

# DX MONITOR

August 4, 1973 Volume 10, Number 34

THE BULLETIN OF
INTERNATIONAL RADIO CLUB OF AMERICA

SOMETHING OLD, SOMETHING NEW

This bulletin represents an intermediate stage in the publication of DX Monitor. In last issue, DXWW was printed by offset. In this issue, the majority of the bulletin is by offset, with the minority of features being done by mimeo.When SDPC took over publication in May, we began looking for methods of printing the bulletin which would be economical and convenient. After two months of discussion and consultation, we submitted a proposal to the Board of Directors to start printing by offset. The BoD gave tentative approval, at least for this issue to be so printed; unfortunately not all the editors got word in time, and consequently this issue is a hybrid-partly the old familiar mimeo pages, and partly the new offset pages. Starting with the next issue, with the beginning of Volume 11, the entire bulletin should be offset.

This change represents, we feel, a step forward for IRCA. The content of the bulletin will remain essentially unchanged. However, during the next few months, we hope to experiment somewhat with different formats. IRCA is one of the last major DX clubs to go to offset; we therefore have been able to draw upon the experiences of other clubs to avoid some of the pitfalls which they have fallen into. It is, however, only with your continued interest and comments that the publishing crew and reditors will know whether the format of DX Monitor pleases you. Your membership in IRCA in the past has been an indication that you have been pleased with the content of DX Monitor; your continued membership in the future will be an indication that you also approve the changes in printing methods.

THE INTERNATIONAL RADIO CLUB OF AMERICA—a non-profit club devoted to listening to distant radio stations on the broadcast band (540-1600 kHz). IRCA is a member of the Association of North American Radio Clubs (ANARC), dedicated to promoting cooperation between the major radio clubs in North America.

CLUB OFFICERS: President: Percy R. Kesteven, 13112 134th St.,
Edmonton, Alta., Canada T5L 1V8 (403-454-8278)
Secretary-Treasurer: Larry Godwin, Englewood, CO
Board of Directors: Don Erickson, Riverside, CA
Rick Evans, Gary, IN Glenn Hauser, Norman, OK
Dr. Richard Wood, Baton Rouge, LA Michael Worst, Seattle,WA
Michael Northam, Portland, OR

MEMBERSHIP RATES (per year)
Third class (anywhere in the world): \$6.50 US (not recommended)
First class (North America) \$9.50 US
Airmail (North America) \$13.00 (Overseas) apply for rates
Sample bulletin: 50¢ or 3 International Reply Coupons
Make all checks and money orders payable to IRCA

DX MONITOR, the official bulletin of IRCA, is published 34 times a year by the San Diego Publishing Committee. Weekly from November to March, three times in October, twice in September, April, and May, and once in July, July and August.

Editor-in-Chief: Father Jack Pejza, 3266 Nutmeg St., San Diego, CA 92104 (714-282-0076 or 282-2184) Publisher: Grant Manning, 12536 Arabian Way, Poway, CA 92064. (714-748-6538)

Permission to broadcast, publish or reproduce any of the material contained in DX Monitor is granted (excepting those items which acknowledge that they appear by permission from other sources) provided credit is given to DX Monitor and to the author or contributor, when stated.

IRCA publishes the IRCA Foreign Log, listing over 1000 foreign stations heard on the broadcast band. \$2.75 to members from club headquarters.

Please send self-addressed stamped envelope for correspondence with club headquarters.

Printing by San Diego Printers, San Diego, CA

# FIRST CLASS

Tom Butas writes that WWWR-920 <u>is</u> owned by Franklin Broadcast, Inc. of Russellville, AL. WXUR-690, Media, PA went off the air July 5. Carl MacIntire said he would have Radio Free America on the air by July 19, 3 1/2 miles off of Cape May, NJ. As far as Dave Schmidt knows, the FCC will more than likely grant the AM and FM stations to two separate outfits. 19 people have applications for the FM frequency, and two for the AM. Rob Harrington indicates that a proposed merger between Midwest DX Club, Radio California, and Virginia DX Club has been dropped for lack of interest in the part of MWDXC members.

#### GEOMAGNETIC ACTIVITY

Geomagnetic activity seems to have a high correlation with the chances of high-latitude TA or TP reception. The numbers below represent the geomagnetic activity, by means of the A index in Fredericksburg, VA.

