**A REMINDER:** Since we have a little space left this time, may we take this opportunity to ask renewing members to be sure to return the Post Card renewal notice which is sent about two months prior to a members expiration date.

This card immediately signals us that you are a current or recent member and tells us when your expiration occurs, so we are then able to process the renewal immediately and without question.

If the card is not enclosed, we have to search back through past months expirations until we can find the member's file card. If we have trouble in locating the card, the renewal processing is delayed until we eventually can find it. In the event you loose the card we send, then a mere mention of your expiration month will be as helpful. The number to the right of your name on the address label is the expiration month.

Both our Publisher and Business Manager will appreciate membership assistance in making our work a little easier.

### THE COVER

This month's cover is another nice design by SWC editor John Werkimer. Any member with an idea for a FRENDX cover is invited to submit it to NASWA Headquarters. If it's used, a suitable prize will be given. Designs should be the same size as the present cover without the FRENDX heading.

### NEW LOG REPORT "C" EDITOR

We're sorry about the missing LR-C column in last month's issue. It was mailed from Hawaii but never arrived. Since John T. Arthur will be permanently located in Hawaii, the column will be edited by Dave Walcutt, 211 West 56th, Apt. 36-F, New York, NY 10019. Dave is no stranger to FRENDX. He has done Log Report columns in the past and also served a term as Distributing Editor. Welcome back, Dave.

### STOLEN EQUIPMENT NOTICE

Mike Hardester reports that his home was burglarized while he was on emergency leave and the following equipment was stolen: Yaesu FRG-7, serial 6 M 082526; Kenwood R-1000, serial 0070145; Drake SPR-4, serial 1734; Bearcat 300 scanner, serial 31058; JCV Model 3060 TV/radio/cassette, serial 12362403; Sony reel-to-reel mono recorder Model TC-106A, serial 28883. IN addition to the serial numbers, John's Social Security number, 559 80 7072, is on some of the items. Should you learn the whereabouts of any of this equipment, please contact John at MWHS-2 Medical, (SC-16), NCAS Cherry Point, NC 28533. Thanks.

### ATTENTION SX-190 OWNERS

If you are interested in tuning out-of-band signals by the VFO Harmonic Technique as described in Procedure XV of Ed Shaw's SX-190 Manual for Technician Owners, send an SASE for a sheet of conversion scales to - Jeff Berryman, 42 Pondfield Road West, Bronxville, NY 10708

FOR SALE: BOONTON RADIO "Q" METER: Laboratory grade test instrument used for winding/measuring/testing the "Q" of antenna circuits, LF coils, toroids, pot cores, etc. Good shape, but needs new AC Line cord - \$90.00.

MECHANICAL FILTERS: Collins plug-in units for the 51J-4 receiver. Have one of each 6.0 kHz, 3.1 kHz, and 1.4 kHz bandwidths. New, boxed - \$70.00 each.

VACUUM TUBES: A pair (2) type 6082WA Voltage Regulators used in the Collins LF receiver R-389 URR and the Collins R-390. New, boxed, unused. Last distributor price was \$15.00 each, price here \$25.00 for the pair.

LITZ WIRE: Two, 5 3/4 pound spools; new, full spools, unwrapped manufacturer's seal. Litz wire is modern type with nylon covering and appears to be size equal to #24 wire. Estimated each 5 3/4 pound spool has between 1,200 to 1,500 feet of litz wire - \$40.00 each.

METER: Line Level Meter for Collins R-389 URR LF receiver or R-390, R-390A receiver - \$25.00.

TECH MANUAL: TM 0967-063-2010, Op/maintenance manual R-390/URR in binder with parts lists and circuit changes (original - not xerox copy - \$20.00.

MILITARY COAX CONNECTORS: Type UG-421 and UG-422. These are the almost impossible to find antenna connectors on the rear of the R-389, R-390 and R-390A receivers. Have three (3) mating pairs, new in sealed distributor packages. Distributor cost when can be located is \$13.00 for one and \$15.00 for the other. Sold here as a pair - \$25.00.

R-390A/URR RECEIVER PARTS: Have replacement/spare parts as briefly noted here - Audio subchassis, AC Line Filters, power supplies, BFO PTO, complete slug racks (with slugs - none broken), I-F transformers, BFO expansion coupler, front panels, meters, crystals, crystal oscillator plug-in, gears, oldham couplers and other miscellaneous parts too numerous to list here. Send SASE with inquiry for parts you require.

HAMMARLUND HQ-180 and HQ-180A PARTS: Hammarlund 24-hour telechron clock, new, boxed, unused. - \$30.00. Another Hammarlund 24-hour clock/timer, but this one is used - \$17.00. Hammarlund S-meter for either the model HQ-160, HQ-145 or HQ-180A, new, boxed, unused - \$40.00.

\*\*\* Please note, the prices noted above do not include UPS shipping; therefore, please remit extra for shipping charges. I would appreciate payment for all items via POSTAL MONEY ORDER. I can ship within 5 days of the receipt of your payment. Steve J. Bohac, P.O. Box 421, Fairview, NJ 07022.

**NO COLLECT CALLS ON THESE AOS, PLEASE**

**FOR SALE:** Wollensak Model 1220 Mono reel-to-reel recorder with 2 or 4 track capabilities. Great for off-radio taping. Very good shape and with free tapes. Price \$100.00 or best offer or trade for good cassette deck. **ALSO** two library bound volumes of Radio-Craft magazine for 1941 and 1942. **Mint** condition and packed with schematics. Each \$15.00 or both for \$25.00. **ALSO** KRS All-band active antenna, Radio West's dandy. Price \$40.00. All items UPS paid. Fritz Mellberg, 1505 Central, Hawarden, IA 51023. Phone (712) 552-2458 after 2300.

**FOR SALE:** Hallicrafters SX-110 general coverage receiver with external speaker. Very good condition. Price \$100.00 plus shipping. Kevin Atkins, 1617 1st Street, NW, Birmingham, AL 35215. Phone (205) 854-9750 from 0000 to 0300 GMT.

**FOR SALE:** Galaxy R530, SC-530 speaker with manuals, \$275.00. Gilfer A-20 Pre-selector, \$20.00. FRENEX - complete 1/77 to 12/81 and WRTH - 78 to 81. Best offers. Cashiers check or money order. All items plus shipping. Al Drehmann, 11714 S.W. 129 Ct., Miami, FL 33186. Phone (305) 385-3879.

**WANTED:** Service manuals and schematics for Tandy-Realistic DX-160 and DX-200 receivers. Will copy and return with postage costs or will pay for copying and postage. **FOR SALE:** Target sheets to help you plan your DXing. They are 8½ x 14 inches and have space for frequency, station and details and a time section divided into half-hour blocks. One hundred sheets for \$5.00 in North America or \$9.00 outside North America. Sample copy for 50¢ in North America only. Gilles Michaud, 152 Cousineau, Pont-Viau, Laval, Quebec, Canada H7G 3J6. Phone (514) 663-4784 after 2300 GMT weekdays.

**FOR SALE:** Mint Yaesu FRG-7 in original carton, \$195.00. Tentec Century-21 with manual, \$195.00. Norm Sinclair, 740 Sorrento Inlet, Nokomis, FL 33555. Phone (813) 966-6143.

**WANTED:** Cassette recordings of U.S. pirate English broadcasts. They should be of fair-to-good audio quality. wanted especially are WKKK, V. of Tomorrow, WRAM, KQSB, R. Confusion, R. Clandestine. I will supply cassettes or pay for them. Please contact William Mellon, P.O. Box 32, Fork Union, VA 23055.

**FOR SALE:** Panasonic RF-2200. Covers 3.5 to 28 MHz in five bands and has AM/FM. One year old and used less than two months. No scratches. Shipped with manual in original box. Price \$105.00, cashiers check or money order. I pay shipping. Kenny R. Johns, 50 Currie Avenue, Jackson, TN 38301. Phone (901) 423-2366 from 0100 to 0230 UTC.

**FOR SALE:** Yaesu FRG-7 with Gilfer fine-tuning modifications, Miramo frequency counter and Gilfer A-20 Preselector. All in good shape. Price \$250.00 including shipping. Al Sizer, 22 Country Way, North Haven, CT 06473. Phone (203) 239-2491 anytime before 0200.

**WANTED:** Information on getting or making a rack or case for an SP-600J. I'd appreciate any help on this. Thanks. Gerry Bishop, PSC Box 55574, Mather AFB, CA 95655.

**FOR SALE:** Realistic DX-160 with speaker. Excellent condition. I will prepay UPS. Price \$75.00. H.W. Bartsch, 47 Elm Street, Rutland, VT 05701.

**FOR SALE:** HQ-180C, \$200.00. R-388, \$250.00. HQ-140X, \$90.00. RF-2600, \$120.00 with SCA FM, 3.9 to 28 MHz SW and digital readout on all bands. All work well. George Sherman, Box 2284, Minneapolis, MN 55402. Phone (612) 588-2618 Monday to Friday from 1500 to 0300 GMT.

## EXOTIC-COUNTRY PIRACY IN THE BRITISH ISLES

BY JOHN CAMPBELL

The SW pirate scene has been quite lively in England for the last 11 years, but this is not news to FRENEX readers with long memories. Several of the best English stations, particularly European Music Radio, and one or two in the minor leagues, have been heard and verified by East Coast listeners during the transatlantic pirate seasons from mid-October to early March. Unlike the BEC on SW, though, pirates have represented all but one of the possible "countries" in the British Isles, and they continue to give SWLs the only chance of hearing the exotic ones via SWBC. Now that the winter season is near, it is worth summarizing what may be available to North American listeners in 1983-84.

The traditional pirate bands in Europe are 6195-6320 and 7290-7410; and the traditional broadcasting times fall between 0900 and 1300 on Sundays. 0900 sign-ons in the depths of winter have been heard in North America, but the best bets are earlier starts around 0800 or specially-arranged tests at various times between 0530 and 0800. Where possible, news of special tests will be spread through sources like FRENEX. Of course, anyone who wishes to do so is welcome to adopt any of the stations listed below, and conduct individual campaigns of persuasion. I hope that any successful outcomes in this direction will be reported to LN or Update in time for the greatest number of listeners to benefit. Most interested stations seem to understand publication delays now, but there will always be some which decided to make their broadcasts with next to no notice in advance.

ENGLISH pirate stations are currently going through a very quiet period. No doubt this will not worry any country-hunters who have already logged the BBC. Only one English station is known to be interested in broadcasting to North America this winter, but the general efficiency and enthusiasm of its operators deserves a response, even from people who have heard the BBC. This is Radio Apollo International, which has used 7330-7340 lately and which has the address P.O. Box 319, Edenbridge, Kent. It calls itself the DXers' station, and justifiably so.

Now to the exotic radio countries. In the British Isles, the only one which has never been on SW, to my knowledge, is the Isle of Man. Unfortunately no pirate DXpeditions are being planned; it's inhospitable in the winter, and the ferry-boats are uncomfortable in rough seas. Two more countries have been available in the past, but have no SW activity now: Northern Ireland and the Channel Islands (whose Radio Channel International on 6550 was heard in North America about 4 years ago).

That still leaves 3 countries. British free-radio honor is presently upheld best by SCOTLAND, which has no less than 4 active stations. Each of them should be on the air in winter, on one or two Sundays per month. The most interesting one is Radio Freedom, with address: Dept. R, 67 Elm Row, Edinburgh EH7 4A. It uses 6230, but has recently started parallel tests on 9420 with 150 watts which have been heard over long distances. 9420 should be a good choice for Sunday-morning propagation to North America in winter. Radio Stella is usually heard on the last Sunday of the month, on 7319 lately, and is not afraid to get out of bed early enough for regular 0800 starts in winter. Full address is RSI, 48 Pentland Park, Loanhead, Midlothian. Radio Lynda has been on 6260 lately, but plans parallel operation on 6230 and 7315. It isn't recommended to quote the station name in the address, which is P.O. Box 13, Falkirk. Falkirk, by the way, has always been a center of free radio, and in the past it has been the home of two of the four nationalist-flavored Radio Free Scotlands. Finally, there's Weekend Music Radio, 6240, which has had several transatlantic tests with some (though limited) success in previous winters. I hope that the operator can be talked into waking up early on at least one winter Sunday this season. WMR's address is 42 Arran Close, Cambridge, England. All four stations send out good enough signals to make it to North America unless the conditions are against them.

IRELAND should be putting up an especially good performance, probably its best ever, this winter. On recent occasions, the pirate bands have sounded like an Irish monopoly. Against the background of Irish government threats to put both commercial and hobby pirates out of business, this is extremely good news. Here's a summary of what is available at present:

**6218** Premier Radio, has supposedly closed, but was back once recently. Address: 139 Ballyfermot Road, Dublin 10.

**6243** South Dublin Radio, presently lying low for complicated reasons, but no cause for believing that it won't be back. Uses 6195 occasionally to carry other stations' programs. Address: North Street, Swords, Co. Dublin.

**6268** Capital Radio, recently revived. Swords address.

**6276** Radio Mi Amigo, formerly 6928-1/2; likes relaying MW commercial pirates like Radio Nova and Radio Sunshine. Swords address.

**6280** Westside Radio, an old favorite, very regular, with chief operator Prince Terry. Address: 53 Charleston Road, Dublin 6.

**6293** Radio Ireland International, new since last winter. Excellent signals. Address: 103B Barrow Road, Dublin Industrial Estate, Glasnevin, Dublin 11.

**6317** Radio Enterprise, also new and with excellent signals. Address: P.O. Box 1190, Dublin 10.

**6350** Radio Emerald International, new, and the nearest thing to Irish "rare DX" because of weak signals. Address: 39 Brian Road, Marino, Dublin 3.

**6910** Radio Dublin, regular from 0800 or earlier at weekends and sometimes on other days too. Since it can be heard in Australia, you ought to have heard it already! Probably about 200 watts. Address: 58 Inchicore Road, Dublin 8.

THE VOICE OF IRELAND ON SHORT WAVE

## EXOTIC-COUNTRY PIRACY IN THE BRITISH ISLES (cont'd)

Finally, the real novelty: WALES, Voice of the Leek, 6265-1/2, is the only all-welsh SW station so far, and it issues QSLs entirely in Welsh. Anyone with a name like Jones is excused from sending return postage. It aims to have only 2 (maybe 3?) broadcasts annually, but negotiations have been conducted to turn one of these into a winter test for North America. The station normally makes its plans well in advance. Technical quality of this operation is high, and the will to be heard in the land of the descendants of Prince Madoc is equally high. (Who he? Well, read "Madoc" by Gwyn Williams, especially if you live in North Dakota). Forwarding address is P.O. Box 319, Edenbridge, Kent, U.K. (not England, if you please).

2 IRCs will cover return postage for any of the stations that I have mentioned. Good DX! And let's have a few North American stations giving us European listeners something to hunt for in winter too.

---

(Editor's note: Nice work, John, and thanks! We'll miss your "Unofficial Radio" column in "Shortwave News" (the monthly bulletin of the Danish Shortwave Clubs International). If West Coast DXers think the above borders on teasing, keep in mind that Indos are far and few between in these parts. So, it's revenge of sorts, eh?-JH)

---

## The Tandberg 1521: A Modern Dinosaur

by Jerry Berg - 38 Eastern Avenue - Lexington, MA 02173

Recently I found myself in the market for a new open reel recorder, my inexpensive 13-year old machine having been teetering on its last legs for some time. A tape recorder is an important part of my listening equipment. It serves three main purposes. First, if I am on to a weak signal and I cannot identify it "off the air", I can replay the ID until I can, hopefully, piece it together. (I have often been surprised how, after a few days go by, you can pick things out of an ID tape that you missed the first time around.) Second, I keep a tape library of all my Latin American DX, and some non-LA DX as well. Third, I sometimes send taped reports to stations. Except for casual listening or informal band scanning, my recorder is running almost all the time I am listening.

