                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Image: Second                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Image: Description         Operation         Operating and the second se    JUST WHEN IT LOOKED LIKE ALL THE HOOPLA ABOUT OUR LOW COST HIGH CURRENT REGULATED PS-14 POWER SUPPLY KIT WAS FADING AWAY AND OUR COMPETITORS COULD BREATHE A LITTLE EASIER, WE GO AND DO SOMETHING LIKE THIS! **PS-15 POWER SUPPLY KIT** 

## **12V 30 AMPS**

WE APOLOG

#### SPECS:

CONTINUOUS CURRENT REGULATION RIPPLE CURRENT LIMIT **VOLTAGE OUTPUT** SAFETY FEATURES

PRICE DOES NOT INCLUDE CHASSIS, METERS OR JACKS

30 AMPS 200 MV LOAD AND LINE LESS THAN 300MV @ 30A ADJUSTABLE FOLDBACK TYPE ADJUSTABLE 11.5 TO 14 VDC SHORT CIRCUIT PROTECTION; THERMAL SHUTDOWN; RF BY-PASSED

- YOU GET
- HUGE 40 AMP TRANSFORMER
- 3 LARGE HEATSINKS
- DRILLED & PLATED PC BOARD
- LARGE COMPUTER GRADE CAP
- ALL ELECTRONIC PARTS
- FUSES, FUSEHOLDERS, LINE CORD WIRE, MICA INSULATORS
- COMPLETE STEP-BY-STEP INSTRUCTIONS
- COMPLETE WARRANTY AND REPAIR SERVICE
- . WE PAY SHIPPING!"

**PS-14** Power Supply Kit. **Regulator Card &** Same features as above but 20 AMP max \*Canadian Orders add \$10.00 for current. SHIPPING PAID. 45.00 Components: 14.95 Shipping and Insurance. ELECTRONICS

BOX 4181 GB WOODSIDE, CA 94062 Tel.(415) 328-1500

#### **MOTOROLA 4 MHZ XTAL OSCIL-**LATOR 14 pin dip pkg., 5 VDC in, 4 MHz out. TTL compatible. \$5.95 ea.

**NATIONAL SEMICONDUCTOR - 6** DIGIT CLOCK MODULE A 12-hr. clock featuring alarm and snooze alarm function. Comes complete with every-thing. All you add is a power cord and switches. Each module utilizes discreet components and is ready for you to mount in your enclosure. Display is 6 each seven segments, .33 inches high, clockchip is MM5375. Can easily be mounted in either of our instrument clock case kits. \$14.95.

#### CALCULATOR GUTS

Experimenter's delight. Each keyboard includes a monolithic calculator chip and display. These are rejects. It might be something simple to repair or it could be very nasty. At this price, who cares! 9 volt. \$1.50 ea. 3/\$3.00.

**INSTRUMENT CLOCK CASE KIT** A real jewel for those small projects. Hinged top door allows you to hide your control area. O.D.  $4\,\%2^{\prime\prime}$  x  $4^{\prime\prime}$  x  $1\,\%4^{\prime\prime}$ . \$1.99 each.

### **DB-25 FEMALE CONNECTOR**

A unique assembly originally adapting the RS232 Type Connector to flat cable. \$1.50 each or 2/\$2.50.

INSTRUMENT/CLOCK CASE KIT Perfect for your opto projects. Solid aluminum construction with real walnut sides. O.D. 5-3/8" by 5-3/8" by 2". \$6.95 ea.

| EDGE CARD CONNECTOR<br>Clinch Jones 10/20 Pins156 Spacing<br>PC Mount85 Burndy 22/44 Pins, .156<br>spacing PC Mount, \$1.40 each. |

## Radio Bookshop

## =license study guides & tapes=

•NOVICE STUDY GUIDE—SG7357—Here is a completely new study guide and reference book for the potential ham. This is not a question/answer memorization course. Electronic and radio fundamentals are presented and explained in an easy-to-understand fashion, preparing the beginner for the Novice exam. Includes the latest FCC amateur regulations, as well as application forms. Easily the best path into the exciting world of ham radio! \$4.95.\*

