Relay Broadcasts via Canada Starting on October 1st, to Improve Reception Conditions in North America

Radio Japan plans to lease the transmission facilities of Radio Canada International in Sackville, New Brunswick, Canada, in order to relay its broadcasts to North America. The contract with RCI is expected to be signed by the end of August or early September, and the 200kW transmissions, which will be for one hour for both the English and the Japanese programs, are scheduled to start on October 1st this year.

At present, Radio Japan broadcasts to Europe, the Middle East and Africa are relayed via Gabon in West Africa. As remarkable improvement has been achieved by the Gabon relay, the planned relay via Canada is expected to improve reception conditions in North America, including New York, Washington, and other big cities on the East Coast of the United States.

RADIO JAPAN

NO COLLECT CALLS ON THESE ADS, PLEASE.

FOR SALE: Yaesu FRG-7000 digital receiver, 250 kHz-29.9 MHz. With manual, \$285.00. Yaesu FGR-7 receiver, 500 kHz-29.9 MHz. With Gilfer modifications, GAR-7 digital readout, and manuals, \$250.00. Pearce-Simpson VHF marine transceiver Lo-Hi power crystallized for Ch's 6-16-22-26-68 and two Wx channels, \$150.00. All are in excellent working condition and prices are negotiable. Money orders only. Abe Lewkowicz, 13 Blanchard Road, Apt. #1, South Weymouth, MA 02190. Phone (617) 331-5500 after 2200.

FOR SALE: Collins R-390A in excellent shape. Extra tubes and ten issues of Hollow State Newsletter. Price \$250.00 plus shipping in two boxes by UPS. ALSO: Palomar Loop Antenna for medium wave DX, \$65.00 plus UPS shipping. Fritz Mellberg, 1505 Central, Hawarden, IA 51023. Phone (712) 552-2458 evenings.

FOR SALE: Yaesu FRG-7 modified with 3 kHz filter by Gilfer. In mint condition with manual. \$200.00. Icom GC-4 world clock, \$50.00. Dentron Super Tuner, \$100.00. Stephen Leite, 190 Healy Street, Fall River, MA 02723. Phone (617) 675-2830 from 2100-0200 UTC.

FOR SALE: Sony ICF-6700W, \$150.00. Customized Beam Headings (from/to) and distances (MI/KM) to over 355 WRTH transmitter sites. Useful in picking alternate transmissions and selecting listening times based on distances. ITU Country Codes included. Send your location/coordinates, \$5.85. Gilfer Confidential Frequency List, 5th edition; Guide to RTTY Frequencies, 2nd edition; FRENEX, complete '84 or '85, \$5.00 each. All items include shipping. Chasiers check or money order, please. Al Drehmann, Route 1, Box 3B, Tryon, NC 28782. Phone (704) 894-3398.

WANTED: Issue #72 OF Glenn Hauser's R.I.B. (Jan. 83). Will buy or copy and return to you. John C. Schmid, P.O. Box 86, Line Lexington, PA 18932.

WANTED: Hallicrafters S-41G Skyrider Jr. receiver with gray cabinet, circa 1940s, operating or non-operating but visually clean and complete.

FOR SALE OR TRADE: Hallicrafters Skychampion receiver, more than 40 years old, \$33.00 includes shipping. Hallicrafters S38-D receiver, more than 25 years old, best offer to include shipping. Admittedly not DX machines, they operate and look great in a shack, particularly the quain Skychampion. I ran out of room and something has to go. Don Jensen, 5204 70th Street, Kenosha, WI 53142.

FOR SALE: Regency HX-1200 portable scanner in excellent condition with all original accessories plus mobile adaptor/charger and copy of "Monitor America" book. Price \$175.00. ALSO: Yaesu FRA-7700 Active Antenna in excellent condition with original carton. Price \$35.00. ALSO: Kenwood R-11 portable SW radio in excellent condition. Price \$40.00. Gary Russo, 2565 East 1st Street, Brooklyn, NY 11223. Phone (718) 339-3587 evenings.

1987 World Radio TV Handbook

The 1987 WRTH will be published in Dec. 1986 or Jan. 1987 and retail at approx. \$21.95;

prepublication orders are being taken at \$14 Book Rate or United Parcel Service (please specify) in the USA only. CA residents, please add 84 cents sales tax. For First Class Mail, please add \$2.

The deadline for this special price structure is 20 September 1986. Thereafter, until further notice, the price is \$17 for Book Rate or UPS; First Class Mail will be \$20. Orders, with check or money order payable to **CENTURY PRINT SHOP**, should be mailed as early as possible to: Century Print Shop, Don Erickson, 6059 Essex St., Riverside, CA 92504-1599. (Please mention your club affiliation or source of info when ordering). Inquiries welcome at (714) 687-5910. Back copies of WRTH, 1981 through 1984, may be ordered at \$12 ea., 2/\$21, 3/\$29, 4/\$36, mix or match years.

Editor: Stephen G. Moye, 178 Bartlett Ave., Cranston, RI 02905 Phone: (401) 941-6497

The Northeast is, as I write this, being treated to an ugly and oppressive bout of hot and humid weather. Even listening to the radio is an unpleasant occupation: after a moment or two, you find yourself wrapped in a pall of heavy, dead air; perspiration is cascading down your back; and atmospheric interference is making even the international broadcast bands sound like the 120mb on a bad day. Well, if this is the case as you're reading this, go sit in a nice, cool, and breezy place and mull over the interesting letters that we've received this month...

Robert Horvitz (ANARC Government Affairs Liaison, 1634 15th Street NW, Washington, D.C. 20009; (202) 232-3677) has again thoughtfully provided us with a press release (dated 23 June 86) dealing with the latest position taken by ANARC with respect to the recent modifications to the **Electronic Communications Privacy Act-1986**(ECPA-86):

In a brief and sparsely attended session today, the US House of Representatives, by voice vote, passed HR4952, ECPA-86. There was no debate, and no amendments were offered from the floor.

The bill had been favorably reported out of the House Judiciary Committee on 10 June, on a vote of 34-0. The Subcommittee on Courts, Civil Liberties, and the Administration of Justice, chaired by Rep. Robert W. Kastenmeier, developed HR4952.

Senator Patrick Leahy has introduced an identically-worded bill, S2575, for consideration by the Subcommittee on Patents, Copyrights, and Trademarks. A Subcommittee aide "expects it to move pretty quickly," with a mark-up session likely sometime after July 14th, following Congress' holiday recess.

The Association of North American Radio Clubs opposes the radio provisions of the bill. By absorbing radio into the larger legal category of "electronic communications," and making it illegal to "intercept" electronic communications except for the types specified in HR4952, the bill would overturn a fundamental assumption that has governed radio reception since the first radio law was passed in 1912: that is, if someone can receive a signal in their home, they may do so. The ECPA-86 would make it a crime to detect some of the signals passing through our very bodies, by declaring them to be not "readily accessible to the general public," even though in fact they are readily accessible.

The Justice Department has indicated that enforcement of the radio provisions of the bill would be virtually impossible, except in cases of egregious violations. The FCC (which was not invited to testify on the House bill) has suggested that the Communications Act of 1934, which permits reception but not divulgence or beneficial use, is an appropriate standard for the protection of communications when the method of transmission itself makes the communication available to anyone within range.

Also vigorously opposed to the bill is the Communications Security Association, which says that it is "ludicrous" to think that an unenforceable law can have any deterrent effect.

My thanks, again, to Robert Horvitz and all others involved for their hard work on our behalf. Were you struck, as I was, by the observation that the FCC was not invited to testify? Surely, the FCC is ideally situated to view this problem most clearly and offer the most telling opinions concerning any piece of communications legislation. It sounds to me like somebody's mind is already made up, and they don't want to be bothered by facts...

I am very pleased that Mike Nikolich's portable transmitter idea has been greeted with such enthusiasm.

From Nelson George (Fayetteville, North Carolina) comes the following letter and suggestions:

rich man. Indeed, but as much as you can from the common people. the your money is going directly to the base people of the economy, not the local (or foreign) the hotel gift shops. You're not only getting a better price (allowing you to buy more), but those of an American owned multinational. Buy your handicrafts in the local markets, not and restaurants. Their profits are more likely to be reinvested in the local economy than money as possible help the poorer people. I have a few tips. Patronize locally owned hotels

If you're making a trip to a Third World country and want to see as much of your accompanied by a visit to a SW broadcaster. could eventually bring in more, especially among SWTs who want a foreign vacation extra tourists a year. It will help to keep some local people in their jobs. I have a feeling it themselves as tourist destinations. Shortwave can do that. Even if it brings in only a dozen nations do not need SW for domestic coverage. But they do need cheap ways of publicizing development in large part, and sometimes almost exclusively, on tourism. These small

However, most of the Caribbean islands have been basing their future outside our realm.

markets for their agricultural produce are the best ways, but that's large scale and building a factory or helping to develop new in making the population dependent on handouts and undercutting the local farmers. The key saying goes: "If you give a man a fish, he eats for one day; if you teach him to fish, he a large maintenance problem (my field was nutritious). I think I can say yes, it is. An old apparently it is the least of their needs. Having worked in an underdeveloped country with supply a third world nation, or presumably hungry people, with a radio transmitter when last several months. One theme which has started to come up seems to ask if it is moral to

It's been interesting to follow the buy-a-transmitter debate in FENDEX over the

I will return to Nelson's proposals in a moment after we have taken a look at two more letters on the same subject. Both letters deal primarily with the original stationery transmitter concept, but also offer a lot to think about regardless of the transmitter format. The first comes from Don Moore (Glendale Heights, Illinois):

just as difficult as our own FCC).

Virginia Islands or Puerto Rico for a shortwave broadcast — some other countries could be dictate our choice of countries for the project (I notice that nobody has suggested the U.S.

The last thought I had before we go galavanting off to do radio transmissions for a foreign our broadcast team to foot the entire bill for all that "fun in the sun" can we?

Third, get some subscribers to pay for part, or all, of this project. (Can't expect actual broadcasts.

Second, get together a team willing to make the trip and conduct or coordinate the Bureaus, etc. of those countries.

own State Department before we go galavanting off to do radio transmissions for a foreign countries to get their ideas of such a project. It also might be a good idea to check with our

get started on the project soon — else we will still be talking about it into the next

et al — they can probably do a better job than I or putting it into words. But, we had better project, whatever form it takes. I'll leave those reasons to Messrs. Nikolich, Palmersheim,

The Caribbean, for various reasons, does seem to be the choice area for the had much less incentive for a shortwave broadcast than our Caribbean nations do.

persuaded Radio Syd in Gamble to return to shortwave for a time, I'm sure that Radio Syd The idea is feasible — I recall that a while back one of the Scandinavian clubs

everyone) had already considered and rejected the idea. Perhaps I was wrong.

more experienced and knowledgeable than I (that category should include just about DXpedition type of solution. But when nobody advanced the idea, I concluded the Daxers

Bishops' idea first surfaced in the January CONTACT. I immediately thought of the What surprises me is that nobody had advanced this proposal before now. When Gerry

like Nikolich seems to have the correct solution to the "transmitter" proposal.

A few other comments. One member suggested putting out feelers to our State Department and suggested Grenada as a possible site. No, let's keep this nonpolitical. Our State Department need not have anything to do with the project, and donating a transmitter to Grenada could taint the project in the eyes of the countries that do not agree with U.S. actions there.

I liked Mike Nikolich's idea of a travelling transmitter. It would provide a lot of new DX targets. However, I think the amount of paperwork involved would be horrendous. First you have to convince the local version of the FCC to grant you frequencies. Also convince everybody that you're not a part of a CIA plot. Arrange to bring the transmitter through customs. Just because the station says that everything is ready for you to come, doesn't mean they've taken the time to check into those things. Third World bureaucracies can be mindboggling!

