THE LOUDENBOOMER REPORT

Despite the things you may have heard, it simply is not true that the 1974 IWCDXA Convention at Christopher, Ohio was streaked!

Actually, as these things go, the whole event was a rather quiet affair, which is only fitting for a city where most of the restaurants fold up their menus as early as 6pm.

There were a number of highlights at this meeting, including a rather large display of the more common items of equipment. I found this to be rather disappointing as I had hoped to view some things I hadn't seen before. Like a new Dasik XL-302 or a prototype of the new general coverage model being readied by Dickeroed DX Products. A Mr. Bipple was there from the R.L. Brake Company, displaying their top-of-the-line model which does everything but write your reception report for you.

A Saturday meeting resulted in the tearing apart of the IWCDXA bulletin to say nothing of club (read "Loudenboomer") policies. I assured everyone I would give full consideration to all suggestions received, but I seem to have lost the notes I took. I expect the hotel people enjoyed cleaning up all those torn bulletins too! Our editorial board was on hand, dressed in the purple and ermine robes of their office. Everyone was enthralled with their plans for the future.

Saturday night's Swiss steak dinner starred E.N. MacDistantplace of Radio Canada who spoke to us about his broadcasting career ("It all started at a little five thousand watt radio station..."), gave us an inside look at the workings of this giant operation and told us about plans for improving coverage via relays over Radio Centinella del Sur, Radio Sahara, IBF and the Polish Pathfinders station. MacDistantplace also played Santa Claus in July bringing gifts for all. With the hotel air conditioning system working so hard, we were all in the mood for Christmas anyway!

Getting back to the equipment for a moment, the conventioners were intrigued by the newly developed Acme Great Circle Calculator which I must admit is one of my developments. Acme is a company which manufactures and distributes my books and new line of DX aids. Using the Great Circle Calculator one can find the path from the North Pole to any other place on earth in just seconds!

Late Saturday night, world traveler Alan Broth hosted a gathering in his fifth floor penthouse suite. Broth served remarkable quantities of something called Sangria or somesuch. He was never seen without a large Phillips 66 map diagramming the rooms and furniture placement in the suite. It seems that he had been lost in the penthouse five or six times the previous night and thus, this wise precautionary measure.

I managed to dodge all the camera lenses and flashbulbs pointing in all directions. But even had I not done so, it is doubtful that the clever disguise I used could have been discovered.

Convention goers had the opportunity of winning ancient copies of "How To Tune The Earth", could enjoy free parking (but if you had a car your room was \$2 more!), purchase IWCDXA stationery and learned that Radio Canada's 60 meter band frequency serves Canadian sailors in Liechtenstein.

We also heard the shortest speech ever given with a West Virginian accent and took home much more junk than we brought with us.

One late night clandestine meeting on Friday found four club executives discussing in hushed tones the defection of one of their editors who is apparently striking out on his own with the organization of a 120mb DX Club. It was not decided for certain just what to do about this although there were hints that the dreaded California Cadre might be consulted, or even hired. The editors are up in arms not only over the defection itself but because the errant editor never turned in his robe of office.

And there you have the main points of this year's "do." Stories made the rounds Sunday shortly before things broke up, that next year's affair will be a week long session to be held in David, Panama. Think you're up to it?

73,

Charlie

COVER PHOTO McMurdo Sound, Antarctica - first established by the U.S. Navy in 1955 - continues to operate with a "wintering over" crew each year in what is called the Navy's "Operation Deep Freeze". Armed Forces Radio has been operating recently on TV and software radio with materials fed to them from Washington via New Zealand. Personnel from the nominal amateur MARS relay network have secured permission to operate on 6012 KHz with 5 KW. A new station, new country, new continent!!

SHORTWAVE CENTER

Edward C. Shaw
NASWA - WDX4EOV
621 Burleigh Avenue
Norfolk, Va. 23505 USA

Lots of letters from the membership have been very complimentary lately, and I just want to take this opportunity to express appreciation. It has always been my desire to provide a wide assortment of entertaining or informative subjects. Apparently, we have been choosing just the right amount of each. Beginning with next month, Short Wave Center will be a bit smaller than usual. September begins the DX season with the celebration of Ramadan in the Islam religion. We can expect many Arab broadcasters to operate with extended schedules during those holy days in the latter days of this month. We do anticipate the Log Report to be somewhat larger, and for that reason we are relinquishing several pages to that section. Get your loggings in to Mac Leonhardt each month - and write to Mac for a supply of log report forms to use. It makes his job so much easier. 73 &

HELP WANTED

Short Wave Center would like to have the assistance of several volunteers to research, develop, and write feature stories on certain broadcasters throughout the world. Volunteers to these projects would be expected to type their own work on special forms provided after any needed editing I would suggest for you. Please don't hesitate to contact me soon.

ATTENTION BARLOW-WADLEY'S

Owners of the Barlow-Wadley XCR-30 portable may one day find the technical manual for this receiver to be very handy. The service manual includes schematics, parts lists, and alignment instructions. Your check or international money order for U.S. \$2.00 should be sent to:

Mr. T. Dixon
Barlows Mfging Co., Ltd
P.O. Box 23
New Germany, Natal
Rep. of South Africa

Incidentally, the receiver was available directly from the factory as of late April 1974 for \$228 U.S. air freight, delivered in 14 days.

Roxbury, NY

SOME EAST OHIO DX PUBLICITY

Henry Rockwood of St. Clairsville got five columns and a photograph in the local News-Register last month. NASWA member Rockwood elaborated on the entertainment derived from foreign news. This kind of subject matter is usually welcomed by your local newspaper. Why not get in touch with them?

A REMINDER

Many persons have been dismayed to not receive a desired reply when writing to section editors of PRENDX or to any other correspondent for that matter. Please always include a return address and stamped envelope, and then allow sufficient time for answering. Believe me, the editors will appreciate it. Neither the club nor the editor could afford to answer all mail without return postage being supplied. Thanks

SOLAR FLARES GIVE DX!

Where were you from 28 June through the first week in July? Space Environment Services Center in Boulder, CO proclaimed the flare as a large one of record-breaking proportions. During the flare, SW signals in the northern hemisphere and particularly nearer the pole were interrupted with radio noise. Reports from club DXers attested to great tropical frequency openings into Latin America and Africa during the duration of the week long flare. A-index soared to over 100. This subject has been much debated in DX circles the past couple of years.

CONVENTION 1974

Columbus July 19-21 1974: The first annual NASWA convention was a fine success. Fifty-eight persons gathered together to see a great receiver display, meet old friends and new ones too, and to take part in some enlightening seminar talks.

The first evening was spent informally as conventionnaires arrived and checked in. The Neil House marquis over the front of the hotel proclaimed a big welcome to North American Short Wave Association.

Seminars subjects included our club and hobby and where they are going; plans for the bulletin; and pros and cons of propagation prediction attempts. A representative from Drake communications in Miamisburg, Ohio displayed the new DSR-2 receiver among a dozen other receivers brought by other attendees to the convention.

Convention hosts Bill Matthews and Randy Minnehan spared no effort in putting together a fine program, complete with special feature speaker at the Saturday night banquet - the renowned Ian MacFarland of Radio Canada International. Mr. MacFarland addressed the prospects of Radio Canada's future, explained some of their broadcasting policies, and told how he came to the position he enjoyed with RCI today.

A special plaque inscribed with appreciation to MacFarland was presented to him by NASWA's Executive Chairman, Dan Ferguson.

Special souvenir record albums, prepared for the EDXC convention in Europe, were presented by MacFarland to each convention attendee. Many door prize drawings were held which included giveaways of LP record albums, Canadian almanacs, WRTHs, How To Listen books, and one of Autek Research's Q-Boxes.

The banquet meal was delicious, although not quite what was expected, due to unforeseen expenses. And, many attendees will never forget the ultra-efficient air conditioning of the convention hall and banquet room.

As with other past conventions, many attendees gathered in Alan Roth's majestic presidential suite deluxe (with 2 baths) in the late evening hours to sip soft drinks or something better, and generally carry on the confusion until....

Some rumored words were whispered that Columbus would be a fine place to host the next ANARC convention, but we are also looking for a fine place for NASWA to converge on next year as well.

No convention could be complete without at least a mention of NASWA's own black sheep, Charlie Loudenboomer, who apparently could not make it to the convention this time, but did make his mark. Upon his arrival at the hotel, the first thing Dan Ferguson was told was that mail had arrived for him. Opening the package, Dan found a large multi-colored vinyl sphere inscribed with the greeting from Charlie L."Have a Ball". So, we did.

SEE YOU NEXT YEAR?

 Photographs on facing page were taken by George Schnabel of Rochester, NY.

I REMEMBER WHEN...
by Jack Jones

The "Short Wave Craft" advertisement in the July FRENDX really did bring back some fond memories. After struggling along from 1930 to 1933 with a makeshift one-tube SW receiver (UX-201A), I finally saved enough to get the two-tube Doerle from Radio Trading Company. I was working at a local movie at the time (just out of high school) and believe me, the \$9.90 was lots of money!; plus what the tubes and batteries cost. As you know, 1933 was just about the worst year of the depression.

I believe the receiver was originally described in a 1931 or 1932 issue of "Short Wave Craft." The author's name I believe was Walter Doerle; hence the name. It proved so popular that Radio Trading Company started making them in late 1932 or early 1933. The circuit was a simple and straight forward regenerative detector and one stage of audio, using two UX230 tubes. Four plug-in coils went from 1500 kHz to 22 mHz, and were color-coded green, brown, blue and red. It worked well. I heard VK2ME practically every morning on 9590 kHz (only we called it 31.28 meters in those days) All the Daventry, Zeesen stations, lots of HK stations from Colombia which later changed to HJ, were easily heard.

At that time the International Short Wave Club of East Liverpool, OH was about the only one in the world. Dues and subscription were \$1.00 per year, I think, and the magazine came out once a month. I recall the names of Cushen (New Zealand) and Baer (England) as contributors.

I think my crowning glory with it came Christmas Eve in 1933. There was a station in Santiago de los Caballeros, Dominican Republic, that was broadcasting a special Christmas program starting at midnight beginning Christmas morning. This program was announced in advance in ISWC magazine. I was there, headphones on, at the appointed time and I honestly heard them!! Well enough to positively ID the station, hear the bells ringing and the Christmas music. The wonderful thing about it was that this station used 7½ watts of power; or so the information stated. All I know is that I heard them.

All my old QSLs of those days are long since gone. I quit DXing about 1935 and only started back last year. I'm really enjoying it. Wish I had my two-tube back to compare with a modern receiver.

MORE VAC-QRP

Have you veried all continents? Better write to Dan Henderson for info on how to get award certificates, or check credits page of June FRENDX. To participate in the VAC-QRP column you simply make a list of your lowest powered catch of each continent; like the examples below.

Digital Readout Deluxe Receiver

ANOTHER SUPER RECEIVER!! For those with \$500 or so to spare soon will have another receiver to consider. YAESU MUSEN CO., LTD of Tokyo, Japan, with United States representatives at 7625 East Rosecrans Avenue, Unit #29, Paramount, California 90723, has distributed its new brochure of equipment which includes a description of its new FR-101.

The FR-101 appears to have similar features found on many other direct frequency dialing receivers. The Yaesu people claim new innovations such as a double-balanced (?) mixer which offers unparalleled performance and rejection of cross-modulation and intermodulation interference often found in the SX-190 and SPR-4 receivers.

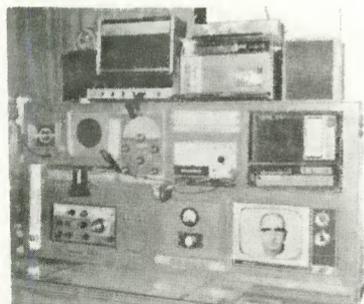

Features of the FR-101 include 21 selectable bands to cover everything from 160 meters up to 2 meters. The receiver comes equipped with crystals for only the ham bands.

