C-D'S NEW VIBRATOR

- years ahead in simplicity of construction
- embodies latest developments *plus* C-D's famous built-in standard of quality
- designed by the nation's foremost engineers
- a complete line of replacements available

For your local C-D distributor, consult your Classified Telephone Directory . . . or write direct to Electronics Division, Cornell-Dubilier Electric Corporation, South Plainfield, New Jersey.

world's leading manufacturer of

VIBRATORS

CAPACITORS · CONVERTERS

A. C. BRIDGES

Bridges of various sorts are employed widely for the accurate measurement of resistance, capacitance, and inductance and also of other quantities such as power factor, dissipation factor, and Q which are associated with impedances. An unknown quantity may be determined by means of a bridge circuit in terms of an accurately-known standard quantity. Thus, the bridge method of measurement is a comparison method.

Figure 1 shows the basic arrangement of a 4-arm bridge circuit. The input voltage is applied to points 3

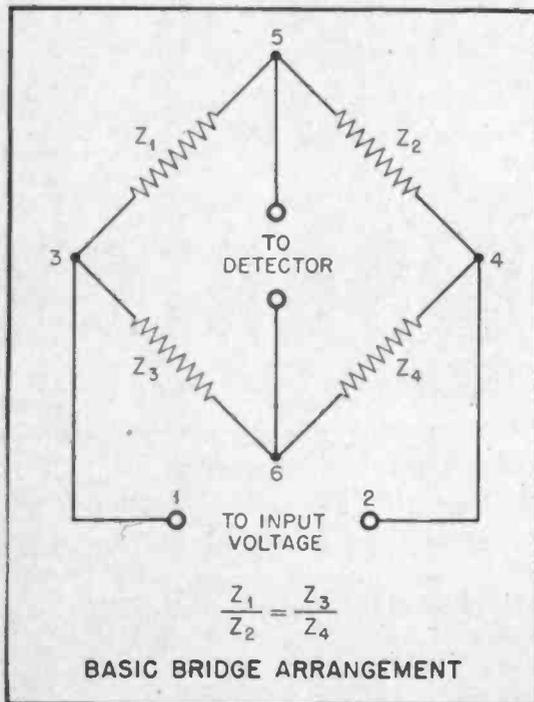

Fig. 1.

and 4 of the network, and a suitable current or voltage indicating instrument (sensitive voltmeter or galvanometer), termed the **detector**, is connected between points 5 and 6. If one or more of the impedance legs are adjusted so that $Z_1/Z_2 = Z_3/Z_4$,

no current will flow through the detector because points 5 and 6, under these conditions, will be at the same potential. This is the condition referred to as **null**. At null, as evidenced by zero deflection of the detector, the

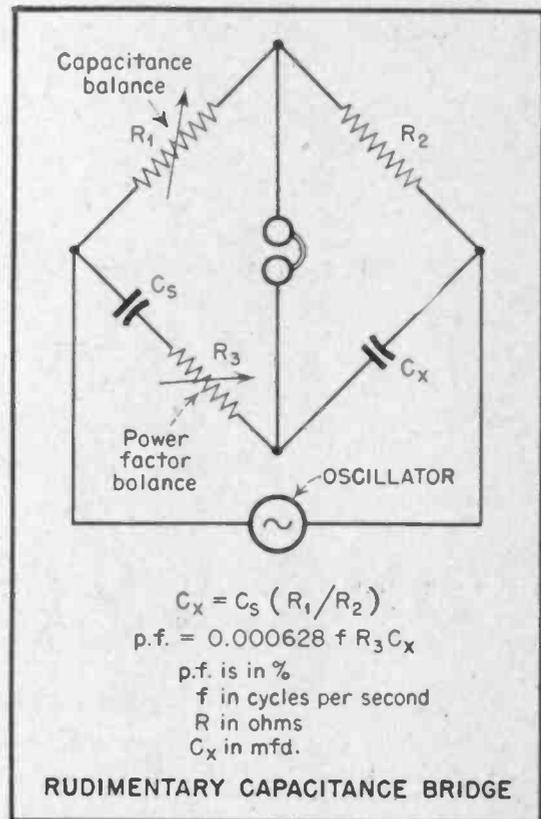

Fig. 2.

unknown value of any one of the impedances may be determined in terms of the other three known values from the foregoing equation. Thus, $Z_2 = (Z_1 Z_4) / Z_3$.

A bridge intended only for resistance measurements will contain four pure resistance arms (the symbols R_1 , R_2 , R_3 , and R_4 will replace the Z -designations in Figure 1); the input voltage will be pure d.c., supplied by a battery; and the detector will be a

d.c. galvanometer. Inductance and capacitance measurements, however, require that one or more legs of the bridge be suitable reactances or impedances. The input signal then must be an alternating voltage of appro-

bridge is needed for reasons of convenience or economy, it is more satisfactory to confine resistance measurements to the d.c. bridge.

Capacitance is measured with the rudimentary 4-arm, Schering, and Wien bridges. Inductance is checked with the Maxwell, Owen, Hay, and resonance bridges. Among other miscellaneous applications, distortion may be checked by means of the Wien and resonance bridge circuits, and frequency in the audio spectrum may be checked with the Wien bridge.