I have, for several reasons, always been partial to open reel recording, as opposed to cassettes, for recording from a receiver. The main advantage to me is that open reel facilitates the physical editing out of a segment of a longer recording. This is the technique I have used for my ID collection, snipping out the desired segment and splicing it onto a master tape containing recordings from that particular country. This is virtually impossible to do with cassettes. Open reel recording also permits longer running time. I generally use a 3600 foot reel of .5 mil tape which, at a speed of 7.5 inches per second, provides 96 minutes of recording time without the necessity of rewinding or turning the tape over. Finally, I still believe that on all but the most expensive recorders (where cassettes will perform nearly as well as open reel), open reel recording provides better fidelity.

With a large collection of open reel recordings made in a half-track mono format (a few going back as far as 25 years), I wanted a recorder that would play these tapes with full fidelity and without the problems of track incompatibility sometimes encountered with quarter-track units found on today's stereo market. I was looking for a reliable, straightforward, half-track mono machine that would produce high quality recordings from shortwave, and nothing more. I was not interested in using the unit for stereo purposes, and thus I had little use for a quarter-track stereo format. Moreover, I did not want the bother of a separate amplifier and speaker if I could avoid it, and so I was hoping to find a completely self-contained recorder-player, not just a "deck" that required connection to other components.

If you have been out of the open reel tape recorder market for a long time, as I was, you are in for some surprises. With few exceptions, open reel machines have become basically semi-professional pieces of equipment. They are designed for the really serious recordist, and consequently they are very expensive. The sky is the limit as to price, with most units being \$1,000 or more. With few exceptions they are decks, intended for use with stereo components.

While I was willing to make a substantial investment for a suitable unit, I still wanted to minimize cost as much as possible. After much inquiry I finally found a unit which met my needs. It is the Tandberg Model 1521, and I report on it below for the benefit of others who may be similarly situated.

If you owned an open reel recorder prior to the advent of stereo recording and cassette machines, you will feel right at home with the 1521. It is a completely self-contained unit, including a ten-watt amplifier and a speaker. It is of manageable size, measuring 15-3/8" wide by 13-1/8" deep by 6-3/4" high. It comes with a snap-on clear plastic dust cover that covers the entire face of the machine. Unfortunately, it is designed for horizontal rather than vertical use, and this presented a problem because, placed in a horizontal position on a desk, the counter and the VU meter are not easily visible. For this reason, and for general ease of use, I constructed a simple wooden stand that holds the unit at about a 45° angle and places the face of the unit and all controls in a convenient operating position.

On examining the unit I was disappointed that, in a design change, Tandberg has replaced the advertised teak cabinet, with handle, with a black, plastic-like case without handle. (The 1521 can also be purchased in a special carrying case configuration.) I am informed that similar substitutions have been made on other Tandberg units lately, apparently as a cost cutting measure. It is the only compromise with quality that is apparent, however. The 1521 is well constructed, with the top panel and most of the controls made of metal rather than plastic. The unit weighs 22 pounds.

Tandberg is an old and well known Norwegian company specializing in the audio-visual, educational and professional markets rather than the home stereo market. Tandberg equipment is particularly popular in language labs, where ruggedness and reliability in hard, daily use is required. The 1521 is designed strictly for mono applications, such as recording from a radio, recording lectures or discussions, making master recordings of educational programs, etc.

The unit accommodates up to 7" reels and operates at three speeds: 1-7/8, 3-3/4 and 7-1/2 i.p.s. I use the 7-1/2 i.p.s. position, where the frequency response is 40 to 18,000 Hz  $\pm$  2 db. The frequency response at 3-3/4 i.p.s. is 40 to 13,000 Hz, and at 1-7/8 i.p.s. it is 40 to 7,000 Hz, although the differences seem hardly noticeable to the ear. Using a 3600 foot reel of .5 mil tape, the unit records for 96 minutes at 7-1/2, 192 minutes at 3-3/4 or 384 minutes at 1-7/8, without turning the tape over. There is a four-digit illuminated counter that permits accurate location of recorded material. A push button resets the counter. The VU meter is easily visible when the unit is in a slanted position. It is calibrated in black from -20 to 0 db, and in red from 0 to +6 db, and is illuminated when the unit is in the record mode. The speaker measures 3" x 5-1/2" and produces excellent audio. The unit contains 20 transistors. There are separate bass and treble controls for playback, and they are quite responsive. There is an output volume control, of course, which controls playback volume. A slide switch on the front panel permits selection of the internal speaker, an external speaker or both together. There are two separate (concentric) recording level controls, one for the microphone input level and the other for other input levels (see below). Thus, a microphone and another signal source, such as a receiver, can be connected at the same time and the recording level of each can be separately controlled and mixed together. The heads and related mechanisms are under two metal covers held on by three screws which are easily removable without tools. Threading is accomplished simply by dropping the tape into a single slot and feeding it onto the take up reel. The tape reels are held firmly in place by reel locks (not rubber stoppers).

The microphone input is a regular phone jack and is located on the front panel. All other inputs and outputs are located on the rear panel. Rear panel sockets are as follows: a DIN input for a ceramic cartridge; a phono input for a ceramic cartridge; a DIN socket for simultaneous or separate input from a receiver or amplifier and output (unamplified) to a receiver or amplifier; a phono input for a receiver or amplifier (which I use for recording from a receiver); a phono output for playback through an external amplifier; a phone jack for output to a 4 ohm external speaker; and a second external speaker jack (the design of which is unfamiliar to me). As noted above, a

front panel switch permits choice of internal or external speaker, or both, and so connection of an external speaker to the rear panel speaker jack does not automatically cut out the internal speaker.

The tape transport is controlled mechanically rather than by solenoids, and utilizes the reliable, four-position "joystick" tape motion lever that has been used for years by Tandberg. With the joystick in the three o'clock position, the unit goes into fast forward; at nine o'clock it rewinds. The tape is moved very rapidly in the rewind and fast forward positions. There is an automatic end-stop when rewind is complete. In the six o'clock position, the unit shifts to play. If the tape motion lever is placed in the six o'clock position and a separate lever, the function selector, is moved at the same time from its center "playback" position to its "down" or "record" position, the unit goes into record and the VU meter is activated and lights up. In the twelve o'clock position, both reels are released and can be moved freely by hand. This is convenient for threading the tape onto the take up reel, splicing, or otherwise manipulating the tape.

When the unit is in the record mode, the amplifier is also activated. Thus, by turning up the output volume control the recorded material is amplified as it is recorded. If—as is usually the case when recording from a receiver—you do not want the material amplified while recording, you turn the output volume control to its "0" position. The unit has a useful feature in that, by placing the function selector switch in the "up" or "amplifier" position, when the recorder is not recording or playing back, the unit can be used as an amplifier only, with the recorder output volume, bass and treble controls being operative. This is a useful feature if your receiver audio is not very good and if an unamplified receiver signal is available.

The 1521 also has a pause control which can be used in the record or playback modes, and which can be left in the pause position without the need to hold the control in place.

The recorder has an attractive, professional appearance. It is all black, with panel lettering in white (in both English and French). The instructions are good, although few instructions are needed to operate the machine. True to the unit's European origins, the instructions are printed in English, French, Spanish, Norwegian, Swedish and Finnish.

It is worth noting that Tandberg equipment has been on the market for many years and is easily serviced. Of special importance in these days of foreign imports, Tandberg has a reputation for long term parts availability, as befits the long life expectancy of its products. Thus, there will be few difficulties in obtaining replacement parts for many years to come.

While not priced in the same category as professional quality open reel stereo decks, the 1521 is far from inexpensive. I was quoted a list price of \$715 by two dealers, though more recently the list price has been shown as \$745 in the manufacturer's literature. I was able to purchase the unit for \$650. You may be able to do better if you find the right dealer, but the potential savings are probably not very great because the unit is rarely found "on the shelf" and must be special ordered. It is readily available, however; the dealer obtained mine in a week from Tandberg's American headquarters in New York.

The unit is also available in quarter-track mono format. In that format there is a separate track selector that permits you to record or play back on track 1 (track 4 with tape side 2 up) or track 3 (track 2 with tape side 2 up), or to simultaneously play back tracks 1 and 3 together (tracks 2 and 4 together with tape side 2 up). The quarter track mono unit, Model 1541, lists for \$835.

If you are considering buying a recorder for occasional use, or to record relatively good quality shortwave signals for program listening purposes, a much less expensive cassette recorder will do the job just as well. You should probably consider something like the 1521 only if you physically manipulate the tape a great deal, as I do, or if you like long tape running time, or if you are just partial to open reel recording. (I still use a cassette recorder for preparing taped reports; I record from the open reel "master" onto a cassette, which I then send to the station.) In any event, if you decide to go open reel, and you have no use for stereo, keep the Tandberg 1521 in mind as a reliable, well constructed unit offering high quality audio.

# Loudenboomer

## The Charlie Loudenboomer Report

### THE CHARLIE LOUDENBOOMER REPORT

Something had happened. I was perplexed and disturbed. For years I had enjoyed a fabulous return rate on my reception reports to rare stations. In fact, a hand-lettered poster reading, "99 and 44/100ths percent pure" hung in a prominent place near my receiver, a gift from one of CL's admiring fans. It alluded to the fact that nearly every one of my reception reports was promptly rewarded with a QSL.

When nobody but nobody was getting a verification from Tibet, I received a three-page confirmation letter. I had garnered QSLs from the likes of Zanzibar, Maldives and Tristan da Cunha. There were, in my files, hundreds of veries from obscure Latin American stations, including a prized verie note from Radio Neyba's Sr. F. Navidad.

But something had happened! I had been accustomed to receiving at least a dozen rare QSLs a day. One day, however, the mailbox was empty. Surely a postal holiday, I thought. But a quick check of the calendar showed that the only festive occasion on that date was the anniversary of Henry the VIII's third marriage.

When the mailbox remained empty the next day, and the next, I really became worried. After two weeks without mail, panic set in.

I studied carbons of my recent reports. I quickly concluded that the problem had to be elsewhere. Those reports were no different from earlier ones that had brought prompt replies. They were indeed up to the usual high Loudenboomer standards of reportage. Suspecting that the answer lay with postal deliveries, I checked with my postmaster.

"My mail is being misdelivered or lost," I wailed to that official.

"Nonsense, utter nonsense," he replied scornfully. "The USPS is the finest in the world. We are never stayed from our appointed rounds by snow, sleet or gloom of night....and we never make mistakes."

But after my tears of anguish had begun to dilute the magenta ink of his stamp pad, he took pity and suggested that I contact the chief postal inspector.

I was ushered into the office of Chief Postal Inspector Oscar Blunt. The federal agent was the very picture of a chief postal inspector, brisk, no nonsense, efficient. He fixed me with his steely eyes.

"So you're not getting any QSLs eh? Well you've brought your problem to the right man. I'll look into it and you'll be hearing from me."

I went home relieved, and waited. Several weeks passed without mail. Then one morning, my gloomy mood was broken by the doorbell ringing. At the door stood someone I at first took for a complete stranger, until I realized it was my mailman. He handed me two objects, a long overdue club bulletin and an official-looking letter. I ripped open the latter and found it was a letter from Chief Inspector Blunt:

"Be advised that your complaint has been personally investigated and found to be unwarranted. I can only suggest that your lack of QSL replies is due to erroneous reports:

Signed: O. Blunt, Chief Postal Inspector"

I was crushed. In a daze, I opened the other bit of mail, the months-old DX bulletin. Then something caught my eye. It was a page one announcement by the editor:

"The 1982 award for Man of the Year goes to Oscar M. Blunt, a newcomer to the DX hobby. He is honored for his remarkable achievements, which resulted in verifications from 215 different countries in the space of just three months time. Congratulations, Oscar! Please tell us the secret of your tremendous success!:"

## RADIO NACIONAL

ONDAS CURTAS: PRL-7 - PRL-8 - PRL-9 - ONDAS LONGAS: PRE-8

PRACA MAUA, 7 — ED. DE A NOITE — 21.º e 22.º

RIO DE JANEIRO — BRASIL

CENSURA  
P 4L  
D. F. 11

I spotted this cover awhile ago in a large box of envelopes at a stamp show. It was dated "April 11, 1944" but what on earth was "Radio Nacional" and who would recall such a station? You're right: Don Jensen fills in the blanks:

"I recall the old Radio Nacional quite well. It was my (and I suppose most of my contemporaries') first Brazilian QSL, maybe 30 years ago. A quick bit of research here indicates that PRL7 was on 9720 kHz; PRL8 on 11720 kHz and PRL9 on 17850 kHz, each with 50 kw. One of the few major stations in South America back then."

The following article appeared in the August 18, 1983 issue of Rolling Stone magazine:

# Voice of America: rock & roll with Uncle Sam

BY CHRISTOPHER CONNELLY  
Washington D.C.

Remember the radio stations you grew up listening to? Those "progressive" FM stations where the disc jockeys all programmed their own music without relying on format consultants or chart positions or advertisers to tell them what to play? Where soul music and rock & roll could be played back to back, and where the deejays' wild, idiosyncratic tastes profoundly influenced your own? Well, one of those stations still exists in Washington D.C. It has an audience estimated in the tens of millions. Its deejays have total job security.

And, as was the case with some of those stations you remember, the people who manage this station can't tell MOTOHEAD from Barry Manilow: They're part of the U.S. government, and you won't hear their station in America.

The station (more like a network, really) is the Voice of America, a red, white and blue broadcast operation that each week beams out 960 hours of programming in forty-two languages to the U.S.S.R., China, Asia, Africa and South America. (It is not affiliated with Radio Free Europe.) The service was founded in 1942 to provide war news, and under the terms of its 1976 charter, its primary purpose is to "serve as a consistently reliable and authoritative source of news."

News is clearly the priority of the VOA's new director, Kenneth

Tomlinson, who was formerly an editor at *Reader's Digest*. Though the Reagan administration's policies are technically supposed to be directly advocated only in VOA editorials, some have sensed a strong anti-Soviet slant in the service's reports about Central America. Small wonder, then, that even in these budget-tight times, the VOA recently had its annual budget increased by thirty percent, to \$141 million.

The bulk of VOA programming originates from its Washington D.C. complex, where twenty-six studios, a master control board that appears to dare from the early Fifties and most of the agency's 1500 stateside workers are based. By and large, programs are recorded on tape here and sent to the VOA's thirty-one domestic transmitters, which in turn send out

shortwave signals to seventy-four foreign-based units. A trip through the VOA's musty broadcast center reveals members of myriad ethnic groups at work, reading the news or conducting panel discussions in everything from Uzbek to Azerbaijani.

But the VOA is also charged to "represent America...and...present a balanced and comprehensive projection of American thought and institutions." Or, as disc jockey James "Russ" Woodgates puts it, "When you think of America, you think of rock & roll." Music may make up little more than an hour of a typical service's eight-hour broadcast day, but with respect for U.S. foreign policy at a post-Vietnam ebh and American culture still ascendant, it's not hard to imagine why an estimated 80 million to 100 million people tune [Cont.]