Additional coverage for most of the international short wave bands are facilitated by pre-marked positions on the selector dial, but the crystals must be purchased separately. Included among the pre-marked positions is one for 60 meters. Conspicuously missing is the 49 meter band; this is because the receiver's bandpass tuning is designed near this range of frequencies. Specific questions have been asked of the Yaesu Company, but no answers have been received yet, concerning the schematic design of the FR-101. Without this needed information, your editor can only speculate that it is possible to insert a crystal for any desired 500 kHz range of frequencies, regardless of what the dial indicator markings read. I also suspect that most of the 49 meter band can be salvaged with installation of the proper crystal. Since the receiver covers frequencies down to 160 meters, it is likely that 90 meter and 120 meter short wave broadcast crystals may be installed. When additional information about this receiver is found, these questions will be answered in FRENEX.

The receiver comes in two models: the FR-101 which is direct frequency dialing like the SX-190 and Drake line receivers; and the other is the FR-101S which uses lighted nixie tubes or LEDs for direct reading of frequency as illustrated above.

Other features include a noise blanker, 1 kHz visual readout, built-in 25 & 100 kHz calibrators, and 12 VDC operation.

Specifications for the FR-101 claim 1 microvolt sensitivity on AM at 10 dB and below on 14 MHz. Selectivity figures are given as 6 kHz wide at 6 dB and 12 kHz wide at 60 dB for a shape factor of 2:1 on AM. SSB selectivity is given as 2.4 kHz at 6 dB and 4 kHz wide at 60 dB. NOT BAD!! Without seeing the schematic, one can only guess that mechanical filters provide this kind of selectivity. Image rejection claimed is better than 60 dB. The FT-101 has selectable AGC in fast or slow release times of .5 and 2 seconds respectively.

BAND PASS CLASS - PART II

HOW SKIRTS AND SHAPES AFFECT YOUR DXING

by Harry Helms

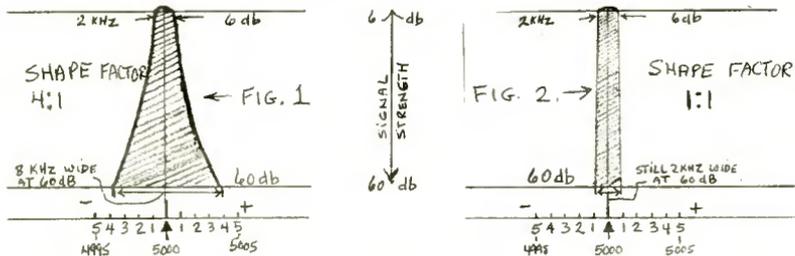

You've just got your new receiver, and you are examining the specifications in the owner's manual. The data you see reads something like this: selectivity - 6dB for 2 kHz. Or maybe it says ± 2 kHz at 6 db down, or 2.5 kHz at - 6db, perhaps 3 kHz at - 6db with 12 kHz at -60 db, maybe.... and, so it goes.

All those numbers are trying to tell you how selective your receiver really is. Or they may be just trying to make a rather unimpressive receiver appear to be more selective than it really is.

To save space, we won't run through all the theory behind selective characteristics of resonant circuits, and suggest you consult the ARRL Radio Amateur's Handbook, or William Orr's Radio Handbook, among others, for fuller details. We are going to discuss what a selectivity curve means, not how it is determined.

As we said last month, a radio signal occupies so much space, so that a receiver set at 5000 kHz will usually be receiving signals from 4997 to 5003 kHz, for example. And, as every SWL knows, a receiver will also respond to strong signals near to the frequency to which the receiver is tuned. If the signal is very strong, the receiver will respond to it even though it may be several kilohertz from the frequency to which we have the receiver tuned. Going back to our 5000 kHz signal we may even have interference from a station on 4980 kHz if the interfering station is loud enough.

Selectivity is defined usually as the ability of a receiver or other device to reject signals on frequencies different from the desired one. To help us visualize the receiver's response to interfering stations of various strengths and frequencies away from the desired frequency, we have devised selectivity curves.

In figure 1, we have a typical selectivity curve. Note that the selectivity measurements are made at 6 db (decibels) down and at 60 db down. Down from what, you say? These measurements refer to the signal voltage in the receiver's selectivity circuits. At a spec of 4 kHz at 6 db down, suppose we have two signals of equal strength at 5000 and 4998 kHz. When the receiver is tuned to 5000 kHz, the power ratio of the two signals is 4:1 in favor of the 5000 kHz signal. It is standard practice to make measurements at points 6 and 60 db down resonance. We won't discuss decibels except to say they are based upon the response of the human ear and are logarithmic; that is, a fourfold power increase may sound only twice as loud to the human ear. (*See Ed. note)

Our selectivity curve has specs of 1 kHz @ 6 db and 4 kHz at 60 db down. In practical terms, this means to produce an equal signal to the one at resonance of 5000 kHz, we need a significantly stronger signal 1 kHz from resonance, and we need one heckuva stronger signal 4 kHz from resonance. Note that these are strengths required so that we can hear the two signals at equal levels, and that the signal strength at resonance is important because we are talking ratios between the strength at resonance and the QRM. A weak signal at resonance is more prone to QRM than if we have the BBC tuned in at resonance!

(Ed Note: It should be pointed out that decibels is a purely arbitrary term in expressing loudness of sound. Many manufacturers of receivers have accepted a standard zero decibel reference point of 600 milliwatts input to a 600 ohm circuit. Each time loudness of signal doubles is really a four-times raise in numerical decibels, as Helms points out in his article. S-9 on many professional receivers today represents a standard of 60 microvolts of signal input to the receiver.)

In general, we can hear everything in the shaded area. You can demonstrate your own receiver's selectivity curve by tuning slowly across a local BCB station; hear the signal rise, peak, and then fall? That's what we see visually in Figure 1.

An important measure is the shape factor which is defined as the ratio of the selectivity measurements at the 6 db and 60 db points. Figure 2 shows an ideal shape figure: the same selectivity at the 6 db and 60 db points, or a perfect 1:1.

The shape factor is the best measurement of a receiver's skirt selectivity, or ability to reject adjacent channel interference. Too many SWLs think of selectivity strictly in terms of the measurement at 6 db and below. A little thought may lead you to the conclusion that the selectivity curve of figure 2 will be more useful for most DXing than the one in figure 1, despite the wider measurement at 6 db down... and you will be right! What the receiver will respond to is indicated by the shaded areas, and it is quite obvious that figure two shows a selectivity curve that will do you far more good when the QRM really gets tough.

In our last installment we probably left many of you wondering how a radio signal that occupies frequency space of a few kHz could be squeezed into a filter rated at only a few hundred Hz. The answer is that such filters may have 6 db measurements that are quite narrow, yet their shape factors are much less impressive. For an SP-600, for example, the receiver does indeed have a 200 Hz @ 6 db down filter, but the other parts of that filter are much less impressive: 6 kHz @ 60 db down, shape factor of 30:1. In other words, the filter's effective selectivity is sufficiently wide to pass a phone signal if loud enough. And, this is not at all uncommon of older receivers.

Today, manufacturers are taking a different route. Filters that are narrow at 6 db but have poor shape factors will pass phone signals, yet audio is often impaired and much signal is lost. State of the art technology is pointing towards filters that are wide at 6 db yet have exceptional shape figures. Swan recently marketed a filter which has a bandwidth of 2.7 kHz at 6 db; not really impressive by itself. But, its shape factor was 1.28 to 1!! This allows us to pass enough signal for good voice reproduction and assures us of good rejection of unwanted signals.

There is one other spec we will mention; and that is ultimate rejection. This a measure of how great a difference in strength between the desired and interfering signals the selective device can handle. Even the best filters or receivers have a point where a strong signal will "punch" through and cause QRM, although on most modern receivers such occasions are usually rare.

Implications: These are the main things the reader should remember...

1. That specs of "2 kHz @ 6 db down" is not in itself adequate to tell how selective is a particular receiver.
2. On many receivers, especially older models, the effective selectivity is often broader than the rated selectivity. Thus, the CW position on the selectivity switch may be useable for phone. Of course, it might be too broad for CW!
3. Beware of non-standard measurements, such as measurements of 3, 40, or 50 db. For example, the fabled Q-Box 30 H selectivity was measured and rated at 3 db down. (Ed. note: It might be interesting to know what the 6 db and 60 db measurements for the Q-Box are.)
4. When shopping for new gear, remember the shape factor is the best measurement of adjacent channel QRM rejection. The closer it is to 1:1, the better.

Interested in good DX? Then get interested in skirts and good shapes!

Keep watch for the next and final part of Harry Helm's definitive work on explaining pass bands and filtering. Questions about this series should be direct to Helms at the address provided in August FRENDX at the end of his article.

BROWSING THROUGH L.A.

by Ernst Löhne - Hamburg

L.A., you say? Latin America, that is! I was loaded with hopes and expectations when my plane touched down in San José, Costa Rica. It was not the first visit for me in Costa Rica, and even without radio stations to visit it is still an exciting place to be. All this was several months ago now. I remember it was an 8 hour train ride from the capital to Puerto Limón on the Atlantic coast. Radio Casino is located in Puerto Limón. It was a hot and humid town - so unbearably oppressive that I could not do more than turn immediately around and go back to San José and cooler comfort. Just before I departed though, I chanced to meet a young man who was in amateur radio. So, I asked him the favor of delivering my reception report of Radio Casino to the station in person. He promised to do so, and I had I went back to San Jose for the evening.

every confidence in him. And, so

The next morning I took a plane for the second try. Upon arrival in Puerto Limón around noontime, I went to the station and climbed up the stairs of the rather modern building. Radio Casino is on the second floor. The director was not in at the moment. Siesta time starts early in the tropics, and I can't say I blame anyone for not working on a day like that. Such tropical weather!! I had to wait until about 2 P.M. for the return of the owner. When I stepped into the studios again, I found the director and owner, Sr. Grau in the corner of his office using a soldering iron. I felt a bit out of place with my desire for an on-the-spot walk-in QSL request. Señor Grau was apologetic; "We are in this building for several months now, and we are still working on the facilities." He seemed a bit embarrassed since he simply did not have the time to answer letters. "But, in the meantime we have responded to all our listener's mail," he continued. That included my report as I found out later. The delivery had indeed been made. Nevertheless, I decided to take no chances on non-receipt of a QSL letter, so I typed out some data on their official stationery and asked for his signature. It is the perfect way to get a complete and definitive QSL. Nicht wahr?

Señor Grau showed me two big folders bulging with DX mail from the world around. I was dying to get my hands on those folders!! What a shock! I could not believe the approach used by many of the world's DXers. Sloppy hand writing and demanding phrases gave the impression that many of the listeners abroad considered their reports as great favors to the station. IT WAS DISGUSTING!! Some of the letter, sadly for me, were written in German. The owner could not understand even English. I sincerely think that NASWA DXers are somewhat different. NASWA identification should stand for sophistication in DXing and approach to rapport with broadcasters. A good idea, especially when concerning Latin broadcasters, is to acknowledge the QSL they send you with a thank you note. Latins are like that - they desire to maintain a cordial and continuing relationship. I do understand now why so many stations have not replied at all to many reporters on the first try. In the case of Radio Casino, it has sometimes taken years for them to get their mail.

.....AND, A SHORT SIDE TRIP TO VENEZUELA

by Ernst Löhne

Would you like to have a verie from Radiodifusora Venezuela? It is one of Venezuela's best heard stations abroad. It is right in the center of downtown Caracas, operating from the same building as Radio Libertador. Both stations belong to the same company and both hard to verify. Radio Libertador is in the process of remodelling at present, so don't try them now. They were so busy that it was difficult for me to corral someone long enough to get a walk-in QSL. But, Radiodifusora Venezuela was different. Señor Antonio Cajade, Gerente de Ventas, was a very dynamic man. He called his secretary to type out a nice letter of confirmation for me. He was embarrassed that his station did not have actual QSL cards and asked if someone might design one for them. (Anybody out there willing?) This station may open up on QSLs if they had cards. Listen for their slogan: La estación de la Alegria!

THE AUTEK Q-BOX - Useful or Not?

Submitted by: R.Hill

Maybe and maybe not. Bob Hill was anxious to know whether reports of alterations to the Q-Box would produce any improvement, so he wrote to the man who built the Q-Box. The results?....

