
- INSTANTANEOUS OR SUSTAINED OPERATION ON THE FLIP OF A SWITCH!

CAN BE USED AS BURGLAR ALARM

Lafayette's latest achievement in a super-sensitive photocell relay kit. Ideal for sustained operation required for burglar alarms, door buzzers, for turning on porch and home lights at night to discourage prowlers when away in the evening. Excellent for instantaneous on-off operation required for counters, packaging, door opening, motor activation and countless industrial applications. A flip of the switch converts unit from instantaneous "on-off" to sustained "on" operation. A simple push on the "RESET" switch opens the external circuit and turns off the alarm. The unit operates on 110 volts AC and incorporates the efficient 5823 cold cathode tube, permitting longer life since there are no filaments to burn out. The controlled circuit is plugged into a convenient 110V AC output socket. A simple change in wiring (in instructions), as well as convenient input terminals, enable you to supply the external circuit with any desired voltage. Relay contacts rated at 3 amps permitting up to 300 watts external load on 110 Volts AC. ONLY 18.95

- GANGED TONE CONTROLS
- STEREO-MONAUROAL SWITCH
- .04 VOLT SENSITIVITY
- 4 WATTS STEREO OUTPUT
- ISOLATION TRANSFORMER
- SEPARATE VOLUME CONTROLS

This is a complete 4-watt hi-fi stereo amplifier having 2 watts output per channel. Features separate volume control for each channel; ganged tone controls; Stereo-monoaural switch to feed one channel to both speakers and to reverse the channels. Just right for any use where a small stereo amplifier is required—ideal for custom mounting in even the tightest locations; specially designed for small apartment sized stereo systems.

An isolation transformer makes this circuit extra safe. Other circuit features for better performance include application of negative feedback to driver and output stages for wide-range response and extra low distortion. Dual-triode 12AX7 tubes function as voltage amplifier and driver, providing very high gain: 40 milliwatts drives this unit to full output. This tremendous gain, plus an extremely high input impedance, make this amplifier perform exceptionally well with all types of ceramic and crystal pickups, as well as tuners, tape recorders, etc. Selenium rectifier power supply has extremely good regulation. Logical layout, high quality parts, plus complete instructions for assembly, make this kit a pleasure to build and use. For 3.2 or 8 ohm speakers. Tubes: 2-50C5, 2-12AX7 plus selenium rectifier. Size: 9 1/2" x 5" x 4 1/2". Complete with all parts. For 110-120 volts, 60 cycle AC. Shpg. wt., 7 lbs. **KT-126—Kit, Complete Net 18.95**

NEW! Lafayette's SUPER-TROL R/C EQUIPMENT

(A) **RADIO CONTROL TRANSMITTER:** Assembled-tested-guaranteed. No license examination required for operation. Crystal controlled for stability and to meet F.C.C. regulations. Uses powerful 3A5 tube for range of approximately one mile. Will operate any 27.255 mc R/C receiver. Overall dimensions only 8 1/2" x 2 3/4" x 1 3/4" — just a handful! Includes antenna — tube — crystal — and instructions. Less Batteries. Shpg. wt., 2 1/2 lbs.

F-249 Net **14.95**
 Batteries required: Burgess U30 (3 needed) 1.75 ea. Burgess #2 (1 needed)13 ea.

(B) **RADIO CONTROL RECEIVER:** Completely wired and tested receiver — extremely sensitive and stable. Completely enclosed — ideal in boats — or case may be removed if desired. Ingeniously constructed to withstand vibration and shock. Features external fine tuning — antenna "snap" lead — plug for power and actuator connections. Ideal Companion for F-249 Transmitter and F-327 Servo shown elsewhere on this page. Requires one 1.5V battery and one 67.5 Volt battery. Size determined by use. Measures only 3" x 2 3/4" x 1 1/4". Complete with tube and instructions. Less batteries. Shpg. wt., 8 oz.

NEW! LAFAYETTE 27.255 MC CITIZEN BAND REMOTE CONTROL TRANSMITTER KIT KT-127

- WAY OVER 1 MILE LINE OF SIGHT TRANSMISSION!
- SUPER STABILITY FOR FOOLPROOF CONTROL OF MODEL PLANES, BOATS AND CARS.

