George Wood

Angola. Contrary to the report in DX-B 1486, Radio Nacional has not left 4820 kHz. This fq is still in use with reduced power and can be heard evenings. 4790 kHz, as reported, is a new fq parallel to 4820 and with higher power. Other fq's heard recently include: 3355, 3375, 7245, 9535, 9660 and 11955 kHz. (Mikki Veclar, S.Africa).

Belgium. BRT has a DX programme in Spanish called "Rincon DX" on the first and third Sun. of each month. Send DX information to: BRT, Paul Izenic, Argentinien, Belgium. (Emilio Povr-

Brazil. The second harmonic would be heard 3000 km away from the transmitter. It has been noted on weekdays after 0800.

Cameroon. The frequency 1030-1130 and 1170-1270 kHz. (Mikki Veclar). (Francesco Clemente).

China. Here is a new frequency on 11695 and 11705 kHz. To Africa: 1830-1930 kHz. These same fq's are heard above. 2130-2230 kHz.

Colombia. Ecos frequency 0505. (Francesco Clemente).

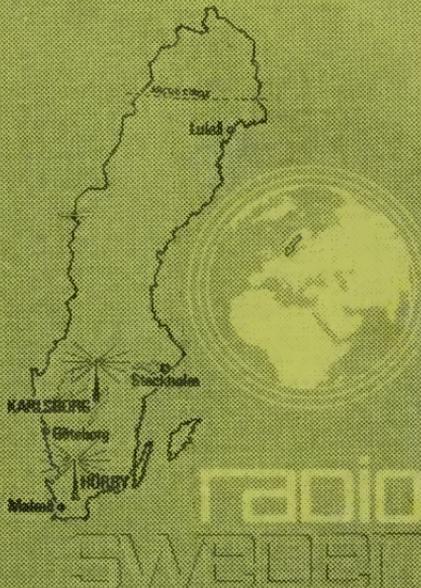

Ecuador. HCJB's frequency 4960 kHz, the second harmonic. (Raymond Riso).

Guinea. The frequency of 4910 kHz and the second harmonic.

Kuwait. According to the schedule will carry its frequency 0800. No fq's will be heard the evening and night.

Malta. Radio Mediterranean II has a French DX programme on Sun. at 0730 on 9770 kHz. Radio Mediterranean II uses 9605 kHz at this same time and day for Greek programming. (Peter Pompe, Belgium).

Sweden. Here are the changes in our Radio Sweden schedule for the period Sept. 3 - Nov. 5, 1978: 0000-0130 in Spanish to Latin America, 9695 kHz replaces 11905. 11705 continues in parallel. In Swedish at 1300 and French at 1330, 21690 kHz replaces 21660 to S.Asia. In Russian at 1530 to Europe, 6065 kHz replaces 1178 and 9660 kHz, while to N.Asia 11790 kHz replaces 15345. In English at 2100 to the Middle East, 9605 kHz replaces 15415. In German at 2230, to Europe 6065 kHz replaces 9605, while 1178 remains in parallel. In English at 2300 and in Swedish at 2330 to N.America, 9690 kHz and 11705 kHz will be used, and not 15205 (the Swedish broadcast uses 11705 to Latin America). 1178 kHz continues in parallel to Europe. (Tage Ullman, Swedish Telecommunications Administration). p.t.o.

has been heard 3000 km away from the transmitter. It has been noted on weekdays after 0800.

on 9745 kHz in French earlier schedule). Heard at 0435. (Francesco Clemente).

East Asia: 1100-1200 kHz and 1300 kHz MW. To Africa: 2030-2130 on the same fq's as Douard, France).

kHz. Heard around

0-1900 on 15125 kHz. Radio Federacion, on weekdays as in the WRTH-78.

ly a second harmonic.

August, Radio Kuwait frequency remains 0500-0600 kHz. (England) - 12085 kHz in (England).

Welcome to 53 new members joining in time to receive the October FRENEX. We hope they find their new membership to be helpful.

DX LIMERICKS

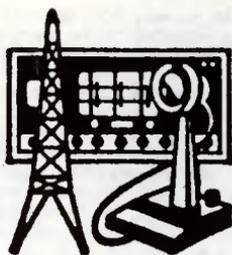

This month's trash is from John Lackmann, Lexington, VA. The dictionary defines a limerick as a nonsensical verse having five lines in which the first, second and fifth longer lines rhyme, as do the shorter third and fourth. Any NASWA member who wants to try his/her hand at such nonsense is invited to send his/her creation to HQ for possible publication in future issues. Remember, it must be a true limerick.

A WARC member named Hans,
Said to all of his SWL fans,
"I propose that we lobby,
On behalf of the hobby,
For quadrupled frequency bands!"

A thoughtful DXer named Snow,
Said, "To heaven I guess I won't go,
For I have a misgiving,
That 'Real Tips for Living',
Is not the best part of the show."

NOVEMBER 1978

Greetings. We hope you find this month's SWC and FRENCH interesting and useful. This is your magazine. Our material is submitted by you, the NASWA Associate. We are grateful for this month's contributors and ask that you send your items to the appropriate editors for next month. SWC solicits long and short articles on any subject relating to shortwave broadcast radio. Send your contributions to me at the address above.

Capital

Experiences

WASHINGTON CONNECTIONS: DX EXPERIENCES IN

THE NATION'S CAPITAL

by Daniel A. Robinson, Washington DC

The Diplomatic List--in Washington, DC, anyone who really knows their way around the diplomatic circles has one. The list is a dark blue magazine available from the U.S. Government Printing Office (published by the Department of State), literally is a master directory for Embassy Row in Washington. It contains not only the current addresses and phone numbers of each country's major embassy personnel, but supplies the names, titles, addresses, and phone numbers of most minor personnel as well, all the way down to the Assistant Agricultural Counselor or Naval Attache.

At the beginning of my own college and DX career in Washington, DC, some three years ago, I obtained a copy of the Diplomatic List at a State Department book store. Without realizing it, I had set out on a trail that would lead me to, among other things, lavish embassy parties, conversations with numerous ambassadors and consulate officials, contacts with the CIA and its radio arm, the FBIS, visits to back-room radio monitoring posts accessible only to "authorized personnel," and lasting relationships with political refugees and exiles from Angola, Uganda, Thailand, and the Basque region of Spain. Many of the experiences that follow are not uncommon in Washington -- the city is as much a mosaic of ethnic and international diversity as it is bureaucratically complicated. The difference, however, comes with one's involvement with radio, specifically shortwave radio. For obvious reasons, many of the personalities portrayed here shall go nameless. Nevertheless, this account is purely factual.

Embassies in Washington are scattered throughout the Northwest portion of the city, generally along or in the vicinity of Embassy Row on Massachusetts Avenue, an impressive line of red brick and Victorian style mansions with various national flags flying outside. Many Third World embassies are located on Leroy Place, including the Nepalese and Mauritanian embassies. The Ambassador of Nepal, according to the Diplomatic List, is His Excellency Padma Bahadur Khatri. The name is one that should be instantly familiar to most DXers -- Khatri -- the verification signer from Radio Nepal. A QSL from Radio Nepal had long eluded me, and my purpose one day in September 1976 was to obtain one with the assistance of the embassy. A letter, forwarded by the embassy to K. B. Khatri in Kathmandu soon brought results.

The Embassy of Mauritania is adjacent to the Nepalese embassy, and on the same day I had an appointment with the First Secretary (the official just under the Ambassador in rank) to discuss the possibility of establishing a tape service for broadcasts from Nouakchott. Mr. Mekhallo Ould Sidi was indeed interested, especially after hearing an excellent sign-on recording of Mauritania on a cassette. "Yes, yes, of course, I am very familiar with radio hobbyists," he told me in response to my query. In fact, said Mr. Sidi in an enthusiastic tone of voice, he had once received a letter from a DXer requesting verification of a reception report of Radiodiffusion de Mauritania. He went into an adjoining room and brought out a letter with the embassy reply. The originator of this special diplomatic DX request?? Probably the best known QSLer the hobby has ever known, Mr. Gerry Dexter!

With so many foreign nationals residing within its boundaries, the District of Columbia (and its suburbs) is in every sense of the word, an international city. Meeting someone from another country is often easier than saying "howdy" to a fellow American. I submit, as an example, my encounter with a former Ugandan diplomat, Mr. X, whom I met one rainy night on the last bus from downtown. We were the only two persons on the bus at 1 a.m., and I recognized him as being an East African. Moving up to the seat behind the gentleman, I introduced myself and inquired as to his country of origin. "The State of Blood," he replied. Somewhat startled, it took me only a few seconds to determine just what he meant, and to a certain extent, his personal feelings toward the regime of Ugandan President Idi Amin Dada. I briefly mentioned my own DX connections with Radio Uganda, touching on the Blue and Red networks and the new international service, at which point Mr. X laughed and said, "You know, it's just another propaganda ploy by Amin . . . he is fully aware of the condition of Uganda's economy and whatever publicity he can gather through the new international station will do his regime well . . ." Mr. X showed me his wallet containing Ugandan government credentials, stamped invalid. We exchanged addresses and phone numbers and, ringing the bell for the next stop, he met my extended hand with one even firmer and stepped out into the wet DC night.

In November 1977, reports of reception of Radio Lesotho were coming fast and furious, and indeed, since the reactivation of that station, Maseru has been a frequent visitor to the shacks of many DXers. By Washington standards, the Embassy of Lesotho is a small operation with only two embassy personnel listed in the Diplomatic List. The economic and political interests of Lesotho, as with many other Third World nations does not warrant one of the large and luxurious mansions along Massachusetts Avenue. One Winter day, a call to the Embassy of Lesotho brought a somewhat incredulous reply from the desk receptionist. "But one can't hear Radio Lesotho in this country . . . it is very weak in power and only for Maseru listeners," she told me. Most DXers have run into this problem before, the classic case of a non-DXer confronting the realities of the forces of ether. I first explained to her who I was, to allay any fears that I might be a CIA employee attempting to pry some top-secret Lesotho government information out of her. "Listen, may I play you a tape recording of Radio Lesotho right here on the telephone, right now?" I asked her, and hit the play button. The evidence was quite overwhelming -- a crystal clear recording of Radio Lesotho at its 0400 sign-on.

Some days later I received a call from Mr. Maieane, First Secretary of the Embassy of Lesotho, inviting me to meet with him and explain how it was possible to hear Radio Lesotho in Washington, DC. That same day, his black embassy Granada pulled up in front of my dorm, and carrying my SPR-4 and a Dan Jamison stick antenna for demonstration purposes, I went with Mr. Maieane to his Bethesda, Maryland apartment. After a demonstration of the SPR-4's capabilities at 2200 GMT, he asked with great anticipation if I could do the same with his radio, a Blaupunkt table console model. I said it would be quite impossible for him to hear Radio Lesotho on his own radio, but before I left that day I had set up an outdoor antenna for him, a 50 foot wire snaking 10 stories down the side of the building. Since that day, I have met Mr. Maieane only twice, and only regret I couldn't have worked a proper miracle with his old Blaupunkt.

Many Washington embassies are located in offices, and a substantial number of these are in the Watergate complex overlooking the Potomac River. In 1976, the Diplomatic List had Sweden, Yemen Arab Republic, U.A.E., Sudan, Somalia, Qatar, and the Bahamas in various suites in Watergate. Armed with a cassette recorder containing a series of recordings of the Sudan, Radio Mogadishu, Qatar Broadcasting Service, and the Yemen Arab Republic, I set out one day to visit these embassies and introduce the uninitiated to shortwave reception. Without exception, and after some expected suspicion as to my motives, the embassy personnel were quite amazed that they could actually hear their home countries in Washington, some on a daily basis. A counselor from the Yemeni embassy inquired as to how to obtain the best receivers for monitoring Radio Sanaa -- cost was no obstacle. A Somali official sat open-mouthed as I played a perfect tape of Radio Mogadishu, and was even more impressed by a fairly poor tape I had of Radio Hargeisa. Many months later, at the height of the conflict in the Ogaden, I was to enlist the help of a Somali receptionist in forwarding a reception report to Radio Hargeisa -- no reply has been forthcoming, proof that even the most direct connections often yield few results.

One of the most interesting things about knowing one's way around the Washington embassy circuit is the out-of-the-way places one will find shortwave receivers and SWLs. DXers are very few, but consider, for example, the lone SW4-A that serves the OAS (Organization of American States) in the magnificent Pan American Union building; the receiver, rack mounted in the OAS basement is used to record programs not of domestic Latin American broadcasters, but of VoA, UN/OAS, and other major international stations.

In the Indonesian Embassy, Mr. Suradja Puraatmadja tuned his Zenith Trans-Oceanic every day hoping to catch the Voice of Indonesia overseas service. He knew little of regional Indonesian outlets (not that he could have heard them on the Zenith), but was nevertheless pleased with the list I left with him. Many of the offices at the ICA (formerly the USIA),

and VoA are equipped with receivers -- curiously they are not the latest models and are usually tuned to FM for the office secretaries rather than shortwave.

Carlos was an Angolan refugee, a "political" as they are called. I met him one day on the bus and came to know him as a friend and appreciate the difficulties he had experienced after leaving his home near Lobito in Angola. Carlos would pay me many visits in the late evenings to listen to Emisora Oficial or to Radio Clube do Huambo, the latter being the first of the regional Angolan stations to be reactivated after the civil war in that country. There were other foreign students for whom I monitored and taped broadcasts. During the brief civil disturbances in Sierra Leone, I stayed up many evenings well past 0600 GMT for local newscasts from Freetown. Arab and Iranian students (there are literally thousands in Washington) stopped by regularly to hear the latest from Riyadh, Tehran, Amman, or Cairo. One Saudi promptly ran out to the nearest electronic store and plunked down \$150.00 for an ICF-5900W, as easily as if he were buying a Coke. I must confess that I had considerable trouble explaining to him how the receiver worked and that every Arabic speaking station was not Riyadh. For an entire year I roomed with a Persian and my SFR-4's dial was frozen on 15084 kHz while DX catches beckoned on 60 metres. Several lavish Iranian Embassy parties attended by hundreds of well-known dignitaries, and offering large amounts of Iranian beef and rice soon compensated for any inconveniences.

Some years ago, a lengthy article in FRENEX outlined the history of the Foreign Broadcast Information Service (FBIS). The FBIS remains virtually unknown to most Americans and I would venture to say, to Washingtonians as well. For many visitors to the Washington headquarters of the FBI, a mammoth concrete edifice on Pennsylvania Avenue, the monitoring of foreign broadcasts is portrayed as a function of the FBI!! A display photograph at the beginning of an FBI tour shows an agent with an earphone presumably monitoring broadcasts from overseas on a Zenith TransOceanic. So much for misinformation. No mention is made of the FBIS. The FBI, to my knowledge, does not indulge in foreign broadcast monitoring, and even if my own information proves faulty in this respect, how many Americans are aware of this FBI function??

On several occasions, I took the initiative and phoned FBIS -- there is a number listed in the government section of the Yellow Pages, as well as one for the National Technical Information Service. The Azores/Portugal controversy, as well as the reactivation of Surinam and Guinea Bissau, made me wonder if the FBIS was on its toes (or dials). I was able to break through the effective secretarial barrier several times and spoke to a gentleman in charge of "L & R" (presumably Listening and Research). No, they had not detected the new frequencies of Surinam and Guinea Bissau and at the time did not know if 4865 was a transmitter in the Azores or in Portugal (neither did the Portuguese Embassy, embassies being notorious for out-of-date or inaccurate information).

Radio Swan de Honduras caused quite a stir when it reactivated on 6000 kHz, from the Honduran city of San Pedro de Sula. The reply from a Honduran Embassy official to my personal inquiry was a cold "no comment" and a denial of any knowledge of either the present or past Radio Swan -- curious, since the old Radio Swan's purpose, location, and source of funding were no secret. Many former USIA and State Department employees were, and still are very much aware of the facilities on Swan Island, still utilized today, but not for commercial radio broadcasts. Radio Swan has yet to return to the air from Honduras.

REFLECTIONS: IS THERE A ROLE FOR THE SWL?

I think back on the experiences described herein with not a small amount of wonder. Yet, I cannot escape a feeling of frustration. It is based on the knowledge that shortwave radio is an invaluable resource, but one that remains such an unknown to so many people, regardless of recent increased publicity given the "hobby." For me, the question can be phrased: Is there a role for the shortwave listening community beyond the present scope of SWLing as an exciting, but isolated activity?

With regard, for instance, to the upcoming WARC 79, there has been an obvious lack of a unified voice for the SWL and DXer, or given that voice, the acceptance of its views. Understandable, SWL representation at meetings in Washington prior to WARC has been limited. Has there, however, been an official policy stand by SWLs through ANARC with regard to international broadcasting in the tropical bands? Not really -- only a general undercurrent of disapproval.

DXers and SWLs alike are bound by common experience. Most of us, young and old, recall the first DX "trip," a stimulating and mind-expanding event. The advances in broadcast technology have enhanced the effectiveness on international broadcasting, making our listening easier in some respects, more difficult in others.

Small nations send their voices across oceans with increased power, and we cheered the addition of new DX countries while protesting the closing of many other stations. Now, the very improvements in broadcasting that permitted improved reception of radio across man-made and natural boundaries, ironically threaten DXing. We would hope that the technology that produced communications satellites and high-power shortwave transmitters would also be able

to solve the problems of overcrowding in the radio spectrum. But as DXers, we know instinctively that La Voz de Galapagos cannot survive amidst a combination of 500 kW giants.

Shortwave listening, in summary, has yet to become a "culture building" tool, an active influence upon public opinion or U.S. foreign policy. Shortwave listeners are much more than a branch of amateur radio, a stepping stone to the "apogee" of the radio hobby. We are, and can offer, much more. We're part of a growing network of international communication (and recently, the objective of considerable commercial enterprise on the part of equipment manufactures). Let's not be passive about our role. In times of increasing international tension, very often initiated by government policy out of touch with actual human needs and desires, we could very well make the difference between disaster and the same resolution of our problems.