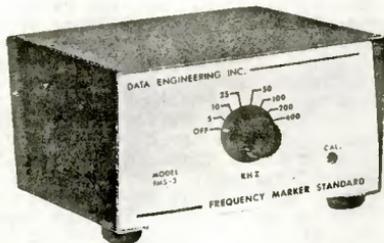

Mr. Bill Onesky of Autek Research in California advised that if Q-Box's capacitors C6, C7, C8 and C10 were tripled in value from .001 mmfd to .003 mmfd - and remaining within the 1% tolerance - the alteration would produce a lower center freq'y response one-third of the original frequency. In addition, the selectivity would narrow to about 10 Hz. This is much too narrow for any practical use. Therefore, using capacitors with less stringent tolerance values of say - 5%, might produce a selectivity of about 50 Hz at the lowered center frequency of 270 Hz. Be sure to parallel two of the capacitors on the bottom leg of the T shown in the Q-Box schematic, i.e. use two .003 capacitors. Use .002 mmfd caps for response of 400 Hz, if you prefer instead of .003 mmfd for 270 Hz. In fact, 400 Hz may be best. Other improvement measures in lowering the center frequency response to mid-voice call for doubling the 2% resistors in the twin T (100K and 200K). The coupling and bypass 1 mfd capacitors might have to be increased to 2 mfd. The only way to tell is to hook up the Q-Box you have altered so far to the receiver and try it. A low-frequency oscillation is the tipoff that the capacitor will be needed. You may also want to increase C5 and C9 (especially C5) by a factor of 2 or more, to match the lowered frequency.

Experimenters should be advised that the claimed narrow selectivity at the center frequency is effective only at strength levels of about 6 dB and below. The louder the signal becomes, the wider the pass band selectivity becomes. Read Harry Helm's definitive work on this subject in last month's FRENEX and also this issue.

CRYSTAL CALIBRATORS
ARE ESSENTIAL!!

Recent surveys taken among NASWA club members who do not own one of the direct frequency dial receivers indicates that about half still do not use any means of determining exact frequencies and depend largely on announcements by the station. One reason is that calibrators are not understood. Also, the market has not had many of these units to offer at reasonable prices. Heathkit was the last source of a reasonably price calibrator, but even it was limited to marks only at every 100 kHz. Here is good news!

MFJ Enterprises, P.O. Box 494, Mississippi State, MS 39762 offers a wired and tested crystal calibrator, complete with crystal, which will produce markers every 25, 50 and 100 KHz and is operated by any DC source of 6 to 16 volts. It is a small 2x2 in. unit which will mount easily inside most any receiver. Purchaser would have to provide his own cabinet if he desired to have it a separate external unit instead of installed in his receiver. Cost: \$15.95, plus 55c handling for airmail or first class.

Another company, Data Signal, Inc., 2212 Palmyra Road, Albany, GA 31701 also manufactures a finished product in cabinet. Cost is \$34 for the finished product, or \$30 in kit form. It works on batteries, self contained. Illustrated above, the FMS-3 gives marks each 5, 10, 25, 50, 100, 200, and 400 kHz. It is a simple matter to switch on a 400 kHz marker and identify a certain spot on any receiver, and then to choose another lower marker and count marks to the station needing identification. Installation of calibrators requires no more than hand tools and no electronics.

There are many other manufacturers of frequency standards, but these two were chosen because of their flexibility in providing several marker choices and lower price than many others. Crystal calibrators lend themselves quite well to military surplus receivers and other short wave receivers have at least some bandspread. Most portable radios are not well suited for such calibrators because of severe mismatching problems and false marker images being generated which can confuse on the portable's crowded tuning dial.

ABC NEWS PERSPECTIVE: Radio Free Europe
Submitted by Ernie Behr - Winnipeg

by Russell Jones
ABC News, in
his 30 March
report from
Moscow.

(Edited for FRENDX)

Europeans who are old enough can still remember the days of the Nazi occupation when millions of people would hold their ears close to their radio receivers to hear broadcasts from London. The identifying signal used by the British Broadcasting Corporation was a bom-bom-bom-----bomm, from Beethoven's Fifth Symphony and the Morse code for the letter V, meaning of course, V for victory. The nazis understandably took a dim view of those broadcasts and savagely punished anyone they could catch listening to them. But, the broadcasts did get through and contributed greatly to the morale of the occupied peoples and to the ultimate victory of the allied powers. BBC rarely uses that signal nowadays, but its external services, by which it means programs aimed at foreign audiences, are still widely listened to and trusted by people throughout the world. But, now the new labor government of Britain says too much money is being spent and wants to cut the budget of BBC's external services department. The government says its reasons are strictly financial, but the move puts it in the same camp with Senator J. William Fulbright who has been trying to eliminate American broadcasts to east Europe because he says they are a relic of the cold war. Fulbright's targets are Radio Free Europe and Radio Liberty which are autonomous, American-funded operations based in West Germany, but the same arguments can be applied as well to the Voice of America, which is a U.S. government operation. Fulbright argues that broadcasts to the communist countries are a waste of money, an interference in the internal affairs of other nations likely to exacerbate relations. But I think one should ask firstly if the senator's charges are true, and secondly if they are relevant. To try to get the answers, let's look at the figures for foreign language broadcasts both in the communist bloc and in the west.

The Soviet Union and its satellites in east Europe transmit somewhere between 13 and 14 hundred hours of programming each week to western Europe and North America. In contrast, or in response if you like, western programs aimed at Russia and east Europe total only something over 800 hours. These figures are for transmitters which one side or the other at least admits are on its territory, that is the state radios of the east bloc on one and, and BBC, VOA, Radio Liberty, Radio Free Europe, and West Germany's Deutsche Welle on the other. The figures do not apply to a number of clandestine or black transmitters operated by the communists and aimed at a variety of targets. For example, Radio Free Portugal and Radio Independent Spain are thought to be based in Romania, two stations calling for revolt in Greece transmit in East Germany, something call Radio Peace and Progree claims no nationality but is believed run by the KGB, the Soviet secret police. All in all, the comunists broadcast well over twice the number of program hours transmitted by Western stations. So, if foreign language broadcasts are an interference in the target country's internal affairs as Senator Fulbright says, it seems evident we are more sinned against than sinning.

Not that I think we should complain about communist radio stations, let alone resort to the communist trick of jamming. Some communist programs are genuinely entertaining, some unintentionally humorous, some just boring, but I can't imagine anyone silly enough to believe they present a danger to the western way of life. In fact, I'm not sure I've ever met more than a handful of people other than those professionally interested in what the communist thinking may be on a given situation, who have ever listened to a broadcast from the Soviet Union or another communist country. One reason is that worse things are said about capitalism and western governments by the media in the countries involved than even the wildest communist propoganda can dream up. The best or the worst that Radio Moscow can usually produce is a quotation picked up from a western newspaper or broadcast. As for jamming, the estimates are that the Soviets and their satellites spent about 250 million dollars building some 3000 jamming stations scattered around eastern Europe, and that each year they spend about 100 million dollars operating them. That annual figure, which incidentally is more than the Kremlin spends on its own domestic radio service, may be too high at the moment because jamming has become selective, with only RFE and Radio Liberty getting the full treatment. But all the jammers are still in place, ready to try to blot out BBC, VOA and the Deutsche Welle at any time the Soviet policy makers decide its appropriate.

(Cont'd next month - Why Soviets feel it necessary to jam western radio)

North American Short Wave Association

CHANGES During the DX season we are always squeezed for space, due to the large increase in loggings reported. In addition, the FLASHSHEET, appearing in FRENEX, has in many respects not been mailed to the members as quickly as we would like to get it mailed because of the delays involved at times in getting FRENEX put together and mailed....

In order to solve both of these problems, and to provide further advantages, the FLASHSHEET will no longer appear in FRENEX. Instead, FLASHSHEET will be a twice monthly publication separate from FRENEX. AL NIBLACK continues as editor of the FLASHSHEET (and we will have note to this effect in each FRENEX), with deadlines the 10th and 25th. This means a twice monthly mailing of the FLASHSHEET to those who subscribe to it. The turn-around time on the FLASHSHEET should be minimized considerably, so that, via the FLASHSHEET, NASWA members can get DX news flashed to them in a minimum of time.

COST of the FLASHSHEET will, henceforth, be US\$4 per year in NA. This is for 24 issues a year; i.e., the same rate as at present, but twice as many issues, therefore twice the current cost. Orders for the FLASHSHEET should continue to be sent to the HDQ address, NASWA, BOX 8452, South Charleston, WV 25303 USA. Dan Ferguson will continue to handle the mailing list, Al Niblack will continue to edit FS. Overseas US\$5, airmail US\$8.

In addition to the FLASHSHEET material, from time to time we will be including some additional material in the FLASHSHEET envelopes of contributors to the various sections of FRENEX and the FLASHSHEET. These will be such things as mini-surveys, etc., which will cost additional nominal amounts from non-contributors, if they desire to receive them. Such will always be announced in FRENEX.

We trust DXers will find this new expansion of SWBC DX coverage to be to their liking.

ANOTHER CHANGE As noted in the Log Report this month, reports to LR should henceforth be sent direct to the three Log Report Editors, Dan Ferguson, Mac Leonhardt, and Jerry Lineback. Deadline is the 15th now.

***** Until further notice, reports for the QSL REPORT should be sent to HDQ. We also need (very much need!!!) illustration for QSL REPORT, and other portions of FRENEX. These, also, should be sent to HDQ, thanks.

THE 1974 ANARC CONVENTION

The annual convention of the Association of North American Radio Clubs was conducted this year on the weekend of July 5th, 6th and 7th, at Concordia College in Bronxville, New York. This, ANARC's ninth yearly conference, drew thirty-six enthusiasts from eleven states and provinces across the continent. Though this was not a record turnout for an ANARC convention, those attending seemed to enjoy the program and the intimacy afforded the group by a college campus.

Things formally got underway at 8:00 pm, Friday, July 5th, with a reception for the convention attendees. Shortly after dinner at Concordia that evening, Woody Seymour, Jr., and Marc Champagne opened the program with a brief review of the interclub Handicapped Aid Program and its Canadian chapter. Perry Ferrell of Gilfer Associates followed with an absorbing discussion and exchange with the audience on receiver circuit design and innovations on the SWL market. The meeting room remained open for a receiver display that included the prototype of a Kencraft receiver which was brought by Perry Ferrell.

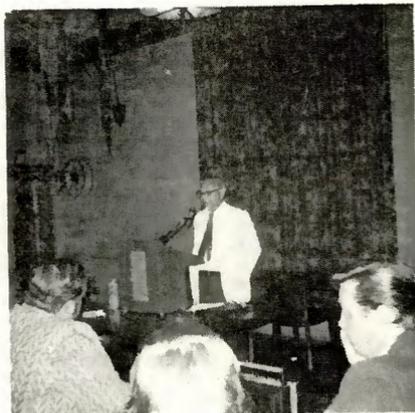

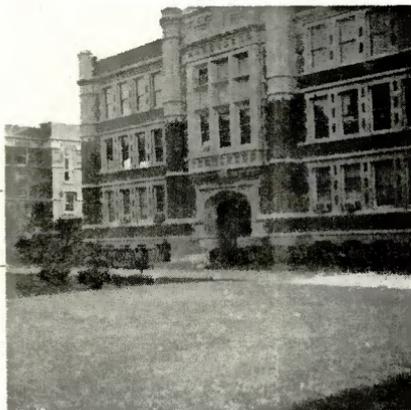

Saturday proved to be the most active day of the convention. After rousing for breakfast and drawings for door prizes, E. J. "Jim" Whitehead was first on the agenda, examining Latin American Radio and analyzing the sport of Latin DXing. Paul Mayo found himself next at the podium, outlining the ways and means of DXing utility stations. Thomas R. Sundstrom then presented a detailed history of Dr. Carl McIntire's Radio Free America. After a retreat for lunch, Steven P. d'Adolf of ANARC's Public Relations Committee discussed the organization ANARC-- its directions. We were then also very honored to have Dr. David Meisel making the complex, interacting elements of propagation understandable. After absorbing this quantity of information, all took respite and absorbed a quantity of refreshments served before the banquet. The traditional announcement of ANARC's Man of the Year was made. A. R. "Al" Niblack of Vincennes, Indiana, was the recipient for his many years of service to individuals and to numerous clubs. A banquet address by Mr. Josef C. Nichols, Chief of International and Satellite Communications for the

United Nations, highlighted the evening. Mr. Nichols examined some of the developments in international electronic communications that affect the intricate problems of developing international community, and conducted an exchange on the subject with the audience. He commented that SWLs, as international listeners, are in most intimate contact with this concern.

