Convert to 4 DIMENSIONAL STEREO SOUND with the LAFAYETTE Dynaquad* 4 Channel Adapter

WHY

*Exclusive Licensee of Dynaco, Inc.

aren't you listening to the two extra channels in your stereo records, tapes, and FM broadcasts?

Just add the Lafayette Dynaquad adapter and two more speakers to convert your present 2-channel stereo system to a sensational derived 4-channel stereo surround system.

29⁹⁵

With All Connecting Cables

The Lafayette Dynaquad Can Be Used With All 2-Channel Stereo Amplifiers or Receivers

Add the Lafayette Dynaquad 4-channel adapter and two additional speakers to any existing stereo amplifier or receiver and enjoy multi-dimensional derived 4-channel sound from regular stereo records, tapes, and FM broadcasts. The Lafayette Dynaquad adapter actually recovers certain "reflected" sounds that already exist on regular stereo recordings but which are hidden during conventional stereo playback. These reflected sounds are those that reached the microphones indirectly from the sides and rear during the original recording. By reproducing these sounds from the two extra rear speakers, the acoustics of the original recording location are actually introduced into your own listening room. This adds a dramatic new dimension to all existing 2-channel stereo programs—the sound literally envelops you and becomes astonishingly "live". Unlike others, this

adapter preserves full channel separation at front and rear speakers and does not require an additional stereo amplifier. Connects to any standard stereo amplifier or receiver and 4, 8 or 16 Ohm speakers. For even better results from your records, we recommend the new Lafayette Pickering Phase 44 magnetic stereo cartridge (See listing below). Lafayette Dynaquad Adapter has a 4-position uncton switch (Balance, 4-CH, Front Speakers, Rear Only), plus a Rear Speaker Level Control. Phono jacks on rear for easy hook-up to 4 speakers and amplifier receiver. 3 pairs of cables supplied with phono plugs at one end. One 6 ft. pair for adapter to receiver, one 15 ft. pair for adapter to front speakers, one 25 ft. pair for adapter to rear speakers. Dimensions: 5 $\frac{3}{4}$ "W x 4 $\frac{1}{2}$ "D x 2 $\frac{7}{8}$ "H. Imported. Shpg. wt., 3 lbs. 99 B 02594 Net 29.95

Exclusive NEW LAFAYETTE/PICKERING Phase 44 Elliptical Diamond Needle Stereo Magnetic Cartridge

The Phase 44 cartridge will perform equally as well when used in a conventional 2-channel stereo system. The playback characteristics of the Phase 44 have been tailored to

achieve the utmost in performance. Channel separation exceeds 35 db. A special .4 x .9 elliptical diamond stylus tracks at 1 $\frac{3}{4}$ (± $\frac{1}{4}$) grams. Frequency range is 10-25,000 Hz. - Four Tweeters—Two 3" Tweeters and Two 1½" Super Tweeters
- Separate Midrange and High Frequency Level Controls
- ¾" Enclosure in Rich, Hand-rubbed Oiled Walnut Finish

Lafayette Criterion "80" 6 Speaker Acoustic Suspension Speaker System. One of the greatest values we have ever offered. The brilliant sound of this exceptional floor standing 6 speaker system was achieved by careful selection and design of speaker units and enclosure. A 12" acoustic suspension woofer in a large air-tight enclosure over 3½ cubic feet in overall size results in remarkably powerful, solid bass. Added to this is an acoustically isolated 6½" midrange speaker that offers natural "presence" without exaggerated midrange peaks. Four tweeters spread across the front in a calculated configuration ensure a wide dispersion of the highs and reduce high frequency "beaming." Two of these are 3" units covering the 4,500 to 12,000 Hz range, and two are ultra-high frequency 1½" aluminum cone units that extend response to well beyond audibility. Crossover frequency: electrical at 800 and 4,500 Hz, mechanical at 12,000 Hz. Handsome enclosure is finished in a rich, hand-rubbed oiled walnut with dark brown tweed grille cloth. Impedance 8 ohms. VALKYRIE-2 ROCKET KIT

- Launched Mechanically or Electrically

Here is an authentic, educational and yet entirely safe rocket kit for modelers and hobbyists which demonstrates the principles of rocket propulsion. The propellant releases no heat, is non-flammable, non-toxic and non-explosive. The 18 1/2 inch long Valkyrie-2 which blasts off to 1000 feet, can be safely held in hand. Uses durable polished aluminum rocket, engine and parts, with real working valves, separator and parachute. At liftoff, the rocket starts slowly at 4 "G's," with acceleration at burnout about 10 "G's." A timer assures deployment of the parachute which returns the rocket for another launch. May be either mechanically or electrically launched with a battery (not supplied). Complete kit includes rocket, engine, timer, separator, parachute, balsa nose cone, fins, loading valve and hose, electric firing assembly, launch stand, one can of propellant, accessories and instructions. VIKING TWO STAGE ROCKET KIT

The Viking is a complete, high performance, functioning two stage rocket with staging mechanism for in-flight separation. The first stage boosts the rocket to about 75 feet where a "burn-out" signal triggers the second stage engine. This accelerates to a velocity of 300 feet per second (200 miles per hour) while the first stage drops away. This velocity carries the second stage well over 1000 feet, where a parachute is automatically deployed to return it. All parts are recovered for future flights. Both engines are the same—reloadable, highly polished aluminum construction, pre-assembled and factory tested, each using 2 ounces of propellant per flight. The kit is complete including launcher, 15 ounce can of propellant, clear, concise instructions and a booklet on the principles of multi-staged rockets. Size 20" long x 1" dia.
