Thelma and Harold Laws  
September 4, 1936

Helen and Ed Lowary  
July 11, 1953

Carl and Dee Gray  
February 14, 1958

Rosie and Glenn Foster  
October 21, 1955

Muriel and John Harrison  
June 2, 1956

February 14 is Valentine's Day -- a time to speak of romance -- and speaking of romance -- Dan Cupid has been shooting his little arrows around the office and plant for years, and Gates couples have been marching down the aisle at a steady pace. Cupid's first target at Gates was Harold Laws and Thelma Otto, secretary to Mr. Henry C. Gates. You guessed it, Thelma became Mrs. Laws, and Harold eventually got his mind on his job. He is a member of our technician staff. The couples shown here, with their wedding dates, met, or their romance blossomed, while they were both working at Gates. If anyone was missed, please notify the personnel department immediately so everyone can be included. Who knows how many letters had to be re-typed, joints re-soldered, etc., because of Dan Cupid's darts! That is a problem of industry everywhere -- one of their nicest problems -- and one that is not likely to ever be solved. Wonder who will be next in our company?

## SCHOLARSHIP AND AID-TO-EDUCATION PROGRAMS:

We are happy to include with this issue of "The Intercom" a revised copy of the Harris-Intertype "Scholarship and Aid-to-Education Programs" booklet. It reviews some of the company's activities in encouraging and supporting higher education.

Gates and Harris-Intertype recognizes that continued progress in education is essential for personal and company growth, as well as important in maintaining our American way of life and position of world leadership.

The programs explained in the folder should be of interest to you and your family. They include scholarship opportunities for your children and also educational activities in which you can participate personally.

Many of our people are acquainted with Gary Vollbracht who is a student under the co-op program outlined in the booklet. Gary won the competitive Harris-Intertype scholarship in Mechanical Engineering at the University of Cincinnati two years ago and for the past year has been participating in the co-op plan.

If you have any questions about this material, please contact the personnel department.

YOU ARE VITAL TO GATXS -- GATXS IS VITAL TO QUINCY AND AMERICA!

Even though my typewriter is an old model, it works quite well except for one of the keys. I wish many times that it worked perfectly. It is true that there are forty-six keys that function well enough, and just one key not working makes the difference.

Sometimes it seems to me that our own organization is not unlike my typewriter -- that not all of the people are working properly.

You may say to yourself, "Well, I am only one person, I won't make or break the organization. But it does make a difference because a successful organization, to be effective, requires the active participation of every member."

So the next time you think you are only one person, and that your efforts are not needed, remember my typewriter and say to yourself, "I am a key person in our program, and am needed very much." -- Arthur unknown.

ROLLER SKATING PARTIES -- Tuesday, February 13, 7:30 - 10 p.m. -- Scottie's Roller Rink -- a skating party for all Gates employees, their husbands and wives and children 12 years or older.

SATURDAY, MARCH 17 -- 9:30 - 11:30 a.m. -- Scottie's Roller Rink -- a skating party for children, 11 years and younger, of Gates employees. The children's party will be closely supervised -- all safety rules will be strictly observed. Special tickets are required for free admission and clamp-on skates for both parties. The ticket also entitles each youngster to free refreshments. See your supervisor immediately if you do not have your tickets. LET'S GO SKATING!

Ask the receptionist to direct you to the Credit Union office if you do not know where it is located.

### LEARN SAFETY TO STAY SAFE

You are helping yourself to stay safe:

- when you have learned the hazards of your job and those in your pathways through the plant.
- when you have learned the safe way to do your job and remain constantly alert to avoid known hazards.
- when you know and use available protective devices and equipment -- never forget to observe and practice safe methods to do your job.