• GENERAL CLASS STUDY GUIDE—SG7358—A complete theory course for the prospective General or Technician. This reference explains transistor, amplifier, and general radio theory, while preparing the Novice for the "big" ticket. After getting your ticket, you'll use this guide again and again as an electronic reference source. Not a question/answer guide that becomes dated when the FCC updates the amateur exams. \$5.95.\*

• ADVANCED CLASS STUDY GUIDE—SG1081—Ready to upgrade your license? To prevent retaking the FCC theory exam, you need the 73 Advanced theory guide. SSB, antenna theory, transmitters, and electronics measuring techniques are covered in detail in this easy-to-follow study guide. Special modes and techniques, such as RTTY, are also treated. An engineering degree is not necessary to master Advanced theory—try this book before visiting the examiner's office! \$5.95.\*

• EXTRA CLASS LICENSE STUDY GUIDE—SG1080—Before going for your 1 × 2 call, it pays to be a master of the Extra class electronic theory. This study guide is the logical extension of the 73 theory course. All the theory necessary to pass the exam is presented. Antennas, transmission lines, swr are discussed, as well as noise, propagation, and specialized communication techniques. This book is not a classroom lecture or memorization guide, but rather a logical presentation of the material that must be understood before attempting the Extra exam. Save yourself a return trip to the FCC and try the 73 method first! \$5.95.\*

## NOVICE THEORY TAPES Startling Learning Breakthrough

• NOVICE THEORY TAPES—CT7300—Startling Learning Breakthrough. You'll be astounded at how really simple the theory is when you hear it explained on these tapes. Three tapes of theory and one of questions and answers from the latest Novice exams give you the edge you need to breeze through your exam. 73 is interested in helping get more amateurs, so we're giving you the complete set of our tapes for the incredibly low price of ONLY \$15.95.\*

Scientists have proven that you learn faster by listening than by reading because you can play a cassette tape over and over in your spare time—even while you're driving! You get more and more info each time you hear it.

You can't progress without solid fundamentals. These four hour-long tapes give you all the basics you'll need to pass the Novice exam easily. You'll have an understanding of the basics which will be invaluable to you for the rest of your life! Can you afford to take your Novice exam without first listening to these tapes? Set of 4—\$15.95.\*

## SSTV

•SLOW SCAN TELEVISION TAPE—CT7350—Prize-winning programs from the 73 SSTV contest. Excellent for Demo! \$5.95.\*

Any Four Tapes For \$15.95!\* \$4.95 Each!\*

#### "GENESIS"

5 WPM-CT7305-This is the beginning tape for people who do not know the code at all. It takes them through the 26 letters, 10 numbers and necessary punctuation, complete with practice every step of the way using the newest biliz teaching techniques. It is almost miraculous! In one hour many people-including kids of ten -are able to master the code. The ease of learning gives confidence to beginners who might otherwise drop out.

### "THE STICKLER"

6+ WPM—CT7306—This is the practice tape for the Novice and Technician licenses. It is made up of one solid hour of

## **73 CODE SYSTEM TAPES**

code, sent at the official FCC standard (no other tape we've heard uses these standards, so many people flunk the code when they are suddenly—under pressure —faced with characters sent at 13 wpm and spaced for 5 wpm). This tape is not memorizable, unlike the zany 5 wpm tape, since the code groups are entirely random characters sent in groups of five.

#### "THE CANADIAN"

10 + WPM—CT7310—73 hasn't forgotten the Canadian hams—our 10 WPM tape prepares you to breeze through your country's licensing exams. Like the other code groups, the tape is not memorizable and, once mastered, provides a margin of safety in the actual text situation.

### "BACK BREAKER"

13 + WPM - CT7313 - Code groups again, at a brisk 13 per so you will be at ease when you sit down in front of the steely-eyed government Inspector and he starts sending you plain language at only 13 per. You need this extra margin to overcome the panic which is universal in the test situations. When you've spent your money and time to take the test, you'll thank heavens you had this back-breaking tape.

#### "COURAGEOUS"

20 + WPM—CT7320—Code is what gets you when you go for the Extra class license. It is so embarrassing to panic out just because you didn't prepare yourself with this tape. Though this is only one word faster, the code groups are so difficuit that you'll almost fall asleep copying the FCC stuff by comparison. Users report that they can't believe how easy 20 per really is with this fantastic one hour tape.