# VOA

[Cont.] in: for the music.

From the music standpoint, the VOA seems considerably freer than the stations of the country it represents. "We have no music director or program director standing there, saying, 'This is your playlist,'" says Judith Massa, music editor of VOA's feature (news) division. "Anyone can go to the music library, pick out a record and play it on the air. There is no one to say no." Try that at an album-oriented radio station.

Nobody takes bigger advantage of that freedom than the balding, cherubic Woodgates, a thirty-one-year-old whom VOA hired fresh out of Northwestern journalism school. Woodgates is the host of *New Music, U.S.A.* ("Uh, the title wasn't my idea"), an "academic but hip" half-hour of rock and soul that airs three times a week throughout the VOA network — one of the very few programs to be broadcast so widely. "I'm the Casey Kasem of the third world," he jests.

Unlike the Kasems of the world, Woodgates can and does play anything his heart desires. His playlists are an eclectic, almost bizarre mishmash of styles. Joan Armatrading, Art in America, Walter Egan and an all-but-unknown Christian New Wave band from Sacramento called the *Seventy-Sevens* all receive airplay along with the more traditional AOR staples. And unlike many other VOA programs, Woodgates' show is broadcast in English, which he says can be grasped by the majority of his listeners. "There's always a creative tension on how much to spoon-feed them," he says while at work in his closet-size office, stuffed with the promotional detritus of rock & roll. "But they have high IQs and are tremendously inquisitive."

Not that Woodgates shrinks from a little upbeat propaganda. Though his "star profiles" occa-

sionally tackle some meaty issues (the hrouhaha over backward masking, or hidden messages, on albums, for example), they usually emphasize success stories of young Americans who made it big on hard work and talent. Woodgates speaks slowly and overarticulates for his foreign audiences, and the effect is slightly maddening, like Dick Clark on *Thorazine*: "Bob Seger... a working-class... troubadour... whose songs of love and aspiration... have made him a hero... to young Americans." Of course, as Woodgates puckishly points out, "There's no tune-out factor on shortwave."

Woodgates may be the system's only jock heard throughout the world, but many of the individual language services have their own music programs. Ukrainian émigré Peter Fedynsky's program features everything from heavy metal to Abba ("What I do is stab around in the dark," he admits), and he will go to almost any length to find a Ukrainian hook. Fedynsky therefore plays many cuts by the Romantics, a group that includes a Ukrainian member, and he likes to play anything recorded live at the Fillmore East, since that legendary New York venue was across the street from a Ukrainian meeting hall.

Since nobody really knows how many people listen to the VOA ("We base it on exit polls," says Tomlinson with a laugh), letters provide the only communication between the VOA and its listeners. Woodgates says most of his correspondence comes from India; Fedynsky never hears from his audience at all. Togo-born Roger-Guy Folly gets a thousand letters a month and uses them to program his by-request-only show for the West African (French) branch. He'll play anything from Willie Nelson to King Sunny Adé. "Music makes a lot of friends for America," says Folly. "It serves as bait to keep people listening for the news."

But the position of music on the VOA can be pretty precarious.

Russ Woodgates, the Casey Kasem of the third world

Music programming to Poland, for example, was cut back when the VOA signal started getting jammed after the Gdansk shipyard uprising. "Music isn't seen in a positive enough light by management," says Massa. "It really deserves a higher priority rating."

"It's such a carrot," says Woodgates. "I have discussions with [the powers that be] once a month about its value. It's a great way to get an audience." Tomlinson, a self-described bluegrass buff, acknowledges that cutting back music is "a judgment call" but feels strongly that news must be at the forefront at all times.

The average radio station has meetings almost daily on what songs can and cannot be played; after the one such meeting the VOA had this year, a transcript of it wound up in the *New York Times*.

The problems started in February; when program director Frank Scott sent around a memo that asked programmers not to air "music lyrics which may be offensive to any segment of our audience." The tone of the directive recalled Spiro Agnew's rant against drug lyrics, and the upshot was a stormy, hilarious meeting between Scott and some forty air personalities and staff members. In the course of the meeting, Scott banned the playing of Marvin Gaye's "Sexual Healing" and nearly banned "Ebony and Ivory" from any use in South Africa—until he learned that "Ebony and Ivory" was South Africa's Number One song.

Says one programmer recalling the meeting, "Scott said, 'I don't want the Voice of America to get in bed with the devil.' And a colleague said, 'If the U.S. is in bed with the devil, we can't pretend that's not happening.'" And while Woodgates acknowledges that he's had no problems playing what he wants, he wonders what will happen if a song about, say, El Salvador should become popular.

The stakes are high because the VOA's programming really does have an effect. Programmers say that the VOA's playing of a record

has a significant effect on a song's commercial success in free-market countries. "When you talk about somebody doing well overseas, you can trace it back to when VOA started playing the record," says Massa.

Even more impressive is the case of Willis Conover, a craggy-faced, rumble-toned VOA vet whose jazz programs single-handedly created the development of that music inside the Eastern bloc and the Soviet Union. "When I go overseas, I get more attention than I need," he says. "On my first trip to Poland, in 1959, I was met at the airport with cameras, tape recorders, flowers, hundreds of people behind barricades and a thirty-piece band. And there were two concerts given in my honor by people from all over Poland to demonstrate. I was told, what they had learned from my programs." That scene repeats itself whenever Conover travels there.

Even with that kind of influence, VOA programmers have trouble getting rock & roll artists or their record labels to cooperate with interviews and other things. "I always try to convince them that the whole world is listening," says a frustrated Massa, who once followed Charlie Daniels into a men's room to get an interview. "I never ask them personal questions. I just want to talk about their music."

Nevertheless, the mood among VOA music programmers is upbeat. Massa is especially pleased that the service has finally begun an American Top Ten show; she attributes the delay in the show's approval to the let's-kill-the-El Salvador-government syndrome. Though such fears on the part of the Reaganites don't figure to abate, it seems likely that the music shows on the VOA will continue to reflect what many people wish American radio were like.

"I feel Messianic about the VOA," says Massa. "And especially about the music."

"Sure, it's propaganda," chuckles Woodgates, who calls the VOA a PR agency. "But it's good propaganda." □

Judith Massa: "Music should be a higher priority."

Editor: James G. Herkimer, 3255 South Drive, Caledonia, NY 14423

This month we have a preview of the new Radio Shack DX-400 direct entry PLL communications receiver sent to us by Dr. Scott Davenport of Tuscaloosa, AL. Scott heard Harold Sellers' ANARC Equipment Report over RCI in June, mentioning the forthcoming DX-400, and promptly called Tandy Corporation's Ft. Worth National Advertising Dept. We therefore have an advance catalog description of this new receiver and a photograph as well. Many thanks, Scott!

Similar to the format used by the SONY 2001 and 2002 receivers, the DX-400 has direct-entry pushbutton tuning and auto-scan, 6 AM and 6 FM memory presets, lighted LCD frequency display, and a signal strength meter. A choice of wide/narrow selectivity is provided plus fine-tuning. Also included are an antenna trimmer and a 3-step RF gain control. A sleep switch provides automatic shutoff, adjusted from 10-90 minutes. Antennas provided are a telescoping whip and a BCB loopstick. A built-in speaker is included plus jacks for external speaker, external antenna and headphones. The price is \$299.95 and the catalog number is 20-207.

Specifications: Frequency coverage is 150 kHz - 30 MHz, plus FM. Sensitivity is given as: AM (except BCB and longwave) 1  $\mu$ V for 10 dB S/N ratio; SSB 0.5  $\mu$ V for 10 dB S/N ratio; Longwave 5  $\mu$ V and BCB 300  $\mu$ V. Selectivity is given as: +3 kHz at 6 dB, and +6 kHz at 50 dB in the wide position, while narrow provides: +2.5 kHz at 6 dB, and +5 kHz at 50 dB. Power requirements are six C batteries for the radio, plus 2 AA's for the memory backup. It appears that a 120V AC supply is built-in. Dimensions are 6" X 12 5/8" X 3 1/2", but the weight is not given.

No definite word on when this new receiver will be available, so keep an eye on your local Radio Shack. Also included on the same catalog page (79) is the new DX-360, and at \$99.95 it appears to be their latest entry for the beginning DXer/SWL. It covers AM, FM, plus shortwave in the following bands: 4.5-5.5 MHz, 5.9-7.5 MHz, 8.2-10 MHz, 11.4-14 MHz, 14.6-18.2 MHz and 21-25 MHz, plus Longwave 150-260 kHz. Dimensions are 4 1/2" X 10 1/4" X 1 3/4". It is powered by 4 AA batteries. Radio Shack is a division of Tandy Corporation.

Price \$34.95 + \$4.00 S&H

Our hard-working publisher, Bill Oliver, sends us information on the new MFJ-103 24/12 hour digital clock. It features "pleasant blue" 0.6 inch fluorescent digits and a battery backup to keep the time on during power outages. It requires a single 9-volt battery, which is not included. It has an ID timer that alerts you every 9 minutes after you tap the ID/snooze button, intended for the ham operator. It has a switchable seconds readout, and can be synchronized with WWV. It measures 5" X 2" X 3" and operates on 110V AC. It is available from MFJ Enterprises, Inc., P.O. Box 494, Mississippi State, MS 39762.

Recently I obtained a copy of the Radio Society of Great Britain (RSGB) Radio Communication Handbook, 5th Edition. This 778 page paperback, like the ARRL Handbook, is intended as an all purpose reference for the radio amateur operator. Of interest to us, however, are the rather extensive chapters on receivers, propagation and antennas. The receiver chapter covers the complete development of the superhetrodyne, with detailed analysis of common design trends during their respective eras. Unlike most contemporary references, this one has a number of vacuum tube circuits which helps in understanding the evolution of receiver technology. Also included are a number of current design trends, among them PLL circuitry, and the now popular up-conversion technique. The propagation chapter is equally impressive, with detailed explanations of the various mechanisms which provide unusual reception conditions. The antenna chapter covers a number of wire antennas, including several designs which provide a substantial gain over the usual types we are most familiar with. This book is available for \$22 postpaid from the American Radio Relay League, 225 Main St., Newington, CT 06111.

1280 AIDA DRIVE  
REYNOLDSBURG, OHIO  
(Columbus) 43068

John and I recently spent a weekend visiting friends in the Columbus, Ohio area and we couldn't resist a side trip to Universal Amateur Radio, Inc. in nearby Reynoldsburg. We were given the red carpet treatment by Fred Osterman, head of the SWL Department which consisted of a tour of their facilities and a demonstration of various equipment. On display were Japan Radio Corporation (JRC) NRD-515, plus the commercial model NRD-92 and NRD-93, the ICOM IC-R70, and Kenwood R-2000. The Kenwood is apparently the house specialty as several modifications are available. These include various filter options for improved selectivity and installation of receiver incremental tuning (RIT) which provides fine-tuning for the non-voice modes. Also on display were the Info-Tech M600A and M200 RTTY converters. The M-600A provided Fred an opportunity to show his expertise in this phase of the hobby, as he patiently explained the flexibility of this versatile unit and proceeded to log several different types of stations (various non-broadcast radio services) for us. Also in stock are a number of useful accessories and a very wide selection of reference books. The list of items they have available is rather extensive, so write to Universal Amateur Radio, Inc., 1280 Aida Drive, Reynoldsburg, Ohio 43068 for their lists. Many thanks to Fred Osterman and the crew for a very enjoyable visit.

Some folks have inquired as to why I did not use a resistor on my terminated longwire experiment as described last month. Side rejection is accomplished in Beverage wave antennas by the very long length of wire employed; a resistor is used to suppress the backwave, or signals off the back of the antenna. With the relatively shorter length of wire used in most longwire installations, it appears that side rejection is accomplished via the grounded termination previously described. Consequently, we are looking at a much different circumstance. The 120 ft. terminated wire oriented at 160 degrees shows a rather pronounced lobe to the south and a somewhat lesser lobe off the back (north). Due to the numerous arrival angles by which a shortwave propagated signal is received, total side rejection is not possible with this relatively shorter wire. Comparisons made on 60 meters with co-channel African/Latin stations do show a definite preference for the Latins, however. The other longwire (unterminated) has been reoriented to 40 degrees and is now terminated via an earth ground. Hopefully, next time we'll have the results of our comparisons with the two terminated antennas.

That wraps it up for this month,

*Jim*

# Publicizing Shortwave Radio Listening

by George J. Popplin

It has been a few years since I built my first crystal set and one-tube radio receiver to my present FRG-7 with digital readout. I have listened to and verified radio stations in many parts of the world, corresponded with radio enthusiasts from Mauritius to Oswatomee, Kansas, have had representatives from several international broadcasters at my wife Dottie's dinners, met a lot of real shortwave radio buddies and have learned a great deal about people in all parts of the world. This has been a most rewarding experience...thanks to shortwave radio. Now I am doing my bit to let other people know about our fascinating hobby....informing them that SW radio is not mysterious..that it can and is being heard right in their own area and at any hour of the day. Please allow me to share some of my experiences in promoting SW radio with you.

In 1981 my paper proposing that ANARC undertake a comprehensive analysis of the actual and potential North American shortwave listening audience was read to the ANARC Business Meeting of the convention at Thunder Bay. The proposal was adopted by ANARC. I suggested that Dr. Kim Andrew Elliott coordinate the project since he has produced such excellent information as a result of his surveys and studies. More on this study will be provided later on.

My shortwave radio promotional projects on the local level have produced very encouraging results. It is amazing what can be done in this direction if one is enthusiastic about our hobby. One need not have the missionary zeal to get the word across to the public but a little bit of that zeal, or one might call it an interest in ecumenism, will help you in your endeavors. Due to the brevity of this seminar I cannot go into a lot of detail but I will be happy to share those details with any of my colleagues.

Having been in communication with several international shortwave radio broadcasters from Beijing to Kampala since 1975 I learned that their volume of listeners increased a bit since I started to send out press releases pertaining to their programs and schedules to the local newspapers and ESPECIALLY TO THE ETHNIC NEWSPAPERS!! Thanks to Larry Magne who taught me how to prepare a proper press release.

I learned that it helped a great deal to personally deliver the press release to the editor of the newspaper. That personal touch helped! Many editors didn't realize that SW radio programs were beamed from that language nation during prime listening hours AND THAT THEY COULD BE HEARD!!! They published the press release with my name and telephone number. Thus the potential listener could contact me and I would provide information about the purchase of SW radios and how to properly install an indoor as well as an outdoor antenna. I would mail the new listener information pertaining to radio signal propagation, noise, interference, how to convert GMT to local time besides the station frequency schedules and programs. I make follow-up telephone calls to the new listeners to determine how they are getting along and to answer questions regarding SW radio which may be puzzling them. I encourage the new listener to telephone or to write to me if any questions arise regarding SW reception, etc..

The newspaper editors were put at ease once I told them that I wasn't in the hobby to sell radios. The reader response has been very encouraging. One Greek-Orthodox church bulletin published the entire press release in their parish bulletin and this increased the responses from readers of Greek-American language newspapers. I have invited some interested radio listeners to my QTH to get a first hand listen to a broadcast from the nation of their heritage. That really clinched their listenership and away they went to buy a radio set!!

