Lafayette 9-TUBE TABLE MODEL RADIOCORDER

- RECORDS Voice, Music, Radio Programs, Home "Broadcasts"
- RECEIVES American, European and Short-Wave Broadcasts
- REPRODUCES Records of ALL Types—Superb Home "P.A." Unit

Lafayette proudly presents this 9-tube Radiocorder, superb combination radio phonograph, home recorder and public address unit. Destined to become the instrument by which all other "home recorders" must be judged, this Radiocorder is complete in every detail including microphone, recording blank and recording needles. Undoubtedly one of the greatest Lafayette values of all time. Try one on our liberal 30-day home-trial offer—we know that its performance will make you an enthusiastic Lafayette booster, not only because it more than lives up to the claims we make for it, but because of the real savings this value offers. Just glance through this list of features and convince yourself of its superiority:

THREE-BAND SUPERHETERODYNE: An ultra-modern, 3-band superheterodyne forms the basic unit of this Radiocorder. Covered are the American domestic broadcast band on 540 to 1690 kc (556 to 178 meters); the other two bands 2.25 to 7 mc (133 to 43 meters) and 7.5 to 24 mc (12.5 to 40 meters) cover International short wave, Police, Aviation, Amateurs, etc. Tubes used include: 1-6SA7, 1-6SK7, 3-6SQ7, 2-6K6GT, 1-6U5 tuning "eye" and 1-80 rectifier.

FIDELITY RECORD PLAYER: Utilizing a modern tangent-arm crystal pick-up the phono unit of this recorder provides superb reproduction of ALL commercial records as well as of your own recordings. Plays both 10" and 12" records.

ULTRA-MODERN HOME RECORDER: This most advanced type of home recording mechanism makes it amazingly simple to record any broadcast radio program, talking, singing, playing of yourself, your friends, your family.

CRYSTAL CUTTING HEAD for wide-range recording. Arm moves "outside-in" so that recordings may be played back upon any record player. Pre-set head for correct depth of cut.

CONSTANT SPEED HEAVY DUTY MOTOR with 10-inch turntable. Records blanks up to 10 inches; plays back all records up to 12 inches.

8-INCH ELECTRO-DYNAMIC SPEAKER provides full-range frequency response on both radio and records; excellent tone quality.

ADJUSTABLE ANTENN-AIRE. A new Lafayette development, permits adjustment of loop position from front of panel.

VARIABLE TONE CONTROL for both radio and phono, adjustable for individual tastes.

AUTOMATIC VOLUME CONTROL assures constant volume level on all radio programs.

AUTOMATIC BASS COMPENSATION maintains tonal balance at all volume levels.

HIGH-POWER PUSH-PULL OUTPUT for practically distortionless reception and recording.

CRYSTAL MICROPHONE of latest type for use in home recording. Bronze finish. 10-ft. cable.

MIKE PRE-AMPLIFIER TUBE: A 6SQ7 tube is used to amplify microphone input.

DUAL NEON LEVEL INDICATOR glows when volume level is best for recording. Assures perfect recordings every time.

HANDSOME TWO-TONE WALNUT CABINET houses this splendid Radiocorder. Of dignified moderne design, hand-rubbed satin finish. Full vision easy-to-read dial calibrated in kilocycles and megacycles.

THE Lafayette PERSONAL RADIO

Dainty as milady's handbag—and just about as big—this unique Lafayette Personal Radio is just what Americans "on the move" have been looking for. The tiny set makes use of the very latest 1.4 volt "miniature" tubes to bring you a quality of entertainment that seems miraculous. No matter where you take it—at the beach, to sports events, to the office, and even while walking in the street—it operates efficiently. It's housed in a durable leatherette covered case (just about the size of a camera) that measures only 8 1/8" long, 4 1/8" wide and 3 1/8" deep. All operating controls are protected by a hinged door that locks over the front; you carry it by means of the sturdy handle at the top. (Weighs only 4 1/2 lbs.) You can be the center of attraction wherever you go by taking a "Personal" along—and it costs very little to own and operate!

LATEST SUPERHET CIRCUIT: only by making use of the very latest type exceptionally low drain tubes has the compact construction of the Personal been made possible. It employs 1R5, 1T4, 1S5 and 1S4 tubes, in a well designed superhet circuit that provides good tone with sufficient power. A matched PM speaker of special design is housed directly behind the louvred front panel.

ECONOMICAL OPERATION: the receiver is powered by two flashlight cells (1 1/2 volts each) that cost but a few cents and one 67 1/2-volt "B" battery that lasts approximately 40 hours. Batteries can be replaced in a jiffy by anyone.

BUILT-IN ANTENNAIRE: a special loop antenno built into the case acts as an efficient aerial. As soon as the front door is opened, the receiver automatically turns "on"—ready to tune; when door is closed, set automatically is turned "off". Tuning range covers the entire domestic broadcast band from 535 to 1650 kilocycles. Two panel controls govern all operations; a calibrated volume control and a colibrated (in kc) tuning dial. Front panel neatly etched.

MODEL E-191: With tubes and batteries. Net weight only 4 1/2 lbs. Shpg. wt. 6 lbs. Code, EDIFY. List \$25.00.

Lafayette "LITTLE GIANT" PHONO-RADIO

This miniature phono-radio combination is perfect for small apartments, for the children's room or for the student's dormitory. Its superhet circuit and matched PM speaker provide good tone quality with ample volume. And it's offered at a price you'd ordinarily have to pay for a radio only! Take advantage of the extra enjoyment afforded by the record playing facilities by ordering Model D-133 NOW!
THE RADIO: employs a 12SA7, 12SQ7, 50L6GT "Beam Power" output tube and a 35Z5GT power rectifier, and has a matched PM speaker to provide good tone quality.

THE PHONO: makes use of a self-starting constant speed phono motor provided with a flocked turntable. Plays 10" and 12" records. The latest type offset head CRYSTAL pick-up brings you faithful record reproduction. Phono radio switch on the motor board for instant changeover from radio to phonograph operation.

HANK ANTENNA furnished with the set provides satisfactory reception under ordinary circumstances. An external aerial may be connected if desired. Tuning range brings you all domestic broadcasts.

The entire assembly is housed in a compact combination cabinet covered with attractive brown leatherette. Size: 11" wide, 9" high, 1 1/2" deep. Shpg. wt. 15 lbs.

THIS *Lafayette*
CATALOG YOU HOLD
DO YOU KNOW WHAT
LIES BEHIND IT?

A mammoth organization, you say. A company whose vast purchasing power brings you whatever you want in Radio at a bedrock low price.

A company staffed by experts in every department of Radio and Sound, always ready and eager to help you with your problems.

A company whose miles of stock shelves boast today's leading names in Radio—yes, and Yesterday's too, don't forget. Names that reflect a great heritage of research in radio.

A company equipped to serve you with everything in Radio and Public Address Equipment; whose every printed word is backed by guarantees; a company geared to speed your order—no matter how large . . . no matter how small—to your door, wherever that door may be.

That, very sketchily, is the picture behind this great new Lafayette Radio Catalog. But have you ever stopped to consider how that picture was made?

Not in some darkroom overnight, surely. Not in a single year, or even several years.

For twenty years, under the same management, Lafayette has labored on this gigantic project that now circles the globe. Twenty years—in the open—where others might and did see . . . where others might and did attempt to duplicate Lafayette's system, Lafayette's reliability, Lafayette's money-saving prices. Always there are those who seek reputation by imitation.

is Twenty Years?

And yet through all these years Lafayette has been first consistently. First in quality, first in service, first in Radio value around the world. How simple it all sounds—how easy to telescope in type and scan, until you ask yourself: how long is twenty years?

A long time, you say. But how long? Long enough for a world to change. Long enough for an industry to shape itself out of dreams, develop, and be relied upon to communicate that world's changing to the corners of the earth.

Today, where is the transportation, the shop, the style, the arts and sciences, the entertainment and entertainers, the public figure, the trade name, the standard, the method of two decades ago?

New times, new ways, new faces.

They only survive who have built on solid foundations, who are guided by principles that do not change, who grow and reflect the spirit of the times.

Such an organization is Lafayette Radio. A company old now in years, but still young in spirit. Young enough to adapt itself to the new ways—as informed on the latest developments in Radio and Sound as it is prepared to supply you with the equipment such developments require—and all the more dependable for its rich background of practical experience.

Today, Lafayette uses high speed transport facilities and modern teletype to bring you, from its nearest strategic branch, whatever you desire, and faster than ever before.

Today, Lafayette prestige among manufacturers means for you wider, more complete selections of top-quality merchandise than ever before.

Today, Lafayette's mighty buying power enables you to enjoy bigger values at less cost than ever before.

How long is twenty years? Long enough for a whole new generation to come of age and chorus a national buy-word of two decades ago—

Lafayette 6 TUBE 3-IN-1 PORTABLE SUPERHET

Good to look at—good to listen to! Beautiful styling and expert engineering have combined to make this tri-power portable a most desirable companion to accompany you on all your travels. The attractive leatherette covered case, available in a choice of three popular colors, is provided with a drop front that has a snap lock and key. And the receiver plays anywhere—from its self-contained batteries (NO CONNECTIONS TO MAKE), or from any 110 volt outlet, either D.C. or A.C.

Circuit features include: R.F. stage for increased sensitivity; built-in "Antennaire" loop aerial; 3-gang tuning condenser, etc.

8-TUBE PERFORMANCE is afforded by the multi-function 8-tube superhet circuit. And the R.F. Stage gives you increased sensitivity, so that reproduction is equivalent to that of the better home radios. Tubes used: 2—1N5GT's, 1—1A7GT, 1—1H5GT, 1—3O5GT and 1—35Z5GT rectifier. The "Beam Power" output stage (3O5GT) insures ample, distortionless reproduction. Tuning range includes all domestic programs plus state police calls; range is from 540-1650 kc (555-182 meters).

LOW BATTERY DRAIN: two 45 volt "B" and one 1½ volt "A" batteries are used. The use of low drain tubes gives "extra life" to the batteries (last 200-250 hours).

Other features are: powerful A.V.C.; easy-to-read dial; 8 to 1 reduction drive tuning ratio; 5" PM Speaker; automatic power shift cuts off batteries when electric current is used.

Neat leatherette covered cases with drop front having lock and key. Size: 12¾" wide, 9¼" high, 6" deep. Shpg. wt. 19 lbs. Code, INEPT.

Lafayette 7 TUBE 3 BAND 3-IN-1 SUPERHET

Amazingly versatile, this deluxe 1941 Lafayette portable brings you reception on **THREE** bands instead of the usual one—and the quality of reception afforded is far above the average because it uses **SEVEN** multi-function tubes instead of the usual five or six. Take one with you wherever you go—there are never any "current" problems, for the set operates on its self-contained batteries or on any 110 volt electric line—A.C. or D.C.

INCLUDES THE 60 METER BAND

THREE BANDS: You not only can tune in all the domestic programs, but police calls, amateur stations, Ship to Shore signals, two-way Avia-

tion signals, foreign short-wave stations and many others as well. Three bands are: 16.2-51 meters (foreign short wave); 47-133 meters (amateurs, aviation and ship-to-shore, police calls, etc.); 174-556 meters (domestic).

MAGIC ANTENNAIRE: Special loop aerials, built into the set, make it unnecessary to attach any aerial or ground wires for any type reception. Terminals for outside aerial included, however, for use where desired.

HEADPHONE JACK: whenever it is desired to listen to the set without disturbing others around you, merely plug a pair of earphones into headphone jack (automatically cuts off speaker).

MULTI-FUNCTION TUBES, special low drain type, provide exceptional performance. Seven tubes are: 1A7GT converter; 2—1N5GT's i.f. amp.; 1H5GT det., a.v.c. and first audio; 3O5GT and 50L6GT "Beam" Power; 35Z5GT rectifier. Uses a matched PM speaker. Case covered in durable "Pig-Tex" fabric and has drop front with lock and key.

MODEL C-125: With tubes. Size: 11¾" x 11¼" x 7¾" deep. Wt. 20 lbs. Code, GENET. List \$45.00.

Lafayette 7 TUBE 3 BAND 3-IN-1 SUPERHET

This set has been especially designed for aviators, pilots and those interested in airways signals. It incorporates a long wave tuning band that permits reception of AVIATION BEACON SIGNALS and weather reports. And the power provided and quality of reception is fully equal to that afforded by the larger table model home radio receivers. Unusually versatile, it operates on self-contained batteries or on any A.C. or D.C. 110 volt light line, and has three tuning ranges for a wide variety of different types of reception.

Housed in a beautiful brown "Pig-Tex" covered portable case with drop front.

SPECIAL TUNING RANGE: three bands are provided: 16.2 to 51 meters for direct reception of foreign s.w. stations; 194 to 556 meters for domestic programs; 790 to 2140 meters for Aviation Beacon Signals, Weather Reports, etc. (also European long wave programs; can be received when you travel on the continent).

"BEAM" POWER: low drain multi-purpose tubes are used in the highly sensitive and selective superhet circuit. Uses: 1A7GT converter; 2—1N5GT's i.f. amplifiers; 1H5GT det., a.v.c. and first audio; 3Q5GT and 50L6GT "Beam" power output; 35Z5GT rectifier. A matched PM speaker is employed.

HEADPHONE JACK: permits connection of headphones for "hush-up" operation; ideal for use in planes in flight.

Other features: Two built-in ANTENNAIRES eliminate need for external aerial or ground connections; terminals for external antenna also provided. Lock front case measures 11 3/4 x 11 1/4 x 7 3/8" deep. Shpg. wt. 20 lbs.

Lafayette 5 TUBE 3-IN-1 PORTABLE SUPERHET

Let this fine little receiver accompany you wherever you go. It will provide you with good quality entertainment at all times, and because of the self-contained batteries and built-in Antennaire, there are NO CONNECTIONS TO MAKE. When at home, you merely plug in the line cord (concealed in case when not in use) to any 110 volt line, A.C. or D.C.

The handsomely styled compact portable cases are available in your choice of three different color combinations. All have enclosed type fronts, and are furnished with lock and key.

LOW DRAIN TUBES used in the sensitive

superhet circuit insure long battery life. Tubes used: 1A7GT converter; 1N5GT i.f. amp.; 1H5GT det., a.v.c. and a.f. amp.; 3Q5GT "Beam" Power and 35Z5GT rectifier. The tuning range covers the standard American broadcast band from 540 to 1650 kc.

MATCHED PM SPEAKER reproduces voice and music with good fidelity. Speaker grille is fronted by a neat dull gold cloth. Batteries required are: two 4 1/2 volt "A" and two 45 volt "B". A convenient switch on the panel changes from battery to commercial electric power operation.

Other factors contributing to the excellent performance that this set provides are: powerful Automatic Volume Control to minimize fading; iron core I.F. transformers; matched Antennaire loop aerial. Size: 13 3/4" x 9" x 5 3/8" deep. Shpg. wt. 19 lbs.

A SPECIAL RECORDING MODEL IS AVAILABLE

Lafayette 8 TUBE 3 BAND AUTOMATIC PHONO-RADIO

Combining two versatile instruments in a single beautiful console cabinet, Lafayette brings you this 1941 Automatic Phono-Radio Combination at a price you would ordinarily expect to pay for the radio alone! With it, you can literally bring in a world of broadcast entertainment—or at the flip of a switch, build your own recorded programs. To convince yourself of the remarkable value this combination model represents, you need only try one in your own home for fully 30 days—at our risk!

The radio portion of the combination features:

ADJUSTABLE ANTENNA-AIR: built-in loop aerial, fully adjustable for maximum signal pick-up (knob on panel) eliminates the need for any external aerial for broadcast reception. For efficient short-wave pickup, an outside antenna is required—terminals for connecting one included on the chassis.

GETS EUROPE DIRECT: In addition to tuning the domestic broadcast band from 540 to 1680 kc (178-556 meters), two short-wave bands are included to bring you a multitude of interesting services. One range from 2.25 to 7 mc (43-133 meters) and the other from 7.5 to 24 mc (12.5 to 40 meters) cover International Short-Wave, Police, Aviation, Amateur and other signals.

PUSH-PULL OUTPUT STAGE in the superhet circuit provides volume to spare, with practically no distortion. Tube complement includes: 6SA7 converter; 6SK7 i.f. amplifier; 6SQ7 second detector, a.v.c. and first audio; 6SQ7 phase inverter; 2-6X6GT pentode output tubes in push-pull; 80 rectifier and 6US tuning indicator. Output fully 5 watts; more than will ever be required for use in any home.

12" CONCERT SPEAKER, matched to the receiver output, reproduces the entire audible range of tones with excellent fidelity. The large baffle area provided in the console contributes greatly to the superb quality of reception.

VISUAL TUNING "EYE": The 6US tube acts as an accurate VISUAL tuning indicator. You merely tune till the dark sector in the eye is narrowest, and you get optimum performance.

FULL TONE CONTROL permits compensation for acoustic differences. Bass or treble notes can be emphasized at will to suit the individual taste of the operator.

Other features include: powerful automatic volume control to minimize fading; illuminated full-vision dial; reduction drive tuning ratio of 7 to 1; inverse feedback network to eliminate distortion; rubber mounted chassis.

The automatic mixer-changer, precision built to give long, satisfactory service, plays twelve 10" or ten 12" records intermixed in any order, without attention. Thus, you can listen to fully 40 minutes of uninterrupted recorded entertainment. Features of the record player mechanism include the following:

HEAVY DUTY MOTOR of the constant speed type, operates on 110 volts 60 cycles a.c. Requires no other attention other than an occasional oiling (instructions given).

CRYSTAL PICK-UP: lightweight type, providing true fidelity tone response.

REJECT KNOB: permits instant rejection of any record at will.

GRAVITY RECORD FEED: you merely stack your 10" or 12" records on the carriers, and the unit is ready to operate. Each record is gently dropped parallel to the turntable face. There is no chipping or other damage possible with this foot-proof mechanical gravity type feed. Records are fed automatically.

The entire assembly is housed in a beautiful console cabinet constructed of selected fine Walnut veneers. Curved legs, "diamond" speaker grille lattice work and neat side pillars enhance the appearance. Overall dimensions are: 33 1/4" high, 32 1/4" wide and 16 1/4" deep. This fine console receiver goes well with practically any room of furniture.

Automatic Phono-Radio Combination
MODEL JS-128—Lafayette 8-Tube, 3-Band A.C. radio with Automatic Record Changer, as described above. Complete with all tubes and built-in adjustable "Antenna-Air". what makes a radio good?

read this answer before you buy

"Listening to the radio" is, in reality, listening to frequencies or vibrations which the ear can receive or recognize. Of course this applies to all sounds within earshot, whether they come from a radio or elsewhere. According to the frequency, or vibrations per second, we identify these sound waves as music, speech, etc., providing they are within the high and low limits of our hearing range. The chart illustrates many familiar sound waves within that range and their characteristic frequencies which permit identification.

Dozens of different makes—hundreds of varied claims—tend to confuse the average purchaser. So let's see exactly what's required in a fine radio—just what features characterize a set that can honestly be called a custom-built, high-fidelity receiver.

The simplest way to gain this knowledge is to follow a broadcast right through an excellent radio, studying all the stages along the route, discovering just why this particular set is a fine one. Then you can judge what features have contributed most and what you should look for in return for your investment.

To understand certain basic requirements we must first consider the human ear—capable of recognizing any sound wave from, roughly, 16 to 16,000 cycles. Musical tones, as transmitted by most broadcasting stations, range from approximately 40 to a maximum of 7,000 cycles. However, an ordinary radio will pick up only those sounds ranging from about 70 cycles up to 4,000.

As you can readily see on the chart even a good radio cannot bring your ear all that it is capable of hearing. A poor set cuts this range still further. The poorer the set, the less you will hear of the true tone which is being broadcast. The reason for this is that, in order to compensate for the hum caused by inadequate filters—low frequencies are cut off. Conversely, in order to overcome noises, high frequencies are cut off.

Obviously, this is the poorest sort of compromise. In a good radio, of course, it is possible to get both the low and high frequencies (you realize now why they are important) without disturbances. That is one sign of a good radio and these pages are our contribution to your better understanding of what makes a radio good.

We're ready now, to follow a broadcast through a fine radio and we've called this interesting journey "The Adventures of a Note".

A TYPICAL LAFAYETTE CHASSIS

the adventures of a note

—186,000 miles a second. Without hesitation our Note passes through the antenna into the R.F. stage (A) of our receiving set.

This mysterious symbol simply means Radio Frequency amplifier. The amplifier operates on the same frequency as the station to which you are listening. Its purpose is to intensify the station's "signal", to cut down whistles and squeals, and to reduce interference from any other station which is operating on a neighboring frequency. The amplifier, then, increases the set's sensitivity—chases out the undesirable that slipped in through the antenna with our Note. That, in substance, is the R.F. Stage, and its importance and desirability can readily be understood.

From the R.F. Stage our Note (still in the form of a radio frequency wave) travels to the Converter Tube (B). This tube is also operating on the same frequency as the incoming signal. At this point the signal combines with another signal generated by the Oscillator Tube in the set. And so our Note speeds along to the I. F. Stage (D).

This is the Intermediate Frequency Amplifier and here the signal is again amplified. However there must be no distortion. Our Note must remain recognizable and in order that this may be regulated to suit local conditions the good radio is equipped with a High Fidelity Switch or with a Tone Control (E).

The Intermediate Frequency Amplifier, operating on a fixed frequency, provides most of the amplification and selectivity of the receiver. It is important, however, that the set be "sharp" enough to reject unwanted signals without reducing the response to the higher audio frequencies. Hence, in the best radios, a High Fidelity Switch is provided so that the tuning may be made broad enough (expanded) for high fidelity reception on local stations, yet also may be made sharp enough to receive distant stations with a minimum of interference under adverse conditions.

The Tone Control, sometimes operating in conjunction with the High Fidelity Switch controls the high frequency response of the audio amplifier. This control is used to compensate for variations in room acoustics and for individual preferences in tonal balance.

Catching up again with our speeding Note, we now find the signal passing from the I. F. Stage to the Second Detector Stage (F). The 2nd Detector, or *Demodulator*, converts the radio frequency energy into electrical energy at audio frequencies. In other words our Note, having shed its travelling clothes, is gradually adapting itself to the human ear.

This circuit, too, must be free from distortion so that our Note will be recognizable. And it is here that, in a good radio, you enjoy the benefits of Automatic Volume Control (G). Regardless of whether the signal is weak or strong, it emerges from the 2nd Detector at a uniform level, thanks to Automatic Volume Control.

