- Enclosure Uses "Sonic Tube" for Deep, Reinforced Bass
- 12" Woofer with 4 1/2 lb. Magnet Structure and Large 2" Voice Coil

Here's a bookshelf system with the big, multi-dimensional sound that only multiple speakers can produce . . . and at an unbeatable price too! Every musical instrument is reproduced with brilliant realism because there are 6 speakers covering four portions of the entire audio spectrum. There's a big 12" speaker for the lows, a 5" unit for the midrange, two 3" tweeters for the highs and two 1 1/2" super-tweeters for the ultra high frequencies. The enclosure is also equipped with a tuned "sonic tube" that makes use of the acoustic output from the rear of the woofer to produce deep, reinforced bass for which this type of system is famous. And best of all, this system is efficient enough for use even with low powered stereo components — actually make them sound better too! Yet, because it can handle up to 50 watts of power, you can also use this system safely with high powered components, either now or in the future. Includes continuously variable midrange and high frequency level controls and polarized terminals. Enclosure is

- Four Tweeters—Two 3" Tweeters and Two 1½" Super Tweeters
- Separate Midrange and High Frequency Level Controls
- ¾" Enclosure in Rich, Hand-rubbed Oiled Walnut Finish

A no-compromise 6-speaker system created for just one purpose—the authentic reproduction of a massive symphony orchestra. Brings the spectacular realism of a living performance right into your home. This major accomplishment was achieved by careful selection and design of speaker units and enclosure. A 12" acoustic suspension woofer in a large air-tight enclosure over 3½ cubic feet in overall size results in remarkably powerful, solid bass. Added to this is an acoustically isolated 6½" midrange speaker that offers natural "presence" without exaggerated midrange peaks. Four tweeters

spread across the front in a calculated configuration ensure a wide dispersion of the highs and reduce high frequency "beaming." Two of these are 3" units covering the 4,500 to 12,000 Hz range, and two are ultra-high frequency 1½" aluminum cone units that extend response to well beyond audibility. Crossover frequencies: electrical at 800 and 4,500 Hz, mechanical at 12,000 Hz. Handsome enclosure is finished in a rich, hand-rubbed oiled walnut with dark brown tweed grille cloth. Impedance 8 ohms. Dimensions: 30"H x 18"W x 12"D. Imported, Wt., 66 lbs. 99 K 02248WX No Money Down*. Net 159.95

- Instant-On All Transistor Circuitry
- Balanced Input and Output to Virtually Eliminate Annoying Noise Interference

Designed to fulfill virtually every office, industrial, commercial or home intercom need. Lafayette's deluxe new 6 station intermix system provides complete flexibility and versatility with 3 separate types of installations: (1) MASTER TO MASTER HOOKUP. All Master Intercom System incorporates up to 6 separate master stations enabling 3 private conversations or 6 station conferences to be held. Master can initiate calls to any other Master. (2) MASTER TO REMOTE HOOKUP. Enables 1 Master station to communicate with up to 5 remotes either separately or in a six station conference. Remote can be hooked-up private or non private. Remotes can initiate call back to Master, but cannot talk directly to other remotes. (3) INTERMIX SYSTEM USING UP TO 12 MASTERS AND REMOTES: The number of units in this system may be as high as 12 depending on how many masters are used. For example if 3 Masters are used, each Master has 3 of its selector switches available to call 3 remotes, thus giving a total of 3 Masters and 9 remotes or 12 units in the system. The maximum number of remotes associated with any 1 Master is 6 minus the number of Masters in the system. The Lafayette XL-6 intercom utilizes powerful advanced solid state cir-

cuitry for "instant on" operation. Incorporates a balanced 40 ohm input and output circuit design. The advantages of this type of design is that the entire system when operating is virtually not susceptible to noise interference. Master unit has 5 individual station selector slide switches, 2 position press to talk—talk/Lock bar, and volume control. Remote unit has 2 position press to talk—talk lock bar. Handsome walnut wood cabinet with brushed aluminum finish. Includes junction box for wiring.

WIRING INSTRUCTIONS: In a balanced input and output system both Master-to-Master or Master-to-Remote hook-ups use separate 4 conductor unshielded pairs for each master or remote used in the system. Dim : Master & Remote 7¾"L x 2¼"H x 4¾"D. For 117VAC, 60 Hz. Imported.
