-report -

DXers frequently complain these days about the poor equipment situation. Dire predictions of hobby doom due to lack of equipment are heard at every turn.

So, I decided to check into things and can happily report that the picture is not nearly as dark as some would have you believe. Here's a look at some of the items soon to be on the market.

The Altruistic AWP (All Wave Portable) is a 12 transistor unit operating off The Altruistic AWP (All Wave Portable) is a 12 transistor unit operating off two dozen penlight cells. The cabinet is of genuine imitation maple and cowhide. All dial scales and push-button band selector buttons are color-coded. The receiver covers 50 to 500 khz, 522 to 1611 kHz, 2 to 4 mHz, 5 to 8.5 mHz, 10 to 12 and 19 to 20 mHz, as well as the 30 to 50 mHz band. A pocket at the back of the receiver holds a 48 x 60 inch color map of the world. And there is a spring action longwire antenna rolled up inside. Press a button and a self-propelled, 10 inch arrow shoots out at a 76 degree angle, trailing 130 feet of wire. A 0-10 log scale makes it a simple matter to relocate a station. Economically priced at just \$249, it makes a great second receiver or basic unit for the beginner.

great second receiver of basic unit for the beginner. In the intermediate price range you should consider the new Hammerhead DX King at \$649.50, plus speaker and AC line cord. An ingenious tuning system moves a dial pointer across a special dial scale as you select the band of frequencies you desire. The receiver is one of the crystal based type with provisions for 114, 100 kHz bands. (4.5 to 5.0 mHz not recommended). The main tuning is set at to the figure shown must, of course, add whatever number the main tuning is set at to the figure shown on the band selector pointer dial, subtracting or adding 5kHz per hour of use for drift compensation and a factor of 0.398 when the shack temperature rises above 85. In checking this one out I found sensitivity to be excellent with HCJB easily heard over BED60 on 9763. Other features include a built-in 200kHz crystal calibrator, tome control and embossed warranty card.

For the discriminating listener, I recommend the Roder-Schwatzie Ultimo One For the discriminating listener, I recommend the Roder-Schwatzie Ultimo One Thousand. This has got to be the last word in receivers and I can't begin to completely describe it here. Coverage is from 1kHz to 100mHz in either 100 or 1,000 kHz bands depending upon how you set the controls. A choice of 25 different selectivity settings is available. The unit has a built-in visual band display. motorized tuning, aligns itself automatically for whatever frequency is tuned--and does it so fast that by the time you finish adjusting the main tuning to the desired frequency, the receiver has peaked itself. An "audio expander" takes the audio from a station needing heavy filtering and provides the effect of expanding it back to near normal audio by re-inserting the higher frequencies. A special switch controls's slide-back panel at the top of the receiver which exposes a hotplate for keeping your coffee ready on those all night sessions. Suffice it to say that if you want this one you'll probably have to sell your Rolls!

An interesting piece of associated geat is the neutronal matter by Ripoff DX Products at \$219.95. The unit contains a pre-selector, audio filter, noise blanker, digital clock, cassette recorder, airmail stamp dispenser, antenna switching unit, crystal calibrator and a 4 x 6 area covered by clear plastic underwich you can insert cards (available at slight additonal cost) with important data you wish to keep close by, such as the latest Maldives schedule, club expiration dates or whatever.

I hope the above will serve to dispel any doubts you might have had about the so-called "sorry state of equipment" because, as you can see, quite to the contrary, things are very rosy indeed!

73,

Charlie L.

A REPORT FROM HEADQUARTERS

NORTH AMERICAN SHORT WAVE ASSOCIATION

POST OFFICE BOX 13

LIBERTY, INDIANA 47353 U.S.A. NOVEMBER, 1975

"DXING ACCORDING TO NASWA" We call to attention, the center fold page which announces that Ed Shaw's book is now available. We have reproduced the table of contents in order to give an idea of the subjects covered. The price is \$2.50 plus .50¢ postage and handling mailed anywhere in North America. The mailing cost is an <u>additional</u> \$1.00 for airmail outside North America. We expect a lot of orders at the beginning, so give some extra time to get your copy mailed.

MEMBERSHIP DUES TO INCREASE: In anticipation of the new postal rates which are scheduled to go in effect at the end of December, we have no choice but to increase membership dues accordingly. From the mailing cover, you will note the cost of membership is increased \$1.00 per year. Overseas airmail charges are likewise increased since the cost of sending printed matter by airmail will increase substantial. The cost of "DX Hotline" (formerly FlashSheet) is increased to \$3.00 per year. Part of this increase is be-cause we have found that publishing costs are higher in Park Forest than they were when Dan Ferguson was publishing this on the club's printing machine in Charleston. These increases are effective immediately, however those checks that are now in the mail at the old rates will be honored through November only.

We are sorry to have to increase the cost of membership, and if we sent just a few bulletins each month the increase might not be necessary, but in mailing over 10,000 copies of FRENDX in a years time, even a slight increase in postal rates is substantial in total.

PEOPLE AND PLACES: An awful lot of you people out there are moving around on us and not letting us know about it. A June FRENDX was mailed to a member at his listed California address was returned to marked "Addressee Unknown - No forwarding Address". A couple of weeks ago we received a letter from South Carolina saying "I don't know where you are mailing my PETEND's but to be a set of the set FRENDX's, but I haven't gotten one since May". If we don't know where you are, we can't send them to you. Now that the Postal Service has increased their "Address Correction Requested" fee from .10¢ to .25¢, we will no longer ask for this service, so it'll be up to anyone on the move to tell us about it.

BITS AND PIECES: LARRY MAGNE will be representing NASWA's interests at the ITU World Administration Radio Conference chaired by the FCC in Washington, D.C. on October 21, 1975......<u>PERRY FERRELL</u> of Gilfer Associates writes to say that he will be having a shipment of 1976 WRTH air freighted to Park Ridge to fill advance orders for WRTH-76 which has been promised him by January 15, 1976 which would mean that Gilfer should have advance orders shipped by January 26 at thelatest...... EDWARD J. PYATT calls attention to a DX supply house in Finland that offers a few products that may be of some a by supply house in riniand that others a lew products that may be of som-interest. Space does not permit a full list, so if anyone is interested, write direct to DX-Service, SF-10650 Vantaa 65, Finland. (A couple of IRC's might be in order).....JIM HAGEN reports that Mr. Sam Consalvo, 4905 Roanne Drive, Washington, DC 20021 can furnish operation manuals for Government surplus equipment such as the R-390A, etc.....DENIS BEAUREGARD 2425 St. Antoine, Lachine, P.Q., Canada tells us about their DX Club "Club Ondes Courtes Candiac" which publishes a fourteen page bulletin "L'onde" for French speaking North American DXers. The club has 31 members and is for French speaking North American Diers. The club has 31 members and is a year old.....<u>MALT SHARP</u>, 1301 Morgan Avenue, Cinnaminson, NJ 08077 says that The South Jersey SWC is looking for Divers to help organize the club. Potential members must be from New Jersey.....<u>CIRO GUARDUCCI</u>, P.O. Box 173, Cassiar, B.C., Canada asks if anyone can advise him the name of a dealer who might be able to furnish the Yaesu FR-101 receiver as mentioned in the Nov. 1974 issue of FRENDX.....<u>TED POLING</u>, Director for HAP Program calls attention to the HAP year end fund drive. This year's fund drive will attention to the HAP year end fund drive. This year's fund drive will operate as in the past. Donors should send their contributions along with their club affiliation to HAP HDQ, P.O. Box 163, Mt. Sterling, IL 62353. Each club will receive a list of individual donors, and the total donated bu each club in time for the January bulletins. This drive will allow each club member to help HAP in a direct individual way. Continued help can make it possible for HAP to continue it's work for the handicapped..... Thanks to <u>DIANE LEVESQUE</u> for the new masthead for the Scoreboard section which will appear with the December Scoreboard listing. Editor Neal Perdue also asks that requests for the NASWA country list he directed to which will appear with the December Scoreboard Histing. Editor head Perdue also asks that requests for the NASWA country list be directed to Headquarters rather than to him.....DON JENSEN says he hopes to have a new country list ready to publish by early December. M. R. Leonhard , Executive Editor

NOVEMBER 1975

Timely material should be in my hands by the 10th of the month. If you wish a reply or return of material, please include a SASE. Thanks to all of our many contributors.

SUMMER RECEPTION IN EUROPE

by Richard E. Wood - Garden City NY

This summer I returned to my native Scotland and also traveled to Holland. In both countries I had access to shortwave receivers - in Scotland, a small portable, the Japanese Decca PR-209, and in Holland, a very good Philips domestic receiver. The experience, covering the months of July and August, was sufficient to refamiliarize myself with typical summer reception in the northwest coastal region of Europe, the area where I began DXing in 1957, and to compare it with conditions on ECNA using simple receivers.

My main observation was the general dominance of transmissions from the Eurasian landmass and Mediterranean basin during the daylight and early evening hours. However a few Latin American stations were heard, particularly in the international bands. The best and most consistent was something of a surprise - R Nacional de Brasilia, 15245. Its European service in English at 2100, followed by A Voz do Brasil at 2200, provided excellent listening. Second best was Trans-world Radio, Bonaire, with European service (French 2200-2215) on 15275. HOJB was the first SWBC which I verified from England in 1957. It was on 15115 then, just as it is now and just as good. The Swedish service was also heard on 15305. However, Quito was not heard nightly, in contrast to the more easterly stations, RNB and TWR/B. Havana's European services, being mostly in the early evening, were not good, but by 2200 Havana was becoming dominant on several 19 mb channels in Spanish. Radio Nederland Bonaire was heard on 19 and 25 meters. Finally, RAE Buenos Aires was reasonably heard in its European service around 2200 and to Venezuela, etc., about 2300. Latin American DX-ing in Europe is definitely a midnight to dawn pursuit.

RCI was the most consistent signal from North America. 15325 generally faded in around 1800 or 1900 and rose to be the loudest signal on the band on good nights by late evening. 11865 was less consistent but often good. The Northern Service, though Europe is surely not on the beam, was very food on 11720 and 9625 around 2300. VoA Greenville was often good by min-evening on various 16, 19, and 25 mb channels. AFRTS Greenville 15430 and 11790 were fair to good. WYFR, KGEI, and WINB were not heard at all. No west coast VoA outlets were heard. The impression gathered was that eight time zones west, over the pole, is a much more challenging path than eight time zones east.

The Eurasian landmass provided the basic stock of stations heard at high level every day. Radio Feking to Europe is a very similar situation to Radio Moscow in Eastern North America. Compare the two azimuths - ECNA to European Russia is a span of eight time zones, a sub-polar path. Likewise, western Europe to Peking is a stretch of eight time zones in a similar direction. During the summer in Europe, Peking was therefore audible evenings on roughly the same gamut of frequencies as might be expected for European Soviet stations in North America. 19 m was marginal and only heard in the early evening; 25 and 31 m were strong; 41 m fair; and weak or absent signals on 49 m. The only times when Peking is inaudible are between dawn in China (say 0100) and around dawn in Western europe (say 0700). At that time those familiar channels of 15060, 15095, etc., begin to fade in again, to peak around 0930. There is another period of poor Peking reception when daylight absorption is at its highest, at local noon (1200 GMT). The main period of Peking audibility begins as early as 1300 with the Russian service, often jammed with a distorted Mayak signal. Reception from the Far East and Australia peaked around 1400-1600. Typical of reception at this time were good signals from VoA Philippines on 11965 and the gradual build-up of potent signals from Radio Australia, beamed to Asia on 9770 and 11825. Many Soviet Far East stations were heard, mostly with Radio Moscow's Chinese service.

By 6 p.m. local (1700 GMT) Radio Peking was beginning services beamed to Europe and Africa on the fringes of the 41, 31, 25, and (in early evening) 19 meter bands. Even . taking it for granted that some of these come from transmitters in western China, reception was remarkable on a multitude of frequencies and in many languages. It is interesting to note, for example, that Peking transmits direct to Albania although Albania's own internal broadcasting reflects the Chinese line. Reception of Peking's Quechua broadcast at 2230-2255 was so local in quality that I wondered weither it could have been shipped on tape for broadcast in Tirana.

One item I particularly wanted to check on, but where I met with disappointment, were Peking's daytime broadcasts to Europe listed in the WRTH, e.g. Italian (on freqs. as low as 5250) at 1100-1200 and French at 1130-1200. Although the frequencies listed are typical Peking choices, most of them seem unsuitable for reaching southern Europe in broad daylight. Hence, I thought it possible that they might be Tirana relays, although Tirana has never yet been identified as relaying Peking shortwave transmissions to Europe. Disappointingly, the noontime transmissions were inaudible, but that inaudibility in itself is significant since Tirana would be heard at that time.

Turning to the rest of Asia, All India Radio was a station which found me listening regularly. The European service at 1745-2230 on 7215, 9525, and 11620, and from 1945 additionally on 9912, was superbly received. Political events in India at the time were of unprecidented interest and AIR is not generally as good on ECNA, so it was a pleasure to listen to it at local strength. Other services of AIR were also heard, including the recently introduced Russian service. Best frequencies from Radio Pakistan were 15115 at 1100-1115 for the inimitable dictation-speed news, 15520 in the afternoons for interesting news on the Bangladesh revolution, and in the evening 9485 with the Turkish service at 1800-1900, and the European service later on 9465. The European service of Radio Pyongyang was heard on 9415 right next to one of the BBC's main frequencies. Hanoi, too, was heard at various times on 10040 and 12035; the best reception being in the 1600-1800 time segment.