Finally, a letter from Sam Alcorn (Maplewood, New Jersey) with a number of issues we'll have to address:

Ever since Gerry Bishop suggested supplying a transmitter to a country or organization I've been dreaming about chasing the likes of Bermuda, Jamaica, or Grenada on shortwave. I've thought about the British and U.S. Virgin and St. Kitts as well. I, for one, would like to see it happen.

I don't care which country gets the transmitter because I think if one country can prove that it helped to attract tourist dollars, others may begin thinking that a shortwave station is just as important as advertising in the Sunday newspaper travel section. But it has to be proven a useful tool in attracting tourism. Maybe the Curaçao Tourist Board can provide data as to how its advertising on R. Earth contributed to Curaçao's economy.

Let's keep the programming simple. Rebroadcasting a few hours of the local commercial broadcaster's program each evening with appropriate ID's at the start and conclusion of each broadcast will save production costs and eliminate headaches that go along with creating another broadcast. And, after all, it is the local flavor we shortwave listeners want most. I don't care about slick programming. Let me know the local news, weather, politics, and music. (That's why I like R. Cayman 1555kHz, and R. Grenade 535kHz, so much.)

Funding is a real stickler. Perhaps with the Caribbean Basin Initiative someone can coax the money from Uncle Sam, or pick up used equipment from the government. Maybe the project could be implemented with assistance from U. S. military personnel (they put R. Grenade back on AM again), the Peace Corps or one of the missionary groups in the region. (If a missionary group is involved, I suggest that the facility not be used to broadcast religious-type programming. You can hear enough of the Gospel elsewhere on the dial.)

Another funding source might be hobbyists themselves. As the Reagan Administration has argued, let those who use the facilities pay for the facilities. If ANARC can convince member organizations like NASWA to add \$1 or so to each subscription or membership, I'm sure enough cash can be raised for a transmitter. If not, why not ask the equipment manufacturers or suppliers who profit from the hobby to put something back in the way of a no-strings-attached donation?

There's been enough talk about the idea. Let's do something about it. Count me in for support and letter-writing.

Well, in view of the issues raised by these, and all of the previous, letters, perhaps it is time to begin to establish some goals, priorities, and to begin to fix the principles on which this project should be based. Here goes:

\$1. This project should be as independent as possible from non-radio/SWL organizations: our purpose is to help the country/organization with our talents and not to further the goals of yet a third party (too many cooks...).

\$2. Monies raised for this project, therefore, could most easily come from the membership of one or more radio clubs: an optional membership or subscription surcharge of \$1 to \$2 ought to do the trick (optional because no idea, no matter how good, ought to be rammed down people's throats).

73-

In case you were wondering... Yes, the type face (or font) does indeed change from month to month: I hope that this does not cause any undue distress. The reason is that, depending upon circumstances, this column may be prepared either on a Canon TYPESTAR-6 or an Apple Macintosh (using either Microsoft WORD or Apple MacWrite). This column, for instance, was prepared on the Mac with MacWrite, and printed in 9-point Geneva on an Apple imagewriter.

With profuse apologies to Duke Alexander, permit me to confess that I completely forgot to include a note in last month's CONTACT which we had discussed on the telephone in a very nice conversation. He asked me to tell you that the Radio Earth DX Coffee Mug is still available. It is a very handsome and serviceable mug — I use mine every morning. It is available from Duke (\$6.00 postpaid in the USA): 14113 Stoneshire, Houston, Texas 77060.

S S CONTACT NOTES S S

Who! We certainly have our work cut out for us. If I've missed something that you think is important, let me know. Any research carried out (suggested by the points I've made) and reported on would be very gratefully received. If you want to help out, just drop me a note. Let's get going: I think it's a great idea and ought to happen. My thanks, as always, to both readers and writers alike. I hope that, if you have not written to CONTACT yet, you will take pen in hand and do so soon.

- S3. It seems to me that part of the necessary start-up expenses would be the purchase (or, ideally, the donation) of portable transmission equipment; this assumes the greater ease of implementing the portable transmitter plan (see below).
- S4. In order to carry out "3 most effectively, it would probably be wise to make contact with any Amateur Radio organizations or individuals that might care to interest themselves in this venture: in doing this we (1) gain access to a great deal of technical assistance, and (2) create new, useful, and rewarding ties of contact with another part of the radio community.
- S5. Preference is given to a portable transmitter because: 1) mistaken choices of recipient country/organization can be easily rectified; 2) cost of the project is considerably decreased and is thus rendered possible; 3) government and economic red-tape associated with buying and giving a full-scale transmitter is greatly reduced; 4) a greater range of people and interests can be served; 5) finally, we avoid any suspicion that we have misplaced our priorities in spending huge sums of money on a technological bauble when more basic needs might have been met.
- S6. SWLs/DXers will be accommodated by QSLs: the clubs (S) involved in the transmitter project should take care of this — the host country ought not to have any responsibilities in this regard.
- S7. The project should go forward only after the appropriate embassies and/or consulates and/or trade missions have been consulted.
- S8. It seems to me that, to be on the safe side, the opinion of the U. S. State Department ought to be canvassed to ascertain if there are any possible difficulties in the way of this work.
- S9. Some research should be done about the ease (or lack of it) with which temporary frequency allocation is accomplished; further, we should see if it would be easier to work within the Amateur Radio bands (particularly if we take along a Ham) than the International Radio bands.

Easy Listening

Editor: Alex Batman, 4618 Alvin Dark, Apt. 34, Baton Rouge, LA 70820

SUNDAY

- 1415--1435: "Echoes of Korean Music" (Radio Korea). This program alternates its focus on pop and traditional Korean music. Commentary between songs is devoted to Korean culture and special cultural events in Korea. (15.575/ 9.750)
- 0110-0115: "Letter from Berlin" (Deutsche Welle). The usual "Letter from--" format. A loosely structured essay about events current in West Berlin, including current charges against the mayor of West Berlin, cultural events, and other items of newsworthy significance. (6.040/6.035/6.145/9.545. Repeated at 0310 on 5.960/6.010/ 9.545/9.565/9.640 and at 0510 on 5.960/6.120/6.130)

MONDAY

- 0010--0030: "Matters of Faith" (Radio Australia). Unlike so many evangelistic programs current on shortwave, this program takes a more cerebral approach to religion in general rather than Christianity per se. Past programs have featured such items as the ordination of women in the Anglican church, customs of Ramadan and the growth of Islam in Australia, and also features on the belief systems of the indigenous peoples of the South Pacific. (15.320/17.795)
- 0230-0245: "Spotlight" (Voice of Free China). Each week features an interview and some songs of either a current Chinese pop or folk artist or sometimes a musician visiting Taiwan (one series of programs featured the American singer "Lobo" who was giving a concert in Taiwan). Usually the interview will cover two to three weeks of programs, and autographed pictures of the featured artist are frequently available on request. Also, they play some of the songs. (5.985/9.680)

TUESDAY

- 1215-1225: "Airmail" (Radio Finland International). The usual mailbag corner program. Reads letters from a worldwide audience (not exclusively North American), summarizes part of the letter and reads some excerpts verbatim. Also answers some questions briefly and occasionally in some detail. (15.400/11.945. Repeated at 13 and 1400 on the same frequencies).
- 1300-1315: "Belgium Today" (BRT). A current events program covering three items per day as a general rule. Past features have included nuclear arms storage in Belgium, terrorism (especially that of the "Fighting Communist Cells"), obituaries of famous Flemings, etc. (15.590. Also M-F on 9.830 at 0030). T-Saturday.

WEDNESDAY

- 2030-2100: "Music at Your Request" (Radio Moscow). This program alternates with "Listeners' Request Club". Unlike "LRC", "Music at Your Request" plays requests for classical music only (sometimes only excerpts for lengthy pieces). Almost every edition includes

some work or excerpt of a work by Tschaikowsky. (11.840) Every other week

0135-0140: "Visitors in Cuba" (Radio Havana Cuba). This program is a continued series of interviews with those who are visiting Cuba, usually for some professional reason like a conference or convention. Stresses the benefits of a socialist system in Cuba. (6.100/6.140/9.740. Repeated at 0335 and 0535 on 6.100/6.090/9.740)

THURSDAY

0015-0020v: "The Struggle for National and Social Liberation" (R. Tirana). A long title for a fairly short program. Focuses on revolutionary movements in other countries, including Paraguay, Panama, Greece, etc. (7.065/9.760. Repeated at 0245 on 7.120/9.760)

0145-0150: "Book Choice" (BBC). This program reviews current releases in the publishing world. Both fiction and non-fiction works are reviewed, and the quality of the review (written by different people each week) is what you've come to expect from the BBC. (5.975/6.175)

FRIDAY

0120-0130: "Cultural Review" (Radio Prague). A review of the current cultural events in Czechoslovakia, including a jazz festival, a puppeteers convention, and an interview with John Updike who was visiting Prague. Actually one of the better programs I've heard on Radio Prague. (5.930/7.345/11.990)

0225-0230: "The Land and the People" (Radio Beijing). A special features programming, concentrating more on human interest than current affairs. Past programs have featured traffic problems in Beijing, the Beijing telephone operators, courtyard homes in Beijing, and the survivors of an earthquake ten years after the event. I find this program to be quite interesting, but then I find anything to do with Asian culture interesting. (9.635/6.015 RFI relay. Broadcast earlier in the day direct from China at 1125 on 9.535, at 1225 on 9.535/9.640, and at 0425 on 15.445)

SATURDAY

1330-1335a. "Periscope" (BRT). I have no idea where this program got its title. It is a five minute look at current events, including trade with Libya, the European Union (different from EEC), and other events of current newsworthy significance. (15.590. BX earlier on Friday at 0100 on 9.830)

0230-0245: "DX Corner" (Radio Japan). A good, solid DX program that includes a feature on the "ABC's of DXing" for the novice, special features on different stations, essays written by members of Japan's DX clubs on a variety of topics of interest to SWIs, and Reception Reports (usually three per program). The main fault I find with this program is that all reception reports are of stations heard in Japan rather than from a world wide audience, and thus the use to North Americans is a bit limited. Still a good program. (15.195/15.420/17.825).

Soundwaves

Editor: Paul Lannuier, 25 MacArthur Ave., Closter, NJ 07624

Greetings. Hope the summer is being good to all. It's new radio time for me: I picked up a used Sony ICF-7600D (aka CF-2002) at the Gilfer/E.A.R.S. flea market. It comes in handy since I've been spending a lot of time on the road this summer. I've not yet had the opportunity to get the thing totally integrated with my antenna setup at the home QTH, but the results that are obtained with a twenty foot piece of wire are impressive. And I still can't believe the size of the thing (smaller than a WRTH)!

Here's a list of some of the things I've been hearing.

Turkey: TRT's General Service in Arabic has been pounding in at my QTH the past couple of weeks on 15220 kHz. In fact, I've noticed it has been going on well past it's 1600 UTC sign-off, as listed in WRTH'86.

Greece: Athens' foreign service features plenty of Greek folk and popular music, and is easily heard here during the evening hours on 9420 kHz. Look for English newscasts at 0130 & 0340 UTC.

Spain: One night last month, I heard Radio Exterior de Espania do a profile of the Spanish heavy metal band **Baron Rojo**. These guys play some quality rock'n'roll with Spanish lyrics. Unfortunately, because of the language difference, this band never gets any serious airplay in this country. (I've only heard them on college FM stations.) I was pleased to catch about 30 minutes of their music on REE. Once again, I must praise shortwave broadcastings ability to deliver new and interesting material (be it music, literature, or whatever) to audiences that would otherwise have no other exposure to it.

Reggae: I received a press release from Daniel J. Miller (1604 Plover Springs Drive, Plover, WI 54467) announcing the birth of Sunsplash Radio International. The following are excerpts: "...SUNSPLASH RADIO INTERNATIONAL (SRI) will be the first all reggae music station on shortwave. In an effort to expand the worldwide audience of reggae music, SRI was created to bring the world a monthly, two hour program of the best and newest that reggae has to offer. SRI is not a radio station in the traditional sense; we will be using the transmitter of another shortwave station (not of yet finalized at this time) [sic] to air our programs to the world." More info can be obtained by writing the above address.