July 3-10	11	4	4	3	4	15	8	7
July 11-17		- 8	6	8	10	23	13	5
July 18-24		7	11	11	6	6	13	7

Dr. Michel Breger, 7217 Creekside Drive, Austin, TX 78752 (512-451-2981, prepaid calls welcome)

Rick Evans has been doing an excellent job running the contests last fall. On behalf of all of us, I would like to thank him for the hard work and his personal involvement. The IRCA contests have always been enjoyable. And they do not require access to a computer:

As you new contest manager, a brief introduction may be in order. I am 31, single again, and am teaching astronomy at the University of Texas. For the past 15 years I have been DXing from several continents. Present gear includes a HQ-180A, a modified Sanserino loop and an excellent Grundig portable for travelling.

Suggestions for next year's contests will be very welcome. At present I have definite contest rules in mind, but they can still be easily amended. Some ideas I would like to see kicked abound are: Simple distance factors, trophies as prizes, \$1 entry fee, foreign heard contest by region: Transatlantic, Americas, Transpacific, specialty contests based on frequencies, shorter contests. Please send your ideas before August 31.

NOTE: With the exception of the next bulletin, we are going back to the three week limitation on reporting stations. They must be postmarked within three weeks of reception, or they will be cut. For those scared to report because I might move suddealy without notice (there was a person), I will only be going 40 miles, will be able to clear this box easily, and I might not be moving until December, though October is the target date.

(EDXR continued)

I've talked with the personnel manager about the problem, and he assures me there will be plenty of netice, since they'll have to be in touch with me re the requirements of a start-up terminal. 73.

Deadlines: 8/30, 9/13, 9/26, 10/11

Gene Martin, 3303 E. Evans, Denver, CO 80210
The contention that the written verification isworthy of respect while a tape recording of the subject station is not is Alice in Wonderland logic. It turns reality upside down, for

> BALLOT ON OPPOSITE

after all is said and done, the tape IS the actual reception itself faithfully preserved electronically. Does the coin collector show you a letter attesting that yes, indeed, he does possess a rara zloty from Poland? If he did, would that satisfy you? There is no way that a verification letter can 10341 Shirley Ave., Northridge, CA 91324 be judged by another DXer, but he can certainly render an expert opinion on a tape recording.. He can hear the same evidence you heard and reach a conclusion on whether you really heard the subject station. Of course, tapes can be traded back and forth, but any DXer who does this extensively soon has the knowledge widespread in the fraternity, and his claims will be accordingly discounted and discredited for that reason. But a cheater can fake his reception reports to stations in absolute privacy with no one else sharing his guilty knowledge.

> Larry Godwin, 2340 South St. #202, Boulder, CO 80302 Hi gang: Note the new address. The DXWW column in the last bulletin is impressive. It seems to me, with this offset format we have the advantage of a light bulletin postagewise, plus the convenience of 8 1/2 x 11 looseleaf sheets, which I like very much. Hopefully the entire August bulletin will be reproduced by offset, and will arrive in time to appraise it at the convention. I think it's remarkable we can switch to offset without increasing our dues! We are therefore anticipating our membership will not decrease significantly doe to the change of format and publishers. Blake, it will be great to welcome you to the Denver area this fall. 73...

Steve Wayman, 12 E. Oak, Villa Park, IL 60181
Hi. The offset printing in DXWW looked very good. Hopefully, if it is adopted, will end my major complaint against the SDPC. I personally don't want to have to mail in a SASE every month or personally don't want to have to mail in a SASE every month or so for features that should be included in the bulletin. I would not approve of a change to off-set unless some sort of guarantee that this practice would be discontinued would be given. SDPC may say that the articles unprinted aren't of general interest to the membership. However, CDXR, WDXR, and EDXR are each of interest to approximately one-third of the members. The sports networks are probably of interest to at least that many, while the financial breakdown of offset printing should be of interest to everyone. However since there is no actual way of knowing how many members an article interests, I think that the BoD should decide if it should be be printed, not the publisher. Article II, Section B, Number 6 of the Editorial Policy agrees with me. That is about 15 lines so 73.

Anthony Markewicz, 1394 Elgin Ave. W, Winnipeg, MB R3E 1B6 For those who have been having troubles in verifying CKY-580, give CKY a phone call anytime on MM and have an interesting chat with the anner. I was up at Camp Morton last MM and spent most of the morning talking to him. There's a group at Cimli (sic), near Camp Morton, that is interested in starting up a radio station, but I don't think the Interlake district could support a station? In a little while, CKY will be moving their Main St. studios to the Polo Park Shopping Center, by the CJAY-TV studios, as CKY has a controlling interest in CJAY. Also, CFRY-920 has dropped their Big Country program from 2300-0100 and replaced it with a program for the truck drivers. And finally, I think I'll take up my friend's offer and take an extensive tour at the station he works at--CJOB-680. 73