When I was DXing in Britain from 1957-1963, I was a regular listener to the morning European service of Radio Australia which, then, enjoyed a popularity and consistency of reception equivalent to that of the corresponding ABC morning broadcast to North America. But this summer, due to the combined factors of low sunspot activity and high European QRM, reception was poor to nil in the 31 and 19 mbs. I did experience mid-evening reception of RA, though quite inconsistently, at Australian dawn, around 1900-2000 GMT, when the Pacific service was on 11840. The afternoon (CMT) opening to Australia remained the main one.

Japan to Scotland is a polar azimuth and it is not surprising that NHK is by no means as regularly heard as Peking. The only reception time was around 9 a.m. local (0800 GMT) when the European service was loudly heard in English on 15430 and the General service more weakly on 15195. On mornings of disturbed propagation both were inaudible. I would, however, say that the signal on good mornings was better than I have heard from NHK on ECNA. There was no flutter, which is seldom absent from the NHK signal in New York. The evening European service, listed for the 41 and 31 mbs at peak evening listening time (1800-1930) was a washout, swamped by European stations. Peking wisely operates outside the bands. Japan, though propagationally far less well located than Peking, is too law-abiding to do so.

African stations were not as evident as is the case in the Americas. The reason is that they are located due south and do not enjoy the valuable advantages of darkness into daylight transmission which brings Moscow, AIR, Peking, etc., in at such strength to Western Europe. During the summer months, at least, the high-frequency bands were never observed to be open only to the deep south. Rather, 19 meters generally provided potent signals from Iran 15084, Ankara 15165, the RFE outlets in Portugal, Radio Liberty in Spain, and at different times a variety of short-skip stations from almost any part of Europe. Hence, Radio RSA's European services, though heard, were not generally interference-free. Best frequencies for R RSA were 15155 and 11900. By the beginning of the North American service at 2225, the MUF had dropped drastically so that only 5985 was heard. The only black African station heard was Mali on 5995. Numerous North African stations were heard all day, e.g. Algiers 9685, Morocco 11735, Cairo 11630. The entire Middle East was very dominant; Peyk-e-Iran still going strong in Farsi, Azerbaijanian and Kurdish, Iran itself always blaring on 15084 and in darkness on 9022. Israel was heard not only on many foreign service frequencies, but also with the home service relay all day on 15545 and 11645 and nights on 9495. Kuwait was heard on 11940 over or under Bucharest. Africa though was good on 60 and 90 meters from dusk to dawn.

The closest continental country to Scotland is Norway, so it is no surprise that Scandinavia was dominant on most bands. Daytimes, for example, Norway 6185, when on the

air, was the loudest on the band. Likewise, Finland 9550 was consistently louder, in daylight, than adjacent DW 9545 or SBC 9535. Finland 11755, 15 kw, which I have yet to hear in the U.S., was equally good. 6120 was sometimes noted. Of two stations with good noontime English broadcasts on 31 m, Sweden 9630 was much louder than SBC 9535. By comparison, southern Europe was not as dominant as it is in the U.S. Spain was heard mostly on 7105 for Spaniards abroad. Portugal's EN was quite inconsistent, depending on evening skip distance for irregular reception on 15295, 15315 or 15340, so that for coverage of current events in Portugal I had to rely mainly on late-evening reception of a MW station there. Adventest World Radio via Sines, 9670, was however booming. The daytime lineup of the bands in Scotland was as follows. 49m; Norway 6185 and France-Inter Issoudun 6175 loudest, DW 6075 and other germans plus RNW 6045 next, weak signals from Prague 6055 and others. 41 m; Budapest 7220 was notably loud, plus other Central Europeans. 31 m; mainly northern and central Europe, Scandinavia, Germany, Prague, Budapest, Moscow's British noontime service on 9450 not quite at strain-free level, Algiers 9685 surprisingly good, RBI's long Arabic broadcast at 1100-1400 on 9730. 25 m; All Europe and Middle East, a very crowded band at all times. Although on numerous parallel channels, Radio Moscow's 1130-1230 British service did not provide interference-free reception on a single frequency. The shotgun technique, if all shots are misplaced, does not work. RBI in Arabic on 11700 was as outstanding as 9730. 19 m; this band, which might, had it been clearer, have provided reception of stateside VoA outlets and other distant daylight to daylight stations, was dominated by numerous Radio France channels, plus Radio Liberty and its jammers. Athens' Balkan-language service 1600-1715 was good on 15345. Northern Europe was more variable - from day to day, though Finland 15185 was always good.

I would conclude by saying that, on the whole, East Coast North America seems to be a better location for listening in the international broadcast bands, rather than Europe. Europe and adjacent developed parts of Asia contain so many powerful stations that one is dominated by them. One feels quite remote from the Americas. The U.S. West Coast, eight time zones away, seems infinitely more difficult to receive than Peking, eight time zones east. Europe would be a good location for a DXer interested in Far Eastern stations, that tend to be difficult on ECNA. But the U.S. DXer has at least as good a shot at Africa, a better one, on the whole, at Latin America and the Pacific Islands (especially Tahiti). Evening short skip tends to be an annoying phenomenon, bringing unwanted stations from a few hundred to one or two thousand miles in on bands which ought more productively to be dominated by transoceanic stations. The locations which can provide short skip for the U.S. are mercifully few, mostly Greenville and Havana, whereas short skip evenings in Western Europe on 19 and 25 meters will show, at any given date and time, a booming DW, or Sweden, or Bucharest, or perhaps Brussels. Combine several of these and many good DX chances are lost. A fairly rational test of the quality of a DX location would be to take the mean of the distance of all SWBC stations audible at a given moment. At local noon in New York, it might be 3000 miles. In Perth, Scotland, it might hardly exceed 1000 miles. So, American DXers should count their blessings.

THE REALISTIC DX-160

reviewed by Brian Levy, Atlanta GA and Daniel McCarthy, Terre Haute, IN

The Realistic DX-160 is a totally solid state communications receiver covering 150-400 kHz longwave and 535 kHz to 30 mHz in five bands. The receiver operates from any 120 volt AC source or a 12 volt DC negative ground supply. Front panel controls include a variable BFO, AF gain, antenna trimmer, band selector, RF gain, a slide switch operated automatic noise limiter, AM-SSB/CW mode switch, fast-slow automatic volume control, and a stand-by switch. The receiver is equipped with an S-meter (very generous to weak stations) and a headphone jack is located conveniently on the front panel, well away from controls with which it could interfere. An external speaker is needed however.

Tuning is split up in five bands, A is longwave, B is standard broadcast, C covers

1.55 to 4.5 mHz, D covers 4.5-13 mHz, and E covers 13-30 mHz. Tuning for SWBC stations is accomplished through three stages. First, one sets the main tuning knob (located at the extreme right of the front panel) to any of several white dots on the main tuning dial. Each white dot represents the location of a particular international broadcasting band. After having set the main tuning, the operator rotates the bandspread knob (on the extreme left of the front panel) until he reaches the signal which he wants to identify or listen to. Having the station tuned in, he looks at the log scale of the bandspread calibration dial. The log scale is then matched with the shortwave frequency conversion data in the owners manual. Depending on your accuracy in reading the conversion data, you can normally read the frequency within about 5 kHz.

You have by now recognized the major downfall of the DX-160. The bandspread is calibrated for the ham bands, therefore it is necessary to resort to using the log scale and shortwave conversion data in the manual or graphs of your own making. This is time consuming and limits accuracy in frequency determination. It is difficult to line up the main dial pointer accurately and the receiver does not have a crystal calibrator that could serve to calibrate the main pointer a little better.

You can construct your own graphs and use frequency marker stations (WWV, CHU) for allignment of the main tuning dial. Dan McCarthy reports the following accuracies.

down from WWV 10000 to 9200	+5 kHz
down from WWV 5000 to 4865	+2 kHz
up from WWV 15000 to 15445	<u>+10 kHz</u>
up from WWV 5000 to 5041 &	
5065 to 5095*	± 2 kHz
up and down from CHU 7330	+5 kHz
up and down from CHU 3330	±7.5 kHz
On other frequencies, using a chart	, I can usually get within 5 to 10 kHz, except
11600-12100 and 17000 kHz region wh	en I can only get within + 25 kHz.
* from 5041-5065 there is an intern	al sour with stations from 5940-5980.

Brian Levy reports that he is a part time salesman for Radio Shack and has sold several DX-160s, none of them to hams. He hopes that they will modify the bandspread to calibrate the shortwave broadcast bands and include a crystal calibrator. Apart from the problem of tuning the radio, it is a fine receiver. Brian has owned his for a year and has had no trouble with it. He has logged 55 countries and Dan has logged 95. Some owners have logged well over 100. The Sensitivity for the AM band is 100 microyolts for 10 dB, but gets much better on the SWBC bands (3-4 microvolts for 10 dB S + N/N ratio). Selectivity is 4 kHz at -6 dB and 18 kHz at -40 dB. The receiver includes FET's in all critical stages.

The receiver is ideal as a relatively low priced, good communications rig, priced at \$159.95. It is widely used by beginning DXers and SWLs. It is a much better buy than portables that cost almost as much and offer a lot less, and it is a darm sight cheaper than a Drake SSR-1 or a Barlow Wadley. The tuning problem is all that keeps it from being a good tool for serious DX. Conclusion, for \$160 you can enjoy yourself and hear over 100 countries

IMPROVING YOUR HEATHKIT SW-717

by Bob Underdown, Siloam Springs AR

I recently read in a receiver survey in the June edition of HCJB's <u>Andex</u> magazine that the Heathkit SW-717 was rated fourth among the membership of Andex International (after the DX-150 A&B, both first, the DX-160 second, and the SX-190 third). Since Heath probably sells hundreds of their SW-717s in kit form, I thought I might be able to reach some of these fellow SW-717 owners with a hint to improve their receivers.

First, as any owner can tell you, the original bandspread of the SW-717 is thoroughly inadequate for serious DKing, since it doesn't allow the listener to calculate the frequency accurately. There is practically no way to add a number dial knob so you can use graphs for frequency interpolation with any kind of accuracy because of the 3 to 1 turning ratio of the tuner capacitor used in the bandspread itself. The only thing I can suggest is to replace the tuner capacitor with a similar size capacitor with a regular type 1 to 1 turning ratio shaft. This new tuner should have the same value or slightly higher (the higher the value the wider the range the bandspread will cover. I've had excellent results with a single gang 0-12 pf (mmfd) though Heathkit used a 0-5.9 pf capacitor).

Removing the old tuner capacitor was easy as putting it in was, refering back to page 18 of the manual, I removed the two 3/6th inch screws holding the capacitor's body and the single 3/6th screw holding the ground solder lug. After desoldering the yellow wire leading from the bandswitch and loosening the setscrew on the "string" tuning system's pulley, I slid the old capacitor out and replaced it with the new straight shaft capacitor. After you have changed the old tuner, you should now add a vernier dial to be used with graphs for frequency interpolation. The shaft of the new tuning capacitor should be shortened, if necessary, to allow the vernier dial to be installed. A good vernier is the 8 to 1 ratio precision vernier dial, Lafayette 99-F-60311, shown on page 137 of the 1975 Lafayette catalog. This dial has markings of 0-100 which is perfect for frequency interpolation

graphs. With a crystal calibrator and carefully made graphs you can get accuracy of ± 5 kHz on some bands. The major problem with graphs is that the SW-717 tends to drift slightly and this can throw your graphs off as much as 15 kHz at times. This can be overcome by using Ken Duke's formula featured in the June FRENDX article <u>Frequency Interpolation</u> without Graphs. Using his formula you can get as close as 1 kHz! Not bad for a \$60 short-wide radio.

A word of warning in closing. Heath takes a dim view of modifying your hit and it will probably void any guarantee. I can't see how this modification would harm your receiver. With the 0-12 pf tuner capacitor, tuning SSB signals on the highest band is more difficult than before, so if you are interested in Ham listening on the 20, 15 and 10 meter bands, I would suggest further experimenting with a capacitor with a range of less than 0-12 pf. For normal SWBC use the 0-12 of capacitor is perfect.

Paz y Bien

by John Moritz, Jr., Youngstown OH

The studios and transmitters of Radio Faz y Bien are located about 80 miles south of Quito in the city of Ambato, Ecuador. This low-powered Ecuadorian, whose transmitter and simple dipole antenna radiate 2000 wats of power, broadcasts on shortwave on 4820 kHz. All programming is in Spanish, with the exception of two 15 minuite broadcasts in Quechu each week. Weekdays the program schedule is from 0930 to 1400 and again from 2300 to 0300 GMT. On Sundays the schedule runs from 1100 to 1400 and 2300-0400 GMT. This schedule is quite flexible, however, as any special event, that may be of interest to their listeners, incurs an extension of program time.

