Radio Wire Television Inc.

Formerly WHOLESALE RADIO SERVICE CO., Inc.

5 TUBE A. C.-D. C. SUPER

HERE'S your chance to get that extra set you've wanted—and at a price far below what you had expected to pay! This excellent performer is at home in any room—put one in the kitchen, den or library. It has full, natural tone and power to spare. Try one for 30-days, at our risk!

ANTENN-AIRE, built right into the set, literally pulls the stations in. No need to connect any messy aerial or ground wires either. You just turn it on and tune in. It gets all the domestic broadcast stations (range from 528 to 1730 kilocycles).

"BEAM" POWER, meaning clear natural tones with great volume, is included. The superhet circuit uses 12SA7, 12SK7, 12SQ7, 35L6GT "Beam" output tube and a 35Z5GT rectifier. A fine 5" dynamic speaker is used. **PLASTIC HOUSING**, affording new beauty and lustre; available in either Walnut or Ivory.

Model BB-22 In Walnut Case

Lafayette 5-Tube A.C.-D.C. Superhet with "Antenn-Aire". With tubes. For 110 volts a.c. or d.c. Size: 9 1/4 x 7 1/2 x 5 1/2" deep. Shpg. wt. 9 lbs. Code BANJO. YOUR COST..... **\$8.95**

Model BB-23 In Ivory Case

Same as above, in Ivory finished case. Code BIRCH. YOUR COST..... **\$9.95**
For 220-volt adapter cord, either model, add.....75c

Lafayette PLASTICS.

5-TUBE A. C.-D. C.

IT'S as easy to use as your toaster—as entertaining as any small radio can be—and it bears a typical Lafayette low-price tag! You'll like its smart styling, too, for the Plastic case adds charm to the room.

NO AERIAL OR GROUND: Absolutely no wire connections to make—just plug into the nearest outlet, turn on and tune. A unique arrangement makes use of the power line itself for an aerial.

"BEAM POWER" OUTPUT: This results in distortionless, high power output—the reason for the excellent tone quality afforded. "Bantam" tubes are used throughout: 12SA7, 12SK7, 12SQ7, 50L6GT "beam" tube and 35Z5GT rectifier tube.

ILLUMINATED DIAL: Airplane type, full vision. Calibrated in meters and kilocycles. Tuning range covers the domestic broadcast band.

Model E-64 In Walnut Case

Lafayette 5-Tube A.C.-D.C. Superhet complete with tubes, in Walnut plastic case. Size 8x5x5 1/4" deep. Shpg. wt. 10 lbs. Code EMBER. YOUR COST..... **\$7.95**

Model E-65 In Ivory Case

As above, in Ivory finished case. Code EQUAL. YOUR COST..... **\$8.95**
For 220 volt adapter cord, add.....75c

Full Bodied Tone

4-TUBE A. C.-D. C. TRF

IT'S neat—it's durable and it's a good performer. That's why this new Lafayette is so well suited for use as an auxiliary radio or as a gift that will be appreciated. It's housed in an attractively styled PLASTIC case that adds charm to its surroundings—and it costs no more than an average pair of shoes!

Four working tubes plus a ballast are used in the a.c.-d.c. circuit: 6K7GT, 6I7GT, 25L6GT "BEAM POWER" tube (this accounts for the exceptional power and clarity), 25Z6GT rectifier and BM55B ballast. A 5" matched dynamic speaker reproduces the output. All the domestic broadcast stations are within its tuning range, and adjustments are simplified by the use of an illuminated full-vision dial.

Model JA-89 In Walnut Case

Lafayette 4-Tube A.C.-D.C. Compact in Walnut plastic case 10 1/4 x 5 3/4 x 5 1/2" deep. With all tubes and factory attached aerial wire. For 110 volts a.c. or d.c. Shpg. wt. 11 lbs. Code AGLW. YOUR COST..... **\$6.95**

Model JA-93 In Ivory Case

Same as above, in Ivory finished plastic case. Code ADOBE. YOUR COST..... **\$7.75**

For 220 volt adapter cord, add.....75c

6 TUBE A.C.-D.C. 2-BAND SUPER

IT'S new, it's different, it has MORE worthwhile features and it's easy on your pocketbook. It provides "console-tone" performance and it's styled to please.

These models feature "ANTENN-AIRE" that eliminates the need for aerial or ground (on broadcast band only); SHORT-WAVE COVERAGE that brings in foreign short wave stations and many amateurs, etc., on the 16.6 to 52.7 meter band; broadcast reception from 540 to 1650 kc. UNUSUAL TONE AND VOLUME due to the "Beam Power" output stage and fine dynamic speaker. Uses 6SA7GT, 6SK7GT, 6P5GT, 6SQ7GT, 25L6GT "beam" tube, 25Z6GT rectifier and BM49B ballast; TELEVISION SOUND INPUT (or phono) terminals on chassis.

Model D-72 (Walnut): Complete with all tubes. For 110 volts a.c. or d.c. 12 $\frac{1}{2}$ x7x7 $\frac{3}{4}$ ". Shpg. wt. 15 lbs. Code WALES. **YOUR COST EACH.....\$12.95**

Model D-73 (Ivory): As above, in Ivory finished case. Code WATER. **YOUR COST EACH.....\$13.95**
For 220 volt adapter cord, add.....75c

Jewel-like Gift Radios

6 TUBE A.C.-D.C. SUPER

YOU'LL enjoy the convenience of perfected push-button tuning—you'll be pleasantly surprised by the "big-set" tone quality and volume you'll admire the sleek gracefulness of the plastic cabinet!

MAGIC "ANTENN-AIRE", built right into the set, gets all the stations clearly and does away with bothersome aerial and ground wire connections. You can tune all the domestic broadcast programs in the range from 540 to 1650 kc.

FINGERTIP TUNING, simplest ever devised, permits instant selection of any one of five of your favorite stations. Stations can be set in a jiffy, and settings can be changed whenever desired.

CRYSTAL CLARITY of tone is insured by the use of a "beam" power tube feeding into a matched dynamic speaker. Tubes used: 12SA7, 2-12SK7's, 12SQ7, 35L6GT "beam" tube and a 35Z5GT rectifier.

Model FE-5 In Walnut Case

Lafayette 6-Tube A.C.-D.C. Superhet. With tubes. For 110 volts a.c. or d.c. 11 $\frac{3}{4}$ x7 $\frac{1}{2}$ x6 $\frac{3}{4}$ ". Shpg. wt. 11 lbs. Code HARDY. **YOUR COST.....\$11.95**

As above, in Ivory finished case. Code HINGE. **YOUR COST.....\$12.95**
For 220 volt adapter cord, either model, add....75c

Play anywhere - AC or DC

5 TUBE A.C.-D.C. SUPER

SMART styling—excellent performance—new, simplified methods of operation! These are all inherent characteristics of this new Lafayette superhet. Ideal for use as an auxiliary set—and it makes a fine gift item too.

BUILT-IN "ANTENN-AIRE" gets all the stations with ample volume, and there are no messy aerial or ground wires necessary.

TOUCH-A-BUTTON TUNING permits automatic selection of any one of your six favorite stations. There's a manual control knob on the side for other stations. Range from 540 to 1650 kc.

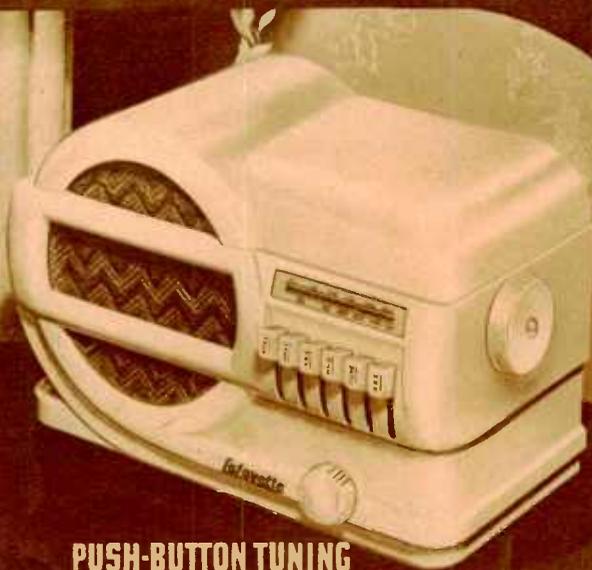

"BEAM" POWER OUTPUT provides clear, distortionless tones with power to spare. Five "Bantam" tubes are used, including: 12A8GT, 12K7GT, 12Q7GT, 35L6GT "Beam" output tube and 35Z5GT rectifier. A fine Permanent Magnet Dynamic speaker reproduces the output faithfully.

Model BE-79 In Walnut Case

Lafayette 5-Tube A.C.-D.C. Superhet. With tubes. For 110 volts a.c. or d.c. 10 $\frac{1}{2}$ x5 $\frac{1}{2}$ x6 $\frac{1}{2}$ ". Shpg. wt. 12 lbs. Code BIJOU. **YOUR COST.....\$9.95**

GIFTS

**6 TUBE
AC-DC
SUPER**

WHOEVER said "comparisons are odious" evidently had a poor product to sell. We want you to COMPARE this set with others in the same price range—check all operating features—in order to prove that model D-66 is a better value. In fact, we want you to try one in your own home for fully 30 days, at our risk!

6 TUBE AC SUPER

GOOD entertainment is less expensive than ever before when you own model D-90. It will help you spend many pleasurable hours at home and the latest song hits. Yet it's priced so that your budget won't be strained. Try one in your home for 30-days, at our risk!

The efficient superheterodyne circuit makes use of several features usually found only in sets selling at higher prices. These include: "ANTENN-AIRE", a built-in loop aerial which, under normal conditions, eliminates the need for any outside aerial. Terminals for external antenna connection are provided, for use in poor "pick-up" localities. EXTENDED BROADCAST RANGE covering from 540 to 1730 kilocycles, includes all the domestic programs plus the popular high fidelity stations and the ever interesting police calls. HIGH SENSITIVITY (greater station getting ability) is provided by the superheterodyne circuit which uses: 6SA7GT oscillator-converter, 6SK7GT i.f. amplifier, 6P5GT second detector and a.v.c., 6SQ7GT first audio 6K6GT power tube and 6W4GT rectifier. 5" DYNAMIC SPEAKER, efficiently matched to the set output, affords unusually good tone quality. AUTOMATIC VOLUME CONTROL minimizes fading and prevents "blasting" by maintaining a constant volume level. TELEVISION SOUND OR PHONO INPUT: tip jacks on the rear of the chassis permit instant connection of a phonograph assembly or Television Sound. This set is prepared for future developments in Television. Other features include: illuminated full-vision dial, attractively styled walnut veneer cabinet with hand-rubbed finish, scientifically designed speaker chamber, R.C.A. and Hazeltine license.

Model D-90 6-Tube A.C. Super

Lafayette 6-Tube A.C. Superhet with "Antenn-Aire". With tubes. For 110 volts, 60 cycles a.c. Size: 12 1/2" wide, 8" high, 8" deep. Shpg. wt. 14 lbs. Code WRACK. **\$11.95**
YOUR COST..... \$2.00
For 220 volt, 40/50 cycle a.c. operation add.....

It incorporates the "ANTENN-AIRE", that magical device that eliminates the need for any outside aerial (except where reception is unusually difficult). There are provisions for connecting an aerial, if necessary. The superhet circuit employs a "BEAM POWER" output tube that provides added volume and better tone quality. Tubes used are: 6SA7GT oscillator-converter, 6SK7GT i.f. amp., 6P5GT second detector and a.v.c., 6SQ7GT first audio, 25L6GT "beam" output, 25Z6GT rectifier and a 6M48-B ballast tube. Tuning range covers from 540 to 1730 kilocycles.

Other features include: Automatic Volume Control; illuminated full-view dial; tip jacks and switch for phono or TELEVISION SOUND input.

Model D-66

Lafayette 6-Tube (plus ballast) A.C.-D.C. Superhet complete with tubes. For 110 volts a.c. or d.c. Size: 12 1/2"x8"x8" deep. **\$10.95**
Shpg. wt. 12 lbs.

5 TUBE AC-DC 2 BAND

HERE is a personal set with "personality"—the radio that you'll choose for your bedroom, den or kitchen. Its distinctive styling plus the fine and varied entertainment it affords gives it a high rating in the Lafayette "value parade". When you see and hear this set, you'll want it.

The fine tone quality, high sensitivity and selectivity characteristics, the extra power—all are made possible by the excellently engineered superhet circuit which features: "ANTENN-AIRE", a built-in loop aerial for broadcast reception only. Under normal conditions, it eliminates the need for an outside aerial for domestic reception. For short-wave programs, an external aerial is necessary; terminals for connecting one are incorporated.

TWO BAND RECEPTION: the set tunes from 105 to 356 meters to bring you the domestic programs, and from 42.8 to 175 meters for foreign short-wave stations, amateur calls, etc.

MODERN SUPERHET CIRCUIT uses five of the latest type tubes plus a ballast. These are: 6A8GT, 6K7GT, 6SQ7GT, 25L6GT "BEAM POWER" output tube, 25Z6GT rectifier and 6M49B ballast. The circuit operates on either alternating or direct current. SLIDE-RULE DIAL, fully calibrated and well illuminated, makes critical tuning simple.

Other features include: Automatic Volume Control, matched dynamic speaker, efficient baffles. Dimensions are: 11 1/2" wide, 7" high and 6 1/2" deep.

THE BUDGET!

Lafayette 6 TUBE 2 BAND AC-DC Custom Built

ALL the qualities of a fine console radio are embodied in this deluxe custom built compact receiver! Extra sensitivity better tone quality greater ease of operation the magic "Antenn-Aire" all these, and more, are yours to command when you own model BB-27. Prove to yourself that this performer is unique, that it's a BETTER BUY by trying one in your own home for 30 days at our risk!

The new, improved superhet circuit features:

"ANTENN-AIRE", the amazing new Lafayette development which, under normal conditions, eliminates the need for any outside aerial when tuning in the broadcast band. For short wave reception, an external antenna is required, and terminals for its connection are provided on the chassis.

AUTOMATIC STATION SELECTION: six buttons on the front panel permit instant selection of any one of six of your favorite stations. Buttons can be set in a few minutes - settings can be changed at will.

SHORT-WAVE RECEPTION: in addition to the standard domestic broadcast band (528 to 1600 kilocycles), this receiver provides foreign short-wave coverage from 25 to 65 meters (4.6 to 12.2 mc.).

TUNING "EYE" located in the dial, allows VISUAL station adjustments and makes critical short-wave station settings a simple matter.

EFFICIENT SUPERHET CIRCUIT, providing excellent sensitivity and selectivity, uses the latest type tubes: 12SA7 first det.-osc., 12SK7 i.f. amp., 12SQ7 sec. det., a.v.c. and first audio, 35L6GT power tube, 35Z5GT rectifier and 6AB5 tuning indicator.

TONE CONTROL, continuously variable, permits compensation for various room acoustics. Other features: provision for phono or TELEVISION SOUND input; matched dynamic speaker.

THE MAGIC
ANTENN-AIRE

ELECTRIC EYE
TUNING

SPECIAL 5 TUBE AC-DC

Encased in
**LUSTROUS
CATALIN**

The Newest Plastic

HERE is the 1940 radio style leader! It's refreshingly new - it's different - it's distinctive. You'll be proud to show it off to your friends for it has all the qualities of a priceless jewel. Lustrous Catalin, in either Onyx or Ivory makes this matchless beauty possible.

And hand in hand with the cabinet goes fine radio entertainment - performance that sets a new high standard for compact receivers. The excellently engineered 5-Tube superheterodyne circuit incorporates features that are not usually associated with sets selling in this price range. For example:

"ANTENN-AIRE", the latest Lafayette development, eliminates the need for any outside aerial or ground wires. No connections to make other than for electric power - no messy wires to clutter up the room! Provision for outside aerial is included, for use in outlying districts.

FINGER-TIP TUNING, by means of conveniently placed buttons, permits instant selection of any one of your four favorite stations. There's manual tuning too, of course, with an illuminated full-vision dial.

DISTORTIONLESS RECEPTION, due to the use of the latest type "Beam" Power tube. Tubes used: 12SA7, 12SK7, 12SQ7, 50L6GT "Beam" tube and a 35Z5GT rectifier. Tuning range covers the domestic broadcast band from 540 to 1720 kc. A matched Permanent Magnet type dynamic speaker reproduces tones with great clarity.

COMPACT AND LIGHTWEIGHT, so that you can use it in any room in the house. It's at home anywhere, and it will add beauty and charm to its surroundings. Overall size: 9½" wide, 6½" high and 6¼" deep. Net weight about 11 lbs.

WITH THE MAGIC
ANTENN-AIRE

STRIKES A NEW NOTE

Lafayette

with **MAGIC ANTENN-AIRE**

7 TUBE AC 3 BAND

YOU will like the model D-42 you should own one. Not only because it is attractive in appearance, even though that is important too, but because it brings you a new, better, more luxurious type of radio entertainment. It is easy to SEE the value you get, but you must HEAR this set to appreciate its true worth. We want you to try it in your own home for 30 days at our risk!

When you get it you will be amazed at the many important features incorporated in this set. There is the Magic "ANTENN-AIRE" that enables you to use the set in any room in the house by merely plugging it into the nearest outlet. No aerial and no ground wires to bother with on the broadcast band—just plug it in and listen! On the short wave band a standard outside short wave aerial should be used.

Then there is the Magic Eye that enables you to "see" how well you have the station tuned in, so that you can be sure you are getting the best reception possible. And the tone control for adjusting the tone to suit your preference. A large easier-to-read slide rule dial with all three reception bands clearly indicated. The American broadcast band from 540 to 1650 kc. (182-556 meters); the foreign short wave and amateur bands from 2.2 to 7 mc. (42.9-136 meters) and from 7.5 to 24 mc. (13-40 meters).

The powerful and quiet-operating superheterodyne circuit employs a 6SA7GT as osc. converter; 6SK7GT as i.f. amp.; 6P5GT as second det. and a.v.c.; 6SQ7GT as first audio amp.; 6K6GT as power amp.; 5W4GT as rectifier and a 6U5 "magic eye" tube. A 6" dynamic speaker is carefully matched to the output tube.

TELEVISION: Both jack and switch for Television Sound or phono are provided so that either can be used.

Model D-42

Lafayette 7-Tube 3-Band A.C. Super with built-in "Antenn-Aire". Complete with tubes. For 110 volts 60 cycles a.c. Size: 18 1/4" wide, 10 1/4" high and 9" deep. Shpg. wt. 25 lbs. **\$19.95**

6 TUBE AC 2 BAND

FOR quality at a mighty reasonable price try the Model D-26. This excellent table model performs brilliantly both on the standard American broadcast and its European short wave bands. Try it at our risk right in your own home for 30 days and be convinced!

You will marvel at the many features we have built into this set. The Magic "Antenn-Aire" that does away with all aerials on the broadcast band and connections for one are provided). The specially selected wave bands: the first covering the American broadcast band from 540 to 1650 kc. (182-556 meters) and the second covering the popular European band from 5.7 to 18 mc. (16.7-52.7 meters).

And we have looked toward the future too by incorporating input connections for phono or TELEVISION SOUND. A fully illuminated slide-rule dial, powerful automatic volume control and a matched 6" dynamic speaker that reproduces all tones with excellent fidelity are just a few more of the outstanding features of this remarkable receiver. The highly efficient "bantam" tube superhet circuit employs: a 6SA7GT as osc. converter; 6SK7GT as i.f. amp.; 6P5GT as second detector and a.v.c.; 6SQ7GT first audio; 6K6GT power output tube and 5W4GT rectifier. The Model D-26 is housed in an attractive cabinet of selected Walnut veneers in a style that will blend harmoniously with any period of furnishings in any room in the home.

IN BEAUTY AND SUPERB TONE FIDELITY

Quality Receivers within reach of everyone

8 TUBE AC 3 BAND WITH 8" Dynamic Speaker

This magic carpet had nothing on this deluxe table top model radio! For, relaxed in the comfort of your living room chair, you can "listen in" on the world. Music, drama, news and innumerable other forms of entertainment from far places - all ready to do your bidding. And because the powerful superheterodyne circuit is coupled to a matched 8" dynamic speaker, you get "living" tone - all notes in the audible range are clear and crisp. Try one in your home now - we give you fully 30-days to prove to yourself that it's all we claim it to be!

"ANTENN-AIRE", built into the set, eliminates the need for an outside aerial when tuning in the broadcast band (except in outlying districts). For short-wave reception, an outside aerial must be employed; terminals for connecting one are incorporated.

LIMITED ALL-WORLD COVERAGE: Practically all forms of radio entertainment are within the scope of this receiver. Three bands cover from 540 to 1650 kc (182 to 558 meters), from 2.1 to 7 mc (42.9 to 136 meters) and from 7.5 to 24 mc (13 to 40 meters). You can tune amateur, foreign short wave, experimental and standard American broadcast programs.

VISUAL TUNING is afforded by the cathode ray tuning "eye" tubes. With this device, you can tune with hair-line accuracy every time. There's a large slide-rule dial too, with each band calibrated.

EXCELLENT TONE is provided by the 8-tube superhet circuit which feeds into a matched 8" electro-dynamic speaker. Tubes used: 6SA7GT converter, 6P5GT oscillator, 6SK7GT i.f. amplifier, 6P5GT second detector, 6SQ7GT first audio, 6T8GT output amp., 5W4GT rectifier and 6U5 cathode ray "eye" tube.

Other features include: Tone Control, powerful Automatic Volume Control, tipjacks and switch for TELEVISION SOUND INPUT and Phono

DYNAMIC
SPEAKER

BUILT ESPECIALLY FOR BETTER TONE

This receiver has been especially designed for the music lover for those uninterested in multi-wave reception, but who demand true high fidelity reception on the broadcast band only. Every circuit requirement necessary to fulfill this desire, and more too, has been incorporated in its manufacture. We present it for your approval, knowing that you will be more than pleased with its full rich tone, with its attractive appearance, and with its unusually low price! Check the features listed below - compare with other sets selling at twice the price - and remember, we give you fully 30-days trial in your own home, at our risk!

"ANTENN-AIRE" eliminates the need for unsightly aerial wires (except in outlying districts). Pulls in all stations with volume to spare.

TUNING "EYE" - insures hairline tuning accuracy by VISUAL means. There's a large, calibrated slide-rule dial, too.

EXTENDED RANGE - from 540 to 1730 kilocycles. Includes the popular high fidelity stations.

HIGH SENSITIVITY: the "bantam" tube circuit uses: 6SA7GT converter, 6P5GT osc., 6SK7GT i.f. amp., 6P5GT second det., 6SQ7GT first audio, 6K6GT output, 5W4GT rect., 6U5 "eye". Sensitivity and selectivity are unusually good.

8" DYNAMIC SPEAKER - a fine quality unit that reproduces every note in the scale with "studio" brilliance - makes music "live".

3-POSITION TONE CONTROL - permits compensation for various room acoustics.

TELEVISION SOUND INPUT - jack on chassis provides for this future type of entertainment.

PHONOGRAPH TERMINALS - so that a record player can be attached with ease.

AIRPLANE COMMUNICATIONS

5-TUBE 2-BAND "AERO"

The "Aero" has been especially designed for aviators, pilots, and those interested in aviation communications. It incorporates a long wave band for the reception of all domestic AIRPLANE BEACON STATIONS and also includes a HEADPHONE JACK so that clear reception can be obtained even when the receiver is used in a plane in flight. The "Aero" is compact, lightweight (only 14½ pounds with batteries), durable and easily portable—all features necessary for aviation adaptations. And the price is remarkably low!

The long wave band covers from 770 to 2000 meters (150 to 390 kc)—will bring in European long-wave stations when used in Europe. Standard domestic broadcast programs are received in the range from 540 to 1540 kc. Circuit features include: "ANTENNAIRE", a built-in loop that eliminates the need for any external aerial or ground connections except where reception is very difficult (terminals for outside aerial included); SELF-CONTAINED receiver obtains all necessary power from one 1½-volt "A" and two 45-volt "B" batteries; current indicator in dial; full-vision dial; attractive airplane luggage case with leather carrying handle. Tubes: 1A7G, 2-1N5G's, 1H5G and 1A5G. Just turn it on and tune-in!