Garry Hurd, 408 E. Walker, Temple, TX 76501 I guess it's about time to give a rundown on last season's DX activity. I managed to hear an unimpressive 20 new stations and 7 new stations. I also heard my first Canadian. My totals stand at 55/22/2. I received the Lotsof/Kamp card, but I didn't pay

any attention to it. 73's--Michael Herman, 3322 S. Austin Blvd., Cicero, IL 60650
Friends, Romans, DXer! This is my first DX Forum, therefore a brief introduction is due. I'm 23, a teacher in Bridgeview, IL. priet introduction is due. I'm 23, a teacher in Bridgeview, IL. I am a past graduate of Northeastern Illinois University and currently enrolled in a masters program. The equipment here is a HQ-180c, SX-100, NC-190 and a Zenith Trans-Oceanic. The antenna farm is SM-1, SWV-7 and a Husler 4BTV. This club is very confusing to the neophyte. (the what? jz) The politics and undercover personal remarks are very annoying. The editors should give a brief list on who hates, loves, etc., etc.!! Secondly, an explanation of the abbreviations should be given. Byyee! That's all Folks!

Michael Hogan, 4811 Euclid Ave., East Chicago, IL 46312 Now that the summer DX season is half over, DX might start improving. I have not logged a new station in about 3 months. I concentrated in verifying some locals. I also resigned as editor of GYDXR because of personal obligations, a new part-time job and a full school schedule in the fall. Hope to see all of the convention goers soon. 73's.

John Zondlo, 6617 Maryland, Hammond, IN 46323
Well, what do you think of the new format? It's a \$#%&\* to type, that's for sure. Maybe it'll be easier when I get used to it.
It's convention time, and I hope to see you all soon. Why haven't I heard from more Chicago members?????? [EiC Note: CDXF retyped at HQ because John apparently misunder-

## WESTERN MIKE WORST 3608 Phinney Ave. N., Seattle, WA 98103 DVB

Deadline: August 31

First, let me remind everyone that Ariz. does not go the DST route so all f/c should be underlined as standard time all year. Latest veries: v/l KHYM KCBC KCUZ KOVO KDB. v/f WNUS. v/c KLOU. V/s for KDB is Robert K Dedrick, CE. He said he is new at KDB and will answer all correct reports promptly. He believes the old CE was a non-verifier. KVSL-1450 has a f/c 1st MM 0230-0245 EST. Delete KENT. KENT hasn't been heard the last several months but KVSL has. Electronic Service Co. does most Ariz. checks. KIKX-580 now has a MM SP 0200-0700 EST. They have requested a new nite pattern as well as higher nite power. KTKT-990 is buying a new 10kw day xmitter. KXEW-1600 put in for unlimited operation but was turned down. KOPO-1450 is now 500/250.KTUC-1400 is 1000/250 and KAIR-1490 is 250/250 and will not have an increase in power. KSUN-1230 is 500/250. Also KTKT-990 is on new day pattern with null to the north. SCers write. 73's.

Mel Hickman, P.O. Box 1638, Walla Walla, WA 99362 Hello DXers. As this is my first report, let me introduce my-self. I am 22, unmarried, and work as the night auditor for the Black Angus Motor Inn. Rejoined the club recently after being a member back in the late 60's. Some of you probably know me as the editor of the QSL CORNER of ASWLC, which takes a consider-able portion of my listening time around deadline time. Not much to report other than a v/l from KDES-920 after phoning in the report. The DJ I talked to managed to say "Far Out" eight times during the three minute call, but then, you don't get a phone call from Walla Walla every day, do you? Tapesponders (cassette and reel to reel) and pen-pals welcome. SCers also. (Welcome back Me. mw)

QSL LIST Mickey Delmage, 2522 Richmond Ave., Brandon, Manitoba, Canada R7B-OT6, is planning to prepare a booklet of QSL information, including station addresses. He would like information on the following:

Call, frequency, city, state, country, type of QSL (card or letter), length of time from date of report to date of reception of QSL, necessity of return postage and amount.

Mickey, who is not a member of IRCA, also would like to know how

many would be interested in such a book.