Radio Paz y Bien uses two studios, one for broadcasting and one for recording. The first houses a Grommes mixer, a Sony tape recorder and two turntables. The second and larger studio contains two AKAI monaural and one Sony stereo recorder. Other equipment includes two 8-track cartridge recorders and a Hammarlund HQ-100A receiver. The Hammarlund is used for monitoring and pick-up for retransmission. Future plans include the building of a new and more modern unit to house both studios and offices. The directors are also considering opening up an FM outlet to go with the shortwave outlet and their medium wave transmissions on 1345 kHz. The medium wave transmitter puts out 5000 watts and is operated from 0930 to 0300 weekdays and 1100 to 0400 on Sundays.

Radio Faz y Bien welcomes reception reports. They ask that the reports be sent in Spanish and that return postage be included. Unused Ecuadorian stamps seem to work best as they have trouble with IRC's. Verification is by letter or QSL card. They have no pennants. If you log this colorful little station, try sending your report to Radio Faz y Bien, Casilla 94, Ambato, Ecuador. This feature was edited and rearanged from the September issue of HCJB's <u>Andex International</u> by John Moritz, Jr.

By JON ZIOMEK

For eight years, the defector from Poland had been working for Radio Free Europe in West Germany, eventually working his way up to becoming an on-the-air commentator. Then he went back to Poland and became a prominent Polish television personality, broadcasting about the terrible life in the West.

The man, it turned out, had been a spy all along — a plant by the Polish secret service.

That sounds like a story from the Cold War days of the 1950s, but it isn't, said Sig Mickelson. It happened recently.

Mickelson is the new president of the recently merged Radio Free Europe and Radio Liberty. The United States funds these two news-dispensing organizations at a cost of \$50 million a year.

Radio Liberty broadcasts exclusively into the Soviet Union. Radio Free Europes and its signals into the other Eastern European Communist countries. Each sends out about 20 hours of programming a day, mostly news and information.

Isn't Radio Free Europe, born at the height of the Cold War in 1950, something of an anachronism?

Not with Cold War-like incidents such as that of the Polish defector stull going on, answered Mickelson, who is on leave from Northwestern University's Medull School of

RFE still spreading the word

Journalism. He assumed his new position this month.

However, he conceded with a dry smile, 'The service was originally conceived as one that would keep the liberationist fires burning'' in the Communist countries. "But now, this is simply a straightforward, objective, factual, unemotional presentation news into those countries." The organizations have the same news standarda as American wire services like Associated Press and United Press International. he sold.

But in these days of detenne, don't the Soviets and their allies object to our broad casts? "Detente works better when both sides are well informed," he answered.

But how is it possible to be totally objective in news reporting when a major power, the United States, is footing the bill?

The funding is filtered through a Board for International Broadcasting, set up last year to take some of the controversy our of the operation, Mickelson explained (The CIA used to be the funding agent for the two operations 5)

Egypt Ends Radio Attacks

1

Egypt's three main radio stations, Voice of the Arabs, Cairo Padio and Middle East Radio reportedly stopped broadcasting the propaganda the last month.

The source said "it was a gradual process ending within the past two to three weeks hefore the signing" of the interm perception of the interm part of the signing of the interm part of the signing of the interm part of the signing of the significant sector of the significant of the significant of the significant sector of the significant of the

POWER FOR THE R392/URR

by Joseph F. Stephany, Sodus NY

The high performance military surplus receiver, the R392/URR has already been reviewed in the May 1975 FRENDX by Morrie Goldman. Little can be added to describe its excellent sensitivity, selectivity, and stability. It is mechanically as solid as a receiver can be and is designed to be operated totally submerged in water as well as air dropped. The R392 is the field version of the R390 (Reviewed in October FRENDX) which by many is considered the best receiver ever made.

The power required for the operation of the R392/URR is 24 to 30 volts DC at about 3 amps. With a conventional power supply with no regulation several difficulties arise: 1. The best signal to noise ratio occurs with the highest allowed voltage on the plates. However, since the same voltage is applied to the filament the filaments run too close to the high side of their recomended rating of 26.5 volts. 2. The oven for the calibrator crystal caused the applied voltage to fluctuate up and down by several volts as the thermostat opened and closed. This causes the BFO filament to heat up and cool off slightly causing a small variation in cathode to filament capacity. This in turn caused the BFO to shift up and down in frequency by a few hundred Hertz because the cathode to filament capacity is in parallel with the BFO coll. This effect resulted in a loss of calibration accuracy and the inability to copy SSB. 3. A small but noticeable AC power hum was present.

It was decided that regulation was necessary. With the availability of low-cost semiconductors and integrated circuits this is not a difficult nor expensive task. The schematic diagram (on page 7) shows the final configuration. A parts list is included at the end of the instructions. The bridge rectifier CRI and power transistor QI are well over-rated so that the fuse will blow before they will in case of a short. The two paralleled power transformers must be properly phased so that their output voltage is 29 volts across each secondary: If 19 volts AC is measured across both secondaries, reverse the two green leads on the 5 volt secondaries. Capacitor Cl is to surpress transients that radiate from the rectifier and should not be left out. Due to the large power delivered by this supply (90 watts) a cooling fan was found to be desireable but not entirely necessary. The flow of air was directed between T1 and T2 and over Q1, which are the hottest components. IC1 and IC2 should be kept well away from T1, T2, and Q1 to avoid heating them. A resistor was placed in series with the cooling fan to reduce audable noise since only a very small flow of air was found to be necessary. If the cooling fan is not used, Q1 should be mounted in a heat sink instead of against the chassis. R5 may be raised to 500 ohms if an extremely low noise level is desired. If the separate plate and filament regulators are not desired, CR2, C3, IC2, R3, and R4 may be left out and A must be jumpered to D. This will cause about a 10dB loss in signal strength and a loss in audio punch. The entire supply was placed in a 7 by 13 inch aluminum chassis with pleanty of room left for an audio amplifier for a speaker and preselector (like any receiver of this type, a loss of gain on the higher frequencies is noticeable due to lack of proper match with the antenna). As a final note be sure to ground the chassis to a good ground for safety's sake as well as improved performance and also insulate IC1, IC2, and Q1 from the chassis with proper hardware. Also the ground on the receiver, pin E of J 103, should be directly connected to the ground pin on the phone jack to reduce hum to absolute minimum.

R2 should be set so that 26.5 volts are applied to pin D with the receiver on and R4 adjusted so that 30 volts are applied to pin A. This, I have found results in the best operation. With the regulated supply, the receiver is dead stable enabling exact frequency measurements (to 100 Hertz). It is a pleasure to tune to SSB using the BFO, and it is now possible to use exalted carrier reception on rapidly fading stations with ease.

PARTS LIST

CR1: 25 amp 200 VPI Bridge Rectifier. CR2: 1N4002 or any 1 amp diode. C1: .05 uFd 200 Volts. C2 and C3: 2000 uFd 50 volts electrolytics. IC1 and IC2: LM340K-24 is best but LM340T-24 costs a little less. Q1: RCA SK3012 or any similar high current PMP transistor. R1: LK 2 watts. R2, R4: 200 ohm trimmers. R3: 680 ohms, 2 watts. T1, T2: Fair Radio FA-6705 transformers wired for 29 volts or similar transformer rated for not more than 33 volts and at least 6 amps resistive load. Fan and motor: B and F HIF-002 or similar phono motor type fan. R5: 250 ohms 10 watts. The total cost of parts is about \$25, not including chassis and hardware. SEE FAGE 7 FOR DIACRAM.

OK fellow DXers, how about taking part in a friendly competition?

Take 10 consecutive minuites, any time of day, and any

frequencies you want, and see how many countries you can log in that time. Remember - - the minuites must be consecutive! You are on your honor on this since you obviously can't wait to ID stations. You go on past experience and current loggings of yourself and fellow DXers. For a starter, see if you can beat us. On Saturday 13 September, from 2223 to 2233 GMT we logged 22 countries as follows. from 5047

Al Sizer 10 Minuite Challenge cont.: . . to 4755 kHz. 5047 Togc; 5042 Guinea-Bissau; 5030 Venezuela; 5020 Niger; 4985 Brazil; 4972 Camerouns; 4940 Ivory Coast; 4930 Dominican Republic; 4915 Ghana; 4910 Guinea-Conakry; 4904 Chad; 4890 Senegal; 4875 South Africa; 4870 Dahomey, 4865 Azores; 4860 Angola, 4850 Mauritania; 4820 Gambia, 4815 Upper Volta; 4783 Mali; 4777 Gabon; 4770 Liberia.

Richard Schwartz of Dover DE reports he recently attempted to purchase a R-390 from a radio sales company in Lina, OH (name available on request). The receiver was packed in excelsior and linty rags. The radio was generally defective and mis-aligned in spite of a check-out tag applied. See the September SWC for more discussion of the problems of surplus equipment. Richard apparently got the company to take back the dog though.

NASWA-FRENDX

SWC-8

Portugal The following appeared in the 8 October issue of THE GUARDIAN a left wing newspaper and was written by D. C. Knight from Lisbon and was entitled "Fight for Media in Lisbon". Submitted by Mark Mohrmann, Syracuse.

Portugese military units were ordered to occupy all radio and TV stations in Lisbon on the morning of Sept. 29 in an effort to suppress leftist criticism of the government of Premier Jose Azevedo. But opposition was swiftly mobilized against the move and in several cases the soldiers sent to occupy the stations were won over by the leftist broadcast staffs. . . . Opposition was mobilized by the Front of Revolutionary Unity (FUR), a coalition of several leftist groups. They issued leaflets calling for a general strike and militant demonstrations. . A demonstration of about 200 FUR members assembled outside Radio Clube de Portugal by 11 AM and chanted slogans.

Meanwhile, inside one station, the radio workers talked with the soldiers and prevailed on them to announce that they were returning the station to the control of its workers. By 1 FM about 1000 people has assembled in the Rossio Plaza in downtown Lisbon to protest the government action and they marched to Radio Renascensa, the station which leftist workers seized last spring. By the time they had marched the $\frac{1}{4}$ mile to the station, their ranks has swelled to 2000. Within an hour, the soldiers who were occupying the station had also met among themselves and decided to return control of the station to its workers.

MUF stands for Maximum Useable Frequency, a term important to point to point broadcasters and sometimes heard refering to shortwave broadcasting. There are several ways in which the MUF can be defined or measured. It can be measured at any point by transmitting a signal vertically. Depending on the ionization density at each ionospheric layer, there is a critical or highest frequency at which the layer will reflect the wave. Radiowaves with frequencies higher than this frequency will pass through the layer.

At oblique incidence, the usual case in SWBC, the MUF is approximately equal to the critical frequency at the reflection point multiplied by the secant of the angle of incidence of the wave with the reflecting layer. This simple relationship must be further corrected for the distances involved and the vertical distribution of ionization.

The critical frequency varies at any point with local time of day, season, latitude, and solar cycle. Approximal ionization will also affect the MUF. Ionospheric losses in signal strength are at a minimum near the MUF and increase rapidly for lower frequencies during daylight.

The operational MUF for any multi-hop path is dependent on the lowest MUF at any reflection point along the signal path. This can be very difficult to predict for complex multi-hop transmissions. There is also a LUF or Lowest Useable Frequency. J During daylight this is important because lower frequency signals are absorbed by the ionosphere.

Conditions during the latter part of September and the first part of October were generally quiet except for 6-10 October when they were moderately disturbed. This was the most significant disturbance of the geomagnetic field and the ionosphere since April 1975. The A index reached 35 on the 9th. Solar activity remained low and the cyclic peak on 2 October was only 78. Solar activity may peak again about 29-31 October and 25-27 November. Moderately disturbed conditions are expected about 3-6 November and 27-30 November. Minor disturbances may occur around 22 October and 17 November.

In The News

Rabat, Morocco-King Hassen II of Morocco called yesterday for 350,000 volunteers to follow him in a "peaceful march" to "recover" the diaputed Spanish Sahara territory. He chal-lenged Spain to fire on the marchers.

Court Rules Sahara Tied to 2 Countries

The Hague, The Netherlands (AP)-The International Court of Justice ruled today that both Morocco and Mauritania had legal ties to the west-ern Sahara at the ture Spain colonized The court's advisory ruling was sought by the United Nations and has re birding effect on the future of the

no binding effect on the future of the 102,703-square-mile West African ter-ritory and its 80,000 people.

Morocco Calls for Volunteers For March to 'Recover' Sahara

(Barker). <u>VENEZUELA</u>: R. Juventud, 4900, card w/o time in 19 days, air, for EE rpt and 1 IRC. (Fwing). and 1 IRC. (Ewing). R. Rumbos, 4970, "Colonia Tover" 25th Anniversary card w/all data in 118 days, sea, although mint stamps were sent with SS rpt. (Dean). <u>TEM^EN</u>: R. Sanaa, 9575, full data verie letter in 25 months for FF rpt and 3 IRC's. Letter was in EE with SINPO noted. (Driscoll). D.E. Rojewski writes that he had a letter to R. Peking returned by the U.S. Postal Service because of "incomplete address". If your letter isn't addressed to "People's Republic of China" there is a good chance that you will get it back. Full notice stamped on the returned letter reads: "Postal Authorities of continental China indicate that unless mail is addressed to People's Republic of China, it will be detained and confiscated according to the laws of that country. Return To Sender". I checked R. Peking's "Mailbag" program on this and they are still giving their address as Peking, China ! There! That's it! 73's, lots of luck, and don't forget Polskie Radio. John Moritz, Jr. wants me to mention Polish Pathfinders but I won't. Bob Wiles says Malawi uses "74's" to end their letters. Well, that puts them one up on everybody else.