Once again Lafayette spurts into the lead with its new amazing RC CITIZENS BAND TRANSMITTER. You'll marvel at the neatness and simplicity of its layout and at the dependability of its crystal controlled circuit. Fits comfortably in the palm of your hand — yet is so stable that it is unaffected by hand capacitance or motion. Has new attractive wide-scale meter for visually tuning transmitter for optimum foolproof performance. Has wide, non-critical tuning. Uses an B & W prewound coil — no tedious winding of coils! Tuning for maximum output and antenna loading adjustment easily performed from exterior of cabinet. Complete with approved telescoping antenna, meter, cabinet, chassis, tube, crystal, alignment tool, all parts and easy step-by-step instructions. FCC forms for exam-free permit enclosed with kit. Size 10" x 4" x 2 1/2". Shpg. wt., 5 lbs.

NEW! MULTI-PURPOSE ELECTRIC SERVO MECHANISM

- POWERFUL, MOTOR DRIVEN R/C ACTUATOR
- POSITIVE, INSTANTANEOUS ACTION
- FOR MODEL BOATS AND CARS

Lafayette's new, motor driven, remote control servo-mechanism. Imported by Lafayette to sell for half the price of any comparable unit! Carefully constructed for power, durability and rugged use. Operates with any single channel, remote control receiver and transmitter. When operated at the prescribed 3 volts, the action is accurate and rapid. Provides for selective steering and automatic return to neutral. Extremely efficient when used with model boats or land vehicles. Hobbyists will find uses for the servo-mechanism restricted only by their imagination. Single pulse operation — electronic neutralization. Measures only 2 1/2" x 2" x 1 1/4" overall. Includes instructions and linkage to extend actuator arm. Shpg. wt., 8 ozs.

REMOTE CONTROL ESCAPEMENT

A sturdy 2 arm self-neutralizing escapement. Completely wired (not a kit). Converts electrical impulses from remote control receiver to mechanical motion for varying movement of plane, boat, or car. Four 90° rotations — two by armature activation, two by neutralization. Has ratchet governor for maintaining foolproof rotating speed. Weighs only 7/8 oz. Size: 1-3/8" L x 2" W overall. Shpg. wt., 5 oz.

F-255 Net **2.45**

REMOTE ENGINE CONTROL ESCAPEMENT

Lafayette's exciting new air-bleed self-neutralizing remote engine control. Varies engine speed of your model. Neutral position of one arm is low speed, neutral position of 2nd arm is high speed, and maintained activated position of either arm (armature activated) stops motor. Perfect mate for Lafayette F-256. Compact and weighs only 3/4 oz. Requires 1-1/2 volt battery. Low current drain. Size: 1-5/8" x 1" x 3/4". Shpg. wt., 5 oz.

F-257 Net **3.45**

COMPOUND REMOTE CONTROL ESCAPEMENT

You have no sequence of operation to worry about! Simple as A B C! One pulse always gives right turn; two pulses always gives left turn. Three pulses closes the circuit for the supplementary control such as motor (F-257) or elevator, if used. The rudder always returns to neutral position after any turn as soon as transmitter keying button is released. With ratchet governor for foolproof operation. Sturdy construction — low current drain. Uses 1-1/2 volt battery. Weighs 1-1/8 oz. Size: 2-7/8" L x 1-9/16" overall. Shpg. wt., 6 oz.

BLONDER-TONGUE UNIVERSAL BOOSTER & COUPLER

- BOOSTS SIGNAL FOR 1, 2, OR 3 TV SETS
- COUPLES 1, 2, OR 3 TV SETS WITH 1 ANTENNA
- WORKS WITH ALL TV SETS —IDEAL FOR COLOR TV
- PERFECT FOR MULTIPLE DWELLINGS
- FIXED TUNED-CHANNELS 2-13.

