## (A) 13 1/4" VECTØRLOG® SLIDE RULE

For Communications Engineers and Physicists

- Laminated Bamboo Construction • P, P', and Q Scales • For Direct Vector Addition • Hyperbolic Sine and Tangent Scales; Two Sine Scales—One Marked in Degrees, One Marked in Radians • 5 Log Log Scales Plus a Voltage DB Scale • Complete with Belt Carrying Loop and Leather Case • With 10" Scale

The Lafayette VECTØRLOG Slide Rule provides a new concept in scientific calculation, incorporating scales and arrangement designed for quick-easy-manipulation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. VECTØRLOG is the result of extensive tests for ease of manipulation. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units: A problem-tested location of scales; and adjustment screws to allow variable tension on the slide. Scales include: (FRONT) Tr-1, TR-2, P, P', Q, ST, S-1, S-O, C, D, LL01, LL02, LL03, LL1'; (REAR) Sh-1, Sh-2, DF, A, B, Cl, CF, Th, C, D, LL3, LL2, db. With instruction book, leather carrying case, and belt carrying loop. Imported. Shpg. wt., 1 1/2 lbs.

## (B) 13 3/4" DELUXE LOG LOG DUPLI DECIMAL TRIGONOMETRIC SLIDE RULE

- With 11" Scale • 25 Scales with 8 Log Log Scales • Extended Range Avoids "Going Off Scale" • Extra P Scale Simplifies Computations • Two Color Scales

A log log dupli decimal trigonometric slide rule contains 25 scales including 8 Log Log Scales. Troublesome end-for-end resetting is eliminated by extensions of C and D scales. Twin set of Log Log scales run from 1.001 to 100,000 and .999 to .00001, enlarging the scale by one scale length each compared with ordinary log log slide rules. Extra features include P scale which enables direct "readout" of cosine value. Scales include LL01, LLD2, LLD3, DF, CF, CIF, Cl, C, D, LL3, LL2, LL1, LLO0, L, K, A, B, S, ST, T, C, D, Di, P, and LLD. ## (C) 12 1/2" LOG LOG DUPLI TRIG SLIDE RULE

Specially selected, laminated, non-hygroscopic bamboo. Scales machine engraved on white plastic in permanently accurate calibrations. Adjusting screws permit varying tension on slide. 21 scales including C, D and Cl on both sides. LLD and LLO0 scales refer to B scale. All other scales coordinate and refer to D scale. Scales are L, LL1, DF, CF, CIF, Cl, C, D, LL3, LL2, LLO0, A, B, K, Cl, C, D, S, ST and T. Scale characteristics permit multiplication, division, proportion, inverse proportion, reciprocals, cotangents, squares, square roots, cubes, cube roots, logarithms, tangents, sines, PI factor multiplication and division, powers and roots of numbers less than 1, powers and roots of numbers greater than 1, logarithms to base "e." Real Tiny: 1 1/4" H x 3 3/8" W x 6 1/8" D.

Using a new ingeniously designed ceramic and resonant tuning fork circuitry instead of conventional reed relays, the Priva-Com III is exceptionally adaptable for reliable mobile as well as fixed station performance. Its tiny size makes it a handsome mate for even the smallest solid state CB transceivers. Its dual tone signal minimizes the possibility of the transceiver speaker being turned on by stray ignition and power line signals. The Priva-Com III mutes the receiver. When its call switch is activated, either at base or mobile stations, the transmitted dual tone is received by the other Priva-Com III. The CB receiver is activated and the indicator light goes on. This light

starts on until manually reset. Both base and mobile units can initiate calls at any time. The Priva-Com III features simple-to-operate push-button switches for Standby, Normal, Call and Reset; a Volume Control; Indicator Light; and a sturdy mobile bracket for mounting under dash, under transceiver, etc. Supplied with 2 plug-in selective ceramic and resonant tuning fork filters, one for 817.5 cps, and one for 997.5 cps tone frequencies. Garage Door Opener with Radio Control

Deluxe, Perma-Power® garage door operating system. Easily handles any residential, track guided garage door; metal, fiberglass, or wood doors up to 20 feet wide and 8 feet high. Through the use of pulse-tone modulation circuitry you have complete privacy; only your pulse-tone sender can open the door. Gear/Head Chain drive motor exerts 200 lbs. of push-pull force. Needs only 2" of headroom space between high arc of the door and ceiling. Built-in light goes on as soon as door starts to open, stays on for approximately two minutes after door closes allowing you ample time to leave the garage in

illuminated safety. Sensitive safety clutch permits the chain drive mechanism to exert just enough force to move the door safely and gently. Should the door encounter an obstacle it will stop automatically and when started again will reverse itself. Pulse-tone sender can be carried in pocket or purse, kept in glove compartment, or clipped to the sun visor or under the dash. Additional signal senders are available for your second car. Operates on 117V., 60 cycles AC. UL Listed. Shpg. wt., 65 lbs. 13 N 8206WX \$8 monthly ..... Net **149.50**

# Featuring Automatic Reversing

LAFAYETTE'S RK-920 TAPE REVERSING SYSTEM WORKS ON 1-MANUAL AND 3-AUTOMATIC REVERSING POSITIONS IN EITHER RECORD OR PLAYBACK

REVERSE POSITIONS

- 1) **MANUAL**—Same as any tape recorder, but permits manual reverse at any point by depressing a button. Sensing metallic foil is disregarded.
- 2) **AUTOMATIC 1**: Tape moves in one direction and stops at end of tape where sensing metallic foil is located.
- 3) **AUTOMATIC 2**: Single Reverse—Tape playing or recording from either left or right reel feeds to opposite take-up reel, reverses itself at the end of the tape where metallic sensing foil is located and then feeds back to starting reel and automatically stops.
- 4) **AUTOMATIC 3**: Continuous Reverse—Tape continues changing (reversing) its direction at each end of the tape where the metallic sensing foil is located.