#### BRUCE PORTZER

14056 5th Ave. South, Seattle, WA 98168

Do you have any questions pertaining to DXing or broadcasting? Or maybe you don't understand some of the abbreviations in the bulletin because your new member packet hasn't arrived. ever the case, write me and I'll try to come up with an answer. Enclose a self addressed stamped envelope for a prompt reply. Or if you have an article you've written on the "skill" aspects of DXing, one of interest mainly to newcomers, or a review of a rx or other DX equipment (preferably not on too technical a level) send it in and I'll try and print it. As a reminder, articles on the history of DXing, domestic stations, the FCC, etc. should be sent to Bill Hardy; articles on foreign stations should go to Father Jack. Until next time, 73 and good DX. bp

#### THE TED VASILOPOULOS AWARD

Each year the IRCA Board of Directors award the Ted Vasilopoulos Award to the IRCA member whom the membership believes has dome the most in that year to promote the affairs of the IRCA and to improve the hobby of BCB DXing. The award consists of an engraved plaque and a year's free membership. In case of a tie, duplicate awards are presented. The TVA is presented at the annual convention if possible by the chairman of the Elections Committee or his representative. No IRCA member can win the TVA more than once over a five year period. A permanent nominating committee, consisting of the last three winners of the TVA, after soliciting nominating committee. nations from the membership, is now submitting to the membership the names of the four members who they have selected from those

The following form the Nomination Committee and are ineligible for the award: Larry Godwin, Don Erickson, Father Jack

Pejza, and Mike Northam.

The following are the nominees for the 1973 TVA (in alphabetic order):

Rick Evans--for high quality standards and reliable service as Central DX Roundup Editor and for stimulating Club interest in DX by a carefully planned contest.

Glenn Hauser--for excelling in meticulous reporting of DX reception over the years and his work on harmonics which adds a genuinely new method of exploring the broadcast band.

Percy Kesteven--for fearlessly carrying out the office of President for the past two years and for making the Achievement Awards Committee a club tradition.

Bruce Portzer--for regular and accurate support of the DX columns; for keeping accurate logs of sign-ons and sign-offs, and reporting of any changes noted.

Dave Prather IRCA Elections Committee Chairman 1711 6th St., Apt. 14 Woodland, CA 95695	Ballot must be submitted by Sept. 15.
I vote for the following individual fo	or the 1973 TVA:
Rick Evans Percy Kestev	en
Glenn Hauser Bruce Portze	r .

(Write-in)

Father Jack Pejza, 3266 Nutmeg St., San Diego, CA 92104 Use GMT in reports.

Report from England--Geoff Toon, Colchester, England Here's the latest news from this part of the world. Independent Broadcasting Authority in London now test transmitting with 500w (I think more) from Lots Rd., London, on 557 and 720 kHz.
Reception of 557 is possible over only a relatively small area
as this frequency is used by Radio Veronica anchored off the
Dutch Coast. Reception here of IBA is almost impossible unless
a small set with a highly directional aerial is used.

On 27th June the Dutch Parliament decided to ratify the Stras-bourg Agreement of 1965. The actual law to stop offshore broadcasters using Holland as a base is expected to be passed as a law by the end of the year. It is expected that 1 Jan. 1974 will see the law in action. Both Radio Veronica and Radio Nordsee International are starting representations to the Dutch in hopes of being allowed to operate from the Dutch mainland. This is most unlikely. Because of the peculiarities of the Dutch Broadcasting system, if the company can obtain a certain number of "subscribers" they get so much air time. Nordsee is already entitled to 2.5 hours radio and 1 hour TV per week after only one

day of the campaign.

As of June 24 Radio Caroline has been silent due to genera-tor troubles. On 11th June unidentified music was heard on 773 kHz during the afternoon. On the 12th it was reported that the station would leave the Dutch coast and sail to the English coast. Later it was denied, then it was on again. The 13th it was stated again that the radio ship was on its way to a position off the East Anglian coast at Frinton on Sea, Essex. At 1330 GMT 13 June, a test tone was transmitted on 1187 kHz followed at 1340 by music. The transmitter went off the air at about 1420. Further tests on both 773 and 1187 have been going on since about 1800 GMT. On 1187 at 1843 GMT 13 June programming in Dutch commenced. This lasted 15 minutes, ID as Caroline. Old tape? From the signal strength it looks almost certain that the station is in a position other than off the Dutch coast. I live some 20 miles from the expected anchorage. On 15 June, at 1100 GMT, the station on 1187 IDed as Radio Atlantis. Tests on 773 have not been heard since the 13th. No address given for Radio Atlantis. Program was in Dutch. Almost certainly came from Radio 630 Caroline ship.

The Voice of Peace is now anchored some miles from Haifa in Israel and transmits from 1500 to 2400 GMT, extending soon to 0600 to 2400. A "Peace Conference" is to be held on the ship carrying the station (MV Cito) commencing 28th July. Address for station is now PO Box 2808, Tel Aviv, Israel. Return postage must be sent, plus a contribution as this station is a charity

Report from South Africa--Denzil V. Baker, Durban, South Africa It has been some time since I have sent in some loggings to the World Wide section of DX Monitor. I have had some rather exciting DXing since I last wrote. However my DXing activities have now come to an end, as I have moved my QTH rather a lot lately. Anyway, I hope to settle down soon so I can at least get some DXing done before my job makes extra demands on me toward Christ-731s. mas time.