Our Note proceeds next to the Audio Amplifier and, because the receiver we are studying is a very good one, we encounter Push-Pull Amplification (J) wherein the power is divided between several tubes. Since our Note might arrive on any frequency, the Audio Amplifier must transmit the entire range without adding any spurious frequencies of its own, and without reducing the range of frequencies.

It must supply enough power to carry peaks of sound—the largest volume produced—without "blasting".

From here the signal goes to the Loud Speaker, where electrical energy is translated into acoustical energy, or sound. Our Note has now become fully recognizable to the ear, with all of the qualities which characterized it as it left the trumpet, or piano, a tiny fraction of a second ago. Again, the loud speaker must be able to handle the entire audible range without cutting, or unduly emphasizing, any frequencies. Moreover, it must handle this audio output, must deliver our

Note to us, without rattling.

Here the Baffle (cabinet) plays an important part. It must be large enough to reproduce low tones without undue resonance or booming. This, of course, is an acoustic job, achieved through bracing, padding, etc. Generally speaking, the larger the speaker, the better the response.

And now, long before the trumpeter has drawn his breath, long before the pianist has lifted his finger, we have followed the adventures of our Note—traced the entire route of a broadcast through a good radio. That's the best answer to your question: "What makes a radio good?" Of course it gives you a better understanding of the "mysterious" feature-claims you have seen in print. Perhaps you have noticed, in reading this, how many "musts" there are in connection with each component part. The I. F. Stage *must* amplify, but it *must* be free from distortion and high frequency discrimination. The Audio Output *must* transmit the entire range of frequencies. The 2nd Detector *must* be free from distortion, etc., etc. These are really "musts"—and they are the marks of a fine radio.

Now that you know some of the important features—check them against a LAFAYETTE. You'll find every one—and more! Because tracing our Note through a fine radio parallels tracing it through a Lafayette! Bear in mind that the radio we have just examined is not just any radio—it is a good radio! And the fact that you find all of these features in Lafayette is proof of the pudding. But aside from the features we have discussed: The R. F. Stage; the Dynamic Speaker; the extreme Sensitivity—there are other features, not so easy to see and hear, but just as important. Such features as: Automatic Bass Compensation; oversize components to insure long life; proper placement of parts on the chassis to permit adequate ventilation and minimize "stray" currents; plating of metal parts to prevent rust and corrosion, etc., etc.

All of these, plus the "musts" mentioned above, imply an outstanding personnel of radio engineers and technicians—necessitate thoroughly equipped Research and Testing Laboratories—require conscientious workmanship. And that is what Lafayette boasts.

Lafayette Custom Built Radios have earned a place in the ranks of the finest receivers made, and represent remarkable purchase values because they offer the unique combination of genuine supremacy and moderate cost.

All Lafayette receivers are fully licensed under RCA and Hazeltine patents. All are backed by a 30-day home trial guarantee.

MONEY-BACK GUARANTEE

Try any Lafayette Radio for 30 days. If, within that time, you are not completely satisfied, Lafayette invites you to return the set and receive your money back in full—less, of course, transportation charges. No questions will be asked . . . Lafayette makes you sole judge, and gives you one whole month to decide. Take advantage of this exclusive, sensational guarantee. It is further supplemented by the Radio Manufacturers Association guarantee against defect in materials and workmanship. In every way your best bet's Lafayette.

GARRARD Automatic RECORD
CHANGER—WORLD'S FINEST

Lafayette THREE-WAY COMBINATION A.M. - F.M. & AUTOMATIC PHONO

Lafayette scoops the field again with this up-to-the-minute three-way combination incorporating the modern miracle of Frequency Modulation PLUS a high fidelity standard broadcast band superheterodyne PLUS an automatic mixer-changer phonograph ALL in one exceptionally beautiful modern console. With frequency modulation stations springing up like mushrooms all over the country, all sections will soon be able to enjoy this new full-fidelity, "staticless" form of radio. Be among the first to enjoy this "radio of the future". But that is not all this superlative combination offers you. The entire broadcast band from 550 to 1600 kc (545-187.5 meters) is also covered by the Amplitude Modulation standard broadcast section of the tuner of this fine combination. This will permit you to enjoy all the national network air-shows in addition to F.M. But this exceptional Lafayette value ALSO embodies a high-quality automatic mixer-changer phonograph which will supply 40 to 50 minutes of uninterrupted reproduction of your favorite recordings. Capable of playing ten 12-inch or twelve 10-inch records, or any combination of ten 10-inch and 12-inch records, intermixed in any order with no adjustments whatever on your part. Record player has a tangent arm crystal pick-up of the latest type, for minimum record wear and maximum reproduction qualities.

CUSTOM-BUILT HIGH-FIDELITY POWER AMPLIFIER

To assure really high-fidelity reproduction Lafayette has designed a special amplifier utilizing 2-6C8Gs, 2-6L6G "beam-power" tubes and a separate 5U4G rectifier. This amplifier has an essentially flat frequency response from 30 to 15,000 cycles. To match this fine amplifier a dual speaker system incorporating one 6-inch and one 12-inch P.M. Dynamic Speaker will handle the full 20 watts undistorted power output and give you a new understanding of the realism of higher fidelity reproduction. The amplifier features separate bass and treble equalization controls which provides you with perfect acoustic control for both recordings and radio (A.M. and F.M.) Automatic bass compensation is also a built-in feature.

SPECIAL TUNING METER: a professional type tuning meter shows the signal strength directly. It operates on both A.M. and F.M. You merely tune till the pointer in the dial swings to the indicator line, and your station is brought in with maximum efficiency.

MODEL FM-13—Lafayette 14-tube Three-Way A.M.-F.M. Superheterodyne and Automatic Record Changer, as described above, complete with all tubes, in a Moderne Walnut console. Lafayette F.M. AND BROADCAST BAND TUNER

The new Lafayette Frequency Modulation and Standard Broadcast band tuner incorporated in the combination console described at right is also available separately for installation in your own cabinet, in conjunction with any fine amplifier and speaker system. This two-way tuner permits reception of Frequency Modulation from 40 to 50 megacycles and, by simply switching over, of the broadcast (amplitude modulation) band from 550 to 1600 kilocycles. Careful design and proper proportioning of the i.f. circuits insures high fidelity reception on both bands. Tubes used include: 1-6SK7 r.f. amplifier, 1-6SA7 converter, 1-6SK7 A.M. i.f. amplifier, 2-18S3 F.M. i.f. amplifiers, 1-6SJ7 FM limiter, 1-6M6 FM detector, 1-6R7 AM detector and audio amplifier and 1-80 rectifier. The assembly includes a large slide-rule tuning dial, tuning indicator, AM-FM band-switch, volume control, and tone control. High impedance output connection for feeding grid of local amplifier and 500 ohm terminals.

MODEL FM12—Lafayette Custom-Built A.M. and F.M. tuner as described above, complete with all tubes. For operation on 110 volts 60 cycles a.c. Size: 9" high, 16¾" wide, 15" deep. Code, JABOT. Shpg. wt. 37 lbs.

Lafayette 13-TUBE 4-BAND AC-DC PHONO-RADIO

This superlative Phono-Radio Combination represents the cumulative engineering and merchandising experience of Lafayette's 20 years of pioneering in the radio industry. All that is desirable in a fine radio and a fine phonograph is incorporated in this Lafayette model. Equipped with the world-famed Garrard record changer, operating on either AC or DC, you can enjoy the finest reproduction on both recordings or radio. Give yourself ample opportunity to try this superb combination in your own home. Our generous 30-day home trial plan will enable you to check these features:

13-TUBE AC-DC SUPERHET: This ultra-modern receiver covers the standard broadcast band on 540-1640 kc (556-183 meters); coverage of international short-wave, police, amateur and aviation signals on 2.35-7.6 mc (127-39.4 meters) and 7.3-22 mc (41-13.6 meters); and coverage of the long-wave band from 142-370 kc (815-2113 meters).

R.F. STAGE ON ALL BANDS provides extra sensitivity for all stations. This custom-built feature assures you of world-wide reception.

12-INCH ELECTRO-DYNAMIC SPEAKER easily handles the full output without distortion.

TWO-POSITION SELECTIVITY SWITCH in expanded position permits reception to 6500 cycles. In contracted position it greatly increases selectivity for tuning on all bands.

MAGIC ANTENN-AIRE, Lafayette's exclusive built-in loop for noise-free reception on broadcast band. Terminals are provided for best reception on all other bands.

MULTI-PURPOSE TUBES include: 6SK7 i.f. amp.; 6SA7 converter; 6J5 oscillator; 6SK7 i.f. amp.; 6SQ7 det., AVC and 1st a.f.; 6J5 inverter; 4-25L6 p.p. parallel beam-power output; 6U5 tuning "eye"; 2-25Z6 rectifiers and an 149DJ ballast tube. Ample reserve power is afforded.

TUNING "EYE" INDICATOR for precise tuning on all bands.

BAND ILLUMINATED DIAL Multi-colored dial with clever band-lighting shows range in use.

IRON CORE I.F. TRANSFORMERS provide valuable high "Q" ratio on all reception.

VARIABLE TONE CONTROL, continuous, to suit individual tastes on radio and phono.

PHONO-RADIO TELEVISION SOUND switch on front panel, coupled with volume control.

GARRARD RC-11 AUTOMATIC RECORD CHANGER permits playing of eight 10" or eight 12" records automatically. It features:

TANGENT ARM CRYSTAL PICK-UP for optimum reproduction, maximum record life.

AUTOMATIC REJECTION KNOB.

THOSE WHO APPRECIATE

Lafayette ELEVEN TUBE CONSOLE

Smooth flowing lines, graceful proportions, carefully matched grain and a deep lustrous finish make these new Lafayette 11-tube 5-band models the most beautiful radios we have ever seen. Both the straight console pictured above and the versatile automatic combination shown on the next page are radios that will add prestige to the appearance of any room. From the moment you see them you sense instinctively their fine quality.

When you turn them "on" you realize immediately that this quality is not just "skin deep". Inside of these handsome cabinets is the new Lafayette 11-tube 5-band Superheterodyne Chassis that brings you a new conception of how fine modern radio reception can be. Clarity of reproduction that enables you to hear every syllable, every note, just as clearly as though the artists were right there in the room with you. Sensitivity that enables you to easily receive stations you never even knew existed before. Selectivity that literally pulls the stations apart and picks out just the one station you want to hear. You soon realize that here at last is a radio that is different—different because it is better. You are sure that a great deal of time and effort was spent in designing it—and even more in building it. And you will be right—because Lafayette engineers did take infinite pains to give you a radio that is outstanding in both performance and appearance in this new 11-tube 5-band Lafayette.

MODEL FE-149—In Console Cabinet with Acoustic Chamber. The Lafayette 11-tube 5-band Superheterodyne in a handsome console cabinet standing 35 1/4" high, 33" wide and 15" deep. Fashioned of beautifully grained walnut veneers and hand polished to a deep lustrous finish. An attractive piece of furniture that will blend gracefully with the finest furnishings yet form a center of interest, if you wish, for any room. Comes complete with built-in Magic "Antenn-Aire" aerial and a set of matched tubes. For operation on 110-120 volts 50/60 cycles a.c. Shpg. wt. 85 lbs. Code **HAMAN**.

TRUE FIDELITY TURN TO *Lafayette*

5 BAND AC SUPERHET AND AUTOMATIC PHONO COMBINATION

Many technical refinements are incorporated in this new Lafayette 11-tube Superheterodyne. **BAND SPREAD TUNING** for the short wave stations greatly simplifies the tuning in of foreign stations direct. Each one of the four short wave bands has been given a scale of its own on the dial and spread to cover almost the complete length of the scale!

No more crowding of one station practically on top of the other—no more "hair-trigger" tuning—now tuning short wave stations becomes just as simple as tuning regular broadcast stations! The ranges are as follows: 49M Band—5.9 to 6.1 mc.; 31M Band—9.1 to 10mc.; 25M Band—14.9 to 15.4mc.; and 19M Band—14.9 to 15.4mc. The fifth band is the regular broadcast band—540 to 1600kc.

SEPARATE BASS AND TREBLE CONTROLS permit individual emphasis or diminution. A separate push-button for each has Low—Medium and High positions. You can thus obtain a far greater control over tonal response than is possible with the usual single-knob type of control. It provides full tone compensation.

A LARGE 12" CONCERT DYNAMIC SPEAKER is further assurance of the finest possible tone reproduction on both radio and phono.

RF AMPLIFIER ON ALL BANDS guarantees maximum sensitivity and selectivity. The complete lineup: 6SK7 r.f. amp.; 6SA7 converter; 2-6SK7 i.f. amplifiers; 6SQ7 2nd det.; a.v.c.; 1st audio; 6SQ7 tone control amp.; 6J5GT inverter; 2-6V6GT p.p. power amplifiers; 6U5 tuning eye; 5Y3G rectifier. **Rated sensitivity—3 microvolts average at 1/2 watt. Power output 10 watts undistorted.**

PUSH BUTTON CONTROL for 5 pre-selected stations in addition to the bass control button, the treble control button and the phono-radio button. The station buttons are of a new clutch-type. Even a child can set them for any desired station—just pull out the button—tune by dial to the desired station—push back the button—and it's set!

BETTER-SIGHT SLIDE RULE DIAL in keeping with today's demand for relief from eye-strain Lafayette has developed a new dial that is easier to see. Large legible figures, wide-spread short wave band scales, indirect illumination on dial and buttons.

THE MAGIC "ANTENN-AIRE" permits reception of local stations without an external aerial. A short wave antenna may be attached for reception of short wave and distant stations.

Combination Models: two phono-radio models are available, the Standard and the Garrard DeLuxe. Both of these employ the specially designed audio system of the receiver and the matched 12" Concert Dynamic Speaker.

The Standard **MODEL FE-146** incorporates a fully automatic mixer-changer that will play 12-10" or 10-12" records intermixed, in any order, regardless of how they are stacked. A convenient reject lever permits you to reject any record if you should change your mind. The crystal pickup assures excellent fidelity, fine tone quality and long record life.

The Garrard DeLuxe **MODEL FE-153** incorporates the new Garrard Model RC-30 Mixer-Changer with the new maximum-fidelity crystal pickup and permanent sapphire needle. This new improved changer will play eight 10" or 12" (all of the same size or inter-mixed) records in sequence automatically. The new maximum-fidelity crystal pickup provides the highest fidelity possible due to a new crystal element, exceptionally low needle pressure (only 1-ounce) and a permanently installed sapphire needle which does not require replacement! The low needle pressure almost eliminates record wear.

MODEL FE-146—Automatic Combination (illustrated above). This splendid cabinet houses both the Lafayette 11-tube 5-band Superhet and the Standard automatic mixer-changer that plays 12-10" or 10-12" records automatically. Hi-Fidelity crystal pickup. Overall cabinet dimensions 33 1/2" high, 16" deep and 34 1/2" wide. For 110-120 V. 60 cycles a.c. operation. Complete with tubes. Shpg. wt. 135 lbs.

Period Model Lafayette 11-TUBE COMBINATION

All the gracious charm of life in the eighteenth century is brought to mind when you see this new Lafayette Period Combination. The lilting strains of the Minuet, the powdered wigs, the gracious courtesies of ladies and gentlemen accustomed to a cultured, charming way of living. Unhurried, painstaking craftsmen fashioning things of beauty out of stone and wood. A little cabinetmaker in his shop putting pencil to paper to design furniture that will live after him and make his name revered forever as the master of them all. Thomas Chippendale, undoubtedly the master of all cabinetmakers, was an artist as well. An artist who knew how to put the charm of the eighteenth century into fine furniture.

Today Lafayette craftsmen have taken one of his finest examples of furniture design and reproduced it faithfully line for line. The rich, warm grain of mahogany carefully matched to produce an attractive natural design for the doors. Specially selected straight grained panels for the sides and top. Then hours of varnishing and rubbing and varnishing and rubbing, layer upon layer, until finally a deep lustrous finish brings out all the beauty of this fine hardwood. Consoles like this are not made in a hurry—it takes time and a great deal of skill.

It is only a console of this quality, however, that is worthy of so fine a phono-radio combination as this new Lafayette 11-tube 5-band Superheterodyne with Automatic Mixer-Changer. You must hear as well as see this marvelous Combination to fully appreciate the tremendous improvements that engineers have made in modern radio reception. And you'll be thrilled by the equally great improvements made in the reproduction of fine recordings.

For a complete technical description of the Lafayette 11-tube 5-band Superheterodyne please refer to page 25. Note particularly the band-spread tuning on the short wave bands. A separate scale for each of these bands is provided on the dial—no more crowding of stations on top of one another—no more "hair-trigger" tuning—now you can tune in short wave stations as easily as the regular broadcast stations. Also note the individual bass and treble response controls, the E-Z set push-buttons, the better-sight dial, the tuned r.f. stage on all bands, etc.

Two models of Mixer-Changers are available in the Lafayette Period Model Combination. The Standard model will play twelve 10" or ten 12" records all of which can be of the same size or intermixed. A Hi-Fidelity Crystal Pickup provides outstandingly fine tone quality and because of its light weight record wear is reduced to a minimum. Gravity feed mechanism prevents chipping of records or other damage.

The DeLuxe Mixer-Changer is Garrard's new Model RC-30 incorporating their new Maximum-Fidelity Crystal Pickup. This marvelous new pickup has a built-in permanent sapphire needle that does not have to be changed. It is so light in weight that it infinitely prolongs the life of your records. And for quality of reproduction it cannot be excelled. You will be delightfully surprised when you hear how much better your favorite recordings sound when you play them on the DeLuxe 11-tube Lafayette Combination. You can load eight 10" or 12" records (all the same size or mixed together if you wish) onto the changer at a time and settle back for as long as 40 minutes of uninterrupted entertainment—record reproduction at its very best. Precision-built GARRARD automatic record changers are recognized as being the finest in the world.

Note the large compartment for storing record albums (albums not included), the doors that swing completely out of the way and the divided top that enables you to get at radio or changer individually.

MODEL FE-147—Lafayette 11-tube 5-band Combination with Standard Mixer-Changer in mahogany Period Console. 35 $\frac{1}{4}$ " wide, 35" high, 17 $\frac{1}{2}$ " deep. Plays twelve 10" or ten 12" records all same size or mixed. For 110-125 V. 60 cycles a.c. Shpg. wt. 158 lbs. Code, HALLO.

TRUE HIGH FIDELITY TO EXQUISITE CABINETRY

WITH PRECISION BUILT
Automatic RECORD CHANGER

moderne model *Lafayette* 11-Tube CUSTOM-BUILT COMBINATION

Our present century has often been called the Century of Speed and the Century of Progress. This progressive state of mind is reflected in everything we do. We travel faster and farther. We telephone instead of write. We let machinery do our monotonous tasks for us. All this has naturally also affected the furniture with which we live. Our impatience with non-essentials has eliminated the "ginger bread" and given it its clean-cut flat planes. Good proportions and fine texture have taken the place of applied decoration. Simplicity has come to the forefront.

If you like modern furniture—good modern furniture—then you'll like this new Lafayette Model. The attractive natural grain of fine hardwood gives it a textured appearance yet when we run on inquisitive hand over its surface we find it polished as smooth as glass. Its carefully fitted divided top appears to be permanently fastened down but at the touch of a finger it raises to reveal both the radio control panel and the mixer-changer. Only the handles betray the presence of the carefully inset doors, at the front of the cabinet, which opens to reveal the fabric covered speaker baffle. Fine workmanship and fine materials have been happily combined to produce an outstandingly beautiful custom-built cabinet. You'll take pride in its ownership.

Modern too is the new Lafayette 11-tube 5-band Superheterodyne which is the heart of this beautiful combination. Here again impatience with non-essentials has resulted in a tremendous improvement. On the short wave bands all code, beacon and uninteresting transmissions have been eliminated and each of the important short wave bands given a scale of its own on the dial. Thus each short wave band is s-p-r-e-a-d over a complete scale.

This effectively overcomes the usual crowding of stations and the "hair-trigger" tuning experienced on most short wave receivers. It now becomes as easy to tune in a short wave station as a regular domestic broadcast station. Foreign reception direct becomes a simpler matter than ever before. For a complete description of this marvelous new Lafayette Superheterodyne please refer to page 24.

The mixer-changer is also a product of our modern way of life. This ingenious mechanism eliminates the need for your getting up out of your comfortable chair after each record is played. The Standard model can be loaded with up to twelve 10" or ten 12" records (all the same size or intermixed) at one time so that you can settle back in your chair for up to 50 minutes of entertainment without going near the Combination. The DeLuxe changer can be loaded with up to eight records of either size (or both intermixed) and in addition incorporates a new permanent sapphire needle which eliminates needle changing entirely! The Standard model incorporates a Hi-Fidelity Crystal Pickup—the DeLuxe Model the new Maximum-Fidelity Crystal Pickup which has the lightest needle pressure of any mixer-changer pickup yet used and which infinitely prolongs the life of your records.

In reproduction particularly you will find evidence of modern progress. The tone quality of both radio and phono is the finest. Fully controllable by means of separate treble and bass compensators instead of the usual single-knob tone control, almost any desired response can be obtained from a true-fidelity response to over-accentuated bass or treble or both. No matter what type of response you like you can get it with this new Lafayette.

Lafayette 11-Tube Period Hi-Boy AUTOMATIC COMBINATION

A little cottage by the side of the road and a modern apartment usually have one thing in common—small rooms. You who live in such cozy little homes will appreciate more than anyone else this new Lafayette Period Hi-Boy Combination. It is an authentic reproduction of a classic Period design in every detail. With its beautifully grained crutch mahogany panelled doors and its hand-rubbed lustrous finish it is a phono-radio combination you can be proud of. In performance it leaves nothing to be desired. Both radio and record reproduction are outstandingly fine. Yet all this is contained in a handsome compact cabinet measuring only 25" wide, 35 3/4" high and 18 1/2" deep. A cabinet so compact that it will fit practically anywhere yet so beautiful that it commands instant admiration.

The heart of this Phono-Radio Combination is the famous Lafayette 11-tube 5-band Superheterodyne which is fully described on page 24. When reading about this marvelous receiver note particularly the sensational new band-spread feature. This feature, which has proven so valuable in communication receivers, has now been incorporated in a home-type radio. No more crowding of short wave stations one on top of the other, no more "hair trigger" tuning. Each one of the four bands now has a scale of its own as long as the regular broadcast band scale. Also note the individual bass and treble controls that enable you to accentuate or diminish either response at will. These are effective on both radio and record reproduction. Then there are the E-Z set push-buttons that even a child can set and the "better-sight" dial, etc. All in all a radio that is different because it is better—for better than any you have ever heard before.