NOVERBER 1975

NEPAL (more) R. Nepal started in 1951 in a former private school building with a modest 250 watt SW xmtr and improvised studios and control rooms. RN now has 2 xmtr bldgs housing a total of 6 xmtrs, 250w to 100kw. In studio bldg, 6 studios, 5 control cubicles, equipped with fairly modern equipment. Present staff stands at about 245. A National Communications Plan was introduced in 1971, leading to an increase from 56 to 85 hr/week. RN has always remaind effortful* to contribute in its own way to the task of national development and thereby help build a happy and prosperous nation -- a vision cherished by His Majesty King Birendra. Realising the importance of international program exchange, RN has put aside 15 minutes every week for programs received from other broadcasting organisations. A commercial service runs daily at 0920-1020, 1520-1720. Complete sked is 0020-0350 (an extra hour on Sats), 0720-1020, 1150-1720, all on 5.0 and 3.4 MHz. (9/74 pgm sked via Dan Jamison, Columbus OH) *I believe Bill Eddings may have been reincarnated .. hi (gh) <u>MOZAMETQUE</u> The Ministry of Education took over all radio stations, including LM Radio and the Beira stn today; so proclaimed Samora Machel (RFI nx item 9/24 via gh) RCM, R Pax, and Aero Clube de Beira nationalised 9/23 and now known as R. Mozambique. New Managing Director is Mr. Salomão Mutemba. Uncertain future of LM Radio run by SABC via taped programs from Johannesburg. (Cerry E. Wood, SARC, via Mac Leonhardt) LM Radio has been renamed "<u>Radio</u> <u>Five</u>" as of 10/13 0300. Will use same BCB freqs as LM Radio did. (Denzil V. Baker, Durban, South Africa, in IRCA DX Monitor 10/18) MONGOLIA The ch. I reported last month, 7300, has returned to old 7238 after only a few Moreover, his one of the HS freqs 4762 is now on 4763 at 1500*. Medan is off the channel. (Willis) MEXICO XEC Tijuana is heard every evening around 0300, some days around 1300, on 2620, 2 x 1310; still there 10/8 at 0442, strong. (Kevin M. Szot, Vacaville CA) MAURITANIA 4698 is a new freq, replacing 4850, noted at 1900 (RCI French DX 9/20 via gh, who didn't catch the name of the reporter, and who has reservations about this item) MALAGASY REP. R. Nederland noted as early as 10/14 on new 21685 ex-17855 (where there was RFI) for 1530-1650 Arabic, 1700-1820 Dutch. In latter, often much clearer than four times closer Bonaire // 21635. Do not confuse with Kuwait, also Arabic, last year on 21685v; RN's D1975 maintains this only at 1530; at 1700, replaces with 15185. Rest unchanged. (gh) LEBANON ITU THFBS for 5 1975 shows Beirut 11830 1830-2030 to Eu ex-11795; 15440 2230-0100 to SAm ex-15120. (ADXN 9/75) ;Who knows where they really were/are? Change too often. (gh) KASHMIR (PAKISTANI) Azad Kashmir Radio sked now runs <u>3914</u> at 0045-0430, 1415-1811; and 6070 at 0600-0933, 1200-1400. Fq measured. (Geoff Cosier, Burwood, Vic.) of LR-A for window (gh) ITALY RAI is on new 21510 for "Domenica Sport" Sun 10/19 1455 tune in to 1650*, the current sked shows 21560 and 21695; neither heard. May be result of my advice to them a year ago to get off 21560 which was conflicting with VOA-Monrovia; however, VOA soon left instead. (gh) ISRAEL Bet you missed it: Probably the <u>only</u> use of the 25 MHz band this year was 9/24 at 0740-0930 when IEA ran antenna tests on 25600 (actually, it's band-edge, to avoid all the QRM in-band, hi) You would also have heard IBA's tone alternate dekaminutes 2300-0310 9/25 on otherwise unused 6230. (gh) IRAQ New Baghdad outlet 6292.5 very strong evenings past 2240 in Arabic (Mike Barraclough, Letchworth, England) Is ex-6168 (BBC WRC 10/15 via gh) IRAN An undated VOI ES sked received 10/11 checks with the 1975 WRTH on SW except: 15084 runs to 0230, not 2130, in Persian (via Dave Walcutt, Carbondale IL) Seldom changes. (gh) GUATEMALA R. 1210 heard at 1150 on 2420, 2x; not heard at 0435 check (Kevin Szot, Vaca-ville CA) At 0405 10/11 found some mx, tightly squeezed by utes (gh) <u>GREECE</u> EIRT is heard in a new xmsn at 2000-2100 on <u>17760</u> in Albanian, S-C. Romanian, Bul-garian, announced as Balkan Service #2: #1 being 1600-1700, now also on 17760 (BBC MS 9/25) ETHIOPIA Addis Ababa Radio was heard, very strong on 9590 at 0800 (Luís Diez Alonzo, Spain, via Belgium DX 9/23 via gh) EGYPT Acc. to an Israeli HS annt, Egypt stopped its deliberate QRM with Israeli Arabic pgms in mid-August. It had started on the 2nd day of the Six Day War in 1967, was designed to prevent Egyptian listeners from receiving Israel, particularly powerful 737 kHz. Syris continues to interfere with Israeli broadcasts in Arabic. (BBC MS 9/25) ECUADOR HCJB will add extra Spanish transmissions during November only from some event in Managua, Nicaragua; 2 xmtrm to N/C/SAm on 11960, extended to 0300*; and on 9745 to Carib, N Venez, ENAm, also to 0300* (HCJB Programs DX 10/16 via gh) COLOMBIA On 9/30, the Colombian govt released a decree #2085 which classifies stations into 4 groups (informativo, recreativo, educativo and docente); sets limits on the number of stations in a city (3 categories: high-powered, 1 station per 250,000 people; medium-, 1 per 100,000; low-, 1 per 30,000;) and places restrictions on everything from coughdrop ads to saying anything which might interfere with judicial or police investigations. In the event of an emergency, private stations are to be merged with R. Nacional to provide official info. of an energy private stations is to be argue, call, address, freqs, at s/on, s/off, and allows Ministry of Comms. to shut down a stn if it is QRMing another and keep it shut until the stn can prove there is no longer any QRM problem. The lengthy 104-article decree also restricts programming (no foreign radionovelas on AM, no novelas on FM). (El Tiempo de Bogotá and 2 other papers, summarised by Adam Gaffin, Brooklyn NY) R. Cordobeea is back: On <u>2440</u>, 2 x 1220, 0445-0459, fair 10/8. (Kevin Szot, Vacaville GA) <u>Fantastic</u> signal here nightly, almost as strong as WV, far exceeding any 120m fundamental; has "Radio-Sucesce" news from RCN 0500-0520 relayed from Em. Nueva Granada, 10/18. No QRM either, N.B.: (gh) 19

Liberated Radio Saigon used to be heard on 9620 around 1100-1200, 1300-1400, but not sure if they are still on the air. Was hrd till mid-Sept, untraced since. Id in Viet: "Day la dai Phat-thanh Saigon Giai-phong, tiong noi cua Mhan-dan Saigon-Gia-Dinh, phat-thanh tu Saigon". (Ugusa, 10/10)

<u>CLANDESTINE</u> <u>CRANNY</u>

EUROPEAN PIRATES The 'winter' season started well 10/5: 6202, Britain's Better Music Station, 1100-1400; <u>6210</u>, R. Revelation, 1034-1105; <u>6210</u>, West Side R. "International", 1130-1215; <u>6215</u>, later changing to 6220, R. Valentine opening 1100 with usual first-Sunday-of-month best: 6243, Skyport R., opens 1100; 6251, ABC Europe, 0900-1400. Present power of last is 200w, which may lead to close down by authorities. R. Revelation is new, with American accents, fake interviews with Dr. Strangelovelike psychiatrist, etc. Much better than mere pops. Gives address in Perpignan, France. R Valentine's DX pgm says R. Kaleidoscope is in fact running its own SW xmtr on 6225 // MW; maybe mistake for 6255 where I've hrd it. (John Campbell, NU) R. Amosty International hrd 8/17 1008-1039* on 6242 (Finn Krone, REFORM Via DSWCI 9/75) Note: most operate daytime Suns only: REFORM Per press sources via Chenal, 2 cland. stns operating, one leased to Northern Fortugal, one to southern; one since late warch, other should be on by now. 9/15 press ites days one or both operated by "friends of Gen. Spinola" and indicates that Port. 2004. traced QTH to Spain. (Larry Magne, Philadel-phia PA, in SU 9/77) Fie on so-called journalists who neglect foreign vessels. to publish fraquencies! (gh) Per the Port. journal Republica of 9/4, a cland. sin appeals for fight against communism. It broadcasts in Port. every eve on a fq. also used by BBC Port .. pgmas. Supports Spinols, per French weekly "Le Point" (Chenal, SCDX 9/23) The station Frente de Libertação dos Açores, or Radio FLA, broadcasts every 2nd day or 3 times weekly, on SN Sundey, Sept 38, 1975 - PAUL R. CLANCY from Terceira island, per Fronch paper Figaro. However, the FLA HQ is in Canaries(Chenal) MIDEAST Several radio and agency reports say an unofficial station calling itself "Voice of Lebanon" operated by the Lebanese Phalangist Party has been broadcasting during the recent disturbances there. One report said it was between 970 and 980 kHz. (BBCMS 9/25) Plays Lebanese marches, etc. (Magne, 9/20) No SW operations from any sides in the fighting as far as I know. (John Campbell, England, via NU 10/11) Per French papers, "La Voix du Liban" resumed 9/20 after more than 15 years silence. Uses Arabic, French, English on 11970, a.k.a. "La Voix du Movement National Libanais" (Bernard Chenal, France, SCDX 9/30) The PLO's <u>Voice of Palestine</u> has been transferred to Libya, per a reprt in the London Sunday Telegraph (Mike Barraclough, Letchworth, England, 10/8) After being expelled from Cairo, see last month (gh) Radio Cairo filled the vacated time with its own Palestine Service, 1800-1930 on <u>9755</u>. R. Alglers said 9/12 that the VOP would resume within the next few days from an independent stn owned by the FLO. (BBCMS 9/18) This was heard since 9/21 on 1515 kHz at 0300-0400, 1200-1500 and 1700-2000 (BBCMS 9/25) "Voice of the Omani Revolution" from Ad an Radio, South Yemen was extended 15 min during Ramazan to 1600-1700 on <u>11770(BBCMS 9/18)</u> AFRICA A Spanish speaking anti-Spanish stn was heard at 2205 on approx 359m (336 kHz -gh) calling itself "La Voz del Sahara" in a program, "Noticiero Saharani" (Alfredo López Ares, Madrid, Spain, via SCDX 9/23) <u>AFRO-AMERICA</u> LV de la Resistencia Chilean mx (Pitt MSNell, Washington DO) Measured here on <u>7143.1</u>; announces a 21 MHz parallel; (gh) "Interference"

is a French magazine publicizing black stations and pirates. No. 3 devotes several pages to black stations in USSR, China: B.P. 353-16, F-75768 Paris Cedex 16. (Chenal, SCDX 9/30) FUTURE PLANS

CANADA In 1976, CHNX's MV parent, CHNS will mark its 50th anniversary. C.E. Dick Parker says there are 'plans in hand' to permit DXers and SW fans to assist in the celebrations. He'd like to receive suggestions and comments from as many people as possible. In the past, CHNX has run SW mailbag-type pgms, separate from the usual simulcast, (Adam Gaffin, NY) RCI's future transmitter goal is 10 x 250 kw, making relays unnecessary (Alan W. Brooks, SPREDX 10/75) FINLAND A rotatable wide-band log periodic antenna at Pori will come into use next spring. Our new 250 kw xmtr will likely begin testing at the end of next summer. The reconstructed Pori station will be ready for use next Sept. (FBC 4-75 sked) HONDURAS will be much in the SW news shortly. Audio Video S.A., the largest communications conglomerate in Honduras is expanding its MW stns onto SW. By early Jan 1976, new SW xmtrs in Tegucigalpa, San Pedro Sula and La Ceiba will be relaying R. America, R. San Pedro and R. Ceiba respectively, becoming active in that order. R. América's old SW freq. was 6050. (Scott Reeves, Laurel MD, via ISWCI 9/75) <u>LIBYA</u>n radio reports The Voice of Friendship and Solidarity Radio will broadcast 2hr a day in Maltese from Tripoli, office in Valletta. (B3C MS 8/28) MAURITIUS A new 250 kw xmtr will operate non-directionally 24h on 7200 (Helmar Fleger, Mannheim, W. Germany, SCDX 9/9) There goes another rarity. (gh) <u>PARAGUAY</u> ANTELCO says all non-official licensees must change to SSB before yearend. Should provide Should provide a bit more space for Bolivians in the 6200-6350 range (Tony Jones via NU 9/27) VATICAN is installing a 500kw xmtr; will add0700-0800 to ANZ (Arthur Cushen, DX Juke Box, 10/3 via gh)

McIntyre's Ship

WHEN THE FCC refused to renew the license of radio station WXUR in Media, Pa., its owner, the Rev. Carl McIntyre, crusader of the right, bought a World War II mine-sweeper and turned it into a "pirate" radio station. He took it out into international waters two years ago this month and began bombarding the Jersey coast with his "Radio Free America" programs.