Sunday's schedule was light as many prepared for the long hauls home. A short film clip from Radio Australia woke the drowsy after breakfast for reports from ANARC's Frequency Recommendation and QSL Committees. Informal talks and taped greeting from DXers overseas preceded lunch, the final item on the agenda. Most of those remaining went their separate ways toward 3 pm, having struck up new friendships and renewed old acquaintances.

Thanks are due the host institutions Concordia College's administration and food services, and most importantly to the many fine speakers and those who attended for making the convention a success and the tradition of an annual convention an asset to ANARC.

ANARC Convention photos(clockwise): Concordia College; Dr. David Meisel speaks on propagation; Mr. Josef Nichols' banquet address; Mr. Nichols' audience. Thanks to photographer Woody Seymour, Jr., of Sanford, North Carolina.

THE CYPRUS CRISIS 1974

by

Alan Thompson

Copyright 1974, BADX
Copyright 1974, BBC MS

GREECE: From the commencement of the developments in Cyprus on 15 July, the Greek national radio maintained a normal pattern in both its Home and External Services. However, from 20 July, parts of the External Services joined the national domestic service at times and the shortwave relay of the domestic service on 9710 kHz continued to operate from 1100-1430. On the night of 23-24 July, the National Programme of EIRT continued on the air after its normal 2300 close-down.

Alan noted two diesel-type jammers heavily jamming the Ankara SW channel on 20 July, early in the Cypriot crisis.

TURKEY: In contrast to EIRT, Radio Ankara swiftly moved to a "war footing". During the night of 15/16 July, Radio Ankara remained on the air (on SW and LW) with all stations carrying a common programme. At 0900 on 16 July, it announced that 9515 kHz would stay linked with the HS, while 11880 kHz would carry a special service in Greek, including news broadcasts. From 16-25 July, the pattern was that 9515 relayed the HS from 0255-2150, while 11880 carried Greek programmes from 0900 until the scheduled foreign language service started at 1430, although on 18 July it was announced that the Greek transmission would continue through to 2100. The announced pattern for 11880 was soon amended: on 20 and 21 July, it was noted in English, Greek and Arabic as early as 0530 and later with Bulgarian and Serbo-Croat. On 22 July, 11880 was heard with a night broadcast in English for Cyprus from 2200-0500, followed by bulletins in English, Greek, Bulgarian, Serbo-Croat and Turkish, and after several hours it was established that the pattern of the news broadcasts was: Greek on the hour; Serbo-Croat at H+15; English at H+35; Bulgarian at H+45; and this continued until 1430, when the scheduled foreign language service was resumed. After 1600 the foregoing sequence of bulletins was resumed and continued until 2200. Meanwhile, a new frequency of 9748 kHz was noted in parallel with 11880 from as early as 0930 until 2400 from 22 July and this new channel continued in use until the end of the day's transmission on 26 July.

On 25 July, Radio Ankara announced in its Turkish Service that normal broadcasting would be resumed. Thereafter (to 1 August), 9515 relayed the Turkish HS 0255-0900 and then carried the "Voice of Turkey" (in Turkish for Turks abroad) from 0900-2000 s/off with a "Special Cyprus Programme" at 1945. The service on 11880 and 9748, however, still included news broadcasts in English, Greek and Turkish during the period 1630-2100 until 26 July. From 27 July, 11880 resumed its scheduled broadcasts 0500-2230.

CYPRUS: During the latter part of 15 July and until 1000 on 16 July, the Paphos station of the CBC (on 917 kHz) left the normal CBC network and carried pro-Makarios broadcasts announcing itself, at times, as "Free Radio Cyprus". It rejoined the Nicosia HS during the afternoon of 16 July. On the nights of 28/29 and 29/30 July, CBC stayed on the air broadcasting a programme of continuous music without announcements until 0400, when normal programs were resumed. At 1 August, all CBC transmitters were carrying a common programme in Greek, Turkish and English, 0400-2205, instead of the regular arrangement of a main Greek programme and a 2nd programme in Turkish and English. The combined service is being aired on 692 and 602 kHz (Nicosia), 1484 kHz (Limassol), Paphos on 917 kHz and VHF outlets at Troodos and Kantara.

OTHER TRANSMISSIONS: Radio Prague began a daily transmission in Greek to Cyprus on 19 July from 1830-1900 and, on 23 July, followed this with a further transmission at 0530-0550. The aim of these broadcasts was said to be to provide world news and "objective information on developments in Cyprus". The pro-Communist Clandestine radio station "Voice

of Truth" announced on 18 July that "it has been made known that a clandestine radio station called the 'Free Voice of Cyprus' ('Elevtheri Foni tis Kiprou') is operating in Cyprus. It is transmitting on 6663 kHz at 0500, 0800, 1130 and 1530."

BBC MS reported later that "Voice of Free Cyprus" ("I Foni tis Elevthersis Kiprou") was traced on 19th July on 6662 kHz from 1130-1200 and 1530-1600. However, station announcements indicated that from 20 July the transmissions would be 1300-1330 and 2000-2030, and from 5 August 1500-1530 and 2000-2030. Program material was described as "mainly pro-Makarios".

A fine job, Alan and the BBC MS crew! Although nothing firm has appeared concerning the site of the new clandestine on 6662 kHz, it seems certain it is not in Cyprus, as alleged by "Voice of Truth". The BBC MS points out that the fq is the same as that of the "Voice of Palestine" tx believed to be located in Syria.

MORE ON CYPRUS...

by
Fred Stockheim, Engineer
IBA, Jerusalem

Many of you surely noticed that the initial news dispatches from Cyprus were datelined "Jerusalem". Nothing else. And just before that, at least one major news organization was calling SW buffs to try and get ham contact to their people in Cyprus, as communications were cut off altogether.

Fred Stockheim, located at the dateline QTH, fills us in on the details, beginning with how the news that Archbishop Makarios was alive was relayed to the world -- much of which thought him dead, a victim of the early fighting.

"It seems that the Cyprus monitoring you mention was done by one Michael Gordus, who acts as IBA's Radio News Monitor. The Paphos transmitter which broadcast the Makarios messages is normally (and again) part of the official Cyprus network, a 2 kw tx on 917 kHz. At the time, it was still under Makarios' control, so they just hooked up some improvised audio equipment to the tx. Neither Michael nor myself have heard of "Voice of Paphos Veterans" (a pro-Turkish clandestine -- Ed.).

"You are probably aware of another interesting fact, i.e. that, for a few days after the invasion, the only link from Cyprus was a lone telephone line to Jerusalem, obtained by direct dialing. Many correspondents used this to record their reports at IBA's radio studios, which relayed them on to broadcasters and the press all over the world.

"News reports a couple of weeks or so ago had it that Abie Nathan's Peace Ship ("Voice of Peace", a MW clandestine radio ship -- Ed.) is on its way back to this area from Marseilles to resume broadcasting, both to Cyprus and to Israel/Arabs."

Information from French DXer Bernard Cheral tends to confirm the "Voice of Peace" news items, which contradict earlier items in the DX press suggesting the ship had been sold and was no longer to broadcast.

YET MORE

The New York Times and other news sources quickly learned the value of clandestine radio in digging up information in confused situations. Radio Bayrak appeared in a NYT story datelined Ankara on July 22, and many other reports have, without naming the station, done the same since. It appears the smaller pro-Turkish clandestines, plus the "Voice of Cyprus", actually believed to be located at Anamur, Turkey, were either not heard or correspondents were unaware of their existence (cf., for example, above).

Whether they even exist now is open to question, but before the recent events they were as follows (times omitted, since these surely mean little now):

- "Radio Bayrak", referred to in news reports as the "official Turkish Cypriot radio", 1095 and 1473 kHz, power unknown, location Nicosia, Cyprus, and directed by Mr. Suha.
- "Voice of Cyprus", actually not located in Cyprus, but at Anamur, Turkey, with a power of 5 kw on 674 kHz.
- "Canbulat Radio", Famagusta, Cyprus, 1372v kHz, likely 500 watts or so.
- "Sancak Radio", Lefka, Cyprus, 1275v kHz, likely 500 watts or so.
- "Voice of Paphos Veterans", Paphos, Cyprus, 1522 kHz, likely around 500 watts.
- "Voice of the Falcon", Larnaca, Cyprus, 1200v kHz, also around 500 watts.

The old standby, "Voice of Truth", is found, as always, as follows, in Greek:

0430-0505	7335	1000-1040	9776	1830-1900	9776
0510-0545	9776	1120-1200	7335	1930-2000	7335
0700-0725	7335	1205-1245	9776	2030-2115*	7335
0730-0755	9776	1600-1630	7335		
0920-0955	7335	1710-1735	9776		

*Prepared especially for seamen.

"Voice of Truth" ("Radiofonikos Stathmos i Foni tis Alithias") transmits via facilities in Konigs Wusterhausen, according to deduction by the BBC MS.

The Turkish-language equivalent of "Voice of Truth" is "Our Radio" ("Bizim Radyo"), transmitted via Cluj, Romania ("Program 1") and Schwerin, East Germany ("Program 2").

Program 1:

0600-0650	9584	1740-1810	9584
0810-0840*	6200	1910-1925	9584
1050-1115	9584	2005-2020	6200
1640-1705	9584	2120-2145	6200

Program 2:

0600-0630	9500v	1740-1810	5915**
1015-1045	9500v	2005-2030	5915
1445-1515	9500v	2030-2100	5915

*Sun only **Announced, not traced in Bulgaria

Additional pro-Communist clandestine broadcasts of these Turkish and Greek operations are heard via Magdeburg, East Germany, beamed to foreign workers in West Germany. The Greek station -- "Voice of Greek Democrats Abroad" -- is heard 2030-2100 Tuesday on 906, while the Turkish program -- "Voice of Turkish Communist Party" -- is heard on Thursdays.

A small item in The New York Times, spotted by newswatcher Myron Reamy, indicated that, on July 15, two Americans had been wounded in the fighting in Cyprus, one of them a Mrs. Thomas E. Price, apparently the wife of Mr. Price, described as being "assigned to a State Department regional communications station outside the capital." The other person wounded was the daughter of David Sutton, also affiliated with that facility.

The FBIS, the official US monitoring agency and our counterpart to the BBC MS, has maintained a monitoring site in Cyprus for over a decade, and it is presumably still in operation. Although the FBIS is not part of State (it's always been part of the CIA), it seems possible that Messrs. Price and Sutton may be affiliated with the FBIS effort.

But that brings to mind that the island is not just a battleground, but also a site for several foreign radio organizations.

The BBC's East Mediterranean Relay site is there, as is the British Forces Broadcasting Service. The British and Americans are both believed to monitor radio stations from there. And Radio Monte Carlo has a superpower MW station there.

So far, it seems as though none of the Turkish or Greek forces have seen fit to try and do battle with the British forces and attempt to capture the BBC relay site. But who is protecting the radio of Monaco? Eventually, it would seem as though, through military or legal action, some of these facilities could revert to the Turkish authorities, thence to form some sort of powerful overseas Cypriot radio.

ANTARCTIC STATION RAISES LEGAL POINT

Editor Ed Shaw has learned that the present commander of the McMurdo base where the new DXers delight on 6012 kHz is located "is now opposed to QSLing because of possible sensitivities to transmitting from an international zone." (Via Numero Uno)

Indeed, the question of whether the U.S. so transmits or ever transmitted in the past was central to the Radio Free America defense when it raised the "clean hands" doctrine late last year...