Two adjustments usually must be made with practical a.c. bridges. The first is the reactive balance and is the one giving the information from which we determine the unknown capacitance or inductance value. The second is the resistance balance which shows the

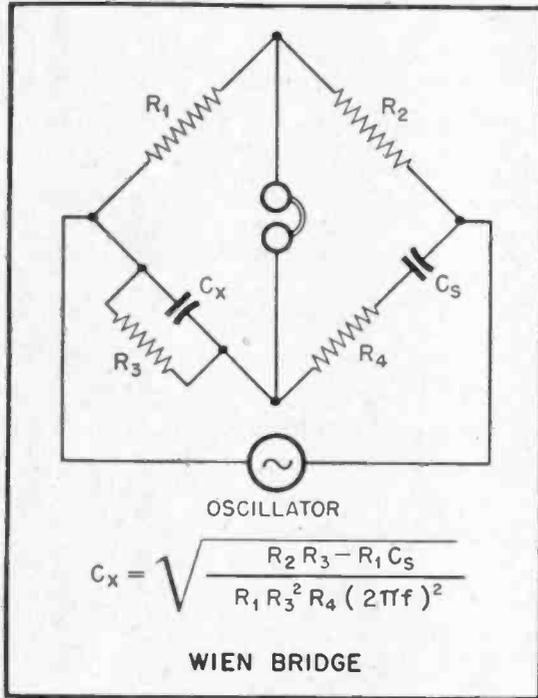

Fig. 3.

appropriate frequency and the detector must be a sensitive a.c. instrument, such as a v. t. voltmeter, cathode ray oscilloscope, electron-ray tube, or high-resistance headphones.

In this article, we will describe a.c. bridge circuits and will give their balance equations. These are the circuits which are employed in instruments designed both for laboratory and maintenance applications. Please bear in mind that the a.c.-type bridge may be used for resistance measurements, as well as for the determination of capacitance and inductance. Many combination bridges take care of resistance in addition to capacitance. The well-known **impedance bridge** measures resistance as well as capacitance and inductance. Resistance measurement, however, is an added feature of these bridges and unless a multi-purpose

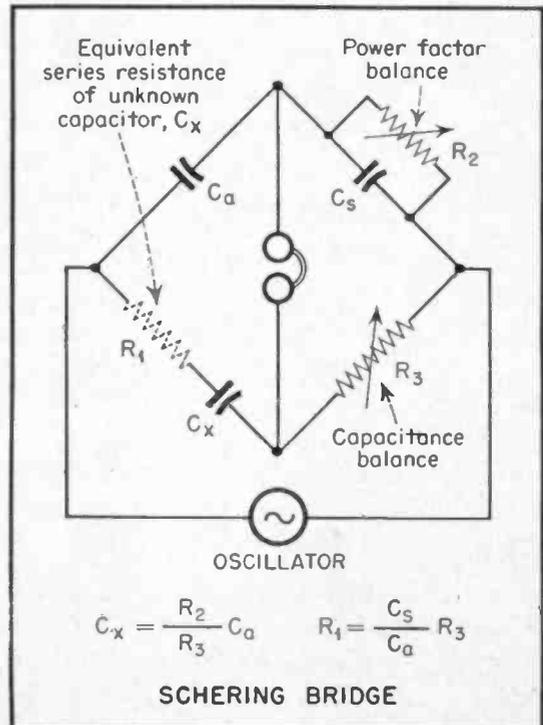

Fig. 4.

equivalent series resistance of the capacitor or inductor under test. The equivalent series resistance value subsequently is used in the computation of power factor, dissipation factor, or Q. Direct-reading bridges intended for

rapid manipulation, such as those designed for the radio service trade, show power factor values directly. Unless specified otherwise, a.c. bridge measurements ordinarily are made with an input signal of 1,000 cycles frequency.

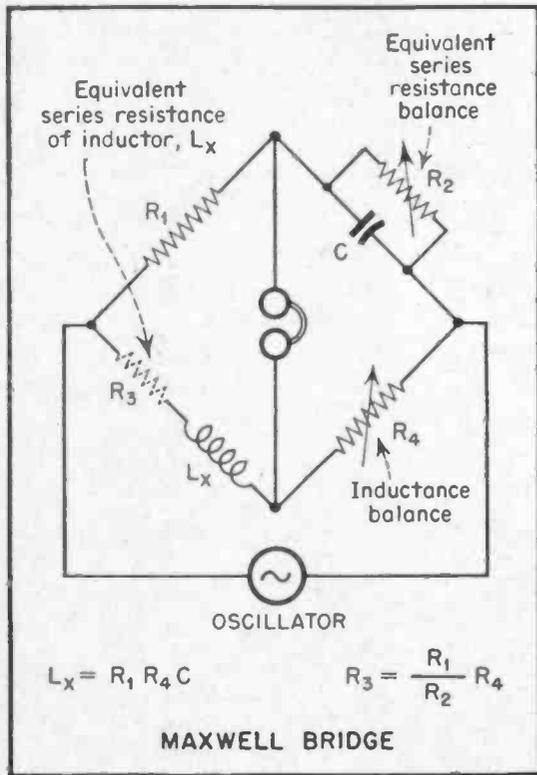

Fig. 5.

For simplicity, radio service bridges employ 60 or 120 cycles, since these frequencies are easily obtained without an oscillator.