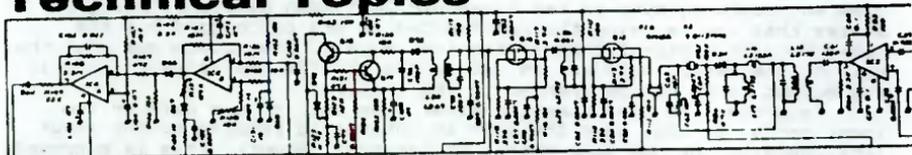

Belgium: Peter Dillon, who seems to be the only person contributing any loggings lately, has been listening to "Music Box" on the English service of Belgische Radio en Televisie (BRT). The program, which covers a wide range of Belgian music, can be heard during BRT's Monday (UTC) transmission at 0030-0125 (9830 kHz). Peter notes that their schedule doesn't list the frequency, but it is the only one that he hears them on.

Other Notes: The new Monitoring Times arrived the other day, and I'm very pleased to report that the merger between MT and International Radio has been successfully pulled off. My only disappointment is that IR's regular featured "Advance Program Details" section was omitted. Hopefully it will return in future issues. Otherwise, it is a gem of a radio publication. Messrs. Grove and Miller, and all else involved deserve pats on their collective backs.

That's all for this time. I'm still waiting for contributions (hint!). '73's to all.

Paul

LET'S PLAY POST OFFICE
OR
LETTERS, WE GET LETTERS

Well by now some of you have noticed that I did not make it up to ANARCON 86. There was a great deal of discussion in the World Court at the Hague about letting me out of the country being an act of aggression toward a foreign nation. See wiz... You perform a few indiscretions at one international convention and your pegged for life. I mean we could have blamed all those things on A*C*E, right? All kidding aside, personal and financial commitments got in the way this year. (Remember, we don't get paid for this folks) Just wait till next year. I am still on tap for the National Radio Club Convention in Delaware over Labor day so I'll see you there.

I received a lot of great feedback from the Gilfer/ E.A.R.S. SWL-FEST held in June. Keep up the good work folks. Why should the hams have all the fun?

Anyway, this month I promised to dip into the old mail bag and actually get around to answering some of your questions.

Jim Feely is the proud owner of a Kenwood R-2000 and he asks a few questions pertaining to its use that apply to many of the new breed of communications receivers.

The first question is; Why does the Kenwood have an AGC Fast switch and a squelch control?

Well Jim the reason is primarily that Kenwood expects a bigger market for this gear than us lowly shortwave freaks. As an SWL person you can basically ignore those two buttons except when you want to impress some YL with your radio prowess. (And over here, sweetheart, we got the AGC control. See how my bicep flexes when I turn it over to the fast position...) These features are geared to the Amateur radio operator. The AGC Fast control is used for listening to CW and SSB signals and the Squelch is used for net operations but in the case of the R-2000 it mainly exists for use with the UHF/FM converters that are available for this rig. If you do any Ham listening or follow point to point utilities you will find a use for these controls but much beyond that, don't stop just smile as you go by.

Jim also informs us that he is using a Grove Mini Tuner 3, Realistic External Speaker, and Drake LF-2 linefilter. Jim goes on to ask, Why are these features not included in radios of this quality?

Yo Jim, I already told you that you have two switches more than you need. Actually these are all fine additions that cost you just under \$100 to add to your set up. Of course they could be added at the factory and of course the price would go up and of course less people would buy the radio etc., etc. I had the chance to talk with some folks in the marketing strategy end of the home electronics industry and they lean toward putting out a piece of hardware geared to the broadest audience possible leaving the extras to the options end of the market. Take your own R-2000 for example. If you were the kind of DXer that used tuned dipoles for specific bands and listening strategies would you then go out and buy a receiver with a built in tuner? A tuner that has raised the price of the radio by \$50+ dollars over a similar competitor? Or if you were a headphones only listener why would you want to spend extra cash on a speaker you will never use? I do agree with Jim on one point. I think a line filter should be built in. When your selling a piece of equipment that can potentially fritz out from a line surge when your neighbors air conditioner kicks in, it would seem to be good engineering to add a line filter. I guess it all comes down to costs against profits. But anyone who is operating a modern receiver without a surge protector must really get their jollies out of driving down to the service center.

Our next letter comes from Emily H. Bershad. She is having recording trouble. She can't seem to get the signal of her Panasonic RF 3100 successfully over to her Panasonic QQ 2 309A Recorder. Emily states that she is using the recommended RP 024 patch cord but she comes up with a signal that is too low in gain. She points out that the gain on the Record Out jack is set on the RF 3100 and wants to know if the output level can be changed in the receiver.

To answer the last question first, Yes but it is a pain in the lower parts. On most gear the gain is internally reduced to the input jack, usually through some manner of resistor network. This is supposed to result in a signal that will not distort when dumped to a recorder. This reduced gain can also occur via a resistor network built inline into some commercially available patch cords. In the case of the gear you are using, Emily, I would first get ahold of a UOM meter and check to see if that RP 024 patch cord isn't reducing an already reduced signal. The cable should show no resistance end to end. If it is resistive you could get a straight through patch cord at your local Radio Shack. The other possibility is that there may be an impedance mismatch. The output of the RF 3100 is low (4-8 ohms) check your recorders manual and make sure your input jack is also low. Once again if everything doesn't look kosher you can find an impedance matching transformer at the local electronics outlet or stereo store. Still no good huh? Well if you must you can look over the schematic of the radio and you will find a two resistor circuit just ahead of the output jack. You can try juggling these values until you get the desired effect. When I was deeply involved in Medium Wave DXing I was fond of modifying the Radio Shack TRF AM portables. I found the output levels to be so different from radio to radio that no two ended up with the same resistance values wired in. But there is a cheap and dirty, good old fashion way to get your signal if you already have a signal reducing patch cord on your hands. You can just hook it up across the antenna terminals or jack in through the headphone jack and you may get what your looking for. Without the specs on the recorder and cord I'm kind of half in the dark on this one. Sorry I can't be of more help, but the challenge of sorting this problem out is right up the alley of a first time radio modifier. In this case most anything you try will not result in a puddle of melted components and you can learn a great deal from the experimentation. My suggestion to anyone with a similar problem is to not go into the rig but buy some jacks to give you access to all the signal outputs, earphone, headphone, tape, etc. and conduct your experiments with resistance or impedance from these points. You will develop a healthy respect for ohms law along the way.

CATALOG CORNER

AMATEUR ELECTRONIC SUPPLY
4828 W. Fond du Lac Ave.
Milwaukee, WI 53216
(414) 442-4200

Every year my AES catalog comes and I sit for hours drooling over all the gear they list. If I'm feeling particularly obsessed I might even make a list of my dream station just in case I hit the Lottery. They have it all folks, most receivers and accessories at competitive prices. While the catalog is geared toward the Ham, it lists all popular SW and UHF listening post gear as well. They include a complete line of MFJ and Palomar accessories.

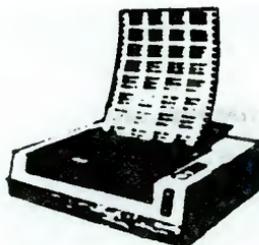

COPPER ELECTRONICS INC.
4200 Produce Road
Louisville, KY 40218

This catalog is geared mainly toward the CBer's out there in radioland but it is worth a look for its limited components section, its antenna mounting hardware and its hilarious mailbag page.

DC ELECTRONICS
PO BOX 3203
SCOTTSDALE, AZ 85257

An excellent and complete components catalog that even includes good old project boxes. One of the few parts suppliers left that is not top heavy with computer components. Really worth the stamp.

Keep those cards and letters coming folks! REDI KILOWATT LIVES!!!

Computer Corner

QSL REPORT

I was muddling about trying to decide what to do with the August column when the July FRENEX arrived. Low and behold, in CONTACT I ran across Mike Nikolich's complaint about log strips and Stephen Moyer's comment about his using his computer to automate the process. I thumbed through back editions of FRENEX to the December 1984 Computer Corner. There it was, Log Processor, a program to prepare, print your loggings in NASWA format and also save them to tape or disk.

I then remembered that Tom McElvy of NASWA and the Old Dominion DX Association had modified this program to print QSL reports for submission to FRENEX. Back to the July FRENEX, sure enough, each page in QSL REPORT contained several QSL's submitted by Tom. That solved the problem of the August column.

NASWA Awards Program:

Awards Chairman: John M. Kapinos, 86 S. Quinsigamond Ave., Shrewsbury, MA 01545

The Red Sox are in first place, in the morning we leave for Montreal and ANARCON-86, so we're generally in a jovial mood today. Even the lack of QLSS in our mailbox doesn't have us down too much.

During the month of June, 1986 the following folks earned NASWA Awards:

Edward BAKER, England : Senior China DXer, European Continent DXer, World Wide DXer, Asian Continental DXer, Arab World DXer, Soviet Sphere DXer, All Continent "QRP" DXer (50 Kw), Ecclesiastic DXer.

William F. FLYNN, Newark, CA: Master DX Centurian, All Continent "QRP" DXer (5! KW), Maple Leaf DXer.

Rick KRZEMIEN, Walnut Creek, CA: Senior DX Centurian

Brian W. LAWRENCE, Walnut Creek, CA: World Wide DXer, DXer de Pacifica

Masaru NAKAGAWA, Japan: DX Centurian, All Continent "QRP" DXer (25 KW), Master China DXer, Master Indonesian DXer

Terry J. PALMERSHEIM, Columbia Heights, MD: Arab World DXPert, Master Pacifica DXer

Jerry RAPPEL, Davenport, IA: World Wide DXer

Dennis RICHARDS, New Haven, CT: European Continental DXer

Donald E. WARNER, New Carlisle, OH: European Continent DXer

Robert M. WEISS, Fairfax, VA: European Continent DXer, World Wide DXer

Harold J. WOERING, Easthampton, MA (my home town): European Continent DXer

****KAP'S KOMMENTS****

Our congratulations to Terry Colgan and Robert Horvitz for receiving the ANARC Executive Council Award for Excellence at the ANARC Convention in Montreal. Congratulations are also in order to Gerry Dexter, North American DXer of the Year; Dr. Bruce Elving, Specialty Band DXer of the Year; Jens Frost (of WRTVH fame), International DXer of the Year and to our own Glenn Hauser, International Broadcaster of the Year. These ANARC Awards are all presented for meritorious service to the hobby and their accomplishments over the years.

We've still got a lot of the 1986 Edition of the NASWA Country List and Awards booklet available. \$2.00 in North American, \$3.00 elsewhere via Air.

I'm looking for any Radio related software for the IBM-PC compatibles. My machine is a Leading Edge Mode D, 640 K, twin floppies. I have both Lotus 1-2-3 and Multimate, so any templates can also be used. Kindly write advising what you have and any costs involved. I'll be more than fair.

Till next month,

Besi, Kap 7/17/86

Once again an ANARC Convention is history. Others much more qualified than I will write of the technical details, such as the WARC Intercessional activities, the ITU Region 2 Medium Wave Broadcasting Conference and the International Frequency Management Seminar and Open Forum. Our report will center on the general and social aspects of the Convention.

Many have stated that the hobby is "in trouble" due to declining club memberships in some cases, the sunspot count, etc. This was certainly not in evidence over the weekend of July 18-21, 1986 as nearly 300 folks trekked from all corners of the world to the Holiday Inn Place Dupuis. What was in evidence was the exuberance and varied interests of the crowd. We in NASWA specialize in SWBC, but the UTE, MW, FM-TV and VHF-UHF UTE groups were also in attendance.