OMAN LIBERATION FRONT QSL's

Johann Wiespointner of Austria received this January a most unusual letter QSL in Arabic from The People's Front for the Liberation of Oman and the Arabian Gulf, which operates what is now called "Voice of Oman (music), the Voice of Omani Revolution". The verification states, "We confirm that the station you have received is the station of People's Democratic Republic of Yemen." Whether this suggests the transmitter site is actually there is hard to say; the frequency verified was 6478 kHz.

The address for QSL's is: "Popular Front for the Liberation of Oman", Maktari Building, Madram Street, P.O. Box No. 5037, Maalla, Aden. Cable NHIEZ. Good luck; the schedule is 1445-1615 on 6478 kHz (site unknown); plus 1615-1700 on 11770 kHz via Aden Radio.

(Preceding thanks to Editor Carol Feil, Danish Shortwave Clubs International).

ASIAN REPORT

by
Isao Ugusa, Japan

A new Korean station -- apparently from North Korea -- giving no ID has appeared since very early August on 4490 kHz with variable s/off and s/on, viz. 1200v-1335v, give or take 20 minutes. The s/on is with a chorus repeated twice, and s/off with a chorus. It starts off, "Good evening, comrades. From now, we begin today's broadcast for August XXth." The programming praises "Kim Ilsun Wonsu" ("General Kim Il Sung").

The new s/off time for the Laotian "Voice of Peaceful Laos" on 7384 kHz is 1400 (ex-1500).

Radio Khana Pathet Lao, brought to our attention by Victor Goonilleke some time back, has been inactive since this February. It formerly broadcast on 5012 kHz.

Finally, Radio Pyongyang still relays the "Voice of the Revolutionary Party for Reunification" at 1030-1100 on 3320, 6400, 800 and other MW, but not 6250.

QSL Report

NOTE: UNTIL FURTHER NOTICE
SEND REPORTS FOR QSL
REPORT TO THE HDQ
ADDRESS - USE SEPARATE
SHEET OF PAPER, PLEASE.

NASWA, BOX 8452, South
Charleston, WV 25303 USA.

Editor: Larry Yamron, Boston, Mass. U.S.A.

ANOTHER RESIGNATION?

For over a year your editor has had the pleasure of serving you, the Dx'er, and SWL. Unfortunately, I'll be moving my QTH and time won't permit me to continue as Editor. I would especially like to thank all those who have supported QSL REPORT and given me encouragement thru the year. QSL REPORT wouldn't have been successful without your help and support.

As of this time, I don't know who the new editor will be. Send all further reports to the address above.

Note re Qsls from PAPUA/ NEW GUINEA

According to the NBC at Port Moresby, new style QSL cards are now being printed, and will be available soon. All reports are CHECKED for authenticity, and station has a large backlog of reception reports to process. Until new cards are available, prepared QSL cards will facilitate a rapid reply for correct reports. Mint stamps would also assist station. This applies for NBC National Network outlets. The District Network stations are still using the old style folder QSL cards, and personal letters are also being issued. It is assumed that the folder will be replaced in due course. Australian Broadcasting Commission assistance personal were phased out of radio operations at the end of May. The NBC is a completely new organization, having taken over the facilities of "Admin. Brod. Svc." and "ABC". (via Bob Padula, Australia)

NEW STATION ADDRESSES: Reunion Is: ORTF St. Denis., B.P. 309, 97-4, St. Denis de la Reunion. (via Robert Hanner)

Radio Rabaul, P.O. Box 393, Rabaul, East New Britian Dist.
Papua/ New Guinea.

Proper address for reception reports for R. Universitaria:
Radio Universidad de Costa Rica, Ciudad Universitaria, "Rodrigo Pacio" Costa Rica.

QSLs RECEIVED SEPTEMBER

Many excellent veries received this month! Dx ace Scott Reeves verified the rare African, Radio CORDAC. Scott also received QSLs from Radio Carve, Uruguay. Fine catches Scott!..Ed. Gerry Dexter heard from Radio Mbujmayi, Zaire and from Radio Ariel, Uruguay. Mighty fine!..Ed. Many interesting QSLs in from Latin America, and Papua/ New Guinea. Jeff Bowsby received a QSL from Sudan! Other fine catches this month include, Reunion, Azad Kashmir, Somali Brod. Svc., and Radiff. Padilla, Bolivia.

AFGHANISTAN: Radio Afghanistan, 4775, full data card in 3 months air, mint stamps. (Bowsby)

ANGOLA: A Voz de Angola, 9660, Luanda, nice colored card shows view of waterfall, 4 weeks air for EE report w/2 IRCs. This freq. very rare here due to ABC. (Padula) 6175, view card in 3 weeks for EE report and 1 IRC. (Hanner)

ASIATIC S.S.R: Moscow via Komsmak-on-Amur, full data card in 23 days air for R. Moscow report form. (Mayer)

AUSTRIA: ORF, 9770, card w/all data and sked. 23 days air for IRC. (Wilson) 15200, photo card w/full data in 1 month air. (Lobdell) 15200, card in 19 days air, 2 IRCs. (Brunner) 9770; cards in 1 month for several reports w/ORF report forms, no rp. (Brooker)

AUSTRALIA: Radio Australia, 9580, flower series card, program guide and sked. 15 weeks, no rp. (Brooker) 17795, card and sked in 24 days, 1 IRC. (Davidson) 15160, Wildflower series card w/all data in 3 months sea, no rp. (Lobdell)

ABC-Perth, 9610, blue ABC map card in 13 days for 3 IRCs. (Brooker)

AZAD KASHMIR: Azad Kashmir Radio, 3977, urdu letter from V/S. M. Sajjad Ali Siddiqui. Thanks and confirms report w/all details. 3 months for EE report and 3 IRCs. (Hanner)

BOLIVIA: Radiodifusora Padilla V. 3495, letter, air from V/S. Alberto Monterde Montellano, Alcalde Municipal de Padilla, Director and Dibb Israel Lattuff, Oficial Mayor y Administrador de la Radio. (Dexter)

BRAZIL: Radio Gazeta de Algoas, 3315, letter, pamphlet on city & station, 2 weeks after f/up. V/S. Ebenezer Nascimento. (Dexter)

R. Nacional de Brasilia, 15445, card and pennant in 3 1/2 months for mint stamps.

Radio Poti, personal PP letter from V/S. Ruy de Almeida e Silva (Brown) who requests pen pals, also EE verie letter w/decals in 17 days air for PP report and mint stamps. (Reeves)

Radio Rio Mar, cordial PP letter from V/S. Dom Joao Souza Limo, Dir. General, who notes my report is 'rigorosamente correctos'. 21 days for PP report, 2 IRCs. (Reeves)

Radio Tupi de Sao Paulo, 15155, PP verie letter, post card and Brazilian stamps, 3 weeks air for PP report and mint stamps. (Bowlby)

BRUNEI: Radio Brunei, 7215, yellow map card in 30 days air for 2 IRCs and EE report. Also sent post card of station. (Hardester)

BURMA: BBS, 5040, plain white card w/all data in 42 days air for EE report and 2 IRCs. (Hardester)

BURUNDI: Radio CORDAC, 4900, full data card notes "Not many QSLs from States, Congratulations". 1 month for 3 IRCs and EE report. (Reeves)

CAMEROON: Radio Buea, 3970. full data card in 22 days air for 2 IRCs and EE report, direct. 8 kw. (Reeves)

SCOREBOARD

This report is published quarterly in March, June, September and December. SPOTLIGHT this month is on South America, and will fall on North America in December. We have gone to a new and self-explanatory set of abbreviations in the headings this month. This should certainly be less confusing than the old system. C/H=countries heard, C/V=countries verified, S/H=stations heard and S/V=stations verified. I'll be glad to hear comments from contributors, and if the response is negative we can always go back to the previous system. Please update your totals at least semi-annually to keep your name on the list. NASWA has over 700 members at present, yet the simple five minute task of sending totals to this editor has been accomplished by only 10% of you. Let's make SCOREBOARD truly representative. Don't sit back and look at the others just because your totals aren't impressive--- you'll enjoy watching your name move up the ladder with each new update.

Apartment 21
Richmond, VA 23225

Deadline: 15th

* ISRAEL The IBA has its main studios in Jerusalem and administrative offices out in the suburb of Romema. The complex includes several 300 KW transmitters, however, these are connected to antennas with incomplete sloping devices. The IBA is also plagued with top heavy bureaucracy, strict censorship, labor unrest, and a reduced budget. The IBA frequently changes frequencies some of which they announce, some of which they do not announce. They just recently changed from Standard Time to Daylight Savings Time thus moving their programming up one hour. Currently, the best bet for hearing them is on 12025 KHz at 1900 hrs GMT for a forty minute program in English. Also tune 15490. This frequency is not announced but 15405 is. Nothing was heard on 15405. Other announced frequencies are 15100 - covered by QRM; 11700 - covered by QRM; 10250 announced but 10245 measured, very weak. Also announced are 9815, 9495, 7395, and 9009, the last beamed to South Africa. Other English programs are a fifteen minute newscast rebroadcast from the National Svc which may or may not be weakly audible on 9009 at 0400. Early in the morning, there is a half hour broadcast sometimes including commercials on 15135, which is now aired at 1030 GMT. This signal is rarely heard.
(George, many thanks for this frank and revealing Spotlight - ed.
George Schnabel, NY)

* SWAZILAND Temperate and subtropical southern Africa houses Swaziland. Here, livestock is the mainstay of the economy while coal, asbestos, iron, and timber are exported. As an aside, it might be noted that much of the iron goes to Japan. English is the official language here but Bantu dialects are spoken too by the Swazi tribes. Swazi Music Radio is presently the only shortwave station on the air from this country but soon, the TWR station should be going into operation (see elsewhere in LN for more info on TWR-Swaziland). WRTH tells us that the studios of SMR are in Johannesburg, South-Africa(1) but the transmitters are in Mbabane - the capital city of Swaziland. Also reports are to be sent to Mbabane. SMR is a commercial service featuring rock and roll music and, of course, commercials; similar to the South-African or Mozambique commercial svc's. Reception in NA is rather limited. SMR broadcasts on 6155 KHz. Does that freq sound familiar? Yep, that's right - that is where Vienna, Austria, and DW like to hang out and blast away. It is possible to hear SMR tho in NA. Wait until favorable conditions from Africa prevail. Then, signals from the European stations are usually attenuated, or much weaker than normal. At this time, SMR may possibly override the European stations and be heard in NA. Good copy has been reported fm SMR during such conditions, both on ECNA and WCNA; and in the areas in between. Listen around 0400 til well into the early morning hours - local time. Again, the freq is 6155. It might be mentioned too that there was a rumor going around a year or two ago that SMR would possibly use 3232. It might pay to check this freq out too from time to time.

* COMORO ISLANDS Located between Mozambique on mainland Africa and the island nation of the Malagasy Republic are the Comoro Islands. The Comoro's lay about mid way between these two land marks on your globe, in the Indian-Ocean. The French speaking people on these mountainous islands raise spices, and to an extent raise some cattle too. There is a station at Moroni operated by the ORTF which provides shortwave radio coverage for the islands composing the Comoro chain, and also for her neighbors. Listeners in NA have been able to tune 7260 KHz to collect bits and pieces of the transmissions from Moroni. The going on 7260 has traditionally been tough. ORTF-C often signs on at 0330 after their interval signal and the French national anthem, LM. Comorian is scheduled from 0330-0400; then French fm 0400-0430 sign off. Some recent reports indicate that ORTF-C has extended its sked for a few hours past the 0430 listed sign off - but this info is purely hear-say, and is yet to be confirmed. When tuning for ORTF-C, the overriding station you will hear will probably be the BBC which has French also around 0330+. They (the BBC) also has German at 0530A. To complicatr things some more, Moscow also likes to use 7260 around this general time period. Furthermore, watch out for the East German Stimme der DDR regional station operating here in German around 0400 also. ORTF-C uses the additional outlet of 3331 KHz. There has been a tentative logging of them on this 90 meter freq in August. Whenever you get traces of the other ORTF station in Reunion on 2446 KHz; it just might be a good idea to give 3331 a whirl and hope for the Comoro's.