The various circuits commonly found in a.c. bridges are described separately in the following paragraphs.

Rudimentary Capacitance Bridge

In this circuit shown in Figure 2, an unknown capacitance, C_x , is compared with a known standard capacitance C_s by means of the ratio arms R_1 and R_2 . By means of a suitable calibration, the dial of R_1 may be made direct-reading in microfarads. The bridge is balanced for capacitance first by adjusting R_1 for null. Further adjustment of R_3 sharpens the null point on R_1 . The resulting final setting of R_3 is used in calculating the

power factor of the capacitor (C_x) under test. Equations for computing capacitance and power factor are given in Figure 2.

The rudimentary bridge has the advantage that it permits determination of capacitance without calculations involving the bridge signal frequency.

Wien Bridge

The circuit of the Wien bridge is given in Figure 3. This bridge, while requiring use of a much more complicated balance equation than the preceding type, permits determination of capacitance in terms of resistance and frequency, the standards of which can be known with considerable accuracy. The Wien bridge has other important applications, other than capacitance measurement, which are discussed later in this article under the heading **Miscellaneous Bridge Applications**.

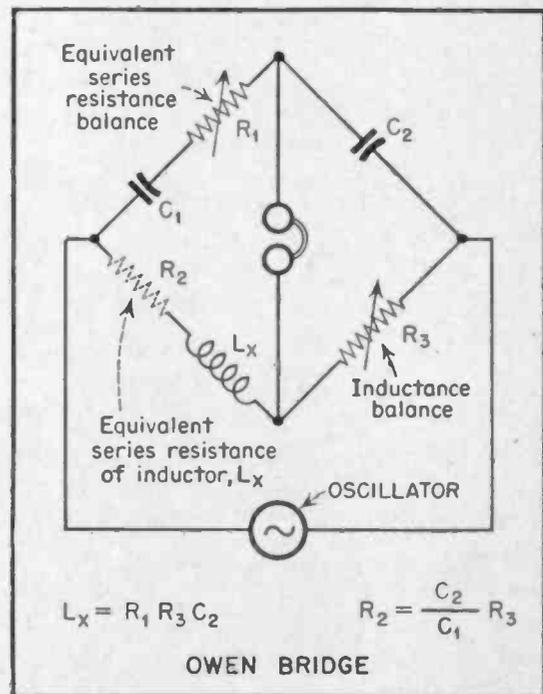

Fig. 6.

Schering Bridge

The Schering bridge (see Figure 4) is widely used in capacitor laboratories and in the testing of cable characteristics. Its balance equations are simple,

since they do not contain complex frequency terms.

The Schering bridge has the special advantage that it allows a d.c. voltage to be applied to the capacitor under test (as in the checking of electrolytic capacitors at their rated d.c. working voltages) without the danger of having direct currents circulate through, and possibly damage the bridge.

Maxwell Bridge

The Maxwell bridge (see Figure 5) is extremely convenient for inductance measurement in that it permits an unknown inductance (L_x) to be compared with a known capacitance (C). This is advantageous since capacitance standards of sufficient accuracy usually are

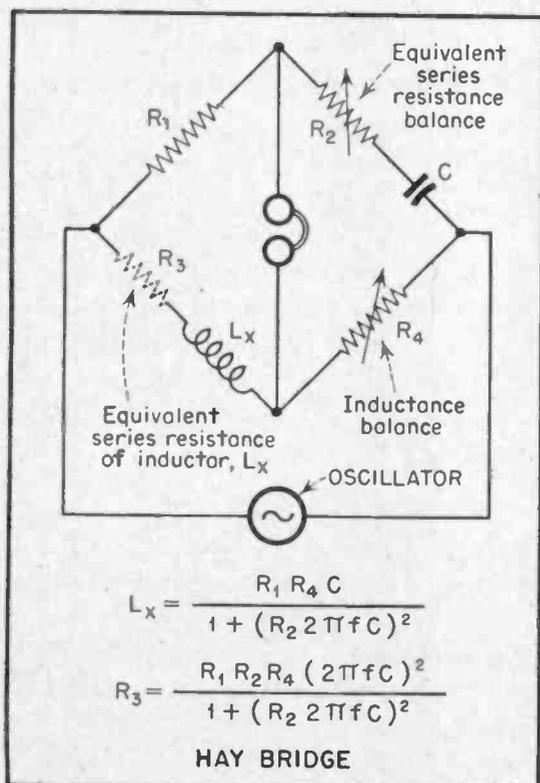

Fig. 7.

more readily available and are easier to handle than are inductance standards. The Maxwell bridge may be used to measure coils having a wide range of equivalent series resistance, or Q values. The balance equations are simple.

Owen Bridge

The Owen bridge (see Figure 6) is similar to the Maxwell in comparing an unknown inductance (L_x) to a known standard capacitance (C_2). Unlike the preceding circuit, however, the Owen bridge requires two capacitors. The simple balance equations of the Owen bridge resemble those of the Maxwell bridge.

