Outstanding bandspread, selectivity with built-in Q multiplier, and sensitivity combine to make the HA-230 one of the "hottest" general coverage receivers we have ever offered. Illuminated slide rule dial, bandspread with markings every 5 KC on 80 and 40 meters, every 20 KC on 20 and 15 meters, and every 50 KC on 10 meters, plus an edgewise S-meter combine to make this receiver Q-5 on the crowded amateur bands. Built-in BFO can be used to separate CW stations by means of the pitch control. Effective Q multiplier adds excellent selectivity. Front panel controls: Function Switch, Audio Gain, Selectivity (Q-Multiplier), Frequency (BFO), Band Selector, IF Gain, Antenna Trimmer, AVC-MVC Switch, ANL Switch, Main Tuning, Bandspread Tuning, and Headphone Jack.

- Frequency Response 40-16,000 cps
- Especially Designed Vented, Tuned Duct Type Enclosures
- Unique Mechanical 2-Way Speaker with Heavy Magnet

Ultra-Compliance 2-Way Systems featuring a unique dual cone speaker with heavy magnet structure employed in a specially designed tuned ducted port enclosure. Both tweeter and woofer "float" on flexible, corrugated edges, with the outer edge of the tweeter cone attached to the mid-section of the woofer. This results in a mechanical crossover so that both cones operate in phase at low frequencies, but only the tweeter cone radiates high frequencies. The same type of wide-range frequency response as found in true coaxial or multiple speaker systems is achieved in these unique "Ultra-Compliance" Speaker Systems. Frequency response is 40-16,000 cps—Impedance: 8-16 ohms. Available in mahogany or oiled walnut. Finished on four sides. Dimensions 10 $\frac{3}{8}$ "x18 $\frac{1}{4}$ "x8 $\frac{3}{8}$ " D. - Two Separate Speakers—Powerful 10" Woofer with 1 lb. Magnet Plus 4" Tweeter
- Large New "Tuned" Enclosed with Tube-Type Ducted Port
- Overall Response 30-19,000 Cycles

No Money Down

An unusually compact speaker system that delivers really "big" sound. Enclosure is a bass-reflex design using a ducted port of the tube type to provide proper acoustic "tuning." The tube provides a special path for the low frequency sound waves radiated from the rear of the woofer so that they emerge "in-step" with those radiated from the front and thus provides substantially greater bass sound power from the system. Solid wood construction, plus the use of sound absorbent material ensures an extremely rigid enclosure, free of undesirable resonances. A powerful 10-inch woofer provides reproduction of the low frequencies. A 4-inch cone-type tweeter provides reproduction of the mid-range and high frequencies (to beyond audibility) and is of the closed back type to prevent interaction with the 10-inch woofer. Smooth transition is achieved by means of electrical crossover at 2800 cycles. Finished on all four sides to permit either vertical or horizontal placement. Dimensions are 21 $\frac{1}{2}$ "x11 $\frac{3}{4}$ "x10 $\frac{1}{2}$ " D. Overall frequency response: 30-19,000 cycles; nominal impedance: 8 ohms; power handling capacity: 30 watts program material. An acoustically "tuned" enclosure, fully lined, assures smooth, resonant-free sound output with extended bass response. The enclosure is finished on all four sides in a rich, hand-rubbed oiled walnut veneer and tastefully framed in an ebony and gold picture frame molding with white and gold acoustic grille material. # Deluxe LAFAYETTE Ultra Selective 10 Station Transistorized Intercom Systems

Lafayette's New Deluxe 10-Station Intercom System offers extreme versatility and dependability. Up to ten master stations may be connected providing a great number of home and office applications. Special light indicator circuit gives a silent and visual sign of being called by a particular station. The "Call" button may then be pressed to buzz and alert the receiving station. The indicator lamp stays lit until the call is answered by the receiving station. To answer a call the selector button corresponding to the lit indicator lamp is pressed with the "Talk" button to begin conversation. # Slide Rules — Drafting Equipment

(A) LAFAYETTE VECTORLOG® 12" SLIDE RULE

- Laminated Bamboo Construction
- P, P', and Q Scales—For Direct Vector Addition
- Hyperbolic Sine and Tangent Scales
- Two Sine Scales
- 5 Log Log Scales Plus a Voltage DB Scale

The Lafayette VECTORLOG Slide Rule provides a new concept in scientific calculation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units: A problem-tested location of scales; and adjustment screws to allow variable tension on the slide. Scales include: (FRONT) T-1, TR-2, P, P', Q, ST, S-1, S-0, C, D, LL01, LL02, LL03, LL1'; (REAR) Sh-1, Sh-2, DF, A, B, K, C1, CF, Th, C, D, LL3, LL2, db. "At the least, the HB-600 is a major breakthrough in CB communications... Just the noise silencer alone justifies the 219.95 price tag..."

The "CB Commander" offers every feature you'll ever want in a 3-way CB transceiver - PLUS provision for Business Band\* operation. RF Noise Silencer (Pat. Pend.) provides spectacular ignition noise reduction. Also features built-in solid state AC and DC power supply for low drain operation on 117 VAC or 12 VDC (Neg. or Pos. Gnd.). Dimensions: 4 1/2" high, 11 1/2" wide, 8" deep. Shpg. wt., 11 lbs. Imported.