#### "OUTRAGEOUS"

25 + WPM—CT7325—This is the tape for that small group of overachieving hams who wouldn't be content to simply satisfy the code requirements of the Extra Class license. It's the toughest tape we've got and we keep a permanent file of hams who have mastered it. Let us know when you're up to speed and we'll inscribe your name in 73's CW "Hall of Fame."

Use the order card in the back of this magazine or itemize your order on a separate piece of paper and mail to: 73 Radio Bookshop • Peterborough NH 03458. ## -73 TECHNICAL LIBRARY=

• BEHIND THE DIAL—BK7307—By Bob Grove. Get more fun out of shortwave listening with this interesting guide to receivers, antennas, frequencies and interference. \$4.95.\*

•THE CHALLENGE OF 160—BK7309—is the newest book in the 73 technical library, dedicated to 160 meter operating. Si Dunn provides all necessary information to get started on this unique band. The all-Important antenna and ground systems are described in detail. The introduction contains interesting photos of Stew Perry's (the King of 160) shack. This reference is a must for new and experienced "Top Band" operators. Price: \$4.95.\* •IC OP-AMP COOKBOOK—BK1028—by Walter G. Jung. Covers

• IC OP-AMP COOKBOOK—BK1028—by Walter G. Jung. Covers not only the basic theory of the IC op amp in great detail, but also includes over 250 practical circuit applications, liberally illustrated. 592 pages,  $5\frac{1}{2} \times 8\frac{1}{2}$ , softbound. \$12.95.\*

• THE POWER SUPPLY HANDBOOK — BK7305—Need a power supply for a gadget you're building? In the POWER SUPPLY HAND-BOOK there are dozens ready-to-build, plus detailed steps for designing your own. There are circuits and parts lists for all kinds of supplies, ranging from simple DC types to highly stable regulated versions. If you need a circuit to convert a DC voltage to a higher or lower voltage, turn DC into AC, or AC to DC—then this is the book you need. With more than 400 pages, you should be able to find just the circuit you need. Without a doubt one of the best power supply source books available, compiled by the editors of 73. \$7.95.\*

•SSB...THE MISUNDERSTOOD MODE—BK7351—by James B. Wilson. Single Sideband Transmission... thousands of us use it every day, yet it remains one of the least understood facets of amateur radio. J. B. Wilson presents several methods of sideband generation, amply illustrated with charts and schematics, which will enable the ambitious reader to construct his own sideband generator. A must for the technically-serious ham. \$5.50.\*

•SSTV HANDBOOK—BK7354(hardcover), BK7355(softcover)— This excellent book tells all about it, from its history and basics to the present state-of-the-art techniques. Contains chapters on circuits, monitors, cameras, color SSTV, test equipment and much more. Hardbound \$7.00, softbound \$5.00.\*

•WEATHER SATELLITE HANDBOOK—BK7370—Simple equipment and methods for getting good pictures from the weather satellite. Antennas, receivers, monitors, facsimile you can build, tracking, automatic control (you don't even have to be home). Dr. Taggart WB8DQT,\$4.95.\*

• 73 DIPOLE AND LONG-WIRE ANTENNAS—BK1016—by Edward M. Noll W3FQJ. This is the first collection of virtually every type of wire antenna used by amateurs. Includes dimensions, configurations, and detailed construction data for 73 different antenna types. Appendices describe the construction of noise bridges, line tuners, and data on measuring resonant frequency, velocity factor, and swr. \$5.50.\*

●INTRODUCTION TO RTTY—BK7380—A beginner's guide to radioteletype including teletypewriter fundamentals, signals, distortion and RTTY art. You can be a RTTY artist! A 73 publication. \$2.00.\*

•THE NEW RTTY HANDBOOK—BK7347—is a new edition and the only up-to-date RTTY book available. The state of the art has been changing radically and has made all previous RTTY books obsolete. It has the latest circuits, great for the newcomer and expert alike. \$5.95.\*

•PROPAGATION WIZARD'S HANDBOOK—BK7302—by J. H. Nelson. When sunspots riddled the worldwide communications networks of the 1940's, John Henry Nelson looked to the planets for an answer. The result was a theory of propagation forecasting based upon interplanetary alignment that made the author the most reliable forecaster in America today. The book provides an enlightened look at communications past, present, and future, as well as teaching the art of propagation forecasting. \$6.95.\*

