STUDIO MICROPHONES

Model "333" STUDIO UNI-RON UNI-DIRECTIONAL RIBBON MICROPHONE *

This quality microphone is designed for discriminating users with the most exacting professional requirements. The rugged "333" is highly recommended for motion-picture studios, TV studios, radio stations, professional recording, and all other uses where quality requirements are of the highest. The "333" is super-cardioid, uni-directional—reduces the pickup of random noise energy by 73%—prevents the pickup of moving props and scuffling feet. The "333" Studio features the patented, world-famous Shure "Uniphase" acoustical network system—a field-proved standard of quality.

Model "525" STUDIO SLENDYNE OMNI-DIRECTIONAL DYNAMIC MICROPHONE *

The Studio "525" is an exceptionally fine, slender microphone of broadcast quality. It is custom-built to provide high fidelity reproduction of voice and music. The microphone has complete versatility and reliability for indoor and outdoor use and may be used: (1) on a conventional floor or desk stand, (2) in the hand, and (3) with the lavalier cord and belt clip assembly. The use of high efficiency magnetic materials and specially designed magnetic circuits has made it possible to develop this small microphone and still achieve maximum operating efficiency. The microphone is ruggedly built to withstand hard usage and is unaffected by temperature and humidity variations.

Model "300" STUDIO GRADIENT¹ BI-DIRECTIONAL RIBBON MICROPHONE *

This professional quality multi-impedance microphone is widely used for tape recording, broadcast and highest quality Public Address use. The "300" has a specially designed anti-"PFF" filter screen—which eliminates pickup of distracting breath noises. It provides sound pickup at the front and rear of the microphone, but greatly reduces pickup at the sides. One of the outstanding features of the "300" is the fact that the microphone can be placed at a 73% greater distance from the performer than is possible with omni-directional microphones. It is ideal for highest-quality reproduction, especially wherever multi-person pickup is desired, yet background noise must be reduced.

Models 55S, 55SW AND 556S

UNI-DIRECTIONAL DYNAMIC MICROPHONES *

For many years the Unidynes have been the most widely used microphones throughout the world. They are specified by leading sound engineers and requested by famed celebrities—for those important events where the faithfulness of sound reproduction is most critical. And now, "The Best is Even Better"—for the famed Unidynes are now 41% higher in output level! This means that the Unidynes are ideal for use with low-gain tape recorders and low-gain P. A. systems—in addition to their famed use with highest quality sound systems.

Models 55S and 55SW are highly recommended for fine quality public address, theater-stage sound systems, recording and remote broadcasting. They are also the field-proved standards for fixed-station use in the police, fire, transportation, forestry and commercial services.

Model 556S is specially designed to meet the high technical requirements of broadcast and television studios. It will endure the heavy punishment of daily use and abuse—will operate at optimum efficiency while conventional microphones are "out of service," due to their frequent need for maintenance and repair. It is held within close tolerances in frequency response and directivity. The Broadcast Unidyne is ideal for high quality station and remote broadcasting, public-address, theater-stage sound systems and recording applications. The 556S is provided with a vibration-isolation unit of live rubber construction. This specially designed shock-mount completely eliminates metal-to-metal contact between microphone and stand.

*Available in matched sets for stereo recording at no additional cost. (Matched to plus or minus 1 db in level and $1\frac{1}{2}$ db in frequency response.)

SHURE UNIPLEX

MODEL 245

The lowest priced probe-type microphone with *truly* unidirectional characteristics . . . provides exceptional performance at moderate cost.

The Shure "Uniplex" employs the same "Uniphase" principle found in higher priced Shure unidirectional microphones. Its wide, useful pickup angle at the front and effective elimination of pickup at the rear provide the ideal solution to feedback problems in low-cost P.A. systems.

The 245 is a natural for home recording, particularly in stereo; excellent for base-station usage, paging, and language laboratories. The 245 is lightweight and versatile, comes complete with stand adapter to permit instant conversion from stand to hand-held use and back again. Reliable, rugged ceramic cartridge performs at temperatures from -40° to $+170^{\circ}\text{F}$. Available in four models, all with metal, die-cast case.

Figure A

The frequency response of the Model 245 series is from 50 to 7000 cycles per second. (See Figure A.) The microphone response is symmetrical about the axis with the response down 6 db at the sides, 15 db or more at the rear. (See Figure B.) This reduced rear response feature permits more volume without feedback which simplifies microphone and speaker placement and greatly improves systems using conventional microphones.