The Standard Mixer-Changer which will play twelve 10" or ten 12" records (mixed if you wish) at one loading enables you to settle back in your chair for as long as 50 minutes of the grandest record reproduction you have ever heard.

MODEL FE-151—Lafayette 11-tube 5-band Period Hi-Boy Automatic Combination. Superheterodyne Radio, Standard Mixer-Changer. Mahogany cabinet 25" x 18 1/2" x 35 3/4" high. Lafayette 11-Tube Moderne Hi-Boy AUTOMATIC COMBINATION

Those who appreciate good modern furniture will instantly fall in love with this new Lafayette Moderne Hi-Boy. Here is cabinet artistry at its best. Clean-cut lines, the grain of fine hardwoods and a lustrous hand-rubbed finish make this a true gem of the cabinet makers art. Custom-built it is available in both walnut and bleached mahogany finishes. Despite the fact that it houses the big powerful 11-tube 5-band Lafayette Superheterodyne and the Standard Mixer-Changer it is unusually compact measuring only 36 3/4" high, 23 3/4" wide and 16" deep. An ideal size for the small apartment and cottage.

In tone, selectivity and sensitivity it is truly amazing. The heart of this model is the Lafayette 11-tube 5-band Superheterodyne which is fully described on page 24. This marvelous receiver is the culmination of 20 years of experience in building fine radios. It incorporates such sensationally new features as short wave band s-p-r-e-a-d-i-n-g, individual bass and treble response controls, E-Z set push-buttons, "better-sight" dial and many more. The short wave band s-p-r-e-a-d-i-n-g which was originally developed for communication receivers provides a separate scale for each of the four short wave bands and greatly simplifies tuning in of foreign stations. No more crowding of stations on top of one another—plenty of room between stations in comparison with present day radios. Push-buttons that are so easy to set a child can do it. And the individual bass and treble response controls permit you to have far greater control over tone than ever before. No single-knob control can even begin to compare.

The fine audio system together with the large 12" concert dynamic speaker and the crystal pickup on the Mixer-Changer provides a fidelity of record reproduction never approached before in sets at anywhere near the price of this one. In addition the unusually light weight of this pickup results in very little needle pressure and infinitely long record life. The changer can be loaded with twelve 10" or ten 12" records at a time. The records can be all of the same size or the sizes can be mixed together as desired. Up to 50 minutes of the most wonderful record reproduction you have ever heard at a single loading. A built-in reject lever permits you to reject any record if you should change your mind after loading the machine.

MODEL FE-152—Moderne Hi-Boy Console with tubes and Standard Mixer-Changer. Dimensions 23 3/4" x 16" x 36 3/4" high. Walnut finish. Shpg. wt. 149 lbs. For 110 V. 60 cycles a.c. Code HARRY.

Lafayette 15 TUBE

A NEW BREADTH OF TONAL *Beauty*

This frequency chart presents, graphically, what you hear when you listen to speakers, singers, instrumentalists and full orchestras in person AND through the Lafayette Overture on both radio and high-fidelity recordings. All the higher frequencies which provide the effect of realism are heard, all the rich basses lend true musical balance.

TOUCH a switch . . . the portals of a new world of tonal beauty open! The enchantment of immortal music fills your soul; you thrill to a new adventure in musical reproduction . . . through the Lafayette Overture! This incredibly magnificent musical instrument has won wide acclaim as the master-work of higher fidelity reproducers. Eminent musicians and engineers who have heard the Lafayette Overture have been unanimous in their overwhelming praise of its exceptional ability to re-create ALL the music, all the artistry broadcast from modern high-fidelity stations, or captured in today's superfine recordings.

The Lafayette Overture has been designed, engineered and constructed to delight the most discriminating eye and ear. It is destined to become the standard by which all other fine custom-built radio-phonograph combinations will be judged for years to come. The purity of tone, the full-bodied volume and the almost unbelievable degree of musical nuance or shading provided by this fine combination really must be heard to be appreciated.

The new Garrard Mixer-Changer used in these combinations plays eight 10" and 12" records in any assortment. The automatic mechanism requires no setting of any kind. Simply place the stack of records on the spindle and sit back and luxuriate in music perfectly reproduced. This new RC-30 Garrard features a permanent sapphire needle and a new low-pressure tangent tone arm with only one ounce needle pressure for better reproduction, increased record life.

To harmonize properly with the home beautiful two exceptionally handsome cabinet models house the Lafayette Overture. The modern cabinet (illustrated above) is available in a warm walnut finish or the ultra-modern wheat finish. The luxurious period cabinet (illustrated on next page) is supplied in a rich grained mahogany. Master craftsmanship is apparent in every line; built to last a life-time.

These handsome modern cabinets represent the "peak" of the cabinet-makers art. Constructed of the finest available seasoned woods. The specially designed acoustic speaker chamber, built to match the speaker system, is treated with calotex to eliminate any trace of cabinet resonance. The small (tweeter) speaker is mounted in its own baffle with sound directed upward from the cabinet to enhance brilliant high tones. The cabinet lid has a cleverly designed pneumatic support which holds the lid firmly in any desired position, yet permits easy movement. Available with Walnut or Wheat finish.

Lafayette Overture, higher fidelity radio-phonograph combination with Garrard RC-30 Automatic Mixer-Changer with permanent sapphire needle and low-pressure tone arm. Complete with all tubes. Size: 34" high, 39" wide, 19" deep. Shpg. wt. 220 lbs. LIST PRICE \$400.00.

A REVELATION IN SUPREMELY BEAUTIFUL MUSICAL REPRODUCTION IN FULLY AUTOMATIC RADIO-PHONOGRAPHS COMBINATIONS

HIGHER FIDELITY

High fidelity, an advertising word of dubious meaning to most radio manufacturers, is a high ideal with Lafayette. Impossible to achieve with production-line methods, Lafayette's higher fidelity radio-phonograph combinations are all custom-built, checked and rechecked in our laboratory so that their performance is never less than perfect when it reaches the music loving public to whom we cater. Every unit, every component is matched so that the whole is the sum of many perfectly complementary parts. Nothing but the finest in materials, design, engineering and craftsmanship is tolerated.

"OVERTURE"

HIGH FIDELITY RADIO TUNER

The product of radio's outstanding engineering genius this 7-tube Superheterodyne Tuner used in the Lafayette Overture reproduces the entire audio range of modern high-fidelity broadcast stations. Outstanding features:

VARIABLE I.F. EXPANSION utilizing two i.f. stages with 3-position switch for 1) Full expansion for high fidelity stations; 2) Semi-expansion for average stations; 3) Needle sharp selectivity for distance reception through local interference.

10 KILOCYCLE FILTER, low-pass cutoff for reception with good fidelity under the most severe conditions of inter-station interference. A switch is provided to cut out this filter when not needed.

FLAT FREQUENCY RESPONSE. The tuner output is FLAT within ± 3 db from 20 to 10,000 cycles per second.

SEPARATE BASS AND TREBLE EQUALIZATION. Two separate controls provide any degree of bass and treble desired without in any way removing one or the other.

IRON CORE ANTENNA COIL for extremely high "Q".

OVERSIZE COMPONENTS provide a high factor of safety and performance.

COMPLETE BROADCAST BAND COVERAGE from 540 to 1720 kilocycles (556 to 174.5 meters) covering all domestic broadcast and high-fidelity stations in U.S. and Canada.

INDICATOR DIAL LIGHTS in exclusive dial design indicate degree of variable expansion.

NINE MULTI-PURPOSE TUBES used include: 1-6SK7 r.f. amplifier; 1-6SA7 converter; 2-6SK7 i.f. amplifiers; 1-6SQ7 detector, A.V.C. 1-6U5 tuning eye; 1-6U5 and 1-6C8G audio network amplifiers; 1-6X5GT rect.

AUDIO AMPLIFIER SECTION

Designed specifically to reproduce with utmost fidelity the full frequency range of the superlative tuner above, as well as the output of the Garrard Automatic Record Changer, this ultra-high quality audio amplifier matches in every way the superior performance of both units.

20 WATTS UNDISTORTED OUTPUT on both radio and phonograph; 26 watts peak.

INVERSE FEEDBACK from voice coil to the voltage amplifier, thus damping cone transients and assuring true high fidelity output.

PUSH-PULL BEAM POWER OUTPUT using a pair of 6L6 power amplifier tubes. Other tubes include 1-6J5 1st voltage amp.; 1-6J5 2nd volt. amp.; 1-6J5 phase inverter; 1-5U4G rect.

SEPARATE POWER SUPPLY, as in the tuner to eliminate any possibility of interaction and makes for stable performance.

OVERSIZE COMPONENTS for extra heavy duty are used throughout.

DUAL SPEAKER SYSTEM

To handle the wide frequency response of both radio and phonograph input a special high fidelity dual-speaker system perfectly matched as to frequency range and power handling ability has been devised. The frequency range of the audio amplifier and speaker system is essentially flat to 14,000 cycles which exceeds the limits of present day radio and recording studios. With the popularization of Frequency Modulation this audio amplifier and speaker system will form an ideal unit for use with an F.M. tuner (input terminals provided). Both speakers used are P.M. dynamics, one 12-inch diameter the other, 6-inch especially designed to complement each other.

Naturally with a tuner, amplifier and speaker system of such high caliber only the finest in Automatic Record Changers should be used. That is why the new Garrard, the world's finest precision changers, have been chosen for use in the Lafayette Overture.

PORTABLE RECORD CHANGERS

DeLuxe Mixer-Changer

- Built-In Power Amplifier
- Built-In "Mystery" Oscillator

Here's a highly efficient, amazingly versatile outfit—and at a real low price! It incorporates an automatic mixer changer, power amplifier, "mystery" oscillator and a loud speaker. You can use it as a standard record player through the built-in speaker or, at the flip of a switch, turn on the "mystery" oscillator and play records through any nearby radio without making ANY connections. The mixer changer plays twelve 10" or ten 12" records intermixed, in any order without interruption; records can be played manually if desired. An offset head crystal pick-up provides fine tone quality. The power amplifier employs two high gain multi-function tubes; output feeds into a matched 6" PM speaker. Volume control and switch and full TONE CONTROL on panel. "Mystery" switch changes from amplifier to "Mystery" oscillator. In beautiful walnut finished case 18 1/2 x 15 3/4 x 10 7/8". For 110 volts, 60 cycles a.c. only. Shpg. wt. 40 lbs.

K22373—YOUR COST, With Tubes..... \$34.95

Like above, but less amplifier, oscillator and speaker. Automatic changer (does not play mixed records) plays ten 12" or twelve 10" records. Walnut case 16 1/2 x 15 1/2 x 8 1/2". Shpg. wt. 24 lbs.

Modernizes most battery sets. Porta-Power units available for sets using from 4 to 8 tubes. All operate from 110 volt, 50/60 cycles a.c. lines. Contain no liquids and can be used in any position. As easy to install as batteries. Costs less than 5c per 100 hours of use for current. Universal sockets for all types of battery plugs. With cabinet mounting brackets.

Model U—Illustrated above. Fits right in battery compartment of most 4-5 tube Battery Portable sets. Supplies 1.5 volts at 200 ma., and 90 volts at 13 ma. Has switch in line cord. Size: 2x3½x6". For 4 to 6 tube sets. Shpg. wt. 4 lbs. \$4.41
K15705—Your Cost.

Model G—For larger sets using from 5 to 6 tubes. Supplies 1.55 volts at 300 ma. and 90 volts at 13 ma. Size: 3½x6½x4½" high. Shpg. wt. 5 lbs. With tube. \$5.58
K15706—Your Cost.

Model L—Supplies "A", "B" and "C" power for sets using up to 8 tubes. Delivers 2 volts at 750 mls.; "B" supplies 67½, 90, 112.5, 135 volts; "C" voltages from 1 v. to 22½ v. Size: 6¼x4x5¼". Wt. 6 lbs. \$5.85
K15707—Your Cost.

Model P—"Twin Powered" for 6-volt battery radios. Will convert any 6-volt battery radio to 105-125 volts, 50/60 cycles a.c. Output 6 v. at 3 amp. Size: 3½x6½x5½". Screw terminals. Shpg. wt. 10 lbs. \$8.20

BURGESS

RECOGNIZED BY THEIR STRIPES - REMEMBERED BY THEIR SERVICE

Burgess batteries have been used for many years by leading laboratories, governmental departments, commercial organizations and others demanding tops in quality. All cells are made of the best material obtainable. Each cell has a seamless drawn zinc can of 99.9% pure zinc which resists perforation. Cells are separated by moisture-resistant egg-crate partitions and a wrapping of paraffined paper. Individual cells are totally covered with pitch to seal each cell and to bind them together into a rugged unit.

Chromic preservative, a Burgess discovery, is included in each cell. Like oil on bright metal, it preserves the zinc surface and retards corrosion when not in use. Yet this protective film is so thin that it does not retard the chemical actions producing electrical current. Each cell undergoes an "ageing" period so that substandard ones can be spotted and discarded. To insure uniformity only high quality cells pass acceptance tests. These features plus rigid laboratory control make Burgess batteries the accepted standard.

DELUXE FLUORESCENT KITCHEN FIXTURE

- No wiring necessary
- Install in a Few Minutes

Now you can have the highly efficient fluorescent lighting in your kitchen, where it will add to the cheeriness and efficiency. And, best of all, you can hang it up yourself in a few minutes. The fixture fits any standard 4" or 6" holder. You merely remove the old globe, take out the bulb and replace with the Fluorescent fixture (see illustrations). Two 24" tubes are used; they consume only 20-watts each, yet provide more even and less eye-tiring bright light than two 50-watt incandescent bulbs. The light furnished is cool, and of high intensity.

- Consumes only 40-watts
- Provides Glareless Light

Fixtures are equipped with the latest type Underwriters Approved, starters and ballasts. Complete with fittings for 4" and 6" holders and attachment cord and plug. Operates on 110-120 volts 60 cycles a.c. only. Metal parts heavily chrome plated. Shpg. wt. 11 lbs.

G.T.C. Ballasts for Fluorescent Fixtures

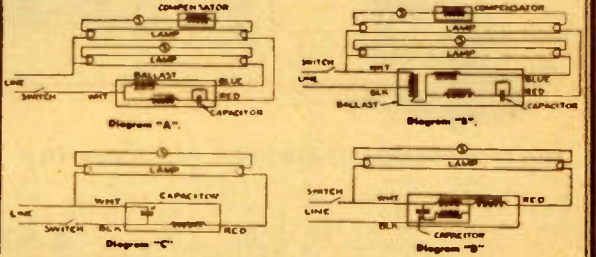

Build your own fixtures with these highly efficient units or use them for replacement purposes. All are for 105-125 V. 60 cycle operation. Absolutely noise-less. Built for continuous "trouble-free" service. Compensators listed below are only used with two-lamp ballasts for quick lighting of the second tube.

Not required for single units or where compensator is built into ballast. Many utility companies require the use of high power-factor units exclusively. "S" in diagrams refers to Starters.

NEON GLOW LAMPS

Used extensively in test instruments. On d.c. only one electrode glows (the negative). All operate on 105-125 volts a.c. or d.c. except the 1/2 watt types which operate on a.c. only (this voltage is the minimum striking voltage). Minimum operating volts (approx.): on a.c.—60 volts; on d.c.—100 volts.

Check the Facts

but don't stop at facts. You must be sure that all this talk about experience and research adds up to top performance, real service, best value, while on the job for you. So ask Lafayette owners. You'll know what you're buying then. And we know, when you've finished checking, you'll choose Lafayette because . . .

The Facts are Here

Lafayette is a pioneer in Public Address Equipment. Today's handsomely streamlined Lafayette line and today's astoundingly low Lafayette prices reflect the engineering experience, the pioneering achievements and steady business progress of more than twenty years. Applying this valuable knowledge in our own modern test laboratories, Lafayette Sound Specialists and Research Engineers have collaborated in perfecting sound equipment for 1941's Public Address market that offers more of everything. You get more watts-per-dollar when you specify Lafayette P.A. . . . more power than you're ever likely to need, for Lafay-

Lafayette insists on satisfied customers. So be a "tough" customer in choosing your sound equipment.

ette believes in designing units capable of plus-service . . . greater performance than the specified job calls for. You get finer tone when you install a Lafayette Sound System—amazing clarity of reproduction both indoors and out because Lafayette believes that amplitude without clearness—volume without fidelity—is worthless. When you choose Lafayette, moreover, you get styling and engineering so advanced that the Lafayette P.A. you buy today will still be a standout five years from now!

Praise for Lafayette

Yes, praise for Lafayette P. A. pours in from users in every walk of life. Churchmen and school superintendents express gratitude for Lafayette's realism, its tone perfection . . . businessmen tell of Lafayette's phenomenal earning power and continuing first-rate performance. Factory managers appreciate Lafayette's precision construction and bedrock low costs. Every P. A. market has its substantial quota of Lafayette enthusiasts.

ORDERING P. A.

by mail

It's *simple* to order sound equipment by mail. Ninety-nine times out of a hundred, you need only check your particular requirements against the uses given for the amplifiers and systems on the following pages.

Amplifiers and systems are rated according to their true wattage. Increases in wattage merely indicate a proportionate increase in the area which may be covered. Consideration should be given to the existing noises which must be overcome, the sound absorption of floor and wall covering, and whether the installation is intended for indoor or outdoor use. So, you see, technical knowledge is not essential in determining which amplifier or system is best suited to your purpose.

Lafayette offers in these pages a sound amplifier and corresponding system for every conceivable indoor, outdoor, portable and mobile use. No more complete P. A. line has ever been assembled under one name. Whether you require a low-power unit to cover a tiny area, or a stadium-size installation, Lafayette has the System you want—at typical Lafayette low cost. Speakers of corresponding top-quality have been selected for use with amplifiers in all the basic systems listed. Wall-type baffles, dome baffles, trumpets, etc., for every sort of installation and use are also shown. Usually the basic systems will fill your P. A. needs for they have been selected as a result of the experience of thousands of P. A. users in hundreds of different applications.

Vitaly important in any public address system is the microphone. Lafayette offers you the finest type microphone available. In practically all the Sound Systems listed, you have a wide choice of microphone styles, any one of which is a guarantee of excellent sound quality. Complete descriptions of these superb instruments will be found on pages 85, 86, 87 and 88.

If you still hesitate to order because you are completely unfamiliar with public address equipment, or if you have a particular problem in sound installation which requires technical assistance, Lafayette Sound Consulting Engineers will gladly give your needs their interested attention. A special form has been prepared to assist you in outlining your problem and assure your receiving the utmost assistance promptly.

STATION WITH TUBES**

STANDARD MODEL—Operates Up To 12 Stations
Modern Compact Design—Any Remote Station Can Call Master Station—Remotes Can Have Complete Privacy or Turn Complete Control Over to Master Station—Master Selects Any Remote Station—Sound Emits From Both Sides of Cabinet.

Lafayette offers this new, distinctive Inter-Communicating system with many new innovations

at a typical unbeatable Lafayette low price. Featuring a Master Station with complete selective control over TWELVE Remote Stations at all times, it provides the most efficient and speedy method of holding direct two-way communication between two persons or two departments. Operates equally well on 110 volts a.c. or d.c. and can be installed by anyone regardless of mechanical or electrical aptitude. Requires simple connection of cables and plugging into nearest line supply to prepare for operation.

Ample Power For Distant Pick-Up

The Master Station incorporates a modern high-gain amplifier utilizing the latest, multi-purpose tubes, 1-70L7GT "beam-power" tube and rectifier and 1-12SC7 insuring ample power and voltage gain. Absolutely hum-free. Master Station has a station selector switch to connect the Master to any desired remote station. Master Station also has the usual "push-to-talk" switch and volume control. Remote stations have only one simple three-way switch. In one position the remote can receive calls and answer the master station. In second (or normal) position,

remote can receive calls from master but neither master nor other remotes can listen-in. In third position, remote can call or answer master station. Sound emanates from both back and front of each unit. Will pick up voice from any reasonable distance permitting great flexibility of operation.

Modern Walnut Cabinets—Easy to Install

Design of both master and remote stations identical (except for extra controls on master). All stations have similar appearance back and front with no unsightly wire connections visible. Cable connects underneath each unit, ample space being provided through the use of rubber bumpers.

"STREAMLINED MULTIPLE MASTER" 1940 MODEL
Push-Button Selection of Any Number of Stations—May be Grouped in Any Desired Arrangement—Up to 7 Stations—Three Private Conversations at One Time—No Junction Boxes Required—Cable Connects from Station to Station.

Lafayette's new streamlined version of their famous "Multiple-Master" inter-communicating system for efficient multiple communication. Affords all the circuit privacy of the regular telephone, yet provides loud speaker volume of conversation. New handy selector system for each unit has six push buttons on the front panel which instantly select any one of the other stations on the system.

Complete Privacy Afforded

Three completely private conversations may be held simultaneously over a network of six or seven stations, without the slightest interference whatever. Each station has three operating controls, plainly marked. These are: "on-off" switch (station may be called whether called station is on or off); volume control and "push-to-talk" switch. Installation is exceedingly simple; the requisite cable is connected to the terminal block conveniently located on back of each station. Each unit is plugged into a convenient 110 volt outlet, D.C. or A.C. (60 cycles). Installation requires no junction boxes of any kind, each unit being connected directly to the next with the entire system in series. Connecting cable contains the proper number of color-coded wires which makes installation an extremely simple matter. Full instructions for complete wiring and operating procedure accompany each unit.

Each Multiple Master station contains its own amplifier utilizing 1-12SC7, 1-70L7GT "beam-power" output tube and rectifier. A high grade PM dynamic reproducer provides excellent quality of tone, best suited for reproduction of voice frequencies. Each conversation can never be overheard by any other station assuring utmost privacy. Stations are housed in dignified plastic cases, two-toned in Ivory and Ebony. Size: 8 $\frac{1}{2}$ " x 6 $\frac{1}{2}$ " x 5 $\frac{1}{2}$ ".