Occasion has presented itself for me to tape news from Israel Radio so that Carol Eisenberger, who produces a Sunday night program on KQED-FM, is able to present listeners to her program with the latest news pertaining to that nation. She always gives credit to Israel Radio for the news. I lent my old SONY SW radio receiver to one ethnic agency to assist them in getting the latest overseas news for their telephone HOTLINE call-in service. I have attended newspaper seminars and conventions to spread the word about SW radio, got in touch with the various Consu-

sent latest SW frequencies and newsworthy items to SW and DX publications. Hausey, NASWA and Danish Shortwave Clubs International have been of great help and cooperative in publicizing various SW radio stations' information. Interesting to "gossip-type" columnists have yielded excellent results. Such as my items in the San Francisco Chronicle and Jack Rosenbaum of the SF Progress (a left type newspaper distributed without cost to every household twice per week) during the visit of the Consul-General of the People's Republic of China to our '83 Day Rose Show...or the establishment of a rose culture exchange between our Society and the Beijing and Shanghai Rose Societies. (The EAST-WEST Chinese Newspaper did a whole series on this exchange and gave frequent mention of Beijing). Our Mayor Dianne Feinstein is supporting our Sister-City Shanghai-San Francisco Rose Society relationship. All of this thanks to Mr. Ma Ruihu and the Department of Radio Beijing. These plugs included a little bit about SW radio programs and frequencies of the nation involved at the particular mention. Then I did an excellent program on bird protection in Beijing, got a copy of the script and sent it to the local Audubon Society as well as EAST-WEST Chinese Pacific Weekly news...each had a mention of Radio Beijing. On and on... I have heard from California professors, a nuclear physicist and many good people who wanted to know.. "how do I catch Radio Australia, RAI-Italian Radio, Israel Radio, Voice of Greece, South Africa, RSA?"..or.. "Can I really hear Radio Beijing in Cantonese and Standard Chinese as in the English language?" Yes, our friends in Kampala...Radio Uganda...are well known in this area even though they have infrequent SW radio broadcasts.

After my success in promoting SW radio listenership on the local level the thought persists: If I can accomplish something towards promoting SW radio on a one-man nickel and dime operation, how much more will be accomplished as soon as one of the SW radio broadcasters and more of the manufacturers of SW radio equipment start an immediate in-depth campaign to advertise the SW programs.

When doing so many more people "out there" will become aware that SW radio programs do exist and that those programs CAN BE HEARD RIGHT NOW!!

George J. Poppin

I just picked up the latest edition of the South American Handbook and for enthusiasts of Latin DX, it's a must! Distributed in this country by Rand McNally, the list price of \$29.95 is well worth it, since it's a reference you'll use often. So, the next time you hear Radio JSV, 6060 kHz, in Huanuco, Peru, you'll know that it's "an attractive Andean town with an interesting market..."

That's it for this month. As always, the nice comments are appreciated. "Shortwave Center" strives to be a magazine, both in look and in content.

Here's to the start of another season....73.

*John*

## REPORT ON THE 1983 ANARC CONVENTION

by Dr. S. David Klein, NASWA ANARC representative

The 1983 ANARC Convention was held on 15 - 17 July, 1983, at the Rosslyn Westpark Hotel in Rosslyn, Virginia, just across the Key Bridge from Washington, DC. The convention was organized and hosted by the Washington Area DX Association (WADXA) under the able leadership of Ariene Luskin. Attending the convention were representatives from most of the ANARC clubs, broadcasters from a number of countries, and people representing all facets of the radio listening hobby. The convention was centered around many formal activities, but there was a great deal of time for just socializing. With an attendance of over 300, a new record, from most aspects the convention was a success.

The convention formally opened on Friday at 5 PM; by that time, many people had already arrived and were into the swing of socializing and examining the exhibits of various receivers & equipment, and material laid out by several broadcasters. The pennants brought as souvenirs by the representative of Radio Beijing quickly disappeared! After dinner, a wine and cheese reception was held, compliments of several of the exhibitors. This provided a chance for attendees to mingle and get to know their fellow conventioners.

Earlier in the day, the ANARC club representatives held their annual meeting. Several matters were discussed including the proposed revision of the constitution and by-laws of ANARC. While several clubs, including NASWA, were ready to vote on the proposed changes, it was found that a majority of the club reps had not been briefed by their clubs on how to vote, and the matter was postponed to a later date. Also discussed were the ways that ANARC could help clubs to publicize the hobby (and themselves in the bargain). John McCann, vice-President of HAP-USA, spoke to the delegates about his thoughts on the future of that organization, which, under his forthcoming leadership, appears to be bright.

Saturday saw the formal portions of the convention, with six seminars and the banquet. The first seminar was on "Publicizing Radio Listening," and serving on the panel were Randy Erickson (Moderator), Ian McFarland (Radio Canada International), John Trautschold, Chris Davis (Sony), and Alfonso Montealegre (Radio Nederland). A number of ideas on the topic were presented, and there was the opportunity for some audience participation afterward. It was pointed out that Sony has perhaps done more to publicize our hobby with their receiver ads than all of the clubs put together!

The second seminar was devoted to "Trends in Broadcasting, Equipment, and Listening." On the panel were Kim Elliott (Moderator), Larry Magne, Chris Davis, Roger Legge, and Bob Grove. During this seminar, topics ranging from receivers & transmitters to programs & jammers were discussed. The third seminar was on "Computers in the Radio Hobby;" serving on the panel were Mike Levintow (Moderator), Bill Krause, Skip Arey, and Jon Cohen. A number of interesting ideas on the use of computers were discussed, including mention of some of the computers which are being used in the hobby; Bill Krause had his VIC-20 on display. Some of the useful types of programs were also discussed.

After lunch, the fourth seminar was held. I should actually say "seminars" as there were several running concurrently on various aspects of the hobby (e.g., shortwave, mediumwave, utility, etc.). The shortwave session (of most interest to FrenDX readers) had on the panel John Trautschold of SPEEDX, Jay Goldberg of WADXA, Dr. Richard Wood, who was visiting from Saudi Arabia, and yours truly as moderator. The format for this seminar was a free discussion, and during the course of the session, topics ranging from QSLs to DXing to SWling to satellites and SW were discussed.

The fifth seminar was on "Commercial Shortwave Broadcasting." Joseph Costello of WRNO and George Jacobs presented a talk on the difficulties in obtaining a license to operate a commercial SW station in the United States. After this seminar, Kim Elliott presented the RIB awards. This was followed by the last seminar, the Broadcasters Forum. On the panel were representatives from RCI, R. Nederland, VOA, BRT, R. Sweden, R. Beijing, HCJB, BBC, R. Earth International, Zambia BS, and WRNO. It was an opportunity for those at the convention to question the broadcasters about anything and everything, and I suspect that this was the most popular session of the day; it was quite well attended.

Following this was the ANARC banquet. After dinner speakers were Pat Gates and Phil Irwin of the Breakfast Show on VOA, and Joseph Costello of WRNO. The ANARC awards were made, and the ANARC raffle drawing was held.

On Sunday, the Annual General Meeting of ANARC was held. A number of motions were approved, and Toronto was selected as the site of the 1984 ANARC convention. Shortly thereafter, the HAP auction was held with Sam Barto as auctioneer. When all was said and done, over \$2200 had been raised to help the efforts of HAP.

ARDXC will no longer be announcing availability of QSL cards in any of its pgms, unless for spl occasion. Reports should be sent to ARDXC QSL Service, Box 227, Box Hill Victoria 3128, Australia. Reports which satisfy our revised conditions will be QSLed and sent by airmail (outside Australia). Conditions include: must be on club official form or replica; r.p. required--two IRCs overseas; legible and detailed; sent by airmail within one week of broadcast; non-members' reports should follow EDXC Reporting Guide preferably on official report forms of DX clubs. Policy revisions are partly caused by large number of reports received from overseas which are illegible and very badly prepared. These emerge generally from North America, and it is obvious that there are inadequate or ill-conceived guidelines available for the correct manner in which reports should be submitted. This is something that the primary DX clubs in NAM might address. Frankly, we've found that many reports are atrocious, most are mere demands for a QSL, with little authenticating details. Reports that are prepared on official report forms, issued by Clubs overseas, are invariably well laid out and properly written. Only one QSL per station, even if heard on more than one frequency. All this concerns ARDXC segments on these DX programs: R Australia Spectrum, HCJB DX Partyline, TWR Guam DX Listeners Log, SLEC Radio Monitors International (August Australian DX News)

R Australia ancd 1/7 that the Australian Broadcasting Corporation (ABC) came into existence that day, replacing the A-B-Commission, which had been the natl bcr for 51 yrs. It was changed to a corp after recommendations by the Dix Committee of ENCI ry, which reported to the fedl govt last year. (WBI 7/7) RA reported 24/7 that ABC's MW pgms were being relayed on domestic SW xmters in Perth, Melbourne, Sydney, Brisbane --this SW svc due to be extended soon when four additional outlets from xmters in Lyndhurst (south of Melbourne) became available (WBI 4/8)

CHINA. Re BPM time signals, July LN-18: The reason some Chinese TS are a fraction of a second different from others, and from UTC is that some are emitted coincident with UTC while others are UT1. A check of the last annual report of the Bureau International de l'Heure in Paris (the international coordinating body for time and frequency standards, to which our NRC and your NBS contribute), shows that the BPM second pulses (or ticks, like WWV's) are on UTC (actually fixed at 10 milliseconds in advance of UTC), while the short tone dashed (or beeps, like CHU's) are on UT1. UT1 is 'mean solar time' corrected for a slight discrepancy caused by a periodic wobble of about 15 meters in the earth's axis of rotation. It is the true navigator's time scale and as such is very practical, which is why many UTC time broadcasts also give coded "dUT1" corrections in the form of double pulses or double beeps to allow a user to derive UT1 from the UTC broadcast. UTC, of course, is the internationally coordinated time scale which is derived from atomic frequency standards and which has, therefore, a uniform frequency scale. In spite of this uniform fq, UTC is kept within 9/10 second of the slowly varying UT1 scale by means of "leap seconds" which serve to correct for the accumulated errors in time as practised. At mid-1982 the difference between UT1 and UTC was about 609 ms., but by nearly the end of the year (the 957. point) this difference had decreased to about 272 ms. And so it goes, with the leap seconds being introduced at convenient times to keep the difference less than  $\pm$  900 ms. There are also the UT0 and UT2 time scales! Those interested in learning more about this esoteric but fascinating subject can refer to: a) Time & Frequency Users' Manual, NBS Technical Note 695, US Dept. of Commerce, May 1977. b) Frequency & Time Standards, Application Note 52, Hewlett-Packard Co., Nov 1965 (probably out of print now but still available in many labs and libraries). c) NBS Time & Frequency Dissemination Services, NBS Special Publication 432, Dept. of Commerce, Sept 1979 (a brief description only). d) the BIH Annual Report for 1982, Paris 1983, from M. le Directeur, Bureau International de l'Heure, 61, avenue de l'Observatoire, 75014 Paris. In this BPM is placed in Pucheng, China, 35-00 N, 139-31E; continuous on 10000; 14-24 UT on 5000, 00-14 on 15000; UTC is given minutes 0-5, 15-25, 30-35, 45-55; UT1 5-10, 25-29, 35-40, 55-59. So the Chinese aren't so crazy after all! (Martin Potter, Ont)

There's a new Domestic Minorities lang pgm from CPBS. Whereas until recently (?) the last in the series of xmsns beginning around 1100 ended at 1456 w/Kazakh, now there's a new one at \*1500-1556\* on 11375 15670, very strong; turned out to be Mongolian when compared with \*1200 which was on at least 8566. Why two hours of MG in the local evening series? Something to do with recent alleged hassling of Chinese in Mongolia? Tuning sig for these is long version of "East is Red"; the Korean \*1000 on 8566 9920 used overseas version as do several if not all the others; Sun 17/7. This is not the only additional glitch in BBCMS PRC material in July LN. 1400 Kazakh is not on 8566 and lower; it's on 15670 11375. There are other problems in the Taiwan guangbo sked; at least I was right in that there are now two distinct Taiwan pgms; that much is not obscured by BBCMS errors -- and more in the ZRGD DS. But I can only perceive them piecemeal. The 0300 RS on 17450 (and likely all associated with it) is not reversed; but I have reported this before. Looks like the majority of problems relate to the info being last season's--actual fqs in use are generally higher than what BBCMS lists. At almost every turn that BBCMS sked is in the Twilight Zone. The DML bcs are almost totally different now that what's listed.

9380: I have been chiding myself for not tuning the bands enough ever since learning about the new ZRGD Tsian guangbo outlet on 6095 and the newer still on 9455. I made progress toward rectifying this with discovery of the unlisted-by-BBCMS Taiwan guangbo outlet here at 1315 13/7, // 11100 9455 (Program I). So there.

Interesting, Matthew Francis in Tasmania hearing RB EG on 11735 at 1200; will have to check, since the BBCMS sked can't be trusted, but I think that would have put ES right atop DS Pgm I also on 11735 at that time. As bureaucratic as the Chinese are, I can't recall them screwing themselves up in such a way before. I'm sure it has happened with the Soviets, who also seem unable/unwilling to work things out closely with their satellites -- the cochannel junk on 12070 being a good example. There seems to be more willingness on the part of the Chinese to allow ES use of DS fqs; tho, 15880, 11575, 11505, 15500 being some.

RB testing again 15245 11755 c. 2/77 but not commanding the bands as they did last

time. Circa 1200; 1300... Sheesh, 19m--BBC on 11750 now badly bothered by RB up and worse by Taiwan 11745, not to mention the Vietnamese a bit less than a kHz high. Arggh. RB hrd 7/8 on 9535 11755 at 1300, but by 1600 was 11755 15200; 9535 off and 15245 a mass of jamming, so guess that's why they moved. Other programmed and announced //s also hrd. Local nighttime RB reception here awful; 9535 is incredible when they use it, in local mornings.