5-TUBE DELUXE PORTABLE

THE most sensational radio to be developed in years! A bold statement to make, but the Rover has proven its superiority in actual use. Its remarkable sensitivity, its unusually fine tone quality, its ability to pull in all the domestic stations makes this receiver a stand-out value! The stamp of approval has been placed on the Rover by the research laboratory—you will add your plaudits when you own this superior set! The Rover operates entirely from self-contained batteries. There are no "current" problems and NO CONNECTIONS TO MAKE! Just turn it on and tune-in. The exceptional 5-tube superheterodyne circuit uses 2-1N5G's, 1A7G, 1H5G and 1C5G, and features: matched 6" PM dynamic speaker; low-drain tubes; current indicator; full-vision dial. Batteries required: one 1½-volt "A" and two 45-volt "B"'s. Sturdy airplane luggage case has leather handle.

 K20145—Kit of batteries for above.....\$2.45

4-TUBE LIGHTWEIGHT

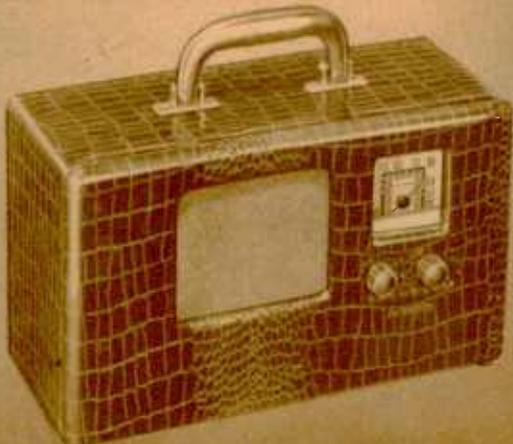

As easy to carry as a brief case—and a good little performer too. The "Petite" measures only 12¼x7¼x5¼" and weighs only 12 pounds complete with batteries, yet it brings in the domestic stations with satisfactory quality. Take one with you the next time you travel. You'll never have to think about current, outside aerial, ground or anything else. The Petite carries its own power supply, its own built-in aerial. NO WIRES TO CONNECT—just turn on and tune.

Four low-drain tubes are used in the superhet circuit, including: 1A7GT, 1N5GT, 1H5GT and 1C5GT. Power is supplied by special compact batteries that provide approximately 200 to 250 hours of service.

The entire mechanism is housed in a neatly styled portable case that's covered with durable alligator grain leatherette. It has a sturdy carrying handle.

NOTE: Although our famous 30-day home trial guarantee applies to all Lafayette battery sets, batteries themselves (for obvious reasons) are not subject to return for credit or refund.

WONDER VALUES!

SPECIAL *3 in 1* PORTABLES

PERFORM Anywhere

FROM SELF-CONTAINED BATTERIES

FROM 110 VOLTS AC OR 110 VOLTS DC

6-TUBE 3-BAND PORTABLE

Lafayette has done it again! This sensational portable has three tuning bands, operates on self-contained batteries, 110 volts a.c. or 110 volts d.c. It has built-in Magic Antenna-Aires that eliminate the need for external aerials in most locations (where aerials are needed they can be attached to terminals provided).

SPECIAL TUNING RANGES: The three specially selected tuning ranges are as follows: 16.2 to 51 meters for both foreign and domestic short wave stations, 194 to 556 meters for domestic broadcast stations, and 790 to 2140 meters for European long-wave stations when in Europe, and Aviation Beacon Signals and Weather Reports. A headphone jack is provided for use in aircraft where motor and propeller noise interfere with hearing.

Other features include: a current indicator to remind you that the set is on, a current supply change over switch, a full vision dial and a sturdy airplane luggage case.

THE SUPER POWER CIRCUIT—Employs the following tubes: 1-1A7GT converter, 2-1N5GT i.f. amplifiers, 1-1H5GT detector, a.v.c. and 1st audio, 1-3Q5GT as "beam over" output on batteries and 1-70L7GT as rectifier and output on electric line. A PM speaker is employed.

Model CC-58A "Cosmopolitan"

Lafayette 6-Tube 3-Band Portable complete with tubes. For operation on self-contained batteries, 110 V. a.c. or 110 V. d.c. Requires 2-4½ V. "A" and 2-45 V. "B" Batteries. Dimensions: 12½" w. x 10½" h. x 7¾" d. Shpg. wt. 20 lbs. Code GARTH.

YOUR COST, LESS BATTERIES: \$23.50

 K13924—BRUSH CRYSTAL PHONES—Pair of lightweight phones with padded headband for above set. 5 ft. cord. \$5.29

AIRPLANE COMMUNICATIONS

5-TUBE 2-BAND PORTABLE

Short wave reception, as well as standard broadcast band reception, is yours with this new Lafayette Portable. It covers the foreign and domestic short wave band from 5.9 to 18.0 mc. as well as the 540 to 1600 kc. American broadcast band. A built-in Magic Antenna-Aire eliminates the need for an external aerial, on the broadcast band, however, where reception is difficult, and for the short wave band, standard aerial connections are provided.

The highly efficient superhet circuit employs the following tubes: 1-1A7G converter, 1-1N5G i.f. amplifier, 1-1H5G detector, a.v.c., 1st audio, 1-1A5G audio output amplifier and 1-3Z4GT rectifier. A special feature of this excellent portable is the very low current drain. Average "B" battery life is approximately 225 hours. And, like all Lafayette's "3-in-1" Portables, it can also be used on 110 volts a.c. and 110 volts d.c. Truly a universal receiver! Short wave as well as broadcast reception—house current as well as battery operation!

Other features include: a slide rule dial accurately calibrated for both bands, off-on indicator, pilot light on AC-DC, etc. Housed in an attractive airplane luggage case, with cover and padded handle. Dimensions: 12" w. x 7½" d. x 11½" high.

Model E-94 2-Band Portable

Lafayette 5-Tube 2-Band "3-in-1" Portable complete with tubes. For operation on self-contained batteries, 110 volts a.c. or 110 volts d.c. Batteries required: 1-6 V. "A" and 2-45 V. "B". Shpg. wt. 20 lbs. Code ENVOY.

YOUR COST, LESS BATTERIES: \$18.95
 K21062—Battery Kit for above set. \$2.45
 For 220 volt operation adapter, add 75c

5-TUBE "3-in-1" PORTABLE

Here is a radio styled to the minute! This seasoned Tourist is ready to accompany you wherever you go—to entertain you on command. It works anywhere—from self-contained batteries, from 110 volts a.c. or 110 volts d.c. And there are NO WIRING TO CONNECT! You just turn it on and tune. Its extended tuning range brings all the popular domestic programs with good tone and more than ample volume.

A neat airplane luggage case houses the 5-tube superhet chassis, loop aerial, speaker and batteries. The tubes used include: 1-1A7G, 1-1N5G, 1-1H5G, 1-1Q5G and 1-3Z4GT rectifier. Batteries required: 2-45 volt "B" and 1-6 volt "A". Current drain is low; batteries have a life of approximately 200 hours.

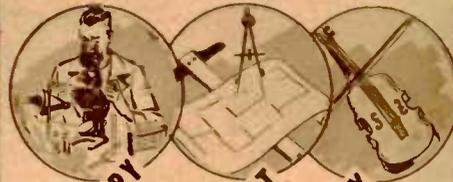

Model E-80

Lafayette 5-Tube "3-in-1" Tourist Portable in airplane luggage case with drop front. Size: 11½"x11½"x7¾" deep. Complete with tubes but less batteries. Shpg. wt. 22 lbs. Code ETUDE.

CUSTOM BUILT

HIGH FIDELITY

Outstanding 12 TUBE AC-DC THREE BAND SUPERHET

CUSTOM built throughout, this deluxe Lafayette receiver has been designed for those desiring the finest in radio performance. It has the mighty voice of Stentor—the matchless tone quality of a rare Stradivarius. You can “tune in on the world”, too, because of its extended range. And for those who love the music of the old masters, or who want to build their own programs, we have made available the deluxe phono-radio combinations shown below. The beautiful mantle cabinet illustrated above houses the powerful 12-tube superheterodyne chassis that features:

LIMITED WORLD COVERAGE: three bands cover from 540 to 1750 kc, 7.2 to 22.5 mc and from 2.35 to 7.6 mc. Included in this range are the domestic broadcasts, foreign short-wave programs, amateur calls, experimental stations and many others of great interest.

PUSH-BUTTON TUNING: Eight buttons are on the front panel, six for instant selection of any one of your six favorite stations, one for “on-off” and one for changeover to manual tuning. Buttons are easy to adjust, and once set, require no further attention.

“ANTENN-AIRE”, built-in, permits broadcast reception without the need for external aerial (except in outlying districts).

SUPERHET CIRCUIT: uses following 12 tubes: 6SK7 r.f. amp. on ALL bands, 6K8 converter, 6B8 i.f. amp. detector and a.v.c., 6Z7G a.f. amp. and phase inverter, 4-25L6’s in push-pull parallel output stage, 6U5 tuning “eye”, 2-25Z5 rectifiers and 6A7 converter for push-button tuning. Power output is fully 8-watts. **VISUAL TUNING** permitted by the cathode ray tuning “eye” tube.

SLIDE RULE DIAL, illuminated and fully calibrated, makes manual tuning easy.

CONCERT SPEAKER, electro dynamic type, provides excellent tone quality. Mantel models have 8” speaker; console models have 12” speaker.

TELEVISION SOUND and phono input provided for by means of tip jack and switch.

LONG WAVE MODELS: both mantel and console models are available in a special 4-band receiver. An additional band covering from 814 to 2135 meters is incorporated, to get European long-wave stations, aviation signals, weather reports and others. (No push buttons on these models.)

Other circuit features include: **TONE CONTROL** that compensates for various room acoustics; Automatic Volume Control to minimize fading; oversized parts. Both mantle and console cabinets are constructed of the finest Walnut veneers.

MANTEL MODELS Model CC-47

Lafayette 12-Tube 3-Band A.C.-D.C. Push-Button Superhet complete with tubes, in Walnut mantel cabinet. For 110 volts, a.c. or d.c. Size: 25½” wide, 12¼” high, 11¾” deep. Shpg. wt. 43 lbs.
Code GLINT.
YOUR COST **\$57.50**

CC-48 Long-Wave Model

Same as above, but without push-buttons and with additional European long-wave band covering from 814 to 2135 meters. Shpg. wt. 43 lbs.
Code GIRTH.
YOUR COST **\$57.50**

For 220 v. operation, either model, add \$3.50

Lafayette COMPACT COMBINATIONS

Enjoy the Double Luxury of RADIO and RECORDINGS

PHONO-COMBINATION 8 TUBE AC SUPER

PICTURED here is the Aristocrat of the compact phono-radio combinations. It is especially designed for those demanding high quality radio reception plus fine record reproductions, and it meets these requirements in every respect. Prove its performance by trying one in your own home for 30-days, at our risk!

THE RADIO: A powerful 8-tube 3-band superheterodyne that brings in broadcast programs, foreign short wave stations, amateur calls, etc. Bands are: 540 to 1650 kc., 42.9 to 136 meters and 13 to 40 meters. Receiver has the built-in **MAGIC ANTENNAIRE**. Tubes used: 6SA7GT, 6P5GT, 6SK7GT, 6P5GT, 6SQ7GT, 6K6GT, 5W4GT rectifier and 6U5 tuning "eye" tube. Three position tone control is included. For complete description of radio, refer to page 7 (model D-71).

THE PHONOGRAPH: Incorporates a powerful G.I. constant speed motor with 12" turntable. Will play 10" and 12" records with the top closed. A wide range Astatic **CRYSTAL PICK-UP** reproduces the entire musical range with excellent fidelity. Switch changes from radio to phono.

Model D-85 Combination

Lafayette 8-Tube 3-Band A.C. Superhet Combination. Complete with tubes. For 110 volts, 60 cycles a.c. only. Size: 21" wide, 13 1/4" high, 14" deep.
Shpg. wt. 44 lbs. Code WAGON.
YOUR COST **\$37.50**
For 220 volt operation, add..... \$3.00

PHONO-COMBINATION 6 TUBE AC SUPER

TUNE in on your favorite radio program—or play the record of your choice! The Little Symphony provides this diversified performance with a degree of quality that is sure to please you! Apartment dwellers particularly will appreciate the compact construction—the entire assembly can be placed on any convenient table. Try one for 30-days at our risk!

The radio portion of the assembly comprises a well engineered six-tube superheterodyne that features: **TWO TUNING BANDS** covering from 170 to 555 meters for domestic stations and from 16 to 51 meters for the popular foreign short-wave programs; **EXCELLENT TONE AND VOLUME** afforded by the 6-tube circuit that uses 6A7 osc.-modulator, 6D6 i.f. amp., 6Q7C first audio, 76 detector and a.v.c., 41 output and 84 rectifier; **FULL TONE CONTROL** to compensate for acoustic conditions; **SIMPLIFIED TUNING** by means of the illuminated slide-rule dial.

The record playing mechanism makes use of: a tangent arm Astatic **CRYSTAL PICK-UP**; a constant speed rim driven motor with turntable that takes either 10" or 12" records (can be played with lid closed). Switch throws from radio to phono.

The entire assembly is housed in a compact Walnut cabinet measuring only 18" wide, 12 1/4" high and 13 3/4" deep.

Model S-43 Combination

Lafayette 6-Tube 2-Band A.C. Combination with tubes. For 110 volts, 60 cycles a.c. only.
Shpg. wt. 34 lbs. Code PANSY.
YOUR COST **\$27.50**
For 220 volt a.c. operation, add..... \$3.00

PHONO-COMBINATION 5 TUBE AC SUPER

IT'S miniature in size—and "miniature" in price too! But there's nothing miniature about the quality and diversity of entertainment offered by model S-49. It brings you all the radio programs on the domestic broadcast band PLUS your own selection of recorded music. Its compact construction makes it ideal for the small apartment, or it can be used as an auxiliary set. We'd like you to try one at home for 30 days, at our risk. The radio portion of the assembly features: **"ANTENNAIRE"**, built-in, that eliminates the need for any outside aerial or ground connections except in the most unusual cases. Provisions for external aerial are included. **HIGH POWER AND GOOD TONE** are insured by the use of late type tubes, including: 12A6GT, 12K7GT, 12Q7GT, 50L6GT "BEAM" POWER tube, and 3Z5GT rectifier. The radio works on either a.c. or d.c. (phono on a.c. only).

Other circuit features are: Automatic Volume Control circuit, illuminated full-view dial, 170 to 555 meter tuning range.

RECORD PLAYER mechanism comprises a self-starting rim-drive 110 volt a.c. motor with turntable and an **ASTATIC CRYSTAL PICK-UP** that provides true fidelity response. Either 10" or 12" records can be played with the lid closed!

CABINET is constructed of selected Walnut veneers in a pleasing two-tone design. Hand-rubbed high polished finish.

Model S-49 Combination

Lafayette 5-Tube Phono-Radio Combination complete with tubes. For 110 volts, 60 cycles a.c. only. Size: 14 1/4" wide, 13" deep, 10 1/2" high (with lid closed).
Shpg. wt. 20 lbs. Code PINCH.
YOUR COST **\$19.95**

You can't beat THESE NEW LAFAYETTES for economy, style and performance

8 TUBE 3 BAND AC SUPERHET

UNQUESTIONABLY one of the most sensational values ever offered by Lafayette or anyone else! An exceptionally fine 8-tube 3-band Superhet—a handsome American Walnut veneer console of modern design—at the price you would normally expect to pay for the cabinet alone! Not a “close-out”—not a “discontinued model”—but a current new model that has all the features you only expect to find in the more expensive sets! We know that it is one of the grandest “buys” we have ever offered—and we feel sure that you will think so too—that’s why we say, “Try it at our risk, in your own home, for 30 days!” And we are sure that you won’t need 30 days to make up your mind—the minute you look at it you’ll say, “My, what a beautiful cabinet!” and then, after listening to it for an evening, you’ll agree that it’s a “swell” radio!

The powerful superheterodyne circuit, combined with the large 12" dynamic speaker, provides such good, clear reception that you will think you are right inside the broadcasting studio. The full rich low tones, and the crystal clear high ones, are a delight to the ear. There is no straining to catch a phrase, every word is as clear as a bell. And there is volume to spare—a push-pull “beam power” output stage takes care of that.

The three tuning bands are covered as follows: 1750-545 kc. (171-556 meters), 2.2-6 mc. (50-136 meters), and 6-22 mc. (13.6-50 meters). A large slide-rule dial has each band accurately calibrated, and the cathode ray tuning “eye” insures hairline accuracy in tuning at all times.

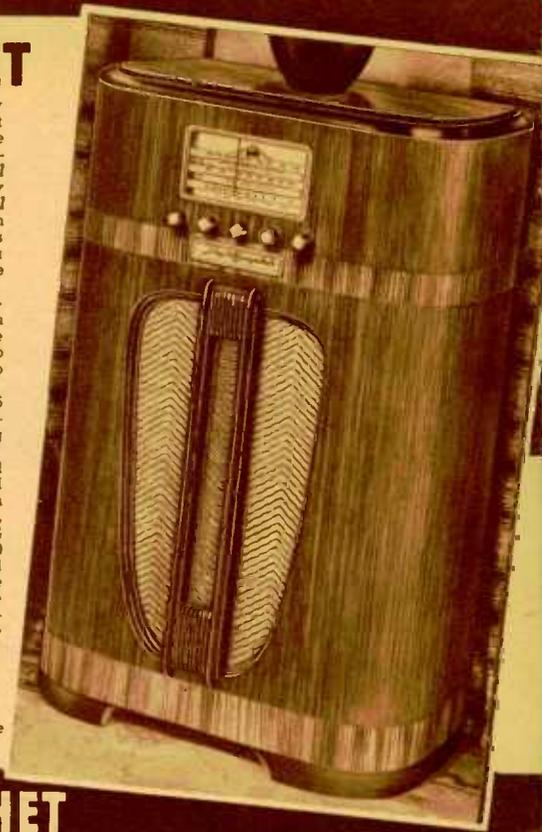

Remarkable sensitivity and selectivity are provided by the powerful superhet circuit. Eight tubes are employed including PUSH PULL BEAM POWER TUBES in the output stage. These insure high power reception with a minimum of distortion. Tube complement includes: a 6K8G oscillator-mixer, a 6D6 i.f. amplifier, a 6Q7G second detector, a.v.c. and first audio, a 6F5G phase inverter, two 6V6G “beam power” tubes in the output stage, an 80 rectifier and a 6U5 cathode ray tuning “eye” tube. The output is a full 8 watts—much more than you’ll ever require for home use. But this reserve is important, for it insures clear, distortionless reception no matter where you set the volume control. Other features include: a tone control to compensate for various room acoustics; phonograph terminals (may also be used for Television Sound connection) for addition of a record player.

MODEL BS-3: Lafayette 8-Tube 3-Band A.C. Console complete with tubes. For 110 volts, 50-60 cycles a.c. Dim.: 41" high, 26 3/4" wide, 13 7/8" deep. Shpg. wt. 70 lbs. Code CABAS.

YOUR COST

For 220 volt, 40/60 cycle a.c. operation, add. \$3.00

9 TUBE 3 BAND AC-DC SUPERHET

- ★ With Exclusive Magic Antenn-Aire
- ★ Triple Automatic Volume Control Action
- ★ Beam Power Output Amplifier Tubes
- ★ Continuously Variable Tone Control

TAKE it with you anywhere you wish for this new Lafayette has the built-in Magic Antenn-Aire that eliminates the need for an external aerial of any kind for the standard broadcast band. Just plug it in and listen to the finest reproduction you have heard in a long time. It makes listening a new and exhilarating experience.

Three Band Coverage

Three Tuning Bands provide a variety of reception as follows: 174 to 546 meters, for Domestic Broadcasts and Police Signals, 50-136 meters, for Amateur, Aircraft and Foreign Short-Wave Broadcasts; and, 13.6 to 50.4 meters for additional Foreign Short-Wave broadcasts. High Sensitivity and Selectivity is obtained as a result of the use of a 3-gang condenser and RF pre-selection stage which is employed on the broadcast band.

8" PM Speaker

Provides real fidelity of tone; crystal clear Triple Automatic Volume Control Action is employed to eliminate fading and blasting. A Continuously Variable Tone Control permits adjusting the tone to the individual taste. Sturdy, Rugged Chassis Construction, with oversize parts. Tubes used: 2-6D6's; 1-6K8G; 1-6Q7G; 1-7E; 2-25L6G "BEAM" Power output tubes 1-25Z5; rectifiers 1-6U5 tuning "eye." The modern duo-grained cabinet will please the most critical. Its beauty is further enhanced by a streamlined "louvre-type" speaker grille-work, and a Large Illuminated Slide-Rule Tuning Dial. Cabinet dimensions are: 22 1/4 x 10 1/2 x 11 1/8" high.

TUBE 3 BAND AC Super

WITH this new Dual "Magic Antenn-Aire" 8-Tube Superhet, Lafayette again shows the way to better, finer and more modern radio reception. Superb cabinet styling, realistic reproduction plus a new "mobility" make it a truly outstanding receiver. No matter where you place this Lafayette you can have it operating in a moment. Two specially designed built-in Magic Antenn-Aires, one for the broadcast band and the other for the short wave bands, provide excellent reception under all ordinary conditions. No ground wire or aerial wire need be connected to the receiver—just plug-in and listen! However, should you have to use this Lafayette in a location where reception is difficult, an antenna coil permits the use of any outside aerial.

Among the outstanding features of this feature-packed Lafayette are: Phone, Television-Sound connection; Automatic Button Tuning; Slide Rule Dial; Cathode-Ray Tuning Indicator; Diode Automatic Volume Control; Three Band Reception 7,000 to 22,000 kc. (42.8-13.7 meters), 2,200 to 7,000 kc. (136.3-42.8 meters), 528 to 1,730 kc. (566.1-173.4 meters); Full Range Tone Control; "Dynamic Speaker 11" in the console model; Licensed by RCA and Marzette.

8 Tube Superheterodyne Circuit

Three glass and five metal tubes are employed in the highly efficient superheterodyne circuit. This circuit provides a high degree of sensitivity and selectivity. The tubes included are as follows: 1-6SK7 as RF amplifier, 1-6SA7 as Oscillator-First Detector, 1-6SK7 as IF amplifier, 1-6H3 as Second Detector, 1-6SK7 as Audio amplifier, 1-6V6G as beam power output amplifier, 1-5Y3G as Rectifier and 1-6U5 as Tuning Indicator. Sensitivity is 2 microvolts absolute on the standard and intermediate bands and 5 microvolts on the short wave band.

Console and Table Models

This new Lafayette is available in both console and table models. They are identical in all respects except for cabinet, speaker and Magic Antenn-Aire. The Table Model is housed in a very attractive lay-down style cabinet of beautifully matched and finished Walnut veneer. It has a specially designed 8" speaker that has been carefully matched to the circuit. The Console Model is housed in a "modified-modern" style console cabinet that is very attractive. This model has larger "Magic Antenn-Aire" and a larger 12" matched dynamic speaker.

Model BB-2

The Lafayette 8-Tube 3-Band Dual Antenn-Aire Superhet in a beautiful modern style lay-down Mantel cabinet as illustrated at top of page. Matched Walnut veneer polished to a high gloss make this an especially attractive receiver that will blend with any period of furnishings. It is compact enough to be easily portable yet large enough to have excellent tone quality. Overall dimensions are: 23 1/2" long, 12 1/4" high and 11" deep. Has all of the features described above and incorporates an 8" dynamic speaker. It comes complete with tubes and instructions. For 110-120 volts 50/60 cycles a.c. Current drain of 117 volts 60 cycles is 70 watts. Shipp. wt. 40 lbs. Code BENIM.

**MAGIC DUAL
ANTENN-AIRE**

Lafayette **AUTOMATIC PHONO RADIO COMBINATION**

**THE MUSIC YOU WANT TO HEAR
THE WAY YOU WANT TO HEAR IT**

8 TUBE 3 BAND AC SUPER

THIS deluxe custom built high-fidelity phono-radio combination brings you everything you want to hear... the way you want to hear it! The finest of radio reception, domestic or foreign short-wave programs, or unexcelled record reproduction—at the flip of a switch! You get a new, ultra-convenient method of operation, too. For any one of your six favorite radio stations, you need only press a button—and to listen to a complete symphony, you need only turn a knob. Seems miraculous, doesn't it? We want you to prove to yourself that this set does all we claim for it and more—try one in your own home for fully 30 days, put it through all its paces **AT OUR RISK!**

THE RADIO section of this combination incorporates the most advanced circuit features, including:

AUTOMATIC PUSH-BUTTON TUNING that permits instant selection of any one of six pre-selected stations at the touch of a button. Stations are easy to set (from the panel) and settings can be changed as desired.