ARGENTINA Tentatively hrd R Provincia de Santa Cruz on 6075 w/vy wk sigs around 1154, but can find no info on it. Can anyone help?? (C. Wootten, MD)

BANGLADESH English in the External Service from Decca is as follows:

0445-0515 to ME, India, Pakistan on 17695, 15455
 1230-1300 Europe 15520 (by permission, BBCMS)
 1815-1900 Europe 11635, 9550
 1900-1915 Europe 11635, 9550

BRAZIL R Nacional de Brasilia dropped back to their old freq of 15445 for some unkn reason and is suffering heavy QRM fm VOA, Moscow, and WYFR.
 (Charlie Wootten, MD)

CENTRAL AFRICAN REPUBLIC Central African Television Broadcasting, P.O. - Box 940, Bangui, C.A.R., b/c fm 0430-2300 on 5035 and 7220. The language used is Sango-French.
 (Ken Earhart, PA)

CHILE The Voice of Chile broadcasts on 6190, 9510, 15150 fm 2030-0500; 0900-1200. They air seven different languages for 20 min's each as follows:

Arabic	2030-2050	2250-2310	0110-0130	0330-0350	0900-0920
Russian	2050-2110	2310-2330	0130-0150	0350-0410	0920-0940
German	2110-2130	2330-2350	0150-0210	0410-0430	0940-1000
Italian	2130-2150	2350-0010	0210-0230	0430-0450	1000-1020
French	2150-2210	0010-0030	0230-0250	0450-0510	1020-1040
English	2210-2230	0030-0050	0250-0310		1040-1100
Spanish	2230-2250	0050-0110	0310-0330		1100-1120

(by way of Ken Earhart, PA)

CLANDESTINE The Free Voice of Cyprus (Elevtheri Foni tis Kiprou) is operating in Cyprus. It is using 6663 at 0500, 0800, 1130, and 1530.
 (by permission, BBCMS obtained by monitoring V.of Truth)

DOMINICAN REPUBLIC Radio Clarin: Fm Monday to Friday at 0030, R Clarin b/c's a pgm entitled, "Clarín International" where reception reports from all over the world are read over the air! There was no indication of the language, but probably Spanish. Clarin uses 4850 and 11700.
 (by way of Don King, PA and Mike Peraaho, MN)

FRANCE ORTF replies to a question about its proposed reorganization: "Thank you for your interest. The French Radio & TV Svc will be completely reorganized within the next 6 months. I regret that I can not tell you at this time what direction this will take. We also, are waiting for news!!" The date of this info was 7/6/74. (interesting Chuck...Chuck Gooden, MN)

INDONESIA The Indonesian New Agency (Antara) has quoted the Minister of - Information as saying that RRI has 47 b/c'ing stations using 127 xmtr's. The poor condition of these xmtr's has reduced their power output. It was also ancd' on July 15 by the Minister of Info that Radio Republik - Indonesia and Televisi Republik Indonesia would merge into a single public corporation, it was hoped, next year. (by permission, BBCMS)

IRAN The Home Svc from Tehran, Radio Iran, b/c's fm 0200-0935 on 17735, 15084, 9050,7065. (Steve d'Adolf, ND; and by permission, BBCMS)

MALAWI The address of the Malawi B/c'ing Svc is P.O. Box 30133, Chichiri, Blangyre 3, Malawi. They b/c fm Blantyre on 7100 (the alternative freq) fm 0600-1710, on 5995 fm 0600-1615, and 3380 fm 0257-1110, 1300-2210. (Ken Earhart, PA; and by permission, BBCMS)

MOZAMBIQUE RC de Mocambique is now under "military administration" due to reports that RCM provided false information about recent Portuguese political events. (World Wide DX Club via Charlie Wootten, ND)

PANAMA * * * According to Ben Cummings, while making a guest appearance on HCJB's DX Party Line, there may be a SWBC station operating in a year or so from Panama. The xmtr is a 10 KW job, and is being reconditioned for use in the tropical bands, although the situation is not definate yet. Welp, let's keep our fingers crossed gang-ed. (Mike Ross, NY)

PHILIPPINES An Indian DX'er in Siliguri, India, rpt'ed that a new station called Radio Voice Manila, DGU6, was hrd at 1200 on 9770 in EE; and gave the address as Radio Voice, DGU6, P.B. 4148, Manila, Philippines.does anyone have any info on this one? - ed. (Charlie Wootten, MD)

SIERRA LEONE SCDX Bulletin No 1284 rpt'd a letter received by an Australian DX'er fm SLBC that said..."a 250KW xmtr may soon be in operation. The reserved freqs are 3316, 5980, 9630, but the use of them will be decided after tests." Testing should already be in progress by the time you read this. (by way of DX'er Charlie Wootten, MD)

SWITZERLAND The Red Cross Broadcasting Svc will b/c on SEPT 16,18,20; and in NOV 18,20,22 - fm 0600-0700, 1130-1230, 1700-1800, 2300-2400. The freq to be used is 9600. (Richard Schwartz, DE)

SWITZERLAND The Swiss B/c'ing Corp. is now noted in EE to NA at 0145-0215 on 6120,9535,11715, 15305. (Charlie Wootten, MD)

***** SWAZILAND ***** F L A S H The Trans World Radio station in Manzini is heading towards completion. Testing on a dummy load will begin in late Aug into early September. On the air tests should begin mid-September or early October with pgm'ing possibly to start Nov1. The towers have been installed but antennas are not complete as of 8/8/74. There will be 6 log-periodics made by TCI w/10 db gain on different directional beams to Southern Africa with two omni-directionals. The station will comprise 4 xmtrs w/6 freq's ea at a power of 25 KW; w/Collins, GE, and Scully studio consoles and studio equipmt. Lang's will at first be limited to EE, Afrikaans, and Zulu; with Swahili, German, and Portuguese to be added along with others. Freqs possible for the tests range fm 90 meters to 13 meters. Look on 3203,3388, 3920 w/alternates, 3935, 3940 if necessary. Also the following could be used while testing: 6175,7135,9615,9625,9640,9670, 9760,11715,11810,11910,15135,15165,15235,17775,17850,17865,21480,21670, 21720. Times: Good times to try will be 1600-2000, 0300-0600 to begin with. (IT SHOULD BE POINTED OUT THAT THE FREQS ARE ONLY TENTATIVE, BUT RELATIVELY CERTAIN) (Outstanding Dan! ... Dan Robinson, Swaziland)

TAIWAN The following info was gleaned fm SPEEDX: Armed Forces Taiwan Network (AFNT) is authorized to operate on the following freq's w/a pwr of 10 KW: 11780, 15320,7215, and 3990. Due to budgetary limitations, they are not yet using the listed WRTH freq's. 3990 and 7215 are currently on the air 24 hrs a day except for a break on Tuesdays between 1705 and 2100. (SPEEDX via Charlie Wootten, MD)

TANZANIA Radio Tanzania is sked'led fm
0330-0350 on 6135 1600-1830 4785
0900-1050 9750 1700-2200 15435/4825
(Charlie Wootten, MD)

USA WYFR b/c's to Caribbean & Americas fm
2045-2245 on 15345, 15135
2245-0245 15215 11855
2245-0045 15135
0045-0245 9715, 5985
0245-0445 15215, 9715
(by way of Ed Insinger, NJ)

USA WYFR uses a new Continental 100 KW xmtr, mfg'd in Dallas. Other equipmt consists of two Gates 100 KW xmtrs, 1 Gates 50 KW, and 1 Continental 50 Kw 'er. (Ed Insinger, NJ)

USA Try the Voice of the O.A.S. on 9640 at 2345. Their address is Organization of American States, R & T Division, Washington, D.C., 20006. (via Charlie Wootten, MD)

xmtr = transmitter
xmsm = transmission

USSR - RUSSIAN TRANSMITTER SITES VERIFIED: by Al Sizer By going thru the past three yrs of FRENDX, SPEEDX, AND NU and then enlisting the help of top Russian DXer, Gerry Dexter, I have compiled the following list of 57 Soviet xmtr sites that have been verified by DXers. For the record, there is one more - Kishinev, Moldavia SSR, which has been verified by some of the older DXers but has not been active on SW for a number of yrs. If you have any corrections or additions please send them in so that the list may be improved. In addition by culling the pages of WRTH and a special supplement it put out on Russian stations in 1973, I have appended a list of 14 presumed Soviet sites which have never been rpt'ed verified.AL SIZER

<u>EUROPEAN USSR (20)</u>	<u>ASIATIC USSR (15)</u>	<u>UKRAINE SSR (7)</u>
Archangelsk	Blagoveschensk	Ivano-Frankovsk
Armavir	Chita	Kharkov
Gorki	Irkutsk	Kiev
Kazan	Kenga	Lvov
Konevo	Khabarovsk	Simferopol
Kursk	Komsomolsk on Amur	Starobelsk
Kalach	Krasnoyarsk	Vinnitsa
Kalinin	Magadan	
Leningrad	Nikolaevsk on Amur	<u>AZERBAIDJAN SSR</u>
Mitchurinsk	Novosibirsk	Baku
Moscow	Omsk	
Murmansk	Petropavlovsk (Kamchatka)	<u>ESTHONIA SSR</u>
Orenburg	Tyumen	Kingisepp
Riazan	Yakutsk	Pallinn
Serpukhov	Vladivostok	
Sverdlovsk	<u>BYELORUSSIA SSR</u>	<u>LITHUANIA SSR</u>
Vologda	Minsk	Kaunas
Voronezh	Orsha	
Tula		<u>KAZAKH SSR</u>
Zhigulevsk	<u>UZBEK SSR</u>	Alma Ata
	Tashkent	
<u>LATVIA SSR</u>		<u>FINNISH-KARELO SSR</u>
Riga	<u>ARMENIA SSR</u>	Petrozavodsk
	Yerevan	
<u>KHIRGHIZ SSR</u>	<u>TADZHIK SSR</u>	<u>GEORGIA SSR</u>
Frunze	Dushanbe	Tblisi
<u>TURKMEN SSR</u>		
Ashkabad		

SITES LISTED BY WRTH BUT NOT VERIFIED:

(Except for Volgograd, European USSR, which is listed in current ITU high freq schedules for 6065 KHZ)

ASIATIC USSR: Anadyr, Khanty-Mansiysk, Syktyvkar, Ufa, Ulan Ude, Palana (Kamchatka), Yuzhno-Sakhalink.

KAZAKH SSR: Dzambul, Kyzl-Orda, Petropavlovsk, Semipalatinsk, Uralsk.

AZERBAIDJAN SSR: Lenkoran.

(Outstanding! Many thanks Al and Gerry ... Al Sizer, CT; G. Dexter, WI)

VENEZUELA The special EE b/c fm R. Nac de Venezuela on 15390 and 11750 noted prior to 2200 w/fair to good sigs. 11750 not hrd. (Charlie Wootten, MD)

YEMEN, NORTH Radio San'a ancd that it had introduced a new freq, 7346 (tho found to be operating on 7280), in addition to the regular 5805. Look for them between 0400-1400. They request rpts to: Broadcasting House, (Technical Section), Yemen Arab Republic. (by permission, BBCMS)

ZAMBIA The Home Svc fm Lusaka: NOW, the External Svc, also fm Lusaka:
 9505 fm 0715-1345 0550-0715 in EE on 17895, 11880, 9580, 7220

 3295 0255 (Su 0355)-0534; (by permission, BBCMS)
 1600-2105 (s005 Su)

ATTENTION, ATTENTION, ATTENTION DX'ERS!!!! This news has been lifted word for word fm SCDX Bulletin 1286: "By the way, it is w/great disturbance we learn fm the Soviet Union that one of our Russian friends has been in trouble w/the authorities after that his name was mentioned in Sweden Calling DX-ers. It has also been rept'd that DXing will be prohibited in the Soviet Union, and in the future DXers will be prosecuted. Well, if this is true, it means a very regrettable set-back to the peace-promoting hobby of DXing, and it also hurts the friendly relations between Sweden and the Soviet Union." I will agree w/Arne Skoog (the ed of SCDX) that this is regrettable, and it is just one more thing to make me happy that I am an American citizen and live in the United States w/its inherent freedom and rights. The Russian DXer needs your prayers. (by way of Charlie Wootten, MD)

Just enuff space left to say THANKS! to all of our contributors for their vly valuable and necessary support. Hope to hear from YOU next month!