As is well known, the Canadian Dollar not the world's strongest currency these days. It's sort of strange to walk into the local McDonald's (conveniently located across the street from the Inn), order a Big Mac, fries and coke, hand over \$10.00 U.S. and receive \$10.05 in change. Enough on economics, back to the convention.

Two large salons were filled with exhibits. Every Major International Broadcaster was well represented. Danny Dong of Voice of Free China, which made its first ANARC appearance, was a hit of the crowd. Gene Reich and Dr. Kim Andrew Elliot of VOA spent long hours explaining why US residents cannot receive VOA "goodies" such as T-Shirts, hats and pennants (Congressional mandate), Ian MacFarland of RCI spent equal hours explaining why RCI only QSLs once a year (budgetary restraints). Old friend Jeff White assured us that Radio Discovery will soon be reliably heard outside of downtown Santo Domingo. Arthur Cushen advised that Radio New Zealand's funding for higher power transmitters is coming along quite well.

Among the club displays, we must give credit where it is due and offer a tip of Kap's cap to the Ontario DX Association for their super display.

Many interesting seminars were offered, but as is the case with many conventions, some of the best were held in local pubs. The cry of "another Molson messeer" was well and often heard in the area. The local merchants did quite well selling souvenirs, with the language barrier being broken by our Pidgin French and their equally Pidgin English.

We're very happy to report that the engineer of the infamous Radio Habana Cuba "hum" transmitter is now employed as the chief engineer for the Holiday Inn's elevator system. Each trip was as much an adventure as White Water Rafting. We'll not go into detail re the Grade Prix de Montreal One Man Wheelchair Race down Rue St. Catherine with Jim Conrad at the controls and a one Kap propulsion system. Nor will we get into the "Case of the Missing Leg", also authored by Jim Conrad. Don Hosmer of MARE is in the final stage of planning the 1986 Tierra del Fuego DXpedition, radio optional. Many additions were made to Steve McNeil's world famous collection of serial numbers. Canada Post now guarantees fortnight delivery to the US.

One highlight was the boat trip around Montreal Harbor. Once the "Case of the Missing Cabs" was solved, a good time was had by all. These boat rides have become so popular that ANARC has decreed that any future Conventions must be located near a large body of water.

To outgoing ANARC Executive Secretary Terry Colgan go our best wishes for a speedy recovery.

To all those involved in the herculean effort to put on this fine convention - ya done great. And to all those reading this miracle insomnia cure,

BEST, Kap

ANGOLA R Nacional, 4952.6, 7/5 0402 s/on w/NA, drums, ID, lcl mx, revly talks, 0415 ID, report on socialism; SIO 343. This stn wanders up and down the 60 mb, so take care to get a clear ID! (Roland Schulze, Stuttgart, FRG)

ANTIGUA R Reloj, Havana, reported 26/6: Offl US radio stn VOA is to install a high-power xmtr on Antigua for pgms to E Carib. Agmt grants US permission to use island for ideological propaganda purposes and was signed by Antigua/Barbuda Forn Min Lester Birm [sic--Bird] and US Amb in St John. Per VOA plans, stn'll be completed in autumn 1989 and'll boost bcng power of the plan [sic] currently op'ing on Antigua, which carries radio pgms originating in Wash. Last year, US offl stn VOA began bcng to neighbouring LAM countries as result of a modernisation project reportedly costing over a gigabuck (WBI 4/7) Ho hum, I'll wager the agmt did not use the language 'for ideological propaganda purposes': VOA press release says 100 kW MW xmtr'll be built near Mt Coke, on S side of island, to replace current portable 50 kW unit on N side, 1580 kHz (gh)

BANGLADESH [Cf July LN-22] Last month it seemed the V of Islam svc had been discontinued; since hrd 08-0830 on 11645, // unfoand, maybe 12045 as before (Noel Green, UKOGBANI, July DSWCI SWN) It's on 12030 & 11645; rest of R Bang ES sked: 1230-13 EG Eu 17653 15525, 1315-1345 NP 9775 7105, 14-15 Urdu & 1515-1545 Hindi 13615 9640, 16-1630 AR 13670 9640, 1630-18 BG 13670 9945 to ME, 1815-1915 EG Eu 7505 6240, 1915-20 BG Eu 7505 6240 (WBI 27/6)

BENIN R Parakou was off the air from 8/7 to 11/7 due to faulty parts; ops on 7190 5025 936 kHz; per ORTB Cotonou reports (WBI 18/7)

BHUTAN R NYAB has changed its name to "The Bhutan Broadcasting Service" from June 1986. Speculation about the new 5 kW xmtr has now been confirmed;

per phone call to Ms Louise Dorji by Sudipto Ghose, she has confirmed that they have started the 5 kW xmttr from 2/6 and are using temporary studios near the old studio. Monitoring from Calcutta reveals that both xmttrs are in use Mon-Sat: 3395 300 W and 6035 5 kW 11-14 (EG 1330-14); Suns on 6035 5 kW only 06-09 (EG 0830-09). 6035 is providing VG sigs and I'm sure DXers will welcome this. Addr is still P O Box 1, Thimpu (Prodyut Banerjee, June IDXC I Asian DX Review) Hard to imagine a worse fq at 1100 than 6035--between VOA & AFRTS, but try (gh)

B O L I V I A R San Gabriel, 6080 listed, was featured in a Miami Herald article, but not yet hrd on this fq. Addr is G. Lanza 2001, La Paz, or Casilla 4792, La Paz. In an answer to the WRTH they claim to use this fq along with 620kHz and 101 MHz; powers 5 kW SW, 10 kW MW, 2 kW FM. MW & SW xmttr location is Chacaltaya, FM on Ceja del Alto, called Radio Color. Slogan "La Voz del Pueblo Aymara". Sked on MW & SW 0830-02. Plan to increase MW power to 14 kW. Proprietario: Arzobispado de La Paz. Dir.Gen: José Canut Saurat, fsc. [Franciscan?]; Dir. Tec: Ing. Miguel Gutiérrez. (Finn Krone, July DSWCI SWN)

R La Cruz del Sur, 4875, gave this info to WRTH: Addr Cajón Postal 1408, La Paz, or Calle Nicaragua 1759, La Paz. O&O by Unión Bautista Boliviana. Dir.Gen: Rodolfo Moya Jiménez. Dir.Tec: Mario Mamani Cuzco. On 10 kW MW they shifted to 740 from 730 in May, w/xmttr in zona "El Ingenio" as is the SW on 4875. FM 95 MHz is in zona "Villa Dolores". MW & FM sked 0930-21; SW 0930-14 & 15-17 - making reception in Eu almost impossible (ibid.)

AFP, Paris, reported 7/7 from La Paz: Owners of R Acción Cultural Loyola [ACLO] report their stn completely destroyed when two big bombs exploded early that morning in Tarija, 958 km S of La Paz. Said 5 hooded individuals entered stn, beat and tied up night guard Tomás Orosco, who is currently in a coma; and they destroyed the eqp. Tho not yet known who criminals are, stn has received phone threats last few days from some conservative political parties. R ACLO, belonging to Bol Jesuit priests, has largest audience in region including the southern Bol dept (Tarija, Chuquisaca, Potosí) and part of N Argentina; dedicated to improving living stds of peasants (WBI 11/7) Is that the stn on 600 kHz in WRTH? It's supposed to be in Sucre (gh)

L E B A N O N V of the Natl Resistance reported 24/6: final preparations underway for the 9th May Movement Radio (Arabic: Idha'at Harakat Tis'ah 'Ayyar) a mouthpiece for Elie Hubayqah [former Leb Forces commander] to begin bcng, now that xmtr power has been boosted to reach more areas... (WBI 27/6)

V of Lebanon (Phalangist), Beirut, and 2/7: to demonstrate solidarity w/ tomorrow's strike call, all radios bcng on MW in the N & S as well as in the [Shuf] mountain and the capital, will obs a 10-min suspension in xmsns from 1030 to 1040 tomorrow [0730-0740 gmt 3/7]. The radios'll signal start of this by bcng the same slogan simultaneously. R Free Lebanon (pro-Sham'un) reported 3/7 that this did take place, TV would be off that night and no newspapers tomorrow in support of the General Labour Federation strike (WBI 11/7)

LIBERIA Since 23/6 a stn called ELRZ has been hrd testing on 1260 at 06-08 & 19-21; described as a svc of the Lib Rural Comms Netw w/studios in Zwedru in Grand Geddeh county. Tests of mx interspersed w/anmts in EG & lcl lang (WBI 4/7)

ELWA reported 8/7: a new 10 kW radio network to be called Basel Christian radio stn is to be constructed shortly in Hardlandville, Grand Bassa county. Per LINA [mx agency], the stn project is being jointly undertaken by the Christian Education Foundation, CEF and the Basel (?Ministers') Assn, BMA, w/assistance from the Radio Netherlands Intl, a radio (?college) in the Netherlands. During the ground-breaking ceremony on Sun for construxion of the stn, more th-an 2700 dollars were raised as part of 50K needed for the project. LINA quotes Exec Dir of CEF, Rev Albert (O'Connor) as saying overseas firms have agreed to provide stn w/eqp valued at 40K\$ when completed (WBI 18/7) Maybe SW involved?

MEXICO LV de la América Latina no longer hrd on SW; monitoring research thruout June shows XEW LV de la América Latina de Caribe [sic] appears no longer to be bcng on SW. Use of fqs arnd 15160 9515 6165 no longer obs. Were still used in late Jan. Anmt on main MW fq 900 now refers solely to that fq (WBI 4/6) The SW usage has been highly irregular for years, and I doubt that not hearing them in June necessarily means they are gone for good. Even when used, I don't think they were customarily mentd on the air so the 900 kHz anmt is not consequential. And how did that extraneous "Caribe" get in there? SCDX Spanish bc 16/7 propagated this error in quoting WBI (gh)

MOROCCO On 6/3 I rcvd on 15350 R Mediterranean Intl at 1700 in FR. 1/7 rcvd confirmation, saying xmtg on 5, 9 and 18 MHz test xmsns. On 9575 reception is VG at 06-24. On the new fq they'll be using 2 x 250 kW xmtrs in Nador. Addr is R Médi Un, 3, Rue Emsallah, Tanger (Raymond Slagt, Aruba, 2/7)

MOZAMBIQUE Emissao Interprovincial de Maputo e Gaza, 4926.8, 4/7 2145 presumed in PT, ment of Moz 2200, time pips, short nx, 2205 time interval [?], short anmt, ID? at 2208* w/NA. Very rare here; not listed in the TBS from DSWCI! (Roland Schulze, Stuttgart, Federal Germany, 7/7)

NIGERIA R Nigeria, Lagos, reported 2/7: an initial proposal to commercialise the FRCN has been rejected by the govt. Min of Info, Col Anthony Ukpo, made this known in Lagos 2/7. Said fedl govt still believes there is a need for FRCN to generate some funds; govt considering other options apart from total commercialisation, such as allowing corp to go into partial commercial activities. R Nigeria, Lagos, reported 4/7: Bendel state govt has approved merger of R Bendel and Bendel TV; the two para-statals will now be run by a body to be known as Bendel BCing svcs (WBI 11/7)

PAKISTAN R Pak made these changes: TK 1630-1730 on 13665 ex-7165 and 12025 ex-12005 // 9860. WS to UK 1645-19 on 9455 ex-9465, 6230 //. FR 1915-2015 on 11640 ex-11635 // 9465 (No! Green, UKOGBANI, July DSWCI SWN)

PAPUA NEW GUINEA R Australia reported 8/7: In PNG the govt has threatened to block sked start of TV in 9 days time. PM Mr Wingti said it was vital that TV not start till an inquiry into all aspects of telecomms was completed by next Feb. Said if TV companies failed to act on govt req not to start bcng he'd bring legislation to enforce it. RA Port Moresby corresp Stephen Cotton [phonetic], says Wingti govt ancd in Feb an inquiry into telecomms and it'd been expected that it'd be finished by Nov 86. But inq still to begin and one of the companies, NTN [Niugini TV Net], a subsidiary of a TV stn [NBN] in Newcastle NSW, has advanced plans to start bcng 18/7. PM company, Media NG, which is now partly owned by the Kerry Packer media org of Australia, is also planning to start TV in competition w/NTN (WBI 11/7)