When RB was on 15245, heard cw on it so started trying suspected feeder fqs. Hit the jackpot on 6995: parallel A1A (hummy) QRM was on 6992, later moving closer to 6991. For a while RB engineers apparently got a notch on it, but it reappeared on the RB sig when the fundamental went to 6991. Other RB parallel this day was 11755, and QRM did not seem to be thereon; but as it's sandwiched so closely by Cuba-11760 and BBC-11755; beat notes at such a high pitch may have been masked by the 5 kHz adjacencies. Only recognizable characters from the A1A were "OMN" repeated several times, and a few jumbled alpha-numerics. This 30/7 1239. Both test fqs have carried identical QRM in past. You can tell if it's on feed by checking if it's on both sidebands of RB signal. The feeder, by the way, is A3E, but with reduced carrier. ITU nomenclature doesn't seem to know what to make of a reduced carrier AM radio-telephone signal with both sidebands.... A UAØ ham calling OOB CQ 6999 was not "repeated" via RB (David Newkirk, Seattle WA)

R Beijing in-Esperanto: 1100-1130 Japan & Korea 15100 9860 6825. 1300-1330 SEAs 17745 15165 8425. 2000-2030 Eu 15110 11445 10750 9965 6825. 2230-2300 Lam 15600 11685 11515 (WBI 7/7)

COSTA RICA Since 30/6, R Impacto, TIRS, hrd on 6150 ancing 24h mx & unsked-nx. Occasionally carries this EG smt: "R Impact, CR's new radio stn, can be hrd at 6150 kHz on the 49m band. We would be delighted to receive our listeners' reports on the quality of our signal abroad. Write to us at Radio Impact, Box 197, Santiago, CR." (WBI 7/7) Santiago is incorrect; I recall BBCMS correcting this, but can't find where they did it (gh). San José newspaper La República, 7/7, said CR Minister of Info said image of CR'd be considerably improved abroad when the radio stn "Costa Rica International" started operating. In a report to the Govt Council, which had been approved in full, Minister stated that R Relej'd xmit on SW and that the Govt'd accepted an offer in this regard. At present R Relej, commercial stn in SJ, bcs on 730 and 4832 (WBI 21/7) And 6006, haven't you noticed? (gh)

9/7 La Prensa Libre stated that a net of rural radio stns to be known as the Unión Nacional de Emisoras Rurales (UNER) had been created. Composed of 15 stns in remote parts of CR, aim to demonstrate that local stns were of great importance to their respective provinces or communities. New net'd offer very attractive ad rates for all 15 stns or for groups of not less than 4. In addn, pgms'd be prepared jointly for net being. This applied basically to sports such as soccer, but something similar was needed for cultural & educational pgms. They'd soon have nx, tnx to support and advice from the Nauman Foundation and the CR Journalists' Assn. Stns comprising the UNER net included R Victoria, R Emmaus, R Alajuela, La Fuente Musical, R Golfito, R Casino, R Bahía, R Sideral, R Cima, R Ultrasoníc, R Guanacasté, R Atlántida, R Corobicí (WBI 28/7)

CUBA For S83, RHC has several registrations in 13m per the THFBS: 21455 2200-0300, 21500 1100-2200, 21600 2200-0600, 21620 2200-0600, 21740 1100-1700, all intended for SAM. These are tentative HF assignments; there is no guarantee that any, or all will be used (Bob Padula, ADKN) & same goes for further S83 regs below. Weird that RHC et al would anticipate using 13m for first time just when the band is dying and most stns are moving down from it; tho there may be temporary resurgence in fall (gh) RHC on 17613 0150 16/7, SP nx (Chuck Oliver, Spring TX)

Relays of All-Union Radio's domestic Mayak pgm have been hrd again on 4765 on practically a daily basis since 29/6. Xmtr believed to be testing in Cuba (WBI 7/7). Usually obs 1900-1300 apx (WBI 21/7)

CYPRUS BBC relay has its first 250 kW xmtr on air, 1500-2000 17780 Russian; its use at other times is not known (Noel Green, UKOGBANI, DSWCI SWN July)

CZECHOSLOVAKIA 28/7, Czech R DS quoted Ghanaian diplomat who attended World Assembly for Peace and Life against Nuclear War in Prague recently, as saying at a meeting of the UN Special Committee against Apartheid that there'd been talks about using the SW xmtrs belonging to Czechoslovak Radio for being the UN's anti-Apartheid pgms to Af (WBI 4/8)

CHILE During a visit in last days of June to the stn R Nuevo Mundo, Santiago, they told me this stn is promptly starting to bc on SW, because they have an old xmtr fixed. They gave no fq (Gabriel Ivan Barrera, Argentina). Old WRTHs show it on 5950 or 5955; 11730 or 11740 (gh)

DOMINICAN REPUBLIC R Earth, studios in Neth Ants, xmtr in DR, reported in its 0330

xmsn 22/7 that the Cuban govt'd sent an official note to the Dom authorities denouncing use of a local SW radio stn to criticize and 'offend' the Cuban regime. Dom Pres'd said a spl commission'd been set up to investigate Cuban claim and he'd stressed that foreigners were not allowed to use Dom comms facilities to carry out political activities against other govts. R Earth said that tho the protest note signed by the Cuban Comms Minister 'd said the stn'd been using secret being outlets, it had been confirmed that the stn referred to was in fact R Clarín, the same one used by R Earth, whose xmsn was preceded by a pgm oriented to Cuba and Nicaragua. R Earth added that its own pgms were totally independent, non-political and non-religious and were directed to 'mass worldwide audiences'. It was hoped they would not be affected if the Dom authorities decided to take any steps against the airing of the pgms denounced by the Cuban authorities (WBI 28/7) See LMI, Cland...

Coincidentally (?), R Earth resked 26/7 from 0330 to 0200, more like the time they wanted in the first place; LV del CID ancd 3/8 its Máximo Gómez sked via Clarín as 1630-0130. However in the middle of R Earth's GMT Sun 14/8 bc, Clarín vanished from the air and was not hrd again until GMT 20/8, but running own SP pgming at 0200 instead of R Earth; the following night it was off the air again tho there was a carrier on 11695, a fq R Earth hoped Clarín could adjust to (gh) R Clarín off air week of 15/8 due to lightning strikes at xmtr (R Earth 23/8) Earth seems 75min now (gh)

Af 2030 B17605 B15220 M11740 Lopik=11730 M9715 (Marian Marks, RN 5/7) RN in tent sked from 25/9 shows one 500 kW in use from new Flevoland xmtr site; four 500s and one 100 being

installed and should be fully operational by end of 1984 (Arthur Cushen, NZDKTimes) Jonathan Marks visited new site on the open, windy, flat, desolate Flevoland Polder, "the world's only underwater radio stn", 100m below sea level. Some masts already up, three of five xmtrs installed, testing into dummy load. The 100 kW is a little boomer for reserve. Being built in Belgium and delivered with most parts mounted. Antenna matrix system'll be computer controlled. Six masts are up, two halfway. No antenna wire in place yet, but hoped to get on with that w/in next three weeks. First ant to go up will serve N6SAM and As. Highest tower is 120m for 49mb. Took two days to put up those large masts; positioning them required spl crane. Xmtr bldg also has ant observation point, a sort of clear bubble atop, allowing engns to look for physical damage caused by rotten wx. Several offis from other stns visit, incl a team from Finland soon. Hope to go into full opn by end of 1984 (MN via Webster, DXO July)

NZ ZEALAND Pirate news: R Freedom/R Star has dropped 4lm and 23m, and now calls self "KIWI", Kiwi Radio on 11844 and stronger on harmonics 5922, 23688 w/5 watts. Power to be incr on conclusion of tech problems. Pgms C6W & EZL nx. Reports wanted, no rp req'd. KIWI Radio, P O Box 1437, Hastings, NZ. However, xmns may conclude permanently in Aug for economic reasons (Letter from stn via NZDKTimes)

R Tropical: I am concerned that some overseas reports insinuate that 'senior members of a major NZ DX club' know more about this stn than they are letting on. Stn has been reported from many parts of NZ, and I note it has apparently given calls to NZDXRL members. No veries reported to DX Times and no recent reports of reception noted. If any member does have info about this stn which will clarify its status, then I'd appreciate hearing from them. I particularly wish to ensure that our reputation for honest and accurate reporting is not compromised in any way (David Ricquish, NZDKTimes)

NICARAGUA A July 11 letter from V of Nicaragua says EG at 0100 & 0400 on 5950, but soon will have new sked and 2 new 25m fqs, 11715 and 11840 (Someone in OH via Andy Sennitt, RNMN 18/8) Those two fqs not registered for S83 (Sennitt) 11715 already used sporadically recently with low power. 11840v used briefly years ago pre-Sandinista. Can't wait for them to start QRMing RNS via Havans, hi (gh)

VON hrd in EG 31/7 0423-0503\* on 5950, 44444; 1/8 0117-0200 when switched to SP, on 5950, 21432. This is a composite report on the nearly identical pgms: 1. Contact 248, mailbag w/LAM nx mixed with letters; name refers to their P O Box number. 2. TCs in local time. 3. Several IDs w/jingle, slogan "A free voice in America", "sovereign territory in Central America." 4. List of requirements for US citizens visiting Nic. 5. "We don't want war, but will defend by every means possible the rights we have won." 6. Several statements on Sandinista health progress and land reforms. 7. Bulletins on Cam & Nic nx, obviously slanted against the US. 8. Many LAM songs. 9. Excerpts from a speech by Ortega, leader of the junta. Aside from the TCs and nx, all the other parts of the pgm those two nights were exactly alike! Nx may have been identical too, but am not sure. All the songs and statements were identical, but were in different order. Believe VON may be automated, w/"mix & match" splice-together of a finite number of items. TCs, tho correct--strange (James Wildman, Cape Elizabeth ME)

VON ES w/some pgms: 1100-1300 SP 11715 and 5950: 1100-1103 nx summary, 1115-1120 intl nx, 1120-1130 commentary, nx, nx; 1137-1145 editorial from "El Nuevo Diario" 1200-1230 relay DS nx, 1250-1300 nx. 2300-0100 SP 5950: 2305-2310 Nicaragua Today, 2330-2335 Nx, 2335-2345 "Today, Here, Now"--domestic, intl nx & commentary; 0000-0010 Nicaragua Today, 0030-0035 Nx. 0100-0200 EG: 0100-0107 Nic Today, 0130-0137 Nx 5950. 0200-0400 SP 5950 repeat 2300-0100; 0400-0500 EG repeat 0100-0200 on 5950 (WBI 21/7)

NIGERIA Eyes widened at an entry in Robert French's utility column in a Jan 83 sample of DX Reporter: Donald Stidwell, Baltimore, reported hearing a relay of R Nigeria on SSB 17971 at 1250; no date given as is usually and infuriatingly the case with this reshaw of the NNRC. This clicked. I reached back for my log of 15/10/77 on 17975.3: "R Nigeria, strong w/IS 1400, ID, nx by man. On USB, fine quality when tuned properly. Nx from abroad at 1406. Highly compressed tho it may have been my AGC. End of nx 1412, off air, then short exch of voices. May have been relay by somebody. Sounded like FR or vern, reply in EG something like 'That was the African nx for you'" These fqs are allocated worldwide to zero mobile svc, so likely a relay from ground stn (D Newkirk)

UNIDENTIFIED 10000 6/8 \*0322-0323\*, a drunk-sounding guy came on over WWV and said WWV was no longer a std time stn--this was the new one. He then gave a long, whoop-type ID (I think) which I couldn't hear. "At the tone it will be 3 hours and 29 cents" or some such, and then went off. Hadn't come back by 0332 when I tuned out. Not terribly strong, but no het (Mike MacCollum, Harbor Springs MI) 7410, pirate presumed 0404-0410\*(?) 4/7, feature about 28/3/64 & R Caroline. 0409 xman break, 0410 carrier gone, SIO 232. 7389, presumed pirate 0429 -0439 4/7, weak, them from "Good, Bad & Ugly", "Instant Karma", Lennon, ancr almost impossible to understand, SIO 232 at peak; pulled plug or f/out 0439 (Richard A. D'Angelo, Wyoming PA) 5340 22/7 0145-0220 someone relaying an FM atn from Fort Myers FL; IDed as 97 FM so assume it was WINK. 43333, not hrd since ("ROR/5", SWNS)

**CLANDESTINE CRANNY** Argentine Annie has verified! Those of you with memories of 17740 kHz going back as far as 1982 and a taste for signed photographs of the lady should redouble your efforts to track "Liberty" down. Sorry, I can't give away any more information than that (John Campbell, June DSWCI SW News) Oh, come on now....

R Soberanía Nacional, LMI R Farabundo Martí 1/7 and it bc at 1230 (not Sun), 1830, 0100. Obs 6/7 0100-0200 & 1230-1330 on 7040 & 6930, both + 10 (WBI 14/7) In an interview on R Sweden International's Sweden Calling DXers 12/7, a rep of RFM on a fundraising visit to EU spoke about the opn of these stns. Both R Venceremos & RFM were located within El Salvador, not Nicaragua as had been claimed by some opponents. RV was in Morazán province, whilst RFM came from an underground base in Chaltenango /sic/. The hours of xmsn were different; too, RV carried more milly info about FMLN opn, whilst RFM was 'more or less the basis of democratic revolutionary govt of the future'. (WBI 21/7)

R Guatemala Libre The rep also spoke about this new stn, R Free Guatemala, which was being planned by rev friends in Guat. Not yet functional, but tests being conducted. RFG'd use two fqs, on SW and FM. It wasn't possible to say whether they'd use 31.4% 40mb, but at the moment, experiments were being made in 40 (WBI 21/7) About 41%

La Voz de Sandino, hostile to Nic govt, reported 29/7 that the "Lanza Squad, a member of the Democratic Revly Alliance's Info system" 'd carry out a daily bc at 18 h local on 106 MHz FM and over TV ch 2 (WBI 4/8) Lhave been listening to the xmtr of Edén Pastora Gómez for the past several weeks. This notorious guerrilla fighter, aka Comandante Cerro, has stn around 6275, usually 0554\* or continue in Miskito, otherwise all in SP. At times you have a female ancr w/5-digit code numbers; 12/7. 19/7: They now transmit also on FM, each xmsn lasting 5 mins, fqs incl 120, 140, 150, 195 MHz. These are directed to the Nic population and carry coded messages. Mostly 6-10 pm local time. 6275 now seems to be sending from inside Nic judging by nx and other pgng. They are reading lists of 'war criminals', encoded messages, war bulletins, just as of last night #35 on a battle near Costa Rica border, etc., ("BST", SWNS) This one noted on 6220a 28/7 w/apparent La Voz de Sandino ID at 0119 during Miskito; no sign of LV de Nicaragua Libre at that time. LV de Sandino ID again on 6220a 0158 31/7 then a LV de Nic Libre ID was hrd on same fq at Q220. So these two ARDE stns are apparently again sharing a common xmtr (SWNS)

La Voz del CID, LMI Spy Numbers Hrd Spanish #s stn, 5 digits, not repeated, in both MN & IN on about 6886 or so. Seems unusual in that number groups seem to be recorded as a group instead of being spliced together from individually recorded numbers, as seems to be the case with many (most?) other spy stns. This usually is on at 0600 or so (Mike MacCollum) Seriously doubt physical tape-splicing involved in others; talking machine. Four digit Spanish #s stn w/YL ancr monitored on 4665a, goes on all night and usually starts on the hour w/message sent twice in a half hour period. Vy strong in MH. ("BST", SWNS) Noted 4/8 on the fq just before 0300 w/strength roughly comparable to the presumed Cuban Mayak relay on 4765. Carrier does not stay on between xmsns (C M Stanbury, Ont, SWNS)

The now-notorious stn of 3646 was first noted on this fq 10/3/82, having previously appeared randomly on 3445. A few years back 3040 was regular, and often ran continuously thruout local eves w/no breaks. Now 3646 is by far the most active, and is audible all night. During daylight, 7397 (ex-7383) is the most active, but usually runs open carrier, w/few actual messages. New fq 6211 first noted here 24/7 after 2200, on simultaneously with 3646 and 7397 but not // either. Other fqs to watch are, 4640, 4720, 5015 USB, 5499, 5645, 5661, 5892, 6065 (most commonly hrd ones underlined) These stns are rather bafflesome, and are so hysterical as to be amusing (David Crawford, DXSF 10/8)

R Truth 5015, \*0430-0500\* 1/8 w/bird call IS, pop tune, ID, into highly propagandised nx, strongly anti-Mugabe, commentary, pop mx. Many references to R Truth in 3rd person, e.g. "...R Truth would like to point out that..." Best on USB. Voz de Realidade in well on 4950 as well, i.a. Excellent nite for southern Af; tnx to Parks for tip on this one (David Crawford, DX S Florida)

Voz de África Libre, anti-Mozambican stn, not hrd since Apr. This coincides with the killing of Orlando Cristina, the genl secy of the Moz Resistance Mvmt (MNR) and main editor at the stn. Cristina was victim of internal power struggle; mvmt is supported by South Africa (Afrique-Asie, French magazine via Jacques Groen, Neth., SCDX 12/7)