DUAL "ANTENNAIRE" eliminates the need for any aerial or ground connections. One loop is designed for most efficient broadcast reception, the other for best short-wave reception. A specially matched antenna coil permits the use of an external aerial when the receiver is operated in localities where reception is difficult.

LIMITED ALL-WAVE COVERAGE: In addition to bringing in the popular domestic broadcasts, this set tunes the most interesting foreign stations, amateur and experimental calls, etc. Three tuning bands are: 173.4 to 568 meters, 42.8 to 136 meters and 13.7 to 42.8 meters. Other features are: **12" SYMPHONIC DYNAMIC SPEAKER** that insures wide-range response, cathode ray tuning "eye", amplified Automatic Volume Control, dial indicators for tone and band-in-use, full range **TOPE CONTROL**, etc.

Tubes used are: 6SK7 r.f. amplifier, 6SA7 oscillator-converter, 6SK7 i.f. amp., 6H6 second detector, 6SK7 audio amp., 6V6G output, 5Y3G rectifier and 6U5 tuning indicator.

Famous GARRARD Automatic 'Changer

The world famous Garrard Automatic Record Changer, almost hushed in operation, is employed for optimum record performance. By stacking up to eight records on the spindle (either 10" or 12") you can enjoy approximately forty minutes of uninterrupted entertainment. Just think of it!—a complete symphony while you relax in the comfort of your easy chair. The 'changer will repeat any record at will—or reject any record you don't want to hear. The mechanism requires no attention, is fool-proof and precise in operation. A special high-fidelity pick-up is used to insure unusually fine tonal ranges. Each note is full bodied and "alive"—you get "in the studio" quality everytime. For those desiring it, a more simple combination is available. This model employs a single record player (Garrard model AC6G) in place of the automatic changer.

Custom Designed Console

A thing of beauty—a joy to behold. Custom built from beautifully grained matched walnut veneers, this console will be at home in the finest surroundings. The full-hinged top conceals all control panels.

CUSTOM-BUILT TO EXCEL

7 TUBE 2 BAND AC SUPER

HERE is the "biggest" compact receiver your money can buy! It's capable of providing the quality of reception you've always associated with the large console models—models selling at far more than the low price quoted below. We'd like you to **COMPARE** model FE-28 with other larger radios. Try one in your home for fully 30 days, at our risk, and prove to yourself that this set gives you more for your money.

Most modern circuit refinements have been utilized in the construction of this set. Some of the features are:

"ANTENNAIRE", a built-in loop aerial which, under normal conditions, eliminates the need of any outside aerial or ground connections for broadcast reception. Terminals for external aerial are included (required for efficient short-wave reception).

TOUCH-BUTTON TUNING of any one of your six favorite stations. Stations can be set from front of panel, and settings can be changed easily whenever desired.

TWO-BAND TUNING provides reception of all the domestic broadcast programs plus the popular foreign short-wave stations. Ranges are: 540 to 1720 kc. and 16.4 to 54.6 meters.

"BEAM POWER" OUTPUT stage insures distortionless reproduction with more-than-ample power. Tubes used: 12A8GT converter, 12SK7 i.f. amp., 12SQ7 second detector, a.v.c. and first audio, 12Q7GT inverter, 2-35L6GT's in push-pull "Beam" output stage, and a 35Z4GT rectifier. A matched 6" speaker is employed. Other features: Full Tone Control; tip jacks and switch for phono or **TELEVISION SOUND INPUT**.

Model FE-28

Lafayette 7-Tube 2-Band A.C. Superhet complete with tubes. For 110 volts 50-60 cycles a.c. Size: 18x8³/₄x9³/₄" high. Shpg. wt. 22 lbs. Code **HABIT**

★ Six-Station Push-Button Tuning

★ With Built-In Magic ANTENNAIRE

Lafayette Fully Automatic

11 TUBE 3 BAND AC SUPER AND PHONO-RADIO COMBINATION..

A TRULY marvelous radio receiver, available as a straight radio, or as a combination including either an automatic record changer, or a single record player. It incorporates a host of features including:

- Dual built-in Antenn-Aires
- Push Button Tuning
- Automatic Bass Compensation
- Static Control Circuit
- Cathode Ray Eye Tuning Indicator
- RF Amplifier Stage on each band
- Improved 12" Electro-Dynamic Speaker
- Phono or Television-Sound Connection

No effort has been spared to make this a truly fine receiver. You will marvel at the ease with which you bring in each station clearly and full-toned. You will enthuse at the faithful, undistorted reproduction of the large 12" dynamic speaker. And you'll be pleasantly surprised at the low price.

The dual built-in Antenn-Aires in most cases eliminate the need for outside aerial or ground connections. In locations where reception is difficult, however, an outside aerial may be required and terminals are provided for its connection. One Antenn-Aire is for the broadcast band—the other for the short wave band.

BB-11 In Console Cabinet

Lafayette 11-Tube 3-Band A.C. Superhet complete with tubes, dual Magic Antenn-Aires and 12" dynamic speaker in the Console Cabinet as illustrated above. Overall dimensions: 40 1/4" high, 28" wide and 14 1/2" deep. Shpg. wt. 75 lbs. For operation on 110/120 volts 50/60 cycles a.c. Code BRAWN.

YOUR COST **\$64.50**

BB-10 Chassis, Speaker and Tubes

The Chassis only with the 12" speaker, the two Magic-Antenn-Aires and the tubes is available separately for installation in your own cabinet. Chassis dimensions: 17 1/8 x 8 1/4 x 11" deep. For 110/120 volts 50/60 cycles a.c. Shpg. wt. 43 lbs.

Code BOWER YOUR COST **\$44.95**

For 220 v. 40/60 cycle operation add to above prices. **\$3.00**

Listen to radio at its best. The superheterodine circuit incorporates many features that make radio listening a pleasure. A static control circuit minimizes inter-station noise and reduces static noises. It functions on any r.f. signal.

The Push Button Tuning greatly simplifies the tuning in of those stations to which you listen most often. And the magic eye enables you to tune in visually "right on the nose"—even without actually hearing the station.

A highly fidelity switch enables you to listen to high fidelity stations the way they should be heard. A twist of the knob and the band is narrowed to cut out undesirable noise when listening to stations not capable of covering such a wide band.

All of the popular foreign and domestic station frequencies are covered by the three tuning ranges available. These ranges are as follows: 21.9 mc. to 7.0 mc. (13.7-42.8 meters), 2.1 mc. to 7.0 mc. (42.8-137 meters), and 528 kc. to 1730 kc. (173.5-568 meters). A unique indicator on the dial shows which band is in use and the large slide rule dial is accurately calibrated and well illuminated making it easy to read.

The tubes employed include: 6SK7 r.f. amplifier (on all bands), 6SA7 converter, 2-6SK7's as i.f. amplifiers, 6H6 as diode detector and a.v.c., 6P5G audio amplifier, 6F8G driver, 2-6V6G's as "beam power" amplifiers, 5Y3G rectifier and a 6U5 cathode ray "eye" tube. Audio response of the circuit is from 40 to 7500 c.p.s. Sensitivity is one microvolt absolute (500 milliwatts output) on standard and intermediate wave bands, 3 microvolts on short-wave band.

COMBINATION MODELS

Model BB-12 incorporates all of the features listed above plus a Garrard Automatic Record Changer. This changer will play eight 10" or eight 12" records in sequence providing up to almost 40 minutes of recorded entertainment. A complete concert without going near the instrument once you have started it. You may, however, reject any record at will by merely turning a knob.

Model BB-13 employs the same make of record player but will only play one record at a time. Reproduction is equal in every respect to the previous model since the same fine quality crystal pickup is employed. And the cabinets are identical.

BB-12 Automatic Combination

Lafayette 11-Tube 3-Band A.C. Superhet complete with tubes, dual Antenn-Aire and Garrard model RC-10 Automatic Record Changer mounted in a deluxe Combination Console Cabinet as illustrated above. Dimensions: 40 1/2" high, 25 1/8" wide and 17 1/2" deep. For operation on 110/120 volts 50/60 cycles a.c. Shpg. wt. 135 lbs. Code BRUCE

YOUR COST **\$109.95**

PHONO-RADIO COMBINATIONS

11 TUBE A.C. 3 BAND SUPER

THE fine Lafayette 11-Tube 3-Band a.c. Superhet in combination with either the Garrard Automatic Record Changer, or the Garrard Single Record Player, is now available in either of two very attractive consoles.

For you who prefer authentic "period" furniture we offer our 18th Century Chippendale "Period" model.

And for you who favor a 20th Century design we offer our beautiful "Modern" model.

They are both very popular designs with interior decorators today, lending themselves readily to any style of furnishing. Where traditional furniture is used the Period model is called for. And for modern interiors the Modern is the one to use.

THE RADIO

As noted above, both models incorporate the Lafayette 11-Tube 3-Band Superhet which is described in greater detail on page 15. This excellent radio incorporates such outstanding features as: Dual Magic Antenn-Aire's, Push-Button Tuning, a large 12" Concert Speaker, Static Control Circuit, Automatic Bass Booster, four position Tone Control, Magic Tuning Eye, etc. It is a radio that ranks with the best and is capable of both domestic and foreign reception. Reproduction is clear and life-like.

THE RECORD REPRODUCERS

Both models are available with either the famous Garrard Automatic Record Changer, or the equally famous Garrard Single Record Player. The Automatic Changer will play eight 10" or eight 12" records in sequence. Up to almost 40 minutes of entertainment can be had with a single loading of the Changer. With the Single Record Player the records must be changed individually. Both employ the famous Garrard Crystal Pickup that reproduces all the original beauty of your recordings and prolongs record life because of its light weight.

THE PERIOD MODEL

The Period model, illustrated above, is authentic 18th Century Chippendale. This design has a clean cut appearance that will blend with many other styles successfully, yet retains its own individuality. Fashioned of genuine mahogany veneers beautifully grained and finished it is an especially handsome cabinet. Every detail has been painstakingly executed. The wide front doors swing open to reveal a large speaker grille opening, covered with rich brocade, and a compartment for your record albums. The radio receiver controls, and the record player, are under the top cover where they are readily accessible.

THE MODERN MODEL

Nothing is quite as refreshing as simplicity. And simplicity is the outstanding attribute of Modern design. Smooth flowing lines—the elimination of superfluous decoration—are characteristic of good modern design. In this new Lafayette console these features reach a new perfection. Smooth rounded corners, carefully inset door panels and the rhythmic repetition of narrow bars over the speaker grille make this a truly entrancing cabinet. The tasteful employment of contrasting straight and burl grained Walnut veneers further increases its attractiveness. Hand finishing results in a deep, rich luster that brings out all of the beauty of the wood. A particular advantage of this model is the fact that the doors need not be left open when the instrument is played. The small doors at each side of the speaker grille give access to compartments for record storage.

BB-16 Automatic Combination

Lafayette 11-Tube 3-Band A.C. Superhet Radio complete with tubes and with Garrard RC-10 Automatic Record Changer. In modern console cabinet 37" wide, 33 1/2" high, 15 1/2" deep. For 110/120 volts, 50/60 cycles a.c. Shpg. wt. 212 lbs. Code BAULK. YOUR COST COMPLETE.....

\$134.95

BB-17 Non-Automatic Comb.

Same as the above model but with a Garrard A6C single record player in place of the automatic changer. Will play both 10" and 12" records. (See page 72 of Catalog 76 for complete description. Shpg. wt. 200 lbs. Code BEAUX. YOUR COST COMPLETE.....

LIONEL TRAINS

ALL OUTFITS ON THIS PAGE HAVE A TRANSFORMER

A "027" Series No. 1073W Freight Train Outfit

Here is a freight train outfit with a locomotive of the streamlined type similar to the one spotlighted at the World's Fair. This streamlined beauty has six drive wheels and is as speedy as it looks. A built-in reversing mechanism permits you to make it go forward or backward by remote control. And a built-in whistle has an unusually realistic tone. The complete outfit includes:

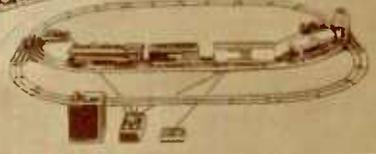

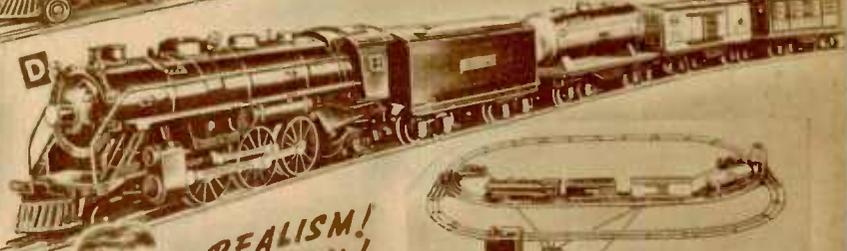

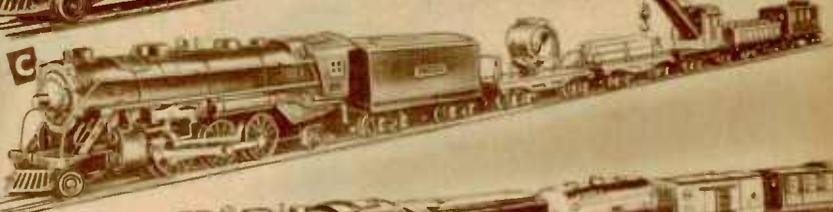

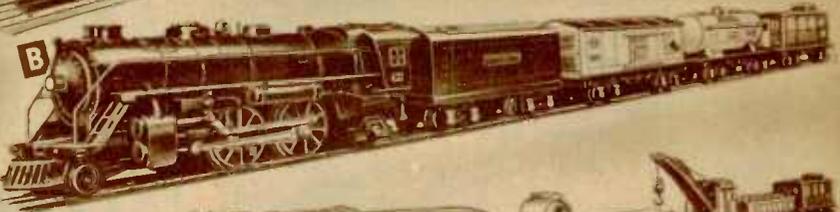

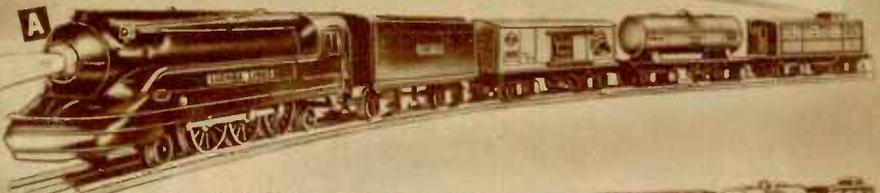

- 1 No. 1668 Locomotive
- 1 No. 1689W Tender
- 1 No. 1679 Box Car
- 1 No. 1680 Oil Tank Car
- 1 No. 1682 Caboose
- 8 Sections 1013 Curved Track
- 2 Sections 1018 Straight Track
- 1 UTC Lockon
- 1 No. 1040 Combination Transformer and Whistle Controller.

Note that this outfit comes complete with transformer and is ready to operate the moment you get it. The train is 44 inches long and the track supplied will form an oval 27½ by 36¾ inches.

No. 1073W "027" Freight Train Outfit complete with transformer. Shpg. wt. 14 lbs. List Price \$11.75. **YOUR COST \$8.36**

The above outfit is also available without the whistle and then includes a smaller transformer without the whistle control features.

No. 1073 - Freight Train Outfit less whistle and with No. 1029 Transformer. Shpg. wt. 12 lbs. List Price \$7.95. **YOUR COST \$5.66**

REALISM!
ACTION!
THRILLS!

B "027" Series No. 1087W Freight Train Outfit

This interesting train of freight cars is hauled by an accurately detailed four-drive-wheel locomotive. The boiler and cab of the locomotive are interesting detail. You can run it forward or backwards and operate its realistic whistle entirely by remote control. The whistle can be blown when the train is still or running at any speed. The cars furnished are attractively enameled in bright colors. The complete outfit including:

- 1-No. 1664 Locomotive
- 1-No. 1689W Tender
- 1-No. 1679 Box Car
- 1-No. 1680 Oil Tank Car
- 1-No. 1682 Caboose
- 8-Sections 1013 Curved Track
- 2-Sections 1018 Straight Track
- 1-UTC Lockon
- 1-No. 1040 Combination Transformer and Whistle Controller.

Note that this outfit comes complete with transformer ready to operate. The train is 44 3/8 inches long. Track supplied forms an oval 27½ by 36 3/8 inches.

No. 1087W "027" Freight Train Outfit complete with transformer. Shpg. wt. 15 lbs. List Price \$13.75. **YOUR COST \$9.79**

The above outfit is also available without the whistle and then includes a smaller transformer without the whistle control feature.

No. 1087 - Freight Train Outfit less whistle and with No. 1029 Transformer. Shpg. wt. 13 lbs. List Price \$9.95. **YOUR COST \$7.09**

C "027" Series No. 1097W Completely Electrified Freight Train Outfit

This new model is one of the "grandest" values we have ever seen. It is completely "electrified" having all of the new Lionel features such as "electric remote control couplers," "electrically unloaded lumber and gondola cars," "operating crane," "built-in whistle," "electric floodlight car", etc. The big six-drive-wheel locomotive hauls the long five-car train with ease and can be operated forward or reverse at will by remote control. The complete train includes:

- 1-No. 1666 Locomotive
- 1-No. 2689W Tender
- 1-No. 2679 Box Car
- 1-No. 2680 Oil Tank Car
- 1-No. 2682 Caboose
- 8-Sections 1013 Curved Track
- 3-Sections 1018 Straight Track
- 1-No. 1019 Track Set
- 1-UTC Lockon
- 1-No. 1040 Combination Transformer and Whistle Controller

The complete train is 60¾ inches long. The track supplied forms an oval 27½ by 54 inches. Note that a transformer is supplied with this outfit and that it is complete and ready to operate the moment you get it. The track set supplied is used with the electrically operated lumber and gondola cars for dumping and all the others for uncoupling.

No. 1097W "027" Completely Electrified Freight Train Outfit complete with transformer. Shpg. wt. 21 lbs. List Price \$25.00. **YOUR COST \$17.81**

D "027" Series No. 1089W Freight Outfit

Hauled by the largest locomotive made in "027" gauge this is a really impressive outfit at a very reasonable price. The locomotive is die-cast, accurately detailed and "scale proportioned". It has six large drive wheels and an interesting drive gear. The locomotive alone stands 3" high and with its tender is 16" long. It has a built-in whistle that is very realistic. It can be run forward, stopped and reversed at will entirely by remote control. All cars have remote-control "electric couplers". The complete outfit includes:

- 1-No. 1666 Locomotive
- 1-No. 2689W Tender
- 1-No. 2679 Box Car
- 1-No. 2680 Oil Tank Car
- 1-No. 2682 Caboose
- 8-Sections 1013 Curved Track
- 3-Sections 1018 Straight Track
- 1-No. 1019 Track Set
- 1-UTC Lockon
- 1-No. 1040 Combination Transformer and Whistle Controller.

Note that this outfit includes the transformer and is ready to operate the moment you get it. The train is 45½" overall and track forms oval 27½ by 45¼".

No. 1089W "027" Freight Train Outfit with whistle and transformer. Shpg. wt. 17 lbs. List Price \$16.50. **YOUR COST \$11.76**

No. 1089 - Same as above but without whistle and with No. 1029 transformer in place of the 1040. List Price \$12.75. **YOUR COST \$9.08**

No. 1093W Freight with Switches This outfit is the same as the No 1089W outfit but also includes a pair of No. 1121 remote control switches and 2 more sections of 1013 curved track and 2 more sections of 1018 straight track. The complete outfit is illustrated directly below the 1089W. Shpg. wt. 21 lbs. List Price \$21.25. **YOUR COST \$15.14**

No. 1093 - Same but without whistle. List Price \$17.50. **YOUR COST \$12.47**

WATCH THE LIONEL DO ALL THE THINGS A REAL TRAIN DOES!

A "O27" Series No. 1091W Freight Train Outfit

A Lionel Freight Train Outfit that includes an abundant opportunity for thrills and action. It whistles, reverses, uncouples and loads—entirely by remote control! The big six-drive-wheel locomotive hauls the four car freight train with ease right up to the unloading bin—a touch of the button—and out of the dump car slides a load of coal. The complete train includes:

- 1—No. 1666 Locomotive
- 1—No. 2689W Tender
- 1—No. 2679 Box Car
- 1—No. 3659 Electric Dump Car
- 1—No. 2680 Oil Tank Car
- 1—No. 2682 Caboose
- 1—No. 160 Unloading Bin
- 8—Sections 1013 Curved Track
- 5—Sections 1018 Straight Track
- 1—No. 1019 Track Set
- 1—UTC Lockon
- 1—No. 1040 Combination Transformer and Whistle Controller.

A generous supply of realistic artificial coal.
Note: That this outfit includes the transformer and is ready to operate the model you get it. The train is 54 inches long and the track supplied forms an oval 27½ by 54½ inches.

THE TYPE "Q" TRAINMASTER TRANSFORMER WILL OPERATE THE ABOVE OUTFITS. THE TYPE "R" TRAINMASTER TRANSFORMER OF GREATER CAPACITY WILL PROVIDE FOR MANY ADDITIONAL ACCESSORIES.

D "O27" Series No. 1095W Freight Outfit

Here is an outfit that will keep you amused for hours at a time! There are so many things that you can do! A husky six-drive-wheel steam type locomotive, hauls a train of cars around a large oval track with three tracks running the length of the oval. A pair of remote control switches permit switching the train to either mainline track.

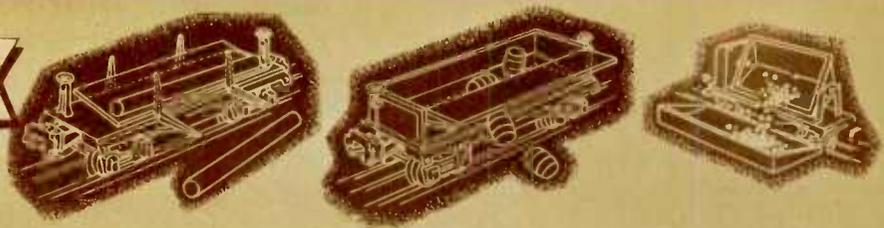

And then there is the coal bunker that has an automatic chute which can be remotely controlled to load up the coal car. A manually operated endless chain of buckets scoops the coal out of the supply well and dumps it into the top of the bunker. You run the train alongside the bunker, press a button, and down pours the coal into the dump car. Now run the train around to the unloading bin, press another button, and you dump the coal out of the car into the bin!

We haven't the space here to tell you all of the other interesting things you can do with this outfit, such as the electric spotlight car, the built-in whistle, the remote control electric couplers, etc. But just look at all you get in this outfit:

- 1—No. 1666 Six-Wheel-Drive Locomotive
- 1—No. 2689W Whistling Tender
- 1—No. 3659 Electric Dump Car
- 1—No. 2680 Oil Tank Car
- 1—No. 2620 Electric Searchlight Car
- 1—No. 2657 Caboose
- 1—No. 96 Coal Elevator
- 1—No. 160 Unloading Bin
- 1 pair—No. 1121 Electric Remote Control Switches
- 10—Sections 1013 Curved Track
- 5—Sections 1018 Straight Track
- 1—1019 Track Set
- 1—UTC Lockon
- 1—No. 1040 Combination Transformer and Whistle Controller

Large Supply of Artificial Coal. The train is 52 inches long overall. Note that the transformer is included. Shpg. wt. 29 lbs. No. 1095W—Freight Outfit as described. List Price \$29.50. YOUR COST.....

\$21.02

A "O" Gauge No. 143W Freight Train Outfit

This outfit is an exceptionally fine value. The large No. 224 locomotive furnished with this outfit is very realistic in appearance and has six driving wheels of the modern disc type with the Baldwin name, modern disc type driving action. It is 3' a very impressive and together with the coal high overall and measures 17 1/4" long. The filled tender measures a built-in whistle (also tender incorporates a built-in whistle at lower cost available without whistle that has the distinctive tone of the big powerful trains.