530 Australia, Dalwallinu, WA, ABC heard 7/1 with music 6DL and s/on at 2]58 with good signal.

830 6GN Australia, Geraldton, WA, heard 7/1 //6DL-530; good. 899 Lesotho, Maseru, R. Lesotho heard 7/1 at 2030 with s/off and NA. Fair signal.
Australia, Perth, WA heard 7/1 at 2022 with music;

1000 6PM strong. Listed as 2 kw.

1210 6KY Australia, Perth, WA heard 7/1 at 2036 with pop music; weak/fair; listed as 2 kw.

Report from the Philippines--Charles A. Taylor, Sorsogon, Phil. DX is still in the summer doldrums with lightning everywhere except here where we need rain. Peoples Republic of China remains the focus of DX attention here. Nothing really outstanding discovered; I'm mopping up high-powereds as quickly as I can ID them. 1020 Something very much in evidence here in SE Asia: ionospheric cross-modulation, a phenomenon I've been hearing about in the Asian Broadcasting Union's <u>Technical Review</u>. It is the modulation in the ionosphere of one radio wave by the modulation of another. One of the necessities is high field intensity induced by both waves in the same area of the ionosphere, and is evi-denced by modulation(programming) from the undesired transmit-

ter appearing superimposed upon the carrier of the desired transmitter.This is much in evidence on certain high-powered PRC's with the cross-modulation coming from VOA-1140! So the VOA's getting a free ride on Communist signals, hi! Sometimes the un-

desired modulation reaches an estimated 20-25% or so.

China, Fu-Chou, Fu-Kien. "Chungyang Jen Min Kwang
Po Tien Tai" (CJKT) Finally waited for an ID 1735
s/off 6/23. Parallel to 880 and 980. Fair with no

QRM. Estimated 50 kw. Measured as 579.998 kHz.—
Philippines, Batac, Ilocos Norte (Pres. Marcos hometown), Kanlaon Bestg System finally caught after many tries 2030 6/11. Correct your QRTH: this 630 D... is a move from Laoag City. Slight QRM. 1 kw. Measured as 630.115 kHz.

China, Shang-Hai Municipality. "Shang-Hai JKT" 6/22 1558 s/off (not 1620 per WRTH-73). No QRM. Fair. 795 Estimated 100 kw minimum. Exactly on frequency.

1000 ... China, Ho-Nan province, "Ho-Nan JKT" first noted at 1525 s/off 6/15. Slight QRM from 6TM and the time base of my Heath counter, hi. Not noted be-fore as buried under following item. Estimated as 100 kw. Exactly on frequency.

China, unknown location, s/off daily at 1515. Sounds like "Hua-Kao" or "Kua-Kao JKT." But no such place. Might be in Kwang-Tung or other SE province as is one of the first PRC's after LSS Sorsogon. Maybe 1000 Swa-Tow from 1080. Help, anybody? Measured on 999.808.

I hyphenate Chinese place names as most of them are actually two names rather than one, i.e., Tai-Wan, Tai-Pei, Hong-Kong, Kow-Loon. Ditto Vietnamese place names. Most Western spellings are grotesque mispronunciations of Chines names. Most of Fu-Kien (more properly Fu-Jun) province stations (with the impor-tant exception of the Fukien Front Broadcast Stations, which carry the Peoples Liberation Army programs) still never ID locally and are simply satellites of CUKT, Peking. It's probably not likely that they will not begin to originate locally, either, as any anti-Mao material would be extremely embarassing to the regime if heard by the Taiwan government just across the straits. PRC s/offs are unusual. The local personnel pot down the material coming from Peking and start the Internationale. After that, the local ID comes and then the carrier is cut.