HANG IT ON REAR OF SET AND FORGET IT!
Made by the leading manufacturer of television amplifying equipment, this flexible combination television booster and 3-set coupler is a fine example of advanced engineering design and construction. It provides improved home TV reception without the need for tuning or adjustments. Simply make connections to convenient screw terminals, hang it on the back of the TV set, and forget it. Automatically amplifies channels 2 through 6 more than 6 db; channels 7 through 13 more than 2 db. Input for standard 300 ohm balanced antenna. Outputs for 1, 2 or 3 TV sets, 300 ohm balanced. Low noise figure—works well with all latest types of TV sets and reduces interference. Amplifies the signal on 1 or 2 TV sets, whether one or both are operating. Permits use of 1 antenna on up to 3 TV sets—outperforms all non-powered couplers by more than 2 to 1. Size 6 1/4" x 3 3/4" x 2 1/4". Uses 6BK7A or 6BK7B tube. For 117 volts. 60 cps AC. - TESTED AT 3 TIMES WORKING VOLTAGE
- EXCEPTIONALLY RESISTANT TO HIGH TEMPERATURES AND MOISTURE
- SURPASSES PERFORMANCE OF MOLDED PLASTIC TUBULARS

They're new, they're different, and they're better! Now, at a price for less than that of ordinary plastic molded tubulars, Lafayette brings you, for every day service work, a condenser that was designed for critical industrial applications. The case is of durable gleaming porcelain, a ceramic known for its high degree of imperviousness to moisture and resistance to heat. The capacitor is of finest quality, tested at 3 times the rated voltage with much closer capacity tolerance. It maintains its characteristics under extreme conditions of heat and humidity. Its mechanical construction is excellent, the leads are firmly attached and sealed — they won't twist or break off. We've selected the most popular values and put them up in two serviceman designed kits. Each condenser is plainly marked. Each value is mounted on separate handy strips. All are conservatively rated at 600 DC working volts. See chart for contents of each kit.

- MAGNIFICATION RANGE 25X — 1200X
- 4 OBJECTIVES, 4 EYEPIECES,
- FULL RANGE FINE FOCUS ADJUSTMENT
- FULLY CONTROLLED, INTEGRAL MECHANICAL MOVEABLE STAGE

This superb instrument closely parallels the "Society" grade microscope in every desirable detail and yet is available at very low cost. Provides heavy, stable horseshoe base, smooth acting joint, enabling the body to turn through 60°, perfectly balanced at any angle. Tube length is 140 mm. Four Huygens eyepieces and four achromatic objectives yield 16 combinations of power from 25X to 1200X. By means of two knurled micro-motion screws at the rear of the stage, it is possible for the operator to move the stage (and the slide) a distance of 3/16" - 1/4", in any direction, while looking through the eyepiece. Hardware is of the finest quality. Tubes are of the highest grade chrome-plated brass. All fittings are expertly machined and threaded, making this scope suitable for the most exacting work. Scope comes with a set of 5 basic dissecting instruments, made of high-grade instrument steel, 10 slides, a pack of cover slips and a tube of mounting fluid. Includes dovetailed wooden carrying case. NEW! Achromatic BARLOW LENS

- Makes Any Good Telescope Better!
- Doubles Your Telescope's Power!
- Improves Definition!
- Provides Greater Eye Relief!
- Greater Illumination—Wider Field!

4.95

The Barlow Lens is a negative (diverging) lens which can increase the range of magnification of any given set of eyepieces. Greater eye relief is provided—even on short focal length eyepieces. Sharpens definition and reduces image deterioration by permitting use of low-power eyepieces to achieve high magnification. This also provides for greater illumination and a wider field. By increasing the effective focal length of the objective—and reducing its relative aperture—it greatly reduces aberrations present in poorly corrected eyepieces. Lafayette's Barlow lens will make any good telescope perform like a much larger one. Fits all Lafayette telescopes except F-330 Explorer. Accepts eyepieces of 24.5mm (.97") O.D. and fits draw tubes of that size. Shpg. wt., 1 lb.

DIRECT VISION PRECISION SPECTROSCOPE

- 400-800 MILLIMICRON SCALE
- ADJUSTABLE SLIT WIDTH; DRAWTUBE SLIT FOCUSING
- HORIZONTALLY SPLIT FIELD

A prismatic type, hand-held instrument that has most features of the finest standard laboratory instruments. The millimicron scale is adjustable for sharp focus and for position (with "lock-in" feature to fix scale with relation to known spectral lines). Highest grade optics yields a broad dispersion field of high intensity obtained from best quality glass dispersing prisms, while excellent lens system resolves the closest spectral lines into 2 distinct lines. By a twist of the collar, a horizontally split field is obtained by which a comparison can be made of two light sources simultaneously. Tubes and collars are constructed of highly polished corrosion proof steel. Equally suited to laboratory or field work, the spectroscope has a wide array of applications: emission spectrometry of light sources; qualitative chemical analysis and metallurgical analysis by emission spectra; qualitative analysis of absorption spectra by examining aqueous or other solutions contained in the small test tubes provided. Absorption spectrum analysis has application in many branches of technology—color and dye chemistry, blood chemistry, clinical medicine, criminology. NEW Students Direct Vision Spectroscope