V of Mozambique National Resistance Tho ancd that its regular bcng svc on 4764'd be inaugurated 1/7, continued to carry repeats of its 23/6 xmsn until apx the end of the 2nd week in July. New pgng in PT & verns spoken in Moz first obs 17/7 & 18/7 (WBI)

(PT: A Voz de Resistência Nacional do Moçambique), 0400-0500 & 1700-1800 in PT & verns on 4764. Operated as V of Free Africa from Gwelo, Zimbabwe, from summer 1976 until 13/2/80 when closed down. Again hrd from diff location 31/3/80. Last hrd IDing as VOFA at 1700 12/5/83. Was hrd again 23/6 ancing in PT as VOMNR (WCI 4/8)

V of Namibia pgm presented by SWAPO and bc by Zimbabwe Bcing Corp continues hrd on Mon/Wed/Fri 1900-1930 in EG, AK, Namibian verns (WBI 7/7)

V of the Broad Masses of Eritrea Obs 1430-1430 8/7, 9/7 on 1437, 6250-6261, 7400-7460 (WBI 14/7)

R Bardai, supporting Transitional National Union Government under Goukouni Oueddi, hostile to Hissène Habré, IDing as "This is Bardai, Chad National Radio, the voice of liberation" at apx 1800-1830 FR, 1830-1900 colloquial AR, 1900-2000 local langs, on 6009. Firat hrd Feb 83, shares xmtr w/anti-Upper Voltan govt stn V of the UV Pop Rev. Ance it bcs from Bardai, town in extreme north Chad, but xmtr believed to be in Libya. (WBI 21/7) Monitoring obs on 5/8, 6/8, 7/8 indicate V of the Upper Voltan Popular Revolution has closed down. Was believed to be in Libya, sharing xmtr w/R Bardai on 6009, not hrd when checked these dates. But 5/8, R Bardai remained on air one hour later than usual closing at 2130 (WBI 11/8) And making Nam reception more possible (gh) One evening on 6009 hrd EG from Libya giving "25m" instead of Bardai (Ginbey, RSA, RNPN 18/8)

V of Palestine Kol Israel reported 14/7 that Yasir Arafat's supporters had inaugurated a new radio stn by this name in Tripoli, Lebanon; only test xmsns at present (WBI 21/7) V of the Palestine Revolution Libyan nx agcy JANA in a report datelined Damascus 30/7 quoted spokesman of "new revly mvmt of Fatah" (hostile to the leadership of Yasir Arafat) as saying it'd decided to establish a new radio stn of this name Kuwaiti nx agcy (KUNA) report also from Damascus 30/7 said al-Fatah opposition leaders ancd plans to establish a VOPR stn either in Syria or in the central Lebanese Beqaa Valley (WBI 4/8) V of Palestine, V of the Palestine Revolution Stn named this in AR hrd \*0500 2/8 on 1412, supporting Arafat; opened w/the "Biladi" anthem and ancd: "Oh masses of our struggling Palestinian People! Oh masses of our glorious nation! This is the VOP, VOPR. We will always be with you, telling the truth inkeeping with a brave bullet and expressing your aspirations, defending your revly line as the mouth-piece of the PLO, of its natl charter and of the political pgms issued by the Pal Natl Council". Gave sked as daily 0500-0700 & 1530-1730 on 1412 kHz (WBI 4/8) Believed to be located in north of Lebanon, continues hrd; ancd from 9/8 eve bc'd be 2h later, 1730-1930; morn still 0500-0700 (WBI 11/8) 05-07 & 1730-1945 on 1412; times v (WBI 18/8)

Bizim Radio, the stn/pgm of the Turkish Communist Party, has been a 'guest' in Romania and E Germany in the past (and present too, e.g. 9584), but is being a little more adventurous on 5915 (and 6025?). A Russian-assisted clandestine to Iran lives there, but Bizim R has been hrd once in place of it (No#1 Green, UK, DSWCI) Another technician to the salt mines? (John Campbell, DSWCI Ed.)

V of Iraqi Revolution Hrd again 26/7, 27/7 on 7000, having been untraced since March. Amnts said VOIR'd be on the air 1400-1500 w/repeat of 0300-0400. The V of the Iraqi People stn remains untraced (WBI 4/8) V of Iraqi Kurdistan, 6257 15/8 Kurdish 1505-1607, AR 1607-1635\* (WBI 18/8)

V of the Iranian Revolution 1/8 ancd it be daily 0915-1000 in Kurdish & 1000-1030 in Persian on 46 and (741) m. Egms repeated 1230-1315 Kurdish, 1315-1345 Persian. Stn obs 2/8 0910-0940 on fq varying between 6420.1 and 6460.8 (WBI 11/8) 7245-7300, 6420-6440, 6366-6383 variable (WBI 18/8) So 3 xmtrs, then?

R Salvation of Iran (Persian: Radyo Nejat-e Iran), pro-monarchist and hostile to Khomeyni and the Iranian govt, 0305-0400 9032 repeating 1830-1925 on 11660, both in Persian. First monitored 23/6 but may've been on the air since at least 21/3 (WBI 7/7) /Cf Aug LN-22/Correct addr is thought to be P O Box 102, DK-2670 Greve Strand, Denmark and not as published (WBI 21/7) Hmm, Greve Strand is also the HQ of the Danish SW Clubs International (gh) Clear ID in Farsi 0404 just before 0405\*, seemed to come on 9032 at 0330. Obviously using same xmtr as R Vatan; 16/7 (Craig Seager, ADXN)

R Vatan \*0415 suddenly on 9032 ex-9027; gave addr in W Germany at 0427 and has QSLd in the past. // 15555 16/7, in Farsi (Craig Seager, ADXN) R Vatan now sked 0405-0600 on 15555 9027, 1605-1800 on same (Shigenori Aoki, Nagoya DXers Circle, via RA DX 14/8) 27/5 & 28/5, R Vatan (Homeland) hrd on 14990 0405-0605, 1605-1805 w/anti-Khomeyni pgms, but now back to wellknown 15555 (Supratik Sanatani, Asian DX Review) m/b Wood's UNID!

V of Iran is hrd 0330-0400 on 15315, 1805-1900 on 15355 9785 9605 (Aoki, as above)

V of the National Army of Democratic Kampuchea extended VT segment by one hour, currently s/off 1330 ex-1230. 23/5 surprised to hear them w/orch/instrl mx from 1345 to 1415. Perhaps entertaining those resistance groups battling Viet forces w/some western delicacies! Meanwhile Prince Sihanouk has threatened to quit the anti-Viet Cambodian coalition he's headed for a year in a new dispute with his non-communist resistance partner Son Sann. So watch out for new developments (Sarath Weerakoon, UADX) On 5200 1000-1300 & 2300-2400 Cambodian; 1300-1330 Vietnamese (WBI 18/8)

V of the Kampuchean People In 11/7 issue, Bangkok newspaper Matuphurn reported a high-level mly source as saying that the Kamp Peoples' Natl Libn Front of Premier Son Sann was preparing to set up a radio stn, WOKP. It was located at a secret site in Kampuchea. Stn'd carried out trial xmsns for a week, being thrice daily in Camb lang on MW. No info as to when being'd begin officially. Per source, stn's xmtr power'd limit reception to a 100 km radius. Part of eqp'd been donated by the Singapore govt in 1982. More eqp needed to incr power (WBI 14/7)

## NORTH AMERICAN PIRATES

V of the Border, 6/8 0412 on 7425.

Whose border is anyone's guess, but from strength and fading, it probably was quite a way away (Robb Browne, W Allis WI)

"KPRC" Rxd from Pirate Radio Central, 1616, a plain paper, no data QSL, in reply to two reception reports, one 5 months old, another 2. Both sent to ancd Exeter NH addr and return postmark was for Middlesex-Essex MA (Paul E Choroszy, Saco ME, 8/7) The MW pirate KPRC was hrd here 26/7 on SW, 6209, 0320-0600, saying this fq was // 1616. They had mbg pgm, mx, took calls from listeners, gave NH addr (Kirk Allen, Ponca City OK)

R Angeline (tent.) Hrd 2/7 0616-0625\* on 7390. Seemed very satirical, sig not good enough to understand much. Almost no mx, just "You Are My Sunshine" u/ID & whistling notes at 0619. At t/in hrd what sounded like white people trying to talk like black people, but unseemed of V of Tomorrow or WKKK ilk. Mentioned "our revolution" and "White Sands Missile Testing Range" concluding w/hi quality sound-effects. Closed w/IDs in several langs, finally EG; 80% certain of name; similar to R Cland but am fairly certain it was not that. SIO 343-444 (Mike MacCollum, somewhere)

R Highlander, 7430, 0353-0357\* 4/7, Scottish sounding instrl mx, ending w/ID, signal/cARRIER gone/cut. Never hrd of this one before; 353 (Richard A D'Angelo, PA) Most interesting of the 4/7 pirates, 0336-0357 on 7429.7. M opr played mx sounding much like Scottish highland tunes, G sig and very pretty mx (Kirk Allen, Ponca City OK)

"WRAM" was on 7430 around 1830-1840 26/6 reading reporters' names, then playing rock (SWNS) unID, possibly WRAM, 7/7 Thu nite, local, rather different for a pirate, 0339-0406 t/out on 7425. Sig fairly unintelligible due static, couldn't make out IDs, but 0353 ancd phone number, and something about Reagan & Cam, 0344-0347. Talk of revolution 0355, which made me wonder if this was a political stn, but maybe referring to rev in mx. They played 4 songs of somewhat heavy rock, SIO 222 (Mike MacCollum, ?) FCC has busted WRAM in Levittown PA; no, I wasn't involved in it (Bill Oliver, 23/8)

R Free Insanity 13/8 2238-2245\*, after phone tip to check 98.7 FM at 1900, checked but didn't hear until had another chance to check--first FM pirate I've hrd anywhere.. End of song, 2245 ID, mx to a/off. Strong sig, very clear, but could still hear mike clicking on or off at one point. Hope to hear more from them (Mike MacCollum, Indy IN)

Jolly Roger Radio, 94.1 FM, Bloomington IN has been getting a lot of press by returning to the air and taunting FCC. Operator "The Flying Dutchman" says he's moving to England where he expects less trouble from authorities, and may go SW there. Power here reportedly 1 kW (via Ken MacHarg, and Mike MacCollum)

V of Democracy 20/7 0247 on 7430a, ancd as 7530, asked for calls to NYC # but then left air. Hrd again 30/7 on apx ancd 6225 0215 t/in w/classicalmx. 0235 ancd Wash DC loop #, and later one in NY, then obviously fake communist propaganda supposedly relayed from R Moscow's studios via satl, sometimes IDing as V of Communism. By 0310 xmsn clearly intended to be taken as satire. Somewhat heavy handed but quite funny in spots especially a few of the mbg bits. F strength, G mod, but HNL (CM Stanbury, SWNS) V of Democracy hrd 21/7 & 22/7 on 7408 & 7428.5 resp, commentaries and Billy Joel mx (Kirk Allen, OK) VOD/VOC hrd from 0307 to 0316 when I had to leave 30/7 on 6226a, ancd 6225. Rather interesting spoof of VOA/R Moscow; gave phone 212 283 9977, which was answered by a tape; seemed to have anticipated several questions so pre-recorded answers, yes, no, Battle Creek adr, and then just pressed the right buttons. M & F (or pretender) reading letters from praise from all over the world, including Khomeini and a Cuban worker. Excerpts from Tchaikovsky's Piano Concerto No. 1. Closing ID by a bland and earnest fellow. Amnts about VOC and VOD relaying each other, few VOD IDs mixed w/bit of US NA, off, but back on later when checked 0424-0432\* w/same IS tape. (Mike MacCollum, Indianapolis IN)

Northstar International was busted by the FCC Sunday 21/8 around 2000 UTC. He had been on the air 45 min before being visited by the 'head cheese' (Lani Pettit, IA) Was located in southern California (gh)

Radio U.S.A. Hrd 7/8 0357-apparent s/off 0408 on 7375a, SSB, best in LSB. Claimed to be coming from Atlantic Ocean, 200 W; gave A\*CE addr, send several 20c stamps for QSL; DJ claimed to be "Mr Blue-Sky", all this in 0404 smt. Mx seemed mostly rock, 0405-0408, then smt, dead air, no noticeable carrier, SIO 333-232 (Mike MacCollum, Harbor Springs MI)

R Clandestine 2/7 0521-0557\* on 7375. Nice mix of humor and mx, a switch from the other times I've hrd them, when mx easily predominated. Spoof of the old "Mr Wizard" show, amusing little bit with string of IDs going on far too long, smts by host R.F. Burns, engineer Boris Figmitzsky and a YL named "Wanda Lust," who gave the stn's addr (Box 982, Battle Creek); mx included more conventional pirate-type fare as well as an 'oldies' section w/2 songs. Hi quality bc, G strength, audio quality, fq selection and pgms--I only wish that I could hear them more often; SIO 444. Again hrd 7/8 0302-0352\* on 7400s. Thought this was CID at first, as hrd several rock songs in a row, but 0313 ID by R F Burns. This bc consisted mostly of mx, w/occl interruption, as 0323-26 spoof of Emergency BC System. Sig not very good at first, with much static and fading, but it got better. SIO 222-333 (Mike MacCollum, Harbor Springs MI) 7/8 0316-0353 on 7400. Host R F Burns had a "test of the universal space ship and flying machine imperative locator, this includes all UFOs" (Kirk Allen, Ponca City OK)

R Crystal Ship 4/7 0441-0510 on 7425, ID mentioning 4mb. 2 ancrs talking about Independence Day; gave Box 245 addr, mentd QSLs. Said they were "violating FCC regulations" and "oh boy, we're in trouble now." Rock mx, 0455 played preacher condemning rock & roll. 0501 "let us take you to another time and another place where Halloween is every day." More mx, SIO 242. Also 17/7 0304-0331\* on 7425, SIO 232, rock, IDs w/fq playing preacher condemning rock & roll, ID asked for phone calls to (301) 840-9948; unfortunately none rec'd so they s/off with "73s and fight for free radio" (Richard A D'Angelo, Wycmising PA) 301 = Maryland

New Wave Radio Int'l, also IDed as NWRI, on 7430.8, around 0500 4/7 (Kirk Allen, OK)

WOIS (?) Another 4/7 pirate on 7438.8 around 0500 (Kirk Allen, Ponca City OK)

KQSB Another 4/7 pirate, on 7432.8 around 0500. Again 14/8 0406 on 7385.1, "The Old Art at Play", encl mail-drop addr, P O Box 2571, Shawnee Mission KS 66201(Allen)

LAST-MINUTE INFO ALASKA KNLS Anchor Point hrd on 9690 since 26/8; 1232 EG lesson, 1300 CH talk & ID to 1331\* v; strong sig, but poor fq due to jammers aginst CBS Taiwan; 11820 is barely audible 1430-1600 w/strange mixture of RS religion, jazz & pop mx (Ernie Behr, Ont)

BELIZE Caribbean Nx agcy CANA reported 9/8 that the House of Reps'd passed bill providing for proper admn, management and regulation of radio & TV. Deputy PM, responsible for bcng, said new law long overdue; govt'd promised Belizeans natl TV, and planned to meet its commitment (WBI 18/8)

BOLIVIA The LAM stn reported on 6081.5 is definitely R 21 de Diciembre; hrd then since 19/2 w/ID; check Apr LN-17 (Ernie Behr, Ont)

BRAZIL A VOA fq div rep indicated that from 14/8 Radiobras'd relay VOA in SP to LAM 0100-0300 via two 250 kW xmtrs, on 18780 & 15390 (WBI 18/8) R Nac da Amazonia hrd on new 6120 since 6/8, PT pgm, mx 0100-0200\* v, vy strong but BEC QRM; // 11780 15445. R Universo; 11905, from 0100 w/"Voz da Libertação", // 6020; both strong 8/8; no lower varies to 11906 (Ernie Behr, Ont)

CANADA RCI is installing three new 100 kW xmtrs to replace the old 50s, and as a result Mon-Fri several of the 250s are off the air during the daytime, e.g. the African service 1800-2000 is only on 17820 50 kW; however if weather is bad the normal schedule will be in effect, as it is on weekends. Similar restrictions on the Eu svc, carried on Daventry relays only (RCI SWL Digest 20/8 & Eu svc 21/8) The 50s are hardly used by RCI at all but for the CBCNQSWS, so are the 100s actually for it?