LOG REPORT

DEADLINE 15th of month

Reports to the separate editors, direct, as noted below.

BEGINNING IMMEDIATELY REPORTS FOR LOG REPORT SHOULD BE SENT DIRECTLY TO THE INDIVIDUAL LOG REPORT EDITORS. THE ADDRESSES ARE:

Section A (1605-6200 kHz)
Dan Ferguson
Box 8452
South Charleston, WV 25303

Section B (6201-11600 kHz)
M. R. Leonhardt
P.O. Box 13
Liberty, Indiana 47353

Section C (11601 kHz up)
Jerry A. Lineback
411 South Fourth
St. Joseph, Ill. 61873

This change will allow the editors to spread their work out a little, and still therefore eliminate some of the last minute rush experienced each month in getting FRENEX in the mail.

It is realized that some reports will already be in the mail before this issue of FRENEX is received. Therefore, the usual distribution from Liberty, Indiana, by Mac Leonhardt will also be made for the October issue; as well as direct receipt of loggings by the editors. After the October issue, all loggings reports should go direct to the various IR editors.

Now to the section "A" loggings...

Most notable of the loggings below is that of Antarctica on 6012 kHz. A new country, and a new continent!!!!

- 2307 INDONESIA RRI Jakarta, strong with Indo songs (Tyson-Australia) Time? (DF)
- 2340 PAPUA NEW GUINEA R. West New Britain, Kimbe, EE 1147, vocals 1152, taped out by RTTY. Again 1234* w/GSTQ. Occasionally mixes with, but usually on top of, Foochow, China, same freq. (Hill)
- 2360L GUATEMALA R. Maya de Barillas, 1050 rel px. seemingly, but almost gone (Ferguson)
- 2370 INDONESIA RRI Surabaya, Indo news 1100-1105 (Tyson-Australia)
- 2376 PAPUA NEW GUINEA R. Chimbu, Kundiawa, 1237 vocal music, native tlk (Hill)
- 2377 INDONESIA RRI Jakarta, Moslem vocals 1110. (Tyson-Australia)
- 2390 GUATEMALA LV Atitlan, 0252 SS w/M host, TC, superb (Shaw) 0310 (Ferguson)
- 2400L VENEZUELA R. Tiempo, 0245, ultra low unintelligible SS intonations, useless. (Shaw) TBS list 1000-0400 w/1KW (DF)
- 2410 PAPUA NEW GUINEA R. Goroka, S. Seas type vocal 1210, Pidgin, by woman, Islands choral music, great signal 6/29. (Hill)
- 2415 CHINA Chekiang JKT, Wenchow, "Internationale" 1228, armt by W, off 1230 on Sun. Both TBS & WRTH show past 1500. (Hill)
- 2420L BRAZIL R. Caraja, 0240 definite PP by man, vocals & soul (Shaw)
- 2428 PAPUA NEW GUINEA R. New Ireland, Kavieng, children's chorus 1212, Pidgin, Islands choral music, great signal. (Hill) Weak signal 1000, but can't ID (Ferguson)
- 2440 INDONESIA RRI Surakarta, 1159 stn ID, then Indo news. (Tyson-Australia)
- 2446 REUNION ORTEO 230 FF, low lvl, increasing to good at 0235, EE & FF pops (Shaw)
- 2450 FF, lite mx, peaked 0240, almost gone 0300, poor (Wallace) Poor to fair 0245 (Ferg.)
- 2450 PAPUA NEW GUINEA R. Western Highlands, Mt Hagen, CW songs 1215, Pidgin. Not as good as other 2 MHz PNG sigs, has QRM, possibly RRI, Jakarta same freq (Hill) Also on Sat w/s/off 1305 w/GSTQ. TBS & WRTH show daily 1230 s/off (Hill) 1128-40 (Bowlsby)
- 2468 INDONESIA RRI Jakarta, 1130 Metropolitan Service in EE, noted 1130-1200 (Tyson)
- PAPUA NEW GUINEA R. No. District, Popondetta, male chorus, drums 1218; Pidgin, CW songs 1220 (Hill) CW songs & other songs from 0954, app news by man in EE or Pid 1030 on 2340, 2450, 2410, etc, but too weak. Bougainville, Rabaul, etc., doing extremely well as early as 0830. (Dexter) Sig here, but too weak to read, at 0900+ (Ferguson)
- 2475 INDONESIA R. Angkatan Udara, mixed w/CW stn 1120; Indo ads, songs, armts (Tyson)
- 2490 INDONESIA RRI Ujung Pandang, lcl ID 1230, then variety mx px, mixed another Indo station. (Tyson-Australia)
- 2598 N. KOREA Wonsan, in Korean 1125. Fgy does vary from 2600 after all, so WRTH list of 2597 is justified. (Hill) TBS shows varying 2597-2619. (DF)
- 2765 N. KOREA Pyongsong (DSWCI) or Kaesong (WRTH); M&W in strident Korean 1115; is lcl program, not Pyongyang relay. 7/13 (Hill)
- 3047 INDONESIA RPKDK, Sampang, Madura Islands, noted 1125, Jakarta rx 1125 (Tyson)
- 3121 INDONESIA RPKDK, Serang, 1445 Indo songs, armts (Tyson-Australia)
- 3203 NUMBERS 0250 EE YL w/numbers. Sig at 40 over. Hope no SWBGer gets hold of that transmitter; (Wallace, Burlow)
- 3215 INDONESIA RRI Ujung Pandang, 1130-1500+ w/Indo px (Tyson-Australia)
- 3217U UNID, Instr, mx 0310, maybe SS or PP. Imagination level. Maybe YL voice (Shaw)
- Believe the Dominican used to be on 3218. TBS shows them on 3216 now. (DF)

- 3255 BRAZIL R.Cl. de Marilia; mx, M anc 0820 tune; IDs; good lvl w/band fairly (DF) quiet & open to Brazil. (Dexter) Just realized I have this before the fol. Sorry
- 3240 PERU R.America, Lima, SS 0245, US pops(Hill) T, 0545-0630+ LA mx, ads, jingles, M&W ancrrs. (Tuchscherer)
- 3250 S.AFRICA SABC, 0230-0508+, gone when rechecked at 0530; EE, lite mx, ads. Ad for a beach, but isn't it winter there now?(Earhart, Wallace, Brunner)
- 3255 VENEZUELA LV del Tigre, 0210-0230+ LA mx, SS(Tuchscherer)
- 3260 NIGER ORTN, 0535-0557 f/o, chants, Af mx(Boomer) 0550 flute mx(Rippel)
- 3265 BRAZIL R.Ribeirao Preto, 0848 t/i w/two ancrrs, ID w/organ notes 0900(Dexter)
- 3280 ECUADOR LV Del Napo, 0135-0205 SS, LA mx, IDs, NA at s/off(Tuchscherer) Was s/off at 0205?7(DF)
- 3290 GUYANA Action Radio, 0250 EE, inst mx(Lineback)0815 Hindi mx(Bowlsby) Guitar IS 0750-0800, sever het low side. Must s/on before WRTH listed time(Hill)abt 0815(DF)
- 3285 S.AFRICA SABC, EE cmtry, mx, ads, excellent(Wallace, Wegener)Out of order, sorry.
- 3300 GUATEMALA R.Cultural, TGNC, 0300 "Back to the Bible" in EE, & EE rel px past 0330(Wooten) 0337 EE rel px(Wegener) EE to 0400(DF)
- 3305 PAPUA NEW GUINEA R.Western District, Daru, 1104 EE nx, choral mx(Bowlsby) Islands music 1258, ID & s/off in EE & native, GSTQ 1302 & off(Hill)
- 3316 SIERRA LEONE SLEB, *0600 EE, weak(Boomer)US jazz, ads, 0615(Rippel)
- 3325 VENEZUELA R.Monagas, 0631 SS, LA mx(Earhart)
- 3325 ECUADOR Ondas Quevedenas, SS amnts, Andean mx, 2 IDs 0750 & 0825. On late 8/4 past nominal 0602*(Agner, Keating)
- 3325 BRAZIL R.Borborema, PP ID by M 0014, pretty fair sig(Robins) T, 0831 tune, poor lvl, terrific QRN, but was PP(Dexter)
- 3330 USA Cf FRENDEX; prob 3rd harm of BCE stn, hrd here around 0530 or so; & would likely be hrd in Modesto as well; believed KRLA. (Hill)
- 3331 MALDIVES RM, 0320 undoubtedly the QRM hetting CHU; detectable vocal mx(Shaw) Data here shows Maldives not now active this time on this fqy. The other poss. is Comoro Is., but that not sked to s/on till 0330 - tho I believe one of the other Moroni fqys was hrd to s/on 0300 3-4 years ago. (DF)
- 3335.5 SENEGAL Ziguinchor, 0615 FF tik, hi-life mx, low mod(Wallace,Burlew)
- 3346 ZAMBIA ZBS 0340 tik in lang by W, vly weak, much RTTY(Wallace)

Thanks to all who contributed to Log Report this month. Here are my estimates of solar-terrestrial conditions for September based on the solar cycles. The solar flux should peak about August 27 and again September 21. Solar activity peaks are becoming less prominent as the sun-spot count continues to decline. Minor geomagnetic storms may occur about August 20 and 30, and September 14 and 24. Quiet periods (low A index) may occur about August 27, September 5, 19, and 21.

Last month I lost the credit list temporarily. The result was that we learned just how much people use the credit list, as numerous DXers wrote to ask if it had been dropped permanently. The following list of almost 100 contributors covers contributors to the August Log Report, and the September Log Report and QSL section....Dan Ferguson

NOTICE NOTICE

Ed Shaw is moving back to California. Correspondents are advised to curtail communications effective 21 Oct 74, to insure delivery by 1 Nov 74. A new permanent address will be printed later. This will not endanger SWC. Please submit SWC material to HDQ until Ed's permanent address is given. Thanks.

*****NOCADS*****NOCADS*****NOCADS*****
 NORTHERN CALIFORNIA DXERS MEETING TO BE HELD AT HOME OF DOUG SNYDER OCTOBER 26. Address is 3130 Woodmont Drive, San Jose, CA 95118. Phone 508-2660590. Please write or call if attending, as my wife needs to know how many steaks to buy(hi!).

ABBREVIATIONS We are still in a holding pattern on the abbreviations list. We hope to include it next month. No space this month, it appears.

SURVEYS* SURVEYS* SURVEYS* SURVEYS*
 The Australian Radio DX Club has published two new surveys. One, a survey of LA stns hrd in Australia, is a good rundown of the LA's. The other, an INDONESIAN SURVEY, is based on monitoring of Indonesians in Australia, abt 150 stns, inc MW, w/name, freq, observed reception times, and other information. Plenty of info not given by WRTX. LA Survey 4IRCS (see 3 IRCS). INDO Survey 4IRCS (see 3IRCS) from ARDXC, P.O.Box 227, Box Hill, Victoria 3128, AUSTRALIA

NASWA FLASHSHEET

SEPT. 1974

Time: GMT

Freq: KCS

AL NIBLACK, Editor, 420 Shelby St., Vincennes, Ind. 47591 DEADLINES 10th & 20th MONTH

 To the monthly loggings:

ANGOLA The following from Newsweek, 8/12: "After months of worrying, top PP officials think they have devised a way to give independence to Angola...and still keep oil-rich Cabinda...actually a separate enclave 40 miles away...if the Portuguese abandon Cabinda which generates \$500 million a year oil revenues, they fear it would be seized by a free Angola or by...Zaire...or the Congo Brazzaville. The Lisbon plan would set up Cabinda as an autonomous state, with Portugal furnishing military protection-and, sharing the oil money".....And so, for those who have been plumping for separate status in the NASWA country list for Cabinda, it may be in the cards after all. (Don Jensen, Wisc.)...7160 R. Clube do Huambo 2130, 8/9, PP woman amnr, with news. Vy good lvl, steady, some QRN. (Ed Shaw, Va.)