• THE GIANT BOOK OF AMATEUR RADIO ANTENNAS—BK7304 —With the GIANT Book of Amateur Radio Antennas by your side, antennas will become the least of your worries. Over 450 pages of design ideas, theory and reference data make this book live up to its title. The 7 chapters cover everything from basic antenna theory through designs for DIY accessories, as well as dozens of antenna designs. Whether planning to build or buy, design or admire, test or enjoy a ham antenna—this is the book for you. From the editors of 73; published by Tab Books. \$12.95 Hardback.\*

•73 VERTICAL, BEAM AND TRIANGLE ANTENNAS—BK1069 by Edward M. Noll W3FQJ. Describes 73 different antennas for amateurs. Each design is the result of the author's own experiments covering the construction of noise bridges and antenna line tuners, as well as methods for measuring resonant frequency, velocity factor, and standing-wave ratios. 160 pages. \$5.50.\*

• VHF ANTENNA HANDBOOK—BK7368—The NEW VHF Antenna Handbook details the theory, design and construction of hundreds of different VHF and UHF antennas... A practical book written for the average amateur who takes joy in building, not full of complex formulas for the design engineer. Packed with fabulous antenna projects you can build. \$4.95.\*

Use the order card in the back of this magazine or itemize your order on a separate piece of paper and mail to: 73 Radio Bookshop ● Peterborough NH 03458. Be sure to include check or detailed credit card information. •Add \$1.00 handling charge. Note: Prices subject to change on books not published by 73 Magazine.

## **TEST EQUIPMENT**

•RF AND DIGITAL TEST EQUIPMENT YOU CAN BUILD—BK1044—Rf burst, function, square wave generators, varlable length pulse generators—100 kHz marker, i-f and rf sweep generators, audio osc, af/rf slgnal injector, 146 MHz synthesizer, digital readouts for counters, several counters, prescaler, microwave meter, etc. 252 pages. \$5.95.\*

•VOL. I COMPONENT TESTERS—LB7359—... how to build transistor testers (8), diode testers (3), IC testers (3), voltmeters and VTVMs (9), ohmmeters (8 different kinds), inductance (3), capacity (9), Q measurement, crystal checking (6), temperature (2), aural meters for the blind (3) and all sorts of miscellaneous data on meters ... using them, making them more versatile, making standards. Invaluable book. \$4.95.\*

• VOL. II AUDIO FREQUENCY TESTERS—LB7360—...jam packed with all kinds of audio frequency test equipment. If you're into SSB, RTTY, SSTV, etc., this book is a must for you...a good book for hi-fi addicts and experimenters, too! \$4.95.\*

• VOL. III RADIO FREQUENCY TESTERS—LB7361—Radio frequency waves, the common denominator of Amateur Radio. Such items as SWR, antenna impedance, line impedance, rf output and field strength; detailed instructions on testing these items includes sections on signal generators, crystal calibrators, grid dip oscillators, noise generators, dummy loads and much more. \$4.95.\*

• VOL. IV IC TEST EQUIPMENT—LB7362—Become a troubleshooting wizard! In this fourth volume of the 73 TEST EQUIP-MENT LIBRARY are 42 home construction projects for building test equipment to work with your ham station and in servicing digital equipment. Plus a cumulative index for all four volumes of the 73 TEST EQUIPMENT LIBRARY. \$4.95.\*

## —тне well-equipped ham shack—

73 MAGAZINE BINDERS — Preserve and protect your collection for your lifetime! There's no excuse for lost issues when you have these handsome red binders with gold lettering. Order 1 — BN1001—for \$6.50°; 2 or more—BN1002—for \$6.00 each.\* (specify 1978 or 1979 binders)
 QSL CARDS—73 turns out a fantastic series of QSL cards at about half the cost of having them done elsewhere because they are run as a fill-in between printing books and other items in the 73 Print Shop. 250 Style W—QW0250—for \$8.95°; 500 Style X—QX0250—for \$8.95°; 500 Style Y—QY0250—for \$8.95°; 500 Style X—QX0500—for \$13.95°; 250 Style Y—QY0250—for \$8.95°; 500 Style X—QX0500—for \$13.95°; 250 Style Y—QY0250