The broadcasts were short-lived, however, as the FCC immediately obtained a cease and desist order.

Reached by phone at his Collingswood, N.J., office, McIntyre said he has now sold the minesweeper and has discarded—at least temporarily— his new acheme to broadcast from

The reason: A Camden, N.J., station, WTMR, has begun carrying his "20th Century Reformation Hour" show and he is back with his old audience. "So I have no plans at the present time to float that ship out there," he said. NASWA-FREND(

BECMS MEDIUMMAVE NEWS

ANDAMAN ISLANDS AIR institutes a regional nx bulletin in Hindi as from 7/1 daily at 1335-1340 from its Port Blair stn, to inform about important events in the territory. (7/10) AUSTRALIA The country's first access or community station was inaugurated in Melbourne 5/12. An entirely new concept in Australia where broadcasting had been by commercial enterprises or an independent commission. It provides an outlet for any responsible person or community group with a message of any type of public interest. "322" has been set up by the ABC, and will be on the air 5 hr each evening with news, discussions, music. More than 30 organizations have been allotted free time. (5/22) Later this got out of hand, per ADAN (gh) <u>BULGARIA 737</u> has replaced 827 for the Sofia xmtr in the "Khristo Botev" HS (6/12) <u>BULGARLA (3)</u> has replaced 62/ for the Soila Amtrian the Marineto Botev no (0)12/ <u>CHINA</u> In order to popularize foreign language education, the Shanghai City Service and two schools are sponsoring sparetime <u>English</u> and Japanese lessons by radio. English began 9/15, on 1300 kHz; new lessons Kon/Wed/Fri, repeated Tue/Thu/Sait at 2200, 0400, 1030, 1300, #hr each. Recap Sun. 0030-0200, 0930-1100. Japanese begins 10/1 same days as above, on 1420, at 2230, 0430, 1130, 1330 with Sunday recap 0200-0330, 1030-1200. (9/25) COLOMBIA RCN. Bogota said 7/3 its affiliates LV de Barranquilla; R. Pacífico, Cali; LV de Medellin; and Emisora Nueva Granada, Bogotá each had increased power to 30 kw. (7/10) The Bogotá daily El Tiempo reported that Radio Majagual, Sincelejo, was inaugurated 8/11 (8/14) COSTA RICA R. Monumental is networked on Cd. Quesada-1475, Nicoya-1450, San Isidro Pérez Zaledon-1150, San Isidro de Punta Arenas-1050, San José-650 and announced Limon-1375 and Liberia-875; at 1100-0500. R. Universidad-850 runs 1300-0400 including BEC relay 0115-0130, and Tue-Sat 0130-0200. R. Juvenil-925, San José, is 24h. (6/26) GERMANY Sen. Stobbe of W. Berlin warned the Eastern bloc against "strong-arm acts in broadcasting policy". He said whereas WG and Berlin stns planned only slight increases in the number of their MW freqs, the GDR notifications to the international re-allocation conference to be held in Geneva, envisaged nearly twice the number of freqs and 3x the power output, drastically reducing theeffectiveness of WG xmtrs--unacceptable. (9/11) <u>GREDCE</u> EIRT is to get a 1000-kW MW xmtr to replace the 150kw being used for the Program I HS--to be in operation by end of 1976, audible thruout 2/NEU during darkness (9/4) IRAN The regional service from Qasr-e Shirin has been observed on 612 at *1425-2130* with programs in Persian, Kurdish, Quchani, Arabic. (9/25) LIBYA "Volce of the Arab Homeland" pgm has been extended two hours to 1900-0100 from Tripoli on 1448, 1250 and 1124, and from 2200 on 674 (6/19) Megawatt 1124 makes it to NAm (gh) MALTA A daily Arabic program began 9/1 2130-2245, helping Libyans "know Malta" (9/4) on 1 months (9/18) Australia is giving Pak 10 small stns to assist in rural BC. The first should be operating in Sind Province by yearend. (9/18) <u>PANAMA</u> Because of 8 months of silence, LV de Colón's license was revoked 8/14 (8/28) QATAR New 750kw 952 kHz was tested 9/1 and went into service 9/2, using a 6-tower array. Operated 1500-2230 or later; Xmtr at Al-Quraysh in the northern coastal area. (4 reports) SAINT LUCIA Marconi have won a contract for a 2nd xmtr of 10kw nr Castries (5/22) URUGUAY R. Carve says SODRE's CX6, CX26, CX28 will have their powers increased to highest

in the country so as to "defend national sovereignty" (9/11) R. Carve says R. Reconquista, CW153 in Rivera began 8/14; relays Carve's nx (8/21) <u>YUCOSLAVIA</u> / 1000-1200 kw MW xmtr for R. Zagreb nr Vrana has been approved. Titograd radio is to be improved, too. (7/31)

PROGRAMS

The programming section is a very welcome addition. I have been induced to become more of a true SWL and enjoying it immensely. Isn't it odd how many of us fail to note what is being said in our quests for rare DK and QSLS?" (Ed Shaw, San Diego CA)

SAVING TIME Fulfilling one's interest in program content can become quite time-consuming. Also, some programs are bound to conflict with others on SW, local radio or TV, sleep, work, Though it is energy-consumptive, the solution is to tape-delay such programs. T use etc. a Micronta timer, which can be set to go on (once per 24h) for as little as 15 minutes. In practice it is often reset; to prevent resetting its clock, the dial must be held down firmly while changing the on/off markers. If you have a reel tape recorder like my Akai X-150D, with easily accessible mechanical switching from 60 to 50 Hz power standards, you can play back programs 20% faster than recorded, in 5/6 of the time. Most speakers remain quite comprehensible. Very slow, preferably bassy speakers can stand to be recorded on 50 Hz setting, and played back at the double speed on 60 Hz, i.e., actually less than twice as fast. This always raises the pitch of the voice, which becomes less objectionable with familiarity. A new technique called "speech compression" is foreseen for home-market cassette recorders. This cuts out pauses and extraneous syllables, so when played back the speech is much more rapid, with no loss in comprehensibility or increase in pitch. (Not to be confused with a modulation technique of the same name, which has nothing to do with time.) (gh) AFRICA is the only continent with several external stations attempting to provide an African radio service. It's analogous to the RFE/R Liberty missions of telling targetees about what is going on in their own countries, but for different reasons! Most ISWBC stations' mission is to tell the rest of the world about their own countries--but several of them become a mirror to Africa. Paris Calling Africa has already been reviewed here. But American SWLs with an interest in Africa can benefit from these services, which are usually more easily received than broadcasts from African countries -- and can take a broader view of events than can some more biased nationalists. <u>Radio Canada International's 1800-1857</u> program has been substantially different from others on weekdays, e.g. Thurs. 1836-1849 African Press Review. But now it looks as if RCI's hour-long programs are being merged into uniformity. <u>VOA</u> this past 6 months had English designed for Africa at 0600-0730, 1600-1800 (Sat/Sun -1730), 1900-2100, and may continue the same. Those in eastern NAm too close to Bethany or Greenville can hear these 'off the back' from Monrovia. <u>BB3 African Alternatives</u> impress us most. For instance: News of the African World, daily at 0330 on 9580 7105 6005, and at 0509 (Sat/Sun 0515) on 7270 6005; followed Sats 0335, 0520 by This Week & Africa, repeated at 1500 on 17695. As from 11/23, Suns 1500, African Theatre. Mon-Fri at 1515, Focus on Africa, for the latest current-event coverage. At 1630 on 11740 and 1730 on 9695, 11680 try these: Tues., Africa's Money Matters: Wed., Arts & Africa: Thurs., Blueprint Africa: Fri., What the African Papers Say. (All freqs given are Ascension, except 11680 17695) (gh) CANADA Now RCI is beaming As It Happens to the USA: If NS on 11720/5960 and 9625 doesn't come in well, try 6085, Mon-Fri 2330-0100. The satirical series Inside from the Cutside is back for another season, Sats. 0030-0100 on these frequencies. As is Dr. Bundola's Pandemonium Medicine Show, noted Sat. 1530 (now should be 1630) but maybe not a permanent spot due to National Sequence (a.k.a. World Series) intrusion. Now occupying the former RCSWC spot on Sats. is Weekend Magazine--just what we were all thirsting for ... (gh) ECUADOR The Tuesday program of Passport on HCJB will include technical data of the station, a possible area of interest to some Diers. (Arnold J. Lausevich, Milwaukee WI) That would be wed. GMT 0130-0230 and 0600-0700. Every Tuesday? (gh) GREAT BRITAIN Most enjoyable and pleasant on BBCWS is Music from Scotland, Sat. 0100. Host Jimmy MacGregor is a real expert on that music and is a composer himself ... a cordial host, complete with authentic Scottish accent, who speaks from the heart rather than from a script. One program featured some beautiful Gaelic songs. (Kim Andrew Elliott, Minneapolis) This month's picks are with a Sword and a Spade, Suns. 2145, Tues. 0145, 0815, Thurs. 1330, on famous roads of the past (who but the BBC would think of doing this?:), 11/2 The Silk Road of ancient China; 11/9, Royal Roads of Persia and Peru: 11/16, Ancient Rome; 11/23 After the Fall of Rome when roads deteriorated; 11/30, Alpine Roads. And, They All Laughed... (at inventors who were ahead of their times), Mons. 0745, 1115; Fris. 1730, 2315; 11/3, The Great Victorian Flying Machines; 11/10, 1700 Years of the Steam Age; 11/17, Telephones. Talking Machines and Stereo; 11/24, TV and Talking Pictures. Dates-first airing. (gh) HUNGARY Would you believe Radio Budapest is inviting its 'fans' to send in for broadcast, tapes stating their point of view on subjects scheduled up to 12/9? $7\frac{1}{2}$ ips wanted. (gh) USA Almost all the AFRTS items we run do not appear in their outdated 3/75 master sked, sent out unupdated upon request. Everything is now one CMT hour later due to standard time, which AFRTS thinks ends 2/29/76, instead of 4/25. Boo to CBS for revamping its formerly fine weekend features 10/18, with Dallas Townsend's talents turned from 'One View of the Press" to News Profile--another personality cult zero, Suns. 1/05. Earlier, Jerry Dunphy split from CBS-LA, ending Entertainment West, so Mike Wallace is at Large 6 days a week, e. 5 Sun. 1724. What's New at the Movies becomes In the Spotlight, Sun. 1713. Mutual's try at meeting the press, Reporters Roundup, runs Tues. 0435, 1035, 1635. Mutual Black Net's Bicentennial entry, Red, White & Blue in Black, shows on alternate week Production Feeds, Sats/Suns 0035, 0635, 1235, 1835, half of them usually preempted. States of the Union this month, Mons. 0500, Sats. 0900 are: Nov. 10/15 OH, 17/22 LA, 24/29 IN, Dec. 1/6 MS. (gh) USSR Radio Kiev programs include: News Report: Mon., International Commentary; every 2nd Mon., DX Club; Hurs., Ukraine Today; Sat., Mailbag; first and 3rd Mon., Meet the Youth; first, 3rd, 4th Mon., Music from Ukraine. (Bob Padula, Australian DX News. 8/75)

NASCA-L- LU.