 Head of the U.S. Delegation-WARC 79

 Washington DC 20520

WARC 79

(Note: This letter was sent by Larry Magne, Rockledge, PA, on 18 Sep 1978)

Dear Sir:

For the past three years I have been attending the FCC International Broadcasting Service Group (IBSG) meetings as the representative of the Association of North American Radio Clubs (ANARC), and one of its member organizations, the North American Shortwave Association. ANARC is the umbrella organization for United States and Canadian shortwave broadcast listening groups, and as such endeavors to act in behalf of the American shortwave broadcast listenership-at-large.

Public involvement in the U.S. WARC decision-making process has been nearly nonexistent, even though there are several million shortwave broadcast listeners in this country. In domestic broadcasting, the FCC simultaneously licenses stations and represents the interest of listeners to those stations. By contrast, in international broadcasting the FCC licenses stations whose audiences lie outside of this country, while the broadcasters to whom the American public listens operate outside the purview of the Commission. Over the past three years the Commission has resolved this dilemma by tending to concentrate on the requirements of FCC-licensed American broadcasters, with relatively little concern for the not insubstantial difficulties faced by American audiences trying to hear overseas broadcasts.

There is no substitute for the FCC in this capacity. Foreign broadcasting interests are excluded from the U.S. WARC decision-making process; Government agencies concerned with HF broadcasting are statutorily disallowed from targeting broadcasts to audiences within the U.S.; no substantial American commercial interests, e.g. advertisers, are involved with IB transmissions to the U.S.; and there is no lobby in Washington to fill the vacuum. In short, whereas the public convenience and necessity is paramount in decisions affecting domestic broadcasting, the U.S. listening public's requirements concerning IB are met only to the extent they coincide with other interests being fulfilled.

As you pointed out in our conversation last Friday, at this late hour the question is not whether the U.S. WARC decision-making process is suitable *vis à vis* U.S. listeners to foreign broadcasts. I concur, especially in that, thanks to the excellent conduct of the IBSG participants, many of the problems facing U.S. listeners have been given careful consideration. The Chairman, Mr. Leinwell, in particular has extended himself to ensure all views were fairly heard and that sound ideas were properly researched for possible submission to the Commission. Despite this, there exists a gulf between the FCC 8th Notice of Inquiry and the best interests of the American listening public.

First, the American listening audience, insofar as can be determined by comments from shortwave listeners and the studies done a decade ago by Professor Don D. Smith, includes a sizeable number of listeners concerned primarily with Home Service programming, either relayed over the International broadcasting bands, or as found in the Home Service "Tropical" shortwave bands. Many of these listeners are expatriates and "ethnics," but a number are Americans "traveling" to other countries by radio, who find Home Service programming more suitable than programs, usually of a political nature, especially tailored for foreign audiences. The Tropical Bands, notably the 5 MHz band extending from 4750 to 5050 kHz, thus serve a notable function: Utilizing only a single channel of spectrum space, usually at low power, Tropical Broadcasters simultaneously reach both domestic and overseas audiences. Added to the fact that these bands are also shared with Fixed Services, the Tropical Bands are a worthy example of spectrum conservation.

In the 8th NOI, the Commission changed the definition of the 5 MHz band portion from 5005-5060 kHz from Tropical Broadcasting ("202") to International Broadcasting. Tropical broadcasters, to their credit, operate at far lower powers than their international counterparts. Many are 1 kW or less, and few exceed 50 kW (cf. the 1978 World Radio TV Handbook). Intrusion

of International broadcasting into the Tropical Bands thus makes harmful interference to Tropical domestic broadcasters inevitable, unless they, too, become parties to the "power race" that has long been taking place within the IB bands.

The interests of American shortwave broadcast listeners thus would be adversely affected, and international cross-cultural communication among peoples diminished, should the 5 MHz Tropical Band be altered to allow International Broadcasting. Further, although it does not affect American listeners directly, the 8th NOI 5 MHz IB proposal is by now well known throughout the Tropical broadcasting community, and the strong negative reaction suggests that pursuing this proposal to Geneva will result in alienating smaller nations, whose support may be needed for American proposals.

A more suitable alternative may be to rationalize the existing 4 MHz IB band to allow it to properly handle the broadcasting load when the maximum useable frequency is below the 6 MHz IB band.

Second, from the viewpoint of American listeners, the diversity of available program material is being threatened by increased activity on the part of a relative handful of broadcasters. Certain of these stations operate the same unjammed programming to the same ITU target zone on 30 or more shortwave channels simultaneously (per BBC Monitoring Service).

The following may provide a framework for a solution:

1. Power limits for all unjammed services, e.g. no more than 350 kW per transmitter, with a "grandfather clause" to cover existing transmitters of greater power.
2. Limit of one channel per broadcaster per band carrying simultaneous unjammed programming to the same ITU target zone.
3. Creation of special band segments, e.g. of 100 kHz each, within each IB band for the exclusive use of Tropical countries, plus non-tropical nations with populations under, say, 50 million.

This should adequately meet the needs of American listeners and broadcasters, while satisfying requirements of those nations whose support the U.S. may seek at Geneva.

In closing, I would like to commend the Commission and the IBSC Members for accomplishing a great deal despite a procedural arrangement that has not necessarily been in the best interests of the American listening public. Especially noteworthy has been the cooperative effort to eliminate sharing between IB and Amateur in the 4 and 7 MHz bands. At this late hour it would be pointless to propose fundamental procedural changes in the WARC process, but I would be grateful if you, as chairman of the United States Delegation, would consider the points enumerated in this memorandum.

Respectfully,
(Signed) L. Magne

Smart Receiver

THE INTELLIGENT RECEIVER-RO-153 by PHILIPS
by Steven P. d'Adolf, North Andover, MA

For those of you who were heard to express an "oh" and an "ah" at Gilfer's presentation and description of the NRD-505 receiver by the Japan Radio Company, here is a receiver with even more exotic features. The receiver is the new Philips RO-153 which was designed with a microprocessor as part of the receiver. It is one of the very first LF/MF/HF general-purpose receivers to exploit microprocessor techniques, not only as an electronic memory for storing a number of channels for instant recall, but also to dedicate a central processing unit as an aid to tuning and control. This makes possible, for example, such features as a continuously variable tuning rate - the microprocessor "senses" the rate at which the tuning knob is being turned and adapts the synthesizer increments accordingly. With such a facility it then becomes logical to provide synthesizer increments as low as 1 Hz. The microprocessor similarly provides the facility of automatic searching at selected rates between the limits of any two programmed frequencies, with the ability to stop searching when a desired signal is received. Automatic search is available in nine rates from 10 Hz to 6 kHz per second.

Ten different frequencies can be stored in the random access memory (RAM) devices. These frequencies can be changed at any time by means of the panel-mounted key-pad buttons. By means of a small accumulator, the information is retained in non-volatile form for up to six months in the absence of normal power. New frequencies can be tapped into the memory while still listening to the frequency previously chosen. To avoid accidental erasure of data, a special erase button must be activated simultaneously in the manner of audio tape recorders.

Rather wryfully the designers point out that the "tuning knob" is strictly unnecessary since the full range of tuning operations can be carried out by means of the keypad buttons, including variable speed searching. Nevertheless, they feel that the time has not come yet to break with traditional practice, and so the knob is fitted and coupled to the microprocessor.

The unit is of modular construction and many of the plug in modules can be checked individually with external test equipment. A wide range of crystal selectivity filters

are readily available and up to five can be fitted to meet the user's requirements.

With the rapid rise in the use of microprocessors for home and business use, it should not have been unexpected to see their use in general coverage receivers. By themselves sophisticated receivers and special purpose microprocessors are not new. What is new and significant is the marriage of the two using digital techniques but within the framework of the analog circuitry still needed for the signal path.

(Parts of the above article are from a review of the receiver in Telecommunications magazine written by Pat Hawker.)

Friends via SW

DX FRIENDS VIA RADIO PRAGUE

by Ed Ricchezza, Philadelphia PA

This experience happened in the fall of 1970 - a few months after I started DXing. I was listening to the DX program from Radio Prague and Peter Skála, their propagation engineer was answering technical questions. My ears perked up when I heard "... from Philadelphia, Pennsylvania." I was immediately intrigued because the questioner had antenna problems similar to mine. He lived in a center city hi-rise made of concrete and steel. So did I. Unfortunately for me I hadn't gotten his name; but fortunately there was a repeat broadcast at 0300. This time I was ready and had my tape recorder to back me up. Reception was not so good, though, and I had trouble catching the name, sounding something like "Magnum."

I checked the telephone directory and came up with a name that might be it. When a wavering, feminine voice answered, I figured I was off base. When that voice threatened to call the police if I bothered her again "with this DX nonsense" I knew for sure and did the only polite thing: I promptly hung up. Next in the directory was a "Magne, L. E." (or Lawrence E., I forget which). Ah! Jackpot! Because even though I wasn't quite sure of the surname, I did catch the initials quite clearly (why I didn't think of that at my first phone book survey, I don't know). And - here is the bombshell - the address was "The Savoy" a hi-rise partly diagonal across Rittenhouse Square from my building; in fact, I can see the Savoy from my 12th floor window.

I made the phone call and sure enough it was our good friend Larry. (He told me later that he thought I was some insurance salesman). He paid me a visit bringing with him his Joystick and Joymatch and we had a regular session. In fact it was the first of very many which followed weekly.

While Larry had not yet made the DX Scene, he already was an expert. Since I was a beginner (I didn't even know the difference between 4VEH and a ceramic insulator) you can bet I learned plenty. I can safely say that more than 75% of my SW knowledge came from Larry. In addition to the many different facets of DX he taught me the fine points of soldering, how to use a 100 KHz calibrator without the benefit of a BFO, how to connect my wireless mike to the audio of my SW-4A, etc.

I wrote about this experience to Radio Prague and Jana Pavlikova read it over a subsequent DX program. I had taped this and it was listening to this tape recently that prompted me to write this article.

Larry has moved away from the neighborhood and for several years now I have been on my own. It was a happy experience and I will conclude this with the same thought I expressed in my letter to Radio Prague: "Isn't it amazing that through Radio Prague, about 4000 miles away, I became acquainted with another DXer a scant few minutes walk away."

This 'n That

WCSC BROADCAST MUSEUM

by Steven P. d'Adolf, North Andover MA

While I only DX on the shortwave bands, I have a very strong interest in all aspects of the communications field. I happened to be in the city of Charleston, South Carolina and ran across the WCSC Broadcast Museum and was able to learn more about the development of broadcasting.

The site of the Museum was once pastureland bordering a canal (now Calhoun Street) and was laid out as the Mazyck Borough suburb in the year 1786. The museum is run by WCSC-AM (1390), WXTC-FM (96.9) and WCSC-TV (5). It is located at 80 Alexander Street in a house built over 175 years ago. The house lost its third story in the earthquake of 1886.

Inside the museum are antique radios and TV's, mikes, earphones, photos, and other memorabilia from the beginnings of broadcasting. From an educational point of view, electromagnetic waves are illustrated as well as laser and AM and FM broadcast techniques. You can see how holography works, see demonstrations of electron action and see the principles of television explained. If you want to reminisce of pre-TV days, you can listen to recordings of the early days of radio.

It is not worth a large detour, but if you happen to be in the area, I recommend a stop for the whole family.

ECUADORIAN FOOTBALL TEAMS by Steven P. d'Adolf, North Andover MA

Since I have a very limited knowledge of Spanish, I am always on the lookout for anything that will help me identify what I am hearing. A common practice on many South American stations is the reading of the "futbol" scores. I have found the following information that I obtained from the Ecuadorian newspaper EL UNIVERSO, very helpful

POSICIONES EN EL FUTBOL

GRUPO "A"

Nacional
Tecnico U.
D. Cuenca
Emelec
L.D.U. (P)
D. Quito
L.D.U. (Q)
Barcelona
U. Catolica
Manta

GRUPO "B"

America
Bonita Banana
U.D. Valdez
Everest
Aucas
L.D.U. (C)
D. Quefedo
Audaz Oct.
Luq-San
9 De Octubre
Olmedo
Milagro S.

Games are played in: Guayaquil, Quito, Milagro, Portoviejo, Cuenca, Ambato, and Machala. The actual positions of the teams in the league is not very important, unless you are a futbol fan, but the names and the locations of the games might be helpful.

Looking for used equipment? HAM TRADER, lists ham radio equipment for sale by individual. Published by A. L. Brand, P. O. Box 311, Sycamore, IL 60178. Subscriptions are \$2.00 for 7 issues, issued twice monthly. Ad rates for personal ads is 30¢ per word.

Want to find out what the propagation conditions will be before they happen? Try MAIL-A-PROP, published by George Jacobs, P. O. Box 1714, Silver Spring, MD, 20902. Put out twice monthly. A trial subscription is available, 5 issues for \$6.00. Annual subscription of 26 issues is \$25.00, send a legal-sized SASE for free sample.

Tom Overcamp reports that a catalog of radio manuals for ham/SWL receivers built in the period 1935 to 1970. Manuals range from \$2-10 for machine copies. For catalog send 25¢ to HI, Inc., P. O. Box 864, Council Bluffs, Iowa, 51501.

Steve d'Adolf reports that CPT Corporation of Hopkins, MN, has come out with a modified IBM selectric that prints from right to left for use in Arabic speaking countries. And all this time you thought your reports to Yemen were being ignored for lack of interest by the station personnel. Not true, your typewriter was typing your Arabic in the wrong direction, hi! This new typewriter will certainly correct this fault and is therefore a "must" for the DXer who takes his reception report writing seriously.

We have received an information sheet from McKay Dymek announcing their new DR-55 general coverage communications receiver. It is fully synthesized and is available for about \$800.00. In the earlier discussion of the Philips microprocessor receiver, the Dymek has thrown away the tuning knob, and one step beyond the current bunch of receivers, the digital display too. The frequency is simply set by rotary switches. There are four switches, the first three are for MHz and 100 kHz. The last knob tunes 00-99 kHz. It has a complete range of modes, noise limiter, AGC, S meter, a preselector, and ceramic filters. Collins Mechanicals are available as an option for SSB, CW, and RTTY. This is a rack mounted monitors receiver, but may be of interest to DXers too. For more information, write McKay Dymek, P. O. Box 2100, Pomona, CA 91766.

DXpedition

NORTH TO ALASKA

by Herman M. Speece, Jr., Union Grove, NC

"You guys will never make it." These words echoed back from across the miles as we rolled across Indiana. That had been the prevalent view of our peers in North Carolina as we had prepared for a cross-country trip whose eventual destination was Anchorage, Alaska. However, this had only made us that much more determined to make the journey!

I am not a DXer of distinguished repute as are many of NASWA's members. Nor do I pursue the hobby as diligently as I should sometimes. But I was determined to take advantage of this opportunity to try my hand at DXing from the various locations, types of terrain, and physical conditions on this long route. (I have been known to tweak a mean knob at times!) My equipment consists of a Collins R-392, Panasonic RF-2200, and a Realistic DX-150B. I chose for this trip the RF-2200, due to its portability, frequency readout, and overall performance. I constructed a wooden box of such dimensions so as to use the original styrofoam packing blocks around the receiver and of sufficient size to accommodate a spare set of batteries, log book, FRENDX, and WRTH. I also carried a set of headphones, an absolute must at times. All my DXing was done with the receiver's whip antenna only.

We camped along the way in a tent, sometimes retreating to the Toyota truck's small camper for the night when severe weather forced the issue.

Without going into excessive detail, I would like to put forth a few of my observations about DXing of this type. First, one must travel fairly light; that is, the DXer must do without some of the more elaborate trappings he may be use to in his permanent DX shack. However, he must not abbreviate his equipment to the point of leaving behind basic necessities of the hobby. The traveling DXer must also be careful not to infringe on the rights of those around him while enjoying the hobby himself and should be ready to respond good-naturely to the questions of the curious and uninformed around him such as "Why do you listen to that when there is F. M.?" (This question was not asked of me while on the Al-Can Highway, where sometimes even the SW bands were sparsely populated with stations!) The traveling DXer must also be ready to improvise when necessary; like, what do you do when one of those large Alaskan mosquitoes keeps turning off your RF-2200 when he lands on the power switch? (as long as he was interested in the radio, I didn't worry!) Seriously, you must be prepared for unexpected equipment failures and should also carry a few hand tools and spare batteries, etc. in case you might need them. You should be fairly familiar with your receiver and should check it out before leaving. It would be quite exasperating to have a DXpedition ruined by a minor maintenance detail being overlooked.

Handy references should be another item not forgotten. As I mentioned before, the WRTH and recent issues of FRENDX are very helpful on a trip like this.

The traveling DXer should also try to locate a quiet campground each night if possible. From our experiences, federal, state and provincial campgrounds usually proved to be best suited for this purpose and were generally cheaper in the balance too.

I found that this trip changed my outlook toward radio considerably. Here in the United States we pretty much take for granted radio and television--mainly as entertainment. The further west we got in our travels and especially into Canada's Yukon the more it began to dawn on us that radio here was much more than just entertainment. Here in these vast areas, most of which are almost totally uninhabited, shortwave radio is the only means of speedy communication of news and other vital information, as well as entertainment. There are very few places left in North America where a person cannot sit down with a modern radio receiver, turn it on, and not be able to pick up at least one A. M. station. Such is the case in parts of the Yukon and British Columbia. When this happened to me in Canada, it began to occur to me just how far out in the "boonies" I really was! This is truly

short wave territory. I switched the receiver over to SW and after some searching felt a little rush of pride and relief to hear the first strains of "Yankee Doodle", followed by sign-on of the VOA in English. Some of you probably think I'm a little sentimental by saying that but let me tell you little things like this mean alot when you're 5,000 miles from home!