EL SALVADOR R El Salvador was back on 9553.25 in SP 1200-1330 f/wat 7/7, but gone a few days later (Ernie Behr, Ont)

FINLAND Per smt from R Fin 15/8, plans to start new SF pgm for the 4-7, "Good News-

ing" at 0630 (0730 from 25/9) on 11755 6120 (WBI 18/8)

FRANCE RFI plans to bc in EG to FE in 1984 or 85; Swahili, Hausa and other Af langs in 1984. Once Guiana relay on air, greatly expand PT & SP to LAm, maybe EG and FR to NAM (RFI spokesman on SCDX 23/8)

ASWA!!!

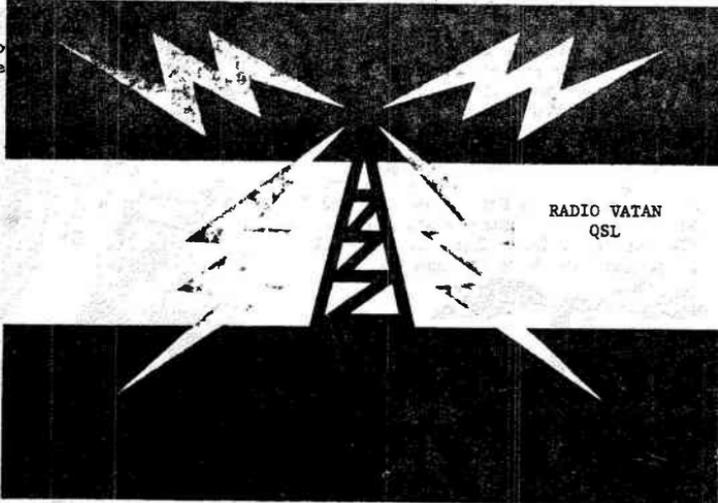

This will verify and acknowledge  
 your reception of "Radio Vatan",  
 (Radio Homeland). We are a group  
 of free Iranians broadcasting the  
 truth to the people of Iran. Our  
 schedule follows:

15555 Khz	0405-0600 GMT
	1705-1800 GMT
9027 Khz	0405-0600 GMT
	1605-1800 GMT

The first hour of each broadcast  
 is a program dedicated to keeping  
 the great cultural heritage of  
 Iran alive. The second hour of  
 each program provides news and  
 analysis of current events in  
 Iran. We hope you will tell  
 everyone you know of our humble  
 efforts.

ZIMBABWE: ZBC 3396 n/d large cd. in 2 mo. (Barto-CT).

This time we had @ 119 countries reported. Pretty good. Some excellent QSLs especially from KNLS, Rio Muni, Peru, Vatan and others. This month we ran an all Asian Column. Not too sure about next month but we'll have something interesting.

Art Kleiner of East Rockaway, NY sent along his greetings and his first contribution to the column via WMR Radio. Bill Meyer will be attending Kutztown University in a few weeks as a Political Science major. Hope we will hear from you every now and then - don't keep your face buried in the books all the time. Paul Brouillette sends along a very nice note about the Column. Thank you Paul. Barry Brenesal says that he gets rather apprehensive when Manokwari or the Turkish Police Radio doesn't reply in 4 months. Don't feel that way Barry - we all get the same

type of response. Neil Carleton reports only a few QSLs are coming through. Nothing unusual about that - just keep reporting what you get to us. Leslie Byron says hello to all his DXing friends. He has been under the weather a bit lately. Get well quick. We miss you Leslie. Charles Fox needs a correct address for Radio Globo in Brasil. Any help? I guess we can end the QSL Column here. Best of BK to everyone....Sam.

UPCOMING DEADLINES: 9 September (Mid-Sept) 19 September (October) 10 October (Mid-Oct)

Reproduction permitted. Credit original reporter and NASWA UPDATE. Dates, times and days are GMT. Freqs are kHz.

**BOLIVIA** R. Nueva America, 4796, in SP 1030-1102. Lively LA mx prgm, M anncr, ID 1045 then into long ad string. Freq and TC. Station promo to 1100 and then UTE came on freq. (Nathan Murff, NM 8-9)

**BRAZIL** R. Nac. de Tabatinga, 4815, presumed, in SP 0010. Often stating "desde Brasilia." Tabatinga is near the Peruvian and Colombian borders; does the stn have SP prgms? Faded by 0045. (Tindall, NC 8-17)\*\*\*A good question. Desde Brasilia implies a national prgm and there have been some recent expansions of network prgms for the RNac group. I have no specific knowledge of SP prgms here, though. Also, R. Guatapuri Colombia has been active on this freq again. More checks are needed. tba\*\*\*R. Anhanguera, 4915, in PT 0135-0204+. Religious prgm w/ mx in background 0135, apparently about peace and war. Quoted Einstein and mentioned Armageddon. ID, freqs 0204 and then mx. (Tindall, NC 8-16)\*\*\*Very strong here of late. tba\*\*\* R. Nacional da Amazonia, 6120, in PT 0758-1005. RNac AM talk and mx prgm w/ M&W anncrs. Many ads for Brasilia businesses. TCs for Brasilia, and gave stns in network on hour. "A voz do Brazil." Excellent till QRMed 1000. (Murff, NM 8-16)---Same in PT 0950-1020; absolutely killer signal when first noted w/ ad strings, seemingly syndicated Radiobras prgms, RN Amazonia ID w/ freq (only caught 15445 but did mention at least one more) and usual list of net stns at 1000. Into "Jornal Nacional, w/ El Mundo clearly audible underneath. It finally surfaced by 1005 and then stns traded the freq. (Dan Sheedy, CA 8-17)---Same as unID 0915 w/ ad for Banco do Brasil, mx and all very good. (Tindall, NC 8-16)

**CUBA** Mayak, 4765, in RS 0130-0200; classical mx, anncmts, RS talk after 0130, easy listening mx after 0200. (Tindall, NC 8-16)

**ECUADOR** R. Quito, 4920, in SP 0157; ballads and soft rock, ID. (Tindall, NC 8-16)

**FALKLAND IS.** FIBS, 3958, tentative in EG 1048-1118. Usual eclectc pop/MoR mx prgm. GMT-4 TCs. Missed ID on hour, if any. M inserted "time in Stanley, 7 o'clock exactly in BBC WS nx. Nx to 1115 and then weather. Signal fair to good but dying rapidly after 1115. ARO QRM too but still a real treat to hear. (Sheedy, CA 8-17) 1

**KOREA (DPR)** Pyongyang, 3560, in EG 1145-1215. M&W anncrs, EG prgm for SEAsia. Usual "Praise the Great Leader" format--praise and patriotc mx. (Murff, NM 8-10)

**NICARAGUA** R. Zinica, 6121a, in SP 1158-1215; good ID for Sandino, into news program with heavy emphasis on US/Nicaraguan relations. Used "R. Sandino voz de vanguardia" at 1206. TCs nearly every minute. Never did hear a Zinica ID. Is this a nationwide prgm at this hour? (Sheedy, CA 8-17)

**PERU** R. Tarma, 4775, in SP 1102-1115; M anncr, s/on anncmt, gave MW freq as mil kilociclos. M anncr w/ Peruvian mx prgm. Freqnet ads. (Murff, 8-9)+++R. Huancavelica, 4885, in SP 1115-30; M anncr, local mx. Many IDs and TCs. (Murff, NM 8-10)+++R. Vasion, 5360, in SP 0345-0403\*. M dj, latin ballads and US pops. Full ID and NA 0400. (Murff, NM 8-16)

**USSR** RM HS, 5040, in RS 0200. Presumed tbilisi. Much QRM. IS, but nothing else audible. (Tindall, NC 8-16)

\*\*\*\*\*

In the scan slot we return to Takayuki Inoue's report from Japan:

**Costa Rica** R. Reloj, 6006 in SP 1000 7-31; poor. LA pops and TC/ID. Nice ID "Desde San Jose, Costa Rica America Central, transmite Radio Reloj, 730 kHz onda media, 94.3 MHz frecuencia modulada, 6006 y 4832 kHz bandas de 49 y 62 metros. Telefonos 224344 y212470. Apartado postal 748, San Jose, Costa Rica, America Central. R. Reloj, numero 1 en Costa Rica. Gracias a Ud."  
**Nicaragua** LVNicaragua, 5949.5 and 11714.4, in SP fair \*1050v-1130 f/out daily. IS and many canned IDs. Slogan is "una voz libre en America."

**Peru** R. El Sol en los Andes, 3230, in SP poor-very poor in late July. OA mx and talk byM.  
---- R. LV de la Selva, 4825, in SP \*1000v-1100 fade out. S/on w/ NA & prgm "Musica Folklorica de Nuestras Andes." Nice Canned ID 1000: "Esta es la Voz de la Selva. 770 kHz Amplitud Modulada y 93.9 MHz Frecuencia Modulada."  
---- R. Sicuani, 4827.3, in Quechua and SP 1000-1030; poor 7-20. Nice folklorico and many ads. ID: OAX7T, 4835 kilociclos banda de 60 metros y onda corta QAX7R, 1995, banda de 225 metros onda media. R. Sicuani. Slogan is LV de Canchis.

\*\*\*\*\*

We continue with Takayuki's fine report next issue.

Until then, best 73. *BA*

# LOG REPORT

## section A

2000 to 4899 kHz

Editor: Dr. S. David Klein, 642 Cranbury Cross Road, North Brunswick, NJ 08902

On to a very special column...

- 2380 BRASIL R.Educ. Limeira; 0157 Sevl ann in PT, ID, TC. f(Barto 7/23)
- \*2380 FALKLAND ISLANDS FIBS; 0105 EG BBC musical quiz show to 0120, into lite mx to 0140 f/out. Started f but started fading 0121, worthless by 0137. (McDaniel 8/14)
- 2610 BRASIL Unid; 0047 Sta playing US pops w/ads, M reading record title in PT. Left this to hear Falklands. (McDaniel 8/14) Shawn, believe it or not, there are those who would have stayed with the Brazilian...including me!--adk
- \*2420 BRASIL R.Caraja; 0201 Inst mx, vocals, PT ann, ID, ment of Goias ans what sounded like a nx px at 0201. f/g(Barto 7/23)
- \*2420 BRASIL R.São Carlos; 0908 Clear ID and sevl ments of São Paulo, ballads, and PT M/ann. wk but in clear(Barto 8/4)
- 3020 UNID 0046 Time sig sta, no ann. vy wk. (Meyer) 1025 Pips & SP ann. wk(Hensley 8/8) This is quite possibly a harmonic of HD210A on 1510--adk
- 3220 ECUADOR HCJB; 0132 EG ID by M, W w/interview show, p thru QRN. (Gilster 7/27) 0943 EG px called Discovery, foll by rel px. On the hr, EG ID w/fqys, but didn't ment this one. g(Bolland 7/28) 0950 Lang M w/tlk, mx, ID. g(Bobb 7/8)
- 3222 TOGO Lama Kara; 0520 OC into drum & bell IS, NA, ID 0529, nonstop Afro vocals right thru 0548 t/out. (McDaniel 7/12)
- 3225 VENEZUELA R.Occidente; 0140 Ads, TCs, LAM mx. p thru QRN(Gilster 7/27)
- 3230 PERU R.El Sol de los Andes; 1054 OM tlc & ID, jingle, ad, ann about local dance that night. f(Moore-HOND 7/22)
- 3230 SOUTH AFRICA R.RSA; 0305 M w/EG lcl & wld nx. heavy QRN(Bobb 7/13)
- \*3239.6 ECUADOR R.Cult. Antena Libre; 0105 Uptempo SAM ballads w/tlk by M betw 0000. Full SP ID 0111, foll by more mx. f(Bolland 7/27)
- 3250 HONDURAS R.Luz y Vida; 0058 Strong w/SP rel mx & Bible verses by M. (Meyer)
- 3255 VENEZUELA LV de El Tigre; 0110 Usual criollo mx w/ID by M, into lost of tlc. wk under lite QRN(Meyer) 0240 OM vocal mx, F/ann w/tlk, ID, more mx. p(Jordan 7/9)
- 3360 ECUADOR LV del Rio Carrizal; 0140 Ballads, many ads for "La Cooperativa" store that sells just about everything by the sound of it. (Moore-HOND 7/27) 0120T Wk Lam sta, HC style mx, no ID. (Meyer) Same. p(Bolland 7/18)
- 3270 SOUTHWEST AFRICA SWABC; 0035 Mx to 0047 tlc by M foll by more mx. f(Bolland 7/15) 0118 Variety of mx incl electronic. //3295. (Johnson 7/12)
- 3275 VENEZUELA R. Mara; 0305 LAM pop mx, ballads, OM/DJ, ID every 2 sels. f/p(Jordan 7/9) 0315 LAM pops, OM/ann, sevl ID. f(Desrosiers 7/16) 0317 Mx to 0328 ad string, 0330 ID, more mx, 0352 harp mx, s/off ann, NA, 0354\*. f/g(Stephany 7/9) 1010 Long tlc by OM, one LAM song, ID, more tlc. (Hensley 8/8)
- \*3277 JAVA RRI Jakarta; 1150 F DJ w/IN vocal mx, 1258 ID, SCI, nx. (Murff 8/3)
- 3280 ECUADOR LV del Napo; 0036 LAM slo mx w/usual flutes, etc., vy wk but still good on rare QRNless nite, ID, TC. (Meyer)
- 3285 UNID 1030 Something here w/Andean mx in mornings before Belize OC comes on at 1045-1100. vy wk, but daily. (Moore-HOND)
- \*3286 PHILIPPINES Phil. R.; 1202 M/ann in EG w/nx, ment Indonesia, Philippines, and PNG. Gave So. Pacific wx, then into tlc & mx px, IDs as "This is the Philippines broadcasting from Manila." Ute on fqy, p but readable. (Murff 8/3-4)
- 3288 MADAGASCAR Antananarivo; 0315 In what sounded like FR but could have been a dialect. Clear ID by YL 0316. Heavy QRN(Barto 7/19)
- 3295 BRASIL R.Tspuio; 0120 Clear ID, PT pop mx, ad. Noted another sta underneath which might be SWAfrica. f(Klein)
- 3295 SOUTHWEST AFRICA SWABC; 0105 AK ID by M into long tlc by M, some strange EZL mx for 10 mins, rather good sig. (Meyer) 0200 //3270, this one usually in earlier and the stronger of the two. (Barto)
- \*3310 BOLIVIA R.San Miguel; 0026 M & W w/tlk using reverb mike foll by mx. Was foll by a lengthy talk on what seems to be the reason that R. San Miguel is on the air. Hrd many ment of Sabado, sugg that this is wknds only. Later on, comments were rel. Tnx tip Wilkner. (Bolland 7/10) 0130T M/voc sel, ment Bolivia, tlc by W. vy wk w/heavy QRN(Barto 7/9) 1015T LAM mx sung by groups & ann by W. f sig, could pick out a few SP words but no ID. (Lazarus 8/12) 1030T Noted daily w/ballads & Andes mx. Presumed as never strong enough for ID. (Moore-HOND)