- » Operates Efficiently with Either 16 MM or 35 MM Sound Film
- » Case Houses Two High Quality 10-Inch PM Reproducers

Lafayette offers this extremely compact 20 to 30 watt Portable Sound-on-Film System with every desirable modern feature. Amplifier in its "Unitized" cabinet fits snugly into the handsome Spanish Grey leatherette carrying case, easily removable when the system is in use. Carrying case houses two 10-inch high quality P.M. speakers, 50 ft. of rubber covered speaker cable and two 10-ft. lengths of photo-cell cable completely furnished with all plugs and connectors. Heavy metal speaker grille covering affords extra protection. Speakers connected to each other to provide greater overall coverage, first being 25 feet from amplifier and second 25 feet beyond. Carrying case is 18 3/4" high, 15" wide and 10 3/4" deep, constructed sturdily and capable of long, hard usage. System may be used equally well for both 16 and 35 mm. sound-on-film. Special equalizer in amplifier accentuates high frequency response on 16 mm. film. Another example of Lafayette system value.

Input for 110-125 volts, 50/60 cycles a.c. Output: 360 volts d.c. at 160 ma. maximum; 6 volts a.c. at 4 amps, and 6 volts at 6 amps. Employs 5X4G rectifier tube. Chassis $5\frac{3}{4} \times 19 \times 7\frac{1}{2}$ on $5\frac{1}{4} \times 19$ rack panel. List \$56.60.

MODEL 195-T—Shpg. wt. 25 lbs. Cash Price, with tube..... **\$28.25**

Time:—\$2.83 down, \$3.50 per month for 8 months.

Standard Model—Similar to above, but employs 5Y3G tube and furnishes 6 volts at 4 amps, and 300 volts at 65 ma. Mounted on $3\frac{1}{2} \times 19$ panel.

MODEL 194-T—List \$35.00. Cash Price, with tube..... **\$17.50**

(B) Monitor Panel with db. Meter—Provides complete visual control of output. Has 2" db. meter with high return damping for accurate peak values. Meter calibrated from minus 10 to plus 6 db. 15 position tap switch permits readings from —10 up to +48 db. Mounted on panel $3\frac{1}{2} \times 19$ ". Shpg. wt. 10 lbs.

MODEL 146-P—List \$83.90. Cash Price..... **\$41.95**

(C) 12-Watt High Fidelity Power Stage—Designed primarily for recording purposes. Power output 12 watts normal, 22 watts peak. Harmonic content at 12 watts only 2.5%. Hum level minus 31 db. below zero level, minus 63 db. from 12 watts. Output impedance: 1.2, 2.5, 5, 7.5, 10, 15, 20, 30, 50, 125, 200, 250, 333 and 500 ohms balanced line. Input impedances: 50, 125, 250, 333 and 500 ohms balanced line. Circuit employs—2-6C8G and 2-6L6Gs. Mounted on $3\frac{1}{2} \times 19$ " panel. Shpg. wt. 32 lbs.

MODEL 191-T—Power stage with tubes. Cash Price..... **\$55.70**

(D) Full Range Equalizer—Combined low and high frequency equalizer. Each range has its individual tap switch frequency range selector and degree of equalization control. Mounted on $3\frac{1}{2} \times 19$ " panel. Shpg. wt. 25 lbs.

MODEL 188-P—List \$170.00. Cash Price..... **\$85.00**

(E) 5 Channel High Fidelity Mixer—Special designed unit that affords greater attenuation with smoother control of action—no steps of any kind. Far superior to "T" and "H" pad mixers. Output impedances available are 50, 125, 333 and 500 ohms. Tubes used: 6-6J7s. Mounted on $3\frac{1}{2} \times 19$ " rack panel.

MODEL 182-T—5 Channel Mixer, with tubes. List \$71.40. Shpg. wt. 20 lbs. Cash Price..... **\$35.70**

(F) Wide Range Pre-Amplifiers—Compact high-fidelity units capable of extremely faithful reproduction of all frequencies in the audible range. A 6J7 tube provides an overall gain of 35 db. Low impedance model employs a new triple magnetic shielded input transformer. High impedance model feeds direct to grid. Chassis: $3\frac{1}{4} \times 4\frac{1}{2} \times 4\frac{1}{2}$ ". (3 can be mounted on single rack panel).

MODEL 168-TL—Low Impedance Model, with tube. List \$37.00. Shpg. wt. 8 lbs. Your Cost..... **\$18.50**

MODEL 168-TH—High Impedance Model, with tube. List \$15.00. Shpg. wt. 4 lbs. Your Cost..... **\$7.50**

Rack Panel and Chassis—Accommodates up to 3 pre-amplifiers. Has chassis with shielded plug for input connections. Panel $3\frac{1}{2} \times 19$ ", with chassis $3\frac{1}{4} \times 19 \times 1\frac{1}{2}$ ". Panel is removable.

MODEL 167-P—(Wt. 5 lbs.). List \$18.70. Your Cost..... **\$9.35**

MODEL 192-P—Case only, with $26\frac{1}{4}$ " Panel Space. $28 \times 20\frac{1}{4} \times 13\frac{1}{4}$ ". Shpg. wt. 47 lbs. Your Cost..... **\$14.25**

MODEL 193-P—Case only, with $10\frac{1}{2}$ " Panel Space. $12\frac{1}{4} \times 20\frac{1}{4} \times 13\frac{1}{4}$ ". Wt. 25 lbs. Your Cost..... **\$9.95**

50-75 WATT BOOSTER AMPLIFIER

- » Can Be Operated From Any Type or Make Amplifier
- » 4 "Beam-Power" Tubes—Non-Critical Matching
- » Negative Feedback—Fixed Equalizer Circuit

Lafayette engineers now offer this 50 to 75 watt booster amplifier for use in conjunction with any of their line of p.a. amplifiers or for use with any other make or type of amplifier. Very simple to hook up; complete instructions for connecting and operating provided. No power input is necessary to drive this unit. Zero level or 1.73 volts will drive this booster amplifier to its full output. Excellent for use on big indoor or outdoor installations where tremendous areas are to be covered, as at airports, stadiums, boardwalks, race-tracks, etc. Any number of these units may be used for any desired increase in total power. 10 db. feedback makes matching to any speaker load non-critical. Amplifier provides power for an external pre-amplifier circuit. Tubes used include: 2-6C8G, 4-6L6G beam-power tubes and 1-83 rectifier.

MODEL 485-A—60 to 75 watt Booster Amplifier stage, less tubes and screen cover. Code, SHRUB. Shpg. wt. 40 lbs. List \$57.70. Cash Price..... **\$28.85**

Time:—\$2.89 down, \$3.57 per month for 8 months.

MODEL 485-T—Same as above, with one complete set of tubes (RCA & Raytheon). Cash Price..... **\$34.17**

MODEL 485-DF—Screen cover only (K13753)..... **\$2.35**

MODEL 486-A—60 to 75 watt Booster Amplifier stage, less tubes, in Rack Panel mounting. Size: $8\frac{1}{2} \times 19 \times 7\frac{1}{2}$ " W. 8" D. Code, SIGHT. Shpg. wt. 42 lbs. List Price \$64.10. Cash Price..... **\$32.05**

CONVERT YOUR PRESENT P.A. SYSTEM INTO A PORTABLE

Modern Streamlined Dual Speaker Carrying Case Bass-Reflex Type Baffles

An exceptionally well-built and handsome appearing dual speaker carrying case offered at an unusually low price for a unit of this calibre. Will house two speakers having diameters of twelve inches. Afford excellent frequency response due to the efficient design of the baffles, of the bass-reflex type which provides back pressure reinforcement. Speaker cables may be carried in opening provided. Case is attractively covered with Spanish Brown leatherette with contrasting stripes. Leather bumpers on all corners; brass hardware and leather carrying handle. Snap locks hold the two equal half units together, forming an easy-to-carry solid portable case. Speaker openings of lucidated baffles protected by metal grilles. Size, when closed: 16" high, 14" wide,

Lafayette STANDARD AND ECONOMY P.A. TUNERS

Standard Eight Tube Superhet P.A. Tuner

- » For Rack or Cabinet Mounting—8" Monitor Speaker
- » Covers Complete Broadcast Band—Police Band
- » Built-In Monitor Bridging Amplifier

An entirely new tuner for use with P.A. systems requiring high sensitivity and full tonal range over the entire broadcast band. Engineered to make fullest use of the latest in superhet circuits and the newest multi-purpose single-ended tubes. These tubes, with their elimination of screen grid caps and leads, greatly reduce losses and improve the efficiency of the circuit. Tubes used include: 1-6SA7GT, 1-6SK7GT, 2-6P5GT, 1-6SQ7GT, 1-6K6GT, 1-6U5, and 1-5W4GT. A special feature of this tuner is the circuit enabling it to be used with the 8-inch dynamic speaker as a bridging monitor amplifier, which can monitor either the tuner, the input or the output of the main amplifier stages. The output impedances are arranged for connection to a 500 ohm line or directly to a high impedance input. A 6U5 tuning "Eye" is located directly in the tuning dial for maximum visibility. Dial is a large easy-to-read slide-rule type, indirectly lighted. Among the numerous features of this new tuner; Tuning Band for all domestic broadcasts extending from 540 kc. to 1800 kc. (550 to 170 meters), including the upper police band; Full Automatic Volume Control; Three-Step pre-set tone control; 20 to 25 microvolts sensitivity. Panel is finished in slate grey wrinkle. Tuner also available for cabinet mounting.

MODEL 1035-T—Lafayette Single Band 8-Tube Superhet Tuner with panel for standard 19" rack mounting finished in slate grey wrinkle. Complete with all tubes. For operation on 110 volts 50/60 cycles a.c. Dimensions: 19" wide, 8 1/4" high, and 8" deep. Shpg. wt. 17 lbs. Code, SEPAL. \$28.90 Cash Price.

Time—\$2.89 down, \$3.58 per month for 8 months.

MODEL 1034-T—As above, but chassis and speaker only, less panel. For cabinet mounting. Complete with tubes. Chassis size: 8 1/4" H, 12" W, 8" D. Code, SHAME. Shpg. wt. 14 lbs. Your Cost..... \$24.95

Economy Broadcast Band 5-Tube P.A. Tuner

- » Completely Self-Contained in Plastic Cabinet
- » Built-In Loop Antenna—5-Inch Monitor Speaker
- » Covers Broadcast and Police Band—Slide-Rule Dial

Here is the most compact little P.A. tuner yet devised—capable of good fidelity when used with wide-range P.A. equipment. This handsome little model, no larger than the usual midget table model receiver is capable of affording reproduction of broadcast programs of good fidelity. An excellent accessory unit for any fine P.A. system in schools, auditoriums, resorts, camps, etc. The coverage extends down to 1800 kc. which includes the upper police band as well as domestic high fidelity stations. A tuned built-in loop antenna assures the maximum sensitivity over the entire range. The modern superhet circuit makes fullest use of the following multi-purpose tubes: 1-6A7, 1-6D6, 1-6Q7G, 1-41 and an 80 rectifier. Features of this fine little tuner include: full automatic volume control to minimize fading on weak and distance stations and to eliminate blasting. A fine 5-inch speaker is set behind the modern grille for purposes of monitoring the input to the main amplifier. The large easy-to-read dial is of the slide-rule type with indirect lighting and large numerals. A wide range tone control affords complete compensation for various acoustical conditions and for individual preferences. While no outside antenna is needed, the pre-tuned loop serving instead, provision is made for connecting an outside antenna should one be desired. Operates on 100 volts, 50/60 cycles a.c. Plastic cabinet handsomely finished in slate grey wrinkle which matches most P.A. units.

MODEL 1036-T—Lafayette Single Band 5-Tube Economy Superhet Tuner in slate grey wrinkle plastic cabinet, with self-contained loop and all tubes. For operation on 110 volts, 50/60 cycles a.c. Size: 7" high, 10 1/4" wide, 6" deep. Code, SLASH. Shpg. wt. 9 1/2 lbs. \$16.45 Your Cost.....

78 **NEW IMPROVED RECORD PLAYERS FOR P.A. SYSTEMS**

"Economy" Wide-Range Record Player

- Outer-Drive Constant Speed (78 R.P.M.) Motor
- ASTATIC High Impedance Crystal Pick-Up

An excellent portable phonograph record player that has been designed for use in high quality P.A. installations or with radio receivers. Has de luxe outer-drive constant speed (78 r.p.m.) motor and 9-inch felt covered turntable. Plays 10" or 12" records (with lid closed). Tangent head Astatic crystal pick-up (high impedance) for wide-range frequency response. Built-in volume control and separate push-type "on-off" switch. Sturdy carrying case covered in Spanish Brown leatherette (top removable). Size: 7" H, 15 1/4" W, 13 1/4" D. For 110 volts, 60 cycles A.C. Supplied with 4-ft. shielded lead. Shpg. wt. 22 lbs.

- K21886—Your Cost **\$10.85**
- K21881—Same as above, but with G.I. gear drive constant speed motor, 10" turntable. Your Cost **\$13.25**

16" TRANSCRIPTION PLAYERS
Optional "BUILT-IN" Amplifier & Spkr.

Ideal for Advertising Agency Radio Auditions

- DeLuxe Model—Built-In Amplifier and Speaker
- For 110 Volts AC or DC—ASTATIC Pick-Up
- Dual Speed Motor—Plays Records up to 17 1/4"

The finest portable transcription player on the market today. A de luxe outfit designed to meet all transcription record playing requirements. Ideal for advertising agencies, traveling demonstrators, "canned" sales talks, etc. Will play records up to 17 1/4 inches in diameter. Unit comprises a special heavy duty A.C.-D.C. transcription motor, dual speed, 78 and 33 1/2 r.p.m., plus a wide range power amplifier and speaker. Crystal pick-up with 12-inch arm affords true high fidelity frequency coverage. Incorporates record carrier. Mounted in an attractive, sturdy plywood carrying case, covered in Spanish Brown leatherette, measuring 13" high, 24 1/2" wide and 17 1/4" deep. Motor is accurately balanced and is provided with a 16-inch specially weighted and balanced turntable. Governor controlled motor with speed-regulator on panel. Pick-up arm rest holds arm securely while outfit is being transported. Amplifier employs 1-2SC7, 2-35L6GT "BEAM-POWER" tubes in a push-pull output stage and 1-35Z5GT rectifier. Power output normal 2 1/2 watts, peak 4 watts. Hum level below 2 1/2 watts is minus 62 db. Gain 60 db. Frequency response $\pm 1/2$ db. from 20 to 7000 c.p.s. Operates on either 110 volts A.C. or D.C. Has 10" high-fidelity P.M. speaker with Alnico magnet mounted in lid of case which acts as an INFINITE Baffle. Also features built-in volume control; "on-off" switch; tone-control; speed-regulator.

- K21970—De Luxe Transcription Player with built-in amplifier, speaker and 25-ft. speaker cable, complete with tubes. For 110 volts A.C. or D.C. Shpg. wt. 42 lbs. **\$69.80**
- List Price \$139.60. Cash Price
- Time: \$6.98 down, \$8.64 per month for 8 months.

Standard Model

Similar to unit above, but less amplifier and speaker, for use with high quality amplifiers, and for 110 volts 60 cycles A.C. only. Heavy plywood case with leatherette covering measures 7 1/2" high, 23" wide, 18" deep. Shpg. wt. 38 lbs. **\$42.50**

LAFAYETTE 15 TO 18 WATT PHONO EXPANDER AMPLIFIER

Brings Out All the Realism in Your Records

- Unsurpassed For Tonal Quality and Volume
- "Beam-Power" Output—Tone Control—Compact

Lafayette engineers have developed this high-quality amplifier with one aim, namely, the highest quality reproduction for phonograph recordings. And we are proud to say that they have achieved this worth-while goal in this 15 to 18 watt Volume Expander phono amplifier. Volume expansion adds realism and a startlingly life-like quality to your recordings because of the modern recording practice of "compression". Compression means, simply, that when the dynamic range of the music or sound being recorded exceeds a certain point—which would be beyond the normal width of the record groove—a "compressor" circuit automatically comes into play and keeps the recording groove within its normal confines. When the recording is played back through a volume expander amplifier the "expander" circuit automatically replaces the "compressed" sound and reproduction duplicates the original sound in all its dynamic and tonal brilliance. The amplifier incorporates all the latest engineering developments including "beam-power" tubes, inverse feedback and has an overall frequency response of 50 to 8,000 cycles. Tubes used: 1-6SC7, 7-6C8G, 2-6I6G and 1-5V3G. Only three simple controls: Volume, Expansion and Tone.

- MODEL 415-A—Lafayette 15 to 18 watt Volume Expander Phono Amplifier, less tubes and cover. Code, SLUMP. Shpg. wt. 25 lbs. List Price \$35.90. **\$17.95**

ALUMINUM BLANKS. Available either plain, for use with recorders having lead screws, or pre-grooved. When recording on aluminum the metal is "knurled" and not cut. It is therefore important that the aluminum be of the right temper. These are we believe the finest available. Highly polished surfaces. Both sides may be cut on all blanks except the 5" size.

PROFESSIONAL GRADE ACETATE DISCS. Excellent quality discs at very reasonable prices. Mirror surface uniform coating (approx. .008"). May be cut at high amplitude. Heavyweight 6" and 8" are .037" thick, 10" and 12" are .046" thick and 16" are .054" thick. Lightweight are all .030" thick. Record both sides. All with sleeves and index labels.

AMPERITE MICROPHONES

KONTAK MIKES FOR MUSICIANS

Faithfully reproduce the vibrations of any musical instrument. They reproduce the entire audible range without introducing any annoying peaks. Used extensively by many famous name bands. Have been used by the Philadelphia Symphony Orchestra to re-enforce a mandolin solo. Increase timbre - create new effects. Available, as illustrated at left above, without hand volume control and also with this control as illustrated at right. Model KR is a special hi-output model that will work on phono inputs of most amplifiers and radio receivers (built after 1935). Other models are for use on regular mike channels. All are high impedance (available in 200 ohms impedance on order only). Average shpg. wt. 2 lbs. each.

Quality SPEAKERS for Every Requirement

LAFAYETTE All-Purpose PM Speakers

High quality permanent magnet, all-purpose speakers. Each model matches in sensitivity a comparable field coil type speaker. High permeability magnets employed, one-piece seamless cones, frames of sturdy plated metal. Frequency response excellent. Voice coil impedance on all models 6-8 ohms. All furnished less output transformer.

Universal Field Coils

Heavy duty universal field coils for use with the larger speakers. Wound with two equal sections from which four leads are brought out. Windings may be connected in series or in parallel to obtain desired resistance; in either case, all of the wire is used and no reduction in field dissipation results. Maximum variation in dimensions should not be greater than 1/4". Complete installation instructions and directions supplied. Reducing bushings and washers furnished. Example: To replace an 1800 ohm field coil, use type A replacement coil and put windings in series; 2500 ohms, use type B, etc.

TUBE and SET TESTERS

Model 309-P Tube Tester

Tests all the NEW MINIATURE TUBES and all other new and old receiving tubes on the market today. Also tests ballast tubes, pilot lights, Xmas tree lights, etc. Tests all tubes having filament voltages up to full line voltage. In addition a spare socket provides for future tubes with new base arrangements. Employs the famous DYNOP-TIMUM test circuit that makes all tests at RMA specified plate voltages and loads. Provides hot cathode leakage test. Hot interelement short and leakage test between all individual elements. Individual tests of each section of full wave rectifiers, duo-diodes and all multi-purpose tubes. Includes noise and hum tests. Has a continuously variable adjustment for all line voltages from 105 to 135 volts. Line voltage directly indicated on the D'Arsonval meter. Simple and speedy to operate. For 105-135 V. 50/60 cycles a.c. Shpg. wt. 10 lbs.

SUPREME 504 Tube and Set Tester

Deluxe High Speed Checker for all tubes. Tests all 4, 5, 6, 7, 8 prongers, loktals, Bantams, midjets, single ended, television, magic eye and hearing aid types; also gaseous rectifiers, ballasts and pilot lights. Shows internal opens. Hot neon tests for shorts and inter-element leaks at both .25 and 2.5 meg. sensitivity. All filament voltages from 1.4 to 117. Exclusive tapped primary power transformer for stable line voltage adjustment. Patented switching system automatically reconnects all sockets for any future tube base connection lay-out. No worry about spare sockets, adapters or rewiring for new tubes. Roller tube chart lists all complete and sectional tube tests; 1-year free chart revision service. Electrolytic condenser leakage test. Large high torque meter. Meter ranges: 0/5/25/100/250/500/1000/2500 D.C. volts; D.C. current 0/5/2.5/10/50/250 ma., 0/1/10 amps.; A.C. volts 0/5/10/50/250/1000 (also output meter); 1/200/2000/20,000 ohms on internal battery, 0/2/20 megs. on internal power pack. POPULAR SIGNAL GENERATORS

SUPREME Model 561 Signal Generator

Combination RF and AF metered oscillator with 4 types of signal output, viz.: Unmodulated RF from 65 KC to 20.5 MC on fundamentals, over 60 MC on harmonics of highest band; Variable AF, 15 to 15,000 cps. flat within 1 DB 30 to 10,000 cps., down 2 DB at 15 and 15,000 cps.; Variable AF modulation over entire RF and AF ranges; Patented electronic frequency modulator for scope alignment. Electronic voltmeter checks RF output in microvolts; reads % modulation direct 0% to 80%; is zero beat indicator for AF calibration; controls AF output. Four AF output impedances 50/500/5,000/50,000 ohms, single or push-pull output. Push button range selectors. Fully shielded line RF filter. True ladder attenuation, non-inductive with vernier. Maximum output 100,000 microvolts RF. Iron tuned coils and air-dielectric trimmers for precise calibration. High calibration stability on all functions. RF and AF wave forms essentially sine. Non-glare black and silver panel. Solid Oak laboratory case with handles. Complete instructions and two output cables. Size: 17½x9¼x12". Shpg. wt. 33 lbs. **\$86.73**

TRIPLETT Model 1632 Signal Generator

A complete wide-range signal generator providing continuous coverage from 100 KC to 120 MC, covering standard broadcast ranges as well as the new high frequencies for FM and television. Metered output to multiplier and attenuator. Heterodyne detector is incorporated. Permits checking the oscillator, or beating with another oscillator, without a receiver. Output available at end of coaxial cable. Minimizes losses and disturbance to circuit under test. Provision for external modulation at AF or RF. Permeability adjustment and tubular air-trimmer capacitors are used throughout for increased accuracy and stability of calibration. Low resistance copper shielding and low-loss construction. Coil and trimmer assemblies and condensers shielded to minimize radiation of the unmodulated RF. Positive vernier dial tuning control—no backlash. Streamlined metal case with attractive rolled edge design, 15½x9¾". Silver-gray suede electro enamel finish. Snap-away handle. Three-tone panel, maroon background, gray and white trim. JACKSON MODEL 652 A.F. OSCILLATOR

New Basic Principle — Resistance Capacity Tuned

The basic design of this new instrument is entirely different from the "beat frequency" type of Audio Oscillator, thereby eliminating all the characteristic faults of the beat audio method. No RF circuits vastly simplify the instrument, also accounting for its remarkable accuracy and stability of output frequency. Features: Resistance Capacity Tuned Circuit Design for modern audio measurement needs; No Zero adjustment — tuned fundamental frequency method provides permanently locked calibration; Full range, 20 to 20,000 cycles in 3 bands; Accuracy — freq. calibration to within 3% or 1 cycle; Scale length 25"; Output Impedance, 10/250/500/5000 ohms/HIGH, controlled by selector switch; output control continuously variable from zero to maximum; less than 5% harmonic distortion at all freqs. Meets most exacting requirements as to wave form, uniform frequency characteristic and output load impedance selection. For 105-120 volts, 50/60 cycles A.C. Supplied with 1-80, 1-6SJ7, 2-6F6. SIGNAL TRACERS

RCA-Rider "Chanalyst"

The servicing of any radio, new or old, can be done easier and faster with a Chanalyst than with any other type of test instrument. The Chanalyst permits you to follow the signal like a bloodhound from the antenna coil in the receiver right through

each succeeding stage to the speaker voice coil. It shows you instantly where the signal gets weaker, distorted or disappears altogether. Range: 95 to 1700 Kc. It measures voltages in any part of the receiver without affecting its operation. This feature is valuable in checking control voltages of AFC and AVC circuits. The Chanalyst provides the only satisfactory means of checking for intermittents. It will check oscillator frequency of a superhet and power consumption in watts with equal facility. Includes 5 test channels with separate indicators. Shielded leads included with special probe handles incorporating the coupling capacity for r.f. and i.f. channels.