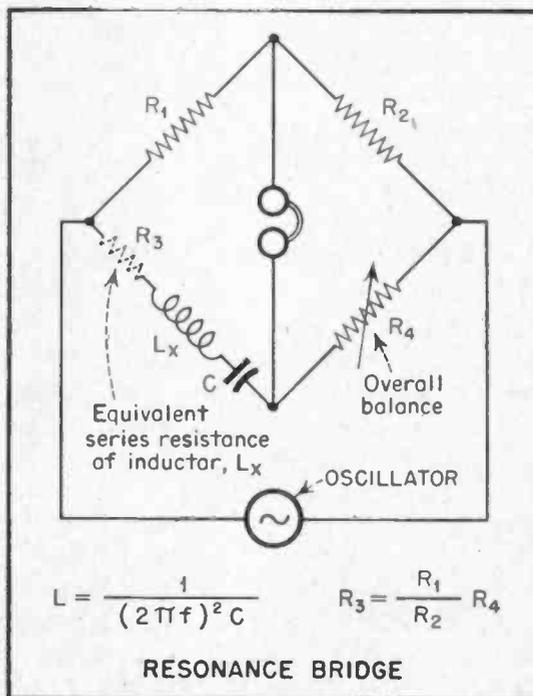

Fig. 8.

Hay Bridge

The Hay bridge (see Figure 7) generally is used only for the measurement of inductors whose Q (ratio of inductive reactance X_L to resistance R) is greater than 10. From Figure 7, it will be noted that frequency terms enter to complicate the balance equations of the Hay bridge. The Hay bridge often is arranged for the measurement of incremental inductance; that is, inductance of a coil with a direct current flowing through it.

Resonance Bridge

In the resonance bridge (see Figure 8), the unknown inductance (L_x) forms a series resonant circuit with the

capacitance C . The latter must so be chosen in value that resonance occurs at the frequency of the bridge signal voltage. At resonance, inductive and capacitive reactances, being equal in magnitude and opposite in sign, cancel. The bridge accordingly balances as if the reactive arm is pure resistance. The resonance bridge has the disadvantage that the range of the capacitor C must be rather large in order for the bridge to cover a wide inductance range at a given signal frequency. A further disadvantage is the fact that the equation for unknown inductance is not so simple as that for the Maxwell and Owen bridges.

Miscellaneous Bridge Applications

Aside from the purposes for which they originally were intended, several of the a.c. bridge circuits are useful in other applications. The most important of these are described briefly in the following paragraphs.

Frequency Measurement. Most of the bridges having balance equations containing frequency terms can be used for the measurement of frequency within the audio-frequency spectrum. This is possible because the bridge is balanced at only one frequency at a time. Consequently, a new null point must be found when the bridge signal frequency is changed to a different value. The variable arm of such a bridge accordingly may be calibrated to read directly in cycles per second. The result is a simple frequency meter of high utility.

The Wien bridge (Figure 3), because of its simplicity and the fact that it employs only resistors and capacitors, is readily adapted to use as an audio frequency meter. When R_2 is made twice R_1 and C_x made equal to C_s , and a dual ganged rheostat used for the two sections R_3 and R_4 , the null conditions for both resistance and reactance will be satisfied at all times, and the frequency applied to the bridge

may be determined (by means of the null settings of R_3 , R_4) from the equation: $f=1/(6.28 R_3 C_s)$.

Distortion Measurement. When frequency-selective bridges, such as the Wien and resonance types, are adjusted for null, any voltage appearing at their output terminals is due to harmonics of the test signal, the fundamental having been suppressed by the circuit. A measurement of this residual voltage therefore would be expected to give an indication of the total harmonic content of the bridge signal. The accuracy of this simple method is not good, however, chiefly because the bridge circuit attenuates each of the harmonics unequally.

Frequency Rejection. For the same reason (namely, that the fundamental frequency of the bridge signal is suppressed by a frequency-selective bridge circuit), bridges of the Wien and resonance types often are employed as simple band elimination filters to remove the null frequency or a reasonably narrow band about that frequency. The sharpness of response of such a network in this application is improved by employing high-Q capacitors; and in the case of the resonance bridge, a high-Q coil as well.

Selective Networks. The Wien bridge is the basis of simple, selective resistance-capacitance networks employed to set the frequency of audio and supersonic oscillators, distortion meters, simplified wave analyzers, and peaked amplifiers. These circuits are connected into a degenerative amplifier in such a way that feedback occurs on all frequencies except the null frequency of the bridge circuit. The amplifier gain accordingly is cancelled on all frequencies except the null frequency. Signals on the null frequency therefore are transmitted readily by the amplifier.

FOR SALE—"Pen-oscil-lite" portable sig. gen., \$5. T. Popel, 1223 Elm Ave., Brooklyn 30, N. Y.

FOR SALE—Radio City tube and set tester, 801M. Best offer takes it. W. A. Gustafson, 7a Parkway Cres., Milton, Mass.

FOR SALE—Riders' Manuals, vols. 1 to 9, excellent condition, \$65 postpaid. C. W. Luechau, 5119 Labadie Ave., St. Louis, 15, Mo.

WANTED—Presto recorder, give price and condition. V. Levick, Box 152, RD 1, West Albany, N. Y.

FOR SALE—Jensen Bass Reflex speaker, 14", 25 watt, model M-10, in heavy Jensen cabinet, built on power supply and line to V.C. transformer. Excellent condition, \$60 FOB. T. W. Hopkinson, Dairy Rd., Charlottesville, Va.