- SIMPLEST WAY TO OBSERVE SPECTRA
- BETTER THAN ANY GRATING SCOPE OF EQUAL COST
- HIGHEST GRADE OPTICS IN DIRECT VISION FIELD

Every physics, chemistry, science class, or hobbyist can afford to own this superb instrument. It is the simplest means by which one can observe emission spectra from light sources and vaporized chemical salts, and the Solar Spectrum.

A broad dispersion field of high intensity is obtained from several dispersing prisms of matched glass, while a high speed optical system yields good resolution, sufficient to separate 5769.6A from 5790.6A in the spectrum of a fluorescent lamp. The slit has adjustable width and can be focused sharply by means of an eye piece draw-tube, assuring easy viewing and establishment of Fraunhofer lines of the Solar spectrum or bright lines of the emission spectra. SUGAR REFRACTOMETER

- MODIFIED ABBE DESIGN
- READS % SUGAR DIRECT
- NO MOVING PARTS TO WEAR OUT
- CAN BE USED TO DETERMINE REFRACTIVE INDEX

Here is a beautifully constructed scientific tool of simple design, easy to operate, with no moving parts, except for the focusing eye piece. Operation is very simple. A few drops of the sample are placed on the prism, the cover is closed and observation is made by means of tungsten illumination or daylight. A perfectly clear field, completely color corrected, shows a reticle graduated in percent from 0-32%. With the sample in place as described above the field will show a sharp dividing line between a bright and dark portion; where the dividing line falls determines the reading, which can be estimated to 0.1% accuracy. The instrument can be converted to a universal laboratory type by changing % readings to "index of refraction" readings. No. (Consult Chemical Handbook or literature.) This instrument is an essential tool in the fields of sugar refining, agricultural, food technology, medicine, theoretical chemistry, etc. Comes in a convenient portable leather case. STEREO VU BALANCE METER

- BALANCES STEREO SYSTEMS ● TWO METERS IN ONE
- ACCURATE TAPE RECORDER LEVEL INDICATOR

Forever ends the problem of adequately balancing your stereo system. Two loudness meters provide a continuous comparison of speaker levels. The scales are calibrated in "Volume Units" and percent. 1.2 volts input sensitivity for 0 VU or 100 percent indication. Instead of continuously running back and forth between listening position and volume control, you can balance the entire system in one step. The special calibrating switch and 20 db attenuation controls permit exact matching of channels. The ideal recording level indicator for inexpensive stereo tape recorders giving accurate, reliable readings. Safeguarded against burning out by two internal DC blocking capacitors. Greater than 8,000 ohm impedance permits connecting to output circuits without loading. The entire unit is housed in an attractive plastic case 3" x 1 1/2" x 5 3/4". AUDIO OUTPUT VU LEVEL METER

A level meter for monaural systems, this unit is calibrated in Volume Units and percentages in accordance with standard VU meter practice. Precise damping enables quick and accurate indication of the average level of all non-sinusoidal audio signals. It has a maximum sensitivity of 1.2 volts for 0 VU indication, with a built-in 20 db attenuation control. This meter has countless uses, its 8300 ohm impedance being high enough not to load most circuits. It can be used for accurate level control of home hi-fi systems, especially where the amplifier feeds a remote loudspeaker. It is ideal as a consistently accurate recording level indicator, it indicates proper level in PA, paging and commercial music distribution systems. Housed in a compact plastic case 4" x 2-3/16" x 1-3/8". Shpg. wt., 2 lbs. **TM-20—AUDIO OUTPUT LEVEL METER**Net 5.95