Another outstanding feature of this train is the electrically operated Lumber Car that dumps a load of logs by remote control—just press a button and the logs roll off into the unloading bin. All cars have electric remote control couplers. The train is 52 1/4" long and the track furnished makes an oval 51 1/8 by 30 7/8" includes:

- 1-224 Locomotive
- 1-2224W Tender
- 1-2652 Gondola Car
- 1-2654 Oil Tank Car
- 1-3651 Electric Lumber Car
- 1-2657 Caboose
- 1-160 Unloading Bin
- 8-OC Curved Track
- 3-OS Straight Track
- 1-RCS Track Set
- 1-UTC Lockon
- 1-Whistle Controller

No. 143W—Outfit with whistle. Shpg. wt. 20 lbs. List Price \$21.75. **\$15.50**

YOUR COST.....
No. 143—Same outfit as above but without whistle and whistle controller. Shpg. wt. 19 lbs. List Price \$18.00. **\$12.83**

YOUR COST.....
Type "Q" Transformer will operate either of the above trains. Type "R" will provide for many additional accessories.

ELECTRIC
REMOTE CONTROL
COUPLERS

B "O" Gauge No. 145W Freight Train Outfit

One of the most versatile outfits that Lionel has ever offered. Three of its cars unload electrically by remote control. It has an operating crane. A whistle. And all cars have electric couplers. You can duplicate almost every operation of a real railroad by remote control. You can go forward, stop and reverse at will. You can dump a load of coal from your coal car—unload a consignment of barrels from your gondola car—roll a shipment of logs off the flat car—entirely by remote control by just pressing a button! The powerful crane can be used in numerous ways but the most popular will be the lifting of one of your derailed cars back onto the track after a wreck. You can also uncouple any car by remote control. The locomotive has six disc type driving wheels with the name Baldwin on them. Train is 60 3/4" long and track supplied forms an oval 51 1/8 by 30 7/8 inches. Outfit includes:

- 1-224 Locomotive
- 1-2224W Tender
- 1-3659 Electric Dump Car
- 1-3652 Electric Gondola Car
- 1-2660 Crane Car
- 1-3651 Electric Lumber Car
- 1-2657 Caboose
- 8 Sections OC Curved Track
- 3 Sections OS Straight Track
- 1 RCS Track Set
- 1-UTC Lockon
- 1 Whistling Controller
- 3-160 Unloading Bins

No. 145W—Outfit with whistle. Shpg. wt. 22 lbs. List Price \$29.50. **\$21.02**

YOUR COST.....
The type "Q" Trainmaster Transformer will operate this train. Type "R" which is larger will provide extra power for many additional electric accessories.

C "O" Gauge No. 151W Freight Train Outfit

Here is a complete coaling outfit. The powerful looking No. 225 Locomotive with its six modern disc type driving wheels lens projected headlight and its air compressors on one side of the engine, make this a very realistic heavy freight. The engine is 3 1/2" high and with its coal filled tender is 17 3/4" long. Three electrically operated dump cars dump their load of coal automatically at the touch of a remote control button. And the coal elevator is also entirely electrically operated. Coal is placed in the well and at the touch of a button an electric motor drives a chain of buckets to take it to the loft. The touch of another button opens the gate and the coal slides down the chute into the coal cars. The track furnished with the outfit forms an oval 51 1/8 by 30 7/8 inches. Outfit includes:

- 1-225 Locomotive
- 1-2235W Tender
- 1-97 Coal Elevator
- 3-3659 Dump Cars
- 3-160 Unloading Bins
- 1-2657 Caboose
- 8-OC Curved Track
- 3-OS Straight Track
- 1-RCS Track Set
- 1-UTC Lockon
- 1-Whistling Controller.

Large Quantity of Artificial Coal
The length of the train overall is 51 1/4 inches.

No. 151W—Outfit complete with whistle. Shpg. wt. 29 lbs. List Price \$32.50. **\$23.16**

YOUR COST.....
The above outfit can be operated with a Type "Q" Transformer but a type "R" of greater capacity will provide for the addition of many accessories.

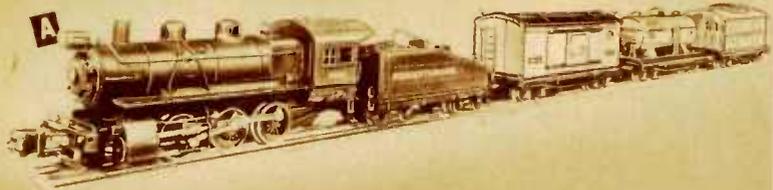

D "O" Gauge No. 193W Freight Train Outfit

Hauled by a huge whistle-equipped 2-6-4 type locomotive this completely equipped work train is an impressive outfit. The No. 226 Locomotive and its tender alone are 21 1/2 inches long! It is a die-cast scale model that is very realistic. The complete train includes everything necessary for a construction, wreck, or work train. The gondola car has a set of tools and the crane car is powerful enough to lift a car onto the track with ease. A twin floodlight car with adjustable lamps will flood the scene of operations with plenty of light. The lights can also be kept lit while the train is running. Electric remote control couplers permit uncoupling any car by merely pressing a button. All operations, starting, stopping, reversing and uncoupling can be performed at a central location. The train is 65 inches long and sufficient track is supplied to make an oval 61 1/4 by 30 7/8 inches in size. Outfit includes:

- 1-226 Locomotive
- 1-2226W Tender
- 1-2812 Gondola Car with tools
- 1-2810 Crane Car
- 1-2820 Floodlight Car
- 1-2817 Caboose
- 8 Sections OC Curved Track
- 5 Sections OS Straight Track
- 1-RCS Track Set
- 1-UTC Lockon
- 1-Whistle Controller

No. 193W—Outfit with whistle. Shpg. wt. 27 lbs. List \$37.50. **\$26.72**

YOUR COST.....
The Type "R" Trainmaster Transformer will operate this train. However, the larger, more powerful, Type "V" Trainmaster Transformer is recommended since this will allow for the addition of more accessories.

LIONEL GAUGE

SWITCHING ENGINE FREIGHT OUTFITS

A "O" Gauge Nos. 239-239B-241 and 241B Switching Engine Outfits

These new outfits have a switching engine and tender that can be uncoupled from the other cars by remote control anywhere—at anytime on any kind of track! Locomotive and tender are perfect scale models with die-cast cab and boiler, chromium plated drive rods and stainless steel pipes. Electric bell with a deep tone rings continuously or can be turned off by a lever.

All outfits have the same equipment except for size of cars. Engine and tenders match car sizes. Train includes: box car, oil tank car, caboose, 8 OC curved track, 3 straight track, 1 RCS track set, UTC lockon, No. 169 uncoupling and reversing controller. Note that all cars have standard remote control couplers for uncoupling on RCS track section only—only engine with tender uncouples anywhere.

No. 239B—Outfit as described with 2651 series cars. With bell. Shpg. wt. 19 lbs. List Price \$33.50.
YOUR COST..... \$22.37

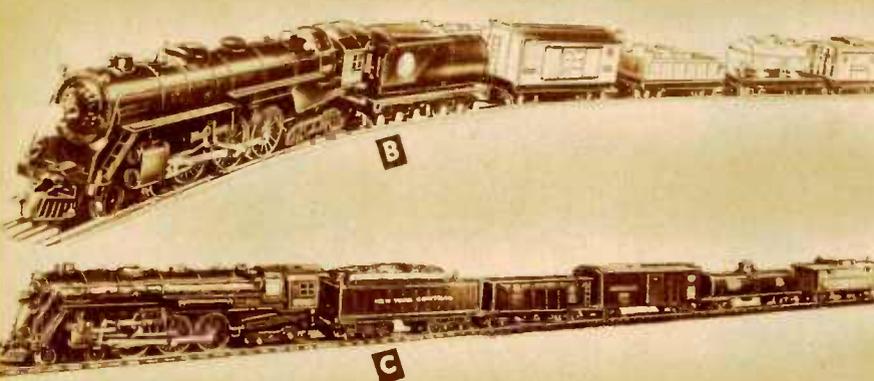

No. 239—Same as above but without bell. List Price \$29.50.
YOUR COST..... \$21.02

No. 241B—Outfit as described with 2800 series cars. With bell. Shpg. wt. 21 lbs. List Price \$36.50.
YOUR COST..... \$26.00

No. 241—Same as above but without bell. List Price \$32.50.
YOUR COST..... \$23.16

TYPE "Q" TRAINMASTER TRANSFORMER WILL OPERATE ANY OF THE ABOVE TRAINS BUT THE LARGER TYPE "R" TRAINMASTER TRANSFORMER WILL PROVIDE FOR MANY ILLUMINATED OR AUTOMATIC ACCESSORIES.

NEW
WITH LOCOMOTIVES
THAT UNCOUPLE
ANYTIME
Electrically

B "072" Series No. 767W "O" Gauge Freight Train

An extra large modified scale model Hudson Locomotive, with six-wheel drive and four wheel pilot and trailer trucks, together with a twelve wheel fuel oil tender forms the power unit of this fine train. It is a beautifully designed and detailed locomotive that is very realistic. The "072" track, which is necessary because of the length of the locomotive, differs from other "O" gauge track because of its wider radius. This track forms a circle 72" in diameter instead of the normal 28 1/2". The complete train consists of the following:

- 1—No. 763 Locomotive
- 1—No. 2263W Whistle Tender
- 1—No. 2814 Box Car
- 1—No. 2812 Gondola Car
- 1—No. 2815 Oil Tank Car
- 1—No. 2817 Caboose
- 16—Sections 761 Curved Track
- 2—Sections 762 Straight Track
- 1—Section OS Straight Track
- 1—RCS Track Set
- 1—UTC Lockon
- 1—Whistling Controller

All cars are equipped with remote control electric couplers and the train is equipped with a built-in whistle. Train is 65 1/2 inches long. The track supplied forms an oval 98 1/2 by 74 1/4 inches.

No. 767W—"072" Freight Outfit complete with built-in whistle. Shpg. wt. 29 lbs. List Price \$42.50.
YOUR COST..... \$30.25

Track furnished with this outfit is standard "072" tubular type track. Outfit can be operated, if desired, on special solid rail track—see page L-6.

TYPE "R" TRAINMASTER WILL OPERATE THIS TRAIN. TYPE "V" WILL PROVIDE FOR THE ADDITION OF NUMEROUS AUTOMATIC AND ILLUMINATED ACCESSORIES.

C "OO" Gauge Midget Scale Model Trains Nos. 0080-0082-0090 and 0092

Super-Detailed Engine and 4 Car Train

No. 0090W—With 2-rail Track, Whistle equipped. Nos. 003 Locomotive, 003W Tender, 0044 Box Car, 0046 Coal Car, 0045 Oil Car, 0047 Caboose, 11 Curved Track, 1 Connection Track, 1 Whistling Controller. Train is 41" long, Track 50" in diam. Shpg. wt. 17 lbs. List \$42.25.

YOUR COST..... \$30.11

No. 0090—As above but without whistle. List \$37.50.
YOUR COST..... \$26.72

No. 0080W—With 3-rail track. Similar to 0090W but 3-rail track makes an oval 41" by 27". List \$39.75.

YOUR COST..... \$28.32

No. 0080—As above but without whistle. List \$35.00.
YOUR COST..... \$24.94

Modified Engine and 3-Car Train

No. 0092W—With 2-rail Track. Whistle equipped. Nos. 004 Locomotive, 004W Tender, 0074 Box Car, 0075 Oil Tank Car, 0077 Caboose, 11 Curved Track, 1 Connection Track, Whistle Controller. Train is 35" long. Track forms circle 50" diameter. Shpg. wt. 16 lbs. List \$34.75.

YOUR COST..... \$24.75

No. 0092—As above but without whistle. List \$30.00.
YOUR COST..... \$21.38

No. 0082W—With 3-rail Track. Similar to 0092W but 3-rail track makes an oval 41" by 27". List \$32.25.

YOUR COST..... \$22.98

No. 0082—As above but without whistle. List \$27.50.
YOUR COST..... \$19.60

"OO" Gauge Cars & Kits

Assembled Cars and Car Kits for 2-rail or 3-rail "OO" gauge outfits. Kits contain everything required—even enamel, decalcomanias and a brush. Only tools needed are a hammer, screwdriver

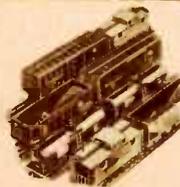

and nailset. Box Car—6 7/8" long; Oil Tank Car—5 3/4"; Hopper (Coal) Car—5 1/2"; Caboose—4 5/8". Shpg. wt. 5 lbs.

FLAT CAR

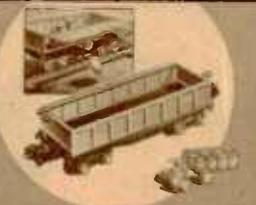

NEW! Electrically Operated Freight Cars

Electrically Operated Flat Car With Lumber
 Nickered stakes hold in a real load of lumber — your train rolls to a stop with the flat car alongside the unloading bin — a flip of your finger and the bottom of the car tilts and out roll your logs. Now send the "empty" to the yards — touch the button . . . car is uncoupled.
 No. 3651 For "O" and "027" 6 1/2" long. **\$2.50**
 YOUR COST
 No. 3811 For "O" and "072" 8 1/2" long. **\$3.21**
 YOUR COST

Electrically Operated Dump Car With Coal
 This car is furnished complete with a bakelite unloading bin and a sack of artificial coal. It will dump the coal by remote control and also has electric couplers. Like all the cars in this series it requires either the RCS or 1019 Trackset. (See page L-6).
 No. 3659 — For "O" and "027" Gauge. 6 1/2" long. **\$2.67**
 YOUR COST
 No. 3859 — For "O" and "072" 8 1/2" long. **\$3.38**
 YOUR COST

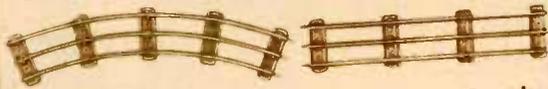

Electrically Operated Gondola Car With Barrels
 Another model of the electrically operated series. This one, a gondola car, unloads 12 barrels into an unloading bin by remote control. Just touch a button — the side of the car lifts — and out tumble the barrels. And, like the others, it too has electric couplers so that you can uncouple it electrically by remote control. The car is 6 1/2" long and 2 1/2" high. For "O" and "027" gauge track. No. 3652. **\$2.50**
 YOUR COST

Electric Merchandise Car With Cases
 One of the most ingenious cars ever designed. By remote control you open the door and dump out a shipping case! And you get 12 such cases with each car plus a bakelite unloading bin. Car has electric couplers that enable you to uncouple the cars by remote control. Car is 8 1/2" long and 3 3/4" high. This car is for use with "O" and "072" gauge outfits only. (2800 and 800 series cars). No. 3814. **\$3.56**
 YOUR COST

TRACKS SWITCHES

"O" Gauge Track

1 3/8" wide. Double flange for greater strength. Perfectly insulated and tested.
 OC—Curved track, 11" long.
 OS—Straight track, 10 1/4" long.
 1/2 OC—1/2 section curved track, 5 inches long.
 1/2 OS—1/2 section straight track, 5 inches long.
 Any above type. Shpg. wt. 1 lb. List 20c.
YOUR COST 14c

"072" Wide Radius

16 curved sections form 72" diam. circle. 1 3/8" wide.
 No. 761—Curved, 14" long.
 No. 762—Straight, 15" long.
 List 35c. Either Type.
YOUR COST 25c

Standard Gauge

Double flange for greater strength. Oxidized black ties.
 C—Curved track, 16" long.
 S—Straight track, 14" long.
 1/2 S—1/2 section straight track, 7 inches long.
 1/2 C—1/2 section curved track, 8 inches long.
 Any above. List 35c.
YOUR COST 25c

UTC Lockon

A universal connector for use with any style or gauge track except "OO". Clamps rigidly, makes perfect contacts. Shpg. wt. 1 lb. List 40c.
YOUR COST 29c

"027" Gauge Track

Double rigid turned back flange rail. Three black ties on curved and straight sections. Over-size insulators on third rail.
 No. 1013—Curved track, 9 1/2".
 No. 1018—Straight section 8".
 List 15c.
 Either type above.
YOUR COST 10c

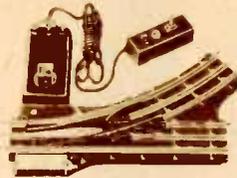

Solid Rail Track

All have bolts, fish-plates, spikes, tie-plates, closely spaced black ties. 16 sections curved form circle 72 inches in diameter. Regulation 1 3/8" wide, "O" Gauge.
 No. 771—Solid rail curved track, 14" long.
 No. 772—Solid rail straight track, 15" long.
 Shpg. wt. 1 lb. List Price 60c. Either type above.
YOUR COST 43c
 No. 773—Fish Plate Outfit. 100 bolts, 100 nuts, 50 plates and special wrench.
 List \$1.25. **YOUR COST . . . 89c**

Extra Track Pins

OC-18—Steel track pins. For all track. List 10c per dozen.
YOUR COST 7c
 O11-11—Fibre track pins. List 5c each.
YOUR COST, EACH 3 1/2c
 1013-17—Steel pins for "027" track. List per dz. 10c.
YOUR COST, per dozen . . . 7c

REMOTE CONTROL

"027" Gauge

Has red and green lights at both switch and remote control. Swivel rails act fast at low voltage. Shpg. wt. 4 lbs. List \$6.75.
 No. 1121—Pair.
YOUR COST \$4.80

"O" Gauge

Non-derailing type. Molded bakelite base. Lamps at switch and controller. 10 1/2" long. Pair: 1-right, 1-left. Shpg. wt. 6 lbs. List \$11.50.
 No. 022—Pair.
YOUR COST \$8.20

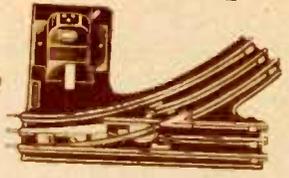

"072" Gauge

Non-derailing type with red and green lights at both switch and control head. 14 3/8 inches long. Shpg. wt. 8 lbs. List Price \$13.50.
 No. 711—Pair.
YOUR COST \$9.60

Standard Gauge

Non-derailing type with red and green lights at switch. Heavy steel base with best fibre insulation. Shpg. wt. 7 lbs. List Price \$13.50.
 No. 223—Pair.
YOUR COST \$9.60

MANUAL TYPE

"027" Gauge

Hand lever operated. Solidly constructed of steel and perfectly insulated. 9 1/8 inches long. 5 1/8" wide. Shpg. wt. 2 lbs. List Price \$2.75.
 No. 1024—Pair.
YOUR COST \$1.96

"O" Gauge

By means of a lever at the side of the control box the swivel rail and signal light are turned. Shpg. wt. 4 lbs. List Price \$6.95.
 No. 042—Pair.
YOUR COST \$4.95

"072" Gauge

Actuated by means of a lever on the base which also changes the signal light. 14 3/8 inches long. Shpg. wt. 7 lbs. List Price \$7.50.
 No. 721—Pair.
YOUR COST \$5.35

Standard Gauge

Lever on base changes switch and rotates signal light. Shows red one way—green the other. 15 1/4" long. Shpg. wt. 6 lbs. List Price \$7.50.
 No. 210—Pair.
YOUR COST \$5.35

REMOTE CONTROL TRACK SETS

1019
&
RCS

This five rail track must be used in operation to operate either the electric couplers or the dumping operations of the electrically operated cars listed elsewhere in this book. Most of the cars, and outfits containing these cars, come with one section of this track. Additional sections should be added to permit operation at other points in the system. Include control and 30" cable.
 No. 1019—For "027" Gauge. List \$1.25.
YOUR COST 89c
 RCS—For "O" Gauge. List \$1.50.
YOUR COST \$1.07

"O" Gauge BUMPER

A big, husky bumper built just like its real-life counterpart. There is a brightly lit warning light, that is well protected, on the top. Furnished with 1 section of "O" gauge track.
 No. 025—List \$2.00.
YOUR COST \$1.43

No. 41 CONTACTOR

Placed under track where weight of train passing over it closes a pair of contacts. For any gauge except "OO". Wt. 1 lb. No. 41—List \$1.00.
YOUR COST 71c

No. 95 RHEOSTAT

Most transformers have too great a voltage difference between taps to permit delicate control of train speed. This rheostat overcomes this difficulty very effectively. Wt. 1 lb.
 No. 95—List \$2.75.
YOUR COST \$1.96

CONTROLLER

Can be used to start, stop or reverse locomotives equipped for remote control. Made of steel. Silver contacts. Wire included. Shpg. wt. 1 lb. No. 88—List \$1.00.
YOUR COST 71c

Grade Crossings

No. 1021 Crossover
 90 degree crossover, black enamel base, to match ties of "027" gauge track. Bakelite center insulator at intersection. 7 3/8" square. Shpg. wt. 1 lb. List \$1.00.
YOUR COST 71c

"O" Gauge Crossovers

No. 020X—45-degree crossover. 11 3/4" long, 6 1/4" wide. Bakelite crossover insulation. Shpg. wt. 1 lb. List \$1.75.
YOUR COST \$1.25
 No. 020—90-degree crossover. On steel base, bakelite insulation. 8 3/8" square. Shpg. wt. 1 lb. List \$1.50.
YOUR COST \$1.07

Solid Rail 90° Crossing

Similar in appearance to the crossing illustrated above but with solid rail track. Wt. 2 lbs. List \$2.75.
 No. 730—YOUR COST **\$1.96**

GRASS

8 ounce bags of specially prepared artificial grass. Not to be confused with cheaper "dime store" type. Bright green color. Shpg. wt. 1 lb. No. 919.
PER BAG . . . 22c

No. 720 Crossover Illustrated

"072" Crossover

No. 720—90-degree crossover mounted on embossed steel base, Bakelite block insulation. 14 1/2" sq. List \$2.25.
YOUR COST \$1.60

Standard Gauge Crossover

No. 20—90-degree crossover mounted on ribbed steel base. Bakelite block insulation. 11 3/4" sq. List \$2.00.
YOUR COST \$1.43

Solid Rail R.C. Switch

Remote control operated switch similar to illustration at top of page but with solid rail track. Shpg. wt. 8 lbs. List \$15.00.
 No. 731—Pair.
YOUR COST \$10.69

LUBRICANT

Replaces ordinary oil and assures efficient operation for a longer period of time. Life of working parts is greatly increased. Especially designed for model trains. 2 oz. tube.
 No. 925. List 25c.
YOUR COST 18c

NEW "TRAINMASTER" TRANSFORMERS

●BUILT-IN CIRCUIT BREAKER ●MULTIPLE CIRCUITS ●VOLTAGE GAUGES ●4 SIZES
TRAINMASTERS have built-in circuit breakers with red warning light, green "power-on" light, multiple circuits, 1/4 volt step controls that eliminate rheostats, voltage and "miles-per-hour" calibrations on controls, direction-control that enables you to stop the train then start it again in the same direction without touching the reverse button. Types "V" and "Z" have bakelite cases, "Q" and "R" enameled steel.

Following shows transformer to use for train only. With accessories use next larger size Type Q: all "00", 138(W), 139(W), 140(W), 141(W), 143(W), 145(W), 146(W), 147(W), 149W, 151W, 239(B), 241(B), 267(W), 299W. Type Z: Like V, with accessories.

Type "Z"—250 Watts

Binding posts are provided for 4 independent circuits, all having a controllable range of from 0 to 25 volts. Size 7 1/2" wide, 8" long, 6 1/2" high. For 115 volts, 60 cycles a.c. Bakelite case. Built-in circuit breaker and warning light.

List Price \$12.50.
YOUR COST

\$8.90

Type "V"—150 Watts

Binding posts are provided for four independent circuits each having a controllable range of from 0 to 25 volts. Dimensions: 7 1/2" wide, 8" long, 6 1/2" high. Bakelite case. Built-in circuit breaker and warning light.

List Price \$10.00.

YOUR COST

\$7.12

Type "R"—100 Watts

Binding posts are provided for 2 independent circuits both having a controllable range from 0 to 25 volts. In addition there are accessory winding posts for accessory operation. 5" wide, 5 1/2" long, 4 3/8" high. Built-in circuit breaker.