One of the big things I noticed on this journey was the quietness of reception. I am usually plagued by power line noise at my permanent set-up in North Carolina, so I welcomed this change in reception quality. With the lengthening period of daylight as we went further north, I tended to favor the higher SW frequencies in my listening. As I expected, most stations I logged were in the Pacific or Asia; however, some Europeans were logged along with a very few South and Central Americans.

A trip like this will give you a new outlook on some things, but others hever change. I recommend DXpeditions no matter how long or short or to wherever. This one did much to enhance my appreciation for a hobby already held in personal high esteem.

Monitoring?

MONITORING vs DXING - REVISITED

by Bill Whitacre, Lansing MI

Recently in these pages there appeared an article by me entitled "Racal: the Ultimate or just another old receiver?" It was written in the interest of finally seeing a review of this long acclaimed receiver in FRENDX. In the October issue of SWC, Alan Thompson of England pointed out some "glaring inaccuracies" which he later called "not of great importance." In my opinion the corrections of my article were themselves in error. I would like to point some of these out and in addition add some other information on this matter.

Firstly, Mr. Thompson points out the difference between the RA-17, 117, and all their variatbns. I was indeed mistaken in reporting that the 117 designation on the Racal meant it was of U.S. manufacture, but equally as wrong was Mr. Thompson when he gives us the designation RA-???-CX as being the U.S. made receivers. In conversations with at least two Racal engineers and one man selling these receivers here in the U.S., I now find that the designation for the U.S. made receivers is RA-6117, which is what my receiver is.

Mr. Thompson then goes on to tell us the difference between DXing and professional monitoring. The Racal RA-17 series, like the R-390/388 series was made before the new style "user ease" receivers were put out, like the 51S-1, 651S-1, and other upper-price bracket receivers. These receivers, the later ones, have done away with many of the features which make the R-390A and RA-17 series so popular as truly fine, general coverage DX machines. These features include independent mode and selectivity selection, noise limiting, variable AVC time constants, and others. These receivers were, fortunately for the DXer, over-designed for the jobs they are usually relagated to today - monitoring! About the only thing these receivers lack is some type of notch or rejection circuitry, most often found in receivers today that are truly designed for DXing. In short, who cares what a receiver was designed to do, it it does well what you want it to do!

Finally Mr. Thompson finds my comparison between the RA-6117, R-4B, and R-390A "quite valueless!" From all the responses I received from my previous article, almost all of them commented that they particularly liked the comparison I did between the receivers! Indeed, what better way is there to compare three receivers so very well qualified to be "best receivers for DXing?" I think the comparison made was quite objective and is based on years of experience with many different receivers. I stand by every one of the rankings I gave the different receivers.

It should be noted that I'm not along in my fondness for the RA-17 series of receivers. Gerry Dexter and Don Jensen both use RA-17's exclusively for DXing and, although you don't see their names very often in these pages anymore, believe me, they are both alive and well and DXing the heck out of the Latins and Indonesians! I should note that I made it clear in my article that my favorite receiver is the R-4B, an improvised shortwave machine, made for ham bands use! Just goes to show that you can't judge a receiver by what it was designed for. I thank Jerry for this space and welcome any comments on this subject to 2609 Devonshire, Lansing, MI 48910, anytime.

Page 10 has run over, so I will use this space to sign-off by saying thanks to our contributors for this month. Keep the material coming. 73 to all, Jerry

FRG-7

FRG-7 NOTES

by Richard M. Utter, Rochester, NY

As an FRG-7 owner, I've discovered a few stray facts which may prove useful to others who rely upon the Yaesu receiver. But before I continue, a work of WARNING! Letters from clumsy wouldbe technicians saying that their radios caught fire after making one of my modifications will be received with little sympathy. Every change has been tested in at least one FRG-7, in some cases two or three - with satisfactory results. Review your abilities before attacking your FRG-7 with a soldering iron; be sure that you can make the changes properly. It should also be pointed out that receiver alteration voids the manufacturer's warranty; some of the mods will also hinder or prevent portable operation.

To put it bluntly, the FRG-7 ANL circuit doesn't work. It takes a discerning ear to tell whether the ANL is on, let alone catch it limiting some noise. ANL action can be improved immensely by using a 0.039 microfarad value for C433. This change has a minimal effect on audio quality. Use a high quality polyester capacitor in this application, rather than a wide tolerance ceramic cap.

If your FRG-7 is addicted to AC outlets and you're uninterested in portable operation, then the External DC jack can be easily converted to serve as a power source. Just disconnect the wire attached to the center terminal of this jack and replace it with another; the other end of this new wire is connected to the output end of the power supply filter choke. A reasonably smooth 16-17 VDC is available by utilizing this connection; the current drain of anything hooked to the jack should be kept to less than 200 mA. In my case, I added another jack in parallel to the one Yaesu provides. The two jacks furnish power to a digital dial and a preselector.

Over a period of several months, my father's FRG-7 developed severe backlash in the main tuning mechanism. This was especially evident after he hooked up his digital dial. He finally traced the cause of the backlash to the substandard 'lubricant' which Yaesu uses on the reduction gears. This material actually hardens as time passes, until the gears begin to bind. The solution is to remove the offending substance and relubricate with a high quality grease such as Lubriplate. If your FRG-7's dial has more than 300 or 400 Hz of backlash, then it's time to do this.

My FRG-7, as received, was plagued with microphonics; the slightest tap on the cabinet was cause for several seconds of loud resonances. A hasty check of the radio's innards revealed two possible causes, a loose cover on the crystal oscillator box and a missing screw in the main tuning capacitor enclosure. Some creative metal forming and an additional screw cured the microphonics. I should also mention that excessively high volume levels will also cause microphonics. Only reducing the volume will eliminate these.

For some reason, radio manufactures have decided that a mere 'shortwave receiver doesn't require a standby switch, an option I'm unwilling to do without. Fortunately, the FRG-7 allows the implementation of a standby switch at minimum cost. As you peer into the bottom of the receiver chassis, you'll notice that the dial lamp switch has an extra set of three uncommitted terminals. We're interested in the two lower ones (again, assuming the radio is bottom up). Solder a wire to each of the two terminals, the other end of either wire is connected to the solder lug of the mute connector, the remaining wire goes to any convenient ground. Once these connections are made, the FRG-7 can be placed in standby mode by turning the dial lamp switch off, while leaving the main power switch on. Since the power is on at all times, any possible warmup drift is eliminated.

Attempts to use a high quality (non-ALC) tape deck with the FRG-7 are doomed to failure, due to the record output's high impedance. The root of the problem is R8, a 22 kohm resistor in series with the record jack. If you short out this resistor, you'll not only make better tapes, but - by plugging your deck's output into the record jack - be able to play them back through the receiver's audio system as well. R8 is concealed within a length of plastic tubing running between the volume control and the record jack.

Here are some other things to think about in connection with this modification -

1. Even with R8 shorted out, the FRG-7 may still not be able to provide enough drive for some tape decks. A simple one transistor preamplifier will be necessary in these cases. I'll trade your SASE for my preamp schematic.
2. If you wish to play back tapes through the FRG-7, the installation of the standby option is recommended. Otherwise, you'll have to nistune the preselector and unlock the MHz oscillator to insure that received signals don't compete with the playback. With the standby option, you simply turn the lamp switch to 'off' and play back the tape.
3. The intelligent FRG-7 owner will install an additional jack in parallel with the existing record jack, but on the rear panel, where such things belong.

It is hoped that every FRG-7 owner found something of interest in this article. Your questions, suggestions, and comments are quite welcome. My address is 121 Glenora Gardens, Rochester, NY 14615. The inclusion of a large SASE with your note assures a punctual and ungrumpy reply. Good luck and good listening!

All contributions to LN are gratefully received. Please enclose an SASE if you require a personal reply. Please do not ask for advice on receivers.

ENGLISH SCHEDULES NOTE: If you would like a quick-reference list of English broadcasts audible in North America, arranged by country and time, for the November-February season, order a copy of the November REVIEW OF INTERNATIONAL BROADCASTING, @ 75c in US stamps or \$1 Canadian, from gh, address above, with a view to subscribing @ US\$9.00 per year. For a similar listing arranged by time, see the December POPULAR ELECTRONICS, on sale at newstands everywhere.

U S S R As noted elsewhere in LN, Radio Moscow now has a "World Service" in English, much of it beamed to or audible in NAM, in addition to NAM service. We are still awaiting definitive frequency schedules of this new service (gh) WS to expand, fqs to change 25/10 (BBC MS)

U S A AFRTS unexpectedly dropped 6155 in early October, clearing the frequency for Austria in the evenings, Haiti in the mornings; but for D78, WFRR is scheduled to use 6155 again, but only at 0300-0500, being on 5985 at 0100-0300, both from Scituate (via Pete Grenier, CA)

As you may have noticed, R. Moscow has been clobbering the BBC WS on 11750. For D78, BBC moves its relay via Greenville from 9510 to 11750, at 0030-0330. That'll show 'em! (gh)

U K O C B A N I BBC WS D78 to NAM, UK sites: 15215 1100-1330. 11910 2200-2430. 11750 2000-2430. 9510 2000-0330. 7325 2245-0330. 5975 2200-0430. To ANZ & Pac crossing N/CAM: 9640 & 7150 0545-0915. 5975 0545-0730. 11955 0700-0915. The supposedly never intended for NAM, 9410 is often superior to other frequencies, on the air 0900-0730 (gh)

TURKEY VOT makes its quarterly programming and frequency changes at the beginning of Oct, Jan, Apr, Jul instead of per ITU "seasons". (gh) 2130-2300 now on 11955, 9515, 7170, 6185 (Tony Buhagiar, Ont., 4/10) Providing improved freq diversity (gh) 1200-1300 on 15135 ex-15145 (BBC MS 12/10)

SWEDEN (Cf Oct LN-3) If you want to try for the 1230-1300 R. Sweden BC, 21690 180° to Af, and 11935 55° EAs. If 21505 is QRMed at 1400-1430, try 21700 90° SAs. The 2100-2130 sometimes comes in during winter as well as or better than evenings to NAM; 11845 180° Af, 9605 145° ME (gh)

SRI LANKA SLBC announces its 1845-1945 is a test to Af/ME on 11870 9720; EAF 17850 15115. The last is actually 15120; daily except Weds. Reports and advertising solicited. Xmsn apparently no longer beamed to Eur: formerly had nx and now only music and IDs (BBCMS 12/10)

SPAIN REE D78 to C&WEu 2030-2230 11840 9505 7155; optional alternatives: 7275 6100 6045. To Nam now daily including Mons GMT: 0000-0200 11880 9630. 0515-0615 9630 and 6065 or 6120 (Spanish Foreign Radio, via Mac Leonhardt)

PORTUGAL AWR via Sines now on 9665 ex-9670 Suns 0900-1000 (David Sapsford, UK, RA DX 15/10)

PHILIPPINES FEBC: 2300-2400 15450. 2300-0100 11890 or 11895. 2300-0500 21515. 0000-0500 17810. 0800-1000 11765. 1245-1530 15440 (FEBC via BBCMS 9/78) Maybe changes now (gh)

PAKISTAN R. Pakistan has added an EC nxcast in formerly all-Urdu WS to UK, since 16/10 at 1005 on 21625 17665 (BBC WRC 18/10)

OMAN BBC Masirah D78: 17770 0900-1330. 15310 0700-0815, 0900-1515. 11955 0230-0330. 11780 0700-0815. 9590 0300-0330. 7250 1700-2030. 6195 0030-0330 (Nov London Calling)

NEW ZEALAND RNZ D78 sked, actually begun 28/10 1700 when NZ began DST; effective to 1215 3/3: Xmtr I: 1700-2005 11960. 2015-0415 17860 or 17770. G425-0715 11945. 0730-1115 6105. ZAIRE La Voix du Zaïre obs on new 11645 in FR 2100-0330+ (Andrew Blumberg, NY, SCDX 26/9)

VATICAN On 3/9 at 1700 the new 500 kW xmtr with unique rotatable antenna was used for the first time experimentally to cover inauguration of Pope John Paul I (ADXX) **more**, LN-13

U S S R Since 3/10, R. Moscow and R. Station Peace & Progress have widely publicized the new "Radio Moscow World Service" in English. Extracts from a 4/10 talk: (BBC MS 12/10)

"On Tues 3/10 at exactly 7 a.m. Moscow time, the matter-of-fact voice of announcer Karl Yegorov said: 'This is Radio Moscow World Service. Here is the news'. A new radio service was born, as the result of your requests. R. Moscow has always had a wide following of listeners all over the world--listeners that any radio station could be proud of, listeners that we do not talk at or even talk to, but that we converse with.

"Yes, it has been a dialogue, for R. Moscow broadcasts have always been answered by hundreds of thousands of letters every year. These letters have recently demanded a broadening of our operations. They asked for more news from and about the Soviet Union, more information about the Soviet way of life and how people here see things from major events to the problems of everyday life.

"R. Moscow's WS in English was conceived as the response to those demands. It has been tailored to fit your requests...it will take you into the homes of Soviet people, it will lead you into city streets and help you strike up conversations with the man in the street.

"RMWS will not be addressing any particular country or even continent; it will be speaking to all people, and every individual person, on things that are important to all human beings, regardless of where they live and who they are; and in all cases it will be telling you about the USSR and what makes us tick as a nation and as individuals.

"The Service is on the air daily from 0400 to 1600 GMT, and from 2100 to 2300 hours, and in the near future you will be able to hear us around-the-clock in the 13, 16, 19, 25, 31, 41 and 49 meter bands. This is, in the world's most basic sense, your service--RMWS in English."

A recent check of in-band frequency bookings with the ITU shows R. Moscow and its associated services intend to employ a total of 39 500-kW SW xmtrs during D78; comparing this with J78, it seems the USSR is now operating at least 42 500-kW xmtrs from 24 different sites. ##

Soviet Radio is interfering with itself to a hitherto unprecedented degree this season. Thus at 0300 7/10, R. Moscow in Spanish to Chile and the first HS were noted at equal strength on 9490 and 12070; and the same Spanish service was mixed with Mayak on 12010 (R. Wood NH)

Moscow Chinese hrd on 21690 at 2230 past 2300 26/9; even tho in 13mb, is a harmonic, 3 x 7245 (Bob Padula, ADXX) Would you believe 3 x 7230? (gh)

R. Tashkent is running an essay contest, prizes for which are 5- and 10-day free trips to Uzbekistan. Full rules appear in October REVIEW OF INTERNATIONAL BROADCASTING. It appears one would have to be a regular listener to RT to have any chance; and tho no restrictions are given, I'll bet the ultimate winners are in nearby SAs target area, not NAM! (gh)

U S A Some VOA QSLs have incorrect sites. Staff shortage causing poor quality control. Be careful (Harold Sellers, DX Ontario) Cf Greece, Aug LN-6. VOA has for nearly 3 years used a satellite feed to the Philippines during winter 0200-0330 since it's hard to rely on HF from west coast. VOA is going to use full time satellite feeds for this circuit which will mean that Delano & Dixon will cease to operate, but will be kept ready for emergency (Victor Gonetilleke, Sri Lanka, UAUX) This is contradicted in Oct LN-12 (gh)

URUGUAY SODRE on 15272.5 at 2345 29/8 SP classical mx, drift from 15275 (Richard E. Wood NH)

U K O G B A N I BBC received about 100,000 forecasts in its World Cup competition. There were 800 correct entries and 12 finalists were picked from a hat by a British Airways hostess. Winner was 81-year-old Seiichi Yoshida, of Kobe, Japan, who arrives in London this month with his wife on a free trip. He and the 11 runners-up each receive a radio set. Hal Burton, ISWL section editor, won a 10-day all expenses paid trip to Poland in a World Cup contest organized by R. Warsaw. Hal was the only UK winner out of 550 entries (Gordon Natt-rass, S. African DX Club, Oct)

Lots of BBC-UK harmonics showing up on the 30-MHz band, 15/10 between 1400 and 1500: **30780** (Hungarian) 2 x 15390; **30360** (Arabic) 2 x 15180; **30140** (WS) 2 x 15070; **29020** (WS) 4 x 7255 (gh) **more**, LN-13

(Cf Oct LN-9) After Georgi Markov's death, Scotland Yard confirmed that Bulgarian defector and BBC broadcaster Markov was killed by unknown materials contained in a 1/15-inch pellet where he had been jabbed with an umbrella. Another Bulgarian defector, Vladimir Kostov had earlier been stabbed with an identical pellet in Paris, but survived. Bulgaria has officially denied any involvement. Three weeks after Markov died, another Bulgarian defector died in London, Vladimir Simeonov. He had also worked for BBC Bulgarian service. Death was caused by a fall down the stairs in his London home; it was termed 'suspicious'. Simeonov was to give a statement on the Markov case. A fourth Bulgarian defector, Stefan Bankov, says two men fired several shotgun rounds at him in Los Angeles in August, but missed. In 1974 he had been temporarily paralyzed when doused with a chemical aboard a flight. Alexander Lieven, head of BBC European Services, said Markov was an obvious target for assassination because he had been part of the highest circles of Bulgaria and was noted for his charges of corruption and sex scandals among Bulgaria's communist leaders. But Simeonov had simply been a student (summarized by gh from Wash. Post, AP, UPI, Newsday, Reuter, Toronto Globe & Mail, via Bob Foxworth, NY, and via SWNS)

U A E Dubai still inactive on 6040 since could not be logged 'on the spot'. Abu Dhabi not heard on 9620 (Rikard Johansson, Aug maritime mobile Persian Gulf, via DSWCI SW News)