• HOW TO BUILD A MICROCOMPUTER — AND REALLY UNDERSTAND IT — BK7325 —by Sam Creason. The electronics hobbyist who wants to build hls own microcomputer system now has a practical "How-To" guidebook. Sam Creason's book is a combination technical manual and programming guide that takes the hobbyist step-by-step through the design, construction, testing and debugging of a complete microcomputer system. \$9.95.\*

• 1979 WORLD REPEATER ATLAS— BK7346—With a new easy-to-use format, the 1979 World Repeater Atlas is the largest ever published by 73. More than 230 pages of repeaters, listed by both location and frequency, together with over 50 location maps—make this the best repeater atlas ever! Nearly 2000 separate repeater locations are shown on the maps, with greater accuracy than ever before. \$4.95.\*

• BACK ISSUES—Complete your collection; many are prime collectables now, classics in the field! A full collection is an invaluable compendium of radio and electronics knowledge!

Single back issue—ST0000— \$3.00\*; 25 our choice—ST2500—\$12.00\*; 25 your choice—ST2501—\$25.00\*; 5 your choice—ST0500—\$8.50\*;

10 your choice—ST1000—\$14.00.\*

• OWNER REPAIR OF AMATEUR RADIO EQUIPMENT-BK7310-Frank Glass shares over 40 years of operating, servicing,

and design experience in this book. There are several books and numerous articles available on the subject of repairs to electronic equipment. The information within these books ranges from the elementary to the highly technical written for the top engineers in the field. But this book stands out from the rest in that it is written in narrative style aimed at conveying the concept of electronic servicing. A written discussion of how components work and how they are combined to provide communication equipment is used to help the reader understand the concepts required to service station equipment. \$7.95.\*

Style W

• A GUIDE TO HAM RADIO—BK7321—by Larry Kahaner WB2NEL. What's Amateur Radio all about? You can learn the basics of this fascinating hobby with this excellent beginner's guide. It answers the most frequently asked questions in an easy-going manner, and it shows the best way to go about getting an FCC license. A Guide to Ham Radio is an ideal introduction to a hobby enjoyed by people around the world. \$4.95.\*

• LIBRARY SHELF BOXES—These sturdy white, corrugated, dirt-resistant boxes each hold a full year of 73 or *Kilobaud Microcomputing*. With your order, request self-sticking labels for any of the following: 73, *Kilobaud Microcomputing*, CQ, QST, Ham Radio, Personal Computing, Radio Electronics, Interface Age, and Byte. Order 1—BX1000—for \$2.00\*; order 2-7—BX2002—for \$1.50 each\*; order 8 or more—BX1002—for \$1.25 each\*.

Be sure to include check or detailed credit card information. • Add \$1.00 handling charge. Note: Prices subject to change on books not published by 73 Magazine.

## FOR CUSTOMER SERVICE CALL (603) 924-7298

## That's the size of the world's most comprehensive guide to the subject of ham radio: 18 years of 73 Magazine.

The back issues of 73 are a gold mine of interesting articles. Unlike the other magazines, which fill their pages with activity reports, there's little to go stale in 73. You'll find pioneering articles on SSTV, FM, repeaters, ICs, and computers. Even the editorials are fun as Wayne Green's dire predictions, like the debacle of incentive licensing, have come to pass.

Clip the coupon below and send for 73's new back issue catalogue. Treat yourself (or a friendly ham) to some fun, and a fantastic bargain to boot.

**READER SERVICE** To receive more information from any of the advertisers in this issue of 73, postage-paid return cards are provided here for your convenience. If you wish to hear from one or several advertisers, refer to the ad itself. You will find numbers near the logo of each acvertiser. Each represents the advertiser's individual Reader Service Number. Circle the corresponding numbers on one of the cards on this page, include your name, address & zip, and drop in a mailbox. In 4-6 weeks you'll hear from the advertiser directly.

# ALL NEW **FT-101ZD**

## **HIGH-PERFORMANCE HF TRANSCEIVER**

Today's technology, backed by a proud tradition, is yours to enjoy in the all-new FT-101ZD transceiver from YAESU. A host of new features are teamed with the FT-101 heritage to bring you a top-dollar value. See your dealer today for a "hands on" demonstration of the performance-packed FT-101ZD.