FOR SALE—Jackson model 637 VOM tube tester, 4" meter, push button operated, with leads and instructions, good condition, \$45; Ghirardi's Radio Physics, Modern Radio Servicing, Troubl-Shooter's Handbook, each \$4. W. T. Fields, Box 964, Midland, Texas.

FOR SALE OR SWAP—One National RBL-3 Navy rec., excellent condition, freq. range 15kc's to 600kc's, \$50. Will swap for worthwhile photo equip. James J. Priestly, 14 Marion St., Brookline 46, Mass.

FOR SALE—Hallicrafter Super Sky rider, 1938 model, \$125. John Behrens, Scribner, Nebraska.

TRADE—Radio test equip., amplifier and other radio gear for good tape recorder. E. S. Arnauld, 24 Arch St., Meriden, Conn.

SELL OR TRADE—Kalamazoo flat top guitar, natural mahogany and spruce, very good condition, with case; combination record changer and recorder; PA equip. Want anything in radio and phono equip. Community Radio Service, Aitkin, Minn.

FOR SALE—Readrite set tester and analyzer in A-1 condition, \$25. Or swap for Feiler sig. tracer, model TS-3. H. B. Chaney, Decatur, Miss.

FOR SALE—Complete 3 vol. set "Applied Practical Radio," by Coyne's Radio Electrical school. Excellent condition, \$5 postpaid. Harry Neal, Caroleen, N. C.

FOR SALE—Biophone magnetic pickup, 16", \$3; Solar elimostat, 5 pi section filters, \$2; Vibrapack, \$3; line filter for ARC 5, \$1; Dejur 1000 ohm wire wound volume control with vernier dial, \$1.50. J. E. Williams, Hornell, N. Y.

TRADE—12 watt amplifier and 12" speaker in table cabinet; also automatic record changer for Meissner radio-phono-recorder, with microphone. Wesley J. C. Wiemers, Jr., Sanatorium, Miss.

FOR SALE OR TRADE—No. 351 Triumph multitester, 280 microamp meter, 0 to 5 megohms, 0 to 600V ac, 0 to 1500V dc, 0 to 150ma, 6 to 10db, \$16.30. Want all types of test equip. and meters. G. F. Roby, 1119 Milwaukee Ave., Chicago 22, Ill.

FOR SALE—Supreme 504A tube and set tester; National NC46 and speaker, Utah 8" speaker 6-8 ohm voice coil. All in fine condition. Best cash offer. Martin Herbstman, 1806 Sterling Pl., Brooklyn 33, N. Y.

FOR SALE—Deluxe Kilowatt transmitter of commercial design, PP-250th's modulated by 810's. Bandswitching exciter, 6L6-807-100th, complete interchanneling chassis system, chassis on ball bearing wheels, price \$650 FOB. Bernard Gensler, 573 Chester St., Brooklyn 12, N. Y.

FOR SALE OR SWAP—Millen No. 90800 50 watt transmitter, complete, less power supply, new, \$25; Bud Code oscillator, \$5. Swap for "Black light" (ultra-violet light) or public address equip. Fred's Radio, 1040 Persia Ave., San Francisco 12, Calif.

FOR SALE—Army BC-454 rec., complete, A and B power supply for 110V ac, control knob adapter, extra tubes, perfect condition, tubes checked, aligned. Coverage 3-6mc 1-RF and 2-IF stages of amplification, \$10. Robert Flory, 29 Harold Ave., Princeton, N. J.

FOR SALE—DuMont scope 274; Solar analyzer CE 1-60; Vomax 900; Hickok, S.G. 288X; Riders', 6 to 15; RCP tube and set tester 802N, with roll chart; Wilcox disc recorder 6B10, 78 and 33½ r.p.m. Make offer. Jim's Radio Shop, 125 Chesnut St., Wrightsville, Pa.

WANTED—Any quantity BC-348, SCR-522, AN/APN-9, BC-312, any surplus test equip., tubes in quantity. Will pay cash or swap for other radio material. Benjamin Reber, 5742 N. Park Ave., Philadelphia 41, Pa.

SWAP—1 pair 7x50 binoculars with case, good condition. Want Riders' Manuals or a good sweep sig. gen. for FM and television work. James L. Tift, 86 Webster St., Lynbrook, N. Y.

FOR SALE—New Meissner radio-phonograph-recorder, with mike, \$95. Also a new Astatic JT-30 crystal mike for \$7.50. Paul M. Jenks, 417½ S. Gillespie St., Pampa, Texas.

FOR SALE—Reliance Bantam Electronic Speedflash. Use with synchronized shutters or open flash with any camera. Battery charger included, tax paid, \$65. ABC Sound Systems, 11 Thais Road, Averill Park, N. Y.

FOR SALE—Army field telephones, used but in perfect condition in carrying case with slings, \$18 per pair. H. J. Lewis, 548 Brompton, Chicago 13, Ill.

FOR SALE—Sam's Photo Facts, sets 1 to 8, clean and new, \$1 per set. Fred M. Merrill, Box 92, Callicoon, N. Y.

FOR SALE—Portable record player, 4 tubes, magnetic pickup, jewel sapphire needle, brown leatherette case, 6" speaker, \$20. A. B. Bertucci, 1835 Magazine St., New Orleans, La.