SWEDEN A White Paper concludes that our SW listeners are dial twiddlers who collect stations rather than listen to them. We encourage listeners to write to the Swedish Foreign Ministry to correct this impression. The woman who wrote the report threw out all our listener research surveys and chose instead to ask Swedish embassies abroad if anyone ever contacted them about our programs. I don't know any DXers who would, but since no one had, the conclusion was that no one listens to us. The White Paper praises the more elite forms of culture at our expense (George Wood, R. Sweden, 9/10) Per the Saturday Show, Foreign Minister Karin Suder would like R. Sweden transferred to the Swedish Foreign Ministry. But then Mrs. Suder and her entire government were kicked out of office. How's that for a turn around? The point was made that embassies are a more effective place to write if you have a complaint about matters which involve the foreign image of a country (Richard Varron, NJ, SPEEDXGRAM)

ROMANIA/GERMANY EAST Two Warsaw Pact members are conflicting with each other, both in EG to Nam at the same time on the same freq, 11840--Bucharest 0400-0430, RBI 0330-0415 (R. Wood NH)

PORTUGAL/JAPAN R. Japan's relay via Portugal has clipped audio indicating satellite feed from Japan to Sines (Victor Goonetilleke, Sri Lanka, UADX) Victor was referring to the July tests; I tend to agree from the sound of the Oct tests on 11825 at 2200 (gh) RHODESIA LN-13

PERU (cf Sept LN-13) It's Quillabamba on 5025, not Andahuaylas (Tony Jones, Paraguay)

PARAGUAY R. Nacional, 9735, still off the air, awaiting test equipment from the US to make final checks of antenna impedance, output power, etc. Will then work up to 100 kW, all being well. 6025 currently operating on approximately 1 kW (Tony Jones, Paraguay, 2/10)

OMAN (Cf Oct LN-8) Should have read "Cyprus on at 0330," not 1330 (gh) NIGERIA LN-13

NICARAGUA La Voz de los Centauros heard on 17865, 19/9 at 0300 with echo IDs, fair. No trace on fundamental 5960 (Andrea Lawendel, Italy, PLAY-DX) That would be 5955... (gh)

A lack of SWBC activity from Nicaragua during the September war until Rdf. Nacional re-activated 5950 28/9 (gh) First noted at 0400, very strong, to 0700; fq anc'd; 50 kW; re OAS resolution and playing classical mx (Stu Klein, FL) At 0155 28/9; everything happy down there now. Not on at 0900, but full blast 0945; 29/9 at 0840, SIO 544 (Jack Jones, MS) Long political lecture 29/9 0940, 1028 IDs; next day already on at 0800; powerhouse (Jerry Berg, MA) Strong at 0145 2/10 (Lenny Saaf, IL) Noted 0500 14/10 (J. Findlater, CA) An amnt I heard said they were testing 100 kW xmtr at half power (gh) Well heard in Britain too, around 0430, on 5949 (Noel Green, BBC WRC 11/10)

NEW ZEALAND The SW svc is a 1½-man affair from the programme/management end--Geoff Haggett, and me, part-time. RNZ is very pro-DXer; every letter and report is answered and tabulated by country for the big day when the Treasury announces a feasibility study of upping power and 'going serious' on SW. I'm not employed by RNZ; am sales manager with Air NZ. I type-set by hand and print the QSLs myself on an 1880-vintage American treadled platen (Tony King, Oct. REVIEW OF INTERNATIONAL BROADCASTING)

NETHERLANDS You won't find them listed in WRTVH or in their English program schedule, but RN does have a number of overseas mail forwarding drops which could save you some postage if you don't mind the delay. They are listed in the Dutch schedule: Kotak Pos 2301, Jakarta, Indonesia. P.O.B. 1121 - Station C, Scarborough, Ont. M1J 2Z8, Canada. B.P. 222, Niamey, Niger. C.P. 3222, Rio de Janeiro, Brazil. Postbus 2506, Paramaribo, Surinam. Postbus 45, Kralendijk, Bonaire, N.A. (gh)

(Wood, NH)

MOROCCO Agadir local ID hrd on 6095 0100 10/10; regional xmtr, or Agadir pgm via net? (R. E./

MALDIVES R. Maldives transmitters were constructed and installed by Mr. Q. A. Wickramasinghe and each of the 6 bears a plaque 'Made in Maldives'. The studios are housed in a building overlooking the sea. In between the station and the sea the antenna farm is located. In the evenings boys and girls play football and basketball underneath the radio towers of the antennas of R. Maldives and the Telecomms dept (A. J. Sampath, India, visiting Maldives, UADX)

MALAWI MBC noted running late to 2210* on 5995 3380 (Richard Ginbey, R. RSA DX Corner 21/10)

MADAGASCAR Antananarivo ES noted well past 2400 on 2495 3285 (Ginbey, R. RSA DX 21/10)

LEBANON Voice of Lebanon, 6550, Muzak-type mx, AR amnts, no ID, s/on sometime between 0400 and 0412 when first hrd 28/9 (Terry Krueger, FL, TDXN)

KENYA VOK has been reported at 1010 on 11950 (Gerry Wood, RSA, via Getzel, SPEEDX 10/78)

JAPAN AFN Tokyo, 3910, sometimes on, sometimes off; hrd in July at 1230 (Goonetilleke, UADX)

INDONESIA RRI Fak Fak full-data QSL in EG says 4790 is 1000 watts, despite previously received letter for reception same date saying 500; different signers (Ed Kusalk, Ontario)

HAYTI (Cf Oct LN-15) The 6156 station, hrd pre-AFRTS for a total of maybe 10 hours, from *1000, had no Citadelle IDs--nothing but R. Nationale. Was cutting thru het, too strong to have been R. Citadelle's listed 250 watts; RN may have been testing new xmtr (Stu Klein, FL)

GREENADA RG was off air during Aug, I think due to Hurricane Cora. In Barbados, I couldn't hear SW or MW from them. But 15105 is back; 9550 is no longer used! (Steve Webster, Ont.)

GREENLAND Godthab had very strong carrier soon after 1000, then very weak IS several times, roughly 1008-1015 on 5980, on top of other UNID stn. Mostly classical piano mx past 1025, 19/9. If R. Finland stays on new 9575, as noted at 1930, it will become increasingly difficult to hear Greenland here (Victor C. Jaar, PQ) Missing from D78 sked; to 9585 (gh) +LN-13

FRANCE RFI apparently testing in FR to Americas with DJ show 16/9 0145 on 11755 11870 9565/ Not hrd since (Richard E. Wood, NH, 15/10) Now active on 25620 daily to 1400*; strong (gh)

FINLAND R. Finland doesn't issue QSLs. Instead we have Audience Cards, my own invention! Our cards don't confirm date, time and frequency, only that we thank you for your letter. Mean? No, we just don't have enough secretarial time. Not everyone likes them. Dr. Richard Wood was dissatisfied. I apologise to the technically-minded. We do want reception reports with data--from listeners who are sure of their facts. With our location, we need all the reliable and comprehensive info we can get. But since we're already getting about 300 data reports a week, you could say we are keener to receive program comments. Why bother? Because we are responsive to criticism; your support strengthens our position; R. Finland audience cards are the most attractive confirmation cards in the world. OK, I'm biased. There is a different card for every month of the year--depending on the month your report deals with, not when we receive it. And finally, to all who write to ask and then wonder where they went wrong, we issue no pens, pennants, report forms, stickers, posters, brochures, or T-shirts. This is a radio station, not a supermarket (Patrick Humphreys, R. Finland, 10/78)

EQUATORIAL GUINEA R. Malabo, 6250, best around 2050, bells 2100, Spanish to 2108*. WRTH is wrong listing EG to 2100, SP to 2300*! (Steve Webster, Ont) On a Monday to 2105* but hrd on a Saturday to 2300 (Richard M. Utter, NY)

ECUADOR AIDX is sponsoring a return trip to HCJB's "Project 500" in Elkhart IN--the construction of a 500 kW xmtr. A car pool will be arranged for those in the Chicago area, for the Nov. 11 trip. For details, contact Jeff White weekends at 312-894-3726; or Pete Jakl, weekdays at 312-543-4490. The Nov. 17 AIDX meeting at 7 p.m. in the Schaumburg Public Library will feature two speakers from HCJB, Dee Baklenko and Chuck Howard (Oct AIDX Journal) + LN-13

DOMINICAN REPUBLIC The harmonic of R. Rutas, La Romana, is being hrd on 2720 as far north as Canada (SWNS) Such as Crystal Beach, Ont., which is no further from the D.R. than Houston TX? (gh) I stopped in for a visit to R. Clarin. On AM, they have dropped 24h NSP to 0900-0500 and is now 10 kW fulltime on 860. They have 4 x 50 kW xmters not in use or irregular. Their other stn in Santiago is now irr. nitetime only on 850, but mostly off the air. I'm too close to receive 11700. RTVD is now 0900-0500, very strong on educational pgms. They cancel baseball games which R. Clarin got in place of (Dick Clark, Dominican Republic)

CYPRUS (Cf Oct LN-7) R. Bayrak hrd daily in Athens on 6287, despite announced 6150 (Tony Buhagiar, Greece, 21/9) Good signals to anthem end 0328 both 21/9 and 22/9, but frequency variable, starting at 6277 and up to 6279 at 0345 21/9; 22/9 started at 6276.4 and characteristic upward drift of about 100 Hz/minute; ute QRM minimal 22/9 (Bob Foxworth, NY, TDXN)

CUBA RHC new 11865 *0100 EG to NAM 15/10 (Richard Wood, NH) Not hrd here; xmtr error? (gh)

COSTA RICA R. Universidad on 6103, 13/10 0300 SP classical mx (Richard E. Wood, NH)

COOK ISLANDS RCI best hrd 2/10 on 5045, carrier on 0426, drums IS, EG s/on, 0429 ID, news by YL in Maori, then island mx, ads at 0449, soap jingle; hrd past 0500 with long talk, knocked out by Togo carrier het 5047, at 0510. Better reception than on 6/9 (Ed Kusalik, Ont.)

COLOMBIA 4875, 21/8 0420 La Voz del Norte, hrd by one reporter; 4875, 26/8 0415 R. Súper, Medellín, hrd by another; two conflicting tips at first sight (PLAY-DX) Both Norte and Súper hrd here 16/9 0930-1000; big het, Norte generally dominant, Súper on low side (Jerry Berg MA) R. Melodía operated 24h on 6140 with 2 kW, announcing power would soon be increased to 10 kW. Then Engineer R. Gallo told us of a temporary cessation of 6140 test xmsns; and he says the station does not QSL (David Correa, La Salle DX Club "Monitor DX" Sept-Oct) Hrd at 0926 7/10 still with no mention of SW, just 30 kW on MW; "La Cadena Líder" (Jack Jones, MS) more, LN-13

CENTRAL AFRICAN EMPIRE (Cf Oct LN-7) Bangui 2050 15/10 in FR ID as "La Voix de l'Empire Centrafricain" on 5000 (Richard E. Wood, NH)

CAPE VERDE Voz de São Vicente, 3930 hrd 26/9 and 28/9 from 2320 w/light classical mx, IDs, ham QRM (Gerry Bishop, PA)

CANADA (Cf Oct LN-15) 31mb RCI spur turned out to be mistuned 9755 xmtr, not 9535 one (gh) RCI hrd on 9315 strong 0245 24/9 in SP, 9755/9535 mixing product; not hrd since (Lenny Saaf, IL) CBC NS 8/10 hrd on 11720 with erroneous cart giving fqs 6065 and 9625 at 1400, 1405, 1500, 1505, played all morning (Richard E. Wood, NH) Somebody must have started believing the carts! As since then missing from 11720 even after 1300, and a trace of something on 6065, checked 15/10 and 21/10. 11720 QRM, but moving to 6065 is no improvement! (gh) Mistakes at Sackville continue daily. 11775 BBC relay 15/10 at 1650 suddenly switched to RCI-Russian--in the middle of "The Spy Who Came In From The Cold" (Richard E. Wood, NH)

BRAZIL New stn s/on 7/9 on 4915 is R. Nacional de Macapá, ZYF360, 1 kW hrd 2110; SIO 454 9/9 to 0300*. Add is Rua Candido Mendes 525, 68900 Macapá AP. 2310, new R. Progresso, Sousa PB ZYG480 hrd 0025-0300* 27/9, SIO 252 (Djacy Frank Silva, Brazil, SPEEDX GRAM) R. Progresso hrd in Scandinavia to 0300 too, 250 W. On 2500 R. Par(a)navai, PR hrd on 2 x 1250 (Jan Tunér RN DX Juke Box 13/10) A stn hrd several times on 2320 at SWNS HQ around 2330 is believed to

be R. 8 de Setembro at Descalvado. Definitely announced as Estado de São Paulo (Oct SWNS) 5055, R. Mauá, vy nice 24/9 with IDs 2257, 2330. Announces as "Canal Nacional" and gives this SW fqy only + MW. Not sure if same as R. Mauá-3305 reported by Tony Jones, who believes this one is in São João de Meriti. 5055 announces as Rio, but SJM is in Rio state. There was a R. Mauá listed for 11885, 9705 and 1130 thru WRH 76, but in WRH 77 those fqys are listed as R. Ipanema. Vy good signal from this one in the PMS (Jerry Berg, MA) My guess is that this is the successor to the old 9695 and 11885 channels (Fred Heutte, 3/10, TDXN)

ARGENTINA El Mundo on 18670, Rivadavia on 5882, etc., etc. are utility transmissions, PTP links during sports events. Rivadavia has an enormous net of stations taking its football coverage. The DX world should know that any Argentine DX on SW other than RAE, Belgrano, Splendid, El Mundo, etc. on known SW frequencies, must be considered utility. So DX editors can quit listing these. Also, Argentina is not a tropical country and can't use 60 meters. Broadcasting is tightly controlled by the government, not like in Bolivia, and stations are not able to violate existing allocations (Carlos Maslatón, ADXCI, 8/10) Who cares if they are officially PTP, when they allow us to listen to certain stations & programs? (gh)

ALGERIA Is that Algeria on 15230v? Awful modulation, fq varies 15227-15233, what a choice--mixes with Cuba from 1700, also in AR to same target; hets Tunisia 15225, Arabic to same zone and may suffer from RN via Madagascar also in AR on 15220. Ironic since Algeria has been in forefront of countries re WARC-79, invariably in a negative role, criticizing perceived imperialist 'plots' in the existing setup. Would be nice if they set their own house in order before casting stones at others! (Larry Magne, PA) Noted on 15232 in AR at 2030; 11894 at 0800 and 1330 (Noël Green, BBC WRC 27/9) 17/10 AR DS on 10195, another mistuned xmtr (BBC WRC 18/10)

CLANDESTINE CRANNY KDOR pirate "Dorwart Broadcasting Co." on 830 kHz in Los Angeles has been tracked down by SWNS Correspondent Paul S. Lotsof. They are 1½ blocks from KHJ's studios--just south of Hollywood. KDOR is operated by a DXer. KDOR claims to have been visited by the FCC but has not been closed. Various reasons have been offered for this, none of which make sense. There seems to be no end to the fun and games which go on within the DX sub-culture. At the time of Lotsof's visit they were using 75 watts, but this may have been reduced as of 27/9 (SWNS Oct)

CFAB is or was a pirate--definitely not TIS, somewhere between Niagara Falls and Hamilton. I believe the station is currently off the air (C. M. Stanbury, Ont., 11/10) My office is not aware of such a station, but we are bringing the matter to the attention of our regional office. This would indeed be illegal in Canada, as there has been no initiative to allow such stations on 530, 1610 or 1620 kHz as in the USA. You may be interested to know that there is a legitimate CFAB--250 watts on 1450 kHz in Windsor NS (W. C. Robson, Chief, Broadcast Applications Engineering Division, Telecommunication Regulatory Service, Ottawa, 7/9 via Mike Harvester, Okinawa) 1620 kHz; cf Oct LN-10

WFAT, 1620a, New York hrd 0518-0827, excellent sig. Guy said his name was Larry McCrea (sp?) with live-call-ins. IDs as "Free Speech Radio". Has his hands filled with lunatics calling up--one guy claiming he was raising money for the "Alaskan Foundation Society for the Humanities". The same guy called back 5 times, each with a different cause. Number given out was (212) 664-9979. It was real; the guy told me WFAT will soon have a 'bunch of QSLs' (Bryan Lee, Brooklyn CT, 23/9 IRCA DX Monitor) Bogus WFAT still active on 1630 from Brooklyn (NY) sporadically. 14/9 *0600 with "Larry McGray" at same number. They avoid political issues as a rule. This xmtr drifts slowly downward about a kHz in 15 or 20 minutes, usually stabilizing on 1629.4. Other pirates hrd on 1626 and 1628 with weaker signals after 0400 don't appear to be same xmtr (Bob Foxworth, NY, TDXN)

The Voice of Peace, 3400, hrd 8/9 2225 testing in EG giving freqs 7170, 7290, 9150, 9155. What's this, Glenn? (Mario Guida, Play-DX, Italy) Wish I knew (gh)

Radio Alpha 92.5 FM Stereo with mailing address in Essex, 80 watts to dipole, a free radio station broadcasting on Bank Holidays. Broad rock spectrum of music; reception good in London region and outlying districts. Next sked xmsns on Boxing Day and New Years Day (via Barto)

Baltic pirate planned. Some Britons plan to set up in Dec on a Dutch vessel under Panamanian flag in the sound between Denmark & Sweden, to broadcast 20hpd to Denmark, Finland, FRG, Sweden, Norway--music, ads and news (Berlingske Tidende via Yleisradio 27/9 via BBCMS 5/10)