LISTENERS' LOGGINGS-- LATIN AMERICA

560 [ZYM5] Brazil, Curitiba, Radio Sociedad Guiaracá, is now known as Radio Iguaçú. (SCDX)

Cuba, Santa Clara over/under domestics 7/17 with "Guantanamera" at 0815, La Voz de Cuba chimes 0826 CMHQ and 0830. (AEL,W)

Nicaragua, Managua, Radio Equis 7/9 0830 with no interference; KCBS and KFMB slopover; SS language and music; male announcer; weak signal. Radio Equis 750 YNX

sung several times, and IDed by man. (JEC,W)
Colombia, Bogota, Radio Sutatenza 6/17 with no QRM
or slopover; SS talk and music; male announcer; weak 810 HJCY signal. "Radio Sutatenza" IDed several times.1123 GMŤ, (JEC,W)

Colombia, Bogota, La Voz de Bogota 6/17, no QRM or slopover; SS language and music; male announcer; weak signal. Time at 1146 IDed by slogan. (JEC,W) 890 HJCE 1015 HJDP

Colombia, Neiva, R. Colosal is reported to be here (NZRDXL)

Brazil, Rio de Janeiro, good 0725-0728 7/18 with PP vocal music, 0728 "Radio Globo" SID by chorus,brief PRE3 fade under XEFR during spot. Talk by man 0729:30 with mention of Brazilia. (SHM,C)

570 2YA New Zealand, Wellington, 7/18 1528 with female announcer spinning U.S. MoR music. "Little Orphan Annie" Static; fair reception. (CAB,HI)

<u>Australia</u>, Brisbane, Qsld., 7/16 0910 tentative; male announcing world news about Cambodia; good. (CAB,HI)

<u>Hawaii</u>, Honolulu 6/14 1307 with no QRM or slop; EE

790 40G

KAIM 870 religious music; mane annoucer. Interview with George Beverly Shay. (JEC,W) Clandestine. A new anti-Mao station, HongXi Kwang Zhan

995 ??? has been heard in Tokyo at 1330 GMT. (SCDX)

Australia, Sydney, NSW, 7/18 1537 positive ID and spot announcement by male in EE followed by American artist Peggy Lee with "Fever." All alone, no Tonga; heard for 2KY

Hawaii, Honolulu 7/7 1330, no QRM or slop; EE language with music. Male announcer; weak. Just station ID 1040 KHVH heard. (JEC,W) 5

(Continued on Page 4)

The Association of North American Radio Clubs held its annual convention for the first time on the West Coast this year, hosted by a group of DXers from Southern California. The site of the convention was Fabulous Inns in San Diego, the place where the also highly successful 1972 IRCA Convention was held. Despite what you'll hear on "DX Jukebox" on Radio Nederland about August 14 or so, there were 51 DXers present. Al Reynolds, the ANARC Executive Secretary, from Jackson, TN, was among the half-dozen DXers travelling from the East Coast. About ten IRCAns showed up, including three from the Seattle area.

The convention really got started on Friday evening, July with a round-table seminar on various phases of DXing, featuring Woody Seymour on SWBC, Steve d'Adolf on Utilities, and Father Jack Pejza on BCB. The discussion also got around to discussing the shortage of manufacturers producing receivers

which are usable by DXers.

About twenty of the convention goers traveled to KFMB-AM-FM-TV on Saturday morning, and then went on to visit the Naval Transmitting Facility. Saturday afternoon was devoted to club get-togethers. The SW clubs were, of course, more adequately represented than the BCB or TV-FM clubs.

The U.S. Navy continued to play a large role in the convention, as the guest speaker at the convention banquet at the nearby Hanalei Hotel was John Myrmans, Asst. Operations Manager for the U.S. Naval Communications Center, San Diego. After showing a film on the operation of a typical Navy communication center, he fielded questions on Navy communications.

The annual business meeting of ANARC, under the leadership of Al Reynolds, touched on some of the main issues confronting the federation. A lengthy discussion touched on what the pur-nose and functions of ANARC should be. The last scheduled meeting of the convention, on Sunday

evening, was a technical session chaired by Grant Manning. After a discussion of various typed of radio noise and ways of combatting it, the topic changed to that of surplus receivers, and how the various military equipment can be used for DXing.

All in all, the ANARC Convention helped promote contion between the DX Clubs and thus lived up to the basic coopera-

purpose of ANARC.

### THE BARLOW WADLEY XCR-30: A REVIEW

by Mike Hardester

In the brief five years I have been an active DXer, few portable receivers have been made available to the public which have proved to be of any value to the DXer planning a DXpedition, or going on vacation. One excellent receiver was the Realistic TRF; however, before its true value was realized it was taken off the market. About the same time the TRF was making news, another receiver was being born, but it wasn't until late 1972 that any real attention was placed upon the receiver from South Africa: the The Barlow Wadley XCR-30. Currently available in the United States through Gilfer Associates, Box 239, Park Ridge, N.J. 07656, the XCR-30 was retailing for US \$195 in December of 1972.