Why isn't there decent programming on SMC?--decent as compared to "S Radio, continually ex-cellent news, a good music playlist (or at least not playing "Jumpin' Jack Flash' against "Rhinestone Cowboy" or such), topicality of features (forget the home nation's fertilizer shortage that affects the walnut crop unless it is news), and general ability to hold my in-terest as well as local AM/FM. It would seem such would be available...it is but on a very few stations...so here are Coursey's Best and Wurst... BdST: 1. RCI, who despite, cancelling RCSWG, QSL's, Christmas and so forth, have consistently excellent programming...and really good news. The <u>Northern Service</u> is great...better than local radio: <u>2. Swiss Broad-casting Corp.</u>, many will disagree, but their 30 min. "Dateline" is quite well done. <u>3.AFRTS</u>, for bringing all-news to SWBC. Now .. if they'll just pick up NBC's News and Info Svc ... 4. UN Radio. 5. R. Nederland, good features... better news elsewhere. WURST 1. The Entire Soviet and Chinese Sphere ... poor all around from programming to poor lines. Bright spots: Prague, Yugoslavia. 2. The Bible Thumpers...especially HOJB and WYR. Bright spots: 4VEM and KGEI. 3. Belgium and Vatican Radios...for the length of time the programs are on they could probably call their listeners (both of them) on the landline for less cost. Shades of Mediocrity: The BBC...I respectfully submit that they're overrated. Now, if they get Monty Python... Hate mail will be personally answered. (David Coursey, 10323 Estate Ln.-Ballas, TX 75238, an intern at NNIS affiliate WRR) Some good points, David, but I take is-sue with a few of them: AFRTS is not and should not be 'all-news'--it is (almost) all-talk. Picking up NNIS would mean dropping almost all its other network sources, and the many news and public affairs features running from 3 to 59 minutes. On the other hand, 15 or 20 minutes a day from Belgium, Vatican, is just about right, when well done, considering all the competition. I, for one, don't care a whit about popular music on SW, and wish stations would quit feeling they have to interrupt the talk every few minutes for musical relief. (gh)

DX PROGRAMS

<u>GANADA</u> You're in luck if you understand non-English languages. Only other being dropped is Fortuguese, and it wasn't full-fledged, as most Brazilians preferred to contribute to the Spanish version. <u>Spanish</u> seemed expendable, being preëmpted at least twice in Oct., but is still sked Suns. 0033 on 11940 9535 6040, and 0333 on 9655 5990. <u>French</u> "Allo DK" (be prepared for a difficult accent) is on Sat. 1940 on 17820 15325 11865, 11830 9685 Daventry; Sun. 2040 on 11895 9640 6145; Mon. 0240 on 9655 6020. It includes a DX report from TELEX club in Belgium. <u>German</u>, Suns. during the 1715-1800 period, 17820 15325, and Daventry 7235 5995. <u>Czech</u>, Sun. 1530-1600 on Daventry only 9555 7225. (gh)

<u>GERMANY WEST</u> Deutsche Welle still has its monthly German DX program, with consecutive <u>English</u> translation, on the second Saturday of the month, and following GMT Sunday, in the <u>German</u> transmission at 0750, 1150, 1550, 1950, 2350 and 0350. And in <u>Spanish</u> during the 2300-0300 xmsn on the third Saturday. (G.G. Thiele, via David Kernick, Merseyside, England). I used to complain about this not being in the English programm, but if it had been, to NAm, we would have lost it anyway last April: However, it would not have been a tragedy, as the Oct. (Eng.) pgm rehashed mostly old material already broadcast elsewhere: Gamarvon plans, NZDXL Convention, SLBC'S DX pgm, the SCADXC, Zurich smoothed sunspots. Try 11/6; fall freqs not expected to have changed much are: 2350, 3995 6145 9735 11795, and Kigali 9700 15410; 0350, 3995, 6145, 9735; and Malta 6100 11865; Sackville 6085 9605. Spanish used 6075 6160 9545 11810, and Malta 6100 9610 11865. Then, there's Japanese on Tuesday following the German/English version, during 1115-1215 on 9605 11765 15225 11865. (gh)

MALTA Non-Eible-thumping must not pay off: "AWR will have to close down its pgms at the end of the year unless financial means can be found to continue. The General Conference Treasury reports only enough funds in hand for airtime through Dec." (AWR via John Tuchscherer, Neenah WI, via NU 10/4) So, meanwhile, enjoy World DX News, Sats. 2019-2030, hope still on 9755. 10/18 pgm read material from July LN: Walcutt's 'holistic', Ionosphere. (gh) <u>NETHERLANDS</u> Espacio DXista has been reading Spanish translations of the "All Round DXers Course" (can't wait till No. 23, hi) D1975 sked Fris. 2045-2115 L: 9715 6085 6020; 2215-2245 L: 11950 6085; 2345-0015 Sats. B: 15320, L: 11845 6020; 0115-0145 B 6020; 0245-0315 & 0415-0445 B 9590. L-Lopik; B-Bonaire. (gh)

<u>SOUTH AFRICA</u> Radio RSA apparently feels that East Africans need the current DX Corner for beginners, while Europe and North America are ready for the new Saturday Corner for advanced DKers. In other words, the Wed. pgm will continue <u>only</u> at 1637. Sat. will be only in the 2100 and 2230 programs (2137 and 2307?). It also expands(?) into other language versions: <u>French</u> Coin DX, Thurs. 1200, Sun. 1800 and 2000 pgms; <u>German</u> Kurzwellenreiter, Tues. and Sat. after 1800; <u>Dutch</u> De Puntjles of DX, Tues/Thurs/Sat during 1700 pgm. (info direct from Gerry E. Wood, R. RSA, via Mac Leonhardt)

<u>SPAIN</u> Sad to say, but RNE's Spanish DX program isn't getting anywhere...just keeps on trying to explain the SIO code, etc., etc.; sometimes delayed until 0030, 0230 (Suns.) (gh) <u>USSR</u> R. Moscow's "Our DX Program" was not to be heard at the expected times 10/16. ¿Was it preëmpted, canceled, or rescheduled? (gh)

SLOW DOWN! Trouble copying rapid-fire DX pgm announcers? Speed-up technique on Programs page can be reversed for an 83% playback. Helps with foreign languages too:

MISCELÁNEA RADIAL

... that Radio México really wants all those reception reports they re-DON'T YOU BELIEVE quest: "I am informed by a Mexican witness that there are stacks and stacks of unopened mail there now and the mail is many months old." (John Tuchscherer, NU 9/20) I saw exactly the same thing on a 1972 visit, but if and when they catch up, you may get percents and record albums. (gh) ...the sunrise/sunset times for Tahiti in SFEDX's booklet. ('ob Bodell. Portland OR) This and the Lord Howe errors resulted from a wrong-hemisphere latitude or Jongitude, and there may be more... (gh) ... that the DY Stamp "Service" can't afford to buy advertising space rather than "kindly granting permission for its price list to be reprinted". It must be a (legitimately) profit-making business when it charges 35¢ for a Mexican stamp of face value 6.4¢. And return postage for a first-weight airmail letter from most countries is much closer to 26¢ than to 75¢: Stamps can be bought for face value at many national philatelic agencies. (gh) ...that cross modulation between Españúmeros and RHC proves they're at the same site. "What you were hearing may very well be <u>ionospher</u>ic cross modulation, a condition in which the ionosphere is the medium of mixing. I used to hear VOA-1140 subimposed on Guangdong-1340 during the latter's Tagalog transmission to the Philippines, a bizarre example. And VOA and R. Peking don't share transmitter sites, at least not the last time I looked in my bathroom." (Charles A. Taylor, Indianapolis IN) I was aware there was such a phenomenon, but these questions arise: [Isn't it a NW weirdity ("the Luxembourg effect") affecting super-high power transmissions only? , loes the 2.7-MHz separation in this case make ICM a less plausible explanation than the 0.2-MHz separation in yours? (gh) ... the single claim of a Radio Swan de Honduras QSL letter stating that it transmits from Swan Island, quoted on HOJE 9/13, using its old facilities:--we're still stating to see a copy of that letter. (gh) The original Radio Swan W/S on Swan Island. T am quite sure it is not now. (Don Jensen, Kenosha WI) In last month's LN... that John Campbell is in Scotland; the wide-ranger's base is in England; ... that Robert Yeo is in Western Australia instead of Victoria; that I would deliberately sprinkle the LN with strikeovers: so powerful was my ribbon that its typos eventually souked thru chalky correction stuff. ...the high pitch of my voice on the Sept. 18 DX Juke Box: the tape was played back 15% fas-ter than recorded: (gh) ...that "The DX'er has one objective - to receive a QSL card." (an article on Reporting Locals in the 9/75 NZ DX Times) Some of us have better things to do with our time and money that to try to get someone else to 'say the right words' telling us something we already know: that we did receive the station. QSL-collecting is fine as an extra option, and they're nice to look at, but the assertion that they are the only aim of the DXer is a dangerous and narrow-minded idea. (gh) ... the DX tips on ROI's Spanish DX program. Unfortunately, some DX program producers/announcers are easily misled, not being active DX listeners themselves. On 10/12 a Panamanian contributor revealed that Kol Israel broadcasts in English at 2115 on 9009, 9625. The last time such a sked appeared in the WRTH Was 1969. ... that there's a station in South Korea called "RBS" as the BBC World Radio Club perpetuated a typo 10/15 (gh) ... the Russian place-name transliterations like "Achkabad", as it is spelt in French, or "Wolgograd" as it is spelt in German. Russian can and should be transliterated directly into English, without confusion by interfering languages. (gh) PUBLICATIONS A new monograph on the use of SW radio in language teaching has been published by the Center for Applied Linguistics, 1611 North Kent St., Arlington, VA 22209. This mono-graph No. 11 may be ordered for US\$1.00. It covers equipment choice and installation, operation of SW equipment in the classroom and language lab: language lessons on SW: integration of radio with other educational media; and statistics on use of major languages in international radio. The authors are Drs. Robert J. Nelson, Univ. of Illinois, and Richard E. Wood, Adelphi University. (Wood, Garden City LINY) International Services Cited As Favorite

"The Regular Shortwave Listener in the U.S.", by James L. Hall and Drew O. McDaniel, in the Summer 1975 Journal of Broadcasting reports on a 1973 survey of the NNRC membership, including gh. One of five surveys asked for the respondent's four favorite ISWBCers. -It may not be valid to extrapolate from 304 NNRC members to a nationwide SWL audience in the millions. Why a multi-band club rather than an SWBC-only club like NASWA was chosen is not clear, but we do learn that NNRC's secret membership total in 1973 was 675 (gh) I don't think the study sufficiently proved its hypothesis. It also showed that TV usage among SW hobbyists is much below the national average. (Kim Andrew Elliott, Min-Mackes, Baltimore MD, who sent this copy. "Shortwave Broadcasts Span the Hemisphere" by Richard E. Wood in the October 1975

Service	Number of Mentions	Percentage of All Listeners
Radio Nederland	152	50.0%
Radio Australia	124	40.8
BBC	115	. 37.8
Radio Canada International	86	28.3
Radia RSA	61	20.1
SBC	46	15.1
Deutsche Welle	44	14.5
НСЈВ	33	10.9
Radio Japan	32	10.5
Padio Pregue	Conclusion 17	5.6

usage among Sw hoboyists is much below the national average. (Kim Andrew Elliott, Minmapolis MN) This was also spotted by David Mackes, Baltimore MD, who sent this copy. "Shortwave Broadcasts Span the Hemisphere" by Richard E. Wood in the October 1975 Americas magazine is a well-done illustrated survey of SW development throughout the conti-

nent, including addresses of some Latin American SWL clubs. (gh) A number of lessons in the "All Round DXers Course", free from Radio Nederland, have been updated, including No. 23 by gh to cover harmonics from mediumwave.

African Survey 1975 includes a complete frequency list 2000-5900 kHz, listening times in Australia, QSL info: 4 IRCs overseas (6 by air), ARDXC, Box 227, Box Hill, VIC 3128. SPEEDX, Box E, Elsinore CA 92330 has published a free (for SASE or 2 IRCs) "BIP"--Basic Information Pamphlet, No. 5 on Basic Propagation, by Doug Snyder and Mark Lucas.

<u>THE DOCHOUSE</u> Believe I've found a candidate. Radio RSA vs. Turkey on <u>9515</u>, 2230-2320. both , snglish to NAm (Brandon Lovett, Coldwater OH). Yes, R.RSA finally caught on that AYFR was on 9525 from 2300 so tested 9515 alternate days, and seems to have settled there, <u>Turkey-be-</u> damned: On 10/18, as soon as VOT mentioned "D(" at 2216, R. RSA carrier blocked it alrendy. This also put R. RSA a tight 5 kHz from both main BEC channels. 9510 and 9580. R. RSA also "on 9515 at 0300. (gh) R. Nederland will be in the doghouse if it activates Lopik-11710 at 2300-0020, as planned for winter season, and RAE-Argentina stays on 11710 as we expect it to. Notice how some stations are victim-prone? Naybe they don't stand up for their 'rights'. Another bad conflict is on 6165 around 0100. R. Nederland had planned to use 6120, but Spain had prior claim there. But Vatican remained on 6165 vs. RN despite its relatively clear channel 5995. On the densely crowded 6 MHz band, no station should use more than one channel per program per target area. (gh)

IN MY OPINION.... "There is no question that NASWA is the best SWBC club going. But should we be satisfied with 'best' or should we make efforts at improvement? I'm 100% in favor of the 'new look' instituted in FRENDX since the new team took over. Two ideas which particularly merit attention are 'forums' for the membership to express their opinions, and contests/'coordinated monitoring events." (David R. Ball, 62 Lexfield Ave., Downsview, Ont. M3M 1M5) This is typical of the reaction being received here and at H2. I believe the old team viewed 'forums' as worm cans, which would degrade the quality of FRENDX by opening it to general blab. But I for one strongly believe that members with something important to say should have access to FRENDY. Would other LN contributors like their full address given to encourage more personal contact? (gh) Look at this: I'm going to <u>indent</u>:

"I agree with that statement 'Hearing stations without listening & profiting from the programs seeme rather pointless." I might add my own corollary, that DKing without becoming more aware of geography, languages, radio techniques and technology, and the international brocherhood of man, is time wasted. Unfortunately, I feel that the SZ Diers that I have seen, are taking less advantage of their vast opportunities and that HW Diers are taking greater advantage of their relatively minimal opportunities..." (Charles A. Taylor, Indianapolis IN) Too many trees to see the forest.... (gh) This is International Women's Year-a great time for us Diers to ask ourselves why our

