VECTORLOG[®] SLIDE RULE

- Laminated Bamboo Construction • P, P', and Q Scales • For Direct Vector Addition • Hyperbolic Sine and Tangent Scales. Two Sine Scales—One Marked in Degrees. One Marked in Radians • 5 Log Log Scales Plus a Voltage DB Scale • Complete with Belt Carrying Loop and Leather Case • With 10" Scale

The Lafayette VECTORLOG Slide Rule provides a new concept in scientific calculation, incorporating scales and arrangement designed for quick-easy manipulation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. VECTORLOG is the result of extensive tests for ease of manipulation. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units: a problem-tested location of scales; and adjusted screws to allow variable tension on the slide. Scales include: (FRONT) Tr-1, Tr-2, P', P, Q, ST, S-1, S-O, C, D, LLO1, LLO2, LLO3, LLI'; (REAR) Sh-1, Sh-2, DF, A, B, CI, CF, Th, C, C, LL3, LL2, db.