PARAGUAY AFP Paris reported 13/6 from Asunción: Embattled R Nanduti, the aggressive stn jammed for almost a month by unk supporters of Pg Pres Alfredo Stræssner, was suddenly able to bc w/out QRM, even making calls abroad, beginning 11/6. QRM discontinued one day before stn owner and dir Humberto Rubín was sked to meet w/UN observer on human rights. UN obs arrived in Asunción 9/6 to hold talks w/reprs of various sectors of the citizenry on HR in Pg. Pg govt has declared the UNobs to be its guest of honour and he attended several

receptions the authorities held in his honour. Monitoring 16-18/6: Selective jamming of RN nx reports obs 16/6; intensified markedly 22-2330 17/6 when Rubín was hrd to say: "Well, this is democracy. This is freedom. This is the everyday life of the country itself. So, what more can you ask for, you cannot listen to what you want to listen to, those of you who follow this radio's broadcasts. No one is deceived, and there is no need to deceive... These interruptions will not continue very long. Everything is going to be resolved soon, and tapes we cannot bc now we will surely bc sooner than people think; in a much shorter time than even the pirate thinks. We will be on the air with everything Nandutí has in its archives and it will be an historical event. In a much shorter time than people think we will be offering all the info we want to disseminate in absolute freedom." During the 18/6 22-2330 nx, Rubín told his interviewee: "This is freedom of the press and expression as understood by pirates. If you want to continue, we are recording your words. This recorded material is being bc by another SAM stn. We are sending them apx 7 cassettes a week. If you want to speak to us keeping this in mind, please go ahead". At end of iv Rubín said: "That was Dr Miguel Abdon Saguier [PLRA leader]. I repeat, we are recording everything. There is already an important network in Eu and another in SAM that are carrying the material that unfortunately cannot be bc in our country." (WBI 27/6)

La Tarde, Asunción, reported 26/6: Rubín met Supreme Court of Justice Pres Dr Luis M Argana 26/6 to discuss this jamming. Upon leaving the SCJP office, Rubín said "I am very happy". Also expressed his confidence in justice and informed Dr Argana about req for injunxion he filed in the courts. Dr Argana told Rubín that court actions take time, assuring him that problems will be solved thru the appropriate channels..." (WBI 4/7)

R Nandutí reported 1/7: Pg police have prevented Spanish Franciscan priest Fr Javier Arancón, from returning to the country. Dir of Catholic stn R Charitas, he had been warned about the stn's newscasts. Per the Superior of the Order of Friars Minor, which owns stn, incident occurred 30/6 as Arancón was returning from Buenos Aires. Police at Puerto Falcón withheld his ID documents and told him he could not return. R Charitas has been attacked by the pro-govt press, which charges it w/following a line [passage indistinct due to jamming of RN]. Sources from the Franciscan order have said that Fr Arancón is staying in the adjacent Arg city of Clorinda while efforts are made at the Interior Ministry to allow him to return. Meantime, Charitas reporter Celso Velázquez was released. He was detained last week along w/sevl peasants on charges of usurpation of private prop in Caaguazu dept, where he was reporting on a land dispute. Velázquez was turnedover yesterday to the Villarica courts. His atty, Juan Carlos Ramírez Montalbetti, obtained his release today (WBI 4/7)

P E R Ú R Moyobamba, 5015, 28/6 0225 w/romx, slow IA mx, ID & NA at 0300*, 23332, very rare catch here! (Roland Schulze, Stuttgart, Federal Republic de Alemania, 7/7)

Info provided by stns direct to WRTH: Nevada Radio - Organización Rondon Fudinaga SCRL - says they plan a SW installation, no fq given; until then on 900 kHz OBX6K 24h, and FM 97.1 OCZ6E. Correct addr to: Avda. Victor A Belaúnde C-8 Umacollo, Arequipa. Slogan: "Nevada Radio...La Sui Géneris...LO MÁXIMO!"

R Universal, 3310, gives addl addr Casilla 808, Huánchaq, Cusco. 5 kW SW xmtr is at Cerro Huayrapuncu. Proprietario: Dir.Gen: Luis Villasant Colpaert. R Inca del Perú, 4762, o & o by Corp Electrónica Peruana SA, and is now 5 kW ex-1.8 kW, 24h on SW.

Rdif San Martín, 4810, Casilla de Correos 169, Tarapoto, or: Jirón Cabo A Leveau 158, Tarapoto; SW now 3 kW ex-1, and call OAX9R. Xmtr in Barrio Partido Alto some 3 km N of studio addr above. Slogan "San Martín una voz peruana para la libertad". Sked 10-03 on MW & SW.

R Moquegua, 4825, lists this licensed fq, but doubt they've ever more than thought of going on SW. Is 1 kW and OAX6Z, supposed sked 09-19 & 21-05. To change to 49mb in Apr 1987. Slogan "Transmitiendo desde la Capital del Cobre [Cobre ?] Peruano desde la ciudad de Moquegua, Perú". Addr: Casilla de Correos 22, or Jr Ayacucho No. 639, Moquegua.

R Rioja, 5045, Empresa Individual de Responsabilidad, is at Jr Faustino 930-932, Rioja. Props: Teofilo Mori Mendoza & Victoria del Águila Rojas. Dir.Gen: Teofilo Juan Mori Mendoza. Dir.Tec: Jhonny [sic] Mori del Águila. Slogan "la emisora de la insignia roja y blanca". 5045 is OAX9C 1.5 kW 1030-0530; xmtr at Barrio de Cascayunga.

R Arequipa, 5950, Calle Palacio Viejo No. 401, or Casilla 657, Arequipa; s/gan: "R Arequipa, La Mayor"; Ger: Pedro Rufino Zúñiga Gutiérrez, OAX6A 1 kW 11-15 & 22-04 on SW; xmtr is 4 km from V. Uchumayo.

R Santa Rosa, 6045, has renovated xmtrs & eqp this year, so maybe they've reactivated SW in addn to MW; 6045 is OCY4H, 3 kW, xmtr 3 km from studio. Addr Jr. Camana 170, Lima, or Casilla 4451. Studio is in the 'interior del Convento Santo Domingo'. Ger: P Juan Sokolich A, O.P. Dir.Téc: Hno Ciprián H. 10-0430.

R Cusco, 6195, SCR Ltda, Saphi No. 601, Casilla 251, not active but will be reactivated after maintenance. Xmtr at Moliococha-Sacsayhuaman. Slogan "LV de la Capital Arqueológica de América" MW 1470 sked is 10-03; V by QSL card. (all the above: stns supplying info to 1987 WRTH via Finn Krone, DSWCI July)

Rdif San Martín, 4810 [see above]: in March 1986 ownership changed. New owmr is José Manuel Chong; Dir.Gen: Edgar Portocarrero. Secretaria is Rosa Ruiz. Rp for stns in Tarapoto is no longer a problem: stns put the rcvd IRC on the envelope instead of stamps and the local PO stamps them. Rdif San Martín has one of the nicest letterheads I've received so far.

R Pampas, 4854, had to close down bcng in late 1984. Former Administrador Luis Mestre is now working as a chemist in Lima. Has still 20 of the formerly used verification formletters left and is willing to QSL old reports. Addr is: Luis F D Mestre Rojas, Estafeta Central de Correos, Lima 1. Registered mail recommended. When writing to him, please take into account that he only earns 20 US\$ a month and has no money left for postage (Michael Schmitz, July DSWCI)

R Victoria, 6021.4 is still active, noted at 1128 & 2300 w/slick format (Terry L Krueger, FL, DSWCI July) But Pedro F Arrunátegui, Lima, reports in R Nuevo Mundo on 6021.3, a new stn in Piura, Huancabamba, R Sensación at 14-1517+

PHILIPPINES [Cf July LN-26] The New Phil Daily Express reported 19/6: Def Min Juan Ponce Enrile 18/6 ordered lifting of two sequestration orders on two govt-run gambling establishments and three privately owned TV nets, i.e. R Philippine Net (RPN-9), Banahaw BCing Corp, and the Intercontinental BCing Corp as well as sister radio stns, 1/3/86. Enrile said seq no longer necessary (WBI 27/6)

FEBC reported 8/7: DZXL [radio] went on the air again at 0635 8/7; was one stn closed by mily due to rallying of Marcos supporters. Ray Pacheco, mx ed of R Mindanao Net, said stn was authorised to continue opns by BGen Hermigilio (?Tahuro) of the Integrated Natl Police. Per him, radio was closed to prevent it bcng propaganda msgs by Marcos supporters. (WBI 18/7) Manila Chronicle reported 9/7 that DZME, DZEC and DWAD radio stns, were also allowed back 8/7 (WBI ed)

R W A N D A Me thinks the WRTH 86 listing of xmtr as a mere 5 kW on 3330 is outdated, or what I'm hearing here is not Rwanda. What I'm hearing is a substantial signal *0300 under CHU, that has popular Afro mx, fades up significantly between 0330 & 0355, and then begins to f/out about 0405+. QRM from CHU, 30 over 9 here, is awesome, but a W & M can be hrd rendering nx in FR-sounding lang, but QRM just too severe to say for sure. 0335 W says "You are listening to..." but a beep squashes the rest. 0345, several IDs, one in FR, another in EG, which could be either Rwanda or Uganda. Definitely not Comoros, and'd arbitrarily outrule Uganda, except for the two nights noted, 28/5 & 29/5, the Afro-DX was good but not exceptional; and I'd consider Rwanda being audible beneath CHU at my QTH to be impossible from a 5 kW xmtr except for a truly major opening, such as in July 82, when such as Burundi were smashing in. Burundi, e.g. was not detectable under the Guat 28/5 or 29/5. So all the logic, however lacking an absolutely positive ID, points to Rwanda, unless someone can establish a reasonable power for their xmtr here, I cannot accept it as Rwanda; it simply is not possible. Have I made my point? I SINPO these receptions; during the peaking at 3+143+2. P.S.: There is however one bizarre possibility, and that is CHU so obliterates QRM on its fq that the audio from otherwise weak sigs under get manifested between the beeps--laughable, perhaps, but seeking an answer as to why a 5 kW signal from afar could be noted here under otherwise rather ordinary condx (Maxfield Greenwood, Sedgwick ME)

S A U D I A R A B I A SPA nx agcy, Riyad, reported from Jiddah 29/6: Info Min Ali Hasan al-Sha'ir has approved decision for Saudi radio to xmit the V of the [Gulf] Co-op Council [GCC] as of 15th Dhi al Qi'dah [22/7], at 08-09 on fq of 2nd pgm. Radios of other GCC states'll link up w/Saudi xmsn of VoCC. Saudi bcs are already crowded: 16 channels, 4 in AR, 12 in various langs (WBI 11/7)

S O U T H A F R I C A R South Africa reported 11/7: Dir-Gen of SABC, Mr Riaan Eksteen, and that from 1/9 a number of pgms'll change because SABC has achieved greater flexibility in use of radio & TV channels w/leasing of Intel-sat satellite from 1/7. From 1/9 R Orion [pop mx night svc] daily from 9:30 pm on R Suid Afrika [Afrikaans svc] xmtrs, while R Allegro [cl-mx night svc]'d be bc from the same hour on R S Afrika [EG svc] xmtrs. R Five's two existing xmtrs'd be expanded to six w/addl stereo FM. R 5 also will bc on existing MW and SW from 1/9 to northern SW Africa. R 5 high-power MW stereo xmtr nr Joburg'll be used for xmsn of new pgm R Metro from 1/9--mainly EG, for urban black population; on MW stereo from 5 am to midnight. (WBI 18/7)