R. Cavendish hrd on 6260 at 1000. Britain R. International 6220 1000. Thameside R. via EMR 6260 0900-0930. R. Solent City regular on 6285 0830. ABC Radio Ireland 2330 on 1320 from Cork. ABC Europe to use 31m in Sept (Allen Dean, WDXC MM) R. Condor International uses 6317 (Simon Knott, WDXC) R. Corsair on 6255 at 0920- (Mick Webster, WDXC) European Music Radio will use 41m, probably 7315 with 50 watts from 17/9 (Kevin O'Sullivan, WDXC)

Radio CBN, 26785, Sydney, EG at 1000, very poor strength 8/9, soon inaudible (Rob Williams, NSW, ADXN) Report to advertised address returned as unknown (Peter Bunn, ed., ADXN)

Fretelin radio, East Timor from Mamure, ceased 6/78 (Indonesian Foreign Minister via journalists on a visit to New Zealand, via Antara 22/9 via BBCMS 28/9)

Radio Liberation Eritrea is asking for donations to go on the air. AESNA, Box 1247, NY NY 10027, 212-222-5403; or B.P. 326, Montréal, N.D.G., Québec (Victor C. Jaar, via L'Onde Sept)

Voice of Palestine, Voice of the Palestine Revolution tho announced it would be on 1138 kHz from 13/9, was found on 1120 at varying times 13-14-15/9 announcing experimental pgms. 17/9 obs on 1149, but 18/9 returned to 1120 at 1000-1110, 1400-1700 with normal pgming (BBC MS 21/9) Now stabilized on 1120 daily in AR at 1000-1100, 1400-1700 with 20-min nx at 1015, 1415, 1500, 1600 (BBCMS 28/9) Believed located in the Lebanon; anti-Israel, pro-Palestine; Arabic ID "Sawt al-Filistiniyah, Sawt Ath Thowrah al Filistiniyah"; PLO-controlled. Has been noted with extended xmsns during crises; EG & FR news occasionally included (BBCMS 9/78) Anc'd that as from 3/10 would also BC 0500-0630, but not traced on 1120 kHz 3 to 5/10; 6/10 *1130 but off the air abruptly 30 sec later (BBCMS 12/10) more, LN-13

Free Lebanon Radio, "the radio of Lebanese Steadfastness and Resistance", hrd on 1560 kHz at 0550 4/10 concluding AR nx; 5-min EG & FR nx at 0630, 0645; anti-Syrian, apparently pro-Sham'un. S/on, s/off times vary but obs at 0545-0900, 1100-1400, 1600-2000. English nx also at 1230, 1730 (BBCMS) more Lebanon; VOAS, LN-13

Voice of One Lebanon/Voice of Arab Syria clands now on 6165 ex-6170, plus 9510 (BBCMS 12/10)

Zimbabwe Will Be Free is a pgm in R. Moscow Ndebele and Shona services. In Ndebele 1530-1600 on 21645 17820 15505 12055 Thu, repeated Mons. Shona same days 1600-1630 on 21645 17820 and 15520. Contains ZNF, ZAPU, ZPLA opinions, says R. Moscow (BBCMS 5/10)

Voice of the Emigrant, the Journal of Italian Workers Abroad, continues on 908 kHz via Burg, East Germany, in Italian Wed/Fri 2015-2115 (BBCMS 21/9)

Radio Rebelde was back with Comandante David at the mike, 3/10 at 0206 tune-in on 7088; again 16/10 0154 on 7079; first time hrd since June; had feared this stn had been found and closed by Cuban govt (Harry Helms, SC)

YUGOSLAVIA; more WARC-79 LN-13

FUTURE PLANS

W A R C 1 9 7 9 The US State Dept has appointed an advisory committee to assist the US delegation under Glen Robinson, chairman of the delegation to the 1979 World Administrative Radio Conference. On the committee are six persons representing land mobile interests, 13 for public interest and minority groups, three for educational interests and one representing commercial broadcasters. The US must submit its proposals for the conference to ITU HQ by next January. The meetings in Geneva, Switzerland begin Sept 1979 and last for 10 weeks (Aug Broadcast Engineering, via SWNS)

U S S R In the foreseeable future you will be able to hear our Radio Moscow World Service any time of the day and night and in any part of the world (Eugene Milov, R. Moscow 23/9, BBCMS)

U S A WYFR will begin using its 3rd xmtr in Florida before yearend. The construction of the transmitter building is virtually completed, and its interior is beginning to take shape (WYFR D78 sked, via Pete Grenier) So 2 will still remain in MA into 1979, it seems (gh)

SRI LANKA W. German Federal Minister had talks in Colombo, and now the DW relay station will start construction. There is also speculation about 250 kW xmtrs being installed at VOA/SLBC and maybe even a DW/VOA tie up with the new station (Victor Goonetilleke, UADX July/August)

SAIPAN FEBC has secured 16 acres of mountaintop terrain on Saipan for its projected SW station on American soil. The governments which so graciously allow the Gospel to be broadcast from their shores to China, may not be able to do so indefinitely. The recent closures of Gospel radio stations in Africa underline the obvious. The installation of the two 100 kW xmtrs will cost one million US dollars in the next two years. The project is called "China Open Door Phase III", Phase I having been HLDA South Korea, Phase II DWRP Philippines, 250 kW AM stations audible on any ordinary receiver in China! (Broadcaster, 9/78, via G. Bishop)

MEDIUMWAVE SHIFT 23/11 is the big day when Eurafican MW stns are to shift to uniform 9-kHz separations, and 1 kHz higher than at present (2 kHz at top of band), meaning a totally different DX potential in NAM; also many new stations and changes in existing services. Also, Asia and the Pacific shift from 10-kHz to 9 kHz, opening up many 'split channel' DX possibilities in NAM, formerly co-channel, which remains on 10 kHz spacings (gh) NEW ZEALAND LN-13

MALI R. Mali's SW xmtrs were bought from Czechoslovakia in 1962 and have been in use ever since. They are no longer in production and R. Mali has been forced to make constant adjustments to the xmtrs 'which were about to expire'. The Chinese-made xmtrs on Kati Road were for external BC only. Thanks to a loan from West Germany, R. Mali will be able to buy two SW xmtrs, with a power of 50 and 100 kW; installation should be complete by end 1979 (BBCMS)

ISRAEL Prime time service for IBA to NAM is a dead issue. It has been considered and turned down. But listeners' opinions on the matter are still wanted (Larry Magne, PA)

HAWAII (Cf Oct LN-11, Sept LN-13, Aug LN-12) I was interested in reading in the last "SWL" bulletin that Glenn Hauser announced on DX Digest that HCJB has purchased a construction permit for a SW station in Hawaii. HCJB has never even applied for such a permit. BGEA has an application pending, with no idea when the FCC will act. If granted, it would be a Billy Graham project and not HCJB. We might help with programming and technical assistance at their request. It will certainly not be an HCJB relay station as some have apparently suggested. (Clayton Howard, via Jeff White, IL) As can be seen in the accounts referred to above, I never said HCJB had bought CP, just quoted KADM head saying they planned to turn it over to HCJB. Nor have I ever said it would be an HCJB relay station. Those who quote me should be careful to be accurate! And you and KADM need to consolidate your stories (gh)

GUYANA R. Demarara will be merging with the GBS. The British-owned company announced this, saying it is due to financial difficulties (Steve Webster, Ont.)

GABON The former Radio Voice of the Gospel, whose station ETLF was nationalized by the Ethiopian govt, is to start xmsns from the new 500 kW xmtrs of La Voix de Rénovation in Gabon (Hamar Dagblad, via Kjell Arne Olsen, Norway, SCDX 3/10) The tests 12/7 and 13/7 were probing the endurance of the Moyabi 500 kW xmtrs. Stn will return to air in next few months, probably on freqs near the ones used before. The stn says it will then be comparable to RFI, VOA, DW and the BBC (Julius Hermans, SCDX 10/10) How grandiose! Power ain't everything... (gh)

DIGITAL vs SSB SSB on SBC seems okay, but I can't see it in the future. My guess is that digital techniques will take over before SSB. I envisage that the ordinary studio signal will be sampled say 40,000 times a second and the amplitude recorded in digital form. The receiver then uses the digits to reconstruct the audio signal to near studio quality. As long as the rx can pick out the info, the final result is in-studio quality, no matter if the digital info in its path to the rx goes into a fade or becomes distorted. So the stn will either be heard well or not at all--no DX, hi! Rubbish, you might say, but the technology, via computers is with us now, the super stable low cost digital SW radios are not. Digital is being tested however in the UK and other countries. Richer stns would adopt it first, but the resulting quality gain would surely boost listenership, leading to digital/AM/FM radios on the market. Of course there would be problems--digital jammers and possibly different countries with incompatible systems could cause the idea to flop (Jonathan Marks, UK, Oct. REVIEW OF INTERNATIONAL BROADCASTING)

COSTA RICA R. Universidad plans to transmit 3 different programs simultaneously, one on AM, one on FM, and an international one on SW, as recently testing on 6105 (G.M. Céspedes ADXCI)

BRAZIL New stn not yet in operation is on 3385, 5 kW R. Jornal da Transamazônica, Altamira, alternate freq 5025 (WRTH via DSWCI SW News Oct)

AUSTRALIA Installation of new xmtrs and antennas continues at Shepparton. Some rather sophisticated antenna systems are to be installed; tests have already been made on various un-scheduled frequencies. Upgrading of the Darwin centre is about to commence, but I am uncertain as to exact nature of new installation. There are no operations at present, due to un-availability of power or antennas. I am led to believe that the xmitting equipment is substantially intact, following Cyclone Tracy (Bob Padula, Victoria, 25/9)

DX PROGRAMS U S S R R. Moscow now has only one DX pgm in EG, "Radio Moscow World Service DX Club", Sats 0530, 1130, 1830, 2130 (RM DXC 21/10) At 0532, 1132, 1832 Sats plus usual times to NAM (RM DXC 15/10) Suns 2210, Mons 0410, 0810 (R. Moscow 30/9 via 30/9 via BBCMS) Fluxy (gh)

SRI LANKA Radio Monitors International via SLBC now sked Suns 0415 on 15425 9720, Mons 1115 on 17850 11835 15120, Mons 1900 17850 15115 11870 9720 (R. Australia Japanese DX 8/10) The last word I had was that the 1900 BC was on Suns; maybe neither, cf LN-1 (gh)

SPAIN When SFR added a Sun (GMT Mon) BC to NAM, the DX pgm was moved 24h later, so now Mons 0045, 0145, 0600 (gh)

PORTUGAL Clive Jenkins, General Secretary of World DX Club, produces World DX News, Suns 0930-0945 on AWR, on new 9665. The most recent innovation has been weekly up-to-the-minute DX news items thanks to a telephone link between club HQ in the UK, and AWR Lisbon (WDXC)

PHILIPPINES Evelyn Salvador Agato is no longer doing the R. Veritas DX pgms; the new editor of R. Veritas Listeners International is Masu Chao (William Miller, CA, SCDX 10/10)

NETHERLANDS ANTILLES TWR Bonaire has reduced its EG svc to As, now 0055-0135 on 11925. The DX Special on Thu has been suspended (Oliver T. Goonawardena, Sri Lanka, ADXN Oct)

NETHERLANDS R. Nederland PT DX pgm "Rádio Atividade" now begins promptly after 2300 time sig on 15180 15315, Thursdays (gh) Dutch By Radio has ended, so DX Juke Box will again be 30 min every week (Alan Roe, DSWCI SWN) On 7/11 RN begins a DX pgm in Arabic, probably the first DX pgm in that lang, 10 min in length on Tues (Martin van Delft, Holland, SCDX 10/10) AR xmsns are at 1530-1620 on Lopik 21640 17810 9895; 1630-1720 Man 21685 11730, Lopik 21640 17810 15220 9895 6020; 1730-1820 Bonaire 21640 17810, Lopik 11730; 1830-1920 Lopik 15385 15220 and 11740 (gh)

FINLAND (Cf Oct LN-12) R. Finland has started a new fortnightly DX pgm, World of Radio, as part of the 90-min Sun pgm, Oct 8 and 22 (Juhani Niinistö, R. Finland, SCDX 26/9) So if they keep to sked, Nov. 5, 19, Dec. 3, 17, 31 etc (gh)

CANADA A reminder that you can now get all the DX news on the first airing of RCI DX Digest Suns 1805 on 17760 15260. Then it's alternating editions in 1900(Eu), 2000, 0100, 0200, 0300 and 0400 GMT Mon; and a repeat Weds 1900(Af) (gh) ODXA Newline is broadcast from Toronto with 12w PEP on 27395 LSB (alternate 27145), GMT Sat 1000, Sun 0400. I checked with local authorities and this is not illegal. QSLs are offered if r.p. is enclosed in reports to ODXA HQ, 1910-1202 York Mills Rd, Don Mills, Ont. M3A 1Y2 (Steve Webster)

ARGENTINA 12-min DXismo Arg. al Mundo now in SP fortnightly on RAE, Wed 1933 11710, Thu 0133 & 0433 9690, Sat 2203 11710, Sun 0108 9690 (Carlos Maslatón, SCDX 26/9) Welcome back (gh)

PROGRAM NEWS

U S A Fine Arts radio is beginning a 13-week experiment Nov. 3.

At last, something besides government, military-commercial, or religious hucksterism on US shortwave! A patron of the arts has bought air time on WINB: GMT Sats 0100-0200 MUSIC FROM OBERLIN, 0200-0230 locally-originated music; GMT Suns 0100-0200 CLEVELAND ORCHESTRA POPS CONCERTS, 0200-0300 ADVENTURES IN GOOD MUSIC WITH KARL HAAS. Listener response will determine whether the project continues and grows beyond January. Please write not to WINB, but to Fine Arts, P.O. Box 1003, Waterloo IA 50704. The transmission is on 50 kW to SAm, but audible in much of NAM and elsewhere. The frequency is expected to remain 15145 (gh)

WYFR's OPEN FORUM tackles these questions, among other times at 0305 on 6155: 9/11, Why doesn't God do something about all the sickness in the world? 5/12, What is the meaning of the number 7 in the Bible? (gh)

SINGAPORE, TAHITI LN-13

U S S R Paul Kuznetsov promises 'every listener' a copy of R. Moscow's new World Service program schedule once it is finalized. Meanwhile various portions of it have been announced (gh) Basically 10 mins of news on the hour, then 20 min of commentary. On the half hour, news in brief and various features: TOP TEN in two 25-min editions, Suns 1330 & 1430, rep 2030 & 2130, Mon 0830 & 0930. MUSIC ON REQUEST, Thu 0530, 1130, 1730 (RM DX 22/10)

U K O G B A N I Some November BBC WS hilites: THE SHRINKING SHOALS in two parts, 7th & 14th 1430, 9th & 16th 0330, 10th & 17th 2030. THE WAY OF EVERYMAN, Sats 1130, Suns 1830, Mons 2330: week of 4th, Islam; 11th, Marxism; 18th, Zen Buddhism, 25th Sikhism. REITH LECTURES, 6 by Rev Dr E.R. Norman on the role of churches and Christian groups overseas, Tues 2115, Weds 0230, 1430. A CITY AND ITS MUSIC (London), Mons 1430, Thurs 1000, Fris 0630--at times conspiring against NAM listeners. ANIMAL, VEGETABLE OR MINERAL, Suns 0330, Tues 0830, Weds 1215, Thurs 1830. THE BRONTËS OF HAWORTH by Christopher Fry, Suns 1915, Fris 0030, 1330.