List \$8.00. EACH

\$5.70

Type "Q"—75 Watts

Control knob can be used to regulate output in ranges of 8 to 18 volts or 14 to 24 volts depending upon posts used. Additional posts for accessories deliver 6, 8, or 14 V. 5 1/2" L x 5" W x 4 3/8" H. Built-in circuit breaker. Steel case.

List Price \$5.75.

YOUR COST

\$4.10

STANDARD TYPE "W" TRANSFORMER

Conventional transformer without circuit breaker. Standard tap switch regulation for train speed. Can be used for illuminated and automatic accessories. For use with any of the trains listed under type "Q" above. List \$3.75.

YOUR COST

\$2.67

CIRCUIT BREAKER No. 91

Automatically shuts off current in case of short circuit. Red warning light on top of breaker shows when short occurs. A mighty useful device for any model railroad. Shpg. wt. 3 lbs. List \$3.50.

YOUR COST

\$2.50

WARNING SIGNAL No. 69N

Protect your crossings with this automatic warning bell. Rings when train approaches crossing - stops when it has passed. For any gauge track. Complete with contactor and full instructions. Steel bells simulate those on a real railroad. Wt. 2 lbs. No. 69N. List \$2.75.

YOUR COST

\$1.96

AUTOMATIC LIGHT TRAIN CONTROL-99N

As train passes over contactor red light shines and train is stopped. After an interval red goes out, green shines. Light changes to yellow after last car is passed. 11 1/4" H. Contactor and 2 lock-ons supplied. Shpg. wt. 3 lbs. List \$5.50.

YOUR COST

\$3.92

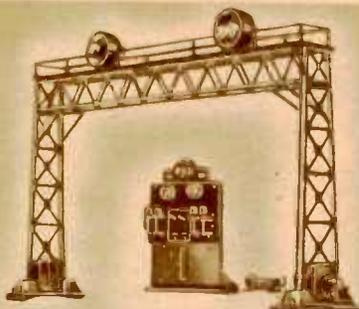

ARTIFICIAL COAL

An excellent imitation that is very realistic. Dustless and easily handled. You should have at least a few bags on hand. Shpg. wt. 1 lb. No. 206. List 25c.

YOUR COST

18c

440N Light-Position Twin-Signal Bridge

Three lights are illuminated in each signal head at a single time; vertical for "Go", horizontal for "Stop". Actually controls train, stopping, starting or permitting through runs. Signals are for use on either single or double track and are operated independently by means of the remote control board which is included with the bridge. Direction of lights can be reversed. Complete with four Lockons. 20 1/2" wide, 14" high. Shpg. wt. 11 lbs.

List \$11.50.

YOUR COST

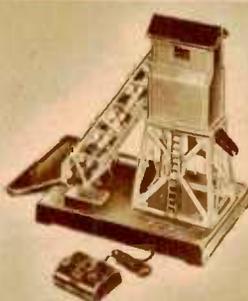

\$8.20

Electric Coal Bunker

A simplified coal storage bunker which affords all of the fun of remote control car loading without the use of a bucket elevator. Coal is poured by hand into the funnel at the top of the loft. At the touch of the remote control button a gate on the inside of loft is opened permitting the coal to pour down chute into waiting car. A quantity of coal as well as a remote control button is furnished. Overall height of the elevator is 12". Shpg. wt. 6 lbs. No. 98--Coal Bunker. List \$3.95.

YOUR COST

\$2.80

Electric Coal Elevator

This electric elevator is similar to the one described at the left but also includes an endless chain of buckets which scoops the coal from a well and dumps it into the top of the elevator. This bucket chain is driven by an electric motor. The remote control furnished with this outfit contains two buttons one for the motor the other for the gate. When the gate is opened the coal slides down the chute and pours into the waiting car. Overall height is 12 1/4", base 7 by 12 inches. With large quantity of coal. Wt. 7 lbs. No. 97--List \$7.50.

YOUR COST

\$5.35

Whistling Station

A simple way to add a whistle to any train outfit. Regular Lionel whistle unit is built into this attractive station. Press the lever on the side of the station and a realistic whistle is heard. Especially suitable for 25 cycle current where built-in whistle cannot be used. Not suitable for outfits using type 1029 transformer. Shpg wt. 2 lbs. No. 48W. List Price \$3.00.

YOUR COST

\$2.14

Mazda Bulbs

For all Lionel Trains and Accessories.
 No. 27 - 12 volt 1/2" round lamp. For all "O" gauge equipment.

18c

AUTOMATIC SEMAPHORES Standard Type 80N

This realistic bit of equipment operates exactly like its real-life counterpart automatically. As counterpart passes over the conveyor train passes over the conveyor the semaphore arm raises and a green light shines. When the train has passed the arm drops and the red light goes on. It is loads of fun and will operate with any gauge track. With contactor. Wt. 4 lbs. No. 80N--List \$4.25.

YOUR COST

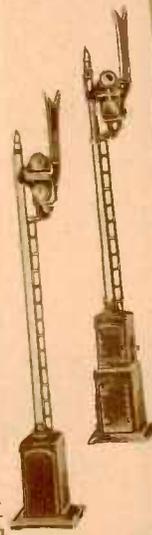

\$3.00

Train Control Type 82N

This one is even more realistic than the one described above. When the train approaches the semaphore arm is down and the light is red. The train stops automatically. After a short interval the arm raises, the green light goes on and the train proceeds on its way. Action is entirely automatic. Overall height 14 1/4". Bulb, wires, two lockons and a contactor are furnished with each unit. It is simple to install and complete instructions are furnished with each semaphore. As many of these units as desired may be installed on a single system. Shpg. wt. 4 lbs. No. 82N--List \$6.75.

YOUR COST

\$4.80

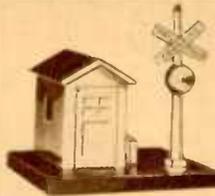

REALISM! ACTION! LIONEL Accessories

OPERATING WATCHMAN No. 1045

A clever electrically operated accessory that will put a lot of action and interest in your railroad. When the train approaches his station the watchman waves his little red flag to warn auto drivers and pedestrians that a train is coming. He stops after the train has passed. This accessory may be used with any track except "OO", solid rail and standard gauge. It is 7" high. Base is finished in green, watchman in blue, warning signal post in white with yellow sign. A very lifelike and attractive accessory. Shpg. wt. 2 lbs. No. 1045—List \$2.00.
YOUR COST..... \$1.43

Watchman's Shanty With Ringing Bell No. 76

A new accessory designed to add realism to the model railroad. For use with any track except "OO" gauge. Its action is entirely automatic. When a train draws near the bell begins to toll a warning. As the last car passes the bell stops ringing. Signal, shack and base are made of heavy steel, attractively enameled. It comes complete with a No. 41 contactor and necessary wire. Practically all owners of model railroads will appreciate this accessory as a gift because it is new this year and was never before available. Shpg. wt. 4 lbs. No. 76—List \$3.75.
YOUR COST..... \$2.67

Automatic Gateman No. 45N

One of the most ingenious, and still one of the most popular, accessories ever designed by Lionel, accessories ever shack and door is closed until train approaches. When locomotive draws near, door swings open, and gateman rushes out swinging an illuminated lantern. After last car has passed gateman returns to his shack and door closes. For any track except "OO".
No. 45N—List \$3.95. EACH... \$2.80

Automatic Crossing Gate

As train approaches red light flashes on and gate is lowered. When train passes light goes off and gate rises. Gate is 11 inches long. For any track except "OO" gauge. Complete with contactor and wire. Shpg. wt. 2 lbs. List \$2.75.
No. 77N—EACH... \$1.96

Automatic Illuminated Double Arm Crossing Gates

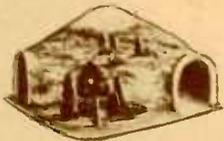

An accessory that is true to scale and lifelike in action. For any style track except "OO" gauge. Gates have both pedestrian and vehicular arm extensions. Scissor gates lower automatically and tiny red lights are illuminated when train approaches. Lift and lights go off when train has passed. Heavy gauge steel. Base is 16 1/2 by 3 1/2 inches. Long arm measures 6 inches. Enameled in natural colors. Accurately proportioned lanterns. With contactor and wire.
No. 47—List \$4.95. Shpg. wt. 3 lbs. EACH..... \$3.52

Automatic Illuminated Crossing Gate

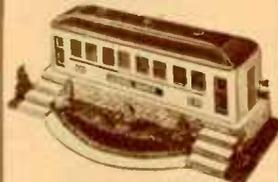

This gate is exactly the same as the double gate described at the left but is a single gate only, for one pedestrian walk and a roadway half the width. 6 inch arm. Illuminated lantern and automatic in operation as described for double gate. For any track except "OO" gauge. Shpg. wt. 2 lbs. List \$3.00.
No. 46—EACH..... \$2.14
YOUR COST..... \$2.14

Curved Tunnel No. 123
For all "O" gauge outfits except Nos. 193W, 197W and those with wide radius track. Constructed of felt composition. 18 3/4" long, 16 1/2" wide and 9" high. Portals 4 1/2" wide and 5 1/4" high. Shpg. wt. 9 lbs. List \$3.75.
No. 123—EACH..... \$2.67
YOUR COST..... \$2.67

Illuminated Platform No. 156 is a new beautifully designed illuminated station platform that will be found useful for intermediate station stops. Fence divides platform from end to end. Illuminated by two lamps under roof. Shpg. wt. 3 lbs. No. 156—List \$2.75.
YOUR COST..... \$1.96

Illuminated Diner No. 442—An interesting scenic addition to any outfit. Interior is illuminated. Base is landscaped attractively. 10 1/2" wide, 3" high. Shpg. wt. 3 lbs. List \$2.50.
No. 442—EACH..... \$1.78
YOUR COST..... \$1.78

Single Span Bridge No. 270—Bridges of this type are used on the rights-of-way of nearly all railroads. For "O" gauge track. Deeply embossed heavy steel, brightly enameled. Complete with one section of track. Shpg. wt. 2 lbs. List \$2.00. EACH.
No. 270—EACH..... \$1.43

Lamp Posts

No. 58—A graceful design similar to the posts used in big cities. Baked enamel ivory finish. Equipped with globe. The post is 7 1/2" high. Shpg. wt. 1 lb. List \$1.50.
No. 58—EACH... \$1.07

No. 56

No. 56—Commonly used in parks and parkways. Green enameled base. List \$1.75.
No. 56—EACH... \$1.25

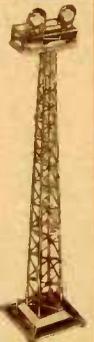

Freight Handling Set
Two hand trucks, a dump truck and a baggage truck. Each has wide, strong, die-cast wheels and is finished in enamel. Shpg. wt. 2 lbs. No. 163—List \$2.75.
YOUR COST..... \$1.96

Water Tank

If your train is headed by a steam type locomotive, this water tank will add a great deal of realism to your railroad. Tank has an adjustable spout. Shpg. wt. 2 lbs. No. 93—List \$1.25.
YOUR COST..... \$0.89

Floodlight Tower

Just the thing for your yards and round-house trackage. Also used for baseball parks and stadiums. Two powerful searchlights with polished reflectors. May be adjusted independently to any angle. Steel girder construction. Tower is 20 3/4 inches high and beautifully enameled. Easily connected. Lamps and wire included. Shpg. wt. 4 lbs. List \$3.75.
EACH... \$2.67

No. 92

15 TUBE A.C. 3 BAND SUPER AUTOMATIC RADIO-PHONO COMBINATIONS

Custom Built
FOR THE ULTIMATE IN
Beauty & High Fidelity

Two Favorite LAFAYETTE Models

LOVERS of fine music . . . these new Lafayette Combinations were especially designed for you. You, who thrill to the beautiful compositions of the old masters, will appreciate more than anyone else how well Lafayette engineers have succeeded in bringing you a new conception of radio and recorded reproduction.

These Combinations are more than just ordinary radios with provision for playing records. They are musical instruments designed to bring you the utmost enjoyment from your favorite recordings and radio broadcasts. Listen to a Lafayette Combination . . . a thrill is waiting for you!

THE RADIO

For radio reception a highly sensitive 3-Band Superhet receiver is employed. It covers three tuning bands: 13.7 to 42.8 meters, 42.8 to 137 meters and 173 to 568 meters. Thus including all of the most popular broadcasting stations on the short wave bands as well as on the standard American broadcast band. Several important features are incorporated to insure the finest possible reception—dual "Antenn-Aires" that eliminate ordinary aerials in most locations (outside aerials can be used where reception is difficult). Push-Button Automatic Tuning, Cathode Ray Tuning Eye, a 12" Concert Dynamic Speaker, Static Control Circuit, Automatic Volume Control Circuit, RF Amplifier Stage for all bands, Beam Power Amplifier Stage, etc. The 11-tube radio circuit employs 1-6SK7 r.f. amplifier on all bands, 1-6SA7 converter, 2-6SK7 i.f. amplifiers, 1-6H6 diode detector and a.c.v.c., 1-6P5G audio amplifier, 1-6F6G driver, 2-6V6G beam power output amplifiers, 1-5Y3G rectifier and 1-6U5 tuning indicator. The tone control has four positions—(1) normal, (2) high note reduction, (3) bass boost, (4) bass boost plus high note expansion (high fidelity). The audio frequency range is essentially flat from 40 to 7500 cycles (high fidelity). Power output is 10 watts.

THE RECORD REPRODUCER

These new Lafayette Combinations incorporate what is undoubtedly one of the finest record reproducers ever designed. While part of the radio circuit, together with the large 12" Concert Speaker, is used, a separate Volume Expander Amplifier accounts in a large measure for the most thrilling reproduction of recordings you have ever heard. This expander puts back into the music the complete volume range of the original. A volume range that could not be recorded faithfully because of technical limitations present in all disc recording. This expander amplifier employs 1-6C8G twin triode tube, 1-6R7, 1-6C5 and 1-6Z55G rectifier.

Both models are available with either the famous Garrard Automatic Record Changer that will play eight 10" or eight 12" records in sequence automatically, providing almost 40 minutes of entertainment at a single loading, or the equally fine Garrard Single Record Player.

UPRIGHT CONSOLE MODELS

- BB-18** Lafayette 15-tube 3-Band A.C. Combination in Upright Console Cabinet with built-in dual Antenn-Aire and with Garrard RC-10 Automatic Record Changer. With tubes, 40" high, 26 1/4" wide, 18 1/2" deep. For 110/120 volts, 50/60 cycles a.c. Shpg. wt. 170 lbs.
Code BEVEL. **\$129.95**

GENERAL ELECTRIC

A COMPLETE

Handy Phone

SYSTEM FOR ONLY \$13⁹⁵

Once again Lafayette's tremendous purchasing power brings you a sensational bargain! A genuine GENERAL ELECTRIC Handy Phone System that listed for \$49.90 for only \$13.95! A reduction of \$36.00 (List) on a product made by one of the world's leading manufacturers.

It seems almost unbelievable that there are so many applications for a loud-speaker phone system of this type. There is hardly a place you can think of where such a system cannot serve some useful purpose. The woman in the home will appreciate the steps it saves her in calling the children from the basement playroom. A mother will appreciate the peace of mind she gets from listening in to the nursery and knowing that the baby is still asleep.

But, even more important than all of these, it is first of all a loud-speaker telephone system. A system that can be used for voice communication between two or more points at will. The person called at the Remote Station need not pick up a phone but remains where he is, and carries on the conversation in a normal tone of voice!

The basic system consists of the Master Station and one Remote Station. As many as four Remote Stations may be used. One or all may be called at the same time. They can be up to 2,000 feet away and are connected with ordinary two wire twisted lamp cord. Will operate on either A.C. or D.C. (115-125 volts) 25/50/60 cycles.

G.E. Handy Phone System—Consisting of one Master Station with tubes and one Remote Station. Less wire. LIST PRICE \$49.90

Shpg. wt. 15 lbs. YOUR COST SPECIAL \$13.95
Remote Station only—List \$9.95. YOUR COST SPECIAL \$3.95

An Unusual and Very Useful Gift

*For the Home—Use it from the nursery to your bedroom, or living room, so that you can hear the baby cry. From the dining room to the basement playroom, or shop, to call the boys to dinner. From the dining room to the kitchen, or house to garage, etc.

*For the Professional Man—Doctor, Dentist, Lawyer, etc. Between the office and reception room, office and nurses, or stenographer's quarters, etc.

*For the Merchant—Between the sales-counter and stockroom, executive and general offices, receiving department and stockroom, etc.

*For the Farmer—Takes the place of a private telephone between the house and barn, etc. Need not be picked up to be answered. Also fine for listening-in on the barn from the house at night.

5 TUBE 2 BAND 1 1/2 VOLT Super

LACK of power line facilities need no longer bar you from the finest possible radio reception. With this new Lafayette 5-tube 2-band Superhet you can have "city reception" of the standard broadcast channels and foreign and domestic short wave channels. The single battery pack used as the source of power for this new Lafayette will provide, under normal conditions, approximately 850 hours of service!

Among the outstanding features of this Lafayette model you will find: 2-band reception covering 540 to 1730 KC (556-173.5 meters) and 5.9 to 18 MC (51-16.7 meters); 5 low drain tubes (1-1A7G, 2-1N5G's, 1-1H5G, 1-1A5G); matched permanent magnet dynamic speaker continuously variable tone control; flash illuminated slide rule dial and many others that you would expect in only the largest receivers.

The receiver is housed in an unusually attractive walnut-finished hardwood cabinet. Space for the battery pack is provided inside the cabinet itself.

Model E-59

Lafayette 5-Tube 2-Band 1 1/2 volt Superhet complete with tubes. Dimensions: 18 1/4 x 11 x 10 1/4" high. Shpg. wt. 19 lbs. Code EAVES. LIST PRICE \$19.95

YOUR COST Less Batteries \$3.45
K20165—Special 1 1/2 V. "A" and 90 V. "B" Battery Pack for above. Wt. 28 lbs. YOUR COST \$3.45

5 TUBE "3 in 1" RAMBLER Super

"I'll entertain you no matter where you go," says the Rambler with charming lack of modesty. But it can afford to brag, for it is remarkably versatile. When you own a Rambler it's really like owning three different sets. It is just like having a set for a.c. operation—another for d.c. operation—and another for use when there is no current at all and you must use batteries. You see the Rambler was designed by engineers so that it will operate on all three sources of supply—AC—DC or self-contained batteries!

Take one with you on the boat, on the train, out in the field on a picnic, or on your travels from hotel to hotel where you never will know what type of current to expect next! Just turn it on and tune to your favorite station—then sit back and listen to a really fine set. You'll be surprised at the fine tone quality. And there is power to spare, too. That is because the 5-tube superhet circuit makes use of a "beam power" tube that insures clear, natural tones. The tubes used include: 1-1A7GT, 1-1N5GT, 1-1H5GT, 1-3Q5GT "beam" tube and 1-35Z4GT rectifier.

The built-in "Antenn-Aire" eliminates the need for an aerial except in outlying districts (terminals for outside aerial included). Batteries required: 1-7 1/2 V. "A"; 2-45 V. "B".

Model T-56 Rambler

Lafayette 5-Tube "3-In-One" Portable. Complete with tubes. Size: 12 1/2" wide, 9 1/4" deep, 6 3/4" high. Shpg. wt. 22 lbs. Code CANOE. LIST PRICE \$14.95

YOUR COST, LESS BATTERIES \$2.60
K20155—Kit of Batteries for above.

Lafayette "MYSTERY" RECORD PLAYERS

"Junior" Model

This efficient device plays your records through any radio, regardless of make or age—and there are **NO CONNECTIONS TO MAKE**. A built-in transmitter actually "broadcasts" recorded music to your receiver. You merely plug into a 110 volt a.c. outlet, tune your set to the mystery player frequency and your radio reproduces the recorded selection. Equipped with a high fidelity Astatic tangent arm **CRYSTAL PICK-UP** and a powerful constant-speed motor (78 r.p.m.) with 9" turntable. Plays 10" or 12" records. Volume control on panel—or you can use the set volume control. Jack for toy mike provided. Housed in attractive Walnut case 15 1/4" high, 13 1/4" wide, 7 1/4" deep.

K21871—"Junior" Mystery Player complete with tubes. For 110 volts, 60 cycles a.c. Shpg. wt. 17 lbs. **YOUR COST \$14.95**

"Senior" Model

The finest wireless record player on the market today! Unsurpassed in tonal quality and in operating features. Furnished with the famous Shure "Zephyr" **CRYSTAL PICK-UP** that provides high-fidelity reproduction. Has world renowned GARRARD governor controlled motor complete with automatic stop and speed regulator. The oscillator employs three tubes instead of the usual two. There are absolutely **NO CONNECTIONS** to make, other than to plug into any 110 volt outlet. Volume control and switch located on panel. Has separate jack for toy mike connection. In fine Walnut case with folding hinges: 15 1/4" high, 13 1/4" wide, 7 1/4" deep. Shpg. wt. 22 lbs. K21872—"Senior" Mystery Player, complete with tubes. For 110 volts, 60 cycles a.c. **YOUR COST \$23.95**

Lafayette HOME

The finest home electric record player available. Can easily be attached to any radio receiver; full instructions are included. Models are available for either a.c. or a.c.-d.c. operation. All models are furnished with **CRYSTAL PICK-UPS** to insure wide range reproduction. Motors are of excellent quality, governor controlled, and provided with speed-regulators and automatic stop switch. Volume control and switch mounted on panel. Panel also contains a needle cup and tone arm rest for the pick-up. Entire mechanism is housed in a fine Walnut cabinet that has folding hinges. Cabinet has high polished finish, and measures 7 1/4" high, 15 1/4" wide, 13 1/4" deep. All models will play either 10" or 12" records with the lid closed. Refer to listing at right.

RECORD PLAYER

A.C. Models

K21860—Lafayette Electric Home Player with Astatic crystal pick-up, and motor with 10" turntable. For 110 volts, 60 cycles a.c. Shpg. wt. 18 lbs. **YOUR COST \$15.25**

K21861—Same as above, but with Shure "Zephyr" pick-up and GARRARD motor with 12" turntable. Shpg. wt. 19 lbs. **YOUR COST \$20.95**

A.C.-D.C. Model

K21862—Similar to K21861 above, but with GARRARD universal a.c.-d.c. motor. Shpg. wt. 20 lbs. **YOUR COST \$26.95**

RCA ELECTRIC

Wireless Model VA-20

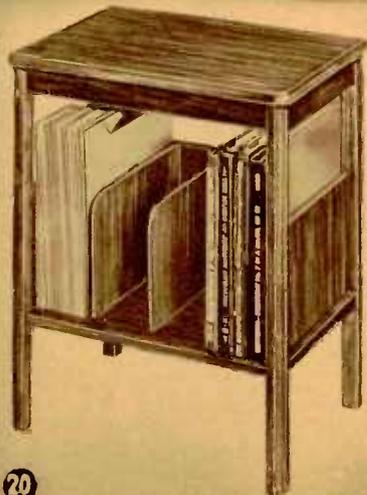

(Top) Designed for use with any radio, regardless of make or age, and without the need for any connections other than a.c. power. Has RCA constant speed motor with felt-covered turntable, tangent arm **CRYSTAL** pick-up, volume control and switch and pilot light current indicator. Plays either 10" or 12" records. Housed in rich brown bakelite case 12 1/2" wide, 8 1/4" deep and 5" high. Operates from distances up to 30-50 feet from the radio. For 110 volts, 60 cycles a.c. K21968—VA 20 Wireless Record Player, with tubes. Shpg. wt. 8 lbs. **YOUR COST \$11.44**

RECORD PLAYER

Model R93-F "Economy" Player

An inexpensive instrument that quickly converts any modern radio into an electrical radio-phonograph combination. Plays both 10" and 12" records. Includes a cushion mounted constant speed motor, latest type feather-touch crystal pick-up in bakelite arm, and volume control and switch. Pick-up arm easily tilted for insertion of needle. Has plug for RCA sets; requires switch and cable for other makes. Brown bakelite cabinet 11 1/8" wide, 9 3/8" deep, 3" high. K21850—Shpg. wt. 10 lbs. **YOUR COST \$5.65**
K22006—Switch and cable. 59c

RECORD PLAYER TABLE (illustrated at left) A beautiful walnut finished table especially designed to be used with table type record players either electric or mechanical. Shelf with dividers holds 120 records or 8 twelve-pocket albums. Size: 24 1/2" long, 20" wide, 15" deep. No records or albums furnished. Wt. 35 lbs. **\$6.25**
Model 903—**YOUR COST**

FLOOR MODEL SPEAKER CABINET (illustrated at right). Specially designed cabinet for use with any type speaker. Incorporates reflex principle where back wave reinforces front wave. Beautiful walnut finish, highly polished. Interior completely lined with sound absorbing material. Large baffle area with cutout for 12" speaker. Overall dimensions are 32 1/4" high, 22" wide and 13 1/2" deep. Ample large to place the average laydown type mantel cabinet radio on top. Very soundly constructed. Shpg. wt. 50 lbs. **\$17.95**
Model 968—**YOUR COST**

GENERAL ELECTRIC Floor Conditioner

- ★ Cleans: Linoleum, Wood, Rubber, Tile, etc.
- ★ For Homes, Offices, Stores, Resorts, etc.
- ★ Easier to Use Than a Vacuum Cleaner
- ★ 2 Sets of Brushes and 2 Polishing Pads

Made by General Electric, the world's leading manufacturer of electrical appliances for the home and office, this electric floor conditioning machine is one of the finest ever designed. It cleans, waxes and polishes all types of flooring and takes all the drudgery out of this work. It's easier to use than the ordinary home vacuum cleaner, too, for there are no messy dirt-bags to clean or dirt to dispose of.