The owners manual has this to say about the XCR-30: "The XCR-30 is a specialized, high sensitivity, portable short wave receiver, designed to provide precision frequency tuning over the full shortwave spectrum up to 30 MHz, with exceptional frequency stability for both amplitude modulation (AM) and single sideband (SSB) transmissions." The circuit is a "multiple heterodyne circuit...incorporated wherein the harmonics of a 1 MHz quartz crystal control the frequency shown on the dials to an accuracy sufficient to locate and identify a station whose frequency is known. The crystal stabilizes the received frequency to eliminate tuning drift over long periods of time and to provide stable single sideband pitch. Frequency selection is a composit function of two dials." dial displays the MHz segment in fractions (e.g., 000, .010, .020 and so on in increments of .010 up to 1.000 MHz). tune a frequency, the whole number dial is set to the MHz segment (e.g. 11), and the fractional MHz segment is set to a fraction (e.g. .950), thus the frequency is 11.000 + 0.950 11.950 MHz. It takes a little practice to get the hang of the dials, but once practiced, it's done without thinking.

Modes of reception are AM, CW, & SSB (USB & LSB) with a tuning dial to clarify SSB signals as well as AM signals. In addition to the mode selection switch, and on/off/volume, the tuning dial is accompanied by a fourth dial, antenna trim, for peaking incoming signals. An "S"-meter of sorts is built in, but at times it may indicate a low reading for a local station (e.g. KTRB-860 with 10 kw beaming directly at my QTH) and shortly thereafter, a high reading.

The XCR-30 is designed to operate off of six type D dry cells (1.5 v. each) for a total D.C. input of 9v. An external power socket is provided for a power supply of 6 to 12 volts. Two other jacks are present: an external antenna jack and an ear phone jack (8 ohm). The receiver comes with a built-in whip antenna; however, I have found it of use only for casual listening. On medium wave, I have utilized the Space magnet (GM-1), manufactured by Worcester Electronics Laboratory, R.D. 1, Frankfort, N.Y. 13340. On the short wave frequencies, the XCR-30 manual suggests that any longwire employed not exceed 50 feet in length to minimize cross modulation; however. I am currently using a 100 ft longwire with little cross modulation being noted.

Frequency readout is 10 kHz over each 1000 kHz tuning range and calibration accuracy is within 5 kHz on all frequencies with resetting accuracy within 1 kHz on all frequencies. Utilizing a Bendix BC-221-M frequency meter, I can attest to the above claim of 5 kHz accuracy. The resetting accuracy also checks out as correct to within 1 kHz on all frequencies. should point out, however, that I can only make this claim from .5 to 20 MHz, as the upper limit of the BC-221 is 20 MHz. Unfortunately, I do not have the means of checking above 20 Mhz.

Sensitivity is excellent on all frequencies (using the SM-1 or longwire). Though the built in whip is not used while DXing, East Coast stations such as KDKA, WSB, WBZ, etc., are heard with fair signals, but not as well as when using the SM-1. On shortwave bands, I was unable to find any station on my HQ-129X which was not audible on the XCR-30. Though the signal on the HQ-129% was sometimes stronger than on the XCR-30, the XCR-30 pulled each signal in to an audible level at the least.

Selectivity is 6 kHz overall RF on AM, and 3 kHz overall

RF on SSB and CW. In actual use, I have found AM selectivity to be from 4 kHz to 30 kHz, depending on the station being monitored. The h kHz was determined from VSZ1-8hh with NHAS-840 audio hum. The 30 kHz was from local KTRB-860 occupying 830 to 890 kHz during the day, and slacking off at night only to the extent of allowing KRVN-880 to come through. This is true regardless of the type of antenna: whip, SM-1, or long-wire. On shortwave bands, selectivity is usually 5 to 10 kHz with the Voice of America occasionally pushing it to 25 to 30 kHz. (Editor's note - selectivity is normally measured by applying a reference signal to the receiver and then tuning off frequency until the strength of the signal is a certain specified fraction of what it is at the center frequency Hence spec sheets may quote selectivity as 36 dB at + 10 KHz for example. This is independent of how strong the signal is. While Mike's figures are technically incorrect, they do give a very vivid description of how the receiver performs when in actual use - bp)

The Barlow Wadley XCR-30 is a prototype receiver, somewhat new to North America. At the present, an XCR type receiver is being planned to include the FM band. This was excluded in the current models "to eliminate the possibility of cross modulation." Unfortunately for the designers, they neglected to guard against cross modulation from locals; but then what receiver is totally free of the products of cross modulation. Possibly the only other "complaint" I can put forth is that concerning the lack of selectivity regarding locals. However, keeping in mind the fact that the XCR-30 is a portable receiver, I feel it is equal to many non-portable receivers and should be recognized as an up and coming piece of equipment in the DX field, whether for a main receiver or as a portable receiver for DXpeditions or trips.