International women's fear-a great time for us Diers to ask ourselves why our hobby seems to appeal to so few women. Some women may be turned off by electronics, but Di listening can be enjoyed with no intimate knowledge of receiver innards. And women do at least as well as men in mastering foreign languages. Yet, major DK clubs' member- and contributor lists show a tiny minority of female club-joiners. Perhaps it's time for more affirmative action. Perhaps the ham radio terms "XL" and "XXL" (and OK, for that matter) are objectionably sexist--and agist! Time and again we hear stories of wives whose attitudes toward their husband's DKing hobby range from indifference to hostility. So a marriage between two MW Diers last year was quite a novel happening. Females who are already NASWA members are especially invited to express their thoughts on this matter. (gb)

<u>CLUB NEWS</u> A new SW club has started near Durban, called Westville International Radio Club, and is operated by students at Westville Boys High School. Under the direction of one of the masters, Rod Dougall, this club has in a short while made great strides. All enquiries should be made to Westville International Radio Club, c/o Westville Boys High School., P.O. Westville 2630, South Africa. (Denzil V. Baker, not a member, Durban, RSA, via Charles A. Taylor.) The sexual preference of this club is obvious, but not the racial... (gh) <u>NON-CLUB NEWS</u> The Colorado Association of Diers, "CADX", is not a club::: Sut it is always looking for names and addresses of Diers in that state, to compile a list which will be distributed to all on the list. Get-togethers in the Denver/Boulder/Ft Collins/Colorado Spri-

ngs area may be arranged. Next list will be published in December. Contact Rob Harrington, 3181 S. York St., Englewood, CC 80110; phone 303-781-1185, 1900-2300 local time. <u>MEETING NEWS</u> One of the main sessions at the joint meeting of the American Council on the

Teaching of Foreign Languages and the Fédération Internationale des Professeurs de Langues Vivantes will be devoted to the use of radio to teach languages-Sat., Nov. 29 at 0900-1030 EST in the Monroe East room of the Washington, D.C. Hilton. Most of the world's major radio stations have provided materials for distribution, and representatives have been invited to address the session. Manufacturers of SW receiving equipment have been invited to display their products. Those with an interest in radio and language instruction are invited to attend. I will be chairman of the meeting. (Professor Dr. Richard E. Wood, NY)

"MOST WANTED' UNWANTED By all but one enthusiastic respondent. Perhaps it's too easy for each Diker to compile his own data from the voluminous information in recent FRENDKes (gh) VOA SITES Have you heard VOA-Careysburg, or Okuma? Yes, you have. Better-known names are but generalities. Each relay base has an accompanying receiving site (R): <u>Colombo: Ekala</u>, 14 mi N of Colombo: R-Seeduwa, 16N. <u>Monrovia</u>: Careysburg, 30 NE: R-Brewerville, 7 NW. <u>Bethany</u>: 26 N Cincinnati on Tylersville Rd; R-16 NW of tx site on Tolbert Rd. <u>Okinawa</u>: Okuma, 55 NE of Kadena AF3; R-Onna, 18 NE. <u>Munich</u>: 11 NE at Ismaning; R-Ueberacker, 15 NM. <u>Greenville</u>: "The Edward R. Murrow Transmitting Station" ("a small honor for a great man." to quote a teacher I had back in HS): 2 xmtr sites, A & B, and R-C, form an almost equilateral triangle with Greenville almost in the center. (Bob Underdown, Slicam Sorings AB) This brings to mind an extensive 4-page article on past VOA sites, based largely on the personal visits of Adrian Peterson, appearing in the 8/75 Australian DX News, and also broadcast over his Sri Lanka DX program (Suns. O420). Remember VOA-Algiers? But Adrian missed <u>WVUS</u>. I'll award a free copy of Adrian's article to anyone who can answer correctly: who, what, where, when and why was WUS? (gh)

INTRUDER WATCH It seems US military restricts its intrusions to stations which can hide their identity (from the FCC?) with a tactical call sign. Like "Kingpin" on 11945, with BBC as EFO, calling Crayfish 10/19 1445, then slight QSY. Gee, thanks. (gh)

lan MacFarland, Producer, Weekend Programs, and Deborah Weinstein, Producer, English Section, North American transmissions. CLOSED CIRCUIT

visited Radio Canada International's operations centre at Maison de Radio-Canada in Montreal to get some insight into the job being done by the 9 o'clock each night. staff of approximately 200.

N

ian MacFarland is Producer of Weekend Programs, including LISTENER'S MAILBAG and SHORTWAVE CLUB. He joined CBC as a Technician in 1959. later served in the CBC's London. England office for three years as a Production Assistant. and then joined RCI as a Producer in 1966. He says shortwave is the cheapest and most enjoyable way of informing people and he feels more public education is required to show people that shortwave listening is a pleasurable hobby. Mac-Farland says he really learns a lot about Canada when he researches the questions sent in by listeners.

Deborah Weinstein is the Producer of North American transmissions for the English section. Her show does "live" at

She spoke of a faithful audience of American listeners who write over 1000 letters a month to RCI. She says, "We Canadians are bombarded by the American media and Americans are not very knowledgeable about Canada. At RCI, we try to make up for that difference by making Canadian news, cultural news and music available to the U.S. Our current programming has no resemblance to previous programming which came out of this section. We now have a magazine show with its own theme and mythm and the emphasis is on Canadian/U.S. relations. Our program is 100% Canadian content. We give all points of view in the news."

Louise Lajole, Supervising Producer of RCI's English Service, is the first French-Canadian to have been appointed to that post. She spoke of the excellent co-operation between the different language sections and the good exchange of information which takes place. She hopes the staff newspaper will tell others "who we are, and what we do, and get them to contribute more to our programs." She added, "We are trying to get more contributions and we stress that the material be written with BCI's audience in mind and not for someone else. Our audience is entirely different and we cannot take anything for granted in our programming. We try to integrate meaningful events in Canada in broadcasts to other countries "

By Josephine Mallo

AM radio has a new sound

It is KTWG, a "nonprofit,

nonpolitical, noncontroversial"

interdenominational Christian

station which was to begin its

first broadcast at 6 this

"We will have good-quality.

inspirational Christian gospel

programs, good music, classical

and semiclassical," said Dr. Paul

E. Freed, president and founder

of Trans World Radio, an

international radio network of

"We are particularly

interested in Guam because of

its strategic position - because

of the Orient. We can reach

Mainland China, Southeast Asia,

east Russia and Indonesia."

which KTWG is a member.

Daily News Staff Writer

today at 770 on the dial.

morning.

Freed said.

Gontum Residing has been an Announcer for nine years "at GSC, almost exclusively with JCI. Redding works on the English service to Africa and the Middle East. He calls his job challenging because "serving Africa, the second largest continent in the world, is a bit like throwing ping pong balls on tennis court." He admits the a distance from the audience is a bit - overwhelming and, unlike radio in Canada, the audience reaction is not immediate. It from various Canadian centres sometimes takes weeks or months for the reaction to come by mail.

Alan Brewn, who was appointed Director of Radio Canada International in January, 1974, credits a task force in 1973. with opening up new possibilities for RCI. The task force, headed by Betty Zim-

merman, Director of International Relations, undertook a six-month study to determine how RCI's efforts compared with broadcasters in other countries Including England. The Netherlands, West Germany, Sweden and Yugeslavia.

Mr. Brown called a recent Gellup Pell of shortwave users in the United States "very rewarding". The number of listeners to Radio Canada International in the U.S. has increased 2.8 per cent since 1973. The BBC, as nunner-un, had an increase in American listeners of 1.3 per cent in the same period. "We feel that a listening audience of one million people in the United States is a pretty respectable flaure, considering we only broadcast three hours a day to that country," he said.

Alan Brown mentioned some goals for the future. He said RCi must increase its trading capacity with other broadcasters and make increasing use of their relava to boost service in Latin America and Africa. He added, "We must improve our service and reception with more facilities and, in this regard, we are ready to ask for permission to establish a transmitting station on Canada's west coast. it would be a logical development to have a transmitter in Vancouver so we could talk to the world in both directions east and west, from there."

RCI

June 23, 1975

New Sound For AM Radio The radio station and

transmitter of KTWG, located in Nimitz Hill, are the initial steps in establishing a larger transmitter in Merizo for international broadcasting, he said.

The projected Merizo station. KTWR, will have 200,000 watts of broadcasting power and will reach locations bordering and within the Pacific Basin.

The present station in Nimitz Hill has a transmitting power of 10,000 watts and will broadcast to Guam and adjacent islands, it was reported. The studio is only temporary and later will be linked to the Merizo transmitter. Freed said, with the studios and offices later located

downtown. The station will "start with local personnel," he added with the number depending on the rate of expansion,

The station's staff now is several missionaries and their families, supported by Christian churches and individuals in the United States.

The target audience is "all the people - whoever is home, the housewives, children, youth and we may even put on a short Vietnamese program." Freed said.

The station, which was built in three months, will begin with primarily music and later will add a variety of Bible programs. National and international news from Associated Press wires will be broadcast each hour, it was reported.

"We are interested in the people locally and in serving them." Freed said, "When we broadcast we will be talking

about Guam and our asset to Pacific Guam will not be in money." Daily The broadcasts will inform News. other countries about Guam and Agaña, will promote the island, he Guam. 22 Aug Freed estimated that the station normally would cost 1975 about \$2-3 million but "expects via less because of the staff, which Peter is not paid for labor, and Campbell facilities, which are already

owned or given to us." via The studio's tape recorder, Charles speakers, turntables and several other pieces of equipment were Α. donated by the men of the Taylor nuclear submarine tender (TRCA) Proteus, Freed said.

Trans World Radio has stations and studios all over the world, he said, including South America, Spain, Lebanon, Holland and France,

added.

A nice turnout this month and some high-quality reporting, with lots of s/on and s/off information. Now our usual tiresome reminders for the benefit of new members: please observe our deadline of the 15th; print neatly and legibly, if you must print (we much prefer typewritten reports whenever possible); use only one side of the paper; put your last name at the end of <u>each item</u>; give program detail and reception quality. NASNA report forms are available from Mac Leonhardt at Hq. for an SASE. And, as always, we ask that you report only your <u>best DX</u>.

Once, just before 1730 mx, a completely unfamiliar IS was played. Another time seemed to identify as "Voice of..."

following 1530 news. (Hill, Willis) Swamped with reports this month, some 60 plus. May have to yell Uncle yet. Late reporters were Laves, TX; Sharp, NJ; Brooks, CT; Cress, VA; Schipelliti, MASS. 73's

FUBLISHERS NUTES: As you can tell now report, section C dia not arrive in time for publication in the November FRENDX, it will return again next month.

HELPING HAND: Member Peter Schipelliti is in need of a manual and schematic for a National NC-183MR. If anyone can help,write Peter at 31 Beaverbrook Road, Burlington, Mass. 01803.

<u>HELPING HAND:</u> For Sale: Realistic DX150A. Excellent condition, $l_2^{\frac{1}{2}}$ years old, recently revamped. Selling because I have recently purchased R390A and have SX190, Send bid to: (terms negotiable) Walter R. Salmaniw, 20 Gladys Road, West Hill,Ontario, Mic 166, CANADA.

MIDWEST AREA DXERS--IT'S NOT TOO LATE to supplement your membership to NASWA w/a membership in GLDXA (Great Lakes DX Assn) and receive NEWSMEMO for news of local and regional interest. We've had a shaky start but with your help we can make it work. For more,info,write: Bill Whitacre, 2609 Devonshire, Lansing, MI 48910 or call: (517) 482-7996

If anyone is interested in Old Time Radio or utility \mathbb{N} informational lists, such as info on the FAA,FBI,FCC etc. contact Steven J. Handler P.O. Box 253, Deerfield, 11 60015. He has utility lists available for a small charge and old time radio recordings. Send an SASE for a list of what is available.

LATE NEWS FLASH - UGANDA -

A phème call received by Ralph Perry, DX HOTLINE editor from Winnipeg DXers, Jim Roberts and Ray Earton reports reception on Saturday October 25, 1975 of the Uganda broadcasting Corporation, external service in English on <u>9730kHz</u> form 2000-2100* at super strength, programming consisted of soul mx, hi-life mx, ID and NA at sign off. Announced broadcasts would occur on Sunday, Monday Wedneday and Fridays. further checks by your publisher on 10/26 revealed this schedule, s/on in EE at 1830 with reley of 15 presumed, mentioning MW and other SW Freqs. '; EE continued until 1910 then F^e til 1940 then A4 until 2030 then EE until 2100 s/off. Signal peaked at 2100 s/off. Checks on 10/27 revealed no trace of Uganda.

<u>New Postal Rates</u>: These are the International postal rates that are proposed to go into effect after Christams. Airmail to the Carritean, Venezuela, Colombia, - 25e per half ounce until 2 ounces then 21¢ per half ounce; The rest of the world 31¢ per half ounce to 2 ounces than 26¢. Canada, same as USA, Mexico, 17¢ first ounce, 15 ¢ after that. Aerogrammes - 22¢; International Reply Coupons- <u>42¢</u>. Registered mail - \$1.90.