FOR SALE—Cabinets, speakers, chassis. Pick up at house or will ship express collect. \$25 for the lot. Or will trade for portable typewriter. H. Galanty, 287 Conklin Ave., Hillside, N. J.

SALE OR TRADE—RCA mod. 158 oscilloscope. Want Leica photo equip., 16 mm movie equip., good communication rec., binoculars, or 20,000 ohms P/V VOM. Beverly Hills Radio Co., 9138 W. Olympic Blvd., Beverly Hills, Calif.

FOR SALE—Supreme tube tester, \$15; homemade frequency gen., \$5. Henry Hoffmann, Jr., RD 4, West Chester, Pa.

SELL OR TRADE—8 mm Kodascope No. 20 projector and Universal camera, excellent condition. Also used radio sets, table models in wood cabinets. Want useful items. D. B. Hoffman, 960 E. 12th St., Brooklyn, N. Y.

WANTED—To buy or rent, FCC approved type 400kc field intensity meter, portable. The High Frequency Heating Co., 143 Glen Park, Gary, Indiana.

SELL OR SWAP—Leitz microscope, triple nose piece with oil lens; V.O.N. surf fishing reel; Hallicrafter S.40. Want HQ120 or SX28A. Theodore Nadeje, 5101 - 39th Ave., Sunnyside 4, Long Island, N. Y.

WANTED—Position in and around New York City. Have some radio and electrical experience. Electrical engineering graduate. Edward Brody, 17 Cannon Ave., Staten Island 1, N. Y.

FOR SALE—Radio parts, books, magazines, and many other items. Write for list. Paul W. Conner, Box 504, St. Maries, Idaho.

FOR SALE—2 Abbot TR-4-2 meter transrec., \$20 each; Readrite 430 tube tester, \$25. All in good condition. Richard Buxton, 371 South 7th St., Newark, N. J.

FOR SALE OR TRADE—Supreme No. 576 sig. gen., never used, cost \$67.57, complete express paid, \$63. Or Trade for Precision E200C new condition guaranteed. Frederick Schamu, Liverpool, N. Y.

FOR SALE—Electrical Contracting business, in area of 50,000 customers. Excellent reputation. Planning to retire. T. C. Rohn, Ann Arbor, Mich.

FOR SALE—Various sizes and types of power transformers, Thordarson, Stancor and UTC; plate supply transformers and filter chokes; 25, 30, 40, 60 watt Thordarson power amplifiers, with 4 high gain inputs. Write for list. Clarence F. Fanning, 223 Main St., West Concord, Mass.

WANTED—Correspondence Courses, preferable CREI or CIRE. Sections considered. State condition and price. R. Held, 1441 North Ave., Bridgeport 4, Conn.

FOR SALE OR SWAP—Jackson VOM, model 645, orig. carton, \$48; also back issues Radio Craft and Radio News, 7 cents; miniature tubes, and a 20x telescope 3½" dia. front objective. Want Precision 920 tube tester in good order. Sal Curio, 4542 Bronx Blvd., Bronx 66, N. Y.

SELL OR TRADE—100 new tubes in orig. cartons. Also 14 vibrators. Send for list. Want good communication rec. with range from 3.5 to 30mc. Leon Bolender, Chilo, Ohio.

FOR SALE—BC-348N and BC-348Q converted right; RME-84, like new; RCA marine transmitter, pair 813's final; BC-610 plate transformer and choke; 20 watt hi-fid. PA system. Best offer. Write for list. Milton V. Thornhill, 713 Woodland Court, Hattiesburg, Miss.

FOR SALE—NRI Radio-TV course, 65 lessons, 60 experiments, ckt diagrams and extra manuals, with binder. Like new, \$12 prepaid. Ray Vazquez, 20-40 149 St., Whitestone, N. Y.

WANTED—Triumph Oscilloscope, model 830. New or used in good condition. Charles E. Merchant, Lexington Park, Maryland.

FOR SALE—2 demonstrator Mail-A-Voice magnetic recorders, one with foot-pedal and new electronic erase, excellent condition. \$67.50 takes both. Also 2 Utiliphone intercoms, used \$12.50 each. Tower Hill Sound, West St., Hillsdale, Mich.

FOR SALE OR TRADE—RF 0-2.5 ammeter; DC 0-200 milliammeter; DC 0-25 milliammeter; AC 0-150 voltmeter, (all 3"); Astatic B-16 transcription pickup; 1 FM pilot tuner, like new. Swap for tubes or what have you? John Sager, 6 Pine St., Little Falls, N. Y.

FOR SALE—6 No. 6309 RCA 5 watt speaker driver units; 2 No. 6304 RCA 8 watt driver units; 8 indoor speaker horns for same; 4 No. 6234 RCA 7" PM speakers in wall cabinets. R. W. Dambach, 400 Elmwood Ave., Buffalo 9, N. Y.

SALE OR TRADE—50W transmitter and power supply, \$20; oscilloscopes, 2" \$15, 3" \$30, 5" \$45; power supply, 250V 70MA 6.3V, \$5; modulation transformers 25W \$1, 50W \$2, 100W \$4. A. Svirnic, 7202 S. Fairfield, Chicago 29, Ill.

SWAP—Howard model 435-A communication rec. and new S & W. 38 police revolver, 6" barrel. Want Hickok 156 traceometer, or 505 scope, or 288X generator. Myers Radio Shop, Glenalum, W. Va.