- \*3910 PERU R. Bagua; \*1052V Short interlude of violin mx foll by full ID by M, OA NA, and px of OA mx w/tlk by M to f/out. Opening ID includes words: "OAX??, mil dos cientos...onda media, OAX??, 3310...onda corta, Radio Bagua, la señal..." Many thanks to Jack Jones for tip. (Lazarus 8/10, 11, 13)
- 3316 ECUADOR R. Pastaza; 0303 Andean mx w/OM ads, IDs, TCs, then solid block of tropical mx to 0341, more ads. (Moore-HOND 7/23) 0325 LAM & HC mx, singing ID. wk tho readable (Meyer) 0400 Soft inst LAM mx, ID by OM. f (Atkins 7/12)
- \*3930 PERU Ondas del Huallaga; 1045 Andean mx, ID 1050. f/p (Moore-HOND 7/21)
- \*3339 ZANZIBAR RTZ; 0310 Lcl mx, many ann by M in SH. wk but clear (Barto 7/19)
- 3365 BRASIL R. Cult. Araraquara; 0213 M DJ w/50's style LAM mx, freq ments of Araraquara, IDs. (Murff 7/24)
- 3966 GHANA Accra; 0537 Long simple drum mx w/occ lite chanting by M to 0555 tlk & EG ID. p/f (Meyer)
- 3375 BRASIL R. Nal São Gabriel; 0948 In with a list of stations on the network by M, then into mx. f (Bolland 7/27)
- 3381 ECUADOR R. Iris; 0131 Rel mx into tlk by M and end of px 0145, ID by M, f/p (Meyer) 0330 LAM mx, EZL mx, OM/ann, fast IDs. f/QRM (Desrosiers 7/16)
- 3385T NEW BRITAIN RENB; 0950 M in PD w/Sun eve rel px, gospel songs. 1030 pop tunes. Heavy QRM (Bobb 7/31) 1018 M/ann in PD/EG w/mx sels. wk (Barto 8/6)
- 3394.5 ECUADOR R. Zaracay; 0031 F/ann w/tlk, ment various localities around the area to 0045 mx. f (Bolland 7/11) 0355 Pop mx, some in EG, ID, QTH by OM, tlk by YL. f (Desrosiers 7/16) 0410 F/voc mx, SP tlk. vg (Lineback 7/11)
- 3476 BOLIVIA R. Padilla; 0117 F/ann in SP, some spot anns by M, LAM mx, ballads, many vocals, TCs, sevl IDs. (Barto 7/9)
- 3480T BOLIVIA R. Padilla; 0036 Just cont tlk by M to 0057. p (Bolland 7/10) Seems to be drifting around a bit--sdk
- 3560 NORTH KOREA Pyongyang; 1145 M & F/ann in EG w/px for SEAs, usual praise for the great leader, played a little patriotic mx. (Murff 8/10)
- 3925 JAPAN NSB; 1029 A few notes of mx, but mainly JP tlk by W, //9595. f (Bolland)
- 3938 TRANSKEI Capital R.; 0411 All pops, upbeat cmcl format, contests, pretty far gone by 0500. Finally a decent log from this! (Berg 8/14) 0448 US pops, wk report, ID 0453. (McDaniel 8/2)
- 3945 VANUATU RV; 0836 FR tlk by M & YL, //7260 about equal. f/QRM (Meyer)
- 3955 ENGLAND BBC; 0444 EG by radio, switch at 0445 to GM. f (Desrosiers 7/10)
- 3958 FALKLAND ISLANDS FIBS; 0900 NX, POP MX, SOME UPBEAT TUNES, INSTS, TCs, AND SEVL IDS. WK TO F (BARTO 8/4)
- 3970 CAMEROUN Buea; 2245 Surprised to have this at both a decent level and free of AROs. Runing lcl px of pseudo-hilife mx, OM px host (why do most of these anns sound like they're broadcasting from the other side of the grave?). (Klein)
- 4000 CAMEROUN Bafoussam; 2240 Noted w/slight QRM off AROs, carries lcl px at this time, Af chanting w/drums, OM/annin vernac. (Klein) 0457 FR tlk by M, 0500 ID, EG & FR nx headlines fm Yaounde. (McDaniel 8/1) 0530T OM w/FR tlk, hrd ment of Cameroun. p (Desrosiers 7/10)
- 4300T PERU R. Moderna; 0140 Ment of Peru, OA mx, TCs, etc, but no ID. f (Meyer) 0210 Presumed w/ballads, strong but UTE QRM (Moore-HOND 7/21)
- \*4420.4 BOLIVIA R. Reyes; 0112 LAM mx, sevl M/voc, IDs, nice inst mx. vy clear (Barto 7/9) 0022T Strong betw SP SSB net, EZL ballads, M w/TC & poss ID. (Krueger 7/18) 0240T Ballads, inst mx, nonstop to 0303 OM w/tlk, Koed by UTE 0304 f/p (Moore-HOND)
- \*4473.2 BOLIVIA R. Movima; 0020 Fair & clear using ECSSB w/ballads, SP M ID/TC, back to mx. Regular for the past few months. (Krueger 8/1) 0100 Sevl vocals, flute mx, ID 0100. Heavy UTE QRM (Barto 7/9)
- 4485 ARRSFSR Petropavlovsk-Kamchatskiy; 1042 M & W in RS, appears to be a radio drama or documentary. f (Bolland 7/7)
- 4501.8 UNID 0030 LAM w/non-descript ballads, wk & difficult due to UTEs. May be fundamental or harmonic of 750, 900, 1125, or 1500 kHz. (Krueger 8/1)
- 4607.4 UNID 1118 Very poor sig w/deep fades. Seemingly pop mx w/M/ann betw seis. Suspect RRI Serui but too wk to copy for sure. (Reinstein 8/15)
- 4635 TADZHIKISTAN Dushanbe; 2318 IS type mx to 2320 foll by ID by W & then alt tlk by M & W. 4610 & 4485 also in. (Barto 8/7)
- 4656 ECUADOR CRE; 0200 Many canned IDs, few TCs, usual LAM pops. g (Meyer)
- 4696.7 BOLIVIA R. Riberalta; 0100 Cmty or polit tlk in SP. Unusual-was // Abaroa on 4720. Expected other Bols to be same, but these two were the only ones. (Barto 7/9) 0145 Huaynos, mostly EZL, ID by YL. f/p (Meyer)
- 4719 BOLIVIA R. Abaroa; 0222 Nice Altiplano mx w/occ anns w/lcl saludos, slogans, TCs and IDs. Who says no goodies in summer? [Not I!] g (Stephany 7/9)
- 4719 CELEBES RRI Ujung Pandang; 1018 EZL IN mx, Judy Collins sel, ID by W. g (Barto 8/5) 1045T M w/IN tlk, laughing, W w/ment of Indonesia, QRM off UTE. (Bobb 7/13)
- 4925.6T BURMA BBS; 1133 In with carrier to 1142, when weak sig w/music noted. This path not ripe yet. p (Bolland 7/30)
- 49740 BOLIVIA R. Mamore; 0031 Mix of huaynos and LAM pops, ID by M 0038. p level w/lite QRM on good LAM nite. (Meyer) Kevin, what do you have against dates?--sdk

4760. CAMEROON Bertous; 2305 Tail end of EG mx, off a few minutes later after FR ID and NA. (Berg 8/13)
- \*4755 BOLIVIA R.Emis. Bolivia; 0944 TC and ID, mx. 1059 Ann back w/tlk on px to be brd Saturday at 5. After this, back to mx. p(Bolland 7/13)
- 4755 PERU R.Huanta; 1015 YL vocal Andean mx & tkl. f/g(Moore-HOND 7/15)
- 4760 SWAZILAND TWR; 0420 OM rel tkl px. f(Lineback 7/14)
- 4762 PERU R.Inca; 0440, O/A flute sels, M/ann w/clear "R. Inca" ID in SP, still on at 0530 recheck. f(Klein)
- 4765 BRASIL R.Nal. Cruzeiro do Sul; 1009 M w/tlk & morning mx. p(Bolland 7/26)
- 4765 CUBA Mayak; 0145 Usual RS mayak px of tkl & lite mx. f/g(Jordan 7/17) 0259 Mayak IS, time pips, tkl. vg(Alexander 7/16) 0400 Same. vg(Valko) It looks, unfortunately, as though this is here to stay for a while--sdk
- 4765 LIBERIA ELWA; 2220 EG gospel songs, 2224 ID, sermon. f(Enkenhus 7/28)
- 4770 NIGERIA Kaduna; 2340 Mx w/M DJ, mx 0000 ment candidates of Unity pty of Nigeria. f(Enkenhus 7/28) 0430 EG natl nx, cmty, tkl on voting regs. f(Fye 8/5)

At the beginning of the column, I said it was special and so it is. We've had a mighty fine turnout given that it's the middle of the summer! It is also special, for me, in that it marks my 18th column; I find it almost impossible to believe that I have been doing this for a year and a half. I guess that what they say is true...time does fly when you're having fun! It's been that, and more.

This has also been a bittersweet column for me because it is my last. When I took the column, I told Bill that I'd do it as long as I could, but that if I ever felt I could no longer give it my full effort, I'd give it up. My intention was to remain as editor for a number of years. At that time, a year and a half ago, I had no idea that within a year I'd be directing the publicity efforts of a major scientific meeting, yet that's exactly where I find myself. That activity had greatly cut into the time I have available for hobbies...or for editing a magazine column. I find it most regrettable, but have come to the conclusion that I can no longer give the column the kind of attention that it deserves, and that being the case, the time has come to pass on the reins to someone who will be able to devote to it the effort that is required.

Having seen this coming a few months ago, I was able to make arrangements for a new editor, someone who will do a super job. He is Mike Nikolich of Chicago, a well-known and competent DXer, who is also very experienced at editing a DX column, having done one in another bulletin for a number of years. Mike will be taking over next month...I hope that you will support him as you have supported me. His address is: 2137 West Farwell Avenue, Chicago, IL 60645.

Over the course of my 18 month tenure, there have been high and low spots, as there are with anything. Of all that has transpired, I am perhaps most pleased by the fact that in editing the column I have come to better know many of you, to the point where I now call some of you friends. It is perhaps one of the most rewarding, yet little known aspects of editing, and I'm pleased that I've had the chance. While my time is limited, I will still be around, not editing, perhaps, but as a contributor...I am not leaving the hobby, as many former editors do, having pushed themselves to burnout; this is more in the nature of a sabbatical.

And so we come to the close. I can think of no better way to end than...  
Until we meet again, hasta luego, até logo, à bientôt, and 3's & 7's.

Fry: dlw. Expect reception improves to the west w/less QRM -ed.

Didn't quite make three pages and I was hoping to go for four! But with your help this situation will definitely change! If you think your loggings will not make the Distribution Editor's deadline of the 5th, please feel free to send them directly to me at the address above, with the usual proviso that this way you won't appear on the Credits page if nothing was sent to the DE that month. 73,

# LOG REPORTS

## section D

11700 to and above

Editor: Brett Saylor, P.O. Box 10, Whitehall, PA 18052

**NOTICE:** When sending in loggings, please try to only send the most recent ones. I often receive ones which would be over 3 months old when finally published. Since I usually run short of space, from now on any loggings more than one month old will be discarded. Sorry if this sounds harsh, but old DX news really isn't news! Thanks for your support.

#####

From Dave Walcutt:

Per August FRENIX, the item listed as ZAIRE on 15350 is actually Radio-Télé Luxembourg.

Thanks, Dave. Remember to send your most recent loggings into LR-D. 73's and gud DX!

*Bob*

## FRENDX

Nick Pappas, 251 S. Olds Blvd., Apt. 243 Fairless Hills, PA 19030

Welcome to the September '83 edition of FRENDX, and thanks to the following forty-eight members for their contributions:

Brian Alexander, Mechanicsburg, PA; Kevin Atkins, Birmingham, AL (R390A, SX110); Ray Bauernhuber, Rosedale, NY (RF2800); Marion Blanchette, Thonotosassa, FL (DX100, RF260, R600); Norman Bobb, Minneapolis, MN (R600, XCR30); Charles Bolland, Lakeworth, FL (Icom R70, FRG7000); Richard Cassidy, Kennebunkport, ME (R1000, ICF2001); Larry Cunningham, Columbus, OH; Richard D'Angelo, Wyoming, PA; Richard Dickson, Loveland, OH (DX302, XCR30); John Dillaman, Centerville, OH (R70); Don English, El Paso, TX; Kurt Enkenhus, Silver Spring, MD; John Fisher, Chelmsford, MA (GPR90); Bob Fraser, Cohasset, MA (XCR30); Del Fye, Miami, FL (R7); Paul Gilster, Raleigh, NC (R70, ICF2001); Reza Hakimnezhad, Tuscon, AZ (FRG7700); Michael Hawk, Hampton, VA (GE World Monitor II, XCR30); Hans Johnson, Kingswood, TX (FRG7000, RF2200); Brian L. Jones, Houston, TX; Rufus Jordan, Pittsburgh, PA (DX302, Zenith Transoceanic); Kraig Krist, Falls Church, VA (FRG7700); Terry Krueger, Casleberry, FL (R70, RF4900, RF2900); Arnold Lavsevich, Milwaukee, WI (HQ180C, RF4800); Jerry Lineback, Conroe, TX (R7); Christopher Lobdell, Stoneham, MA (FRG7000, HQ180AX); Rick Lucas, Stockton, CA (R1000); Bill Mayer, Allentown, PA (DX200, TCS12); Tom Mazeltine, Seattle, WA (FRG7, ICF5900W); Shawn McDaniel, Rolling Prairie, IN (DX150B, SB5); Fritz Mellberg, Hawarden, IA (RF2900, R70); Don Moore, Santa Barbara, Honduras (FRG7mod, ICF7600A); Dale Park, Honolulu, HI (ICF6700W); Sheryl Paszkiewicz, Manitowoc, WI (DX302); Wilder A Pickard, Evanston, IL (R7, XCR30); Stewart Reed, Baton Rouge, LA (FRG7mod, R70); Betsy Robinson, Clinton, TN (ICF2001); Bryan P. Sharpe, Castro Valley, CA (DX302); Rob Sobkoviak, Plainfield, IL (GE World Monitor II, DX200); Trevor Stanley, Flagstaff, AZ (NRD515); Nolan Stephany, Williamson, NY (R392); Steve Summers, Mechanicsburg, PA; Dave Valko, Dunlo, PA (DX160, FRG7); Terry Weinholt, East Earl, PA (R1000); Eric Witzig, Annandale, VA (R1000); Bob Woods, Front Royal, VA (RF4900); Robert Zilmer, Rio Rancho, NM (R1000, ICF5900W).

Looks like many of us are escaping the summer heat by turning on our air conditioners, and at the same time, our radios.

Special welcome to new member Josh Gaffin of New York.

As always, thanks to everyone who has taken the time to contribute. Deadline for next month is the twelfth.

Until next month, 73's and good DX,

*Nick*