SPECIFICATIONS

RF-IF Channel—Range: 95 kc. to 1700 kc. Frequency calibration $\pm 2\%$. Sensitivity (to close eye) approximately 50 micro-volts.
Oscillator Channel—Range: 600 kc. to 15,000 kc. Frequency calibration $\pm 2\%$.
Audio Frequency Channel—Range: 150 cycles to 150,000 cycles. Sensitivity approximately 0.15 volt.
Electronic Voltmeter Channel—Range: -5 to +5, -25 to +25, -100 to +100, -500 to +500 volts. Input impedance 10 Megs.
Wattage Channel—25 to 250 watts. Accuracy $\pm 10\%$ (assuming 80% power factor of load). Instrument operates from 110 V. 50/60 cycles a.c. Shpg. wt. 30 lbs. Size: 14x9x9 $\frac{1}{2}$ ".

JACKSON Dynamic Signal Analyzer

A complete signal tracing instrument that does not require any other equipment except a good test oscillator to apply a signal to the receiver. No "special" type of oscillator is needed. It will check a signal right from the antenna through the r.f., i.f. and a.f. sections to the

speaker voice coil. Noise, distortion or hum are quickly located at their source. Meter readings of actual gain simultaneously indicated while audible tests are being made. The Jackson Signal Analyzer will make all measurements on direct reading meters without the need for balancing adjustments for making the readings. It will greatly increase the usefulness of any oscillograph. For example, the demodulated signal can be observed throughout the entire RF and IF systems providing a visual test for distortion, etc. The Signal Analyzer amplifies and demodulates the receiver signal for observation on the oscillograph screen. Resonance curves of individual stages can thus be obtained. Range: 90 kc. to 16 mc. For 105-125 V. 50/60 cycles a.c. Case: 17x8 $\frac{1}{2}$ x7 $\frac{1}{4}$ ". HICKOK Indicating Traceometer Model 155 5 Precision Meters

This new complete dynamic signal tracer with its five precision meters permits you to measure and trace the signal in five circuits at the same time! And it will do this **without affecting the operation of the set!** It will measure the signal in microvolts at any point in the RF or IF section. It will measure the oscillator voltage throughout its entire range. It will also measure: DC voltage, A.F.C. and A.V.C. voltage, etc. It will measure AC voltages including audio signals in any part of the circuit. Can be used to check power consumption of any AC operated device in watts up to 300 watts. Has self-contained voltage regulation for the vacuum tube voltmeters. All controls clearly marked. Complete operating instructions supplied go into great detail regarding the use of this instrument for testing and analyzing all types of circuits including superheterodyne, radio frequency, intermediate frequency, oscillator, automatic volume control, automatic frequency control, etc. Size: 13x16x10". Meissner ANALYST 5 Separate Channels

A complete service instrument containing in one unit five separate channel analyzers. Each one performs a separate function in localizing receiver troubles. One channel permits complete audio analysis including gain measurement, hum location, etc. The second channel is an electronic voltmeter with a constant input impedance of 10 megohms on all ranges and checks all operating and control voltages without affecting the operation of the receiver under test. The third channel is for completely analyzing oscillator circuits in superheterodynes. The fourth is for tracing the signal through the RF and IF channels and has a range from 95 to 1700 kc. The fifth and last is a line current indicator which shows the power consumption of the receiver under test. The ANALYST is complete with all tubes, all extras such as cables, etc. and with full instructions for operation. Size: 9 $\frac{1}{2}$ x13 $\frac{1}{2}$ x10 $\frac{1}{2}$ ". Shpg. wt. 35 lbs.

562 "Audolyzer"

Signal Tracer with Loudspeaker

Complete functional signal tracer. Checks operation of every joint, component and circuit from antenna to loudspeaker, by tracing signal. Instantly discloses faulty part where signal loses gain or dies, where distortion, intermittents, regeneration, oscillation or noise occurs. Built-in loudspeaker allows listening for defect without adjusting Audolyzer controls for every test. Reads gain direct on

meter. Electronic voltmeter, 6 ranges, 15 megs. impedance on all ranges: 0/1/3/10/30/100/300/1000 volts DC plus or minus. Checks all operating and control voltages such as grid bias, AVC, AFC, etc. without interference with set operation. Checks set oscillator and IF frequencies. Range 90 kc. to 14.5 mc. Can be used as field strength meter and noise locator. Electronic ohmmeter range $\frac{1}{2}$ ohm to 1,000 megohms in 6 ranges. Audolyzer can be used with any standard scope for RF and IF analysis. Multiple channel tests. With RF and AF cables. Oak case: 17 $\frac{1}{2}$ x12x9 $\frac{1}{4}$ ". Shpg. wt. 32 lbs.

560 "Vedolyzer"

Signal Tracer with Oscilloscope

Complete Signal Tracer and simultaneous Dynamic Tester. Only Signal Tracer that checks all standard broadcast, frequency modulation and television receivers. High frequency oscilloscope using modern video type amplifier, 30 cycles to 4.5 mc. wide, shows actual wave form, distortion, noise, intermittents, etc., right through from antenna to loudspeaker. Checks alignment of standard

and frequency modulation receivers and television. Shows true form of sync pulses, pedestals, etc. in complex television wave. Checks form of television sweep circuits, phase distortion, etc. Shows all simultaneous effects in any circuit including gain, hum, distortion and noise. Reads gain direct on meter. Electronic voltmeter ranges: DC volts 0/2/5/20/60/200/600 at 15 megs. input all ranges. Also DC volts 0/20/60/200/600/2000/6000 at 150 megs. constant input impedance. AC volts 0/3/9/30/90/300/900 all at 15 megs. impedance. Ohms: $\frac{1}{2}$ /1000/10M/100M/1 meg./100 meg. Multiple channel tests. Wavemeter checks local oscillator and IF frequency and drift. Oak case: 17 $\frac{1}{2}$ x12 $\frac{1}{2}$ x13". For 110 V. 60 cycles a.c. Complete with 2-hf and 1-if cables. Shpg. wt. 40 lbs.

OSCILLOSCOPES

DUMONT 3" Model 164 Oscilloscope

A three inch instrument meeting the requirements of the service-engineer and the amateur. Employs the type 2501A3 (green) Teletron interchangeable with the type 906. Amplified sweep uses a type 885 as sawtooth oscillator. Separately controlled horizontal amplifier has a gain of 40 and the

vertical amplifier has gain of 70 from 15 to 30,000 sinusoidal cycles per second. Provision for applying signals direct to deflection plates at rear of unit without removing cabinet. Two power supplies deliver 1125 volts accelerating potential and 415 volts amplifier potential. Removable calibrated scale is provided for accurate determinations. Size: $11\frac{1}{2} \times 7\frac{1}{2} \times 13$ in. Shpg. wt. 25 lbs. For 115 V. 40/60 cycles a.c. operation.

Modern All-Purpose Test Instruments

AEROVOX Model 95 "LC" Checker With R.F. Oscillator

Designed to test condensers and inductances in the RF range under conditions simulating actual operation. Measures effectiveness as well as capacity or inductance of coils and condensers. Also ideal for aligning all receivers, tuning wave traps, checking oscillators and wavemeters, etc. Incorporates an oscillator covering from 75 kc. to 26 mc., in 6 ranges. Direct-reading calibration. 6E5 indicator to indicate resonance when coupled to another circuit, etc. Operation from 115 volts, 60 cycles a.c. only. In shielded metal case, dim.: $10\frac{1}{2} \times 7\frac{1}{2} \times 5\frac{1}{2}$ ".

AEROVOX Capacity Bridge

Measures all essential properties of condensers under actual working conditions. Resistance bridge also provided, as well as insulation resistance test permitting many other tests. Applies continuously variable polarizing d.c. voltage as well as a.c. to condenser tested, as in actual use. Polarizing voltage shown on meter, which also aids in determining exact leakage at given voltage. 270° main capacity dial spread calibrations for accurate readings. Linear scale covers but one decade per range. Instrument provides vacuum tube voltmeter, voltmeter, millivoltmeter and milliammeter. Has variable-voltage power source. In lock-cornered red gumwood case, natural finish, with slip hinges. Size, $10\frac{1}{2} \times 7\frac{1}{2} \times 8$ ". Wt. 11 lbs.

RADIO COMPASS

That a radio compass is of inestimable value to a boat owner is admitted by everyone but it remained for Hallicrafters to build a highly practical unit of this type at a reasonable price. With the Model S-30 Radio Compass and Direction Finder you can check your position against beacon, broadcast or shore radiophone stations. Range from 200 to 3000 kc (1500 to 100 meters) is covered in 3 bands: 220-540 kc, 535-1340 kc and 1200-3000 kc. Sensitive headphones and a tuning eye serve as indicators when taking a bearing. Tubes used: 2-6SK7, 1-8K8, 1-6SQ7, 1-6U5G and 1-6G6C. The vibrapack power supply (included) is a separate unit for operation from a 6V storage battery. Can be operated from regular dry A and B batteries if desired. Headphones are included but a speaker can be used if desired. Sturdily constructed and especially designed for operation in humid atmospheric conditions. Dim.: 11x10³/₁₆"h.; Ht. including loop 23¹/₂". Aluminum cabinet in gray wrinkle finish. Shipping weight 40 lbs.

12 Watt RADIOPHONE UNIT

The Model HT-11 Marine Radiophone now brings to the small boat owner the safety, convenience and peace-of-mind enjoyed by all radio equipped ships at a surprisingly low price. At about the price that you would pay for a good radio for your home you can now buy this complete radiophone unit that enables you to keep in constant touch with land telephones at your home, your office, your physician, etc. It also enables you to keep in touch with other boats similarly equipped. The distance over which you can talk is dependent entirely upon atmospheric conditions. Under favorable conditions from 50 to 100 miles in daylight and up to 150 miles at night should be satisfactory.

The entire unit is in two parts—the radiophone—and the power supply. The radiophone is housed in an attractive small metal cabinet measuring only 14¹/₈" w. x 8¹/₂" h. x 9¹/₂" d. It can easily be mounted on a table or shelf. The transmitter provides three crystal-controlled frequencies in the range of 2000 to 3000 kc. The receiver is manually controlled and covers from 550 to 1700 kc and 2000 to 3000 kc. The tube line-up: Transmitter—1-6V6 asc., 1-807 power amp., 2-6V6G modulators. Receiver—1-6SK7 r.f. amp., 1-6K8 mixer, 1-6SK7 i.f. amp., 1-6SQ7 2nd detector—a.v.c.—1st audio, 1-6K6G audio amp., and 2-6X5G rectifiers. The stand-ard power supply is for 12 volt DC operation.

The Model HT-11 Hallicrafters Radiophone is supplied complete with tubes, handset and power supply for 12 volts DC operation. Does not include crystals or installation. Shpg. wt. 25 lbs.

25 Watt RADIOPHONE UNIT

Model HT-8 is a compact, efficient 25 watt Radiophone that is extremely easy to use. Just two simple switches enable you to select instantly any clear channel for both receiver and transmitter. Lifting the handset automatically disconnects the speaker—then press the button and talk—that is all there is to operating this versatile radio telephone. Provision is made for five crystal-controlled transmitter frequencies and six reception frequencies. Transmitter frequencies may all be in the 2000-3000 kc range or three in this range and two in the 3000-6700 kc range. Suitable crystals must be purchased separately (write for prices). Receiver frequencies provide for four channels in the 2000-3000 kc range and the two more in either this or the 3000-6700 kc range. Cabinet dim.: 15" w. x 10" d. x 18" h. Power supply is a separate unit (included) and may be operated from 110 volts a.c. as well as either 12 V., 32 V. or 110 V. d.c. WHEN ORDERING SPECIFY D.C. VOLTAGE DESIRED. Transmitter tube lineup: 6L6 oscillator, 807 amplifier, 6J5 speech amplifier, 2-6L6G modulators. Receiver: 2-6K7, 1-6L7, 1-6SJ7, 1-6SQ7, 1-6SF5, and 1-6K6G. Shpg. wt. 105 lbs.

In addition to the 25 watt model, illustrated and described above and at right, a 50 watt model is also available. Just drop us a card with your name and address and ask for full details of the Hallicrafters Radiophone Model HT-12.

NEW! PORTABLE MODEL S-29 COMMUNICATIONS RECEIVER

The most sensational portable ever designed! Not just a midget stuck into a carrying case. But a precision-built communications receiver in portable form! All the selectivity, sensitivity and stability you would expect only from the finest fixed station sets is yours in this new receiver that is truly universal. It will operate on either 110 volts a.c. or d.c. or from its self-contained batteries (approximate battery life 100 hrs.). It has a self-contained collapsible antenna which can be extended to nearly 3 feet. It covers four complete bands—542-1490 kc, 1.43-4.35 mc, 4.12-11.9 mc and 11.26-30.5 mc. Employs an r.f. stage on all bands. Incorporates an automatic noise limiter, electrical bandspread, high gain antenna coupling circuit, permeability tuned r.f. and i.f. circuits, neon lamp indicator, etc.

The average sensitivity is below two microvolts on all bands. Tube lineup: 1T4 r.f. amp., 1R5 mixer, 1P5GT 1st i.f., 1P5GT 2nd i.f., 1H5GT 2nd det.—a.v.c.—1st audio, 3Q5GT output amplifier, 1G4GT beat oscillator, 1G4GT noise limiter and 25Z5G rectifier. Controls include: main tuning—band spread—r.f. gain—A.F. gain—band switch—power switch—a.v.c. "off-on" switch—BFO "off-on" switch—ANL "off-on" switch—send-recv—standby switch. Connectors: doublet antenna socket—long antenna socket—phone jack—battery cable with plug—ac/dc outlet cord. Dimensions: 7" high, 8 1/2" wide and 13 1/4" deep. Net weight including all batteries is 18 lbs.

Model S-19R SKY BUDDY

Undoubtedly the most popular amateur receiver ever designed. Each new model has been on improvement over the previous one. And now the latest version to come out of the Hallicrafter laboratories incorporates more features than have ever before been built into so moderately priced a receiver.

The efficient superheterodyne circuit employs 6 tubes of which two are dual-purpose types providing 8 tube performance. The tubes employed include: 6K7G, 6K8G, 6Q7G, 76, 41 and 80 rectifier. Complete tuning range of the receiver is from 545 kc to 44 mc in 4 tuning bands. This range includes the amateur 10 meter, 20 meter, 40 meter, 80 meter and 160 meter bands. Electrical band spread is provided on each band. Other features of this remarkable receiver include: broadcast band coverage, beat frequency oscillator, automatic volume control switch, phone jack, pitch control, built-in speaker and a separate band spread dial. It also has a built-in plug and jack for battery or vibrapack operation. It is designed however for operation from any 110-120 volt 50/60 cycles a.c. line. Antenna connections are provided for both doublet and Marconi type antennas. The cabinet is beautifully finished in black crystalline and measures 17 1/2 x 8 x 8 1/2". Shipping weight 34 lbs.

PRECISION MADE

Model S-20R SKY CHAMPION

This new improved model of this famous communications receiver now employs nine tubes and incorporates many new and valuable features. Now more than ever before it is amateur radios biggest dollar value. Covering the complete range from 545 kc to 44 mc in four bands it employs a stage of pre-selection on each band for added sensitivity and selectivity. It performs like a thoroughbred and is instantly responsive to each control. Among the controls provided are: r.f. gain or "sensitivity", audio gain or "volume", tone control, automatic volume control switch, beat frequency oscillator switch with its attendant "pitch" control, band switch, main tuning control and separate band spread control, "off-on" switch and "stand-by" or "send-recv" switch. Among the circuit features you will find: electrical band spread, automatic noise limiter, two i.f. stages, drift compensated high frequency oscillator, r.f. amplifier, etc. While the receiver is designed for 110 volts 50/60 cycles a.c. operation a plug and jack is provided to permit operation from batteries or vibrapack.

The tube lineup: 6SK7 R.F. Amplifier, 6K8 1st Detector-Mixer H.F. Oscillator, 6SK7 1st I.F. Amplifier, 6SK7 2nd I.F. Amplifier, 6Q5GT 2nd Detector, A.V.C. 1st Audio, 6F6G 2nd Audio, 6H6 Noise Limiter, 6J5GT B.F.O. and 80 rectifier. A matched built-in speaker and inertia type tuning controls further add to the completeness of this excellent receiver. It is housed in an extremely attractive steel cabinet measuring 18 1/2 x 9 1/2 x 8 1/2". Shpg. wt. 34 lbs.

Model S-22 SKYRIDER MARINE

While designed particularly for marine use in the 600 and 700 meter bands, this receiver is capable of covering a complete tuning range from 16.2 to 2150 meters (140 kc to 18.5 mc) thus making it ideal for any commercial or other service requiring a receiver operating within this range. The complete range is covered in four bands with an accurately calibrated main tuning dial having a scale length of 339° and a separate mechanical band spread dial. Both sensitivity and selectivity are of a higher order. Image rejection at the higher frequencies is particularly good due to the use of 1600 kc i.f. transformers.

Other features include: beat frequency oscillator, matched built-in speaker, automatic volume control, individual coils for each band, sensitivity and gain controls, pitch control, tone control, send-receiver switch and phone jack. The receiver is designed for operation from either 110 volts a.c. or d.c. Can be operated from 6-volt d.c. storage battery by using converter listed below. The complete receiver is housed in an attractively finished steel cabinet measuring 18 1/2 x 9 1/2 x 8 1/2". Shpg. wt. 35 lbs.

Model SX-24 SKYRIDER DEFIANT

The nine-tube communication receiver with "frequency meter tuning." The Skyrider Defiant provides performance that can be compared favorably with most receivers selling at twice the price. Every advanced feature of the entire Hallicrafters line is incorporated in this unit. Four bands cover the range from 545 kc to 43.5 mc; frequency meter tuning on 10, 20, 40 and 80 meter amateur bands. Tube lineup: 3-6SK7, 1-6K8, 1-6SQ7, 1-6F6G, 1-6H6, 1-76 and 1-80 rectifier. Controls include r.f. gain, selectivity switch, crystal phasing, audio gain, pitch control, main tuning control, band-precise tuning control, automatic noise limiter switch, Hi-La tone control, send-receive switch and beat frequency oscillator switch. Outstanding features of this remarkable receiver include: one stage of pre-selection, DC operation socket for battery or vibrapack, six point variable selectivity from sharp CW crystal to high-fidelity, meter calibrated in both S and DB units, single-signal crystal filter and terminals for break-in relay operation. Cabinet dimensions are: 19 1/2" x 9 1/2" x 10 1/4". Shpg. wt. 41 lbs.

Model SX-28 SUPER SKYRIDER

Hallicrafters 1941 version of the Super Skyrider! Here is a communications receiver that sets new standards of performance! Six tuning bands cover a continuous range from 540 kc to 43 mc. These six bands instead of the usual four assure the most satisfactory L/C ratio on each band. A total of 14 tubes is used as follows: 6SK7 1st r.f. amp.; 6SK7 2nd r.f. amp.; 6SA7 mixer; 6SA7 temperature compensated high frequency oscillator; 6L7 1st i.f. amp. and noise limiter; 6SK7 2nd i.f. amp.; 688 2nd detector and meter; 688 a.v.c. amplifier; 6SK7 noise amplifier; 6H6 noise rectifier; 6SC7 1st audio amp.; 2-6V6GT push-pull output amp.; 1-5Z3 rectifier.

Circuit features include: 2 r.f. stages, push-pull high fidelity audio, 6-step wide range selectivity, band pass audio filter, wide angle "S" meter, phono jack, adequate headphone output, improved signal to noise ratio, 80/40/20/10 meter amateur bands calibrated, temperature compensated h.f. oscillator. The chassis is of No. 14 gauge steel cadmium plated. The 8 3/4" x 19" rack type panel is of 1/8" thick steel with etched control markings and finished in Morocco. Cabinet dim.: 20 1/2" x 14 1/2" x 9 1/2". Cabinet is finished in machine tool gray wrinkle.

COMMUNICATIONS RECEIVERS

Model S-27 FM & AM RECEIVER

Designed specifically for the ultra-high frequencies—27 to 145 mc (11.1-2.06 meters) and to receive both frequency-modulated and amplitude-modulated signals this new Hallicrafters is indeed an unusual communications receiver. Employing a total of 15 tubes (including 1 power rectifier and 1 voltage regulator) it provides startling performance at these frequencies. Three of the tubes (r.f., 1st det. and osc.) are of the acorn type. Oscillator, converter and metering circuits are supplied with voltage through a type VR-150 voltage regulator tube. The meter is calibrated in both "S" and "DB" units. Entire r.f. assembly is built on a separate chassis and shock-mounted to the main chassis. Expanding i.f. amplifier provides sharp tuning or stand-by tuning for AM and brood band-pass for FM. Latest automatic noise limiter provided for AM. Air-tuned iron-core i.f. transformers. Plate tuned oscillator, 500 or 5000 ohm output. Push pull audio amplifier with negative feedback. S meter has zero-center scale for accurate FM tuning. Three tuning bands—27-46, 45-84 and 81-145 mc. Overall sensitivity (amplitude modulation) approx.: Band 1—less than 1 microvolt; Band 2—two microvolts; Band 3—two to four microvolts. In black crackle-finished metal table cabinet. Dim.: 19x9x14". Shpg. wt. 75 lbs. For 110 V. 50/60 cycle a.c. with tubes.