SOUTH AFRICA R. RSA ES in EG & Afrikaans Suns only 1300-1500 on 21535 15220 1900 says it is specifically to "the boys on the border in northern South West Africa". It contains a short religious service, musical requests with dedications, and news 1445-1455. THE DEFENCE FORCE IN THE NEWS is within the musical request pgm 1335-1345; news commentary 1400-1406 (BBC)

PAKISTAN On 7/10 new radio & TV pgms were introduced which would be 'more purposeful and in consonance with Islamic society'--sports, drama, poetry, discussions, educational and recreational pgms, political talks. Vulgar songs and dance pgms have been banned and no music will be played during the recitation of 'praise of God and Prophet'. 'Ladies appearing on TV would be required to wear a dress within the bounds of decency'. Vulgar and obscene ads will be discontinued and agencies have been asked not to project ladies in ads of articles not basically used by them (Federal Minister for Info & BC, via R. Pakistan 28/9, via BBC MS)

NEW ZEALAND RNZ news, by GMT days: Daily 1700, 1730, 1800, 2000, 2300, 0500, 0730, 0900, 1100. Sun-Thu 1855, 1930. Sun-Fri 2200. Mon-Fri 0100, 0200, 0400. Fri & Sat 1830, 1900. Sat & Sun 0300. Sat 2100. News support pgms: 1800 Sun-Thu Morning Report, 2300 Mon-Fri Mid-day Report, 0500 Mon-Fri Evening Report, 0910 Mon-Fri Checkpoint. Sports: Sportsall Sat & Sun 0545; NZ Rugby Tour of UK, from 1330 GMT on 6105 or 11960. Pacific Newsletter, Sat 0430. All Things Considered (including Faith for Today, Viewpoint, Today's Book) Mon-Fri (no time given). Appointment with John Gordon, music and song for mature tastes, Mon-Fri 0300. Round about, magazine of music and interviews, with Philip Liner, from 0400. Evening Showcase, daily from 0630--stories, plays, news, special reports. Arthur Cushen's DX World, First Sun 0915. Mailbox, 3rd Sun 0915 (RNZ) RNZ has an old time radio show Thu 0305-0335 (MacCollom, IN, SPEEDX Oct Program Panorama)

NETHERLANDS Happy Station will celebrate its 50th anniversary on the air with live around-the-clock broadcasts 19/11. R. Nederland's new EG schedule magazine has been expanded and includes sketches of each program, and photos of the presenters (gh)

INDIA AIR Panel Survey The Audience Research Unit intends to conduct a panel survey and a systematic feed-back to our different broadcasts beamed for USA. The panel members would be requested off and on to fill up the structured schedules. It is requested that names of your club members interested in becoming panel members be sent to me along with bio-data (G.P.L. Srivastava, All India Radio Audience Research Officer, Box 500, New Delhi; 21/9) That's not quite the way we operate, so if you're interested, and can hear AIR regularly, contact him directly. It's news to me that AIR has any BCs intended for the USA! (gh) AIR has begun Hindi lang lessons for English speakers, Thus 2015-2030 on 9912 11620 11740 (Richard E. Wood, Univ. of New Hampshire)

HUNGARY R. Budapest marks the Bertolt Brecht centenary with STILL IT MOVES, on a Brecht play on Galileo, 21/11 Tue 2100; 22/11 Wed 0200, 0300, 1030, 1200, 1430. INSIDE HUNGARY on the same times each Wed/Thu (Budapest International)

FINLAND Maybe the best way to understand a people and their culture is thru literature. Diana Tullberg's popular series of translations and dramatisations of the best of Finnish literature continues this winter on R. Finland. First transmission is on the date given at 1930, then repeated over the following 24h, GMT Thu/Fri; also in Sunday Best 10 days later. 23/11 "Two Dialogues" by Maria Joutuni; 7/12 "First Love" by Joel Lehtonen; 11/1 "The Last Journey" by Pentti Haanpää; 1/2 "Homecoming" by Mika Waltari. "Made in Finland" moves to alternate Thu/Fri, for the latest in Finnish products, ideas and designs (R. Finland 9/78)

PUBLICATIONS Modern Electronics is to be merged with CQ, the ham mag, per Mort Waters, former ME editor. They were plagued with distribution problems since their inception (Harry Helms, SC) Yes, I never found one on a newsstand. I understand ME carried a number of fine DX articles by you. I've also heard a rumour that Communications World is going under (gh)

RDXL Mediumwave Pirate List bring you a lot of very interesting info about 75 European MW pirates hearable for DXers in Europe. 16 pages, for 3 IRCs to: Romsdal DX Lag Sales & Publications Dept., P O Box 1050, N-6401 Molde, Norway (Play-DX 2/10) We have a news magazine about free radio/offshore, called RDXL News, published every 6 or 7 weeks, at 2 IRCs, next edition due out 9/9, and orders from the USA would be more than welcome. RDXL is the HQ for Radio Seabear and Radio Birdsong International (Jerry Cane, RDXL, 2/9 letter to Sam Barto CT)

SWL Guide, 414 Newcastle Rd, Syracuse NY 13219, offers these specials while they last: 1978 WRTVH, \$9 + 60¢ postage. 1977 Comms World & Comms Handbook, \$1 each, plus 40¢ postage for one or both. 1978 Comms World, \$1.10; 1978 Comms Handbook \$1.60, plus 40¢ postage for one or both. (Todd Graves)

L'Onde, xeroxed monthly magazine in French of Club Ondes Courtes du Quebec. Much more graphically interesting than US DX magazines, includes a wide variety of columns on MW & SW DX, SWL, and of course a good source on French-language programming and schedules. Sept issue was 40p. First class to Canada & US per year C\$12.50; elsewhere by air C\$15.50, by check or postal money order. Club has been going 4 years and looks like a winner. COCQ, 3420 Chemin Ste-Foy, App. 5, Sainte-Foy, Quebec, Canada GLX 1S6 (gh) Albanian mag: LN-13

World DX Club has a new address: Flat 2, 71 King Charles Road, Surbiton, Surrey, England KT5 8PG. The club, however, is not desperate for new members (WDXC)

Benelux DX Club publishes a monthly magazine in Dutch and English, all re-typed on a single machine (whose face does not appeal to me) The 855 members, does not get much support for its SW loggings section; many other columns, best of which is TV DX, always including many photos of DX IDs and test patterns. Aug issue was 48p; seems to have increased the proportion of Dutch to English copy. Membership fee is 36 guilders per year (not including overseas postage) Postgiro 68 83 78. BDXC, Postbus 1306, 6501 BH Nijmegen, Nederland (gh)

New MW Channel Plan in Japan, effective 23/11/78, 4 crammed pages by new freq, also showing old freq, power, call, net, stn name, city, province, compiled by Yoshiaki Hayashi. 2 IRCs by airmail from JADX, P O Box 1766, Tokyo Central, 100-91 Japan (gh)

Monitor DX, bimonthly bulletin of La Salle DX Club, Apartado Aéreo 8528, Bogotá, D.E., Colombia. Not much quantity; Sept/Oct issue was 12 pages, but interesting to see DX from the Colombian point of view. Domestic subscriptions until 31/12/78 are 100 Colombian pesos (gh)

TIME JUMPS Poland back to GMT + 1 on 1/10. Lebanon back to GMT + 2 on 1/10. Chile did not revert to DST on 2/10, still GMT - 4 (Tony Jones) Cuba back to GMT -5 on 8/10. Algeria back to GMT +1 on 22/9. Albania GMT +1 1/10 (BBC MS)

ELEVEN METER WATCH 25605 Pioneer IBA continues here in our mornings, including EG 1200-1230. Jammed after 1400 (gh)
 25620 RFI used this channel weekly for Antarctica in the middle of our night, but in Oct began regular use until 1400*, strong; no mention of it at closing. (gh)
 25620 R. Moscow hrd testing on this freq; they have not previously used 11m. 20/10 1430-1530 with 2 xmtrs and languages (not ISB), one of which was WS in EG; also brief test heard 21/10 after 1400 (Larry Magne, PA) Checked 22/10 but had only a trace of a carrier (gh)
 25690 R. Liberty, Portugal, regular mornings, along with heavy jamming (gh)
 25790 R. RSA to use this D78 1056-1650 with 250 kw. (gh)
 25800 Hanoi, Viet HS good 22/9 at 2314; 4th harmonic of 6450! (Bob Padula, Australia, ADXN)
 26040 VOA-Greenville has been active here circa 1500-1900 (gh) (ADXN)
 26095 VOA-Dixon has been active here 2200-2400 (gh) Extended to 0100 for special occasion
 BBC early on announced it would not use 11m; they will live to regret this, as conditions are excellent and getting better and better as the sunspot count zooms. Years ago they used 25650 and 25720 (gh)

IN MY OPINION JAMMING (Cf Oct LN-13) (C. M. Stanbury II, Ont.) It's hard to understand exactly what Robins is disputing when he says he doesn't take my conspiracy theories seriously. Several investigators, including a special committee of the US Senate, have established involvement by US govt agencies in the Chilean coup. So certainly there was a conspiracy. Further Robins' own implied suggestion that the jamming came secretly from the US would constitute even more of a conspiracy. ... As 'flying transmitter' technology was already available in the early 1960s, it seems reasonable to assume that even more advanced portable systems were available at the time of the Chilean conspiracy. This conclusion is further supported by the fact that certain Chilean SWBC stations showed substantial increases in signal strength immediately after the coup.

(Reliable official source which cannot be identified:) According to the transmitter manufacturer, they were definitely in Chile and bought specifically for jamming, not broadcasting or PTP. Not even the Russians have charged the U.S. with jamming.

LAST MINUTE ITEMS YUGOSLAVIA R. Yugoslavia has invited international bids for delivery of equipment for a SW xmsn centre, consisting of a 500 kW xmrtr and an appropriate antenna system. Bids must be submitted by 15/12 and construction is expected to begin next year ('Borba' newspaper 7/10 via BBC MS 19/10)

WARC-79 ZBS Zambia reports that the Minister of Info BC & Tourism has called on a group of non-aligned broadcast engineers to fight for a fair share of the frequency spectrum, currently being dominated by developed countries. Opening the 2nd conference of non-aligned BC experts in Lusaka 9/10, minister added that Zambia had had a long term problem with foreign BC stns interfering with its own radio services. The third meeting of the committee for co-ordination of BC orgs of non-aligned countries was to take place in Arusha, Tanzania 16-23 Oct. I.a. to discuss WARC preparation and satellite BC. AIR reported the Indian delegation had left for this meeting (BBC MS 19/10)

ARAB WORLD DXER

Paul Routenburg

SENIOR PAPUA NEW GUINEA DXER

Paul Routenburg

As you can see, this quarter indicated that not too many people are getting enough QSI's to qualify for the awards available. I do hope that all of you are in receipt of the new NASWA country list and awards pamphlet, for it is the best yet. It can be obtained from NASWA headquarters, or from the awards chairman (I have a few). I do think that it answers all questions that you may have regarding the program, although I eventually get around to answering all that you write and ask me. I do ask that if you expect to receive an answer, please enclose a SASE or a postal card. You wouldn't believe my postal bill! Well, until next month, I do hope to hear from more of you regarding awards, and get those applications in!

73 till next time,

Dan Henderson

VERIFICATION TECHNIQUES

I would like to thank all of you for the very kind comments concerning this publication. I noticed that many of you have implemented many of the suggestions contained in the article. The beginner as well as the more experienced QSLers can make use of this publication. There are still many copies available. You can order yours from your NASWA QSL Editor for \$2.50 each. The publication is approximately 50 pages in length...Happy QSLing...Sam

Keep those reports coming in gang

PORTUGAL: Radio Portugal 17880 f/d "Native Costumes" cd.

In 27 ds. (Toope). same f/d cd. in 93 ds. for 2 IRCs. (Whitney). 11935 f/d cd. in 105 ds. for 1 IRC. (Clifford)

AWR 9670 Sines f/d cd. In 2 mo. for 1 IRC. (Kapinos).

RHODESIA: RBC 3396 Gwelo large white cd. In 1 mo. for 1 IRC (Lobdell). same in 45 ds. w/ sked. (Shaffer).

RWANDA: Deutsche Welle 15410 cd. in 54 ds. (Valko). same in 16 wks. & a ltr. on their QSL policy. (Klein).

SARAWAK: Radio Malaysia 4950 Kuching f/d "Broadcasting" cd. In 3 wks. for 2 IRCs. (Abraham).

SEYCHELLES: FEBA n/d cd. In 4 mo. Sea Tortois stamps on the QSL. Seems appropriate. (Sylvester)

SINGAPORE: Radio Singapore 11940 f/d "Singapore by Night" cd. In 4 mo. for 2 IRCs. (Tuchscherer). same in 45 ds. (Sylvester). BBC RELAY 9725 n/d cd. in 80 ds. They sent me a ltr. which states...most listeners are satisfied with the present card and the extra staff needed to issue many thousands of full QSLs would be considerable. However, listeners will receive a proper QSL if they provide new and useful information about a BBC trans-

mission. Examples are reports on reception of new frequencies, or the identity of a station which has just started to cause interference to the BBC. Thank you for this Information. (R. McVicar).

Another Oldie but a goodie from the land of tulips.

We have pleasure in verifying your report on the reception of our transmission

and 3 wks. for 1 IRC. (Kapinos). 9620 n/d cd. in 3 mo.
for an EG rpt. (E. Miller).

Well I guess thats it for another month gang.

This month we had an even 100 countries reported by our members. This is below our normal but not too bad considering that this is the time that a great many people are returning to college or just starting school. We should pick up next month. I must admit that I like the layout of this particular column better than any other we've had. What do you think? Next month we will feature 48 mb European shortwave pirates. It promises to be very interesting...Sam.

Tom Alleman
615 W. 43rd Terr., Apt. 6
Kansas City, MO 64111 USA

(816) 931-5943 0030-0400 GMT

UPCOMING DEADLINES: 10 November (Mid-Nov) 20 November (Dec) 10 December (Mid-Dec)

Reprinting permitted provided credit is given *original reporter and NASWA UPDATE*. Dates, times and days are GMT; freqs are kHz.

AUSTRIA ORF heard on 21530 at 1258 w/ IS, EG ID, and into GM at 1300 w/ nx. Good sigs. (Bob Zilmer, WI; 10-15)

BELIZE R. Belize, 3285, in EG 1149 w/ talk on insect control. Miserable UTE QRM. (Jack Jones, MISS; 10-17)

CANADA CFRX, 6070, in EG 0906; Ontario weather, sports nx; this one rarely overcomes perpetual howl on this freq. (Jones, MISS; 10-13)

CHILE R. Univ. de Concepcion, in SP 1016; px annncd as "Panorama Informativo." (Jones, MISS; 10-20)

CHINA (P.R.) PLA in CH on 3200 // 3400 w/ talks by W and poor sig at 1143+ on 18 Oct. (Bill Whitacre, MICH) +++ Peking per Young in TDXN on 4787 at 1145+ w/ CH opera. Poor sigs and UTE QRM. (Whitacre, MICH; 10-18) +++ Peking, 6225, at 2225+ w/ fair sig, wailing and excited talk by M in CH. Questionable until "East is Red" at 2230 then W in CH w/ annmcmts and M w/ nx. Not // 6290 also audible this time. (Whitacre, MICH) +++ RP, 9820, in EG 1243; discussion of some sort of Chinese flute followed by music played on same. Sounded like ones I used to make out of cane stalks way back . . . Different tune though. (Jones, MISS 10-15) *** touche, Jack. tba

COLOMBIA LV del Norte, 4875, at 0330 w/ ID, freqs, and latin mx. (Jim Fedor, CAL)+++ R. Melodia, 6140, in SP 0926; usual rolling vibes IS, ID, MW fqy and power (30 kW), but still no mention of SW. "La Cadena Lider", TC, "La Hora Exacta." (Jones, MISS; 10-7)

COSTA RICA R. Univ. de Costa Rica, 6103a, in SP 0343; ID, talk. They have definitely moved up a few kHz. Het, probably with Su Pantera, 6105. (Jones, MISS; 10-14)

EGYPT Cairo, 15375, in EG 2100 w/ nx, comment, and mx to 2200*. (Zilmer, WISC; 10-15)

FRANCE RFI, 25620, in FR 1300; nx. This is a new freq and has been heard as early as 1130 and as late as 1400. Heard every morning when band is open. Good sigs sometimes. (Zilmer, WI)

GABON RTVG, 4777, in FR 0515; local mx, talks by W, ID at 0530 and drum mx. (Fedor, CAL)

GHANA GBC 2, 3366, in EG 0600 w/ ID, TCs and nx by M. (Fedor, CAL)

GREECE VOG, 11730, in EG w/ NAM Ser at 0020 w/ excellent sigs. (Fedor, CAL)

GUAM KTRW, 11810, in EG 1030-1058* w/ ID and IS. (Zilmer, WI; 10-17)

GUATEMALA R. Maya, 3325, in SP *1024; NA, ID, "Esta es R. Maya, transmite desde Barillas," marimba mx, Indian talks. (Jones, MISS; 10-19)

INDIA AIR Gauhati, 4775, in Indian like lang ("Assamese" listed) 1215+; talks by M, sometimes quite excited. (Whitacre, MICH; 10-17)

INDONESIA RRI Samarinda (Borneo), 3294.5 TENTATIVELY noted at 1145+ in Indo; talks by M periodically interrupted by island mx; possibly a play, local Krongcong mx and W singing, then annmcmts by W, SCI, and Jakarta nx relay on hour. (Whitacre, MICH; 10-17)+++ RRI Fak Fak (Irian Jaya), 4789, in Indo 1217+ w/ fair sig and bad modulation; M talking after Jakarta nx relay. (Whitacre, MI; 10-17)

ISRAEL IBA heard under R. Norway on 21730 at 1200 w/ EG nx, weather, ads, "Kaleidoscope" px. This is a low power tx // with 21495 which is the main beam to NAM and Eur. (Zilmer, WI)

JAPAN RJ will continue to use its present sked to NAM during Nov 5 to Feb 3 period. It is: 2345-0045 on 17825, 15270; 0130-0300 on 21640, 17825, 17725, 15195. (Zilmer, WI)

NEPAL RN, 3425, in better than usual at 1205 18 Oct but still very weak w/ talk by M in Nepalese. (Whitacre, MICH)

NORWAY R. Norway, 21730, in EG 1200; nx and views style pgmng, and stronger than Israel on same freq. However, as soon as IBA goes to Yiddish or RS, they are jammed which also knocks out Norway in EG. So, at 1400 RN is now jammed. (Zilmer, WI)

PAKISTAN RP, 17665, in EG at 1100 w/ nx to 1115*. (Zilmer, WI; 10-13)

PERU R Nacional, 6082, in SP/EG 0938; EG annmc: This is the National Radio of Peru. This is mx of Peru. First time I have heard any EG on this stn. (Jones, MISS; 10-17) *** It may be the harbinger of some sort of EG px, and therefore bears further monitoring. tba

SPAIN SFR, 11840, in EG 2100 w/ nx, and fair sigs. (Zilmer, WI; 10-14)

SUDAN Omdurman, 11800, w/ AR mx to 0700, pips on hour, EG ID and nx by W. Began to fade around 0715. (Fedor, CAL)

TIBET Xinang listed on 5260 and TENTATIVELY noted at 1205+ 17 Oct; W narrating play. Lang had same sound as CH but outlet was not // w/ other CH freqs. (Whitacre, MICH) *** possibly a different dialect Bill??? Seems like I recall that the Tibetans originated a lot of local pgmng. This may be one of those. tba

TOGO Lome, 5047, in FR at 0542 w/ local mx and talks by M. No sign of Cook Is. tonight. (Fedor, CAL)
UGANDA UBC, 15325, in EG 0340 w/ Uganda Today px. Very strong and clear. (Fedor, CAL)
VATICAN Vatican R., 21485 NF, at 1115-1130 w/ EG religious px. Into lang at 1130. Fair to good sigs. (Zilmer, WI; 10-15)
VENEZUELA R. Valera, 4840, in SP 0940; ID and TC, "En R. Valera, cinco y cuarenta minutos." Fair to good. (Jones, MISS; 10-7)

Another distressingly small turnout, but some fine catches in what did come in. Tnx to all who found time to contribute. My best till next time . . .