S P A I N REE reported 13/7: Due to precariousness of nx situation in Chile, REE'll bc spl nx pgms and bulletins on Chilean situation as from 14/7, as long as anomalous situation lasts; incl in pgming for SAM, last few mins of pgm "América, América", Mon-Fri 00-01 & 03-04 Spain time [Sun-Thu 22-23 UTC 15125 and 9630, M-F 01-02 11815 9745 9530 9360]. REE hopes this will soon cease to be necessary and that future condx'll enable free dissemination of nx (WBI 18/7)

S R I L A N K A Xinhua nx agcy, Peking reported from Colombo 23/6: VOA new xmsn stn will be set up in Puttalam, 75 mi N of Colombo, instead of originally chosen site Iranawila, near Chilaw, 50 mi N of Colombo, per local press. Under agmt signed in Jan 85, stn was to be on kiloacre site at Iranawila; ground-breaking started in March 1985; but actual construction unbegun so far. Building of the stn has evoked a great deal of criticism from the Indian press which alleged that the US might take advantage of the stn to put the Indian Ocean under its naval surveillance. [Gee, what's going on at Diego Garcia? gh] But of-fl sources here said their decision on the change of site was not influenced by India's position. They explained that setting up the facility in Iranawila would've resulted in displacement of 200 families, incl many fishermen, while that in Puttalam, only about 20 fams'd be affected. Another factor: Puttalam a few mi inland than the coastal site at Iranawila; corrosive effect of sea air on eqpd'd be lesser. Wash already been informed of Colombo's decision on change of site and its reaxion to decision expected w/in next few days. Eqpd w/four

500 kW xmtrs and three 250s, the new stn, upon completion, would strengthen the VOA signal in SEAs and'd improve VOA worldwide xmsn net, estimated to command 110 megalisteners. SIBC is to have exclusive use of one of the 250s and access to the others (WBI 27/6) Doubt stn'll ever be built (Jayewardene confidant...)

Sinhala Natl svc, 4902 7/6 on new sked moving to 6075 at 0232, SIO 444 (Oliver T Goonawardena, SL, July DSWCI SWN)

S U D A N AFP reported 1/7: Sudan R & TV employees'll begin an indef strike 2/7 if govt fails to guarantee to keep bcng neutral. Statement issued by the employees union said that, despite an earlier decision by the transitional govt to keep the system out of politics, "we are now receiving instruxions on what to bc and what to ignore". "We want the apparatus to be kept open for all the people w/out discrimination. We are keen to avoid a previous experiment when radio and tv was exploited by the deposed ruler (ex-Pres Ja'far Numayri) for serving his own ends. We'll continue to resist the govt attempts to run the system into a propaganda tool of the ruling parties." (WBI 4/7)

S W A Z I L A N D R Swaziland reported 3/7: Stn CE Mr Timothy (McKenna) ancs that the Siswati svc of R Swaziland'll have some FM fq changes as from 8/7; Mbabane Mount Kelly will be on 98.1 instead of 92.022. Piggs Peak-Bulembu on 106.9 ex-89.066, and Manzini 89.2 ex-87.69 (WBI 11/7) Cf July LN SOUTH AFRICA

S W E D E N Sveriges Radio reported 24/6: SBC should give up the nx pgms in SP & PT on SW for abroad (as RSI), and should invest instead in e.g. more pgms to Poland and Baltic states. This is proposed by a govt report, completed by the former Minister of Trade, Hadar Cars. At same time, SP lang svc relayed by phone for use by 16 IAm stns would also disappear (WBI 27/6)

RSI reported 27/6: The TV pgm "Sweden Today", produced by Scand-Video of Boraas, can now be seen in 4 continents, now that Hong Kong is added; already via satellite thruout USA, Canada, Eu, Kenya (WBI 4/7) On SPN cable net? (gh)

SCDX via R Sweden is now mostly about computers and other stuff of little interest to DXers, with 2 or 3 mins of DX nx thrown in at the end. The following items were hrd on SCDX 1/7: R Free Afgh, via R Liberty, on 3555 at 0200; Dubai on 3640 at 0330 and on 3550 at 1500. Al fqs are actually in 9 MHz band, and one wonders why a supposedly experienced DX ed would let such obvious bloopers get on the air (Ernie Behr, Kenora Ont, 7/7) They were corrected on the air a week later; said the printer was malfunctioning, or something like that. However, same items appeared on the Spanish SCDX bc w/out error. You exaggerate: usually more than 2 or 3 mins of SW DX nx, but always seems to be secondary; one has the impression that the editor's 'heart' for SW DX long ago was lost to peripheral gadgets such as computers & satellites (gh)

T A N Z A N I A R Tanzania, Dar Es Salaam, reported 26/6: Pres Ali Hassan Mwinyi 26/6 praised R Tanzania for stressing development of Kiswahili both inside & outside the country...nothing but praise for RT's good work for the past 35 years, on its anniversary (WBI 4/7)

Now sked in SP daily 23-01, 04-05, 13-15, 17-19 on 5950 (WBI 27/6) 28

V of the Resistance of the Black Cockerel SAPA nx agcy, Jo'burg, reported 9/7: UNITA's radio stn 'the V of the Black Cockerel Resistance' is conducting test xmsns on two SW xmtrs possibly located in or near Jamba, the Angolan rebel mvmt's HQ [apx 200 mi ESE of Benguela], SAPA's correspondent in Mafeking reports. He said the tests, all monitored in Mmabatho, were on the following fqs and [S African] times: 9 am to 11 am 9450 & 5850, 3-4 pm 9450, 3-5 pm 5850, 7-9 pm 7315 4935. All but the bcs on 4935 are OOB. At present, xmsns consist of mx occlly interrupted by stn ID in PT, Umbundo or Kwanyama. Since 1980, UNITA has been using a SW xmtr based in S Africa lately only obs 5:30-7:30 am on 4973 or 4975. Monitoring 10/7: VOTROTCB was hrd 0705-0901 on 9450 & 5850, 17-19 UTC 7315 4935. At 0729 this anmt in PT: "Angolan people: this is the V of Resistance of the Black Cockerel conducting tests. We are with you daily. We shall always be with you to tell you the truth. The MPLA no longer has political power. It hasnt the courage to tell the people that it has failed. From now on [words indistinct], thru your radio, the V of Resistance of the Black Cockerel, we will be on your receivers to show you the way of national unity, peace and victory, [words indistinct] family, the way of General Savimbi [indistinct] hope for Angola. Down with the Dubans! Cubans out of Angola! United, from Cabinda to Cunene, we shall win!" BBCMS records show this stn was first hrd 4/1/79 (WBI 18/7/86)

Radio SPLA Stn reported in EG 1300 16/6: R SPLA's Nationalities Svc is being observed today by various SPLA info units in the field.. In a related development, sources close to the SPLM/SPLA Political-Military High Command have disclosed here that efforts have been stepped up to expand the Nationalities Svc by introduction of more langs. However, the sources gave no hint as to when these addl langs'd be introed into the Nats Svc. BBCMS Ed note: R SPLA, which is controlled by the Sudan People's Liberation Army and /Movement started its Nats Svc June 1985 w/one hour of pgmms a day in 6 Sudanese langs (WBI 27/6)

V of Mujahadeen / V of Mujahadeen-e-Khalq is continuing its expansion. Now noted on 9515 7195 7110 5960 3928; only 7195 is jammer-free. 7110 is 24h; probably true for other fqs as well; may be the most extensive cland today (Supratik Sanatani, June IDXCI Asian DX Review) Pgming on 3928 is 3 mins ahead of 7110 on 27/6 (Prodyut Banerjee, ibid.)

V of the Crusader unID cland, probably this, 30/5 2320-2332* on 3509.2, Qur'an recital & brief anmt; apparent closing tune and off, //3920, F-@ (Bernhard Grühd, et al., DX Camp in S Germany, DSWCI SWN)

V of Khmer 6325, *2300, short chant of Buddhist hymns to provide a non-communist flavour. Stn plays lots of Camb pop songs which sound so much like Thai pops we often hear from Thai MW stns. I am sure they must be using studio facilities and may be professional musicians from one of the Thai stns. Morning xmsn to 2400* (Prodyut Banerjee, IDXCI Asian DX Review, June)

Voice of Tamileelam The following is reproduced in entirety from Jun IDXCI:::

SPECIAL REPORT

VOICE OF TAMILLELAM

The newspapers were still carrying the reports of bitter infighting amongst the rival Srilankan Tamil guerilla groups. The LTTE had brutally struck at the TELO leadership and there were stories of ghastly atrocities. And there we were in Madras to investigate into the Tamileelam Radio. The broadcasts from this clandestine station were already over three years old and still its location was uncertain. But of late it had been giving out a contact address in Madras - 11 Deshkar Street, Vadapalani, Madras - 600026. Jose had even obtained a QSL via this address. So why not anoop into this address ?

Luckily for me my uncle stays in Madras and when I fixed up the trip, Asis also tagged along. Prodyut had recorded this station last December and he passed on the cassette to us. To make ourselves more authentic looking we carried copies of ADXR which had frequently carried reports of this station. TRB had given me a Radio Veritas T Shirt which I was to wear while going to the station. That was about all the preparation we made before leaving for the "search".

Our initial mood was buoyant but uncertain. All sorts of story book pictures were conjuring up in my mind. Big dark hairy guys waiting at 11 Deshikar Street. But then Asis is a big man too - 72 kilos. In an optimistic mood I thought that we might even be taken for a tour to their transmitting site that is of course, only if we could sufficiently impress them. We started our inquiries right in the train we were travelling - Corromandel Express. There was a gentle man from Madurai and we picked up the topic of Tamil rebels. "Do they bother the tourists?" "No, No, they keep to their own". "Do they have training camps there?" "Yes, but all hidden from public eye." "Do they have a radio station?" "Yes I have heard programs in the weekends." "How big are the aerials?" "No, no they are all underground". So that was it.

The first day of our stay in Madras and it was a Sunday. Mr. Pedaki had fixed up a meet at his place. After the meeting had finished with the regular matters, I raised the topic of our investigation. Immediately there were vehement words of caution from all corners. Since the rebel groups were involved in infighting, they could mistake us to be snoopers from the other groups. And that might be dangerous. Kirubakaran who was in Sri Lanka some years ago, said that apparently there are numerous splinter groups and there is total chaos amongst them. Devrajan spoke of how two policeman on night beat were shot at and wounded apparently because of mistaken identity. And that was it. Everyone in the meeting were unanimous that we abandon our plans. That night a bedtime Asis and myself decided to abandon our plan. The next day when I visited Sreedhar, I asked him about what he thought about it. His advise was that we should write to the station instead of going there. Five days passed by and finally the day of return journey arrived and we were to leave that day evening at 8'o clock. And then the temptation of visiting Deshikar Street got

too much to resist. But Asis backed out. It was then decided that he would stay back and if I did not return by 4 hours, he would start a "search". I left house at 9 AM wearing a Radio Veritas T Shirt and carrying a polythene bag containing a cassette full of VOTE recording and an issue of ADXR.

Deshikar Street is a modest lane leading a way from the South Arcot Road, in the suburbs of Vadapalni. I was relieved when I found that the lane is just next to Police station. Standing at the end of the lane is a modest two story building with a small iron gate on which "11" is casually scribbled with white. When I rang the bell, a girl came down wearing a house coat. "I have come regarding Voice of Thamil-eelam and this address is given out by the station as a contact address", I said. "Yes, how can I help you" - she asked with a blank expression. Immediately I started telling her about what ADXR was, and that we bring out a magazine called ADXR, a copy of which I showed her and that I wanted to cover VOTE for this magazine. Does she mind? "Of course not, we need publicity. By the way I am Malathi; I announce for VOTE's English service." I was stunned and all these happened in the doorstep. Had I hit the jackpot?