Model SX-25 SUPER DEFIANT

One of the finest values that Hallicrafters has ever offered in the communications field! It has so many outstanding features that we hardly know where to begin. Most unusual in a receiver at this price are perhaps its extreme selectivity and its more and better audio amplification. Then there is the automatic noise limiter, the separate calibrated band spread dial for the 10, 20, 40 and 80 meter bands, the compensated ultra-stable oscillator, the six-step variable selectivity control, the "S" meter, the 8-watt push-pull output stage, the laboratory checked piezo quartz crystal filter, the matched 10" heavy duty PM speaker in modern styled cabinet. Four tuning bands cover the complete range from 540 kc to 42 mc. The tube lineup: 6SK7 1st r.f. amp.; 6SK7 2nd r.f. amp.; 6K8 1st detector-mixer-h.f. oscillator; 6SK7 1st i.f. amp.; 6SK7 2nd i.f. amp.; 6SQ7 2nd det.-AVC—1st audio amp.; 6SQ7 phase inverter; 2-6F6 p.p. output stage; 6H6 automatic noise limiter; 6J5GT beat frequency oscillator and 80 rectifier. There are external provisions for: send-receive terminals, headphones, 5000 ohm or 500 ohm output, single wire or doublet antenna. Both i.f. stages are expanded in the "Brood IF" position for high fidelity performance. The automatic volume control circuit keeps most signals at a uniform level. The automatic noise limiter reduces interference by as much as 70%. The extremely low noise level of the Super Defiant makes it sensitive to very weak signals. Cabinet dimen.: 19 1/2" long, 9 1/2" high and 11 1/4" deep. For 110 V. 50/60 cycle a.c. operation and a socket is provided for d.c. operation from either batteries or a vibrapack. Shpg. wt. 67 lbs.

NEW! HOWARD "490"

If it's results you want—try this new Howard "490". Truly the last word in sensitivity, selectivity and efficiency. A 14-tube superheterodyne with 2 r.f. preselection stages. This combined with both variable i.f. selectivity and variable audio response permits a new high in overall selectivity. By setting the audio response so that a peak is obtained at approximately 1600 cycles and setting the i.f. and crystal selectivity adjustments accordingly it is possible to read a c.w. signal through QRM that would make reception impossible on most receivers.

14 Tube Superheterodyne

Tube complement: 6AB7 (1853) 1st r.f., 6AB7 (1853) 2nd r.f., 6SA7 1st det.-mixer, 6SA7 h.f. osc., 6SK7 1st i.f., 6SK7 2nd i.f., 6H6 2nd det. AVC noise limiter, 6SP5 audio, 6J5 phase inverter, 2-6K6 push-pull output, 6J5 BFO, 7E7 carrier level meter amplifier and 5U4 rectifier. Incorporates temperature-compensated oscillator, variable selectivity i.f., fully shielded coil and condenser assembly, carrier level meter, variable fidelity audio system. Controls include: main tuning, bandspread tuning, r.f. gain, crystal phase, low frequency audio rejection, high frequency audio rejection, pitch, a.f. gain, send-receive, frequency range, two-position crystal selectivity, three-position i.f. selectivity, noise-limiter "off-on", AVC "off-on", BFO "off-on", carrier level meter "off-on". Output terminals at rear of chassis for 5 and 500 ohm load. Terminals for either doublet or single wire antenna provided.

Famous RME-99

RME receivers require no introduction to the experienced amateur—he already knows how good they are. And this new RME-99 is without question the finest of them all. The secret of their performance is the amazing amount of attention that has been given to each detail in their construction. Imagine a chassis that consists of a solid one-piece aluminum casting! Think what this means in respect to the alignment of parts. Then there is the voltage-regulated power supply, the decibel-R carrier level meter, the six tuning bands, the automatic noise suppressor, the 8" diameter band spread scale, etc. 12 tubes are employed: 7A7 1st r.f., 788 1st det.-mixer, 7A4 heterodyne oscillator, VR150 voltage regulator for the oscillator, 3-7A7 i.f. amplifiers, 7E7 2nd det., 7A6 noise suppressor, 7A7 BFO, 7C5 beam power amplifier, 80 full wave rectifier. Tuning range: 540 to 33,000 kc in 6 bands. Full calibrated band spread 3500-4000, 7000-7300, 14,000-14,500 and 28,000-30,000 kc. RF tank circuits switched on a ceramic band switching sections. Terminals provided for "break-in" operation. Audio output—4 watts. Impedance 4,000 and 600 ohms. 8" PM speaker furnished in matching metal baffle. Over the entire tuning range the average sensitivity is better than 2 microvolts. This is based on an output of 1 watt instead of the usual 50 milliwatts. One of the chief reasons for this excellent sensitivity is the use of high L/C tuning ratios on all bands. Cabinet is 19" long, 8 3/4" high and 10 1/2" deep. Finished in attractive gray wrinkle (obtainable in black on special order). Shpg. wt. 77 lbs.

HOWARD Progressive Series

Model 436

This model incorporates all of the features of the model 435 described at the right plus a number of important additions and refinements. It has 7 tubes instead of 6. The seventh is a noise limiter that permits you to hear many stations that would otherwise be lost in the QRM. It is so designed that signals having a modulation above 60% and a steep wave front characteristic are cut off automatically. The additional tube is a type 6H6. Also included are the new Howard Inertia Knobs that makes tuning easier and faster.

Model 435

Howard Model 435 is the basic unit of the Howard Progressive Series. It is one of the finest low priced communications type receivers available. Tuning range from 540 kc to 43 mc (550 to 7 meters) in four steps. 6 tubes are used in the superhet circuit including: 6K8G osc. mixer, 6SK7 i.f. amplifier, 6Q7G 2nd det.-1st audio, 6K6G output, 6C5 BFO and 80 rectifier. Power output is 2 1/2 watts. For operation on 110-120 volts 50/60 cycles AC (socket on back for "B" battery and/or 6 volt supply). Circuit features include: separate electrical band-spread condenser, ceramic coil forms for oscillator stability, built-in Jensen 6 1/2" dynamic speaker, permeability type of BFO, iron-core i.f. coils, copper plated chassis, silver plated shielding illuminated slide-rule dial, band use indicator, electrical band-spread dial, send-receive stand-by switch, audio gain control, BFO pitch control. NATIONAL RECEIVERS

MODEL NC-44

Model NC-44 is National's response to the demand for a communications type receiver capable of fine performance on A.C. or D.C.—and at a low price. Completely self contained except for the speaker, it employs seven tubes in a modern superheterodyne circuit. Uses a 6K8 first detector and oscillator having exceptional stability and conversion gain. Other features include: two 456 kc i.f. stages; 2nd detector and AVC tube; CW oscillator and a 25L6G "beam-power" output tube that provides 2 watts of audio. Separate controls for r.f. and a.f. gain; "on-off" switches for AVC and CWO circuits. Accurate tuning is insured by the use of a full vision dial calibrated in frequency for each range covered; separate linear scale for the band spread condenser. A straight line frequency condenser is used in conjunction with a separate band-spread condenser. Both condensers have inertia type drive. Coil switch has silver plated contacts and selects any one of 4 ranges, covering from 550 kc to 30 mc. Provisions for headphone operation. In black crackle finish metal cabinet, 8 3/4" H, 17" W, 10 3/4" deep. For 110 volts 50/60 cycles a.c. or d.c. Shpg. wt. 45 lbs.

K21259 — NC-44A. Identical with NC-44 described above, but for straight 110 volt, 50/60 cycles A.C. operation. Recommended wherever 110 volts 50/60 cycles A.C. is available. **CASH PRICE \$49.50**

Terms: \$4.95 down; \$5.90 per month for 8 months. Both models NC-44 and NC-44A can be supplied finished in grey crackle on special order at same price.

NC100-A-100-XA

11-tube communications type superhet covering the tuning range 540 kc to 30 mc (555 to 10 meters). One stage of r.f.; two i.f. used. Each has self-contained power supply; includes speaker field excitation. Low loss insulation and Hi-Q coils for ample sensitivity and selectivity. Unique range changing system combines convenience of coil switch with electrical efficiency of plug-in coils. Large full vision dial calibrated directly in megacycles and a separate high speed vernier dial for high precision in logging. The NC-100XA is identical with the NC-100A except for the addition of a built-in crystal filter. Both models use an effective noise limiter. Both in black crackle finish metal cabinets, 17x10 1/2 x 11 1/2".

K21256 — NC100A—Complete with all tubes and 10-inch speaker in cabinet. **CASH PRICE \$120.00**

Terms: \$12.00 down; \$9.54 per month for 12 months.

MODEL NC-200

This new National communications type receiver contains new features not previously available in any receiver regardless of price. Using a 12-tube superhet circuit that is inherently stable with all components operated well below their normal ratings insures long life and trouble-free operation. Tubes used: 6SK7 r.f. preselector; 6K8 1st det.; 6J5 h.f. oscillator; 6SK7 1st i.f.; 6SK7 2nd i.f.; 6C8G 2nd det.-limiter; 6SJ7 AVC; 6SJ7 8FO; 6F8G phase inverter; 2-6V6 push-pull audio and 5Y3G rectifier. Outstanding feature is the new tuning and band-switching arrangement having TEN accurately calibrated ranges each with its individual dial scale. Six ranges cover 490 kc to 30 mc continuously, covering the 500 kc marine frequencies. 4 band-spread ranges for the ham 10, 20, 40 and 80 meter bands are spread out over the major portion of the scale. Range indicator system being part of the dial indicates band in use. Same knob used for tuning and band selection, 30:1 ratio. Highly sensitive, 1 microvolt input provides 1 watt audio. Polystyrene coil forms in all circuits. Signal to image ratio better than 30 db at 10 meters. New h.f. oscillator design makes for high stability. Temperature compensating condensers reduces frequency drift to minimum. Utilizes new crystal filter has selectivity adjustable in 6 steps. Phasing circuit provides rejection ratios as high as 10,000 to 1. Calibrated signal strength meter. Special socket and plug for emergency or portable battery operation. In metal cabinet, 19 1/2 x 10 1/2 x 12 1/4" with speaker in matching cabinet, 15 1/2 x 10 1/2 x 9 3/4". With all tubes and xtal filter. Wt. 107 lbs.

Terms: \$14.75 down; \$11.72 month for 12 months.

NATIONAL HRO

World's finest communications receiver, complete with de luxe relay rock, power supply, speaker and spare coil cabinet, in a single unit for table or desk use. Chrome strips between units and speaker grille coincide with other new, streamlined features. Standard model includes all coils for continuous range of 1.7 to 30 mc. Same coils, by simple switching method, may be used for band-spread on amateur bands, providing nearly 12-feet of dial space for each band. Low-drift oscillator and extremely favorable signal to noise ratio provide constant signal level. 2 stages of tuned r.f. provide exceptional sensitivity and image rejection ratio. Lamb type xtal filter circuit. AVC and manual control. V.T. voltmeter calibrated in "S" units. Phone or loudspeaker operation. Finished in black leatherette enamel.

FREQUENCY MODULATION RECEIVERS

MEISSNER Frequency Modulation Receptor 12 Tubes—Complete with Audio System and 8" Speaker May be Used with External Audio System and Speaker

Constructed with all the precision and scientific accuracy inherent in the Meissner name, this new 12-tube F.M. receptor is complete in a handsome table model cabinet with 8-inch high-fidelity speaker and its own audio system. It may be used as is, or in conjunction with any good audio amplifier and speaker system. A jack located in the rear of cabinet throws the audio system and speaker out of circuit when plugged in for F.M. receptor to operate through an external audio amplifier and speaker system. Frequency range covers 42 to 50 megacycles which covers current and proposed F.M. transmitting stations. A double electron ray tuning eye is provided to facilitate tuning exactly to the center of the average frequency of the received carrier. Unusual features of the circuit and mechanical design include: minimizing of frequency drift by use of ceramic insulated sockets, coil forms and tuning condensers; temperature compensating condenser; steady voltage regardless of changes in line voltage by means of the V-150 voltage regulator tube. The audio system features negative feedback for high gain with minimum distortion. R.F. stage employs a television amplifier tube to insure maximum sensitivity, signal to noise and signal to image ratio. Air tuned discriminator transformer insures freedom from distortion. Tube complement: 1B52 r.f. amplifier, 6SA7 converter, VR-150 voltage regulator, 2-6SK7 i.f. amplifiers, 1B52 limiter, 6H6 detector, 6SC7 cathode ray amplifier, 6AD6G "eye", 6C5 first audio, 6L6G "beam-power" output and 1-5U4G rectifier.

The Receptor is housed in a beautifully grained two-tone walnut cabinet containing a high-fidelity 8-inch speaker. Cabinet measures 12 1/4" high, 22 3/4" wide and 11" deep. Supplied with special shielded cable when used with external amplifier and speaker. For operation on 110 volts 50/60 cycles a.c. Shpg. wt. 35 lbs. List Price \$99.25.

Meissner AMATEUR GEAR

NEW! Uni-Signal Selector

For noiseless CW reception! Combines the principles of electrical, mechanical and acoustical resonance into a unit that serves as both filter and loudspeaker. Rejects static and electrical noises almost in their entirety. Actuated only by a sustained audio frequency as furnished by

a radio telegraph signal.

The Meissner Uni-Signal Selector is peaked at 1000 cycles and has a band width of 25 to 40 cycles. Isolates and makes readable weak CW signals that are otherwise completely blanketed by strong signals. This without loss of strength of the desired signal. Operates only within its bandwidth and cannot be blocked by strong non-resonant signals. Weak signal sensitivity slightly greater than standard dynamic speakers. Power output approximately 1 watt. Connects directly to receiver output of 4000 to 5000 ohms. Requires no power. Equipped with cut-over switch and speaker terminals. Special stethoscopic type headphones available. Dim.: 9 7/8" x 6 1/2" h. Shpg. wt. 6 lbs.

NEW! Signal Resonator

The most sensational device in amateur history! How would you like to have a transmitter completely controlled by a single knob? One that would automatically change band and automatically tune to resonance on several desired frequencies in each band? A transmitter that could be either crystal or ECO controlled, and, when used with an ECO, could be instantaneously operated on any frequency in five amateur bands. A transmitter controlled entirely by a single knob? Believe it or not we are talking about your transmitter—the one you are using now! Regardless of power or the number of stages you can make your transmitter a single control unit. You can eliminate all individual tuning controls, band switch levers, crystal selector knobs and antenna tuning controls. The Signal Resonator will automatically tune as many as 5 stages. It provides 110 distinct and automatic tuning functions, and is manually controlled by a single knob. A separate "gear switch" locks the transmitter on frequency. Faster in action than a band switched receiver. Precision built, fool-proof and positive in action. Dim.: 19w.x8 1/2h.x5d". Wt. 20 lbs.

Signal Splicer

A simple device for use with any receiver that enables you to obtain a considerable increase in signal strength without increasing the noise as well. Experienced amateurs know that an antenna even slightly mismatched to their transmitter causes a tremendous loss in power. The same thing holds true with respect to matching the antenna to the receiver. An accurate match between the two brings up signal strength amazingly and reduces noise considerably. The Signal-Splicer will provide this match between your receiver and any type of aerial. Complete with 1 set of coils and instructions.

5-10 M. Converter

Covers 5 and 10 meter (28-30 and 56-60 mc) bands on a two band dial scale 7/4" long. Uses 1852 r.f., 6F6 osc., 1852 mixer, VR-150 voltage regulator and 6X5 rect. Provides an average gain of 20 db. Output impedance will match average receiver input. Can be used with any amateur band or standard multi-band receiver. Manual gain control provided. Changeover position on range switch permits connecting antenna to converter or receiver without turning converter off. Cabinet 11 1/2" x 11 1/2" x 9". For 100 volts 50/60 cycles a.c. With tubes. Shpg. wt. 23 lbs.

BROWNING Frequency Monitor

For accurately checking transmitter and received frequencies both visually and audibly. Employs an extremely stable 100-1000 kc oscillator as standard. This can be checked against WWV. 3 additional separate oscillators are employed for covering the six amateur bands. Fundamentals of these are: 1.7-2 mc for 160 and 80-meter bands; 7-7.5 mc for 40, 10 and 5-meter bands, and 7-7.2 mc for the 20-meter band. Accuracy greater than 2 parts in 10,000. Complete band spread. No gears. Direct reading. Reads to 2 kc on 20 M. band. Visual deviation indicator. Built-in mixing circuit. 5 1/2" dial—240° scale. Self-powered for both a.c. and d.c. 110 V. Dim.: 14x7x6". Gray finish. Wt. 13 lbs. List \$66.50.

BROWNING Converter

Compact converter, measuring only 4x6 1/4x4 1/2", makes any broadcast receiver (auto or home) into an efficient 5 and 10 meter receiver. Power for operation can be supplied by most receivers: .45 amp. at 6 V. and 10 ma. at 250 V. Rubber-cushioned mounting bracket and shielded leads supplied for dashboard mounting and connection to auto radio. Has separate coils for antenna and oscillator circuits for both 5 and 10 meters. Band switching. Antenna throw-over switch. All coils air-frimmed and air-tuned. Voltage stabilized. Shpg. wt. 8 lbs. Complete with tubes.

"HQ-120X"

An ultra-modern 12-tube superheterodyne designed to meet the most critical demands of both the amateur and professional operator. This communications receiver covers a continuous range of from 31 to .54 mc. (9.7 to 555 meters) in 6 steps, including all important communication, amateur and broadcast bands. Features newly developed crystal filter circuit, variable in six steps from full band width to razor-edge selectivity, plus phasing control; "S" meter for measuring signal strength; Noise Limiter circuit; Antenna Compensator, permitting perfect matching to various types of antennae; Drift-corrected oscillator circuit; AVC; Beat Oscillator; Send-Receive switch; Phone Jack; Relay Terminals; Band-Spread for each band from 10-80 meters covering 310 degrees. Employs permeability-tuned I.F. transformers, for extreme sensitivity. Size: 17½x10x12½".

KZ1011—New HQ-120-X Model (includes crystal for crystal filter circuit, with speaker and tubes. Wt. 61 lbs. **Cash Price \$138.00**

Transmitter Foundation Kits

"Hams" everywhere are expressing their enthusiasm over the new HAMMARLUND method of transmitter construction. It is no longer necessary to build complicated bulky apparatus. These new transmitter foundation units eliminate the usual chassis with its difficult drilling and machining. They are so simple to assemble that even the most inexperienced person can build a neat, professional appearing and performing transmitter. All brackets are completely drilled and shaped to fit standard parts.

"PA-300" Amplifier

For a low (809's, T-20's, 10's, etc.) or a medium power (808's, RK37's, T55's, etc.) transmitter. Plate condenser has .070" spacing permitting 2000 volts. Assembled size: 13x8½x8".

K9010—Complete Parts Kit including hardware kit, 1—MTC-100-B, 1—MTC-100-C, 2—N-10 condensers, 1—CH-500 choke, 2—S-4, 1—S-5 sockets, 4—SWF-5 coil forms. With instructions. Shpg. wt. 6 lbs. **Your Cost \$16.77**

"OD-10" Oscillator-Doubler

Standard TriTet oscillator-doubler. Used as low power transmitter or with "BD-40" and "PA-300" units. Size: 8½x7½x3¼".

K9014—Complete Parts Kit including hardware kit, 2—MTC-100C condensers, 2—S-4, 1—X-S-2 and 1—S-8 sockets, 1—CHX choke, 2—SWF-4 coil forms. Shpg. wt. 6 lbs. **Your Cost \$7.44**

K9013—Hardware Kit consisting of brackets, base plate, crystal mounting, screws, nuts, etc. List \$2.80. **Your Cost \$1.68**

"PA-150" Amplifier

Hammarlund's latest medium power foundation kit. Delivers up to 175 watts with pair of HK24's or similar tubes. Suitable for operation on 80, 40, 20 or 10 meters. Voltages up to 1000 volts can be used with plate modulation, or to 2000 volts unmodulated. Little more than 10 watts excitation required. Size: 11½x8x5½". Instructions supplied.

K7245—Complete Parts Kit including hardware kit, 2-HFBD-100C condensers, 1 CH-250 Choke, 3 sockets, 2-N-10 neut. conds., 2-SOS-250 insul., 6-SOS-100 insul. With instructions. Shpg. wt. 8 lbs. **Your Cost \$14.28**

AMPHENOL "912-B" Sheets

"912-B" is a strong, water clear, flexible material especially developed for use as the dielectric in condensers, transformers, etc. It retains its flexibility on exposure to extreme variations in temperature and humidity. Absorbs very little moisture, even when immersed in water; water content is only 0.8%. Does not deteriorate with age. Will not discolor. Can be cut, drilled, machined, cemented, etc. Can be shaped when heated.

Taylor Tubes

The amateurs favorite line of tubes. Noted for the fact that they give "More Watts Per Dollar". They are carefully engineered and are built of the finest materials to give long and satisfactory service. They are conservatively rated and fully dependable. Despite their advanced engineering and their unquestionable quality, however, they are exceptionally low in price—a real advantage to the amateur who must watch his pennies—yet insists on quality.

BUD COILS

Air-Wound X'mitting Coils

Air-wound coils with both fixed-link and variable-link types available. Coils are center tapped. Helical wound links. Variable link type can be fitted with 1/4" shaft extension for panel control. Capacities indicated below are values required to resonate coil at lowest frequency in band. Coils are wound with enameled copper wire, are self supporting and held in place with fire-resistant locking strips. Mounting bars are of Alsimag 196. Distance between outside plug centers: 150 watt 3 1/2"; 500 watt 5". Variable link mounting bases are fitted with link-link coils do not come with the coils but with the bases. Shpg. wt. approx. 4 lbs.

K14027—Single Set. **\$1.62**

Your Cost

Model 321 Senior Key

Heavy duty hand key with $\frac{1}{2}$ " pure silver contacts. Navy type knob. Die cast chrome plated base and key arm. Adjustable brass bearings; concealed brass connector strip. Shpg. wt. 2 lbs.