A true "mechanical universe," designed for and dedicated to those who recognize the challenge and adventure that lie on the frontiers of space. The concept of the celestial sphere is the most convenient means of illustrating and discussing the common motions of the stars and the individual motions of the members of the solar system. It offers an easily used and easily understood working model of our universe. An invaluable aid in visualizing and identifying the stars and constellations and their relationship to each other, to terrestrial positions and to times and dates. Permits comprehensive explorations in time and space beyond the earth's atmosphere. The Lafayette celestial sphere may be defined as a sphere of infinite radius with its center located at the center of the earth. This system of geocentric celestial sphere will illustrate the true geographic zeniths of the sun and stars of any time on any day. All systems of astronomical spherical coordinates, such as this equatorial, galactic, ecliptic, etc., which are based on the celestial sphere, rotate with the sphere. The apparent retro-rotation of the stars, actually due to the earth rotating about an axis, is clearly demonstrated. The sphere will illustrate how the sky will appear at any hour—on any date—from any point on earth. With it you can tell time by the stars—learn to tell time by the sky—clearly illustrate and help solve navigational problems. Traces the orbits of man-made satellites and finds their overhead positions. Serves as a superb star chart. Sun and moon positioned by external controls. Artificial satellites automatically circle around the terrestrial globe. The various stars, constellations and their identification are permanently molded—not printed—on the celestial sphere. The celestial globe is 14" in diameter with the terrestrial globe centered within. Equipped with horizon ring—time ring—fixed meridian ring—signing meridian ring—sun and moon pointers—fixed ecliptic—detachable "planet"—indications—universal base—and complete instructions. Ship. High sensitivity superheterodyne circuit utilizes 8 miniature tubes plus rectifier tube and transformer input, full wave rectifier. The 80-40-20-15 and 10 meter amateur bands are clearly indicated on the illuminated dial face, and can be easily tuned with the pre-calibrated band spread. The receiver has complete band switching, thus eliminating the need for bothersome plug-in coils. Band spread is laid out on an easy-to-read 0-100 scale, and features a weighted control knob which offers smooth, precise tuning. Coverage of from 455 KC to 31 MC is obtained through the use of four switchable ranges (455-1600 KC/1.6-4.8 MC/4.8-14.5 MC/10.5-31 MC). All controls, switches and phone jack are located on the front panel, while an optional accessory socket delivering 360 volts DC and 6.3 volts AC is located in the rear of the receiver. Sensitivity is 13 microvolts (Signal to noise ratio is 20 DB at 3.5 MC) Selectivity is -60DB at 1MC, image rejection is -40DB at 3MC. Panel is gray metal with white lettering, and controls are black with aluminum trim. Hinged top makes inside of receiver readily accessible to operator. 7 1/2" H x 15" W x 9" D. Shpg. wt., 22 lbs.

- 4 TRANSISTORS • NO HUM, NO HEAT • NO SHOCK HAZARD
- PRINTED CIRCUIT BOARD • NO WARMUP DELAY • 3" SPEAKERS
- EXTRA SMALL • 1 THERMISTOR

Extra features... tap performance... portability... long battery life... ideal for home and office. Perfect as a portable unit... for the summer cottage... backstage for once-a-year amateur theatricals... as well as permanent installation... office to office... kitchen to bedroom. This is a complete transistor intercom system, consisting of a master station and a remote station. Specialized circuitry allows each unit to call the other (remote can call the master even when it is turned off) while requiring only a 2-conductor wire for interconnection. Completely transistorized. Requires only 6 volts from built in, easily replaceable batteries for many months of reliable operation. Elimination of all power line connections prevents all shock hazard and makes this unit safe to use everywhere. Master station has a volume control and function switch with 3 positions. Talk, far speaking to remote; listen, far monitoring the remote (baby sitting, etc.); and standby which turns off the power to conserve batteries. Zero warm-up time means the unit is ready for operation. When the unit is turned off, the remote can call the master by depressing its call switch; a pleasant musical tone alerts the master that it is being called. Trouble-free long-life printed circuit board, correct amount of negative feedback, and push-pull output circuit. Big 3" speakers are used for optimum naturalness and intelligibility. Each unit is housed in an attractive two-tone case, measuring 5 x 4 1/2 x 3 1/2". Complete with cable and batteries. Shpg. wt., 6 lbs. PA-71