Malathi called me upstairs and told me to wait for sometimes while she was trying to get in touch with any of the "organisation" fellows. But the chief man "Candappa" wasn't there though he was expected anytime. He is incharge of VOTE. The "organisation" which Malathi referred to was Peoples Liberation Organisation of Thamil-eelam (PLOT), the group which runs VOTE. I was seated in the drawing room while she sent a messenger for a PLOT member. It was a long three hours wait and in that time we talked about many related and unrelated things. But I got a glimpse into the affairs of VOTE.

Now who is Malathi? All the while I was quite sure that they must those well to do Srilankan Tamils who migrated with all their fortunes. But when I put the question direct to her she struck back. "No, no, no, I am very much Indian". She finished her high school this year from Adarsh Vidyalaya in Madras. Her father is an Engineer employed with the Tamilnadu Government. It so happens that their tennant is a Srilankan Tamil who are involved with PLOT. And that is how she got to know all these and subsequently started feeling strongly for their cause. Then she met Candappa who told her that he needed a female voice for the Thamillelaam Radio. Since Sinhalese and Tamil are the only two official languages in Sri Lanka, except for Candappa no one else knew English and with one voice, the English program was getting monotonous. This is where she came in. She has been announcing for the past eight months, with an interruption because of her class XII exams. Interestingly enough she is not taken to the studios (at least she says so) but her portion is recorded at her own house and then mixed with the rest of programs. What kind of equipment do they use? "It's something with a lot of controls in it and a sound engineer does that. They put somethings, on the wall too". May be what she was referring to was a sound mixer and may be they put curtains on the wall to make a makeshift studio. But where are the main studios, are they in Madras? She vaguely said that she was not sure. "What about the transmitters?" "I think they are amateur transmitters", she said and then immediately went in for an excuse. "I don't know clearly. You see I am not in the organisation and they do not tell me everything". She also produces a women's program in English. "Is it about cooking and stitching etc" I asked. "No, no, no, she vehemently protested. "It is about emancipation of women".

All this time the power was not there and the electricity came, she got a cassette player and I played the VOTE recording for her. It sure was a poor piece of recording, full of static, feeble audio and worse modulation. But in that din she beamed at a jingle which was playing. "You hear this music. It is the Anthem of African National Congress". "How are they related?" I asked. "They are Fraternal Organisations. Same with PLO." During monitoring of this radio in Calcutta Prodyut had noted some exaggerated piece of news. So I asked her where do they get the news from. "The news on Sri Lanka is through their sources. As for the rest there is usually information on other freedom struggles, such as news about the ANC and the PLO. This is picked up from BBC World Service". After listening to the cassette for sometimes Malathi asked me a frank question. "I say, can you make out anything from this recording. The reception is so poor". I told her that she was correct. "How do you receive the station here in Madras?" "I have not yet heard it here", she replied. So that was it. The station was quite a distance away from Madras. P Prodyut had asked me to get a QSL for him and when I asked her for one, she didn't know what it was. "Don't you get reception reports?" I asked. "Yes" she replied. "I have seen one or two such". So she has access to the mail as well. Where do they get the letters from? "It is from Tamilnadu, Kerala and Sri Lanka. Even Sinhalese have written to us after listening to our programs".

I had been sitting at her place for nearly three hours now. She had gone downstairs twice to see if the PLOT fellow had come. And in her absence I wondered how did her parents allow her to get involved with all these Militant activity more so because the Tamils of Madras view them with considerable caution. But Malathi had an answer to that "You see I have been brought up in a different fashion than other Tamil girls. I mean I have been given more freedom than my friends who will not be allowed alone even to visit a friend's place. May be that is because I am their only child of my parents". In a lighter mood I asked her what her plans for the future were. "I want to become veterinary surgeon. I have four dogs and I have had to take them to the hospital now and then and that is how I got impressed by the vets". Our conversation, a rather lengthy one was cut when finally news arrived that people downstairs would not be able to help me. Instead I was given a plain white card with the address of PLOT office in Madras, written by ball point pen and the bus numbers indicated on the reverse. As I was about to rise, Malathi asked me to write down the information which I needed, which she would collect from Candappa. I was also given an English magazine "SPARK" published by PLOT to help me to know more about their activity identity and ideology. A jubilant me was dying to rush home and inform Asis about my breakthrough. Malathi was less exuberant. "It is so nice to know that some one living thousand miles away takes interest in our efforts".

I reached my place at 2.00 PM in the sweetening heat (41°C) and informed Asis. I had to visit the PLOT office and this time Asis agreed to accompany me. After a quick lunch I started going through the literature on PLOT. The cover showed a star of David superimposed on Bull's eye and a bare bodied Ronald Reagan holding a gun, in the inset. In the fore ground there were drawings of a soldier, a man and a woman training their guns at Reagan. The caption said "ALL GUNS AGAINST THE ENEMY". On the back cover there was the diagram of a Stengun, Olive branches and a bird. The caption said "We go to Thimpu with gun and olive branch in our hands ... we hope we will not be forced to use the gun" - Umamaheswaran. The literature was full of jargons typical of communist revolutionary groups - "fascist", "imperialists", "reactionary" etc. On first glance I noticed that there was a program carried by VOTE. It was the interview of Comrade Umamaheswaran by Comrade Skantha. By the way, the verie signer of the VOTE QSL received by Jose was "Comrade Skantha". Umamaheswaran is the leader of PLOT. On close scrutiny I reached at a number of conclusion. This group is a moderate among the militants, which is somewhat paradoxical though. In its editorial it quotes Mao Tse Tung and Che Guevera and elaborates on the "Science of Guerilla warfare". Ultimately it concludes that guerilla warfare is harming the common man of Sri Lanka and hence useless. In various places the magazine hits out at the other more militant groups. In this contact may I quote a line from the magazine which says "a small cotiery of individuals who control large financial resources are making use of hoodlums who go under the name ENLF. They make pretensions at being liberation fighters but attack civillians both Sinhalese and Tamils" - Umamaheswaran while mourning the death of two TULF MPs (3 Sep 1985), over VOTE.

With this homework and with Asis by my side, I set out for the PLOT office, some where in Madras. When we reached there, at 4.00 PM two gentlemen were waiting for us. The room was a simple one with a table, three chairs, a telephone, a cupboard and the wall filled up with posters. "You are from that listener's club" one of them said while welcoming us. I got out a ADXR and showed him one item of Clandestine News. Then I told him that I am interested in featuring their station too. But these gentlemen were tough nuts to crack. They did not reveal anything apart from communist jargons. When we asked them for the latest schedule, one of them got down a calendar from the wall. It was published by PLOT and showed all sorts of gory pictures, such as a man with slit throat, one with bullet injury etc. And then he pointed out the schedule, printed in one of the pages. It was in Tamil but the figures were in Roman numerals. "If your security permits may I know the location of your station in South India?" I asked not very hopefully. "It is in Northern Sri Lanka" was the answer. I could make out from the man's face that he was lying. Before ending our fruitless tour to this office. I thought of some "ideological teasing". I asked this man "What your claim in your literature, is that you are fighting to liberated Sri Lanka from the "imperialists". But your primary aim is to set up a separate nation called Thamileeam. Now this is essentially a racial aim because you are dividing the Sinhalese and the Tamils. Now how do you compromise communism with racism?" These people were not outcaused in ideology and the answer was innovative - "Our enemy is not the Sinhalese but the Sri Lankan Government. But as a first step we want to liberate Thamileeam and then use it as a base to Liberate the whole of Sri Lanka". As we were leaving we were given a copy of "SPARK" and a "Calender" and I wrote down my address in a big bound registrar which I suppose was the minutes book.

In conclusion what do I write? Nothing, but I just cannot help quoting a very frank letter lying in my desk. It is from a IDXCI member whom I had approached for help in my investigation. "Sorry Sanatan, I can not provide you any information on VOTE. But I know well from where VOTE has been broadcasting and places they used to broadcast in the recent past. Even I know of their transmitter rig and antenna to some extent. even I visited once "Eelam Radio" (of Eelam Peoples Revolutionary Liberation Front) base. But I do not want to leak any precise information you might have observed that I avoid to give infomation on Tamil militant stations.. I know of Tamil militant stations for sometime now. It is not due to fear but because of my love upong Tamil Tigers. After Militants achieve "EELAM", I can give you a lot of information on Tamil militants radio stations. Till, then I wish to be a silent observer. Let the information not be leaked by me. If some body gives info on Tamil militant stations. I do not mind. Let these information not be leaked by such Eelam supporters like me! That's what I wish! I hope you understand me".

P.S. - Some of our members might be disturbed by the overtly political nature of this article. This is inevitable while dealing with any clandestine station, since they are essentially political.

The views expressed in this article are mine and not necessarily of the IDNCI HQ people.

The latest schedule of V.O.T.E. could not be included as it is yet to reach us from the P.L.O.T. office.

by SUPRATIK SANATANI

I N M Y O P I N I O N (Ernie Behr, Kenora Ont, July 7)

If anyone feels that we have unjustly criticized KCBI's Radio Connection & Capital DXers of Sacramento in recent editions of LN, here is another list of their loggings, as heard from April to June 86 via KCBI. All items were taped and are quoted exactly as given by Club president Phil Reeper:

RRI Tanjung Karang 3346 & 2295 (stn is on 3246 & 3395)

RRI Semarang 3335 at 1230 (stn is on 3935)

TWR Monaco 11740 at 1500 (stn is Vatican R)

TWR Italy 6215 at 0430 (stn is AWR)

V of Turkey 9516 at 0030 (stn is on 9560)

R Milene Bay 3260 at 1200 (stn is on 3360)

R Anharera, Brazil 4890 at 0830 (no such stn)

R Polina on 15120 at 0330 (pronounced Polezna)

R Avoyacucho, Peru 3220 (more likely HCJB)

R Universo, Peru 6020 (stn is R Gaucha, Brazil)

Many minor errors are not included here, and it should be noted that all items are aired without proper credits and cannot be traced to the original contributors. Although a long list of corrections was sent to KCBI, not one mistake has ever been acknowledged or corrected on the air. Instead, RC host Jeff Fallon keeps praising the accuracy of Capital DXers and continues to scoff at all criticism. Can we believe a DX-Club whose president and chief editor has never heard of Radio Polonia?

Some questionable items have also appeared in Friendx Log Report in recent months, including R Santiago, DR on 9700 (Apr LR) LV del Zanda, Peru, 4820 (May LR), & R Quimbi, Brazil, 4885 (June)

(Tom Laskowski, South Bend IN, June 29) On KCBI's Radio Connection today at 1903 it ended with "You've been listening to the Radio Connection, your source for erroneous information... (short laugh) And if you believe that you've been reading too much from those who are legends in their own minds." Ironically their last report was from someone in Minnesota who gave the frequency for a hurricane network as 15325 kHz USB. The well-known freq for the hurricane ham net is 14325. Ernie Behr is right. I think this type of garbage should be avoided by those who want accurate DX information.

gh: Why am I running these? I would rather not, but the KCBI people have a platform to laugh off critics, and apparently won't quote Behr, so he and Laskowski deserve to have some platform--and their criticisms are backed up by facts. Despite this imbalance, I want to make it clear to the KCBI people that these pages are open for their response if they care to make one, in all fairness. I personally think it's a shame that a potentially useful program is marred in this way, since Jeff Fallon apparently decided to stonewall, letting his loyalty to contributors exceed his judgement, rather than simply broadcasting whatever corrections were necessary as soon as possible. I still have high hopes that TRC's error rate will gradually decrease even if they refuse to deal seriously with past mistakes. Perhaps it would be best for those so upset by the program to avoid listening to it! Except for any possible response here by the KCBI people, let's terminate this discussion. The points have been made.