ANTARCTICA 6012 (FLASH) (Please see August MM-FS, Editor) AFAN, McMurdo logged on 8/26, a new station, in EE, and jingles on the hour, e.g., 0900. (R. Hamner, AUSTRALIA) (Yes, Virginia, AFAN, 6012, does in fact, exist, as witness the following confirmations, Editor)...Ed Shaw's detective work has turned up the following facts about the station. It has been on the air experimentally for about 30 days; it runs 1 kW to a vertical antenna and is intended for the 133 men stationed at McMurdo and those outlying bases 50-60 miles away. Ed also learned that there is opposition to QSLing because of possible sensitivities to transmitting from an international zone...Don Jensen says that he notes a depression on the fgy, possibly weak programming on the fgy; Don states that to the best of his calculations that the darkness pattern will hold favorable for about 30 days longer, possibly permitting logging of this station in NA...This one heard in Australia and New Zealand, 0530-1000, since 7/22, aled 24 hours. (SWCDKERS via Ernie Behr)...I noted in Australian Calling DXers Prgm that a commercial station from Antarctica has been heard bocking on 6012, 24 hours a day. I have made a couple tries, no ketchum. (Jon Williams, Ind.)...According to RA "DXers Calling", an AFRTS station has been heard by three Australian DXers. Have been in touch with the manager who confirms the AM omissions on 6012. (Mike Agner, N.J.)...I have written AFRTS at Arlington, Va., to see if they will confirm this operation from Antarctica on AM on 6012 kes; of course, there has been for years a SSB amateur operation on 20 meters, from Antarctica, that can be QSLed...two morning checks, 0500, 1000 (which are certainly not conclusive) produced but Radio Relej, 6006, with a lot of side slop-slop for 6012, here in So. Indiana. (Al Niblack)

BOLIVIA 5008 R. Universo heard in SS and ID to 0340, 8/8, fgy up 1 kc...4424 R. Tacuiti, Guayaramerin, logged in Europe, with tent. ID, around 0200 (Scand. DX Report)...4958.5 R. Ibare, Trinidad, noted in Europe, probably from around 0100. (R. Finland DX Prgm)(Credit all the forgoing to Ernie Behr, CANADA)

BRAZIL The International Svc has been reinstated from R. Nacional Brasilia as heard once again at 2100 in EE, 15245, fair signal lvl. Also has PP prgm at 1900 and GG 2000. (Mike Pearsahe, Minn.)...15245 R. Nacional Brasilia's International Svc is still on the air, noted 8/15, in EE at 2151, giving QTH, IS, etc. (Brandon Lovett, Ohio)...3298 Radio Nacional(?) heard 8/9 with variety PP music and ads. Abrupt off. Mentions of R. Nacional, no parallels I could find. (Ed Shaw)...5993.2 An unidentified Brazilian noted 2120, (with man and woman amnr, much listening netted no IDs. Slip-in fgy by R. Cultura da Bahia?? (Ed Shaw)... A new station, R. Brazil Novo, is under installation in Brazil Nove and will operate with 30 kW in the tropical bands...Another new station will be Radio Brazil Ciencia (no fgy quote, Editor) (Rich Keating, N.J., taken from SWCDKERS)...6015 R. Clube de Pernambuco in PP with sports, 0010...11950 Radio MEC at 0255 with PP talk and ID; as Radio Ministerio only 8/9. (Credit both to Bob Zilmer)

BURUNDI 4895 Radio Cordac logged with Afro music, mod music, 0405-0453, man amnr in Swahili (I think); several mentions of Radio Cordac, and Burundi, 8/19. (Al Niblack)

CHINA 15510 Radio Peking, 1200, with EE news, commentary, poor lvl signal. (Bob Zilmer)

CONGO 6115 RTV, Brazzaville, FF ID at 0540, then local music, good reception lvl. (Douglas Wicks, Pa.)

COLOMBIA Jim Whitehead of SPEEDX rpts that a new Colombian, Ecos del Atrato, has opened operations on SW. Use 5016, heard about 0110, with SS ID at 0130. QTH is per MW: Apartado Aereo 78, Quibodo, Choco, Colombia. This is probably what was reported in previous FS as Radio Sur Colombiana. Maybe this is a net name. (Mike Agner)...5016 A new station in Quibodo, Choco, noted here since 7/17 in SS to 0405*, some days till 0515. Is a "Todelar" net, but IDs not completely readable. (Ernie Behr) (Editor's note: See Gerry Dexter's remarks in previous FS, he suggests, "Emidara...Surcolombiana" is located at Neiva, has moved from 5010, to 5016) (I heard Emisora Colombianas on checks, on 5010; I suggest that it's entirely possible that we are talking about two different stations. In fact, with the possibilities involved with the number of SS speakers operating around that set of fgy's, it's quite possible we are talking about several different stations, Editor)... 6095 La Voz del Centro, SS talk and music, 0510 logging. (Douglas Wicks)...4905 Em Atlantico heard 0350 with SS talks, music, call letters 0400, gud lvl. (Steve Wallace)
DOMINICAN REP 4850 Radio Clarin, SS talks, music, an ID, 0415, very good, very excellent. ...4880 R. Commercial, SS and music, 0505, fairly good lvl. (Both to Douglas Wicks)
ECUADOR 3985 R. Popular, 1050, straight talking by OM in SS, ID at 1115. (Ed Shaw)

ETHIOPIA 9495 (Is this fcy correct, Editor) EITL s/on 0245 in EE, also FF, into AA. (August)

GHANA 4915 Accra in lang, music, 0550, easy listening. (Douglas Wicks) / Balbi

GERMANY (E) 17700 HRI at 1200 with EE news, commentary, features. (Bob Zilmer)

GERMANY (W) 3970, DW, Juulich, schedule here 0700-0910; 2030-2240 in GG, with 100 kW. (Art Cushman, N.Z., via Ernie Behr)...17875 Voice of Germany, DW, at 1230 in EE, "It happened in Germany", to Africa, good lvl. (Bob Zilmer) (Any possibility this Malta, Editor)

ICELAND 12175 Reykjavik Radio test transmission, in EE, 6/25. (Douglas Wicks)

INDIA 15080 Bombay in language 1630-1700, loggable most days. (Friend August Balbi)

KOREA (N) 7407 R. Pyongyang at 1000, EE fcy sked, news, local music, //9895...11535 R. Pyongyang noted 1225 in language transmission, poor signal lvl, QRM. (All to Bob Zilmer)

KOREA (S) 11925//9640 HK in EE news 0630; also same fcy's at 1900, EE news. (August Balbi)

KUWAIT HK now on 11820, in EE from 1700-2000. (John Tuchscherer, Wisco)

MALAYSIA 15365 BRCFES, Tebrau, on new fcy, at 1300, with EE BEC World News. (Bob Zilmer)

MALTA (FLASHES) DW Relay in GG, 1630-1715, on 17875, 8/12, powerful lvl. Parallell 11705 in QRM. (August Balbi)...11865 DW Relay noted 0345 in EE ID, GG songs, some QRM. (Dave Williams, Oregon)...Logged Malta two days in a row on 17875, coming on the air at 1556 with IS, ask for reports, IDs in GG and EE. Sigs good. (Art Miller, Jr., Ohio)...DW Relay heard on about 7 fcy's since 8/1. Best reception on 17875 from 1600, and on 11865, from 2140, all in GG. (Ernie Behr)...11865 Malta noted 8/16 at 2147 in GG, 2157 ID for DW and Malta in EE, asked for reports. (Grady Ferguson, S. Cal.)...Dave Williams (see above) also reports 17875, 1727-1750*, EE ID at 1738. QRM from Radio Moscow...DW Relay, Malta, noted on 9590, 1800; on 11865 at 2300, outstanding lvl; 17875, 1600, 8/9, poor lvl. All Malta Relays test smct in GG and EE, asking for reports. (Ed Shaw)...Malta DW Relay heard at 0400 with ID in GG, weak lvl. (Louie Werner, Calif) (NO fcy quotation, Editor)

MEXICO 11880 An old friend is back on the air! Radio Tricolor heard from 1300 in SS. (Art Miller)...11880.2 R. Tricolor heard with super signals since 8/12, music and SS ads. (Ernie Behr) 11880 R. Tricolor at 1115 with SS talk, ranchero music, ads. (Bob Zilmer) / Behr

NIGERAGUA 9581.3 Radio Mar, *1300 anthem, SS LDs, ranchero music...9580 This one, YNTP, noted in SS, ranchero music, men with ID 1315. (Grady Ferguson)

NIGER 5020 ORTN in FF talk and chanting, 0533, fair reception. (Douglas Wicks)

NIGERIA NBC, 4990, 0427, cycle tone, talk by woman, low modulation. (Steve Wallace)

PAKISTAN 17845 RP noted 1300 with EE news, on 8/13. (Bob Zilmer)

PANAMA (FLASH) HOXO, IV del Istmo, is planning to operate a low power SW transmitter on or near the 60 MC, probably within a year. (HCJB Party Line via Ernie Behr)

PERU 4791 R. Atlantida, SS talk and music, 0415. (Douglas Wicks)...4934 (PERT) Noted 0245, R. Consejo Provincial, SS talk, music, ID at 0255, followed by fanfare. Oh, the item says positive ID. Some QRM. Is low power; maybe an increase in power. (Steve Wallace)

PHILIPPINES 11890 FBEC at 0935-1001*, with EE and religious prgm, 8/12. (Bob Zilmer)

SAUDI ARABIA 15260 SABS, Riyadh, 1300 AA prgm, to 1501*, an ID. (Ernie Behr)

SWAZILAND (FLASH) Word just received direct, TWR, will begin testing by the end of August, though no fcy's or times quoted. (Joh Tuchscherer). QTH: TWR, P.O. Box 64, Mazini, Swaziland.

JULY 1974: SUNSPOT COUNT AS FURNISHED BY THE ZURICH OBSERVATORY, 8-6-74 1-82 2-97 3-96 4-98 5-107 6-111 7-88 8-63 9-42 10-29 11-22 12-27 13-28 14-46 15-65 16-74 17-65 18-59 19-45 20-50 21-55 22-61 23-64 24-62 25-61 26-67 27-60 28-61 29-42 30-41 31-38 MEAN-61.5

PREDICTED: AUG-32 SEP-31 OCT-30 NOV-29 DEC-28 JAN-27 (Grady Ferguson)

LAST, LAST MINUTE ITEM In re Antarctica, I wish to make mention that all I have noted on 6012, around 0800, that there is a definite carrier depression there with possible imagination level modulation - I have noted the carrier depression several times. (Ed Shaw)

ACKNOWLEDGEMENT To so many contributors, for so much help. The support the last two issues of the Flashsheet has been wonderful....Please keep the reports coming as we approach the DX season, THANK ALL OF YOU.

PLEASE NOTE: In re questions concerning the Flashsheet, such as the cost per year, how to obtain it, such allied questions, please do not, I repeat do not send such to me; these questions should be sent to Prexy Dan Ferguson, at HQs. Dan is the Executive Editor. Please do not send me money for same, send it directly to Editor Dan. I prepare the Flashsheet masters, but beyond that I know little about answers to the other questions, and have very little or no knowledge who actually receives the Flashsheets...Last minute items may be phoned to 1-812-882-3976 before 2000 GMT. I am..... With Vy 73.

Address Correction Requested

NASWA's FLASHSHEET is compiled twice monthly and mailed separate from FRENEX. FLASHSHEET EDITOR is AL NIBLACK, 420 SHELBY STREET, VINCENNES, IND. 47591. All reports for FLASHSHEET go directly to Al, not to HDQ.

NASWA dues are US\$10 in North America. Overseas the dues are the same, but airmail is available overseas for the following additional charge: Central America and the Caribbean \$4; South America and Europe \$5; Asia & Pacific \$6.

The FLASHSHEET is available to members for US\$4 per year in North America. It is airmailed overseas to members who desire it for US\$8.

Checks/money orders for dues and/or the FLASHSHEET should be made payable to NASWA and should be sent to NASWA, BOX 8452,