The same machine has an original list price of \$49.95 and it comes complete with brushes and polishing pads. Now, because of our tremendous purchasing power, you get the opportunity to buy this machine at a sensationally low price! The quantity is extremely limited, however, so send in your order today and avoid disappointment.

The machine is beautifully constructed of the finest quality materials. Die-cast aluminum housings, steel gears, a powerful long-life motor that is amply ventilated, a correctly proportioned handle—these are but a few of the many outstanding features of this unit. Every care has been taken in its manufacture to insure finest performance and maximum life. It comes to you complete with two sets (8) of polishing brushes, coarse and fine, and two polishing pads. All accessories are easy to attach. Equipped with a long length all-rubber cord and plug set. Operates from any standard lighting circuit, 110-120 volts A.C. or D.C. Fully APPROVED BY THE GOOD HOUSEKEEPING INSTITUTE, of Good Housekeeping Magazine. Ideal for homes, offices, night clubs, summer resorts—in fact wherever there are hardwood, tile, terrazo, etc. floors.

YOUR COST

\$5.75

Coffee Dispenser

This handy kitchen accessory is ideal for the modern kitchen. The "Crystal-Pak" dispenser is designed for housewife utility; one click of the handle in either direction releases just the right amount of coffee for a perfect coffee-making brew. The dispenser is made with a rigid, transparent cylinder that is light and unbreakable; shows at a glance when coffee is needed. The unit is easily attached to the wall with the aid of a special bracket which is furnished. Metal parts are plated. Top cover is light—maintains coffee flavor for long periods. Shpg. wt. 2 lbs. K25480—YOUR COST

\$1.49

"Wrinkle Proof" Iron

A new Universal (Landers, Frary and Clark) iron that lightens the labor of ironing. Finger-tip control gives the exact heat needed, without watching, without guessing. Low heat for delicate silks; medium for cotton, etc.; high for heavy damp fabrics. The automatic adjustable thermostat maintains the correct heat. Features the new Wrinkle-proof Round Heel—irons backward and sideways as easily as forward. Iron is fully chromium plated. Comes with approved 6-ft. iron cord and plug. For 110-120 volts A.C. only. Shpg. wt. 6 lbs. K25482

Automatic Toaster Set with "Pop-Up" Toaster

This Buffet Service embodies the attractively styled Automatic Toaster and has been fashioned to take full advantage of its convenient features. The carrying tray is designed with comfortable through-grip handles and raised sides and

back for safe portability. Panels for holding the four varicolored pottery relish dishes and the bread board are removable, so that the tray may be used without this standard equipment. Two chrome-plated bread racks are included to hold bread or toast. The tray is 20x16" and is Walnut finished; the bread board is maple.

The toaster toasts two slices of bread, both sides at once, to any pre-selected degree of brownness. When the toast is finished, the rack rises automatically and the current is shut off. The entire unit is finished in gleaming Chromeplate with black Textolite base and control knobs. Has long-life nickel-chromium heating unit, mical insulated, and is provided with an attached 6-foot cord and rubber plug.

BUDDY "L" Savings and Recording Bank

Here at last is the kind of bank every child will enjoy—really enjoy putting money into. And that's because he has a complete record of his savings; a pass book all his own, and an opportunity to surprise Mother and Dad by his or her thrift. With slight encouragement from parents, the habit of saving may be planted early. Operation is simple. Deposit the coin (takes pennies, nickels, dimes or quarters), insert the pass book in the slot provided and press the lever. The coin is safely put away, and a complete entry of the amount is recorded. Made of heavy gauge metal, beautifully colored. 6-7/16x6-5/16x3/8". Shpg. wt. 3 lbs.
K25462—YOUR COST EACH..... 93c

DeLuxe A.C. Electric Record Player In Walnut Case

Here's a record player that's "toy-like" in price—but far from a toy in quality of reproduction and construction. It has features never before offered in a machine selling at so low a price: new type synchronous, constant speed a.c. electric motor that has no reducing gears and consumes only 4 watts; felt covered turntable that will take all 10" or 12" records; "on-off" toggle switch on panel; efficient sound box that reproduces music and voice with surprising fidelity; modern Walnut veneer cabinet with contrasting trim. Compact, and easy to use—just plug into the nearest 110 volt a.c. line (60 cycles). Size: 12 1/2 x 9 1/2". Shpg. wt. 6 lbs.
K21866—YOUR COST..... \$4.45

VOCAGRAPH A.C. Electric Record Player All-Metal Case

An excellent quality record player in a sturdy all-metal housing. For use in the home, class room, school dormitory, playhouse, etc. Engineered for fidelity of musical tone quality, handsomely designed in royal blue crackle finish, its astonishingly low price brings the world's ranking music within the reach of every purse. Has a constant speed A.C. electric motor with turntable for all records up to 10". Noiseless in operation. "On-off" switch on panel. Equipped with fine quality orthophonic type sound box mounted on an all-metal tone arm. Furnished with attached cord and plug set. Operates on 110 volts, 60 cycles a.c. only. Shpg. wt. 6 lbs.
K21865—YOUR COST..... \$3.97

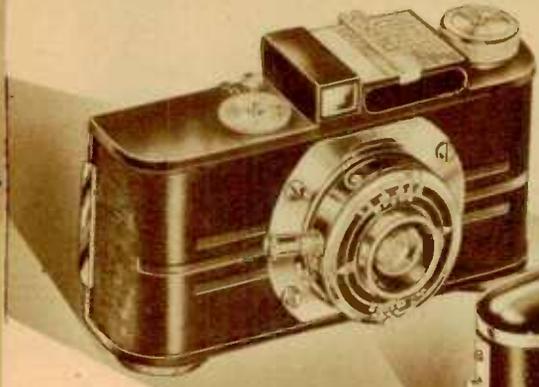

Toy Record Albums

Children love music—that's why these kiddie records make such popular gifts. They're educational, entertaining and lasting. Each album contains FOUR double-faced 7" records—all electrically cut. Albums have attractive colorful kiddie designs on cover. Shpg. wt. 2 lbs.

argus Cameras

ARGUS Models A, A2 and A2F
Improved models of the famous pioneer American candid camera. New lens mountings, improved shutters (4 speeds up to 1/200 second, time and bulb) and new built-in exposure meters (on models A2 and A2F only). All models have fast f:4.5 lenses. Lens in model A2F is in a focusing mount that permits focusing as close as 1 1/2 ft. without attachments. Exposed metal is highly polished, chrome plated. Use standard 18 or 36 exposure rolls of 35 mm. film.

PH1739—Model A. f:4.5 lens in fixed mount. (No exposure meter). **POSTPAID IN U.S.A. ONLY. \$10.00**
YOUR COST

PH1740—Model A2 with f:4.5 lens in fixed mount and built-in exposure meter. **YOUR COST \$12.50**
(P.P. in U.S.A.)

PH1741—Model A2F similar to the above but with focusing mount (focuses as close as 18") f:4.5 lens and built-in exposure meter. **YOUR COST \$15.00**
(P.P. in U.S.A.)

PH9488—Portrait attachment for any of above cameras. **YOUR COST .90c**

PH9691—Eveready cowhide case for above models. **EACH.....\$2.98**

NEW! ARGUS Model "M"
The Ultimate in Inexpensive Cameras

Smartly styled this new Argus camera is so tiny that it easily fits into the purse or pocket. Precision Argus construction assures perfect performance. Color photography is economical since it takes either single or double frame pictures. Uses standard Kodak Bantam, Kodak Kodachrome, special Arguspan or Arguspan Dufaycolor-M film. Takes either 12 pictures 1x1 1/2" or 24 1x3/4" pictures on a standard roll. The triplet Anastigmat f:6.3 lens is fully color corrected. Lens openings are marked for various conditions. Built-in optical view finder, tripod socket and collapsible lens mount.

PH1743—Argus Model "M" Camera. **YOUR COST \$7.50**
POSTPAID IN U.S.A.

PH9631—Deluxe leather carrying case complete with hand and shoulder strap, and belt loop. **YOUR COST (SHIPPED POSTPAID IN U.S.A.) \$1.50**

New! ARGUS Model C3
With Built-in Flash Synchronizer

For brilliant fast action shots under any lighting conditions. This new Model C3 incorporates a built-in flash synchronizer that synchronizes the shutter and flash.

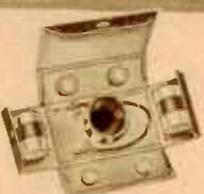

A fast lens, the Cintar f:3.5 triple Anastigmat, plus a fast shutter, with speeds from 1/5th to 1/300th second (plus "bulb" position), assures perfect "action stopping" pictures. The built-in coupled range finder assures accurate focusing from 3 feet to infinity.

Two models are available. Both alike in every detail except for the photoflash equipment. The Model C3 has it—the Model C2 has not. Cases are of die-cast aluminum covered with pin seal leather and trimmed with bright chromium plated metal. A remarkable value for a camera with so many precision features.

PH1742—Argus Model C3 Camera complete with photoflash equipment including built-in synchronizer, reflector, battery case and attachments. As illustrated. **YOUR COST (POSTPAID IN U.S.A. ONLY) \$30.00**

PH1542—Argus Model C2. Has all the features of above model except the built-in synchronizer. **YOUR COST (POSTPAID IN U.S.A. ONLY) \$25.00**

MILLIONS *Choose* THESE AMERICAN FAVORITES

AGFA'S FAMOUS "CLIPPER" CAMERAS

These remarkable cameras have already established an enviable reputation for themselves. They employ the well known "candid" principles of compactness and ease of operation. But most important of all they do make really fine pictures. Pictures that are large enough for your album without enlargement 2 1/2 x 2 1/16". You get 15 of them to a standard size PD-16 (616) roll of film.

The Clipper is very sturdily constructed and beautifully finished. Bellows are eliminated by the use of an extension tube—the same principle used in the most expensive candid. The built-in optical direct view finder provides a brilliant image and a hinged back makes loading of film very easy and simple. The steel body is covered with a specially designed wear resistant material of attractive whipcord design.

Two models available, difference being in type of lens and shutter.

PH1543 Agfa PD-16 Clipper with f:6.3 lens and speeds from 1/25 to 1/100 second plus T. and B. Lens diameter 23 mm. List \$15.50. **YOUR COST \$13.95**

ROLLS TWIN 620

A beautiful candid type camera that takes 16 album size pictures 2 1/4 x 1 3/8" on a standard No. 620 size roll film. The Rollax lens is mounted in a shutter having both time and instantaneous positions. The camera body is of aluminum with a built-in optical view finder. The bakelite back is fitted with a fully cushioned pressure plate. A built-in tripod socket is also provided.

No focusing is necessary with the fixed focus lens thus assuring accurately focused pictures at all times within the range of the lens. A specially designed Eveready Carrying Case with shoulder strap is furnished with each Rolls Twin 620 Camera. This case is so made that the camera need not be removed from the case to take a picture. Merely drop the hinged front of the case and you are ready to make that shot instantly.

PH1599 - Rolls Twin 620, with case. **YOUR COST - POSTPAID IN U.S.A. \$3.98**

ALL KODAKS SHIPPED POSTPAID IN U.S.A.

EASTMAN "Jiffy Kodaks"

Famous Eastman precision construction makes these new Jiffy Kodaks outstanding in value and performance. Unusual in design, these cameras are very compact when closed yet make large pictures that can be mounted in your album without enlargement. Excellent lens equipment provides wire sharp negatives that can be enlarged several fold without loss of detail. Models Six-16 and Six-20 are equipped with the "near and far" Twindar lens. All have vertical and horizontal view finders giving brilliant right-side-up images. Bellows are self extending at the touch of a button—press one button and the camera opens—press another and you have taken your picture. Jiffy Kodaks are simple to use and a joy to own. The all-metal body is covered with pin seal leather and all exposed metal is either satin-finish or highly polished. Loading the camera with film is extremely easy due to the unique construction of the back. Accessories available include a tailor fitted case of genuine cowhide and a portrait attachment that enables you to get up close for a large size image. We can also supply a complete assortment of optical glass filters and precision mounts—see page 35.

Kodak FOLDING FAMOUS CAMERAS

JUNIOR Kodaks Six-20 & Six-16

Series No. 2

The Kodak Juniors, Series No. 2, are among America's most popular favorites. Opening to picture-taking position with a single pull on the bed support, they get into action quickly and easily. Equipped with both reflecting and direct view finders, giving a choice of sighting from waist or eye level. For lens equipment, you can have either the readily focused Kodak Bimat or a single lens that requires no focusing whatever. Both are mounted in reliable shutters and are fully capable within their intended picture-making ranges. And when your picture has been taken, your camera closes at the touch of a one-finger bar release. The Six-16 models take 8 pictures 2 1/2 x 4 1/4" on 616 film; the Six-20 models take 8 pictures 2 1/4 x 3 1/4" on 620 film. Two tripod sockets. Black pin-grain covering with bright nickel trimmings.

KODAK VIGILANTS Six-20 and Six-16

A brand new series of Kodaks with sharp anastigmat lenses and new Kodak-made shutters. The Kodex shutter has the following speeds: 1/25, 1/50 and 1/100th second plus time and bulb. The Kodamatic shutter: 1/10, 1/25, 1/50, 1/100 and 1/200th second, time, bulb and delayed-action. The Supermatic shutter: 1 second, 1/2, 1/5, 1/10, 1/25, 1/50, 1/100, 1/200 and 1/400th sec., time, bulb, delayed-action.

A choice of four lenses is also available including f:8.8, f:6.3, f:4.5 and a special f:4.5. All are anastigmats. Bodies of the cameras are made of aluminum alloy and covered with Kodadur (f:4.5 "special" models are covered with pin seal leather). All have waist-level as well as eye-level optical finders, push-to-open and push-to-close bed-release buttons and body shutter releases, and two tripod sockets.

American Made Bantams

EASTMAN'S FAMOUS MINIATURES

Kodak BANTAM Special

- ★ Super-Speed Super-Corrected Ektar F:2.0 Lens
- ★ Coupled Range Finder—Compur Rapid Shutter

This beautiful Kodak Bantam Special has everything to be desired in a miniature camera. It is compact, sturdy and easy to use. Its Ektar Anastigmat f:2 lens has the super speed and correction you need for needle-sharp pictures indoors and out in black and white or full natural color. A military type range-finder is precision-coupled to the lens eliminating all guess work in focusing. The Compur-Rapid shutter provides nine shutter speeds from 1 sec. to 1/500th sec. plus time and bulb. Takes 8 pictures on the standard 828 series of black and white and Kodachrome color films. The streamlined case is finished in extra hard enamel with contrasting stripes of bright metal.

PH1551 - Bantam Special with Ektar f:2 lens and eveready leather case. List \$87.50. **\$78.75**

Kodak BANTAM F:4.5

At its new low price this excellent camera is an unusually fine value. Precision made throughout with a Kodak Special f:4.5 anastigmat lens it is capable of taking beautifully sharp and clear pictures under seemingly impossible light conditions.

The lens is in a focusing mount and fitted with the Kodak shutter having speeds from 1/25th to 1/200th second and both time and bulb positions. Either black and white or full natural color Kodachrome film can be used. Case of the camera is of die cast aluminum covered with black pin seal leather. Optical type direct view finder gives an accurate, clear image of the exact area that will be included in the picture. Lens diameter 24 mm.

PH1526 - Kodak Bantam f:4.5. List Price \$22.50. **\$20.25**

For filters and mounts for this camera see below.

KODAK BANTAM F:5.6

A fine Kodak anastigmat lens plus precision workmanship makes this one of the outstanding values in a popularly priced camera. Employs the same Bantam film used in all of the cameras described on this page, including the full color Kodachrome. Modern professional finishers furnish a standard 2 3/4 x 4" enlargement from this film. Easily enlarged to any other size. The Kodak anastigmat lens is fitted into a focusing mount with a three speed shutter with speeds up to 1/100th sec. plus time and bulb actions.

Camera body of molded plastic with aluminum lens board.

Kodak BANTAM F:8.0

This is undoubtedly one of the most convenient cameras ever designed. Overall measurement is little more than four inches, small enough to fit the palm of the hand, yet photography with this convenient Bantam model has all the interest and verve that you could want. Modern photo finishing gives you album size enlargements 2 3/4 x 4". An automatic film stop eliminates the need for watching the film when winding from one exposure to the next. The f:8.0 lens is of the fixed focus type requiring no adjustment - just sight and snap! Body is of sturdy molded plastic. Lens diam. 23 mm. See page 35 for filters and mounts for this camera.

PERFECT GIFTS

ALL AMERICAN Miniatures

PERFEX Forty-Four — An AMERICAN Leader

Now, at last, you can buy a truly fine 35 mm. candid camera that is entirely American made. And, what is more, it is priced low for so splendid an instrument.

Every worthwhile feature is incorporated in this fine camera including a coupled range finder, an exposure meter, a focal plane shutter, a flash synchronizer, etc. The lens is a fully corrected Anastigmat available in both f:3.5 and f:2.8. Lenses are interchangeable with telephoto and other types as desired. An automatic film transport advances the film exactly one exposure each time and automatically cocks the shutter. The focal plane shutter provides speeds from 1 full second to 1/1250 second and has provision for bulb operation. Both the correct shutter speed and diaphragm setting are easily determined by means of a built-in exposure meter.

The case is of die-cast aluminum covered with leather and trimmed with attractive chrome plate. The camera body measures 5-9/16x1-9/16x2-23/32 inches and weighs approximately 22 ounces. The camera uses standard 35 mm. film in either 18 or 36 exposure rolls for both black and white or full color.

KODAK

35 MM

Designed and manufactured by the most famous American maker of photographic equipment these "easy-on-the-pocket-book miniatures" are outstanding values in the camera market. Modern American methods make possible fine precision construction at a price anyone can afford to pay. And this same precision construction makes these new 35 mm. models capable of producing excellent results in both black-and-white and full natural color.

Three models are available offering a choice of three lens speeds; each lens is mounted in its companion shutter. All models have metal bodies covered with fine pin seal grain leather. Top and bottom plates are in satin finish chrome. All models include a folding optical type eye level view finder that provides a brilliant upright image; finger tip focusing from four feet to infinity by means of a revolving lens mount; an automatic exposure counter that keeps you informed of the amount of film left in the camera; a film centering and locking device. In addition to these features the f:3.5 and f:4.5 models incorporate double exposure prevention that makes it practically impossible to take two pictures on the same film or to forget to wind the film between exposures; automatic shutter setting that winds the shutter for you each time you set the camera for the next exposure; and delayed action that gives you time to get into the picture yourself. In other words these new miniatures are complete including every feature you need to make pictures that you will treasure your whole life.

Gifts of a Lifetime

Series B GRAFLEX

A Favorite for Many Years

Famous as the camera that lets you see the picture right side up right up to the moment that you snap the picture. Full size ground glass focusing accounts for the many prize-winning action stopping pictures that this camera is famous for. Focusing with the actual taking lens entirely eliminates parallax difficulties. The dependable Graflex focal plane shutter provides a choice of 25 shutter speeds from 1/5th to 1/1000th second. And a razor sharp 1:4.5 Kodak Anastigmat lens assures brilliant negatives that make "contact quality" enlargements.

A rotating back permits instantaneous changeover from vertical to horizontal subjects or vice versa. Designed for use with standard film packs or the economical cut film, it permits a wide choice of negative material. A unique cut film magazine permits loading 12 films within a single holder - this holder is available as an accessory as listed below. Two sizes of this series of Graflex cameras are available - a 2 1/4 x 3 1/4" size and a larger 3 1/4 x 4 1/4" size.

PH1828 2 1/4 x 3 1/4" Series B revolving back GRAFLEX. 5 1/2" f:4.5 Kodak Anast. lens and film pack adapter. **\$81.90**

A GRAFLEX-MADE

All of the important features incorporated in the larger cameras made by Graflex are also incorporated in this extra compact National Graflex. Full size - right side up - ground glass focusing; fast and dependable focal plane shutter; automatic film counter and stop; are just a few of the many outstanding features of this remarkable camera.

Fast B & L Tessar Lens

The lens is the fast, sharp cutting f:3.5 Bausch & Lomb Tessar capable of making brilliant negatives. Shutter speeds up to 1/500th second are available. A combination that will stop action and provide perfect exposures even under adverse lighting conditions. Picture size of 2 1/4 x 2 1/2" is amply large for use without enlarging.

Precision Construction

Entirely "American made" and precisely built of the finest materials, this is a truly outstanding picture maker. A built-in exposure guide and micro-focuser add to ease of operation.

Splendid Gifts Lafayette

PLATE CAMERAS

6.5x9 CM. and 9x12 CM. Sizes

Employing the famous Carl Zeiss Tessar f:4.5 lenses these Lafayette Foldex Plate Cameras are ideally suited for all types of photography by the serious amateur. They permit the use of a wide range of negative material since either plates, cut film or film pack may be employed interchangeably. Double extension bellows, rising, falling and sliding front, ground glass focusing, direct and reflecting type finders, spirit level, Compur shutter with speeds from 1 full second to 1/200th second, and delayed action self timer—all aid in solving practically any photographic problem. They are sturdy, beautifully made cameras with all-metal bodies covered with genuine leather and all exposed metal heavily enameled or plated and highly polished.

PH1541—6.5x9 cm. (2 1/4 x 3 1/4") Lafayette Foldex Camera. Zeiss Tessar f:4.5 lens (diameter 32 mm.). With ground glass back, 3 plate holders and film pack adapter. Shpg. wt. 4 lbs. **\$57.95**

FOTH DERBY CAMERAS (Illustrated at top right)

Fine lightweight precision cameras weighing less than 12 ounces and measuring only 4 3/4 x 2 3/4 x 1 5/8". These fine mini-cameras use the latest type delayed action focal plane shutter with speeds up to 1/500 second. Rapid lenses make possible excellent finished results. Large tube sight view finder facilitates finding of subject. Finely ground lenses produce negatives that will permit enlargements of contact print quality. The Foth Derby takes 16 exposures on standard vest pocket (No. 127) film, 1 5/8 x 1 1/4". Shutter speeds provided are: from 1/25 to 1/500 second, time and bulb. Front lens focusing with calibrations clearly engraved on a polished metal ring. Genuine leather bellows with spring actuated struts for support when extended. Sturdy formed aluminum body with grained leather covering. With cable release and full instructions.

Two models of this famous camera are available differing only in the speed of the lens. All other features are the same.

PH1730—Foth Derby Mini-Camera with f:3.5 Foth Anastigmat lens. Lens diameter 29 mm. **\$19.35**

SUPER SPORT DOLLY

Takes either of two popular "album size" pictures. Employing No. 120 film it will make either 12 exposures 2 1/4 x 2 1/4" or 16 exposures 1 5/8 x 2 1/2" in size. A coupled split-image type range finder sets the lens for an accurately focused picture every time. It definitely eliminates the loss of pictures because you forgot to set the lens or estimated the distance incorrectly. A table or chart on the back of the camera gives the hyperfocal distance of the lens which tells you just how many feet are in focus at various diaphragm settings. The extra fast Schneider Xenar f:2.8 lens together with the Compur shutter (speeds from 1 second to 1/250th second) makes it possible for you to take pictures even under adverse lighting conditions. And a delayed action setting on the shutter permits you to get into the picture yourself.