73,

Tom

A FRENDX classic

1973

BEING A DX'ER IS . . .

1973

- ...having your sanity questioned because you get up in the middle of the night to listen to the radio
- ...putting up your long-wanted antenna and having your neighbor say, "It'll never fly, Orville."
- ...trying to convince the postal clerk you are not kidding, you indeed do want 20 International Reply Coupons
- ...explaining to someone you are not a ham and having him ask why you don't become a ham and be able to talk, too.
- ...breaking the news to the family you are going to spend \$500 on a radio.
- ...getting dirty looks from the postal clerk when you sign for your two-pound package of propaganda from Radio Peking.
- ...having a neighbor who likes to run his arc welder right when you are about to ID Cook Islands.
- ...having someone yell, "Telephone!" at the top of the hour.
- ...explaining to your parents you are not going out on the town with your buddies because you wish to get up at 4 am to try for this Indonesian station.
- ...blaming everyone in the house for your missing QSL and then finding it stuck in your WRTH.
- ...having your CB neighbor give you one of his "QSL" cards.
- ...being appointed the expert on all matters of electronics and electricity by other members of the family and being expected to fix the TV set any time it acts up.
- ...telling an acquaintance you listen to distant radio signals and having him tell you about a friend of his who is a ham radio operator in Hubbard Lake, Michigan, and who once talked to some guy in Ohio or maybe it was Iowa.
- ...finding bills in your mailbox when you were looking for QSL's.

(by Andy Kerr, April 73)

You really know you're a DX'er . . .

- ... When you soup up your rig and sell your car, instead of the other way around.
- ... If your wife quits worrying about where you've been all night.

DAN ROBINSON

4437 Sedgwick St., N.W.
Washington, D.C. 20016
PH: (202) 966-3654
from 2200 - 0100 GMT

Picture, if you will, a gathering of DX'ers from the Washington, D.C. area comprising many varied careers and interests, combined with the presence of the Chief Washington Correspondent for the Soviet TV and Radio, and the Communications Officer from the Embassy of Sri Lanka. If you can picture

such a meeting, you will have some idea of what the first WADXA (Washington Area DX Association) DX Get Together was like. A mixture of technical radio interests relating to all wave bands, and cultural stimulation -- 23 people attended the first WADXA pot-luck dinner/radio session and were treated to a slide show about Sri Lanka and an engaging discussion about differences in broadcasting in the U.S.S.R. and U.S.A. with the Radio Moscow correspondent, Yuriy Solton. The next WADXA gathering should be even better!!! And the DX season should be in full swing as you read this--already there have been some excellent African and Asian days for reception. . . Jim Young announces the 1979 Tropical Bands Monitoring Contest, 0001 GMT December 30, 1978 to 2359 GMT January 28, 1979 with 5 1979 WRTVH's awarded as first prizes. Contact Jim, P.O. Box 576, Wrightwood, CA 92397..... In the mean time, support Shortwave Center! Good listening and 73.....

NOTICE

NOTICE

An announcement on the October Headquarter's Page stated that the NASWA Country List and Awards Program booklets were still available. Even if you do not collect QSL cards or keep personal loggings you should have a copy of this publication. There is a geography lesson in the "Notes" section that is worth 28¢ postage by itself. That's all it costs...28¢ in stamps!

I hope to be able to do some more DXing of my own in the 49m band next month.

*I have personally received an announcement (amnt) from Jim Young-CA, he has organized a DX contest, to be called "The 1979 Tropical Bands Monitoring & Contest". The contest will be held from DEC. 30, 1978 to JAN. 28, 1979, You may participate as either a monitor or as a contestant. The contestant who collects the most points during this period will win a 1979 WRTVH. Write to James Young at P.O. Box 576, Wrightwood, CA 92397, for Details!!

Here's some details on the contest Steve mentioned.

1979 TROPICAL BANDS MONITORING and CONTEST

This years event has been scheduled from 0001 GMT December 30, 1978 to 2359 GMT January 28, 1979. It will cover slightly expanded frequencies, with all results, also expanded, mailed to all entrants upon receipt of an SASE(see below).

A. Participation:

1. Contestants send in entries: Contestants may enter in any one of the five categories; 120, 90, 75, 60 meters, or an all band entry. Each log sheet to be marked "ENTRY". If a contestant wishes to enter the 90m contest, he may also be a monitor of any or all of the remaining bands. An all band category entry does not entitle one to be a monitor.
 2. Monitors send in loggings: Monitors may enter any one or combination of bands sending in loggings, omitting the points section column on the log sheets. Monitors will mark each log sheet "LOGGINGS". There are no prizes for monitor participants.
- B. All participants must use a logging sheet format similar to that which follows below;
- | DATE | TIME | FREQUENCY | STATION OR SLOGAN, ETC. | COUNTRY | PTS | TOTAL PTS |
|--|------|-----------|-------------------------|---------|-----|-----------|
| Separate sheets must be used for each band. Actual listings need not be in frequency order, but it is suggested that each 100 kHz band segment could be separated. | | | | | | |
- C. All participants must submit the following info; full name, complete mailing address, any receiver(s) used, antenna(s), and other accessories. Your home club affiliation is requested, but not actually required. See item F.
 - D. Frequencies will be as follows: 2200 to 3100 kHz(120 meters); 3100 to 3700 kHz(90 meters); 3700 to 4500 kHz(75 meters); 4500 to 5900 kHz(60 meters). If possible state frequencies to the nearest kHz. Those with measuring equipment; please state frequencies to nearest 0.1 kHz.
 - E. Point scoring will be as follows: 2 pts for any station in one's own continent; 5 points for any station in any other continent; Separate loggings may be made of previously logged stations if by long path and will be awarded with 10 pts; state "LP" in country column. All unidentified stations will be given 1 point. Utilities can be logged such as time stations, feeders, etc., but will not be awarded with any points.
 - F. Prizes will be 1979 WRTVH's awarded to the first place winners in each of the 5 categories. Certificates of merit to the first top three winners in each category for both contestants and monitors. A special certificate will be awarded the club with the highest membership/participation ratio; this the reason for mentioning your main club affiliation if you wish.
 - G. All entries must be postmarked no later than March 1, 1979 and in my hands no later than March 26, 1979 to be eligible for any prize. This applies to all participants. All entries become the property of J. Young and none will be returned.
 - H. Entering Requirements:
 1. Contestants are required to send one SASE franked with 30¢ in stamps along with a \$1.00 entry fee. Overseas (everywhere but USA) send SAE with 10 IRC's (air mail return).
 2. Monitors are not required to send any entry fee or SASE, however, if a monitor desires the list of loggings, participants, etc., an SASE(30¢ in stamps) must be enclosed with their loggings. Overseas monitors send one SAE plus 5 IRC's (air mail return).
 - I. Results to be mailed to all contestants and those monitors requesting so will be sent the entire participants name, scores, winners, and a complete list of the loggings made.
 - J. The honor system will prevail! Station ID's will not be required, but list logging will not make a 1979 WRTVH yours. I can assure everyone that each entry will be carefully and completely checked. Entries and loggings from experienced DXers will help serve as guide lines in the final judgements. All results will be final!
 - K. All prizes to be awarded, furnished and guaranteed by J. Young. J. Young will not be eligible for any award or certificate. This is your contest/event; comments, suggestions, and or criticisms are welcomed.
 - L. Address all loggings, entries, requests, and/or correspondences to:

log report

section

6200-11699

TOM GAVARAS
16920 17th Ave., N. Wayzata, MN 55391

NOTICE: Just another reminder to our new members (and our more experienced members who we have not heard from recently! Hint! Hint!) that all reports for the log report sections should be sent to our Distribution Editor: Dave Walcutt, 2828 Rogerdale #108, Houston, Texas 77042. Dave's deadline is the 12th of the month, so give your reports enough time to get to his Houston QTH! If its too late to meet Dave's deadline for logging distribution, send your reports directly to the individual editors or to Update (thats what the column is there for, folks!).

A lot of excellent reports this month with loggings of Laos, Andorra, Cyprus (Bayrak Radio), Ethiopia, etc., etc! Keep them coming!!! Also, the next Scoreboard Deadline is November 15th and the spotlight will be Asia! On to the reports.....

- 6200.5 ALBANIA R. Tirana; *0330-0358* English pro communist cntry (Johnson 9/28). 2030 Italian news program. Drifting frequency w/hetrodyne (Wood 10/15).
- 6215nf ANDORRA R. Andorra; 2141-2236 s/off, playing mostly exclusive US and European disco songs. DJ in Dutch every third song or so with talk to about 2210, when switched to FR, breaking in more often. At 2222 guy broke in Dutch with definite ID for Radio Andorra, and giving some numbers which sounded like the address. At 2235 gave French and Dutch IDs, and pulled the plug. Fair signals, sounding more like 10 kW than the listed 25 kW, and low audio. Presumably a test for this new frequency, as not heard the next night. (McNeil 9/28 via Tropical DX Newsletter). Great logging, Pitt! (tg).
- 6230 EGYPT R. Cairo; 0230 English ID, frequency schedule and Arabic music (Whitney 9/20).
- 6250 EQUATORIAL GUINEA R. Malabo; 2045-2259 s/off with talk in Spanish/vernaculars, African music with drums, IDE and National Anthem before sign/off. (Wood 8/17, Pineault 10/7, Shingler 10/7). If you think hearing them was tough, try getting a QSL from this station!!! (tg).
- 6280a CYPRUS (TURKISH FEDERATED STATE) Bayrak Radio; 0315-0410 Turkish with carrier and test tones. Turkish National Anthem (The March of Independence) by band at 0325, ID by man "Burası Bayrak Radio," then another anthem. ID by lady at 0329 with frequencies given into Turkish music. Good signal on most days, although with a fair bit of Utility QRM. (McVicar 9/17-23). Thanks for all your excellent reports, Richard!! (tg).
- 6860 CHINA R. Peking; 2030 English to Europe with talk on Viet refugees (Wood 8/17).
- 6900 TURKEY Turkish State Meteorological Service; 0436-0445 Turkish talk by a man with Turkish music. Much interference from a Utility station (Valko 9/23).
- 7025 UNIDENTIFIED; 1135 Chinese talk and music. Is this Singapore? (McMullen 9/11). -I think this might more likely be the Chinese PLA station. (tg)
- 7095 CHINA R. Peking; 1100 Chinese talk by woman with an identification (Valko 9/15).
- 7105 ASCENSION ISLAND BBC; 0635 Music request program w/male announcer in BG (Gunnun 9/22)
- 7065 ALBANIA R. Tirana; 0012 English cntry & ID. Fair w/heavy QRO CW QRM (Johnson 10/20) 2358 Interval Signal, English identification and cntry (Sandborn 10/9).
- 7075 ALBANIA R. Tirana; 2100 s/on French program (Wood 10/3).
- 7110 ETHIOPIA V. of the Revolutionary Ethiopia; 0327-0332 Amharic s/on with flute IS, ID by man, uneven time pips, National Anthem by band, ID (Addis Ababa can be picked out of the ID), and then what sounded like news. Very good with some ARO interference. (McVicar 10/2). Excellent logging, Dave! (tg)
- 7120 ALBANIA R. Tirana; 0130 English program (ex 7300) // 9750 kHz (Wood 9/18).
- 7125 POLAND Polish Radio; 1720-1730 s/off w/English news & music to Africa (Vance 9/18).
- 7140 MOLUCCA ISLANDS RRI Ambon; 1352-1400 s/off. Indonesian with folk music, closing announcement by lady, Love Ambon, Chimes & off. // 4845 kHz (Godfrey 9/8).
- 7140 OMAN (Masirah Island) BBC; 2358-0002 English w/Bow Bells and s/on by man (McVivar 9/3)
- 7145 UNIDENTIFIED (but VERY hopefully Laos); 1055-1135 Unidentified Asian language. 1055-1100 test tone, 1100 sudden s/on like Voice of Vietnam, with march music and YL giving ID. Bit more of orchestral march music, then either OM or YL talking. From about 1115 to 1129 mostly music (often features stringed instruments, one which sounds like it is plucked, and has a twang). Songs often have vocalists, sounds a bit like chanting. 1129-1130 Break in programming. 1130 Music & OM talking. Usually fair, a bit fluttery w/ARO QRM. Ideas? (McVicar 9/7-12). - This is an excellent example of how unidentified reports should be submitted! I receive many unidentified loggings with just "talk & music in unidentified language." With details like that, it is nearly impossible for us to help you identify the station you heard! (tg).

- 7150 USSR R. Kiev; *0030-0100* English World & Ukraine news, mailbag (Fraser 9/3).
- 7170 AUSTRIA ORF; 0915 English DX Program to Europe. Noted a SWLing announcement put out by a DX Club in Ohio. Very good signal (Vance 9/24).
- 7170 NEW CALEDONIA R. Noumea; 0555-0805+ French ID, news and French pop music. Fair with some interference (Johnson 9/12, Wood 10/8).
- 7190t SAUDI ARABIA BSXSA (Riyadh); 2120 Arabic type music. Male announcer at 2130 but no ID that I could ascertain. Announcer probably gave news. (Earhart 10/3).
- 7190 MOROCCO VOA; 1110 English cmntry about Tolstoy. Good w/Peking QRM (Johnson 9/17).
- 7210 GERMANY (WEST) DW; 0209-0220 s/off, English news, ID, freqs, address (Earhart 9/21).
- 7215 GREECE VOG; 0400 sign-on with news in Greek (Wood 10/11).
- 7225a TUNISIA RTVT; 2138 Arabic vocals then then talking by two females and a male which sounded like a Soap Opera, music, etc. Tentative! (Earhart 10/3). 0429 s/on Arabic with National Anthem by band, ID by OM, opening announcements with frequencies given, chanting. Very good (McVicar 9/21).
- 7255 NIGERIA V. of Nigeria; 0555 s/on Drum Music, English ID, schedule, speech, pop music, etc. (Beu 10/9, Johnson 9/15, Whitaker 8/7).
- 7260 ENGLAND ROI Relay; 0312 IS, Russian ID & talk (Noonan 9/17, Wood 10/7).
- 7260 GERMANY (EAST) RBI; 1700 s/on Portuguese news & music (Vance 9/17).
- 7265 GERMANY (WEST) Sudwestfunk; 0240-0317 German news & pop music. Reception would have been good if it wasn't for WB4YUS in Mobile, Alabama and W9VVA in Munster, Indiana (hi). (Alexander 10/1, Radcliffe 8/8).
- 7270 POLAND Polish Radio; 0500 Esperanto s/on "Parolas Varsovio, naskiguro de Esperanto." (Wood 10/11) 0200 Interval Signal, English ID, TC & News program (Sandborn 9/19).
- 7275 ITALY RAI; 0505 Interval Signal and program in Romanian. ARO QRM! (Johnson 9/12).
- 7280 INDIA AIR; 1508 Iang/BG with Sitar mx and English news at 1530. ARO QRM (Johnson 9/23)
- 7280 FRANCE RFI; 0505 French news program (Clift 9/9).
- 7295 MALAYSIA R. Malaysia; 1110 English with a light music program (Wood 9/14).
- 7325 ENGLAND BBC; 0205 English World news & Review of British Press (Thompson 9/5).
- 7345 CZECHOSLOVAKIA R. Prague; 0130 English news by woman with music (Gurrunn 10/1).
- 7400 USSR Moscow First Pgm; 0500 Russian news, National music & talk (Dayen 9/26).
- 7500 AUSTRALIA VNG Time Station; 1040 English Time Pips, ID at 1045 (Gallagher 9/30).
- 7512 VIETNAM VOV (Tay Nguyen); 1159 Local music, VT talk by man & woman, etc. (Prath 10/1)
- 7590 CHINA R. Peking; 2030 English to Europe // 6860 (Wood 8/17).
- 7660 CHINA R. Peking; 2040 Polish talk on Hua's visit to Yugoslavia//9440 (Wood 8/17).
- 7850 CHINA R. Peking; 1210 Chinese talking by a man & female (Prath 10/1).
- 8000 NUMBER STATION; 0313-0320* English 5-groups numbers by woman (Valko 9/25).
- 9022 IRAN VOI; 0215+ Persian talk & vocal music (Godfrey 9/8, Thompson 8/30, Dayen 10/2).
- 9030 USSR Moscow HS; 0320 Russian (SFB) Gymnastic Lessons, music, etc. (Dayen 10/2).
- 9380 CHINA R. Peking; 2040 Italian talk on Hua's visit to Romania (Wood 8/17).
- 9390 CHINA R. Peking; 2035 Spanish news to Europe (Wood 8/17).
- 9410 ENGLAND BBC; 2330-0003 English news, talk on Sherlock Holmes, etc. (Swanson, Hynes).
- 9420 KOREA (NORTH) R. Pyongyang; 1205 Spanish talk on "Gran Lider" (Wood 10/14).
- 9423 CHINA Voice of the People of Thailand; Clandestine. 1154-1202 in Unidentified language. YL talking about Thailand, music at 1156, YL talking, orchestral mx, ID, etc. 1158-1159 Silence. 1159 IS (played four times) on chimes or celeste. ID by OM and YL at 1200, into talk and orchestral music (same tune as IS). Good to very good! Even stronger than Pyongyang on 9420! (McVicar 9/6).
- 9440 CHINA R. Peking; 2035 Polish program // 7660 kHz (Wood 8/17).
- 9460 CHINA R. Peking; 0955 English cmntry on Chinese/Vietnamese relations (Zilmer 9/16).
- 9475 EGYPT R. Cairo; 0205-0330 English news on Camp David Summit and Egyptian music. (Earhart 9/24, Hynes 9/19, Thompson 9/5, Miller 9/29, Johnson 9/12).
- 9495 USSR Moscow Home Service; 0530 Russian news program. Good signal (Dayen 10/2).
- 9500 ALBANIA R. Tirana; 0530 Portuguese IS, Identification & news (Dayes 10/2).
- 9500 LIBYA PRB; 2310-0058* Arabic speech by Qaddafi & Arabic mx (Swanson, Jordan, Johnson).
- 9500 USSR Moscow HS; 1100 Russian with non stop organ instrumental mx (Fraser 9/8).
- 9505 DOMINICAN REPUBLIC RTVD; 1200 Spanish s/off (Wood) 2150 SP talk & music (Jones).
- 9510 ALGERIA RTVA; 1800 English US style format w/DJ news at 1805 (Vance 9/8).
- 9510 ANTIGUA BBC; 2115 s/on English to Central America //15420 kHz (Wood 10/6). 0815 English talk and apologized for one minute break on 15070 (Klein 10/21).
- 9515 TURKEY VOT; 2134-2250 English news and DX Corner (Earhart 9/7, Valko 9/18).
- 9520 PAPUA NEW GUINEA NBC; 0800 English news, ads for Baby Food, etc. Excellent (Lovitt).
- 9720 SRI LANKA SLBC; 1229 English ID and music from 30-40's (Osterman 9/20).
- 9525 KOREA (SOUTH) R. Korea; 1000 IS, English ID, freq, sked, nx, cmntry & mx (Zilmer 9/16)
- 9525 POLAND Polish Radio; 0204 English cmntry on Polish industry (Kapiros 9/22).
- 9535 CANADA RCI; 0100 English ID, News, Listeners Letters, DX News (Van Stralen 9/11).
- 9535 SWITZERLAND SBC; 1315 English Jazz Panorama program, s/off 1345 (Vance 9/24).
- 9540 CZECHOSLOVAKIA R. Prague; *0100 EG ID & nx (Alexander). 2350 Spanish ID (Schumacher).
- 9545 GERMANY (WEST) DW; 0530 English news & Saturday Show (Dayes).
- 9545 SOLOMON ISLANDS SIBC; 0720 English/Pidgin pop mx, ID, news, etc. (Osterman 8/30).
- 9555 PHILIPPINES VOA (Tinang); 1600 English Identification and sign/off (Wood 10/1).
- 9560 BULGARIA R. Sofia; 0130 Spanish program s/on. Good signal (Wood 10/9).