PUBLICATIONS You may've hrd gh thinking out loud on W.O.R. about taking a break, but at the moment a stoppage is unlikely, just maybe a slowdown. A new DX Listening Digest, No. 7 is now available, 39 solid pages of DX news country-by-country; samples \$1.50, NAM subscriptions \$17 for 12 issues from gh's address

RÁDIO ANHANGUERA
 RUA THOMAS EDSON, Q. 7 - 3. MERIMHA
 POB. (PARA) 241.5633 - TELER 982719 - C. PORTAL 13

RADIO STATION: Rádio Anhanguera - Goiânia-Goiás - Brasil

TO: JOHN WILKINS

We thank you for your reception account. We confirm the precision of details of our broadcasting of short waves in the frequency of 4915 KHz from the 19 of April 1985, from 03:20, until 04:00 o'clock, exactly when we were showing the program ANHANGUERA IN THE MORN with our speaker MOYSEVA REZAO.

We would like to continue receiving the reception account, because it is important for us to know that our Radio Station can also be heard out of our Country.

Sincerely, Carland

Dengan hormat,

Laporan anda kami terima tanggal 19 Februari 1986, kami mengucapkan terima kasih atas perhatian anda pada siaran kami.

Setelah kami periksa dalam buku laporan siaran ternyata BENAR saudara telah mendengar kan sebagian dari program siaran RRI Tanjungpinang pada jam 21.35-21.59 WIB tanggal 5 Februari 1986 berupa program musik Indonesia yang dinyanyikan oleh Vina Panduwinata dan Erny Kulit.

Bersama ini kami lampirkan juga sebuah Leaflet RRI Tanjungpinang, semoga bermanfaat.

Sekali lagi kami mengucapkan terima kasih atas laporan anda.

Sam

25th anniversary of the USIA.

July 23, 1986

Most of these listings of English language broadcasts have been compiled from live monitoring and schedules received from the stations themselves. The majority of these listings have been validated through monitoring. For example, Kol Israel announces 5880 kHz at 0100 UTC but they are actually on 5885 kHz. The multitude of Moscow and London frequencies have deliberately not been listed; it is an endless chore to keep up with those changes.

The database used is dBASE III Plus on a Compaq Portable with a 20M hard disk. Two files, one schedule and one dx shows, are used. A link is set from the DX show file into the schedule file to obtain frequencies and additional information when producing a screen or printed report.

Questions or comments should be directed to me. Electronic mail is preferred if you have that option.

Tom Alleman
636 E. 74th Terr.
Kansas City, MO 64131 USA
(816) 523-7292 7-10 pm

UPCOMING DEADLINES: 10 August (Mid-August) 20 August (September) 10 Sept (Mid-Sept)

Reproduction permitted. Credit original reporter and NASWA UPDATE. Dates, times and days GMT; freqs kHz.

The "dog days" have certainly hit here, with temperatures in the high 90s during the day and static levels equally high throughout. Whew!!! But we have reports from Ed Kusalik in Alberta and some more from Dr. Richard Wood in Hawaii to keep you up to date . . .

First from Richard:

UAE UAE Radio Abu Dhabi, 4905, noted daily in Arabic, e.g., news 1530. ID is "Sawt ul Amirat al Arabiya Mutahida min Abu Dhabi." Into Arab music 1548. Despite claims of WRTH that this is subharmonic or error caused by non-use of a frequency doubler, and that the intended frequency is 9810, this appears to be an intentional regularly scheduled transmission. There is no sign of 9810. (6-25)

USA The Voice of Free China relay via WYFR, Florida noted on 11740 at 0200-0300 in English announced as beamed to Central America. Note that this conflicts with Radiobras, Brazil, also in English to the Americas 0200-0300 on 11740. (7-7) Also 0300-0400 in English on 9680. (6-30)

USSR R. Tashkent, 7325, in English to S. Asia 1330-1400; poor with ~~se~~ are QRM from another Soviet station, Mayak. (7-3)

THAILAND R. Thailand, 4830//6070 and MW 1467, heard with Thai talks 1530, vibrant chining interval signal 1558 and id "Thini...Prathet Thai" and sign-off; 1559 slow choral national anthem, 1600 automatic time signal (5 pips) through the anthem, off at 1601. Both good; no sign of listed 7115, which may be inactive. (6-16)

And now on to Ed's reports:

CLANDESTINE Council for the Liberation of Surinam via LV del CID, 9940, *2239k-2256k*. Noted at 2238 s/on after LV del CID signed off at 2235 and left dead air. Program of talks with comments directed to the government of Surinam. At closing of program several bursts of drums were noted. Sign-off 2256k then dead air. LV del CID back on air 2257. Very strong here.

COOK IS. R. Cook Is., 11761(m), 0504-0605, noted with EG pop songs such as "Hello" by Lionel Ritchie, PSA's, IDs for "Radio Cook Islands", narration program at the half hour in Maori. Fairly strong at times. Time check 0600 for 8:00 local time. (7-1)

GABON Adventist World Radio, 9630, 1700-1720, heard with IS, s/on, ID for "AWR" then into religious program, with mentions of AWR. Bad noise made reception difficult and faded out to band noise 1720. (6-24)

Africa #1, 15200, 1448-1535, noted w/ EG pop songs, IDs for Africa #1, EG news bulletin 1504, then back to pop mx. Always a pretty strong signal here. (6-27)

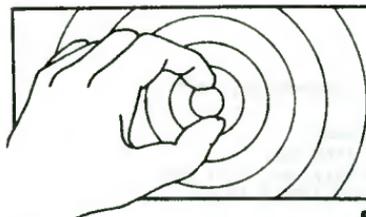

ISRAEL Reshet Bet, 11585 and 13745, noted at 2020-2130. Phone in talk show at t/in, and newscast prior to hour. Five time pops on the hour, clear ID for "Kolyisrael b'Reshet Bet." Commentary/off the air relay, then back to talk show. // 13745. (6-26)

MALI RTVMalienne, 4835, *0555k-0620, noted at sign on w/ "Cora" strings played, then NA, w/ nice clear ID for Mali, then program review/schedule of times, etc. This followed by program of native songs. Very strong. (6-25)

MOROCCO Radio Monte Carlo, 1353-1501*, noted with commercial programs/pop songs, ads for Marlboro cigarettes. IDs for R. Monte Carlo and mentions of Morocco heard. IDs in AR and FR. Fair w/ full ID at s/off. (6-27) ***freq? tba

SOLOMON IS. SIBS, 9545, 0605-50, noted with very clear IDs and local time checks. Prgm of birthday wishes/requests, religious program and into program called "Solomon Messages." PSAs for the islands. Very strong this night. 7-1

Thanks to Richard and Ed. 73 to all--

LOG REPORT

- 6195 ANTIGUA BBC, mx at 1106, "Nx Abt Britain," exc sig 6-18 (Brann). 73 -

LOG REPORT

section C

6200 to 11699 kHz

Editor: Peter Drizhal, P.O. Box 663, Oxon Hill, MD 20745

ON THE WAVE:

First to make mention of an increasingly common error--Radio Monte Carlo nests in Monaco not Morocco... Didn't use this log because it was already mentioned last month, but Jim Feeley (of GA) noted in his report of Radio Sweden (9695), "Letter bomb exploded at headquarters of Finland State Broadcasting." The kind of report you don't get every day--so thought it worth mentioning. Elsewhere...

Here's a brief extraction from a slightly irate letter received (or actually, a paraphrase with own interpretation)...REPORTERS: make sure your loggings are in Universal Time; b) before reporting a station, be certain you're actually hearing it (noting you caught an ID will help dispell my suspicion, especially with more uncommon stations broadcasting in a foreign language); c) it's better to list a station as "UNID" rather than cause confusion with a "MisID"; d) and by the way (to a couple of you), pu-leeze write legibly, and not in a cursiva that only a decoder could read--these are, after all, supposed to be log reports and not prescriptions. [Did I cover it all, "E"?]

- 6240 UK BBC 2340-2400 EG, Thot I had a pirate at 1st, w/pop mx countdown pgm, jingles, b/then BBC ID & nx at 2400. What's the BBC doing on this freq? Weak (Alexander-PA 6/18 & 7/6)
- 6577nf ALGERIA RTA 2250-2309* AR, AR mx, tx; g (Alexander-PA 6/14)
- 6670 UNID. 0115-0127* SP, f b/with rtty QRM, tx by M&W, martial mx but no ID heard (LV de Alpha 66?) (Alexander-PA 7/5)

A total of 23 contributors this month, GOOD WORK FOLKS!!!

May I say hello to all you fellow shortwave listeners, I'm Abe Lewkowicz and I'll be filling in for John this month. He's ailing from kidney stones, OUCH!!! He should be back with you next month.

I live in South Weymouth which is the next town over from John's and I'm a computer repair technician for a computer company located in Plymouth. Well, you're probably wondering how do I fit in with John? We had met through an ad when John had some shortwave gear for sale which was well over two years ago and we have been good friends ever since. What more could you ask for than to have a friend close by that shares the same hobby and interests. He had also introduced me to other shortwave listening friends, one of which is your NASWA Awards Chairman, John Kapinos, and when we all get together we have a real good time (and our XYL's really don't seem to mind it at all..Hi Hi!!!).

He's a good editor and a good friend and let's all wish John A HAPPY GET WELL SOON !!!

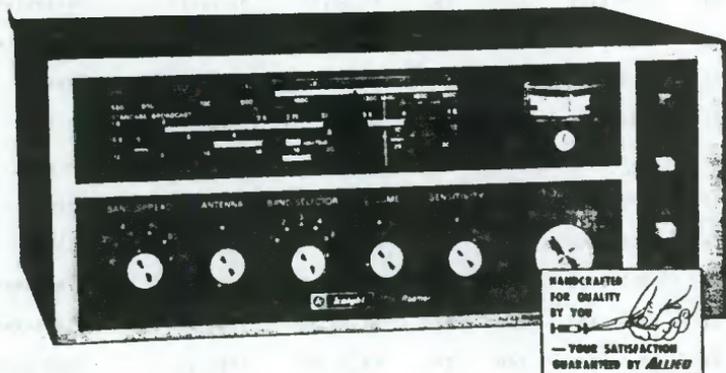

And to all you contributors, it was a pleasure to be you temporary distributing editor, Now back to some DX'ing...

73's and GUD DX DE ABE,

From Tom McElvy & Old Dominion
Dominion DX Association.

Build this famous *knight-kit*[®] Star Roamer[®] 5-Band Shortwave Receiver Kit

and have the whole wide world at your fingertips!

Think of it!—even if you know nothing at all about electronics—in a few fun-filled evenings you can assemble the Knight-Kit Star Roamer that lets you listen to the four corners of the world!

You visit the famous cities of Europe, Asia, Africa ... get continuous 24-hour-a-day aviation weathercasts ... zero-in on Coast Guard LORAN signals ... get the exact time from station WWV in Washington, D. C. ... listen in on the interesting conversations of Mams, Citizens Banders and Radio Telephoners—AND listen to your favorite programs on the standard AM band, too.

Thousands of folks of all ages have assembled the Star Roamer and have been amazed at how easy it is. All you do is follow crystal-clear, non-technical instructions and extra-large illustrations that show where every part fits ... and almost

before you know it you're listening to exciting broadcasts from all over the world!

The Star Roamer covers 200 to 400 kc and 550 kc to 30 mc in 5 bandswitched ranges, and features a reliable superhet circuit ... plus Automatic Volume Control to prevent fading and blasting, illuminated "S" meter for fine tuning, and many other features found only in shortwave receivers that cost many times more.

Complete with all parts, handsome 5½ x 12¼ x 8" charcoal gray and aluminum case, and easy-to-follow assembly instructions for only **\$39⁹⁵**

Read the unique money-back guarantee ... exclusive in the industry ... then rush coupon for full details and Special Introductory Offer.

KNIGHT-KIT GUARANTEE

Build a Knight-Kit in accordance with our easy-to-follow instructions. When you have completely assembled the kit, you must be satisfied or we will return your money, less transportation charges, under the Allied guarantee of satisfaction.

ALLIED RADIO