PH1528—Super Sport Dolly as described. YOUR COST \$67.50

POSTPAID IN U.S.A. **\$67.50**

PH9615—Eveready Carrying Case for above camera. Wt. 2 lbs. YOUR COST \$6.95

THE NEW WESTON Master

The World's Finest Electrical Exposure Meter

Now Weston brings to you the world's most advanced Exposure Meter. A meter that is unquestionably the finest ever devised for indoor or outdoor use by professional and amateur alike for either black-and-white or full color photography. A meter that covers the astounding light range from 1/10th to 1600 candles per square foot. The light falling on a person under an average reading lamp, such as is found in the home, is approximately 3 candles. The complete range of the extreme sensitivity of the Weston Master. This is an indication of the Weston Master is approximately the first to 50 candles and the second is divided into two separate scales—position automatically when the light screen over the cell is shifted. The new improved calculator provides for film speed ratings up to 800 Weston to take care of any new films that might possibly be developed. The Weston Master is very ruggedly built—from its highly polished bearing jewels to its highly polished moulded bakelite case. It is designed to "take it" either out in the field or in the professional studio. But, unlike so many things built for rough service, the Weston Master is a truly beautiful instrument in its handsome streamlined case. It is designed PH2723—Weston Master Exposure Meter. YOUR COST POSTPAID IN U.S.A. ONLY \$21.60 PH9912—Eveready velour carrying case..... \$1.49 PH9913—Standard Bridle leather carrying case..... \$1.09

EXPOSURE METERS FOR PERFECT NEGATIVES

WESTON Junior Meter

A more compact model at a price well within your reach. An easily adjusted calculator forms part of the meter dial where it is easily read. Calculation merely involves the setting of the "light reading" over the "emulsion speed" value and a range of seventeen different shutter speeds with corresponding aperture stops can be read directly. Shutter speeds run from 1/1000 second to 60 seconds. Aperture values from f:2 to f:32. Film speeds from .7 to 200 Weston are provided for. Operation is extremely simple, in fact the meter can be used with one hand. Like all Weston products this one too is ruggedly built to give many years of satisfactory service. The meter movement has jewelled bearings and the outer case is of moulded bakelite. PH2703—YOUR COST \$13.95 POSTPAID IN U.S.A. ONLY PH9904—Leather Zipper Case..... 89c

DE JUR Exposure Meter

The De Jur Exposure Meter is shaped to fit the hand for one hand operation. It is easy to read because of the large legible scale and easier to use. Readings are based on the Weston system of film speed ratings. The photo-cell is unusually sensitive and accurate. Calculator is calibrated for 20 different f: values from f:1.0 to f:32.0 and provides time readings from 1/1000th second to 1 full minute. Sapphire jewelled bearings and a highly efficient permanent magnet assure the utmost in efficiency from the meter movement. While sturdy in construction the weight of the complete exposure meter is only 2 3/4 ozs. Can be used for both movies and stills. Fully guaranteed for 3 months. Licensed by Weston. PH2708—YOUR COST \$10.35 POSTPAID IN U.S.A. ONLY PH9914—Pigskin Case with Zipper. YOUR COST..... 89c

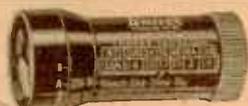

PHOTRIX S. S. Meter

A very compact and extremely sensitive photo-electric cell exposure meter for both still and movie cameras. It is suitable for both artificial and natural light. The photo-cell is recessed so as to be shaded from the "sky light" for greater accuracy outdoors. The calculator is calibrated for Scheiner and Weston film speeds from 11 to 38 Scheiner, and 1.5 to 800 Weston. Diaphragm openings in half stops from f:1.5 to f:36 and exposure times from 1/2000th of a second to 1 full minute. The meter scale is calibrated for quick accurate reading. The smooth streamlined case is of molded bakelite and equipped with an attractive neck cord. Complete easy-to-understand instructions are furnished with each meter. PH2718—YOUR COST \$16.88 POSTPAID IN U.S.A. ONLY. Leather zipper carrying case. PH9915—YOUR COST..... \$1.19

DUREX Meter For Still & Cine

A very compact — vest pocket size — exposure meter of the extinction type. Very easy to use. Can be operated with one hand easily. It is calibrated in Weston speed ratings and can be used under a wide range of lighting conditions, either artificial or natural daylight with equal accuracy. It is suitable for both black and white and full natural color photography. Overall dimensions are 1 1/2 x 1 1/2 x 5/16". Made of the new durable and attractive plastic Polystyrene it weighs a mere 2 ounces. A handy and attractive molded plastic case of Blue Tenite is furnished at no extra charge. Simplified, easy-to-understand instructions are furnished with each meter. Operation is so simple that you only need read the instructions once. PH2724—List \$2.25 YOUR COST..... \$1.95

UNIVEX Exposure Meters

Two types — one especially designed for still cameras — the other for movie cameras. Both are extinction type meters and cover practically all film speeds and diaphragm settings. Molded of durable black plastic with matching molded cases having screw top covers. Easy to use with all necessary information engraved right on the meter. SHIPPED POSTPAID IN U.S.A. ONLY. PH2712—Still. PH2713—Cine. EITHER TYPE..... \$1.95

PHAOSTRON Exposure Meter

A radically new and different exposure meter in which a known light source is compared with the unknown. Comparison is easily made and very accurate. Eliminating the use of an electrical current measuring meter it is very sturdy and durable. Covers a wide range of film speeds and exposure times and diaphragm settings from f:2 to f:32. Operates entirely from the self contained batteries and does not have to be connected to any power line. Batteries are of the standard pen-lite type and will last a long time, in fact, for several hundred exposure readings. Molded black plastic case with etched metal calculator dials. 2 3/4 x 2 1/2 x 1 3/8". Shpg. wt. 2 lbs. POSTPAID IN U.S.A. \$4.59 PH2726—YOUR COST.....

a firm foundation for good work

American-Made All-Metal Tripods

Designed especially for portable use, these all-metal tripods are extremely compact and very sturdy. Head is constructed to precision standards and finished in bright chrome. Upper leg sections are black enameled, lower sections polished brass. Each section is fitted with retractable pins to lock sections in position.

4 Section Tripod
A remarkably fine four section tripod. Reversible head with stud for American type cameras on one side and European type on other. Closed 15 1/2" - Open 48 1/2". Shpg. wt. 4 lbs. **\$2.19**
PH8552 YOUR COST
PH9921 - Carrying Case 98c

5 Section Tripod
Extends from 16 1/4" to 58 1/2". Similar to four section model. Shpg. wt. 5 lbs. **\$3.95**
PH8551 YOUR COST
PH9921 - Carrying Case 98c

7 Section Tripod
Where extreme compactness is desired this model will be found ideal. Closed 11 1/2", extends to 48 1/2". Similar in other respects to the above models. Shpg. wt. 4 lbs. **\$4.89**
PH8565 YOUR COST
PH9922 - Carrying Case 98c
Rubber Tips, Set of 3 for all tripods. PH9217 YOUR COST 10c

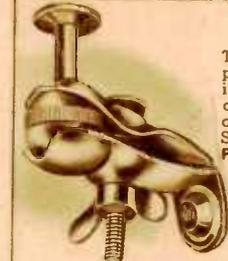

New! Lafayette Aluminum Tripods

A tripod that is different! Easy to handle because it is compact. Steady as the rock of Gibraltar because it is designed right. Easily adjusted because of its new sure-grip clutches. Adaptable for indoor or outdoor use because of its reversible tips. Attractive in appearance because of its special "anodized" finish.

No effort was spared to make this one of the most outstanding tripods on the market today. Made of aluminum, it is conveniently light, yet is exceptionally sturdy and rigid. A new type of "sure-grip" clutch device will permit adjustments of the tripod at any desired height, yet will not scratch the metal. Top head is also of heavy aluminum and is broad enough to support view cameras. It is also so beveled as to permit free panning action. By a practical screw arrangement, the tripod can stand on either rubber or speared tips. Finished by ANODIZING—a hardening and finishing process which prevents scratches and abrasions and adds to its beauty!

2 Section Model
Extends from 33" to 62" and incorporates all of the features described above. Shpg. wt. 5 lbs.
PH8567
YOUR COST... **\$8.49**
Specially designed carrying case for above tripod. **\$1.89**

De JUR RANGE FINDER

The Range Finder With the Brighter Image

A new design permits a much brighter image than is available in most range finders. This extra light makes it possible to focus far more accurately and with much less eye strain. In addition, the extended eye piece simplifies the centering of the image and does not permit extraneous light to enter the viewing lens. Larger and sharper focusing methods assure more exact and easier focusing. The range scale is from 2 feet 6 inches to infinity with the last calibration before infinity at 300 feet. Instrument comes complete with a sling, a genuine cowhide case and accessory brackets. Made in U.S.A. and fully guaranteed by the manufacturer. **PH9336—DeJur Range Finder... \$4.95**

YOUR COST—POSTPAID IN U.S.A. ONLY... \$4.95

FILMO Double 8 Cameras

Since 1907 Bell and Howell have been famous as manufacturers of quality motion picture equipment used in professional studios in Hollywood and other film producing centers. All of the knowledge gained in producing this equipment has been utilized in the design of the popular Filmo Double 8 Cameras. Smallest and lightest of personal movie cameras, they are also the simplest to operate. Film can be loaded in daylight, in a few moments. No sprockets to thread and no loops to form. A rotary shutter gives accurate, uniform exposure. Four speeds available, depending on the model selected. Lenses are f:3.5 and f:2.5—amply fast for all normal work, including color film. In addition, a single frame exposure device permits making cartoons or trick titles. Case is of die-cast aluminum alloy. Provisions have been made to permit the use of other lenses; masks are attached to the view finder for use with 1 inch and 1 1/2 inch lenses.

PH2065—Filmo "Companion" (134-G) with f:3.5 lens, four speeds: 8/16/24/32 frames per second. **YOUR COST \$49.50**

PH2066—Filmo "Sportster" (134-F) with f:2.5 lens, 4 speeds: 16/32/48/64 frames per second. **YOUR COST \$75.00**

BOTH ABOVE POSTPAID IN U.S.A.

PH9710—Eveready carrying case for either of the above. Wt 2 lbs. **YOUR COST \$4.95**

PH9640—Grey leather compartment case for above models. Plush lined. Holds camera, 2 films and accessory filters. Has handle and shoulder straps. Shpg. wt. 2 lbs. **YOUR COST \$8.50**

A complete listing of popular 8 mm. home movie subjects will be found on page 43.

KEYSTONE K-8 Cameras

Clear, bright, "professional-type" pictures are easy to take with these fine Keystone cameras. Use standard low cost 8 mm. film, either black and white or color.

The model K-8 has been especially designed for your needs. It has all the features necessary to make sharp, clear pictures, yet is simple to operate and very sturdily built. The fully corrected high speed lenses are of the universal type with fixed focus that is correct for both close-ups and distant shots. An exposure chart is fastened to the face of the camera where it is always handy and provides a ready means for determining the correct setting for various lighting conditions. A powerful spring motor has sufficient reserve power to take several long scenes with a single winding.

Three speeds are provided: normal, s-l-o-w motion and fast. An automatic footage indicator keeps track of the amount of film exposed and lets you know how much unexposed film is left in the camera. Either the standard 25-foot double length of film or the new 30-foot single length can be used. The camera measures only 6 5/16 x 2 3/4 x 1 3/4" and weighs only 1 lb. 12 oz.

PH2026—Model K-8 with f:3.5 lens. List \$26.50. **YOUR COST \$23.85**

PH2027—Model K-8 with f:2.7 lens. List \$34.00. **YOUR COST \$30.60**

FILMO 141-A 16 MM. Camera

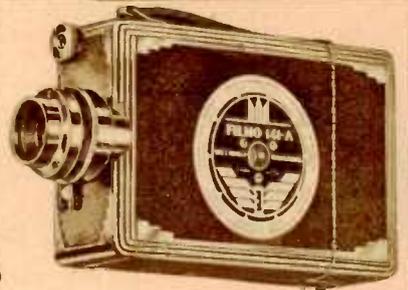

Ideal camera for beginners and for those who take movies only occasionally, and at the same time giving advanced workers the features they most desire in a camera. Film for the model 141 comes ready-threaded in a sealed cartridge holding 50-foot. It's the Kodak film MAGAZINE with built-in footage dial, and is available in black and white or in full color Kodachrome. Among the important features are: **PROJECTED AREA VIEWFINDER** that is positive in action. It permits no shifting of the field when the operator's eye wanders from the center of the eyepiece. **FOUR SPEEDS** at 8, 16, 24 and 32 frames per second. **SINGLE FRAME EXPOSURE**: push the starting button up and a single frame is exposed. This device permits making of animated cartoons and titles. The starting button is guarded against accidental contact, and may be locked up to keep the

camera in operation. **GOVERNOR**, precision type, maintains correct speed throughout the run. **POWERFUL SPRING** provides for 12½ feet of film per winding. **EXPOSURE GUIDE** built into the side of the camera tells correct lens setting for every light condition. **ROTARY SHUTTER** assures uniform exposure. Size: 1-15/16x3¾x5¾".

FAMOUS 8 M M PROJECTORS · GIVE LIFE-LIKE CLEAR PICTURES

FILMO 8 MM. PROJECTOR

Not just another movie projector but a real projection machine that provides brilliant theater-quality pictures equal in sharpness and clearness to those shown in the finest motion picture theaters. It is especially designed to meet the requirements for successful use by the amateur. Among its many outstanding features is the complete film protection that greatly increases the life of your films. They cannot be scratched by the projector because the picture area of the film never contacts the mechanism. All film guidance is by the edges of the film and a specially designed shuttle minimizes perforation wear.

Brilliant Illumination

Brilliant illumination is obtained by a direct lighting system employing a 400 or 500 watt (depending upon model chosen) lamp and an extra fast f:1.6 lens. An 11 to 1 shutter and shutter movement eliminates flicker. Fully enclosed gears drive the feed and takeup reels and there are no chains or belts exposed or used. Accurately made gears assure quiet operation and long life.

Easily Focused

Focusing is simple and smooth and all operating adjustments are quickly and easily made even in dim light. Construction is unusually sturdy. Base and lamphouse are die cast metal and a powerful motor drives the projector and provides a powerful draft of air to cool the lamp. Capacity of the projector is 200 feet of film, enough for a 17 minute show.

PH2260—Filmo Model 122-A for 110 volts a.c. or d.c. with 400 watt lamp.

KODASCOPE 8 MM.

PROJECTOR

A fitting companion for the very popular Cine Kodak's. Despite its reasonable price it is very efficient. A torced draft ventilation system, actuated by a powerful motor, prolongs the life of the projection bulb and keeps the film and the mechanism cool. The bulb employed is a 300 watt projection lamp which together with the fast lens system, provides splendid pictures up to 40 inches in size. Built with great precision and each part is fitted and finished with great care. The Model 50 is easy to operate. Anyone can thread, frame and focus this machine at the first try. It has a capacity of 200 feet of film and the film is easily rewound by motor. The projector can be operated on either d.c. or a.c. on 110 volts 25 to 60 cycles. The machine is beautifully finished in dull black and chrome. All necessary adjustments such as tilting, etc., are provided.

KEYSTONE M8 AND R8 PROJECTORS

Made by a manufacturer who has been famous for many years as an outstanding producer of a complete line of motion picture equipment. These two 8 mm. Projectors are excellent values incorporating many fine features. Both have a.c.-d.c. motors for operation on either d.c. or a.c. 110 volts 25-60 cycles.

The Model M8 employs a powerful 300 watt lamp and has a fully achromatic lens that assures perfect, clear black and white or full color pictures. A highly polished reflector adds to the efficiency of the lamp by concentrating light ordinarily wasted onto the film.

The entire projector is mounted on a heavy cast iron base equipped with soft padded feet. A tilting device is easily adjusted to any desired angle. Either 200 feet or as much as 400 feet of film can be used providing up to 34 minutes of entertainment with a single loading.

The projector is so designed that threading and focusing are extremely simple. Forced draft ventilation and motor rewind are provided for.

The Model R-8 is similar to the M-8 but has a faster f:1.85 lens and a more powerful 500 watt projection lamp. It, too, has a capacity of 400 feet of film.

PH2210—Model M-8 with Achromatic lens and 300 watt projection lamp. List \$39.50

YOUR COST **\$35.55**

POSTPAID IN U.S.A. ONLY

PH9816—Carrying Case for either model. Shpg. wt. 2 lbs. YOUR COST **\$3.95**

UNIVEX 500 Watt Model P500

This remarkable projector throws a large brilliant picture on a screen 5 by 7 feet in size. A powerful 500 watt lamp together with a highly polished reflector and a condensing lens provide the intense light required to accomplish this feat. The projection lens is an ultra fast f:1.6 of 1" focus. Despite this high power lighting system the projector is very cool in operation because of a powerful double inlet fan running in oilless bearings. The entire frame of the projector is of die cast metal assuring perfect alignment and long life. The forced draft cooling system is so efficient that it permits the projection of "stills." All controls are centralized on a single panel. This makes for greater operating ease.

8 MM. PROJECTOR

The controls provided include a speed control for the motor, a master safety switch, a separate lamp switch and a pilot lamp socket. The projector is designed for operation on either d.c. or a.c. from 105 to 120 volts. Capacity of the projector is 200 feet of black and white, or color, film.

PH2252—Univex 500 watt Projector, with lamp and one reel.

FILMO

750 Watt "FILMO MASTER"

Unquestionably one of the finest moderately priced 16 mm. projectors on the market. Entirely gear driven. No belts or chains anywhere—inside or out. The gears are silent, being fully enclosed by rigid aluminum die castings. It is regularly furnished with a 750 watt lamp but may also be used with 300, 400 or 500 watt lamps where full brilliancy is not desired or required. The lens is the same 3 1/2 inch f:1.6 lens that is used on all of the higher priced Bell & Howell machines.

32% Increase in Illumination

A Magnette Condenser is furnished with each projector. This increases the illumination approximately 32% with the standard lens and lamp. Among the many outstanding features of the "Filmo Master": Lamp Switch. Permits turning the lamp off during rewinding. Pilot Light. Located just where you need it most, a no-glare pilot light illuminates the mechanism, permitting easy changing of reels in a darkened room.

Two-Way Tilt. Turning a thumbscrew tilts the projector up or down, and the film is run backward, all action on the screen taking place backward.

Still Projection. Film movement may be stopped to project any single film frame as a still picture. A safety shutter automatically protects film from heat. Cap. 400 feet. PH2262—Filmo "16 mm. Filmo Master" Projector with 750 watt 110 V lamp, 1 reel and carrying case. YOUR COST \$139.00
POSTPAID IN U.S.A.

NOTE: We can supply Standard 16 mm. Sound Projectors on order. Write for prices and literature describing them in detail.

KODASCOPE Model EE

A remarkable projector at a very low price. Throws 16 mm. picture up to 8 foot wide. Supplied with the finest Kodak f:1.6 lens. Easy to thread, frame, and focus. Extremely quiet in operation. Powerful a.c. d.c. motor. Provided with 30" tilt device. No belts to adjust when rewinding. Six major bearings require no oiling. Other features: tandem pull-down for steady projection; handy rewind clutch; power fan cooler.

PH2215—Model EE projector with f:1.6 lens, less lamp. YOUR COST \$60.75

Sturdy carrying case for the above model. PH9821—YOUR COST \$5.45

for The Home Movie Maker

BELL and HOWELL 8 Millimeter Titler

With this new title making unit, Filmo 8 mm. camera users can film their own titles with ease and assurance. The Titler consists of a vibration-proof pedestal with a title card holder on its base and provision for holding your Filmo 8 mm. camera at the top. A cross-arm bears two sockets and reflectors for the lamps. Correct exposure and freedom from glare are assured by the fixed position of these lamps. A highly corrected copying lens is included and sealed to focus sharply on the title card. The camera is attached as illustrated, always correctly positioned without adjustment. The outfit comes complete with two dozen title cards and two sets of lamps (less bulbs). SHIPPED POSTPAID IN U.S.A. ONLY.

PH2417 - YOUR COST **\$25.00**

Movie Titlers

A well constructed, efficient titling outfit that should be included on the necessary list of every home movie maker. It makes a dandy gift item too! All necessary equipment is included. The entire outfit consists of the titler, a batch of titling cards and an alignment mask. The titler is all-metal, with attractive crystalline finish. Copying lens sealed in position for accurate focus. With instructions. Shpg. wt. 4 lbs.

IMPROVE YOUR MOVIES *Make your own Titles*

Crystal Beaded Screen

A practical, easy to handle crystal beaded screen. Absolutely no halation in front or at the sides. Reflects four times the light of a diffusive screen within an angle of 25 degrees. Roller type, on a sturdy wood base. Has metal post support. Crystal beaded surface is 36x40". Shpg. wt. 8 lbs. **PH2753—YOUR COST..... \$4.49**

BEADED TABLE MODEL: As above, but with easel brace for table use. Without the easel, can be hung from a hook or nail. Detaching the easel brace allows the screen to be rolled and stowed compactly. 22x30". Shpg. wt. 5 lbs. List Price \$5.00 **PH2755—YOUR COST..... \$2.19**

Special Silver Screen

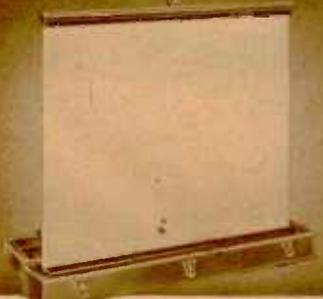

For showing black and white or full color films. 24x34". Held taut by a spring wire easel. Shpg. wt. 5 lbs. **PH2754—YOUR COST..... \$1.79**

Crystal Tripod Beaded Screen

A fine quality 36x40" screen with efficient crystal beaded surface. Frame constructed of strong but lightweight metal tubing. Can be set up quickly and easily, and when not in use it can be folded into a neat compact unit. The height of the screen is adjustable. Screen rolls up into the tubular base support like a window shade. Tripod folds into a compact unit. Metal parts finished in dark crackle. Tripod feet equipped with non-scratch rubber feet. Shpg. wt. 18 lbs. **PH2756—YOUR COST..... \$12.95**

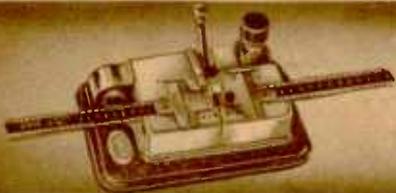

PH2757—36x48" Crystal Beaded Tripod Screen. YOUR COST..... \$15.95

DeLuxe Beaded Screen

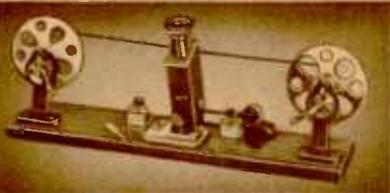

Deluxe movie screen that employs the highly efficient "beaded" reflecting surface that increases the brightness of your pictures without increasing wattage of your projection lamp. It measures 30x40" and is housed in a compact, light weight carrying case that has snap lock fasteners and a sturdy carrying handle. Case is covered with black leatherette. Rigid metal screen support is also contained in the case. Screen unrolls just like a window shade. The metal top bar attached to the screen evenly distributes the spring roller tension, leaving the screen surface free of pulls or ripples. Shpg. wt. 6 lbs. **PH2750—36x40" Screen YOUR COST..... \$8.89**

Extra Large Model: Similar to the above but larger. Measures 36x48" overall. Shpg. wt. 7 lbs. **PH2751—YOUR COST..... \$10.95**

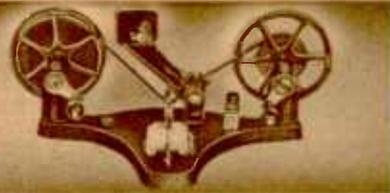

KEYSTONE DeLuxe Splicers

For 8 mm. silent and for 16 mm. silent or 16 mm. sound film. Makes a patch splice; no scraping and no water. Precision made to insure quick, accurate results. Splice is strong and clean. No detached parts or loose parts to handle. Entire unit is mounted on a sturdy wood base. Metal parts heavily plated. Outfit includes a handy 1-ounce bottle of film cement. Ideal for repairing torn sprocket holes without cutting the film. Shpg. wt. 3 lbs. **PH2429—DeLuxe Splicer for 16 mm. silent or sound film. PH2430—DeLuxe Splicer for 8 mm. film. YOUR COST EACH EITHER MODEL..... \$3.39**