SELL OR TRADE—522 receiver and transmitter with power supplies converted for two meters. Want good film pack camera. Clarence B. Berg, 4240 N. Clarendon, Chicago 13, Ill.

FOR SALE—2 Pioneer G.E. motors, 32V dc inputs, outputs 110V 1.82 amp ac and 210V .045 amp dc. Best offer. George L. Blackmur, 4441 West Ave., 42, Los Angeles 41, Calif.

FOR SALE—NRI Course; Modern Radio Servicing and Troubleshooters Handbook by Ghirardi; Supreme Diagrams, 5 vols, 1926-1942. All for \$25, or what have you? Frank Wurst, 242 Dayton Ave., Clifton, N. J.

SELL OR SWAP—New Hallicrafter model S-40A, \$85. Or swap for tube tester or radio course. Dunn Electric Hardware, Lake Placid, N. Y.

WANTED—Neon oscilloscope tube for the Neobeam revolving mirror oscilloscope. Will pay double the original price for used tube in operating condition. R. I. Dinlocker, U.S. Gauge, Sellersville, Pa.

FOR SALE—Motors from prop-pitch assemblies, \$7.50; Lay. 25W amplifiers, \$25; sig. gen. SC1-198A, 7 to 15mc., 8x8x10", 110V ac, \$19; No. 4 Gernsback Service Manual, \$3; Jap Trans-rec., 7mc., mike, phones, \$9. A. Livingstone, 12-02 Ellis Ave., Fair Lawn, N. J.

FOR SALE OR TRADE—1938 Ford Philco, model F-1540 radio, COD \$25. Or trade for good revolver pistol in perfect condition. Wade H. Miller, Eastaboga, Ala.

FOR SALE—Model 912 Precision tube checker, \$25; Model 260 Simpson volt-ohm meter, \$20. Excellent condition. A. D. Dellis, Box 144, Olton, Texas.

WANTED—Used television sets. State make and models. Also Riders' Manuals vol. 11 and 13. Charles Sovatsky, 443 De Kalb Avenue, Brooklyn 5, N. Y.

FOR SALE—Radio equip., tubes and books. Write for list. B. Cohen, 1461 Hoe Ave., Bronx 60, N. Y.

SALE OR TRADE—20 watt portable mobile sound system, 2 speakers, new mike and crystal pickup, good condition. Want late model handguns, Smith or Colt, in A-1 shape; good high power binoculars, good camera with flash attachment. William T. Neat, Box 26, Winchester, Illinois.

FOR SALE—RCA 5TP4 projection tube, slightly used, \$30. Also 110V 60C power transformer, 435V, 400MA. H. Bergh, 1583 E. 96th St., Brooklyn 12, N. Y.

FOR SALE—Webster wire recorder, model 80, with extras, \$100; Wilcox Gay professional model disc recorder, \$150. Both in perfect condition. E. Kenda, 82 New Jersey Avenue, Brooklyn 7, N. Y.

WANTED—Used Sprayberry Radio Course. Must be N D with answers. J. F. Poore, Box 192 Ouray, Colo.

WANTED—NRI professional sig. tracer, model 33. Pay cash or trade RCP multitester 447, Triplett model 650-C output meter, B-45 sig. gen., TS-1 sig. tracer. All in good condition. Obern Vanover, Wise, Va.

FOR SALE AND WANTED—Converter, 110V dc to 110V ac, 160 watts rating, good condition, \$35. Want used copy Delehanty Radio Servicing and Repairing Monograph. Otto Strasser, 522 E. 85th St., New York 28, N. Y.

SELL OR SWAP—McMurdo-Silver model 906, like new; AN/APT-5 transmitter, new. Want Meissner signal shifter or other VFO, receiver, crystal mike, or what have you? Albert H. Kaiser, 172 Third Avenue, New York City 3, N. Y.

FOR SALE—Triplett VOM, model 1200 A-R, twin movement, 5KV ac dc max. voltage ranges, excellent condition. John Jordan, 611 Mt. Prospect, Newark, N. J.

SWAP—National HRO-W, all coils 50kc to 30mc, 110/220V ac and 6V dc power supplies, speaker. Want Hickok 156 A Traceometer, DuMont 224 scope, good V.T.M., or other test equip. of equal value. Make offer. Delta Electronic Equip. Co., PO Box 476, New Orleans, La.

SELL OR TRADE—Superior model No. 650 sig. gen., new condition. Or trade for Riders' vols. 10 to 14 in good condition. Also have Sam's Photofacts, set 1 to 8 at \$1 per set. F. M. Merrill, Callicoon, N. Y.

SELL OR SWAP—Radio magazines, back numbers. Radio books. Write for list. Murray Barlowe, 880 59th St., Brooklyn 20, N. Y.

TRADE—Television transmitter for SX-42 rec. or equiv. Lt. F. A. Thompson, 1316 West Division, Grand Island, Nebraska.

FOR SALE—Radio Service Diagrams, 15 cents each; 723 A/B tubes, \$3 each; 1633 type tubes, 15 cents each; CA-11 sig. tracer, \$10; Supreme tube tester, model 450, \$25. Madionics, 400 Ocean Ave., Jersey City, N. J.