### Father Jack Pejza, 3266 Nutmeg St., San Diego, CA

The ANARC Convention here in town was a lot of fun, as all conventions are. No one from SDPC will be able to make it to Hammond unfortunately. The rest of you who are able to, however, have a good time. This DX Monitor should reach you just about the time of the convention. so you'll have an opportunity to talk over the new type of printing. I must apologize to the editors for giving them such short notice on this issue. We didn't get word from the BoD that offset had been approved until very late. I should have called instead of writing. Important notice to all foreign DXers: the IRCA Foreign Log, Vol. 2, will be out about the first of September. Cost will be \$3.00. The book is twenty pages bigger than last volume, and has many many stations which do not appear in Vol. 1. I will take advance orders so that you will get your copy ASAP.

			couldn't hear 'em when I lived on Long Island(JM
1420	WHK	ОН	Cleveland; good w/rr, many SIDs, only QRM WCOJ s/on
Vo.	WLIS	CT	0443 7/16 0431-0450. (PRM)
	"TLD	<u> </u>	Old Saybrook; very strong 7/22 @ 0600 s/on w/"I Love The Hills Of Old Conn." & into nx & MoR. (DS)
1430	CKFH	ON	Toronto; good 7/16 w/rr, spots for the Market. CKFH
	<b>そいひて へ</b> &	77.0	Record Roulette 0446-0500. (PRM)
	*WDIC*	V A	Clinchco; fair u/o CKFH on r/c w/1000 Hz TT, phoneti IDs 0121-0136 6/18. (SSH)
1440	CFGO	ON	Ottawa; fair o/WAAB w/rr mx, promos 0142 7/17 while
			looking for WSGO r/c which wasn't hrd. (SSH)
	WHHH	OH	Warren; good o/CFGO, WAAB @ s/off w/ID but no SSB 00
			7/20. Had choral singing proir to s/off. No s/on timmentioned. (SSH)
	*WJJL*	NY	Niagra Falls; 7/2, 0048 ET w/mx and technical talks.
4 J. J.A			0050. (ЛИН)
1450	*WCON*	GA	Cornelia; MM 7/16 very good on r/c 0110-0120. Please
			time change from list. TT was slopping over on 1460, IDs clear. (BLC)
	WHKP	NC	Hendersonville; MM 7/16 ID slipping thru 0105, maybe
	TATTTUE	ייורד	after news, fair, New. (BLC)
	WILM	DE	Wilmington; now has a very irregular SP. Noted s/off at 0000 on 7/2, 0035 on 7/9, but back into RS at 030
			but was AN 7/16. (DS)
	WKIP	NY	Poughkeepsie; atop for few moments w/MoR selections
			7/8- fast v/l sez that they were on day pattern (yea
	*WMYB*	SC	they re directional) and little power this way. (JMP) Myrtle Beach; 7/16, w/TT noted 0104-0108, w/ID @ 010
			then pause, TT again 0108+. Must's been on 1 kW to 0
			then .25 following judging by drop in signal. Id did
1460	*WMBA*	PA	give reason for test. New. (TRS) Ambridge; atop channel w/ET-rr w/solid gold, jingles
			and wx for Pittsburgh. This 0150 7/16, must beam thi
			way. (JMP)
			In very well for a 500 watter on ET which sounded li
			RS. Noted 0153 7/16 til last check @ 0245 w/rr and j Audio very sharp. (DS)
1470	*WPGF*	NC	Burgaw; f/c noted 7/16 w/TT at tune in 0027 til 0037
	MUDG	DIA	s/off. WSAN, et al. also there. (DS)
	WVBS	NC	Burgaw; per v/l received 7/23- WVBS is the call ex- WPGF. (DS)
1480	*WSAR*	MA	Fall River; atop all morning 7/16 w/ET-rr, many Ids
11.00			also noted starting into RS. (JMP)
1490	WEMJ	NH	Laconia; atop u/WBCB w/wx for NH 7/10 0200- my null
			WBCB is about 7 degrees wide, and I certainly never expected to hear this one maybe I should ve tried
			their DX TEST (JMP)
1500	*KSTP*	MN	St. Paul; noted ETing w/TT, 0430 ID 7/16, Atop chann
1510	*WMEX*	τντ Δ	(JMP)  Boston: good w/Pm 0251 0205 planting and w/mm: the
- )- 0	WILLIA	14123	Boston; good w/ET 0251-0305 playing rr w/"This is WM Boston conducting equipment tests." annmt between so
			some wkbw Qriv, 7/2. (Priv)
			ETing w/OC and IDs every minutes 0310 7/13. (JMP)