Diecast front panel, plus heavy duty case

Built-in, fully adjustable, VOX circuitry

Built-In RF speech processor for more "talk power" when you need it

Built-in, threshold adjustable, noise blanker

Equipped for SSB and CW operation. Choice of wide or narrow bandwidth for CW (with optional CW filter installed)

Digital plus analog frequency readout. Digital display resolu-tion to 100 Hz

Rugged 6146B final amplifier tubes with RF negative feedback

RF and AF gain controls located on concentric shafts for operator convenience

Full band coverage: 160 through 10 meters, plus WWV/JJY (receive only)

TX, RX, or transceive frequency offset from main dial frequency

width: 300 Hz to 2.4 KHz

### TRANSMITTER

PA Input Power: 180 watts DC Carrier Suppression: Better than 40 dB Unwanted Sideband Suppression: Better than 40 dB @ 1000 Hz, 14 MHz **Spurious Radiation:** Better than 40 dB below rated output Third Order Distortion Products: Better than -31 dB Transmitter Frequency Response: 300-2700 Hz (-6 dB) Stability: Less than 300 Hz in first 30 minutes after 10 min. warmup; less than 100 Hz after 30 minutes over any 30 min. period Negative Feedback: 6 dB @ 14 MHz Antenna Output Impedance:

50-75 ohms, unbalanced

## SPECIFICATIONS

## GENERAL

Frequency Coverage: Amateur bands from 1.8-29.9 MHz, plus WWV/JJY (receive only) **Operating Modes:** LSB, USB, CW **Power Requirements:** 100/110/117/200/220/234 volts AC. 50/60 Hz; 13.5 volts DC (with optional DC-DC converter) **Power Consumption:** AC 117V: 75 VA receive (65 VA HEATER OFF) 285 VA transmit; DC 13.5V: 5.5 amps receive (1.1 amps HEATER OFF), 21 amps transmit

Size: 345 (W)×157 (H)×326 (D) mm Weight: Approximately 15 kg.

COMPATIBLE WITH FT-901DM ACCESSORIES Select switches for use with FV-901DM synthesized scanning VFO (option). FV-901DM provides scanners plus 40 frequency memory bank.

### **RECEIVER**

Sensitivity: 0.25 uV for S/N 10 dB Selectivity:

2.4 KHz at 6 dB down, 4.0 KHz at 60 dB down (1.66 shape factor): Continuously variable between 300 and 2400 Hz (-6 dB); CW (with optional CW filter installed): 600 Hz at 6 dB down, 1.2 KHz at 60 dB down (2:1 shape factor)

Image Rejection:

Better than 60 dB (160-15 meters); Better than 50 dB (10 meters)

IF Rejection:

Better than 70 dB (160, 80, 20-10 m); Better than 60 dB (40 m)

Audio Output Impedance: 4-16 ohms

Audio Output Power: 3 watts @10% THD (into 4 ohms)

Price And Specifications Subject To Change Without Notice Or Obligation

YAESU ELECTRONICS CORP., 15954 Downey Ave., Paramount, CA 90723 

(213) 633-4007 YAESU ELECTRONICS Eastern Service Ctr., 9812 Princeton-Glendale Rd., Cincinnati, OH 45246

## TS-180S with DFC\*

1S-180S, featuring DFC \*(Digital Frequency Control, with four digitally tuned memories), is an all solid-state HF transceiver specially designed for the DXer, contest operator and other Amateurs who enjoy working the 160 through 10-meter hands. Also available is a full line of matching accessories, including the PS-30 base-station power supply, SP-180 external speaker with selectable audio filters, VFO-180 remote VFO, AT-180 antenna tuner/SWR and power meter/antenna switch, DF-180 digital frequency control, YK-88CW filter and YK-88SSB filter. Stand-up microphone shown above is optional. TS-120S, popularly referred to as "a blg little rlg," is a compact, up to 200 watts PEP Input, all solid-state HF transceiver with such standard features as built-in digital readout. IF shift, new PLL technology and requires no tuning. It's ideal for car or ham shack use. Accessories available include the PS-30 base-station power supply, SP-120 external speaker. VFO-120 remote VFO, AT-120 antenna tuner/SWR meter, MB-100 mobile mounting bracket and YK-88CW filter. Hand microphone shown above is optional.

See the exciting TS-180S and TS-120S at your Authorized Kenwood Dealer!