K14039—Your Cost **\$2.06**

Model 300 Practice Key

Has two adjustments. Base of molded bakelite. $\frac{1}{2}$ " coin silver contacts. Machined parts finished in bright nickel plate. Wt. 1 lb.

K14041—Your Cost **88c**

Model 310 Manual Key

Heavy die-cast metal base finished in black wrinkle enamel. Smooth adjustable bearings. $\frac{1}{2}$ " pure silver contacts. Has provisions for plugging in High-Speed keys. Shpg. wt. 1 lb.

K14051—Your Cost **\$1.47**

Like above, but with switch.

K14052—Your Cost **\$1.76**

Model 301 Ham Key

General purpose key with molded black bakelite base. Well insulated. Adjustable bearings. Nickle plated key arm. $\frac{1}{2}$ " silver contacts.

K14040—Your Cost **\$1.26**

As above, with switch

K14044—Your Cost **\$1.47**

Constant Tone Buzzer

Black bakelite base and cap. Silver contacts. Adjustment on vibrator. Resistance 2 ohms. Operates on 2-1 $\frac{1}{2}$ volt cells or "C" battery.

K14021—Your Cost **73c**

SIGNAL Amateur Key

Model R-50

Cast base black ripple finish.

Coin silver contacts. Parts are nickel plated. Easily adjustable. Shpg. wt. 1 lb.

K14009—Your Cost **88c**

SIGNAL Model R-68

Code Practice Set

Comprises a key and a high frequency buzzer mounted on a polished hardwood base. Hook battery to terminals (1 $\frac{1}{2}$ volt cell required, not supplied) and it is ready to operate. Metal code plate on base. Shpg. wt. 2 lbs.

K14001—Your Cost **\$2.00**

Type R-60 BUZZER ONLY: Fully adjustable. Has standard resistance of 2 ohms. Black crystal lacquer finish. List \$1.25.

K14006—Your Cost **73c**

SIGNAL Key With Switch

A telegraph key with a switch to close the contacts. Polished lacquered brass base. Key and switch lever nickle. Shpg. wt. 1 lb.

K14017—Your Cost **\$1.75**

K14005—Less Switch. **\$1.65**

G.L. Automatic Tape

The ideal way to practice code. The unit is compact, easy to operate and highly accurate. Blank

tape is spaced and punched, then run through the sender at speeds from 10 to 60 words per minute. Speed controlled by a cone with adjustable friction drive. For 110-120 volts a.c. With cord and plug. Aluminum housing 5x5x3". With practice tape and 5 blank rolls of tape. Shipped Postpaid in U.S.A.

K14022—Mod. J. **\$12.50**

K14023—1000-Ft. Roll Tape. **\$1.00**

BUD Code Practice Oscillator

Has built in Monitor Speaker. For individual or group practice. Comprises audio oscillator and dynamic speaker in single metal case. Front panel has A.C. switch, key jack and audio pitch selector (high and low). Provision on back of unit for plugging in additional key and speaker for two-way code practice. Additional speaker (listed below) can be plugged in directly—no output transformer needed. Finished in grey crackle. Shpg. wt. 4 lbs.

K14111—Your Cost, With Tube **\$7.79**

K14016—Extra Speaker in case. Wt. 2 lbs. **\$1.86**

GUARDIAN Relays

Mounted on bakelite base. Pure silver contacts. Powerful magnet coil and return spring assures clean make and break. Model X-100 Adjustable Overload Relay: opens the 110-volt input when plate current exceeds any value from 150 to 650 ma. Hand reset—does not make contact until handle is released. Re-set button extends through panel. Shpg. wt. 1 lb.

TRANSMITTING CRYSTALS & RELAYS

Type SMC-100

Provides a simple means for checking the calibration of receivers, oscillators and ham monitors. Oscillates at

100 kc. (with allowance for room temperature compensation), and 1000 kc. (.05%) by switching proper tank coil in circuit. Instructions included.

K13523—Your Cost. \$7.75

BLILEY "I.F." Crystals

Mounted crystals for use in 1st i.f. stage of short wave receivers. No spurious responses within 7 kc. of fundamental. Complete with Steatite holder.

K13516—456 kc. \$5.50
K13517—465 kc. \$5.50
K13510—1600 kc. \$9.50

Crystal Sockets

Easy-to-mount low-loss x'tal sockets. Take standard holders and can be mounted above or below chassis surface. Available in Polystyrene or in Steatite. Lug terminals.

Stock No.	Insulation	Each
K8050	Steatite	25c

BLILEY Mounted Crystals

BC3 Crystal Unit

Economically priced crystal units for 40, 80, and 160 meter ham bands. Powerful oscillator. Freq. drift only 23 cycles/Mc./°C. One-piece Bakelite holder fits standard 5-prong socket. Specify frequency desired and tolerance for 40 or 80 meters.

K13531—BC3 mounted crystal. Within 5 kc. of specified frequency; 40 or 80 meter band. \$3.35 Your Cost.

K13529—Exact integral 4.95 kc. Your Cost.

K13532—BC3 mounted xtal for 160 meters, within 10 kc. of specified frequency. \$3.35 Your Cost.

Type B5

A low drift crystal for 40 and 20 meter bands. Accurately calibrated. Less than 4 cycles/Mc./°C drift. 40 meter unit has a high activity. Mounted in a low loss holder.

Stock No.	Freq. in Mc.	Freq. Within	Your Cost
K13546	7.0-7.3	5 Kc.	\$4.80
K13547	7.0-7.3	Exact	5.90

K13549	14.4-15.0	30 Kc.	7.50

VF-1 Crystal Unit Variable Frequency

Merely by twisting the control knob you can shift frequency to avoid QRM. Has drift not exceeding (±) 4 cycles/Mc./°C.

Allows approximately 6 Kc. variation on 80 meters and 12 Kc. on 40 meters.

Stock No.	Band	Min. Freq.	Your Cost
K13493	80 M.	5 Kc.	56.60

K13539	40 M.	5 Kc.	8.50

Type HF2

Mounted, precision crystal for 10 and 20 meter bands; offers control for 2½, 5, 10 and 20 meters.

K13507—14.0-14.4 Mc. drift 20 cycles/Mc./°C., within 15 kc. of specified frequency.

K13508—14.4-15.0 Mc., drift 20 cycles/Mc./°C., within 30 kc. of specified frequency.

K13509—28.0-30.0 Mc., drift 43 cycles/Mc./°C., within 50 kc. of specified frequency. \$5.75 Any Type, Each.

Type LD2

A rugged low-drift crystal for the 80 and 160 meter bands. Frequency drift is less than 4 cycles/Mc./°C. Mounted in Bakelite holder. Specify frequency desired.

K13585—Within 5 kc. of specified frequency. \$4.80 Your Cost.

K13494—Exact integral kc. \$5.90 Your Cost.

BLILEY Manual

A complete handbook on quartz crystal frequency control. 31 pages.

K20029—Your Cost. 10c

ALLIED CONTROL RELAYS

Type "PC"

Plate circuit type—excellent for photo-cell, amplifier, transmitter, and similar applications. 2500 ohm model can be adjusted to pull-in at from 6 to 8 ma. and drop out at 3 to 5 ma. Contact rating: 5 amps. of non-inductive a.c. (not to exceed 10 operations per minute at maximum rating; speed can be increased with smaller loads). Contacts, fine silver. Insulated bracket—cadmium plated.

Stock No. Coil Voltage Each

"Linear Standard" Audios

A line of shielded highest fidelity audio transformers featuring input coils that have **lowest hum pick-up of any available**, wide range frequency response (within plus or minus 1 db. from 30 to 20,000 c.p.s.), thorough shielding and dependability. Used extensively by broadcast stations. Housed in alloy cases that have threaded 4-hole terminals for mounting (top or bottom). Telephone black enamel finish. Overall dimensions: **A**—2 1/4"x3 1/4"x3 1/4"; **B**—3 1/4"x4 3/4"x4 3/4"; **C**—5x5 1/4"x5 1/4"; **D**—6 1/4"x6 1/4"x5 1/4".

Line Matching Units

Varimatch Modulation Transformers

Match Any Modulator Tube To Any R.F. Load

Here's the answer to your modulation problem—a new line of transformers providing a universal range of load impedances for any modulator combination. The VARIMATCH transformer can never become obsolete. All units carry Class C current and have charts giving impedance combinations.

Automatic Voltage Regulators

Entirely NEW (patent pending). No moving parts, effects instant correction of line voltage variations. Output constant within 1% (110, 115 or 120 volts); input can vary between 95 and 130 volts (60 cycles a.c. only). Highly accurate, high power factor, low distortion. Fully shielded. With cord and plug.

MIKE CABLE TRANSFORMERS

Ruggedly constructed; designed to be inserted in cable circuit within 25 ft. of amplifier. 1 1/2" dia., 2 1/2" long. With spring tension relief (no cable supplied). Shipping weight, each, 1 lb.

K5972—Type MC-1. Primary tapped at 80/50 and 200/250 ohms. Secondary to grid. Standard fidelity. Shipping weight 1 lb.

Your Cost \$4.41 Each

K5973—Type MC-2. Same as MC-1, but high fidelity.

Your Cost \$5.88

K5974—Type MC-3. Crystal Mike to 50/200 ohm line.

Your Cost Each \$5.88

UTC Replacement Transformers UTC

VARITAP All-Purpose Power X'formers

Replacement power transformers featuring flexibility of application. Each unit can be used to replace several different types of transformers now in use, so that a minimum stock is required to cover all demands. Type A units feature universal mounting. Leads are brought out through a single insulated opening, and units can be mounted upright, flush or on one side, as desired; universal flanges supplied. Type B units are standard vertical shielded transformers with long insulated leads. Type C units are for flush mounting and have lug terminals with windings marked. All coils are vacuum impregnated. Black eggshell enamel finish.

Fl. #1 and Fl. #2 provides either ONE of the voltages shown

Standard VARITRAN Voltage Controls

The VARITRAN is an ideal voltage control unit of the type employing a sliding contact riding over the transformer turns. They provide continuously variable output voltages **FROM 0 TO 130 VOLTS** without interruption of the circuit. Used extensively to control lights, line voltage, rectifiers, motors, transmitters, etc. Type V-1 (illustrated) is completely shielded and includes cord, plug, and switch. Other units are completely shielded and have screw terminals on an insulated strip. All units shown below for 115 volt input.

NEW! Tropic Sealed Channel Frame Audios

An excellently designed series of channel frame TROPICAL WETPROOF audios. In addition to good frequency response, coils are vacuum-pressure treated followed by the UTC MOULD SEAL process of WET PROOFING to prevent moisture absorption. All have black enamel finish, and have long insulated leads. Average shpg. wt., each 2 lbs.

VARITAP Universal Mounting Audio Transformers

VARITAP audios represent the acme in replacement transformer development. The double shells and universal mounting brackets are finished in high lustre black. All mounting positions incorporate long slots for maximum flexibility. All coils are well shielded, and have tropical wetproof impregnation. Dimensions: Type A—2x2 3/4x1 3/4". Type B—3x2 1/2x2 3/4". Shpg. wt. each, 3 lbs.

Universal VARITRANS

Similar to the standard Varitrans, but extremely flexible in operation. Various connections of the 8 terminals provide for: **line voltage control**—115 volts out with 90 to 140 volts in or 220 volts out with 197 to 243 volts in; **low voltage output for trains, etc.**, 0 to 28 volts out with 115 or 220 volts in; **stepdown or stepup**, 115 to 220 volts or 220 to 115 volts; **rotary converter service**, constant 115 volt output from 55 to 80 volt input.

Trutest POWER TRANSFORMERS

SERVICE OVER 90% OF ALL STANDARD RECEIVERS

Trutest Power Transformers, engineered by experts and constructed of the finest materials, truly deserve the popularity accorded them in the service field. Each unit is designed to provide ample safety factor under any normal conditions of use. As a result, Trutest Power Transformers are fully guaranteed, under R.M.A. Standards, for a period of 90 days, against mechanical or electrical defects.

This is your assurance that Trutest transformers will live up to the claims made for them. To simplify installation, and to preclude any possibility of error in wiring, each unit is furnished with a schematic diagram showing terminal connections. All Trutest transformers have 105-115 volt, 50-60 cycle primaries. All filament secondaries are center-tapped. All employ insulation tested at 1500 volts.

Special Value! 4-5 Tube Transformer

Here's a real low price on a fully shielded (top and bottom shells) transformer for 6.3 volt tubes. Provided with insulated leads. High voltage secondary delivers 650 volts c.t. at 40 ma.; 5 volts at 2 amps. (rect.) and 6.3 volts at 1.6 amps. (heaters). Mounting area 2 1/2 x 2". Shpg. wt. 4 lbs. **K1941—Each 85¢**

Fully Shielded Transformers for New Type Sets Using PM Speakers

Deliver lower plate voltage than required by sets using field coil speakers. Fully shielded, upright mtg., with leads. Primaries for 110 volts 60 cycles a.c. only. **K1938**—High volt. sec.: 240-0-240 volts at 40 ma.; 5 volts at 2 amps.; 6.3 volts c.t. at 1.6 amps. 2 1/2 x 3 1/4". Wt. 3 lbs. **Your Cost Each 96¢** **K1939**—High volt. sec.: 260-0-260 volts at 60 ma.; 5 volts at 2 amps.; 6.3 volts c.t. at 2 amps. 2 1/2 x 3 1/4". 250 Watts	4 1/2 x 3 1/2 x 4 1/4" high.	8 lbs.	\$3.75

Line Regulating Auto Transformer

Corrects abnormal line voltage conditions. The switch on the unit permits maintaining output at 115 volts even though line may vary between 95 and 130 volts. Input tapped in 5-volt steps from 95 to 130 volts. Maximum capacity 2 amps. In black metal housing with 6-ft. line cord and output receptacle. 4 1/2 x 2 1/2 x 3 1/2" high. **K1972—Shpg. wt. 5 lbs. \$2.95 Each**

Auto transformer only: Like above, less case, switch, line cord and socket. For mounting in equipment. Ideal for service testing. **K1973—Shpg. wt. 5 lbs. \$2.06 Each**

Trutest ALL PURPOSE Audio Components

Trutest Standard Replacement Audio and Output Transformers

This line of Trutest audio components is exceptionally complete. They are not to be confused with inferior types which are built to a price rather than a quality standard. All Trutest audio transformers are constructed using a high grade of silicon steel for core material. Coils are wound with unalloyed copper wire of the proper gauge for each particular application. Insulation is tested at 1250 volts a.c. Average size of units is 3 1/4" long, 2" high, 1 1/2" deep; mounting centers 2 1/4". Average shpg. wt. 3 lbs.

Universal Output X'former

Accurately matches practically any speaker voice coil to any single or push-pull output tubes either triode or pentode in either class A or B. Can also be used to match magnetic speakers. Has a very cleverly designed universal mounting bracket that permits mounting the transformer in almost every conceivable position. Provides for mounting centers from 1/2" to 2". Overall dimensions: 1 1/4" x 1 1/2" x 3 1/4". Shpg. wt. 1 lb. **69°**

R.C.A. Universal Output

Matches any single or p.p. output tubes to any voice coil of from 1 to 15 ohms. Primary impedance 1000 to 20,000 ohms. Response flat from 30 to 10,000 cps. 2 3/4" x 2 1/4" x 2". Baked varnish insulation. Lug terminals. Wt. 3 lbs. **K5536**—Your Cost **\$1.18**
Same as above but shielded in cadmium plated case with lakelite terminal board. **K5537**—Your Cost **\$1.39**

Servicemans Special

P.P. Input Transformer

A type of transformer that you are called upon to replace more often than any other. A real high quality unit. Ratio 3:1. High voltage insulation. 3x2 1/2" x 2 1/2". Shpg. wt. 2 lbs. **K1543**—Your Cost Each **45°**

Strap Mounting Universal Outputs

- Small: 3 1/2 to 6" Speakers
- Medium: 6 to 8" Speakers
- Large: 8 to 12" Speakers

A series of strap mounting Universal Output Transformers that will match practically any single or push-pull output tubes to any standard voice coil. Each unit has been especially designed to obtain the utmost in performance from the speaker size for which it is intended. Complete instructions furnished with each transformer.

In the listing on this page, only the most popular replacement a.c.-d.c. electrolytic condensers are shown. However, we can supply any standard unit at the lowest net price. When ordering, be sure to specify make of set, model number and part number if possible, or send the defective unit to us for duplication.

Type FP "Fabricated Plate" Metal Cased Dry Electrolytics

New, exclusive Mallory development—now being used extensively by the large radio set manufacturers. Features: compact size; round aluminum cans with lug terminals (coded); improved power factor for better filtering; long-life; new, improved sealing prevents deterioration due to heat or humidity—yet condenser will vent under overload.

CORNELL DUBILIER

"EY" Wet Electrolytics

Have high scintillation point and are mechanically and electrically perfect units. Vented to allow generated gas to escape harmlessly, these self-healing units have remarkably long life and fine filtering efficiency. Possess a certain amount of self-regulating properties. With mounting palnut.

"BLUE BEAVER" Type BR Dry Electrolytics

Extremely small and very handy to use. Feature: **Electro-Chemical etching** that eliminates corrosion; **Hi-Formation Process** that affords higher voltage breakdown; **Hi-Pressure Centrifuge** that provides better impregnation and gives a lower power factor; **Hi-Purity Aluminum Foil** that makes for better direct current leakage recovery; **Special C-D Super-Purity Cellulose Separator** that gives extra long life; **Rigid chemical purity control** that assures uniform performance; **Double ageing** that provides more stable characteristics.

Type "UP" Dry Electrolytics

The type UP construction represents the smallest physical size of metallic cans into which any capacity and voltage combination can be supplied and single, dual, triple and quadruple capacity combinations are available. Seamless drawn aluminum cans are fitted with a molded bakelite terminal block. Terminals are lead coated steel lugs which are moulded right into the block. Block is gasket sealed into the can and fitted with a positive quick-acting vent. Projected tongue mountings are provided for mounting cans directly to the chassis. Bakelite plates available for insulated mounting.

Type EZ Dual Cardboard Tubular Units

An especially popular type capacitor for radio servicing where low cost replacements are required. Designed with mounting feet for upright mounting to replace in inverted can types, spade-lug units, or may be mounted beneath chassis by means of center mounting strap. Unused mounting easily removed by cutting pliers. Completely sealed moisture-proof cardboard casings, special wax compound filling. Provided with insulated wire leads six inches long. Capacities, voltages and color code of wire leads stamped on each unit.

SPRAGUE "KOOLOHM" Resistors

- Guaranteed 5% Accuracy
- New Type of Coating
- With "Teledot" Indicator
- No Shorted Turns

EXCLUSIVE

Employ new type, completely insulated resistance wire. Insulation has high dielectric strength, withstands red heat, is impervious to moisture and conducts heat rapidly. Units are encased in tubular ceramic shells which permit mounting in contact with metal parts without shorting. A red "Teledot" on one end of unit acts as overload indicator, turning brown at 25% or more overload and resuming its red color when overload is removed. Accuracy guaranteed $\pm 5\%$. Non-inductive types show zero inductance up to 50 mc, and distributed capacitance is only 2 mmf. All have pigtail wire leads.

Trutest R.M.A. Coded Carbon Resistors

Trutest 2-Watt Carbon Resistors

Heavy-duty carbon resistors, absolutely moisture proof. RMA color coded for easy identification; made of the finest material and workmanship. **Guaranteed accuracy, 1% plus or minus.** The average are within 5%. Resistance values will not vary at normal voltage. Ideal for replacement across small voltage divider sections, bleeders, etc. Also, for public address amplifiers or for test instrument replacement. Size 2" L. x 1/2" O.D.

Trutest INSULATED 1/2 & 1 Watt Carbon Resistors

- ★ Molded Insulated Outer Shells
- ★ Withstand Heat, Moisture and Mechanical Tension
- ★ Low Drift.

Improved, finer carbon resistors, with heavy molded insulating shells which make them impervious to moisture, heat and mechanical strain. **Guaranteed accuracy 10%;** average 5%. Ideal for congested wiring of receivers. Insulation permits resistors to touch each other without shorting. Top illustration shows internal construction. Half-watt units 1/2"x1/4" dia. One-watt units 1/2"x1/2" dia. RMA color-coded.

Wire-Wound Variables

Preferred by servicemen and amateurs. Dissipate heat rapidly, withstand heavy overloads, have great mechanical strength. All (except 10 watt units) are supplied with a NEW highly improved contact band that has a stainless steel spring spot-welded to it. The spring carries a silver contact button on which

the pressure never varies—no torn resistance wire, no corroded contacts. Band is threaded so that no nut is required for the bolt. Mounting brackets furnished with all but the 10-watt units.

Check this list with information given with each unit. Specify resistance desired.

VOLUME CONTROLS

NOTE: The listing below, due to space limitations, includes only such Yaxley, IRC and Centralab volume controls as are most often used in the most popular sets. Our stock includes the complete lines of these manufacturers and any volume control will be supplied at 40 and 2% discount from manufacturer's list price.
* Asterisk denotes original volume control is supplied with switch which replacement does not include. Switch should be ordered separately when ordering replacement volume control.

Centralab Midget and Standard Volume Controls

Standard Size

Noted for their long noiseless life these famous controls employ a patented non-wearing contact arrangement. A highly polished metal band is pressed into contact with the resistance strip by the rotating arm.

Contact between the arm and the band is by means of an oil-treated wood button that is absolutely noiseless and perfectly smooth in operation. Control dimensions: Diameter— $1\frac{3}{8}$ "; Depth— $\frac{1}{2}$ "; Shaft length—3"; Diameter— $\frac{1}{4}$ "; Bushing diameter— $\frac{3}{8}$ ". Fluted milled shaft. Listing below includes CRL Guide numbers of controls less switch. With switch numbers are the same except for prefix number which is "62" in place of "72"; "52" in place of "70" and "99" in place of "79". These numbers are given for your convenience and to aid you in obtaining the exact control you need, as listed in CRL Guide. Tapers are indicated as follows:

UNIVERSAL VOLUME CONTROLS

The Yaxley Volume Controls listed on these pages can be used to service over 90% of all the radio receivers now in use. With comparatively few units the serviceman is enabled to meet practically all service requirements. Yaxley controls feature: (A) Minimum bias adjustment on all bias controls; (B) 3" aluminum alloy shaft which can be shortened by notching and breaking off; (C) Approved switch; (D) All completely shielded; (E) Knob adapter; (F) Extension bushing.

