- Powerful Handling Capacity—30 Watts
- Powerful 10" Woofer with 1 lb. Magnet Plus 4" Tweeter
- "Tuned" Enclosure with Tube-Type Ducted Port
- High Frequency Brilliance Control
- Overall Response 30-19,000 Cycles

An unusually compact speaker system that delivers really "big" sound. Enclosure is a bass-reflex design using a ducted port of the tube type to provide proper acoustic "tuning." The tube provides a special path for the low frequency sound waves radiated from the rear of the woofer so that they emerge "in-step" with those radiated from the front and thus provides substantially greater bass sound power from the system. Solid wood construction, plus the use of sound absorbent material ensures an extremely rigid enclosure, free of undesirable resonances. A powerful 10-inch woofer provides reproduction of the low frequencies. A 4-inch cone-type tweeter provides reproduction of the mid-range and high frequencies (to beyond audibility) and is of the closed back type to prevent interaction with the 10-inch woofer. Smooth transition is achieved by means of electrical crossover at 2800 cycles. Features high frequency brilliance, control at rear of cabinet. Dimensions are 21 $\frac{1}{2}$ Wx11 $\frac{3}{4}$ Hx10 $\frac{1}{2}$ "D. Overall frequency response: 30-19,000 cycles; nominal impedance: 8 ohms; power handling capacity: 30 watts program material. (A) LAFAYETTE VECTORLOG® SLIDE RULE

For Communications Engineers and Physicists

- Laminated Bamboo Construction • P, P', and Q Scales For Direct Vector Addition • Hyperbolic Sine and Tangent Scales Two Sine Scales — One Marked in Degrees, One Marked in Radians • 5 Log Log Scales Plus a Voltage DB Scale • Complete with Belt Carrying Loop and Leather Case

The Lafayette VECTORLOG Slide Rule provides a new concept in scientific calculation, incorporating scales and arrangement designed for quick-easy-manipulation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. VECTORLOG is the result of extensive tests for ease of manipulation. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units: A problem-tested location of scales; and adjustment screws to allow variable tension on the slide. Scales include: (FRONT) Tr-1, TR-2, P', P, Q, ST, S-1, S-O, C, D, LLO1, LLO2, LLO3, LLI1; (REAR) Sh-1, Sh-2, DF, A, B, CI, CF, Th, C, D, LL3, LL2, db. With instruction book, leather carrying case, and belt carrying loop. Imported.

(B) DELUXE LOG LOG DUPLI DECIMAL TRIGONOMETRIC SLIDE RULE

- 25 Scales with 8 Log Log Scales • Two Color Scales • Extended Range Avoids "Going Off Scale" • Extra P Scale Simplifies Computations

10" log log dupli decimal trigonometric slide rule contains 25 scales including 8 Log Log Scales. Troublesome end-for-end resetting is eliminated by extensions of C and D scales. Twin set of Log Log scales run from 1.001 to 100,000 and .999 to .00001, enlarging the scale by one scale length each compared with ordinary log log slide rules. Extra features include P scale which enables direct "readout" of cosine value. Scales include LLO1, LLO2, LLO3, DF, CF, CIF, CI, C, D, LL3, LL2, LL1, LLO0, L, K, A, B, S, ST, T, C, D, DT, P, and LLO. With instruction book, saddle leather case. Overall length is 14". Imported.

Specially selected, laminated, non-hygroscopic bamboo. Scales machine engraved on white plastic in permanently accurate calibrations. Adjusting screws permit varying tension on slide. 21 scales including C, D and CI on both sides. LLO and LLOO scales refer to B scale. All other scales coordinate and refer to D scale. Scales are L, LLI, DF, CF, CIF, CI, C, D, LL3, LL2, LLO, LLOO, A, B, K, CI, C, D, S, ST and T. Scale characteristics permit multiplication, division, proportion, inverse proportion, reciprocals, cotangents, squares, square roots, cubes, cube roots, logarithms, tangents, sines, PI factor multiplication and division, powers and roots of numbers less than 1, powers and roots of numbers greater than 1, logarithms to base "e." Boost flea power to real high power for extended range and better readability. Provides up to 100 watts PEP input into a 50 ohm load (with 8 watts RF Drive). For use with all low power rigs having 1 watt or more of output power. Unique RF sensing circuit automatically switches in linear when transmitter is activated. This radio frequency sampling stage switches the linear's B plus voltage which instantaneously energizes the linear. Absolutely no external switching is necessary. Built-in relay directly connects antenna to input 50-239 coaxial socket when receiving. No internal connections are required to your existing equipment. Simply insert the unit in series with your transmitter (or transceiver) and antenna and you're on the air with a real punch. Operates on 6, 10, 11, and 15 meters (20-54 MC). Circuitry is broadbanded so only one tune-up is necessary on any band. Accepts any mode of operation—AM, FM, SSB or DSB, and CW. Illuminated front panel meter indicates relative RF strength

of linear's output signal when linear is on or exciter's RF strength when linear is off. Self contained power supply utilizes a high efficiency toroid power transformer. Lafayette's new Priva-Com III Selective Filter pioneers a new era in reliable transistorized private tone circuitry. Using new ingeniously designed ceramic and resonant tuning fork circuitry instead of conventional reed relays, the solid state Priva-Com III is exceptionally adaptable for reliable mobile as well as fixed station performance. Its tiny size makes it a handsome mate for even the smallest solid state CB transceivers. Its dual tone signal minimizes the possibility of the transceiver speaker being turned on by stray ignition and power line signals. The Priva-Com III mutes the receiver. When its call switch is activated, either at base or mobile stations, the transmitted dual tone is received by the other Priva-Com III. The CB receiver is activated and the indicator light goes on. This light stays on until manually reset. Both base and mobile units can initiate calls at any time. The Priva-Com III features 9-transistors plus 2-diode solid state circuitry; simple-to-operate push-button switches for Standby, Normal, Call and Reset; a Volume Control; and Indicator Light; a sturdy mobile bracket for mounting under dash, under transceiver, etc. Supplied with 2 plug-in selective ceramic and resonant tuning fork filters, one for 817.5 cps, and one for 997.5 cps tone frequencies; also includes a 11 prong plug at end of cable for direct mating with Lafayette HB-500A, HB-555, HB-525A, HB-600, HB-600A and HE-20T.