FOR SALE—Riders' Manuals, No. 2, and Nos. 4 to 13 inclusive, excellent condition, \$80 FOB. Thorsness Electric Shop, Worthington, Minn.

WANTED—Two 6Y7G tubes. Pay list or better. R. E. Weisinger, 1811 So. Walnut St., San Gabriel, Calif.

FOR SALE—Bud VFO-21, never used, complete with coils from 80 to 10 meters. Best cash offer. Norman Wehrli, Box 1247, Kilgore, Texas.

SELL OR SWAP—"Atom" miniature gas model motor, class "A," used very little, complete with coil, condenser and booster battery. Want small portable radio or \$12. Dan Wallace, R 3, Box 236, Washington, N. C.

FOR SALE—Silver model 906 AM-FM sig. gen.; RCP model 663A electronic multimeter. Both in good condition with instructions and leads. What am I offered? Walter V. Jandro, Bldg. 58, Apt. 218, Success Park, Bridgeport 8, Conn.

FOR SALE—Liqua-Lens for RCA 721, Philco 1000, and 1001 television sets. Lucite, oil filled, enlarges 52 to 120 sq. inches. Distortionless at 80° angle, excellent condition. Best offer over \$15. Ralph Alner, 275 - 56 St., Brooklyn 20, N. Y.

WANTED—Feb. '46 CQ; instruction manual for SCR-274, BC-348, Navy LM-7 freq. meter, VHF ARC-5 and low freq. ARC-5. Also want Radar Electronics Fundamentals, TM-11-466, and Radio Operators' Information File AFF form 24R. State price and condition. Milton Kalashian, 2 Congress St., Newburyport, Mass.

FOR SALE—Riders', 15 \$15, 16 \$7; RCA 155A scope, perfect condition, \$65 prepaid; Radio City Electronic multitester, model 663A, perfect, with orig. instruction booklet, \$40 prepaid. Horace D. Westbrook, Box 281, Griffin, Georgia.

FOR SALE—Solar CE Exam-eter, new, instructions, test leads, perfect; Sprax 905 sig. tracer, perfect, test leads, instructions, schematic; Triumph 130 sig. gen. good condition, 5" dial, 3.2mc to 3200kc. Best offer takes. Radio Service, Box 73, Versailles, Mo.

FOR SALE OR TRADE—New radio tubes, up to 80% discount or will exchange for others needed. Have approx. 100 assorted used tubes. Make offer for lot or those you need. John Andrew, 740 Maple Street, Bethlehem, Pa.

FOR SALE OR TRADE—Dual turntable recorder with 78 and 33 r.p.m. G.I. units. Includes preamplifier, suppressor, and 10 watt hi-fi amplifier in one portable case. Separate 12" speaker. \$225 FOB or will trade for Contax or Speed Graphic. John Stinerock, 2312 Forest Park, Fort Wayne, Ind.

FOR SALE—Riders' Manuals, vols. 1 and 4 to 13 inclusive. B. Shulman, 88 Nye Pk., Rochester 5, N. Y.

FOR SALE—Power transformers for Philco, G.E. and RCA radios at pre-war prices. Write stating model and part number required. Berman Distributing Co., 1188 Broadway, Brooklyn 21, N. Y.

FOR SALE—"Kathograph II" German 2½" test scope, 110-245 volts, 40-100 cycles, in operating condition, \$25. D. L. Roberts, 609 E. Mo. St., Kirksville, Mo.

FOR SALE OR TRADE—Riders' vol. 12, new condition, \$12.50. Trade for surplus or ham equip. M. E. Ryland, 4200 Stockton St., Apt. 2F, Univ. of Calif., Vets' Village, Richmond, Calif.

TRADE—First 7 complete vols. Riders' for Meissner FM tuner 8C or equal. A. E. Macatee, 2515 Cedar St., Philadelphia 25, Pa.

WANTED—(Kine Exacta) camera. Have Hickoks 203, 305, 534; Riders 2 to 8; guns; 8mm movie; and cash. E. Sujak, 5321 W-30 Place, Cicero 50, Ill.

another C-D first!

"vikane" impregnated paper tubulars for high temperature applications type GT "grey tiger"

Continuing lab and field tests prove GT's unusual stamina and performance to withstand severe temperature conditions encountered in electrical and electronic applications. Write for Catalog 200A. Cornell-Dubilier Electric Corporation, South Plainfield, New Jersey. Other plants in New Bedford, Worcester, and Brookline, Mass., and Providence, R. I.

Consult your local Classified Telephone Directory, for your nearest authorized C-D distributor.

FEATURES OF HIGH TEMPERATURE "GREY TIGERS"

- "Vikane" impregnated capacitor element. Processed with "Vikane" a new development of the Cornell-Dubilier laboratories. Assures extra long life at high operating temperatures.
- End fill—Specially compounded for high temperature operation.
- New high temperature moisture seal and tube impregnated to withstand temperatures to 100°C.
- Excellent capacity stability over the high and low temperature range.
- High insulation resistance—at 77°F. above 10,000 megohms per unit or 2,000 megohms per mfd.
- Low power factor—averages 0.35% at 1,000 cycles.
- Available in all commercial capacity and voltage ratings.
- One type serves for all high or low temperature and humidity applications.