UNIVERSAL REPLACEMENT CONTROLS

Furnished with 3" aluminum shaft (milled) standard bushing, cover-plate, and where necessary, the adjustable bias plate.

Photo-Relay Control Units

For Homes, Stores, Offices and Factories. Easily Installed by Anyone.

The simple basic principle upon which these compact photo-relays operate—namely the interruption or diminution in intensity of a beam of light—can be adapted to so many purposes that it is impossible to list them all here. Perhaps the most popular applications are in stores to announce the entry of customers through an open doorway, in homes for burglary protection, as a safety device in connection with machinery, to start motors, turn valves on and off, counting, sorting, smoke control, etc. See listing below for a partial list of accessories available.

All of the units listed below are for operation from 110 volts. Types PR-1 and PR-4 are for AC and DC, others for AC only. Relay units are fitted with two standard outlets—one "on" with light beam interrupted—the second "off" with light beam on full. Will handle devices requiring up to 300 watts at AC, 100 watts DC. Power consumption of each unit is less than 20 watts.

Type PR-1. Operating range up to 15 ft. Requires PR-4 or similar light source. One stage of amplification. Dimensions: 5 3/4" x 4 1/2" x 1 3/4". Shpg. wt. 3 lbs. **\$8.82**

K15730—Complete with tubes. Your Cost \$8.82

Type PR-2. Operating range up to 50 ft. with PR-4 light source. Two stages amplification. 7 3/4" x 6 1/4" x 2 3/4". Wt. 4 lbs. **\$11.76**

K15731—Complete with tubes. Your Cost \$11.76

Type PR-3. Similar to PR-2 but with built-in light source. Must be used with reflecting mirror (Mirror not supplied). **\$14.20**

K15732—Complete with tubes. Your Cost \$14.20

Type PR-4. Light source for use with PR-1 and PR-2. Has tilting bracket. Dim.: 3 1/2" x 1 3/4" x 1 3/4". Shpg. wt. 2 lbs. **\$2.45**

K15733—Complete with bulb. Your Cost \$2.45

WORNER "Announcer"

At last a complete unit for general use in the home, store or office at a sensationally low price! Entirely self-contained and complete with reflecting mirror and external chime! Installed in a few minutes across passage ways, doors, windows, driveways, etc. Operates over distances up to 15 feet. Includes built-in power supply to operate the chime or any other 9 V. AC-operated warning device. Principle of operation is simple—a built-in light source projects a beam which is reflected by a mirror (furnished) back into the built-in photo-cell. Breaking this beam of light causes the chime to sound. For 110 V. 50/60 cycles AC. Steel case finished in grey wrinkle lacquer. Mounts anywhere. Size: 6 1/4" x 7 1/4" x 3". Shpg. wt. 7 lbs.

A top-quality Photo-Electric unit that can be used for a multitude of purposes. Announces customers as they enter a store, physician's patients as they come into the reception room, warns of movements in or about a baby's crib, safeguards valuable property, etc. Easily installed because it combines both light source and relay in a single unit. Light beam is reflected by a mirror and any break in the beam causes a relay to operate and connect the built-in power supply of 9 V. AC to a suitable alarm bell, chime, etc. Distance between unit and mirror can be up to 25 ft. Operates from any 115 V. 50/60 cycles AC power line. Can be installed by anyone in a short time; instructions furnished. Size: 4 1/2" x 5 x 7". Shpg. wt. 6 lbs. Supplied complete with mirror but without bell or chime.

Laboratory Tested Lafayette Kits

3-Tube AC Operated Short-Wave Kit

Here is a three-tube a.c. operated short-wave kit that is amazingly sensitive and will supply unusual volume. 4 short-wave coils are furnished in professional black crackle. Sturdy cadmium plated metal chassis is completely drilled and punched. Assembly and wiring are made exceptionally simple and the set can be in operation within a few hours after you start. Tubes used: 1-6J7, 1-6V6, 1-80 (rectifier). Kit is furnished complete with all necessary components, wire, hardware, dynamic speaker, and clear instructions. Designed especially for students, beginners and set constructors. For operation on 110 volts, 50/60 cycles a.c.

K20353—3-tube short-wave kit, complete, less tubes. Shpg. wt. 10 lbs. **\$8.75**

K10041—Set of Broadcast coils for above. **Your Cost** **65¢**

4-Tube AC-DC TRF Broadcast Receiver

An excellent performer and capable of operating on both a.c. and d.c. When completed it's a real handy and fine operating receiver. Highly selective; requires only an indoor antenna (supplied) for excellent reception. Extremely simple to build; all parts furnished. Chassis is punched for all necessary holes. Specially matched coils and condensers. Uses 1-39, 1-36, 1-38 and 1-1V (rectifier) tubes. Includes 5" magnetic speaker. Shpg. wt. 5 lbs.

K20353—Complete kit of parts, less cabinet and tubes. **\$4.95**

Your Cost **\$1.98**

K20351—Modern walnut finished wood cabinet, drilled for above kit. Size: 10x8 1/2 x 5 3/4". Shpg. wt. 3 lbs. **Your Cost** **\$1.98**

High-Fidelity Amplifier For Phono and P.A. Use

Designed by John T. Wilcox, well-known constructor of quality radio equipment. Will provide 10-12 watts of high fidelity amplification, unexcelled for phono, radio tuners, F.M. units, recorders and P.A. work. With tone control in off-position response is flat within 2 db (plus or minus) from 25 to 15000 c.p.s. on low gain channel. Normal output 10 watts undistorted, 12 watts peak. Kit is complete ready for wiring from foolproof pictorial and schematic diagrams and instructions. Requires: 1-80, 2-6V6G's, 1-6SC7, 1-6SJ7. Extremely simple to construct. Shpg. wt. 20 lbs. Less tubes.

K20367—**Your Cost, Complete** **\$13.50**

4-Tube AC Short-Wave Superhet Kit

Here's a real performer! Covers all important short-wave bands. Receives CW signals as well as

phone. High gain mixer-oscillator stage and regenerative 2nd detector make this 4-tube receiver as sensitive and powerful as many larger receivers. Attractive black crackle finish drilled panel and cadmium plated chassis. Unusually easy to build. Employs: 1-6A8, 1-6K7, 1-6F6, 1-80. Complete with all parts, dynamic speaker, instructions and necessary coils to cover 15-200 meters. Shpg. wt. 11 lbs.

K20357—4-Tube AC Superhet Kit, less tubes and cabinet. **\$13.95**

Your Cost

7-Tube Hi-Fi TRF Kit

A fine 7-tube receiver that will give excellent results. Tunes standard broadcast band. The TRF circuit used is similar to that used in modern high fidelity receivers. Tubes used: 2-6SK7, 1-6SJ7, 1-6SC7, 2-6G6G's and 1-5Y3 (rectifier). Kit is complete in every detail (except for tubes and speaker) and includes all necessary parts, screws, washers, nuts, brackets, lugs, pilot bulbs, hookup wire and solder. All are of fine quality. Any PM dynamic speaker may be used.

K20359—7-Tube Hi-Fi TRF kit, less tubes and speaker. Shpg. wt. 16 lbs. **\$9.95**

4-Tube Loop-Operated Battery Portable

Gives excellent reception wherever you are! At the beach—in the mountains, or on your boat—plays perfectly without aerial, ground or line current. Power delivered from self-contained batteries. Due to extremely low-drain tubes used battery life is much longer than with ordinary set. Delightfully easy to build from the clearly written instructions and diagrams. Employs 4 new low-drain tubes (use only 250 ma. for four): 1-A7GT, 1-N5CT, 1-H5GT, 1-Q5GT beam power output tube. Requires 1-1.5 V. "A" and 2-45-V. "B" batteries. Uses any type PM dynamic speaker. Matching transformer impedance required is 9000 ohms; the rated impedance of most universal transformers. This kit is the highly popular R277 "Popular Mechanics" kit.

Stable Compact—Wide Range

A new transformer in which the trimmer base and the coil form (dowel) are moulded in one piece. The use of a special plastic material permits holding dimensions to within .0005". Trimmers "floated" away from the base with an air-gap between the bottom plate and plastic base. Wide range. Compact in size; $1\frac{1}{4}$ " square by $2\frac{1}{4}$ " high. Litz wire. Double tuned. Aluminum shield can. Unaffected by temperature, humidity and vibration. Remarkably stable. Excellent for replacements or in new receivers.

Ferrocort (Iron Core) I.F. Transformers

For Servicemen who want to "pep up" old radio sets and give them more gain and selectivity than they had when new—also for experimenters who want high-gain I.F. systems with exceptionally good selectivity—Meissner Ferrocort (Iron Core) I.F.'s are just the thing. Double tuned with low-loss trimmers. Accurately made of the best materials and oscilloscope-tested for gain and selectivity. Mounted in $1\frac{1}{2}$ " square by $3\frac{1}{2}$ " high black crackle-finished cans. Leads are RMA-color-coded. Servicemen try installing a set of them in your next job and see how pleased your customer will be with the improved performance of his old radio.

NEW! "Cart-Wheel" I.F. Replacement

Same size and style of I.F. transformer as used in most of the \$9.95 midgets on the market such as RCA, Belmont, Emerson, etc. Trimmer base and supporting dowel made of molded plastic. Accurately wound coils. May be used as input or as output transformer. Designed for 456 kc. operation. Can be used as replacement or in new receiver construction. For under chassis mounting. Size: $1\frac{1}{2} \times 1\frac{1}{2} \times 1\frac{1}{2}$ ". **K10385—Your Cost Each 59¢**

De Luxe Air-Tuned Iron Core I.F. X'formers

High gain Ferrocort (iron core) I.F. transformers tuned with the famous "Align-Aire" air-tuned trimmers. Excellent for communications and other receivers where absolute stability is essential. Stable under any condition of temperature or humidity change. Dust proof cover. Non-microphonic. Air trimmers permit 3600 degrees of micrometer smooth tuning. Double tuned. Black crackle finished cans $2 \times 2 \times 1\frac{1}{4}$ ".

De Luxe Multi-Wave 5-Band Coil Assembly

For use in building all-wave receivers. Contains all coils, range switch, shunt trimmers, series padders, A.V.C. by-pass condensers and necessary shielding. Provides for high gain R.F. stage. Align-Aire (air) trimmers on all bands. Tunes with any 410 mfd. variable condenser. **K9992—5 Band Assembly—42 mc. to 132 kc. (7.1 to 2270 meters). List \$23.50. Your Cost \$13.82**

Dual Band Coils

Exceptionally efficient two-band coils for Broadcast and Short-Wave reception. Both bands wound on same bakelite form. Two mica-dielectric trimmers mounted in cans of shielded coils. For use with 365 mmf. condenser and 456 kc. i.f. channel. Can size: $1\frac{1}{2} \times 1\frac{1}{2} \times 3$ ". Cover 15.8-51.7 and 181-565 meters.

HOW TO ORDER

Use our convenient order blank (additional blanks sent on request). Please write in ink, legibly, and not more than ONE item to a line. Make sure you write the exact stock number and that the price is the one quoted for the item you want. Specify how we shall make shipment by checking the preferred square "Parcel Post", "Express", etc. We shall follow your instructions, but will change them wherever we are sure that such a change is to your better interest. Please keep all correspondence or remarks relative to your order on a separate sheet of paper. Make sure you include sufficient postage; all overpayments promptly refunded (if overpayment is under 10¢, we will credit your account).

DOMESTIC ORDERS

We buy for cash and sell for cash; this explains our low price policy. We do not carry credit accounts, and we pass on to our customers all savings affected by the elimination of costly bookkeeping. We will ship C.O.D. if desired, providing a deposit of at least 20% accompanies your order. C.O.D. parcels may be shipped ONLY to places in the 48 states of the U.S. and to U.S. territories. On small orders, remittance in full saves you extra costs.

FOREIGN ORDERS

On foreign orders we require payment in the United States by irrevocable and confirmed letter of credit against documents, or 50% deposit with order, balance sight draft against B/L. All quotations F.O.B. our warehouse, with slight additional charge for export packing. Orders up to \$25.00 payable in full in advance, including postage. All remittances payable in U. S. funds.

2% TRANSPORTATION ALLOWANCE

On mail orders of \$25.00 or more, we allow you to deduct 2% from the total as transportation allowance, with the following exceptions: All Lafayette and National Co. products; all items sold under Fair Trade regulations; all items marked "shipped Postpaid".

RETURNS

If you find it necessary to return any merchandise for adjustments, please write in advance stating the following: reason for return—when and where purchased—number of sales slip (if purchased over the counter). If your shipment is received damaged, obtain a report from the postmaster or express agent and mail it to us. Use a separate sheet of paper for all adjustment matter; do not add remarks to a new order for parts. Do not include money in the package you return. When returning merchandise, pack carefully, insure, and write your name and address on all packages and letters. Adjustments may take 15 days.

FINAL PRICES

Prices shown in this catalog are net, and except where marked POSTPAID, do not include postage. All discounts have been deducted, including 2% discounts for cash. Prices are subject to change without notice; we give customers the benefit of all reductions taking place after the catalog is published.

POSTPAID ITEMS

Items marked "Shipped Postpaid" do not require postage. Postpaid items refer only to shipments made within the 48 states of the U. S. only (does not include U. S. possessions).

SENDING MONEY

The safest and best way to send money is by: American Express; Post Office or Telegraph Money Order; bank drafts; firm checks; stamps. Do not send cash. If absolutely necessary to remit cash, send by registered mail only.

PARCEL POST RATES FOR ALL ZONES

Parcels up to 8 ounces may be shipped anywhere in the United States for 6¢. Parcel post shipments to any zone must not exceed 70 pounds. The limit of size on all parcel post packages is 100 inches in length and girth combined, at widest point. Example: a package 35 in. long, 10 in. wide and 5 in. high measures 65 in. in length and girth combined (length 35 in., plus twice 10 in. width, plus twice 5 in. height, equals 65 in.).

I WILL TRAIN YOU TO START A SPARE TIME OR FULL TIME RADIO SERVICE BUSINESS WITHOUT CAPITAL

J. E. SMITH, President
National Radio Institute

I Trained These Men

H. W. Spangler has a successful Radio Business in Knoxville, Tenn., which pays \$50 to \$60 a week. Business is good and he has hired a serviceman and errand boy. He thanks N.R.I. for his success.

Pete Baumert, Youngstown, Ohio, holds another job and repairs Radios in his spare time. He recently reported earnings of \$630 a year this way. He started making money after the 26th N.R.I. lesson.

N.R.I. Course doubled the income of John H. Henninger, Philadelphia, Pa. Though he had no Radio experience when he started the N.R.I. Course, he is now Chief Engineer of WIBG. He endorses N.R.I. training.

R. H. Rood, Los Angeles, Cal., specialized on Loudspeaker Systems after his N.R.I. Course. He now has a Civil Service Job at \$170 a month operating the Public Address System in the City Hall Council.

YOU GET THIS PROFESSIONAL SERVICING INSTRUMENT

Makes practically any test you will be called upon to make. You can use it at the bench, or carry it to your calls. It measures A.C. and D.C. voltages and currents; tests resistances; has a multi-band oscillator. You get this instrument to keep as part of your N.R.I. Course.

The world-wide use of Radio has made many opportunities to have a spare time or full time Radio service business of your own. Over 28,000,000 homes have over 40,000,000 Radios. There are more Radios than telephones. Every year millions of these Radios go out of date and are replaced. There's an opportunity to earn good commissions selling new sets. Millions more need new tubes, need repairs. There is an opportunity to make money servicing Radios. I will train you at home in your spare time to install, fix all types of Radios; to start your own Radio service business and build it up on money you make in your spare time while learning. You don't have to give up your present job, or spend a lot of money going away to school to become a Radio Technician. Find out why this is true. Mail the coupon below for my 64-page book. It's free—it shows what others have done—what I am ready to do for you.

Many Start Their Own Radio Businesses —Make \$5 to \$10 a Week Extra— In Spare Time While Learning

Here's why they can do it. Here's how they do it. I start sending Extra Money Job Sheets to pay a student enrolls—start showing how to do Radio repair jobs. The first jobs are simple, to be sure, but throughout the Course I send additional plans, directions, instructions for doing other, more complicated, and therefore better paying jobs. That's why many students make \$5 to \$10 a week extra in spare time while learning. That's why many N.R.I. men, while still students, cash in; start building their own Radio service businesses.

I Will Train You for Good Jobs Too Many Radio Technicians Make \$30, \$40, \$50 a Week

Anyone can tune a Radio set, but few can service one. That's why many qualified Radio Technicians make such good money installing, fixing, selling home and auto Radio sets, operating and maintaining Broadcast, Police, Aviation, Commercial Radio stations; selling, installing, servicing Loudspeaker systems. That's why many open their own Radio sales and repair businesses and make \$30, \$40, \$50 a week. Why others hold their regular jobs and make \$5 to \$10 a week extra fixing Radios in spare time.

How I Give You Practical Radio Experience While Learning

I send you special Radio equipment; show you how to conduct experiments, build circuits illustrating

important principles used in modern Radio receivers, broadcast stations and loudspeaker installations. You work out with your hands many of the principles you study in our lesson texts. "Rich Rewards in Radio" tells you about this 50-50 method of training—using home study texts and home experiments—how it makes learning at home interesting, fascinating, practical. YOU ALSO GET A PROFESSIONAL ALL-WAVE, ALL-PURPOSE SET SERVICING INSTRUMENT. See the left-hand column on this page.

You Learn Radio, Television, Frequency Modulation, Electronics

The N.R.I. Course is up-to-date. It teaches not only Radio, but also gives thorough training in modern Television principles. You are taught how to install, adjust, service Television receivers and antennas. You also learn Frequency Modulation transmitters and receivers; you learn the principles of Electronics and how they are applied to electronic control equipment, such as photoelectric counters, safety devices, electric eye burglar alarms, etc. N.R.I.'s Course is not only basic, but highly practical.

Find Out How I Train You for Radio and Television

Act Today. Mail the coupon now and I will send you "Rich Rewards in Radio", and a free sample lesson. Find out what Radio offers in spare time and full time opportunities; what opportunities are coming in Television. Read the details of my Course in Radio and Television; read more than 100 letters from men I have trained. Read what they are doing, earning. Read my Money Back Agreement and how it protects you. MAIL COUPON BELOW in an envelope or paste on a postcard—NOW.

I want to prove our Course gives practical, money-making information; that it is easy to understand—what you need to master Radio. My Sample Lesson text, "Radio Receiver Troubles—Their Cause and Remedy," covers a long list of Radio receiver troubles in A.C., D.C., battery, universal, auto, T.R.F., superheterodyne, all-wave, and other types of sets. And a cross-reference system gives you the probable cause and a quick way to locate and remedy these set troubles. A special section is devoted to receiver check-up, alignment, balancing, neutralizing, testing. You can get this lesson Free by mailing the coupon!

Lafayette

“MINI-PORTABLE”

LOOKS LIKE A CAMERA
FEELS LIKE A CAMERA
SOUNDS LIKE A BIG RADIO

BEST OF ALL PERSONALIZED MINIATURE PORTABLES

You'll "go for" this tiny Lafayette Mini-Portable the minute you see it and hear it—and "in a big way" too, because that's just how it performs. Small as a camera and just about as light to carry, this little miracle radio is actually a four-tube superhet of the very latest type, covering the entire broadcast band. Its powerful 4-inch PM dynamic speaker has a surprising amount of "sock". You'll be thrilled by its performance wherever you carry it—at home, in your office, at the beach, etc. It's perfect for sports events where you can follow the expert running commentary of your favorite sports announcer while viewing the contest itself. Adds immensely to your pleasure when you know just what is going on every second. Extra-size built-in loop aerial assures good reception. Tunes the broadcast band from 540 Kilocycles to 1650 Kilocycles; tuning knob is calibrated.

Uses only two flashlight cells (replaceable anywhere for "A" supply—lasts 12-15 hours. "B" battery lasts at least 50 hours. Four 1.4 volt tubes used: 1-1S4, 1-1S5, 1-1R5 and 1-1T4. The attractive case is covered in rich-looking brown leatherette with matching carrying handle. Complete with batteries and tubes the total weight is only FOUR POUNDS.

Lafayette AUTOMATIC PHONOGRAPH-RADIO

Think of it! A genuine full-size 2-band Lafayette Superheterodyne with completely automatic record-changer phonograph for 10-inch and 12-inch records for less than \$50! Yes, it may be hard to believe that anyone could offer so much value for so little money, but remember, Lafayette has earned its reputation for super-values on just such sensational offerings as this one. Nothing has been skimmed in either the radio, the automatic phonograph, the cabinet or the craftsmanship to make this value possible. Our modern-minded engineering staff, our efficient production facilities and our wide-awake merchandising men have combined forces to bring you this value-sensation of a decade. Try one in your own home on our liberal 30-day home trial plan. See and hear for yourself how much Lafayette offers for your radio dollar. We know you'll be convinced when you hear:

2-BAND AC SUPERHETERODYNE of the latest, most efficient type. Covers the entire American broadcast band on 536 to 1600 kc (560 to 187 meters) and the International short wave band on 5.4 to 18.3 mc (55.5 to 16.3 meters).

FULLY VARIABLE TONE CONTROL to suit your own taste and adjust for acoustics of your home.

BUILT-IN ANTENN-AIRE: For reception of domestic broadcasts the highly-efficient built-in "Antenn-aire" loop aerial brings in all stations with a maximum of efficiency and a minimum of static and local interference. For short wave reception an external antenna is required (terminals provided).

MULTI-PURPOSE TUBES: Six modern tubes include: 1-6SA7 Converter; 1-6SK7 1st i.f.; 1-6SJ7 2nd i.f.; 1-6SQ7 2nd det. AVC and 1st audio; 1-6V6GT "beam-power" output tube and 1-5Y3G rectifier tube.

FULLY-AUTOMATIC RECORD CHANGER: Enjoy the luxury of over 40 minutes of the recorded music of your choice. Plays fourteen 10-inch records or ten 12-inch records continuously without any attention on your part. Just place the records on the changer, start it and then sit back and relax while you hear the superb reproduction of your recordings, or enjoy 40 minutes of dance music and keep your house-parties at their best, with a flow of the latest "swing".

TANGENT ARM CRYSTAL PICK-UP gives you full-range frequency response on all recordings. This modern type tone arm brings out the finest in your records, increases their active life and reduces needle scratch.

8-INCH ELECTRO-DYNAMIC SPEAKER especially matched to the radio, phonograph and cabinet provides reproduction of a type seldom found in combinations selling at a much higher figure. Covered by a richly attractive frieze grille with curved walnut front.