KEYSTONE Editing Outfit

Provides sharply focused brilliant image in viewer. Viewer mounted on swivel for moving out of position for splicing. For use with both 8 and 16 millimeter film. Has two geared rewinders mounted on hardwood base. Comes complete with bottle of film cement and water bottle. With cord and plug for use on 110 volts, a.c. or d.c. 21 1/2x 3 1/2x 9". Wt. 8 lbs. **PH2442—YOUR COST..... \$6.69**

BELL and HOWELL 8 MM. Film Editor

A complete outfit comprising a pair of geared rewinders, a splicing device and a specially designed film viewer. Geared rewinders wind film in either direction and accommodate 8 mm. reels up to 200-foot capacity. Film is drawn through the viewer channel; whenever it is stopped, a magnified, brilliantly illuminated image of a single frame is cast on the viewing screen, about 1 1/2" wide. Screen is shielded. Includes 1-ounce bottle of film cement. Viewer lamp operates on 110 volts a.c. or d.c. **SHIPPED POSTPAID IN U.S.A. ONLY PH2443—YOUR COST..... \$33.00**

KEYSTONE Splicing Kit

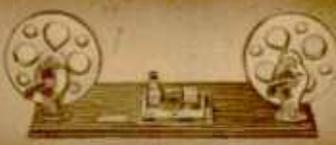

An all-metal durable splicer, water bottle, bottle of film cement, scraper and cutter for 8 or 16 mm. films. Shpg. wt. 2 lbs. **PH2432—YOUR COST..... 89¢**

Film Cement

Handy 1-ounce bottle of tested film cement. Makes a secure positive joint. **PH2440—YOUR COST..... 19¢**

BELL & HOWELL Film Cement

Safety film cement that splices ideally all safety film. Round bottle has combination cork and brush; square bottle has screw cap and brush. Both 1-ounce. **PH2458—Round Bottle..... 25¢ PH2459—Square Bottle..... 25¢**

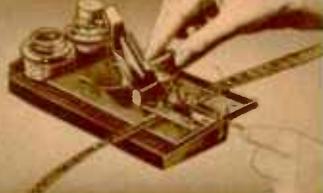

SEEMANN "Splicemaster" For 8 and 16 mm. Reels

Splicer and geared rewinders assembled, ready for use, on an attractive cushioned base-board. Splicer makes clean, efficient splices easily, and accommodates both 8 and 16 millimeter films. Pins accurately set. Complete with bottle of film cement and instructions. Less reels. Shpg. wt. 4 lbs. **PH2426—YOUR COST..... \$5.85**

UNIVEX Film Viewer and Editor

Unique device for use with your projector. Provides a bright, clear image of every frame. Easy to operate. **PH2441—POSTPAID IN U.S.A. EACH..... \$1.95**

BELL and HOWELL Splicer

A complete, satisfactory splicer at a moderate price. Handles 16 mm. sound, 16 mm. silent and 8 mm. film, and makes an accurate, strong, pliable diagonal splice. Mounted on a wood base and equipped with a hand scraper blade. 1-ounce bottle of water and 1-ounce bottle of film cement. **SHIPPED POSTPAID IN U.S.A. ONLY PH2427—YOUR COST..... \$4.50**

CONTACT PRINTERS·FAMOUS ELWOOD ENLARGERS

ALBERT All-Metal CONTACT PRINTERS

In
4x5 Inch
and
5x7 Inch
Sizes

Made of brass and steel throughout and beautifully finished in black

wrinkle enamel with polished chrome and nickel trimmings. Both models feature: ample ventilation; film guides for 35 mm. strip film; non-rusting adjustable steel masking bands; etched metal scales for masking bands calibrated in 1/8" divisions; special hinged metal side door for easy access to ground glass for dodging; sockets for one red and two white lights, any size up to 60 watts—red light on continuously—white light automatically controlled by opening and closing cover; sponge rubber pad plus pressure springs assure uniform contact between negative and paper over the entire surface. Complete with ruby bulb and instructions. Both models operate on either a.c. or d.c.

PH8650—Albert Printer for negatives from 35 mm. to 5x7". Size: 11 1/2 x 9 1/2 x 6 1/2".

YOUR COST **\$8.78**

POSTPAID IN U.S.A. ONLY

VICEROY All-Metal CONTACT PRINTER

A new method of making the actual exposure permits the use of this printer as both a printer and a safelight. The safelight is always on and

is not controlled by the operating lever. The Viceroy will accommodate all negatives from 35 mm. to

4x5". Positive paper alignment is assured by metal guides set for accurate 3/16" margins. Masking bands are adjustable and easily accessible. Sponge rubber coated and double hinged pressure back assures uniform pressure over the entire negative area. Hinged top for easy cleaning and bulb replacement. All metal construction—steel and brass. Compact size 7x7x9 1/2".

PH8666—Viceroy 4x5" Printer as described.

YOUR COST **\$4.46**

POSTPAID IN U.S.A. ONLY

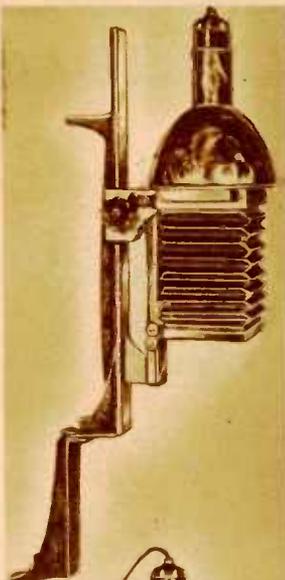

ARGUS SPEED PRINTER

This machine simplifies the enlargement of 35 mm. negatives and the cost is very low. Entire unit is housed in a portable all-metal cabinet 7 3/4 x 5 3/4 x 10 1/2". It comes complete with a pre-focused lamp and is

ready to use. You merely place the film strip in the glass negative holder, place the printing paper under the top cover and press the cover down. There are no adjustments to make. Uses standard Argus Bromex paper 2 3/4 x 4 1/4" in size. Handsomely finished, and sturdily constructed, this compact instrument makes an ideal gift. Operates on 110-120 V. 50-60 cycles a.c.

PH2515—ARGUS Speed Printer.

YOUR COST POSTPAID IN U.S.A. ONLY **\$15.00**

5x7 Inch STUDIO Model

This STUDIO Model 5x7 inch Enlarger fills every requirement of the professional and amateur. Its sturdy construction and patented light system makes all kinds of projection printing easy, results are uniform and certain. It can be fastened to the wall, screwed to the top of the table, or placed in a horizontal position for projection. Enlargements and reductions can be made. (Reductions cannot be made with a lens over 6 1/2"). Either films or glass plates may be used from the smallest size up to 5x7". Focusing is by means of a standard type of rack and pinion gear with a positive lock adjustment. The reflector (patented) is of copper, silvered and highly polished. A 100 watt lamp (opal or full frosted enlarging) is recommended. The upright is cast iron and all woodwork is of mahogany, mortised and tenoned for maximum strength. The negative carrier may be inserted from either side. Overall height is 55".

PH2523—Elwood 5x7" Studio Model Enlarger with one 100 watt bulb and 4 ft. extension cord, less lens. POSTPAID IN U.S.A. List \$30.00.

YOUR COST **\$27.00**

PH1957—6 1/2" f:6.3 Anastigmat lens for use with the above enlarger in barrel mount with iris diaphragm. POSTPAID IN U.S.A. List \$28.50.

YOUR COST **\$19.95**

2 1/4 x 3 1/4 Inch Model AM

The increasing popularity of 2 1/4 x 3 1/4" cameras, such as the new Speed Graphic and others, has made this enlarger a great favorite with professionals and amateurs alike. It employs the same patented silvered reflector principle of illumination as the model listed above. The body of this model is cast aluminum and focusing adjustment is by means of a large diameter micrometer screw and soft folding bellows. The upright stand is of cast iron with a rustproof steel slide.

Vest pocket sizes, and under, can be enlarged to 15 diameters with a 2" lens but for larger negatives a 3" lens is recommended. The 100 watt enlarging bulb furnished with the enlarger is ample for use with even slow papers due to the high efficiency of the illuminating system.

The negative carrier is so designed that the negative is kept in an absolutely flat plane assuring good definition right to the edges. The complete unit is mounted on a plywood non-warping easel. Overall height of the enlarger is 48".

PH2520—Model AM with 100 watt bulb but less lens. List Price \$30.00. YOUR COST **\$27.00**

POSTPAID IN U.S.A. ONLY

For suitable lenses see opposite page.

PH9918—"PLIOFILM" cover for above. \$1.35

2 1/4 x 2 1/4 Inch Model BM

An outstandingly fine enlarger for all miniature films from 35 mm. to 2 1/4 x 2 1/4". The light system in this model consists of a 100 watt opal enlarging bulb and a single condensing lens. The light is set at a fixed position and requires no adjustment. The entire enlarger is made of machined castings which insure rigidity and eliminate vibration. All working parts operate smoothly and accurately. The body is raised and lowered on a 1 1/2" diameter chrome plated tube for the desired picture size and fastens into position with an eccentric clamp. It is beautifully finished with a baked blue-black wrinkle finish. The negative carrier is finished in dull black. This carrier is of the glassless type and does eliminate part of the trouble from dust specks. The column is 30" long and the enlarger will provide up to 10 diameter enlargements with a 3" lens. But any lens from 2" to 3 1/2" may be used. The lens mounting is equipped with multiple threads for focusing and operates very smoothly. A red screen is also provided to swing in front of the lens while adjusting the paper on the easel. The easel or baseboard is laminated and 12x22" in size.

PH2521—Model BM Enlarger with 2 1/4 x 2 1/4" negative holder. Less lens. List Price \$18.00.

YOUR COST **\$16.20**

POSTPAID IN U.S.A. ONLY

For suitable lens see opposite page.

PH9918—"PLIOFILM" dustproof cover. \$1.35

ARGUS "Electramatic" Fixed Focus Printer

The 35 mm. enlarging printer that thinks for you! It accurately checks each negative with two photo cells and electrically times the exposure making a perfect print every time. Fixed focus. Takes all 35 mm. film—individually or in strip form. Makes prints 2 3/4 x 4 1/4". Separate negative density and paper contrast controls. Similar in appearance to Speed Printer. For 110 V. 60 cycles a.c. or 110 V. d.c.

PH2540—YOUR COST **\$35.00**

POSTPAID IN U.S.A. ONLY

FOR FUN IN PHOTOGRAPHY-GET A GOOD ENLARGER

SOLAR Enlargers

Solar enlargers are made in two types—"miniature" with adjustable condensing lenses—and "senior" with improved ground glass diffusion for the larger size negatives.

The Miniature type employs adjustable condensers so that the light produced by the bulb is always focused directly at the enlarging lens for perfect even illumination. Other features include a counter-balanced head, micrometer focusing, scientific stack-type ventilation, heavy chrome plated standard, dustless negative carrier, etc. Two sizes are available—the first for single or double frame 35 mm. negatives—the second for all negatives up to 2 1/4 x 3 1/4" including 6.5x9 cm. PH2530—35 mm. Solar Enlarger complete with 2" f:4.5 lens.

PH2531—2 1/4 x 3 1/4" Solar Enlarger with 3" f:4.5 lens and 1 negative carrier (specify size desired).

ARGUS "Argostat"

New 35 mm. Enlarger. Brilliance in illumination is achieved through an offset light source in which the light is reflected from a flashed opal projection lamp by an optically flat mirror to a pair of condensing lenses. Remote focusing control is an ingenious arrangement whereby approximate focus is set at the enlarger head and fine focusing is accomplished at the baseboard by a large handwheel giving a vernier adjustment. Other features include: rigid, rugged construction, dust-free film book and cool operation.

PH2522 Argus Argostat less lens.

FEDERAL

Model 230

For negatives 2 1/4 x 3 1/4", or smaller. This Enlarger has an illumination system that supplies the best advantages of both condenser and diffusion by the use of a 4 1/2" condenser lens and a ground glass diffusion plate. An opal lamp mounted on an adjustable rod together with a parabolic reflector provides an intense light source that reduces exposure time. Entire head of the enlarger is counter-balanced on a steel tape for one hand operation. Upright post is of steel plated and highly polished. Enlargements up to 8 times can be made directly on the baseboard—up to 20 times on the floor. Both f:6.3 and f:4.5 lenses are available as noted below. A very convenient book type negative carrier is supplied and either dustless metal plates or glass pressure plates may be used.

Carrier has pressure release for adjusting negatives while in the enlarger.

Focusing is accomplished by means of a balanced micro-lever permitting extremely accurate focusing. Shpg. wt. 25 lbs.

PH2516—Federal Model 230 with f:6.3 anastigmat lens in barrel with iris diaphragm. **\$32.95**

FEDERAL

Model 120

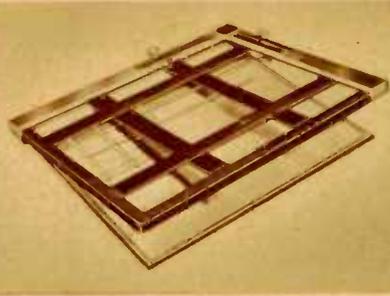

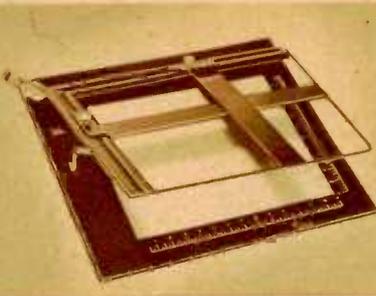

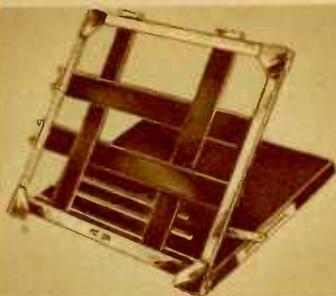

An excellent low priced enlarger that will take all negatives from 35 mm. to 2 1/4 x 3 1/4". It has a fine Fedar f:6.3 lens and will provide up to seven linear magnifications on the baseboard. A square standard assures absolute alignment and rigidity. The special book-type negative carrier is furnished with a complete set of masks for the various negative sizes and a specially designed focusing strip. A double diffusing system assures even illumination over the entire negative area. The lamphouse is so designed that ample ventilation is maintained at all times so that the negatives will remain cool even under prolonged exposure. A switch for the lamp is provided on the connecting cord. The baseboard is a specially designed easel with adjustable masking bands and a paper placement chart.

PH2513—Model 120 complete with f:6.3 lens and 125 watt enlarging lamp. **\$16.69**

Fine Prints Come from Well Equipped Dark Rooms

ALBERT Automatic Easel

The enlarging easel that does everything. Automatic centering for various standard paper sizes eliminates the need for shifting the easel—set it once under the center of the enlarger and you can keep it there no matter what size of paper you use—5x7", 8x10" or 11x14". It has an automatic border measuring scale that gives you the right size borders for any size print you set it for. Automatic spring setting of the masking bands eliminates the need for set screws. Automatic frame support holds the frame locked in an upright position when changing paper yet releases instantly when lowered. Positive contact of masking bands at all points prevents fuzzy borders. Non-warping easel board surfaced with Masonite. In-laid rubber strips under base prevent slipping. Metal frame work finished in chrome. Easel surface finished in non-reflecting metallic lacquer. SHIPPED POSTPAID IN U.S.A. ONLY.

PH9304—YOUR COST

PRINCETON DeLuxe Easel

One of the finest enlarging easels available. Of the constant center type. The masks consist of four strips of heavy gauge formed steel 1 1/2" wide, which hold the paper firmly and produce a sharp, clean border line. Margins are instantly variable from a hair-line to the full width of the masking strip. Each pair of masks is operated by a single control button. Moving the control button moves both border strips symmetrically toward or away from each other; all four masks are set by two motions and centering of the pairs is automatically maintained. Baseboard is provided with set grooves for 4x5, 5x7, 8x10 and 11x14" paper. Surface of the baseboard is finished in a special silver lacquer. The frame is heavy metal. Siderails have special Photogold finish which absorbs blue rays and reflects only harmless rays. Entire unit is precision built. Shpg. wt. 8 lbs.

VARISCOPE All-Purpose Telescopes

For maximum magnification at a minimum price there is nothing like a good telescope. And these new Variscopes are among the finest values on the market. They have the unusual ability to change from one power to another instantly merely by sliding the calibrated "power" tube in or out. Various powers as indicated below are marked on the tube for quick setting. They are beautifully made telescopes with precise achromatic objective lenses and heavy chrome plated brass tubes. The four sections slide one within the other to make a very compact unit that is easily carried about in its leather carrying case. As listed below they are available in three different power ranges. The largest and most powerful having a range of from 10 to 40 powers! This is an excellent glass for the yachtman and hunter. Leather case with all models.

MINI-FLASH

The ideal universal flash gun for amateur and professional photographers. It is novel in design, simple to mount, simple to synchronize and simple to operate. The 6-inch fan type reflector is collapsible, yet sturdy in construction and will withstand "heavy" service. It is of the Aplanatic type and will not throw a "spot". The action is positive with a specially built all-metal cable drive to the camera shutter and can be operated from a cable release or from a button on the case. Other features: reflector adjustable to take all standard size bulbs; gun type trigger for cocking the flash; ultra compact construction. Two penlite batteries are included. These will last about 6

months or flash 450 bulbs, and can be easily replaced for only 5c each (see page 27 for penlite battery listing). Each Mini-Flash comes with accessory clip for side mounting, clip for tripod mounting, SHIPPED POSTPAID IN U.S.A. ONLY.

PH8121—No. 212—150 Watt Opal Bulb for above..... **35c**

NEW AND SENSATIONALLY DIFFERENT! The "Hi-Lite" Spotlight

An entirely new conception of photographic lighting. Now in every sense of the word, from a specially designed 3200° Kelvin color temperature lamp (recommended temperature for Kodachrome) to a streamlined die-cast aluminum-silicon housing. New in its ability to use a lamp with a light output of over 4,750 lumens, yet giving an efficiency equal to many ordinary 400-500 watt spotlights with a drain of 200 watts at 120 V.

Amateur and Professional alike will appreciate its extreme compactness, its micro-focusing control which regulates the light beam from a sharply defined spot to a diffused flood with an infinite variety of adjustment in between. And, with its specially designed heat resisting Pyrex Fresnel lens and chrome-plated non-tarnishing spun-aluminum beam concentrator, it has no color fringes and is ideal for portraiture and studio work, particularly in color. Despite its power and high efficiency it is surprisingly compact, measuring only 3 3/8" x 4 1/2" x 4 1/2". A die-cast universal yoke and convenient "aray-cool" handle permits directing the beam in any direction. Fits standard 3/4" stands. All controls remain cool to the touch. The specially designed lamp will not blacken nor vary in light output.

PH8037—"Hi-Lite" Spotlight complete with lamp listed below. Shpg. wt. 8 lbs. **\$15.89**

RAPIDRY Electric Print Dryers

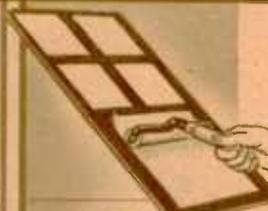

Standard Model

Illustrated at the left is the standard model Rapidry at a new low price! Yet with exactly the same features and constructional quality as when sold for \$6.00. Without the ferrotyping plate it is suitable for smooth, semi-matte or matte finished paper surfaces. For glossy paper the prints are first placed on the chromium plate and placed on the drying surface. An automatic thermostat keeps the heat at a constant temperature so that overheating or scorching of the prints is impossible. This feature is not present in any other unit at the price. The best nichrome heating element is employed and is large enough to assure uniform heat over the entire drying surface. Finished in two-toned baked crystal.

PH8495—Shpg. wt. 7 lbs. YOUR COST..... **\$3.89**

Special Deluxe Model

Not illustrated. This new model has a flat drying surface that produces absolutely flat prints with no roll or curvature. It has a built-in 14x20" chromium plated ferrotyping end and will take several additional plates making a total area up to 42 by 50 inches. Spring tension keeps the specially woven canvas apron flat irrespective of the number of plates in use. Sturdy die-cast construction. Automatic thermostat keeps the temperature uniform and assures the fastest drying time with no danger of scorched or cracked prints. Shpg. wt. 10 lbs. **\$8.89**
PH8714—YOUR COST..... **\$8.89**

CLASSIC

MODERNE

ULTRA MATTE Mounts and ULTIMO Folders

As stated by a world-famous photographer, "No print is fit to be seen in good company until it has been carefully spotted and mounted". Ultra and Ultimo Mounts and Folders provide a quick and easy method for mounting your prints attractively. The actual work involved in pasting the print into position with Lafayette Fotostick takes but a moment and the results will surprise and please you. Both Ultra Mounts and Ultimo Folders are made of antique paper with leather dekeled edge. Ultimo Folders have a front flap or cover—Ultra Mounts do not have a cover.

ELKAY Roto-Reel Tank

A new developing tank for cut film or pack film. Made entirely of tempered bakelite—impervious to chemicals and non-staining. Takes all sizes from 35 mm. to 2 1/2 x 3 1/2". Uses less solution and produces beautiful negatives. The new Roto-Reel is made with 12 fan-like grooves which spiral out from the center of the core. To load, slip each negative into a groove. Negatives are held firmly and without buckling. Top cover is light-tight. Complete with agitator. SHIPPED POSTPAID IN U.S.A. ONLY.
 PH9263—YOUR COST..... **\$3.29**
 Extra Roto-Reel assembly only. Can also be used in the Lafayette tank listed above. SHIPPED POSTPAID.
 PH9264—YOUR COST..... **\$1.89**

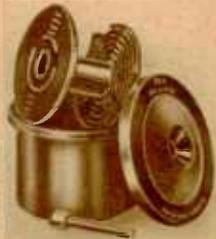

ALBERT Electric Agitator

For the first time, an electric agitator at a price within the reach of every amateur. Automatic in operation, the Albert Agitator provides true "scientific" agitation—an automatic continuous gentle intermittent action that eliminates the danger of under- or over-agitation often resulting from unscientific hand operation. Prevents directional development which causes streaks and silhouette effects, coarse grain, foam, etc. Consists of an efficient motor that operates on any 110-volt a.c. or d.c. line that drives the tank holder. Mechanism is sturdy and foolproof and completely enclosed. Impervious to chemical action. With cord and plug. SHIPPED POSTPAID IN U.S.A.

Darkroom

Outfits

"ECONOMY" Dark Room Outfit

A very reasonably priced outfit for both developing and printing that is especially designed for those desiring to start with just the necessary essentials. Each item has been carefully selected and is of excellent quality. The outfit is complete enough to enable you to do good work right at the start without resorting to any makeshift methods. It provides an excellent foundation for the beginner to which other items may be added as his skill increases in order to do more advanced work. It is an excellent gift for the youngster or grownup just beginning to get interested in photography.

"JUNIOR" Dark Room Outfit

Priced only a little higher than our Economy outfit, the Junior Printing and Developing Outfit provides a much wider range of working facilities than does the former. It includes larger trays and a larger printing frame as well as film clips and a larger quantity of essential chemicals. The contact printing paper is larger, too, enabling you to print larger size negatives or to cut it up into a larger number of smaller size prints. Another feature is the inclusion of two books—one general information and one on exposure.

FOTO-ART and TROJAN "Make-Your-Own Greeting Card" Outfit

A complete outfit for making your own Christmas Greeting Cards. It is extremely easy to use. The hard part—the lettering—has already been done for you.

Just take any suitable negative—a winter scene, a picture of your baby, your house or your last year's Christmas tree—place it together with one of these specially prepared card negatives in a print frame and you are all set to go. There are two outfits, one with four masks and one with two masks—each with a different greeting; and an embossing frame and roller. Space is provided for signature on negative masks. Shpg. wt. 2 lbs.

Christmas Greeting Folders

Folders offer the simplest method of all to make your own personalized Christmas Greeting Cards. You do not have to be able to do your own printing or developing with this method. Just insert your photos in these folders. They are made of fine antique finished paper folded twice to give it thickness. The opening for the print on the front page is 2-1/16x3-1/16". The delicate "Rolly" design on the cover is most attractive, yet so subdued as to be in good taste. Prices include matching envelopes.