- 9565 FINLAND R. Finland; 2359 s/off English to N. America. //15265 (ex 11800) (Wood 10/5).
- 9570 ROMANIA R. Bucharest; 0219-0230 English ID & tlc on DX Club (Valko 9/19, Dayer 9/14).
- 9575 FINLAND R. Finland; 1955-2001* Lang tlc into EG ID & Schedule (Valko 9/17). *2125-2132 IS, English ID, news & magazine (Osterman 9/22, Brown 9/13). 2200 Finnish s/on to Europe (Wood 10/1).
- 9575 ITALY RAI; *2228 IS, Chimes, Spanish ID & News (Valko). 0105 English nx (Alexander).
- 9580 AUSTRALIA R. Australia (Shepparton); *1100-1210 English ID, Australia Tonight, vx, cmntry & pop mx (Fraser 9/12, Schumacher 9/15). 1630 English nx & mx (Swanson 9/24).

- 9695 SWEDEN R. Sweden; 0230 English w/Echo pgm, SCIX, Stamp pgm, etc. (Hynes, Johnson).
- 9705 ALGERIA RTVA; 0415 Arabic talking & chants (Lineback 9/6).
- 9705 BULGARIA R. Sofia; *0000-0100* English ID, News & cmntry (Fraser, Dayer, Cucura).
- 9710 ANTIGUA BBC; 1100 English World News // 11775 kHz (Zilmer 10/2).
- 9715 HOLLAND R. Nederland; *2030 IS, Spanish ID and news (Fraser 9/18).
- 9715 NETHERLAND ANTILLES R. Nederland; 0530 English with the news and usual cmntrys.
- Interrupted the editorials with the announcement that the newly elected Pope John Paul had died of a heart attack in Vatican City. Because of his sudden death, they felt that it would not be proper to broadcast DX Juice Box, so they played mournful music. But R. Nederland did decide to air "Dutch by Radio" before they signed off!!!
Geeeeeceee! Very good signal, as usual (Gavaras 9/29).
- 9720 USSR R. Kiev; *0300-0328* English news, cmntry, View Point from Kiev (Jordan 9/21).
- 9720 KOREA (SOUTH) R. Korea; 1603+ English ID & News about Korea (Johnson 9/23, Wood 10/15)

There is a shorter section this month, which is expected when the lower bands open; but many good loggings not submitted in previous months. I'm trying to avoid repetition by using different loggings each month, so that in a three month period, you will have a rather complete set of stations.

If and when you have a logging which might be questionable, please put down if it was ID'd or not, in order to give me a clue as to whether it is scheduled or an unusual logging.

Well 73's for another month; and keep those loggings coming in. I enjoy reading them all, even though it's necessary that they be condensed for this column.

B. J.

"Banquet"

David L. Walcutt,
2828 Rogerdale #108, Houston, TX 77042

Deadline: the 12th of each month.

Brian ALEXANDER, Mechanicsburg, PA (RF-2800); Richard T. AUSTIN, Eddyville, KY (Patrolman 9); Sam BARTO, Watertown, CT (HQ-180 etc.); Michael N. BEU, Austin, TX; W. Noel BROWN, Ann Arbor, MI (SB-313); Josephine I. BRIAN, Stockton, CA (FRG-7000); Leslie BYRON, Laurelton, NY (Patrolman 9).

Michael J. CALDERWOOD, Denver, CO (FRG-7/DX-40); Anthony A. CLIFT, Camp Bellville, Ont. (Pye 1101); Vladimir CUCURA Jr., Reading, PA (FRG-7/RF-2800); G.D. DAWSON, Sherwood Park, Alberta (FRG-7/ICF-5900W); Michael DAYEN, St. Louis Park, MN; Kenneth A. EINHART, Allentown, PA (FRG-7).

Marlin A. FIELD, Hillsdale, MI; Gary FOWLER, Islington, Ont. (FR-101S); Robert FRASER, Cohasset, MA (XCR-30); Daniel GALLAGHER, Lubbock, TX (JVC-9437/DX-160); Tom GAVARAS, Wayzata, MN (HQ-180 etc.); Emery W. GEARHART, Springfield, OH (SPR-4); Mark S. GODFREY, Broomfield, CO (QR-666/ICF-5900W); Tom GUNNUM, Griffith, IN; Harry L. HARTSELL, Lompoc, CA (FRG-7); Ron HOWARD, Santa Barbara, CA (SB-310); Chris HYNES, Erie, PA (RF-2800).

Douglas W. JOHNSON, Issaquah, WA (SP-600/HQ-180); Jaek R. JONES, Jackson, MS; Rufus JORDAN, Pittsburg, PA (Transoceanic); John M. KAPINOS, Shrewsbury, MA (FRG-7/SP-600); Stu KLEIN, Gainesville, FL (DX-160); Jerry A. LINEBACK, St. Joseph, IL (SPR-4); Chris LOBBELL, Stoneham, MA (FRG-7000); Lawrence LORZ, Hilton, NY (SPR-4/FRG-7); David LOVITT, Wichita, KS (FRG-7).

Donald L. McCANTS, Trussville, AL (RF-2800/DX-160); Richard McVICAR, Prescott, Ont.; Ivery L. MARABLE, ITALY; Brett MARKER, Rockford, IL (CRF-320); Eric MILLER, Dorchester, MA (GR-54/DX-150); Richard H. MILLER Jr., Weirton, WV (RF-4800); Tim NOONAN, Milwaukee, WI (SW-4A); Jay NOVELLO, Endwell, NY (RF-2800/XCR-30); Michael O'SHEA, Buffalo, NY (DX-96); John C. ONKEN, Roanoke, IL; Sydney J. OSTERMAN, Toronto, Ont. (FRG-7/SPR-4).

Nick PAPPAS, Levittown, PA (SPR-4); George POPPIN, San Francisco, CA (FRG-7) John V. PRATH, Ft. Lauderdale, FL (FRG-7/DX-160); Edward J. PYATT, Philadelphia, PA (XCR-30); Ben RADCLIFFE, Ottawa, IL (RF-2200); Roger REINI, League City, TX (Zenith Royal 3000-1); Bill SANDBORN, Hendersonville, NC (FRG-7); Fred SCHUMACHER, Kindred, ND (RF-2200); Dan SHINGLER, St. Clair Shores, MI (FRG-7); Richard D. SWANSON, Wellman, IO (DX-160).

Leon TANNENWALD, Brooklyn, NY (SPR-4); Dave VALKO, Dunlo, PA (DX-160); PFC Robert J. VANCE, Stuttgart, W. GERMANY (FRG-7); William L. VAN STRALEN, Madison, WI (R-390A); Elisabeth WHITAKER, Knoxville, TN (RF-2800); Jason WHITNEY, Prince George, B.C.; Frank WOLTMAN, Cambridge, WI (RF-4800/FRG-7/DX-160); Robert R. ZILMER, Milwaukee, WI (R-390A/SPR-4).

Late reports, not included in the loggings, received from Grant, Frank, and Wiseblood. Remember that the deadline of the 12th is for receipt and that loggings are then assembled and forwarded to the individual section editors.

It is a big help when loggings are cut apart and grouped together for the appropriate log report sections. This is especially the case where reports are typewritten on plain paper. Several individuals are not putting their name on each item, and I then have to scribble it in myself. So please be sure and autograph each logging, since they are cut apart and mailed to four different editors.

The NASWA log report forms are available from HQ in Liberty for a stamped, self-addressed envelope.

"1979 TROPICAL BANDS MONITORING and CONTEST" -- for info on this, mail a SASE to: James Young, P.O. Box 576, Wrightwood, CA 92397.

MY SINCERE THANKS TO ALL THIS MONTHS REPORTERS! 73,

Dave

Music Page

In tuning across the dial you can tell which stations are from which areas simply by listening a few seconds to the type of music. You probably haven't given a second thought as to why an area's music should stand out so differently from any other so identifiably, and you perhaps just attributed it to "different culture".

After all, music is just a collection of gadgets making sounds, perhaps with some vocals thrown in, so there has to be more to the story than that. To understand just how the making of sounds can be so distinctively diversified, let's have a look at the basic stuff music is made of.

In the realm of audio frequencies, you can take any one frequency, generate its first harmonic, divide it until you come up with eight notes (one of which is the harmonic of the first) and come up with an "octave" (meaning "series of eight"). The old Do Re Mi Fa Sol La Ti Do is the one we're all familiar with--however, it is just the European way of looking at musical division. The people of India, you see, view an octave as being divided into twelve parts (in this case, as well as all others, I will refer to the frequencies between and including fundamental and first harmonic as an "octave" regardless of how it is divided in other systems, for the sake of simplicity). In the Middle East, as we've already seen, the traditional divisions are four or five. Tropical Africa deals with only five.

So here we find basic differences in various ethnic music and we haven't even discussed instrumentation or culture yet! Now let's explore the physics of music a bit further...

The simplest way to generate an audio frequency is to strike a piece of wire tuned to resonate at a particular frequency--as in a piano. Strike the "middle C" note (Do) and you make a hammer strike a wire that vibrates 32.7 per second. Now let's look at a piano keyboard:

Strike any eight white keys in a row, up the scale, and you have played from a tonic to its first harmonic. Play any series of 12 white and black notes and you'll get an approximation of the Indian scale; Play a series of five black notes only and you get an idea of the Tropical African scale.

This is a rather simplistic explanation, and to be sure; when homo-sapiens first played with music, it wasn't nearly as scientific--so perhaps we should also take a look at how music had become to be set in these systems. First, let's look at how our own system came to be.

The pitch a person notices most often is the pitch people use to speak. Translate that into a musical tone, and you've got yourself an arbitrarily established reference fundamental frequency. The human ear, quick to identify the harmonics of such a tone, just as quickly established a range of harmonic intervals (octaves) that could be vocalized by the deepest-voiced male to the highest-pitched female. The ear, however, perceives sound logarithmically, and the eight notes that came to divide an octave weren't exactly evenly spaced. If, in an ideal scale, you would have, say, one "step" from one note to the other without variation, then the octave as we know it would be spaced thus: 1, 1, $\frac{1}{2}$, 1, 1, 1, $\frac{1}{2}$. On a keyboard, it would

be described like this:

This was the accepted keyboard right up until the Classical period (that is, the era that produced the famous Classical composers), when one composer got totally dissatisfied with having to re-tune his piano every time he wanted to change key (a "key" is a pattern of notes with the same spacing, only the pattern is shuffled somewhat, like 1, $\frac{1}{2}$, 1, 1, 1, $\frac{1}{2}$, 1, or 1, 1, $\frac{1}{2}$, 1, 1, $\frac{1}{2}$, 1, and so on, because you use some note other than middle C or its harmonic as your fundamental or tonic). This fellow then devised a system whereby you could obtain half-steps wherever you wanted to, and inserted those little black keys in the keyboard. No more re-tuning a piano to change key--all you had to do was put your half-steps in where you needed to, by "sharpening" a note or "flattening" a note (that is, taking a note up a half-tone, or down a half-tone).

Now we can see how the Indians got their 12 note system. Start at Do, go up seven notes, and add the black notes you passed on the way (I say seven because the eighth note is actually the first note at harmonic, and it is counted as the beginning of the next progression). The Indian scale is very neatly divided into half-steps all the way.

The comparisons between our system and others aren't always that easy. Take the Tropical African scale, for instance--it is set up such that the musicians must re-tune their instruments just to progress beyond the first harmonic, as well as to change key (speaking only of traditional music, of course. Highlife has European influence, and the current African rage of Afro-American funk is without a doubt an equal exception). This restriction is why traditional music sounds so much like chanting. It is the same restriction that manifested itself in early black American music like the basic four-bar blues, and to some extent in other black American music.

Well, now that we understand the basics of our system a little better, we can now come to bearings with other systems, which we will cover in later Pages as we go from area to area.

73 73's,

Diane

PUBLISHER'S PAGE

NASWA member Josephine Bryan, 6841 Herndon Place, Stockton, CA reports that none of the equipment stolen from her home has been located yet. The equipment includes a Kenwood Model R-300 receiver (Serial 520097), an FRG-7 receiver (Serial 6J060562), a Drake SPR-4 receiver (Serial 4248) and various other radios and TV's. Information regarding any of this equipment will be greatly appreciated. Please contact Mrs. Bryan.

HELPING HAND: For sale. SW-4A SWL receiver. \$230.00 with UPS shipping. SB-300 ham receiver. \$230.00 with UPS shipping. Rob Harrington, 3181 S. York Street, Englewood, CO 80110.

HELPING HAND: For sale. Barlow Wadley XCR-30 Mk 2 SN + 3363. Price \$220.00 plus shipping. S. Oura, 140 East 52nd Street, New York, NY 10022.

HELPING HAND: For sale. Realistic DX-160. One year old, excellent condition. In original box with speaker and manual. Price \$110.00 plus shipping. Contact William Van Stralen, 143 S. Hancock St., Apt. 2. Madison, WI 53703. Phone: (608) 255-6286.

HELPING HAND: For sale. SPR-4/FS-4 Receiver and Frequency Synthesizer. Rx modified to permit use of LSB filter in AM mode, allowing choice of 4.8 or 2.4 kHz bandwidth, a fast/slow/off 3 position AVC control, a Noise Blanker, and a fine-tune Notch Control. Has a buffer installed, with a jack for Torrestronic Digital Readout. FS-4 eliminates all crystals and permits full coverage of 150 kHz to 30 MHz. Sells new for \$999.00. Rx in excellent condition, FS-4 recently purchased and within warranty. Asking \$699.00 for both, including manuals and prepaid UPS. San Diego DXer's Club, 1826 Cypress Street, San Diego, CA 92154. Tel: (714) 429-9728.

HELPING HAND: Wanted. Hallicrafters Speaker R-42 or R-46B. Must be in excellent condition. Arden Evenson, 2803 W. Rockwell, Spokane, WA 99205.

HELPING HAND: Information wanted. Has anyone discovered a method of improving the audio of an SPR-4 Drake? San Diego DXer's Club, 1826 Cypress Street, San Diego, CA 92154.

HELPING HAND: For sale. Lafayette HA600A with speaker and manual. \$75.00 plus UPS. Contact: Troy Gower, 1250 South Street, Geneva, IL 60134.

HELPING HAND: For sale. Drake SPR-4 in mint condition with 23 crystals. Options include Noise Blanker, Crystal Calibrator, and RTMY Option. Fantastic receiver! Only \$595.00 postpaid or best reasonable offer. Contact: Steve Handler, 3330 Old Mill Road, Northbrook, IL 60062. Tel: (312) 498-1403 nights; (312) 433-2802 days.

HELPING HAND: For sale. DX-160 in immaculate condition with brand new Gilfer C-10 Calibrator. Receiver only 3 months old and calibrator used only twice. Original cartons and manuals for both. Price \$200.00, I'll pay postage. Contact: John Vogelmann, 143 Ashford Avenue, Tonawanda, NY 14150. Phone: (716) 833-5762.

HELPING HAND: For sale. Sony ICF 5900W with manual. Recently tested and serviced. Price \$100. Contact: William Quinn, 6810-14th Avenue, Brooklyn, NY 11219.

HELPING HAND: For sale. XCR-30 Mark 2. Very good condition. 2½ years old. Original carton and manual. Free shipping. Price \$200. Contact: Alan Plotnick, 77 Woodlawn Street. Hamden, CT 06517