Advertisement from Shortwave Craft Magazine, June, 1935 from Steven Handler

Topline tip. . . They're dropping off like fliest Per DSWCI, quoting WRH's new info, REUNION ISLAND, St. Denis has discontinued shortwave operations, keeping only 602 kc MW....AFNT-Taipei reported off SW, dropping 7215 kc. and 3990 kc. channels....PORTUGUESE TIMOR station "reportedly blown up" during recent excitement over there GRENADA has dropped 3300 kc., 11925 kc. and 15105 kc. No mtn of 5015 channel -- but this may have departed, alsol

•Editor: Ralph W. Perry 201 E.Cook, Apt. 416, Libertyville. IL. 60048

MOZAMBIQUE - As of 9/23, R. Cl. Mozambique, Radio Pax and Aero Clube de Beira reported mationalized and now known simply as "Radio Mozambique". New managing director is one Salomao Mutemba. Future uncertain of L.M. Radio run by SABC via taped pgms from Jo'burg. (Gerry Wood, S. Africa)

CAPE VERDE ISLANDS - 4721 kc., nom. 4755, R. Cl. Mindelo plans to up power to 5 kws. Ltr from this rars one dated 8/75 cent to WRH, noting current sked as *0830-0930*, *1400-1600* and 2000-2200*. (WRH via DSWCI)

and 2000-2200*. (WRH via DSWCI) 3885 kc., R. Cl. de Cabo Verde, 0031-0102*, w/PP pops, guit mx, poss. nx and tlks. Off to anthem, S-10+, very nice when hams not talking. Dug ID out of tape. (Morits) Praia hrd from 2250-004,0* with special xmsn on their national day. Good reception and clear at times, in spite of hams. Many mtns of Amicar Cabralts name. At close, played NA of Rep. of Guinea-Biesau. (Jaar) 10/19, pop-rock pgming and classical, nx at 0002 and apparent ID at 0008. Three IDs at 0059, NA and off. (Whitacre) 3930 kc., R. Barlavento at surprising 1v1 2315-2345 t/o w/mood mx, many orchls and PP ballads, long nx slot at 2330-2344. ID thot hrd in midst of nxcast. (Ed.) Sao Vicente hrd 2200-2300 with different tyme of nomine than Prata. Considerable ORM. (Jaar) Noting

hrd 2200-2300 with different type of pgming than Frais. Considerable QRM. (Jaar) Noting Barlavento from 2325-0000*, classical mx, lady annor 2356 and tent. NA at 2358. (Whitacre)

THATIAND - Ministry of Education station writes they are inactive on shortwave since January 1974, no current plans. (Ed.)

UNIDENTIFIED - Station on the shortwave "twilight zone" between SWEC and ute hrd on 7941 kc. 0100-0130 on USB and again in a.m.'s on 6742.5 kc. from 1135-1235. FF anmts on minute, ancing time which is exactly one hr 5-minutes and his-seconds ahead of GMT. Even

Naval Observatory, to whom I sent tape, is stumped. (Handler) 8850 kc., Asian "musical number" stn, IL in sing-song lang at 1315, fun to hear but an absolute enigma. Ghenn? (Ed.)

HONDURAS - Radio El Ceiba allegedly to go SW on 6145 kc. in early January. Owner is Honduran politico Miguel Andonie Fernandes of the Audio Video Co, which also owns R. Lux among other stns. Plans also include SW ops for R. America and R. San Pedro. All part of constitutionalist candidate campaign. (S. Reeves via DSWCI)

SOMALIA - Provisional QSL revd from Mogadiscio for 9585 kc. msn. Ends any doubt on this one. (Segal) The new hi-pwr xmtrs should open whole new world of pigeons for stamp collector stn honcho M.M. Afran, hi. (Ed.)

Propagational picks. . . Solar activity will remain low, though probably not as low as during recent weeks. The most significant geomagnetic disturbance since last April was noted Oct. 7-9 and, in diminished form, this is expected to return. Look for A-indices in the 15-30 range Nov. 2 through 6. The A's for the rest of the period will probably vary on a day-to-day basis from about A-3 to A-12. Best bet -- chances are good for favorable low freq African reception during the first week of November. Bazongal

SWAN SONG - Cf. MM-DXH. Source now leans away from CIA operation of Radio Swan due to its being listed in BECMS as "monitored abroad" (ie., FBIS). CIA wing wouldn't blow whistle on its own operation is the traditional logic. But source says one well-known right-wing rlg and apple-pie broadcaster is rumored to have purchased interest in Honduran stn some five years ago. And, this guy is also supposed to have some fallow equipment. (Anon.)

TURKS ISLAND - Morning operations indeed a reality, as reported in MM-DIH by Jack Jones. VSI xmting rlg pgms, usually hrd here from 1100-1130. I usually snare an ID at 1122 as, "Fou are listening to Turk Islands Broadcasting Service, broadcasting from Grand Turk Island." (Rockwood) No fq quoted but presume usual 4788. (Ed.) 4788, R. VSI w/pops show, Joe Simon's "Kung Fu Bump". ID and vy poor audio at 2243-2301+. (Morits)

FRAZIL - Update on Brazilian flux per letter rowd by Bob Zilmer from Robt. Veltmeiter, of TRAIL - Update on Brailian flut per fecter root by Bob Liner from Robe. Versetter, i Brazil: 8721, time signal station PFE1 active, and in mear future to be joined by time signal suc of Observatorio Nacional on 2.5, 5, 10, 15, 20, and 25 mHz from Brazilia. 6025 kc., Em. Piratininia closed down by federal government. 6065 kc., R. Rural using this fq 0900-1100, 1L00-1700 and 2000-2330. 6095 kc., stn on this fq. now using call R. Tupi de Sao Faulo.

15105 kc., R. Rural Braxileirs now inactive.

15135 kc., R. Record inactive, as is 15125 Sociedad da Bahia. 15155 Tupi is irreg. 15115 kc., R. Jornal do Commercio is now testing and wants rpts. (all via Zilmer)

COLOMBIA - 5900 kc., R. Nac. de Columbia, noted at 1030 w/strong signal, SS tlk and LA mx, gongs and clear ID. Either a test or transmitter image, not hrd since 10/6. (Zilmer)

UNIDENTIFIED - Apparently Jack Jones is again going to make sure we all climb out of the sack at we hours. First Swan, and now: "What the hell is going on with this fellow on 6255 kc, just north of the dial of Peking?" Coninuous US pops on 10/7, 10/10, 10/11 and 10/13. Noted three times one song about Cassius Clay who changed his name to Muhammed Ali. 30 second pause between numbers, segued. (Jones) Might be heavyweight DI, OM. (Ed.) Seriously, though, famous VOA spur here, but doesn't fit. Possible ute melody mirror? (Ed.)

INDONESIA - Craig Tyson, our Aussie amigo, sends the latest on the Indo situation: 2260, unid. Indo nx 1305 and 1500, IDs as RRI. 2830, RRI Tanjung Kerang, ID at 1530. Not Palangkaraya as I first thought.

- 3137, R. Siaran PDK Cikampek, Studio Jawa Barat, s/off 1510. 3260, RKPDK Sumbawa, s/off 1645.

- 3342, RDK Pandeglang, Jave Barat, ID noted at 1519. 3360, RDK Lahat, Bali, stn ID at 1435 and then gamelan mx. 3965, RRI Pontiniak, hrd with Jakarta nx at 1500 and s/off at 1525.
- 3925, RRI Bogor, Jakarta nx at 1500. Also uses 3952 kc.

5882, RRI Pekanbaru, ex-5886, 5845, local Indo singing at 1525. 1376, RFDK Soppeng, Sulawesi Selatan, stn ID after Jakarta nx at 1515. 7210, RRI Biak, local nx at 0830 (Tyson, all of above) 7210 RRI-Biak hrd at exceptional 141 from 1235 regional nx through Tong Bennet album to 1300 mational mx relay. Kine 1v1, comparable to Ambon 7140. Next day, fq covered by RR stn. Fatience will be reverted as Russian stn just "disappears" on random days, uncovering Biak at arachair quality.(Ed.)

40

LAOS - 7115 t, RNL-Vientiane has been rpted here by BECMS and noted 10/20 SEA stn here 1208-1235 w/nx and comment in lang, many mtns of Vientiane, Meo, Pathet Lao. (Ed.)

.USSR - Royd ltr from N. American Syc today signed by Mrs. Lucy Larina. What's become of Mrs. S? (Larry Talbot) Gerry Dexter confirms via phone Mrs. S is still there as of this month, so probably an assistant rather than a replacment. (Ed.)

SARAWAR - 5005 kc., Sibu, 1125 talk in Iban by YL, poor with fades. (McNeil)

CHINA - Peihal Fishery Station tentatively the one here on 8756 1245-1305+ till clobbered on both sides by utes. Animated IL voice w/orchls, anmt on hr by IL, mx resumes. (Ed.)

TENEN - 7300t, R. Sanaa, hrd 10/13 w/AA chants, tlks on Koran 0310-0325. Thot abandoned all figs in favor of 5805 kc. (Rockwood) Easy to tune down to 5805 and ck it out (Ed.) 5805, R. Sanaa noted here from 0325 t/1 OM in AA f/by IL with poss. ID. 15 minutes of songs, with possibly titles in between by IL. Noise lvl terrible. (Morits) Skeded //'s.

ODDS 'N' ENDS - 0. Lund Johansen, founder of the WRTH and HTL died at the age of 83 on Sept. 12 (DSWCI) Those wishing to send get-well cards to DI-Ace Al Niblack, former FS editor now under the weather should use this address: A.R. Niblack, 511 W. Hampton Dr., Indianapolis, IND. h6208. Speedy recovery, Al! (Ed.) You've read the book. You've seen - the movie -- now, try it for yourself. The famous Gilfer A-20 LF model preselector. Give your rx a kick in the pants. First \$40 check buys mine. (Ed.) What did you m by not getting the Mid-month DI Hotline (MM-DIH)? Breaking news on Admiralty Islands, What did you miss New Hebrides, Oman, Swan, Turks and more. Get with it. For a stinkin" \$3, you can't afford to miss it. Write Mac at NASHA hdqtrs today. (Ed.) Until further notice, tread with great caution through Angolan loggings. Great controversy still rages between the Euro Diers and even Africans down there themselves as to who is on 1970, 1962 et al. Info repeated in Sept. DIH from DSWCI being disputed across the pond, so beware. (73 de ram)

<u>HELPING HAND:</u> Mike Agner, 19 Grove Street, Waldwick, NJ 07463 is looking for two mica trimmer capacitors, one 4-70pf, the other 4-80pf. Needed to replace trimmers on the high ban (16-34mHz) oscillator/mixer on a Hallicrafters SX110. All correspondence will be answered, and please state price. LASWA ANTENLA/ACCESSORIES SURVEY *** PART 6

Compiled and edited by: Neal A. Perdue, WDX4NAP Rt.1, Box 92-B Falkville, Ala. 35622

SPECIAL BONUS- A Multiband Wire Antenna

is is a re-run of an article by this editor which appeared in Feb. 73 LENDX. On the bands covered, this antenna is comparable with the SWV-7. his is not too surprising, since the latter uses L/C traps and the home rew model described here uses the quarter-wave ground-plane principle 1.2 is superior since there are no losses involved. This is a GOOD mited-space antenna for the bands covered, and shouldn't cost more han \$5-6 if you can come up with some used poles or use a tree for the ertical mast. While it is designed for the six bands listed, it is not) be considered useless for other freqs. It does not require a tuner. Iditional bands may be covered by adding wires using the formula: 234 ivided by the mid-band freq in Mhz. Third-harmonic relationships are sed to advantage, as in the case of wires A and B. This is the only intance in electronics that I know of where you get something for nothing.

Distruction notes: the easiest way to connect the bared coax braid to le ground-rod (should be six feet or more down) is to use a hose clamp. emivertical wires should be enameled, or at least insulated. When trimm lg coax, be sure to cut off excess braid so that it cannot short against le center-conductor. If two trees are available, a horizontal wire can e strung between them and be used as the support in place of the mast. f most of your listening is on the bands covered, this is a FB antenna.

NASWA'S dues are \$13 per year for members in North America, and for delivery via First Class Mail. Overseas dues are the same, but airmail is available for an additional fee. The following is the additional fee for overseas airmail: Central America, the Carribbean, South America and Europe \$7; Asia, Africa and the Pacific \$9.

NASWA'S DX HOTLINE is compiled twice a month giving the DXer the very latest DX news while it is hot. The DX HOTLINE is edited by veteran DXer Ralpk. Perry. All reports for the DX HOTLINE go directly to Ralph at 201 E. Cook St., Apt. 416, Libertyville, III. 60048 USA. One issue of the DX HOTLINE is incorporated in each issue of FRENDX, the other issue, the Mid-Month DX HOTLINE is available in a separate mailing to NASWA members for \$3 per year in North America. It is airmailed overseas for \$5 per year. These fees are, of course, in addition to the annual membership dues.

All inquiries, checks/ money orders/ dues/ renewals and/or orders for the Mid-Month DX HOTLINE should be sent to NASWA Headquarters:

P.O. Box 13, Liberty, Indiana 47353, USA

All remittances should be in U.S. funds. Sample FRENDX and FRENSMEHTMET are available for \$ 1.00. DX HOTLINE

Reports to the individual sections should go directly to the editors listed below:
