

FRENDX

RADIO AUSTRALIA international shortwave radio

LISTENING GUIDE

Aboriginal Australia Today: culture, music, arts, heritage of Australia's Aborigines.

Anything Goes: a lively musical smorgasbord.

Arts Roundabout: reflecting significant achievements in the Arts in Australia, past and present.

Australia Makes Music: fine music from Australian composers and performers.

Australian Country Style: surviving the local country and western scene.

Book Readings: serialised readings from popular books.

Business Horizons: reviewing business and trade in Australia and neighbouring regions.

Comic & Curious: offbeat, odd and amusing stories.

Country Wide: news and information about agricultural and primary industries.

Eric Waite's People: Writer and broadcaster Eric Waite meets and chats with Australians from all walks of life. (starts 25.4.87)

Health Report: examining current research and issues occupying the Australian media world.

Home Front: memories of Australian life during World War Two. (ends 2.4.87)

Innovations: reporting on Australian inventions and innovative practices and processes.

Interaction: the activities and experiences of multicultural Australia.

International Top Hits: the week's biggest sounds.

Jazz Australia: a showcase of Australian jazz.

Letters to the Editor: selections from the letters columns of Australian newspapers.

FREQUENCIES

Radio Australia uses around 50 shortwave frequencies daily. Start your listening by trying one or more of the following.

Asia: 17750 and 17715 kHz (16 mb), 15415 and 15240 kHz (19 mb), 11800 kHz (25 mb), 7205 kHz (41 mb) and 6035 kHz (49 mb).

Pacific: 17795 kHz (16 mb), 15395, 15240 and 15160 kHz (19 mb), 9655 kHz (31 mb), 7215 kHz (41 mb) and 5995 kHz (49 mb).

Papua New Guinea/South-West Pacific: 15160 kHz (19 mb) and 6080 and 5995 kHz (49 mb).

Matters of Faith: examining the doctrines and beliefs of the faiths of Asia, the Pacific and Australia.

Open to Question: investigating and discussing matters of social concern.

Smith's Weekly: a pot-pourri of news and views with Keith Smith.

Soundabout: young contemporary music from Australia and around the world.

Sports Magazine: the stories and personalities making the week's sporting headlines.

Taim Bilong Masta: memories and experiences of people who have lived in Papua New Guinea.

Talkback: DX and communications program.

The Week in Science: reviewing science and technology.

This Australia: documentaries about the land down under.

You Asked For It: Denis Gibbons and Desley Blatch answer listeners' questions about Australia.

Veterans of Vietnam: the thoughts and feelings of Australians who served in Vietnam and their lives today. (starts 5.4.87)

Window on Australia: looking in on people and places all over the nation.

What do you do for a Crust?: people and their jobs.

Word of Mouth: oral histories of people who have made significant contributions to Australia.

Keep in touch and informed at all hours with RA.

News: Australia, Asia, the Pacific and the world at large - reported accurately and impartially.

International Report: analysing, backgrounding and interpreting regional and global issues and events.

Africa/Indian Ocean: 11945 kHz (25 mb)

United Kingdom/Europe: Suggested times and frequencies include 0700, 1000 UTC on 9655 kHz (19 mb) and 1530, 2040 kHz on 7205 kHz (41 mb) and 6035 kHz (49 mb).

North America: Suggested times and frequencies include 2200, 0400 UTC on 17795 kHz (16 mb) and 0800, 1500 UTC on 9540 kHz (31 mb).

A comprehensive schedule, outlining all frequencies and hours of broadcast for all Radio Australia services, is available from Australia's overseas missions or Radio Australia.

LANGUAGES

Radio Australia broadcasts daily in English, Indonesian, Standard Chinese, Cantonese, Tok Pisin, French, Thai, Japanese and Vietnamese. Write for program guides and frequency information.

August, 1987

A quiet CONTACT this month. The Mailman had surprisingly little difficulty delivering the *two* letters that did arrive. Still, it's all interesting material, and I hope you enjoy...

From *John Mosman* comes a letter that covers a couple of topics that have appeared in CONTACT recently:

There are two areas that I am writing about, so here goes:

1. I participated in the 1987 North American DX Championships last March put on by Numero Uno. I really enjoyed the contest and the certificate was very nice. The results were printed in July's FRENEX. I do wish to express one disappointment, the results should not have been limited to only the top three finishers. If all the participants could not be listed then the twenty people who received numbered certificates should have been. In addition, the total points should be listed by each person listed. I guess I am a competitive person and when entering a contest want to know where I placed and in what relation. However, my thanks to Numero Uno for a fine contest and look forward to the next one.

2. I was very interested in Vern Nicholson's letter (July) regarding time management. I find myself in the same type of situation. In addition, one reaches a point where random tuning will not produce new countries and stations. In my case, limited time makes the time I spend listening more important and therefore I want it to be more effective. Information organization is a key — the following is what I do to help in time management.

Using a Honeywell PC at work (wish I could have one at home!) I have created the following informational tools:

- I. All Countries Needed
 - A. Using the ODDX "Country/Availability List" I've determined all the countries not verified.
 - B. Using TWIN (a Lotus 1-2-3 clone) create a data base listing country, station(s) and the reference logs in the list.
 - C. Sort list in ascending order by time.

This now gives me a list that at most any time I find time to listen I have a defined target to look for. This removes the random tuning looking through the bands.

- II. Prime Targets
 - A. Select a small number of target countries to concentrate on, 5 to 15.
 - B. Using word processing create a single page per country.
 - C. List all transmission schedules from all sources (WRTH, RDI, FRENEX, etc.). These are listed in ascending time order showing frequencies, days of transmission and other notes needed. Each

- transmission has the source listed.
- D. List IDs, interval signal information and QSL information from club sources.
- E. Use Prime Log – yes or no (see Prime Logs).
- III. Prime Log
 - A. Another TWIN list, sorted in time order, listing all logs reported in FRENDEX, etc.

All these are put in a three ring binder with tabs for easy reference. So, I can plan my listening around my PrimeTargets or, as I mentioned, at least have some targets no matter what time it is using the All Countries Needed list.

All the information is stored in the computer making updates very simple to do. I know that not everyone either has a computer, or has access to one, but I thought that I would share my system.

Computers certainly have changed the ways in which many of do things — including keep records of our listening. I am perfectly aware, however, that there are many people who do not have computers. Would anyone care to describe how they undertake non-computerized SWL/QSL record keeping?

From *Charles Boehnke* (Keaau, Hawaii) I received an interesting issue of *Radio World* (dated 15 July 1987) that discusses renovation at the VOA. *Radio World* appears to be a periodical (in tabloid format) aimed at broadcast professionals and covers general developments in technology and legislation. It appears to come out monthly and is free to qualified people in the broadcast profession. Information can be obtained from Radio World, P. O. Box 1214, Falls Church, Virginia 22041.

The substance of the article (written by David Hughes) centers around the proposed renovation of VOA's Washington studios. This is part of a larger renovation process that is expected to last into the 1990s. The interesting question seems to be: can the necessary renovations be accomplished for the bid amount of \$6.6 million? Many industry experts seem to think not. An estimated \$3.2 million will have to be spent on the audio equipment (some equipment now at VOA dates from the 1950s). The remainder must be spent on carpentry and wiring — in addition to the removal of cancer-causing PCBs and asbestos.

Essentially, the problem is that the audio equipment probably cannot be bought for around \$3 million. Two unfortunate side effects might well make themselves felt. First, in order to get low-cost goods, the contractor will have to go to non-broadcast equipment firms in order to get the necessary goods, and this will unnecessarily complicate the progress of the renovation. Second, cost over-runs will almost certainly occur. None of the firms that criticized the bid permitted themselves to be quoted directly. Those analysts, on the other hand, that seemed to feel that the equipment *could* be obtained for approximately \$3 million *were* quoted directly: none of these people, however, seemed to be aware of any criticism of the bid (why am I not surprised?).

This column was produced on Aldus PageMaker2.0; the masthead was redrawn on Cricket Draw, while the word "Contact" was produced directly with a small PostScript program.

Some suggestions for your input...

- Newspaper and magazine clippings seem to have become a staple in CONTACT. That is fine with me — if you see something that you find interesting, please send it along.
- We'll be making another visit to the CONTACT Bookshelf in another month or two — your suggestions for inclusion, and your comments on books and listening aids that you have used would also be very welcome.
- To those lucky people who went to ANARCON — tell us all about it!
- Don't let the hot weather keep you away from your radio — listening in the early morning (when it's cool) is a really pleasant way to start the day. Submit some logs, and then tell us about what you heard.

Many best 73s

DX'ers Forum

August, 1987

Conducted by:
Chuck Rippl
1272 Parkside Place
Virginia Beach, VA 23454

E-Mail: ODDX or ACE BBS
ID = Chuck Rippl
Deadline: 17th of the month

A shorter column this month and a brief overview of the ANARC convention from which I just returned.

Here is an offer DX'ers might be interested in. Anyone contributing to DX'ers Forum will receive A FREE COPY of the ODDX Country / Availability List. This valuable DX'ing aid is a must to help organize your hobby DX activities. When submitting items for DX'ers Forum, please remember that they should be address the subjects of DX techniques and experiences. Please do not send items which would be better served by appearing in Contact, Log Report, Listeners Notebook or any of our other columns.

Have you gotten your copy of BLANDX yet? This truly funny spoof on FRENDX is available for \$2 from:

Don Moore
693 Fullerton Apt 103F
Glendale HTS, ILL 60139

In the months ahead, you will be hearing many different recounts of the 1987 ANARC convention so I won't go into a very detailed overview here. There are, however some highlights of the convention which are DX related which I found of interest.

I arrived on the night of the 16th, Thursday. After checking in and getting settled, I had a chance to meet some of the attendees that had arrived early during a reception hosted by the Ontario DX Association (ODXA). Several of the broadcasters we all know of were in attendance including: Johnathan Marks of Radio Nederland, Ian McFarland of RCI, and Ken MacHarg of HCJB. Also during the reception, I had a chance to visit with past NASHA Executive Editor, Dan Ferguson. For those of you who don't know Dan, he played a very large role in the early 1970's publishing and establishing FRENDX as the leading SWBC publication. Dan now works for the Voice of America in the frequency management division.

Friday had 8 seminars and exhibits scheduled of which I attended 6. The RTTY and Facsimile Seminar by Fred Osterman of Universal Shortwave was very interesting and informative. The forum I would have liked to have attended but was unable to was "50 Years of DX'ing" presented by Dr. Tom Williamson. The remaining forums were very well done but were of interest more to the SWL and monitor than the DX'er.

Saturday's agenda was packed with 11 exhibits and forums. Again, of the forums I attended, Aeronautical Radio by ODXA's Bob Evans, Antenna's by Tony Ward and the Equipment Forum proved to be the most interesting from the DX'ers perspective.

Saturday night's banquet with keynote speaker Bob Grove was the high point of the evening for all. Bob gave an extremely interesting and personable speech on the convention's theme, Communications Yesterday, Today &

Tomorrow. This was followed by drawing convention door prizes. The first prize was a Caribbean Cruise, the second, an Icom IC-R71A.

Sunday, the final day of the ANARC Convention was the high point of the ANARC convention for me. ODXA's Cedric Marshall and David Clark presented what I feel was the most understandable and technically correct explanation of radio propagation I have yet to see.

Sunday's last seminar, the WRTH quiz presented by Andy Sennitt, editor of WRTH and assisted by Johnathan Marks of Radio Newerland was really super. Two teams, one for the US and one from Canada were chosen from among the attendees. The members of the two teams were:

USA

Sheryl Paszkiewicz of NASWA / F.T
Stephen Lare of NASWA / Michigan Area DX'ers
Dr. Harold Cones of NASWA / Old Dominion Dxers Association

CANADA

David Clark of ODXA
Sheldon Harvey of CIDX
John Fisher of ODXA (winner of this years NU DX Contest)

The questions were TOUGH! They were grouped in two categories, identifying taped recordings of material and direct questions from Andy. The tape recordings included identifying languages, some obscure interval signals and the theme songs of major broadcasters played BACKWARDS. Andy additionally posed some equally tough questions on material of all sorts taken from the WRTH.

As you might surmise from the list of top notch DX'ers on both teams, the competition turned out to be as tough as the questions! However, the US team pulled an early 3 point lead which it held on to win the competition for the first time in 2 years. It is interesting to note that all members of the US team are NASWA members.

Many of the convention attendees that came up to me and introduced themselves also asked where the NASWA/FRENDX booth could be found. Unfortunately, I had to tell them that the largest club in North America was not officially represented at ANARC this year. Perhaps next year.....?

I very much enjoyed the convention and meeting the people behind the names seen and heard so often. The ODXA people should be commended for their massive efforts that were behind the overwhelming success of this years convention. After a visit of this sort with our neighbors to the north, it's easy to understand why the US and Canada share the largest unfortified border in the world.

Among the mail I received this month was a note from Mike Agner, inviting all within range of the W3DID repeater (Baltimore, MD 147.03 output) to join him and his SWL group Sundays at 8PM local. If you hold an amateur license or wish to just listen, please feel free to join in.

A letter from Richard D'Angelo provided some really constructive ideas for the column. Rich also provided some helpful hints for anyone seeking a QSL from North Korea:

A difficult country for me to verify has been North Korea. Quite a number of reports have been sent to Radio Pyongyang over the years without results. It seems that the problem is getting the mail out of this country. I found a DX'er in an other country to forward my report and low and behold, I received my QSL in 109 days. Thanks to Gerry Dexter and Arthur Ward of WDXC for their advice and help. This also serves to reaffirm the importance of maintaining DX friendships in other lands.

Another troublesome country to verify was Uganda. Every QSL request came back with a Ugandan solicitation for money. (This social-economic problem is best left for others, ED) It would seem that my reports were not getting through to Radio Uganda. Gerry Dexter suggested that I send a registered letter/report. My subsequent letter turned out to be expensive, slightly over \$4.00. However, my efforts were rewarded with a QSL in "just" 88 days. In the end, the results justified the costs.

My sincere thanks to Rich for taking the time to write in and offer the NASWA DX community the benefit of his experiences.

From Bill Sharp in San Francisco, I recently received the remake of his 1983 Shortwave Center Indonesian article. Because of space limitations, I can't run it next month but for certain, DX'ers Forum will feature "Dx'ing Indonesia" in the October issue of FRENEX. Many of you know Bill through his many contributions and support of FRENEX over the years and the section in Short Wave Listening with the Experts he wrote. For those of you who do not know him, Bill is regarded in many circles as North America's leading expert on DX'ing Indonesia. He has put a real effort into this latest article and I am sure you will enjoy it.

Easy Listening

Editor: Alex Batman, 4618 Alvin Dark, Apt. 4, Baton Rouge, LA 70820

SUNDAY

1730-1800: "Music Time in Africa" (VOA). This is really two shows, the one at 1730 playing traditional African music from Tanzania, Zimbabwe, Nigeria, etc. The second edition of the show on Sundays at 1930-2000 plays Ju-Ju and Hi-Life music and other forms of modern African pop music. Both editions of the show are hosted by Rita Rochelle. (15.410/17.870).

0230-03:5: "The Happy Station" (Radio Nederlands). This is the longest running single program on shortwave, having been played in one form or another since the 1920s. In 1970 Tom Meyer took over the show and is still with it at the present writing. The program is a mix of chat, musical requests, and letters from listeners, all done in a very informal and folksy style. (6.165/9.590/6.020. Repeated at 0530 on 6.165/9.715).

MONDAY

0220-0225: "Pages of History" (radio Bucharest). This is a brief summation of Romanian history through the ages though most shows seem to concentrate on Romanian history since its independence in 1877, and especially since the foundation of the socialist state in 1944. Some rare shows do, however, reach further back into the Romanian past. (4.510/5.990).

0330-0400: "John Peel" (BBC). I'm afraid this show makes me feel how old I'm getting. John Peel plays the latest rock releases from Britain and America, usually about seven songs per half-hour, but I'll be darned if I ever hear very many that I like. The show seems to have a propensity for punkrock and groups like "The Stupids," "Jolution Unknown," and "The Jookie Krewe" are featured. (5.975/6.175).

830-9 pm

TUESDAY

- 0030-0100: "Omnibus" (BBC). As the title indicates the show is a kind of pot-pouri of various features, each week different. Past weeks have featured a tribute to Danny Kaye, a one man performance by Lord Olivier, an interview with an expert on urban wildlife, and a feature on the British Meteorological Society. (5.975/6.175).
- 0110v-0115: "From the Hungarian Weeklies" (Radio Budapest). Each week three excerpts from the Hungarian weekly newspapers are read, covering a variety of subjects, such as economics, politics, art and culture, and even the position of native Hungarians in Czechoslovakia. (9.835/9.520/6.025. Repeated at 0210 on the same frequencies).

WEDNESDAY

- 1210-1225: "On Reflection"(Radio Finland International). A rather lengthy essay about topics and current events in Finland and Helsinki. Usually the essays are well-written and shed some interesting light on Finnish concerns. (15.400/11.945. Repeated at 1310 and 1410 on the same frequencies.) Every other week.
- 2320-2325:"The World of Israeli Sports" (Kol Israel). A brief run-down of the most important sporting news in Israel during the past week, including soccer, tennis, basketball, etc. (11.610/9.855/9.435. Not aired on the Kol Israel broadcasts at 0000 and 0300).

THURSDAY

- 0225-0235: "The Skylark"(Radio Bucharest). Old Romanian folk songs, sung and played by old Romanian folks. (9.510/5.990)
- 0235-0245: "Philately" (R.A.E.). A brief program on stamp collecting, usually featuring important exhibits and exhibitions in the history of stamp collecting, and only occasionally feature Argentine issues. More of program of philatelic topics than actual feature of national issues. (9.690/11.710).

FRIDAY

- 2330-2345: "Our Heritage" (Radio Japan). Topics in the history and culture of Japan including wedding customs, cherry blossom viewing, etc. (11.800).
- 0235-0250: "Mailbag Time" (R.A.E.). A rather typical mail-bag show reading comments from listeners, usually nothing more than reception reports but occasional comments of more abiding interest. Rarely answers questions from listeners and when they do, the answers are usually brief and to the point rather than in-depth exploration of an issue (9.690/11.710).

SATURDAY

- 0210-0230: "P.O. Box 4559" (Radio RSA). Radio RSA's mailbag program, hosted by Cathy Fitch and Shirley Veal. Answers questions from listeners, comments on the mail and comments from listeners. One nice thing here is that the presenters usually read the entire address of the writer rather than just state and country. Goodies, including a book on the history of South Africa, available on request. (9.615/6.010).
- 0335-0350: "Made in Czechoslovakia" (R. Prague). One of Radio Prague's musical variety shows, usually featuring Czech popular music, but sometimes folk music, usually each program having a featured artist or theme. (5.930/7.345. Broadcast earlier at 0135 on the same frequencies). Not on last Saturday of the month.

Technical Topics

Editor: T. J. "Skip" Arey, WB2GHA, P. O. Box C-4, Cinnaminson, NJ 08077

These are the days of the year when I choose to move as little as possible. The Northeastern part of the US of A is griped in record temperatures and the humidity is unbearable. The smart bunkies among us DX in air conditioned comfort. But those of us without benefit of home cooling must sit very still and wait for the table fan to oscillate in our direction. This makes for good reading weather, provided you don't mind a few drops of perspiration on the pages.

Two books have crossed your humble editor's desk and since I am still saving my pennies to buy Robert A. Heinlein's latest novel, these books have been at hand by the oscillating fan so to speak.

Interestingly enough, these books both serve as good purchases for anyone about to spend their hard earned cash on a new (or newer) receiver. As most of you know, I am a firm believer in the notion that knowledge is power. A little money invested in research will pay off in the final analysis.

MORE RADIO RECEIVER - CHANCE OR CHOICE

by Rainer Lichte

copyright 1987

GILFER SHORTWAVE

Gilfer Associates, Inc.

ISBN: 0-914542-18-4

I know that many folks made use of Rainer Lichte's original "Radio Receiver - Chance or Choice" published in 1985. His extensive testing and experience with many modern receivers provided the kind of critical information needed by the SWL looking for the most for his or her money. But you may have noticed that the years since 1985 have been booming as far as new equipment goes. Most of the popular brand names have come out with at least one new model. GRUNDIG has re-emerged in the general market place. Many new "Bells and Whistles" have come out of the Research and Development labs. Changes abound. All these occurrences converged to lead Mr. Lichte to write another critical work that examines the latest radio equipment.

Rainer Lichte's radio engineering education as well as his twenty years of experience in military electronics are most evident in the exhaustive examination he gives to each of the receivers reviewed. The book examines 14 recently manufactured radios including the Grundig Satellit 400 and 650, Kenwood R-5000, Icom R-7000, Japan Radio Company NRD-525, he even includes a pocket rocket class receiver the Panasonic RF-860L.

I find Rainer's writing to be very readable and he makes every effort to explain even the most technical details in a way that a novice SWL would find useful. Each review includes a separate, one page, compilation of all receiver vital statistics for easy comparison.

Something I appreciate is Mr. Lichte's review of the LOWE HF-125 a somewhat underrated British built receiver. Who said the Japanese have all the good hardware.

Soft Cover 96 pages

STANDARD RADIO COMMUNICATIONS MANUAL:
WITH INSTRUMENTATION AND TESTING TECHNIQUES

by R. Harold Kinley, CEI
copyright 1985
PRENTICE-HALL, INC.
Englewood Cliffs, NJ
ISBN: 0-13-842394-6

One of the things that everyone associated with this hobby does is pour over every receiver review we can get our hands on. It doesn't matter if we are in the market to buy or not. We just love these little boxes that sound comes out of. But how many of us really understand what we are reading? Just what is a decibel anyway? What constitutes good sensitivity and selectivity? What is an appropriate level of image rejection? How does dynamic range effect listening quality?

Mr. Kinley is here to tell you just what all these figures are all about, what they mean to you as a-receiver user, and (for those adventurous enough) how to make these very measurements yourself.

In recent years, the Electronics Industries Association (EIA) has made landmark (benchmark?) efforts to bring about standardization of most test and measurement procedures so that, in the end, the consumer might know exactly what they were getting. All you old timers will remember the early days of Hi-Fi and Stereo when you needed to compare 50 Watts RMS with 200 Watts of "Music Power". The industry has recognized that comparable final figures required universally accepted methods of testing. The STANDARD RADIO COMMUNICATIONS MANUAL provides an exhaustive collection of receiver and transmitter testing techniques. The book discusses all appropriate test equipment, how to utilize it, and how to interpret the data from the test in relation to other findings.

Kinley's book provides the reader with all the background needed to allow the receiver user or purchaser to make intelligent choices. You will also find that, with the proper equipment, most tests are relatively easy to perform. And you all know I never object to anything that gets people interested in learning about working on their own equipment.

This book is quite readable but some basic technical background would be helpful.

420 pages Hardcover

RUMOR CONTROL DEPT.
TEN-TEC RX325

Several people have contacted me to say that the Ten-Tec RX-325 has been discontinued. I have even seen this information published.

I have dealt with Ten-Tec for many years and I felt that discontinuing such a product "right out of the gate" was not their style. Ten-Tec has never tried to corner the radio hobby market with any of their gear. Instead, they have a history of producing well built, effective equipment backed by incredible customer service and support. Think of them as the Airstream Trailers of the radio world.

To clear this matter up once and for all I placed a call to SID KIIRELL at Ten-Tec to get the straight scoop. Sid indicated that they had considered pulling the rig because its sales started slowly but the fluctuations of the US dollar and the Japanese Yen have apparently left Ten-Tec standing because sales have become somewhat brisk and new orders are coming in. So the official word is that the RX-325 is still in the market.

Keep those cards and letters coming folks.

73,

Ship WB2GHA

NASWA Awards Program

Awards Chairman: John M. Kapinos, 86 S. Quinsigamond Ave., Shrewsbury, MA 01545

Greeting and welcome to the August Awards Page. The following folks earned NASWA Awards during June 1987:

Gerry BISHOP, Clark AB, Phillipines: Master DX Centurian; Master Papua New Guinea DXer; Senior Indonesian DXer; Master Indonesian DXer; Master Subcontinental DXer; Emissora Nacional DXer; Senior Tropical Band DXer.

Doug COPELAND, Transcona, Manitoba: Arab World DXer; DXer de Pacifica; Maple Leaf DXer

Rev. John C. ECKERT, Norristown, PA: DX Centurian

Richard EDDIE, St. Louis, MO: Arab World DXer; Arab World DXPert

Hans JOHNSON, San Angelo, TX: Asian Continental DXer

Steven R. LARE, Holland, MI: Senior DX Centurian 160 country endorsement

Sheryl PASZKIEWICZ, Manitowoc, WI: Senior DX Centurian

John SGRULETTA, Mahopoc, NY: Master DX Centurian 210 country endorsement, Master Pacifica DXer

Jerry WACHTER, Riverside, IL: World Wide DXer

John M. WILKINS, Wheat Ridge, CO: Australian DXer 10 station endorsement

****kap's KOMMENTS****

Our congratulations to the winners of the Annual ANARC Awards. They were:

Gerry Dexter: North American SWBC DXer of the year

Fred Osterman: Specialty Band DXer of the year

Michael Murray: International SWBC DXer of the Year

Bob Thomann: International Broadcaster of the Year

As in the past we had the pleasure of handling the nomination and balloting procedure for ANARC.

For Trade: 25 issues of Globe Circler Magazine, 1936-1942. This was the bulletin of the IDXA. Excellent condition. Many photos, a professionally produced publication. Will trade for SWBC pennants. SASE for details.

Hopefully this column will appear in the August issue, depending on the vagaries of the USPS Express Mail System. Guess who forgot the deadline and had to be shaken out of his lethargy by our erstwhile Publisher.

Gerry Bishop tells us that he is being transferred back to the U.S. some time in August. He will be based at Eglin AFB, FL. I'm sure that Gerry will be taking aim at the multitude of Latin American Awards we have available.

Father John Eckhert advises that it took him 3 1/2 years to obtain QSLs from the 100 countries needed to obtain his DX Centurian Award. His rig is a General Electric World Radio, which goes to show that you don't need a kilo-buck radio to be involved.

Our profound apologies for cobbling up the spelling of Steve Lare's first name a couple of times. It will probably happen again.

Contrary to rumor, the Miller Brewery did not work 3 overtime shifts to supply the suds for our recent "mini-gathering". Twas only 2 shifts.

We recently picked up a modem for this magic machine. Perhaps we'll meet on one of the many BBS now available to the hobby.

Till next month, take care.

Best, Kap 7/26/87

Hello folks,

Kap's Korner in the February issue of FRENEX got me to the typewriter again. A really fine article of someone who knows what he's talking about. Many of the good old names disappeared in the past years. Contribution of the 'oldsters' seems to be limited to the 'closed circles' only and I really don't understand why. But in such a nice club as the NASWA there have to be more enthusiasts than just the 30 or so folks who mind their own business in NU or RNM.

My target of DX-activities is Latin America, including Brasil. I started DXing some ten years ago, but it lasted until 1982 when I wrote my first reception report. In the past five years I've received many QSLs mainly from South America. I'm not very interested in verifying new countries. The thrill of a new QSL from a regional American broadcaster is much bigger for me. Jerry Berg wrote some interesting articles about verifying LA-stations long time ago (in FRENEX & WRTH); As every DXer is an individual, everyone has to find his own technique of reporting to stations. When you start to verify new stations instead of new countries things start to become more difficult, but more interesting as well. There may be various reasons why someone starts to specialize on one particular DX-target. New QSLs can only be obtained when you seek for new stations, or special interest in the culture, language etc. of a region.

One could write many articles about how to handle with regional broadcasters. You could write about technical topics, how to tune them in, grey line reception etc. and perhaps some of you experienced folks who are reading this, start to write a few lines about that. You could also write about different techniques of reporting like Gerry Dexter did in his book 'Secrets of successful QSLing' or Jerry Berg in his article in FRENEX October 1985. You may also write about how to use computer programs for reports and reminders.

I want to give today some general remarks about the topic of regional broadcasting. I'll give some *personal opinions* but perhaps some of them are interesting for some of you. Many years ago there was a fine bulletin here in Germany called 'RADIO MUNDIAL' which was specialized in LA-DXing and had a slogan which can be useful for everyone of us: "DXing is more than those sounds which come out of our receiver". If you are a QSL-hunter and exclusively interested in the desired verification things start to become a bit difficult when regional broadcasters are concerned. It is a fact that local radio stations normally don't have any interest in being heard overseas because they only broadcast for a local or regional audience. Two ways of persuading local broadcasters are: A good reception report and a good letter which accompanies your report (with some goodies). Many articles have been published about how to write, when to send a reminder etc. Today some lines about what I call 'The right attitude' and which actually means something different for everyone of us.

A radio station consists of individuals which are doing their job as we are doing our job. When writing to a regional station we always have to remember that we are not writing to a 'Verification Machine' but to someone who has to be interested in such a manner that he/she does take the time to respond our letter. Try to imagine what kind of letter would wake *YOU* up when someone from I-don't-know-how-many-miles-away would write to you and ask you a favour. When you accept that there are individuals working at a radio station instead of a 'Verification Machine' you might also accept that there is not a single radio station on the globe which doesn't verify reception reports but only stations with individuals which still haven't received those letters which made them answering. The so called 'notical-non-verifiers' are a very interesting thrill for everyone of us. They are a proof for us whether our attitude works or not.

There are many stations around the globe which normally don't answer reception reports and their number has increased in the past years. My personal opinion on that is that many of them don't answer because the answering of reports is often a very boring and in some way oddsome business. If you manage to wake up the interest of one of the individuals working at the station, get in contact with him/her and *STAY* in contact after having received the QSL if *HE/SHE* is still interested in a correspondence you are doing the best to promote our hobby. Dropping the contact after having received the QSL although the contact partner is still interested in the correspondence only means that the individual isn't of any interest for you. You can be rather sure that the chap at the station won't answer many other reports in the future.

One of the slogans of NASWA and other SWL-clubs is "Unity and friendship", the promotion of a better understanding between the peoples of the world. This is not a meaningless slogan but the essential part of the hobby, as I see it. Reminders, new reports, shootgunning, peppering and all these techniques described in publications and articles are extremely useful to increase the reply rate but the 'spirit', as I feel it, is something different; its a personal contact with the individuals working at the station and a discussion of the program they are broadcasting. You may find it difficult to estimate the content of a program when you don't talk and understand the language you're listening to. This is true and I want to repeat the slogan of this fine former DX-club: "DXing is more than those sounds which come out of our receiver". Some basic knowledge of foreign languages is needed when regional broadcasters are concerned. Take into account that every minute you spend learning a language isn't a wasted minute for your whole life. I think we can't say the same about those many hours we've spent watching the TV with its advertisements. This does not mean that you have to become a professional translator. Leave that task to the dictionary in your shack, if you want to. It means that it is useful to understand a bit of a foreign language, especially when you are writing to those stations which are considered to be tough verifiers. The culture of many countries is a very interesting one. Why not read a bit more about the history of those countries you are interested in and want to verify? Its an interesting entertainment, you start to understand why some Colombian stations have the slogan "Orgullosamente colombiano" or Venezuelan ones a close down announcement like: "Desde Caracas, cuna de nuestro padre y libertador Simón Bolívar transmite Radio Continente". Latin America isn't as separated as Europe. The majority of the countries use Spanish, or Portuguese in Brasil. The frontiers between Latin American countries are not as strong as those between European or Asian countries. Often there are no language boundaries and we DXers know that a language is a much stronger frontier than any geographical one. Listening to the regular program of Sani Radio 'Música del Caribe' or the famous program 'Sábadoailable' from Ecos del Torbes offers you the music which is up-to-date in most parts of Latin America, the names of the songs and the singers. When you listen to one of these songs later on a real small broadcaster like Radio Valles del Tuy, Radio Mara, Radio El Sol de Los Andes or Radio Paitití, you may have a useful program detail for your reception report to that station.

Seeing DXing as I see it means, that it is part of the life, not only a list of frequencies of stations and times you can tune them in, but real background knowledge. I still remember the surprised face of a Colombian friend who was studying here in Germany and whom I told, when he said that he was from Medellín, that I listen to Radio Super, repeating some of the slogans of the station and telling him that the station's Director Sr. Ismael Ochoa is a penfriend of mine and has told me many interesting things about his city and region.

A program listener can learn many things from the station's he's listening to. When he decides to verify a local station using the methods and techniques often described, he will certainly do much better than someone who is only a specialist on the technical topics. The choice whether to collect QSLs or not is a merely personal one. Many folks prefer tapings and in some way a taped report is a better proof of reception than a QSL. But a rather exceptional thrill of QSLing is, that it is an entirely personal matter. Different from stamp- or coin collections you can't buy QSL-cards. You get them or not. Its one of the most personal collections an individual can have. This is the challenge and the thrill, at least for me.

Werribe VIC 3030, AUSTRALIA

This 125-page 8x11-inch perfect-bound paperback book is a useful introduction to the hobby of long-distance listening. The authors attempt to strike a middle ground to satisfy the needs of the listener who is content to listen to distant stations and the needs of the DXer who make this activity a major hobby.

The book is divided into 11 chapters:

Chapter 1, Radio/TV Reception - An Overview, offers, among other topics, offers a brief review of propagation characteristics and factors and includes an extensive abbreviation list and glossary. Chapter 2, The Broadcast Bands, discusses the major broadcast bands from longwave through medium- and shortwave to satellite television reception. Chapter 3, Receivers, offers an extensive review and discussion of virtually every type of feature and control the user might find on a shortwave receiver. Chapter 4, Antennas, discusses some antenna terminology and theory, and describes a variety of mostly shortwave antennas. Chapter 5, Advanced Topics, discusses some test equipment -- such as a grid dip oscillator, noise bridge, and RC bridge -- and touches upon such diverse topics as diversity reception, DX spotting nets, and computers. Chapter 6, The Broadcasters, briefly discusses some of the major broadcasters including the BBC, Radio Canada International, Radio Australia, and Radio Nederland, and lists some of the literature available from Radio Nederland. Chapter 7, The Hobby of Radio DXing, defines DXing, reporting codes using SINPO as an example, QSL practices and reply postage alternatives, and concludes with a review of DXing aids. In this latter category printed material such as the WRTH, RDI, Hauser's publications, and club publications are included.

Although the authors touch on all aspects from the longwave bands to satellite television, its focus is on shortwave broadcast listening. While you may say "I know all that stuff..." I found BETTER RADIO/TV RECEPTION to be a great checklist to fill in the blanks. Often I have been put in the position of trying to explain this listening hobby to a newcomer, and this book can make that task easier. There is a lot of meat in this book. I suspect, with three authors, there is the heavy hand of a good editor present. The writing style is clear, concise, and very precise as if every word (especially in the definition, terminology and glossary portions of the book) was carefully picked over before being used. As every sentence, and virtually every word, contributes to the subject under discussion, it is not necessarily bedtime reading. There is no filler material. There are no anecdotes. What you will NOT find are endless schedules and other lists of "things to tune for" so the material should stay relatively current (some photographs of equipment will be the first things to go out of date...). This book is not the only book that a newcomer to the hobby should read. It should be one of the first ones read by the newcomer to figure out what this listening hobby is all about. RECOMMENDED...

Reviewed by Tom Sundstrom, W2XQ

This year, the 1987 meeting of the European DX Council was held at the Hotel Korpilampi in Espoo, Finland, which is about 20 miles NW of Helsinki.

After a few days spent in Copenhagen, Denmark, I journeyed to Espoo, thanks to SAS Scandinavian Airlines System.

Registration started at 1500 local time on Friday, June 5th. After spending a few minutes in line, & reacquainting myself with Ms. Monica Filkiwicz of Red Cross Broadcasting Service, who was in the line behind me, who I met last year at ANARCON in Montreal, I went to the upstairs exhibition area, which contained exhibits of old-time radio's, a DX Library, a video and computer room, as well as a DXing room with all types of radio's from a Sony 2002 to a JRC NRD-525, as well as some of the popular Grundig models. The next "official" item on the agenda, next to the cocktail meetings, which if you have ever been to an ANARC convention you know go on all the time, was a forum or programme on "Medium Wave DXing". This presentation dealt with the basic principles of MW propagation, the effects of solar activity and the 11 year cycles, the 28 day cycle and how favourable conditions move from one to another continent. Examples of various rare catches from Mr. Antti Aaltonen, the programme presenter, were also heard with catches from Hawaii, Alaska, The Yukon and Northwest Territories being among them.

At 2000 hours I attended the programme on "North American DXing", which was presented by Mr. Hannu Niileksela, one of Finland's most experienced NA-DXers, who has verified more than 500 stations from our continent. This presentation summed up NA DXing in Finland during the 60's, 70's, and into the 80's. Special emphasis was placed on the many DXpeditions into Lapland, the very north of Finland, which has changed the scope of NA DXing from Finland since the 70's. Tape recordings from various stations were also heard during this presentation also. This presentation was followed by the world-wide premier of the movie "Arctic DXing" or "DXing Below Zero", which was a video-tape adventure starring Esa Hamminen and Roland Sandberg, two specialists in NA DXing in Lapland. This movie was made last winter and was the true life story of a DXpedition at -40 degrees and just what a serious MW DXer is all about. If I can get this tape converted from the PAL standard to NTSC I hope to make it available to anyone over here would like to view it.

After this show I retired to the computer room to meet with George Wood and Edward Dunne, George being with Radio Sweden and Edward being the manager of the DUBBS BBS in Dublin, Ireland, to talk about our presentation on computer's in DXing, which was scheduled for tomorrow, after this, and a few beers later, I was out until the next day.

At 0700 the Official Opening of EDXC took place with speeches by the Honourable Mr. Jacob Soderman, patron of the conference and Governor of the Province of Uusimaa, as well as Michael Murray, the Secretary-General of the EDXC, and Tapani Laitinen, President of the Finnish DX Association. The speeches lasted about 30 minutes and afterwards the official photo was taken by the lake in the back of the hotel.

At 1030 various workshops were presented and one had the opportunity to choose between Computers in DXing, DX Programmes, FM and TV DXing, MW DXing in Scandinavia, and the WRTH. I choose "Computers in DXing", which was presented by George Wood of Radio Sweden and author of "The DXers Guide to Computing". I was asked by George to talk a bit about some systems here in the US and Edward Dunne from Ireland talked about the new Irish system as well as the U.K. boards. After this, a nice sauna, of which there is one for every four persons in Finland, and some free time until the next item on the agenda, the Compu-Serve meeting at 1830.

At 1830 I had a chance to participate in what for me was one of the most interesting and unique items on the EDXC agenda, a Compu-Serve computer conference with any possible number of people from around the world. After dialing into the access number in Sweden George and I made contact with my hometown, Columbus, Ohio, which is where Compu-Serve is headquartered. We went into the "Hamnet" section of the board, requested we be let into the conference mode, and sure enough, we broke into a meeting going on between Jim Grubbs, K9EI, who has authored many interesting books on using computers in DXing and Packet radio and Ron Schatz in Florida. We exchanged some greetings and a number of questions were asked by not only Jim and Ron but also the persons watching all of this in the conference room. We were joined during the course of 45 minutes by Allan Courtney in Kentucky, Robert DeViolini in Norfolk, Virginia, Robert Mattaliano in Newton, Mass, and finally Karl Grabbe in Cork, Ireland, who didnt know about the conference ahead of time. This was a very interesting item and it is a pity more people didnt take part. Perhaps something like this could be attempted at an ANARC convention, to link in with DXers in Europe???

At 2030 we had a good meal at the EDXC Banquet, the meal consisted of Chinese food, yes that's right, Chinese food, as well as some German sausages and various fish items for an appetizer. All food was of course prepared with a generous portion of cesium, thanks to Chernobyl!!!! After the banquet, as it the case at ANARC conventions, a raffle

drawing was held, which was followed by the auction, with a Finn winning the big prize, a Grundig Satellit 650.

Sunday, June 7th, began with a nice breakfast and was followed by the EDXC Member and Observers Club Meeting at 0900, which was chaired by Secy General Michael Murray. The future of the EDXC was discussed there as well as a possible site for the 1988 EDXC Convention.

At 1000 the Broadcasters Panel discussion was held with representatives of many international broadcasting stations such as the BBC, Voice of Free China, Radio Deutsche Welle, Radio Austria International, Red Cross Broadcasting Service, Radio Sweden, Radio Berlin, Radio Norway, Radio Exterior de Espana, and last but not least Radio Korea—many more than attend a normal ANARCON. Various questions were brought fourth for the panel to discuss such as station QSL policies, the real benefit a reception is to a station and what a station wants to see in a QSL reception report.

The Broadcasters Panel meeting was followed by a speech by Mr. P.P. Tang, President of the RCC, Broadcasting Corporation of China, better known as the Voice of Free China, who was the highest ranking official any broadcasting station sent to this conference. Mr. Tang talked about his experience in the United States while attending college and how he hopes that his station really helps improve the image of his small country to the rest of the world and how they appreciate all input into their programmes, etc.

A sightseeing tour of Helsinki and environs was held just before Mr. Tang's speech and included a visit to the University of Technology's in Otaniemi, Espoo, whose campus happens to host the frequent meetings between the U.S. and Soviet Union in arms talks, and is where our group also had a nice lunch in the student dorm area. The tour of Helsinki also included a visit to Radio City, Helsinki's first commercial radio station, as well as a visit to the centre of Helsinki and it's monuments.

For this writer, the conference concluded at 2130 with the panel discussion on the first 20 years of the EDXC. This featured present and past Secretary-Generals of the EDXC and some people who were there when it was founded. The panel was chaired by Mr. Anker Petersen, the first Secretary General of the EDXC who still plays an active role in EDXC affairs.

I departed from the hotel at 0700 Monday with a group of Soviet national's who were also on holiday at the hotel, though not for the convention. A short flight from Helsinki to Copenhagen and then a 1-0-n-g flight from Copenhagen to New York and my EDXC sojourn was over.

After my return to Columbus(Grove City) I attempted some similarities between the EDXC convention and the ANARCON conventions I have attended in the past. There are many. First and foremost a DXer is a DXer, no matter where he lives. I think perhaps some are more serious in Europe than here, especially Finland in taking their winter DXpeditions to Lapland for a few weeks. Both conventions are organized well with perhaps fewer people in Europe bad-mouthing the hobby and putting down the clubs than in the U.S. There is no talk about which club is going under this year and why or who is causing it. Clubs in Europe are stronger than in the States perhaps because they draw on one's national identity. For example, in the U.S. all clubs use english as their language of publication, as compared with Europe, where every country publishes their bulletin in their own national tongue, which not only makes it difficult for new members to join but also is a tough job for the EDXC to keep track of, having to go through all the publications and tell all the other clubs what is going on, etc. If a person in the U.S. is unhappy with the club he belongs to the general attitude of those in charge of the clubs is to go somewhere else if you dont like it here. In Europe they cant go anywhere else because there is a chance they could not read the bulletin. For example, I met some people from France who could not speak any other language, where do they go when they're unhappy?? Their answer is not to have the clubs get bogged down in politics as here in the states, not to invest too much of a club in one person, but to spread things out and take comments and suggestions more seriously than here.

The one main difference that I noticed between EDXC'87 and ANARCON's of the past is the way the main exhibition area is run. At EDXC the main room, which is where the broadcasters hand out station information, stickers, etc, is only open for about an hour and when the doors open it is bedlam, until the stickers and other material run out, at which time the room begins to empty. At ANARCON the room is open for the entire convention and there is no mad rush to obtain a goodie from a station.

The choice of a hotel for EDXC'87 was a good one, being out in the middle of the woods as it was. It allowed a nice antenna farm to be erected which made DXing actually possible, and the elevators actually worked!!!!!!

The only news I cant report on is where the convention will be next year. So far, no club or organisation has come fourth to volunteer to organize the event.

If your going to the ANARCON this year in Mississauga you will see some attending, who were also at EDXC. Bob and Evelyn Thomann, from Swiss Radio International will be there as will be Michael Murray, the Secretary General of the EDXC. The Voice of Free China should be there again as well. Some people who were planning to come will wait until the convention is held in southern California, as is planned next year, as they feel that area offers more for a real holiday.

Should there be an EDXC Convention next year I hope to be back with another report on it then. 73.....

EQUIPMENT REVIEW: AN EXCELLENT LATE NIGHT DX AID

by

Dr. Harold Cones ("Dr. DX"), WPE400

You really oughta have one. Mine lies near my feet in the corner of the shack and makes the late evening-early morning DX hours go by easier. Upkeep is relatively minimal. The color is nice, and it just feels good to know that it is there. It's one hunk of DXing equipment that can be enjoyed by the whole family when you are not using it in your hobby. This first class piece of DXing machinery is none other than Daisy-the-DX-Dog, my constant shack companion and late night DX confidant. Although not much on heterodynes, Daisy-the-DX-Dog listens intently to my excited babble about rare catches when there is no one else in the house awake (or who would really listen if they were awake), and responds with an understanding wag of her tail before settling back for some more shuteye. On cold winter nights, we share the kneehole under my desk and keep each other warm, Daisy checking every now and then to make sure that I have not nodded off, risking the catch I have been waiting for. If the sweet arms of Morpheus have claimed me, she whacks me with her paw, and we are soon back in the DX business again. When I pull the plug for the evening, she does likewise, each of us retiring to our favorite sleeping places. But let me open the door to my shack at any hour and she is right there, ready to help me grab those Papuas or Indonesians. Her one major shortcoming is her lack of excitement when the good QSLs show up in the mailbox. She gets much more excited by the dog food samples than she does by the QSLs from Radio East New Britain or Radio Mauritania. The only time I ever saw her react to a QSL was when she was a puppy, just developing her keen DX sense. She had an accident on a Radio Iran "War Is Hell" card. I still have it, and, you know, it looks a little better than the original. The Old Dominion DX Association (ODDX) is trying to train her to point when the grayline passes through Bhutan. So far, we have had little luck, but we have progressed to ear raising at the mention of Tristan. I'll just be happy if she decides not to bite the mailman on the days he is toting the overseas airmail to my door. The macho guys can take their fancy high-bred hunting dogs, the blue-haired ladies their poodles, and the shepherd his sheepdog; old dial-twiddling-tube-snatching Dr. DX, will take Daisy-the-DX-Dog over them all!

Editor: Tom McElvy, P.O. Box 9645, Norfolk, VA 23505-0645

ALL I CAN SAY...

...is that I am sorry about last month! But, PLEASE allow me to explain! While I was busy trying to figure out how to operate this new computer (yes, I finally got the clone!), I let my personal deadlines get by me. So, I got the article done, posted it with US Snail, and then discovered that Murphy was a relative...because Bill Oliver never got the article!! So, My apologies, and I promise to not let it happen again. Now will someone PLEASE let the DX back into my radio??

As I recall, we were last talking about being "on-line" with the various bulletin boards around the country. The last discussion was about logging on, and finding your way around the various areas of the systems. On most of the boards, you will find help files to give you answers to such burning questions as "which button do I hit now?", or "How do I get the heck off of this thing?" These file are there for a reason...FOR YOU TO READ! So, do yourself a favor, and read them...it will save you uncountable hours of agony!

After you have found your way into the MESSAGE BASE, you will be able to start looking at PUBLIC messages that other users have posted; this is where you will find general information about the topic of the board or sub-board that you are in at the time. You can even reply to most of the messages, by simply following the prompts. After typing out your reply, you need to tell the bbs that you want to SAVE the message. Hmmm, you ask...how do I do that? Elementary, my dear hacker!

After you have finished typing, simply hit <RETURN> on a blank line (for 99% of the BBS out there) and you will then be given an EDIT prompt. This will have several commands, such as edit, read, continue, about or save. For now, we shall assume that your message is correct, and you want to send it...simply hit the S key and viola! Message saved!

Many of the boards have features for UPLOADING and DOWNLOADING of programs; this is simply a means of transferring a program from one system to another. THESE ARE PUBLIC DOMAIN, SHAREWARE and FREeware PROGRAMS. DO NOT UPLOAD COPYRIGHTED SOFTWARE TO ANY BBS!! That can cause a LOT of problems for both you and the sysop of the board, and will usually get you kicked off the board! If you see a program that you might be interested in getting, read the manual that came with your terminal program, and give it a shot! The most popular file transfer protocols are XMODEM and XMODEM CRC. Make sure you have your equipment set right, and get yourself some programs! In fact,

MOST of the SWL BBSs have ul/dl sections, so you might want to start by checking those out!

Well, the mind is getting a bit foggy, so I think I will wrap up this portion of the column. Stay tuned next month for more in the exciting conclusion of "As The Modem Dials..." (Yes, I know, I should be shot...)

+++++

Folks, sorry this is so short this month. The word processor that I am using is a REAL dog, and I hope to be up with better software later this week. BUT, I have to get this up to Bill's printer, so here goes! Hope that you enjoy the column, and that you will continue to write!

Oh yea, here is a GREAT little cartoon for the month...kinda shows how I feel right now with this word processor...

**"Hit any Key
to Continue"**

73!
Tom

WANTED: Drake R4245/R-7/R-7A in good condition with manual and schematic. Will pay top \$\$\$\$. James Kilgallen, NAVCOMSTA ROTA Box 663, FPO New York, NY 09539-3000.

FOR SALE: ICOM R-71, loaded, \$695.00. Drake SPR-4, \$295.00. Collins 75A4 3 filter, \$475.00. Yaesu FRG-7, \$195.00. Tony Musero, 1609 South Iseminger Street, Philadelphia, PA 19148. Phone (215) 271-8898.

A R U B A FEBC SAN FRANCISCO IS GOING TO DONATE A 100 KW SW XMTR TO R VICTORIA, CURRENTLY ON MW 960 WITH 10 KW AND FM STEREO 93.1 WITH 1 KW AS SOUND EXPERIENCE. R VICTORIA OWNER MR CHRISTIANS SAYS THEY HAVE NOT RECEIVED IT YET BECAUSE OF LACK OF QUALIFIED PERSONNEL TO INSTALL AND OPERATE IT. PGMS WILL BE FOR SEU/AF IN EG. GOVT APPROVED SITE ON SE COAST NEAR OLD EXXON REFINERY, FREE FROM OBSTACLES. OTHER LANGS PLANNED ARE FR, SP, PT (RAYMOND SLAGT, ARUBA, 1/7)

A U S T R A L I A R AUSTRALIA TALKBACK REPORTED 21/6 ON HISTORY OF SWBC FROM LYNTHURST. STARTED IN 1927; IN 1934 INLAND SW SVC INTROED AND LAST YEAR RA CEASED USING LYNTHURST. FRI 12/6/87, FINAL CHAPTER WRITTEN. ON THAT DAY AT EXACTLY MIDNIGHT LOCAL VLR ANCD: "SW XMSN VLR IS CLOSING FOR THE LAST TIME. NEW TECH HAS CAUSED NECESSARY CHANGES TO ABC'S BCING ARRANGEMENTS. HOWEVER VLR LISTENERS MAY STILL RECEIVE ABC PGMS BY USE OF SATELLITE RX AND HI-FQ EXTL SVC. MANY TNX FOR YOUR INTEREST AND SUPPORT OVER MANY YEARS AND GOODNIGHT." AN HOUR LATER VLH WENT OFF THE AIR AS WELL. THE BC SVCS NO LONGER FROM SITE, STD FQ AND TIME SIG STN VNG, ON 4.5, 7.5 AND 12.0 Mhz, REMAINS ON THE AIR FOR TIME BEING (WBI 26/6)

KOMPAS, JAKARTA, REPORTED 19/6: ARMED FORCES COMMANDER GEN L B MURDANI SAYS HE WILL MAKE EFFORTS TO SOLVE THE ISSUE OF THE INDO GOVT'S RESTRICTION ON R AUSTRALIA TO ASSIGN ITS CORRESPONDENT TO INDO. SAID THIS WHEN HE MET DAVID HILL, DIR OF ABC IN JAKARTA EARLY THIS WEEK. SINCE JUNE 1980, GOVT HAS BARRED RA FROM ASSIGNING CORRESP TO JAK CAUSE RA'S NX REPORTS AT THAT TIME CONSIDERED ANTI-INDO. INDO GOVT REFUSED TO EXTEND STAY PERMIT OF WARWICK BEUTLER, THEN RA CORRESP, WHO HAD WORKED IN JAK 3 YRS. BEUTLER THEN LEFT FOR SINGAPORE, BUT SING GOVT ALSO REFUSED TO ALLOW HIM TO STAY THERE. BRIG GEN P DAMANIK, CHIEF OF INDO

ARMED FORCES INFO CENTRE, TOLD REPORTERS 18/6 THAT DAVID HILL HAD GONE TO SEE GEN MURDANI BECAUSE HE BELIEVED THE GENL WAS A KEY FIGURE WHO CAN SOLVE THE PROBLEM. DURING THE MEETING, GENL STRESSED HE WAS NOT THE ONLY PERSON THAT COULD DECIDE ON THE ISSUE AND IT WAS THE INDO GOVT'S PREROGATIVE TO DECIDE ON THE MATTER. HOWEVER, GEN MURDANI PROMISED TO HELP SOLVE THE LONG-STANDING ISSUE, WHILE EXPRESSING HOPE THAT ANY ABC CORRESPONDENT ASSIGNED TO INDO SHOULD 'BE WILLING AND ABLE TO UNDERSTAND US IN THE SAME MANNER AS WE UNDERSTAND OTHER PEOPLE'... (WBI 3/7) I.E., NOT TO BE AN OBJECTIVE JOURNALIST?? (GH)

RA TALKBACK REPORTED 5/7: AS OF 1/8, ABC METRO & REGIONAL STNS WILL OPERATE 24H A DAY. R NATIONAL THE ABC NATL NET WILL ALSO BE OFFERING A 24H SVC, BUT FROM 1/10. THIS WILL BE A VY IMPORTANT DAY FOR RA, AS WE'LL BE PROVIDING THE MIDNIGHT-TO-DAWN SVC ON R NATL, SO DOMESTIC LISTENERS ACROSS THE COUNTRY WILL AT LAST BE ABLE TO HEAR THE ABC'S INTL SVC (WBI 10/7) RA TALKBACK 12/7 REPORTED MORE ON THIS; PUBLIC-FUNDED BCING IS FACING YET MORE BUDGET CUTS AND A SVC SUCH AS RA FOR OVERSEAS OFTEN HAS LITTLE SUPPORT AT HOME. WE ARE CONSTANTLY HAVING TO JUSTIFY OUR EXISTENCE TO A TAX-HUNGRY GOVT AND THE OVER-TAXED ELECTORATE. RA DIR PETER BARNETT SAYS: TRYING TO DO THIS SINCE 1980. ACCOMPLISHED TNX TO DAVID HILL, TO AVOID XMTRS BEING IDLE. WILL START AT 1400 UTC; NO BASIC CHANGE IN RA PGMING AS RESULT OF NEW DOMESTIC AUDIENCE. ALSO, RA HAS BEEN INVITED TO JOIN THE 'CLUB OF FOUR' GROUP OF MIDDLE-LEVEL BCRS, WITH RN, SWEDEN, SWITZERLAND, RCI; TO MEET IN MONTREAL LAST WEEK OF AUGUST (WBI 17/7)

BULGARIA R HORIZON [sic], STOLNITR [sic], ON NEW 6760 [sic], 24/5 11-1130 BG SONGS, ANMT, ID (GERHARD BUTOW, AUSTRIA, DSWCI SWN) SHOULD BE R HORIZONT, STOLNIK, LISTED 7670; SEVERELY TEMPTED TO ATTRIBUTE THIS TO A 910 KHZ RCVR IMAGE, BUT WOULDN'T EXPECT THAT ON HIS FRG-7 (GH)

R MOSCOW INTERFERED WITH WHO AND KSL LAST NIGHT, ON 1040 AND 1160 KHZ, PRESUMABLY RETALIATING AGAINST R MARTÍ (CBS RADIO NEWS 22/7)

EGYPT EGYPTIAN R, CAIRO, REPORTED 21/6: AGREEMENT SIGNED W/CZECHOSLOVAKIA TO SUPPLY EQP TO REPLACE AND RENOVATE THE MIDDLE EAST RADIO'S XMTG STN AT ABIS, EFFECTING A 2.25-MW INCREASE. NEW EQP EXPECTED OPL IN MAR 1989. ME RADIO IS A COMMERCIAL SVC FROM CAIRO ON 774, CURRENTLY THOUGHT TO BE 500 kW (WBI 26/6)

FINLAND R FINLAND ANCD 1/7: FORN-LANG BCS OF FBC ARE AVL NOW ON NEW FM FQ IN GREATER HELSINKI, 103.7 MHZ; CARRIES RELAY OF ALL FORN-LANG PGMS PRIMARILY BC ON PORI SW XMTR (WBI 10/7) R FINLAND ANCD 9/7: WE'D LIKE TO APOLOGISE

TO SW LISTENERS FOR CONTINUING BREAKS IN XMSNS DUE TO TECH DIFFS. IMPLEMENTATION OF A NEW XMSN SYSTEM AT PORI ON FINLAND'S WEST COAST IS STILL EXPERIENCING SOME DIFFICULTIES, ESPLY ON WEEKENDS. REGRET INCONVENIENCE (WBI 17/7)

GERMANY WEST DW HELLO FRIENDS THIRD 1987 ISSUE REPORTED: LAST YEAR TOO THERE WAS AN INCREASE IN VOLUME OF LISENERS' MAIL RCVD BY DW. TOTAL WAS 390,775, THAT IS 40,000 MORE THAN IN 1985. STEMMED MAINLY FROM RISE IN CORRESP FROM AF-RICA, 160K VS 120K YEAR BEFORE. 85K FROM AS AND ALSO FROM EU[SIC, 85K EACH?]. ME SENT 26K, LAM 23K, NAM 15K. MOST STRIKING INCR IN MAIL VOLUME FROM AF WAS REPORTED BY SWAHILI SVC, 85K, 20K MORE THAN IN 1985. HAUSA ROSE FROM 14K TO 19K. EG 17K AND AMHARIC 6K ALSO CONSIDERABLY MORE. AS FAR AS LTRS IN EG FROM AF ARE CONCERNED, VOLUME FROM UGANDA AND NIGERIA DOUBLED TO 4K. ASIA: THO VOLUME OF MAIL TO HINDI, URDU, JAPANESE, BENGALI SVCS DROPPED SLIGHTLY FROM 1985, SUBSTANTIAL INCR IN LTRS IN EG 15K, INDO 20K. MOST OF THE LTRS IN EG FROM ASIA CONTINUE TO COME FROM INDIA. MAJORITY OF LTRS FROM NAM WERE FROM THE US, 6K IN GM, 3K IN EG (WBI 19/6) LEST WE FEEL TOO IMPORTANT, IT APPEARS NAM IS LEAST OF DW'S AUDIENCES; HOWEVER THE 6K AND 3K AT END STILL LEAVE 6K UNACCOUNTED FOR IF THE NAM TOTAL IS 15K AS ABOVE--HARD TO BELIEVE THAT MANY WOULD WRITE DW FROM NAM IN VARIOUS OTHER LANGS NOT INTENDED FOR NAM (GH)

DPA NX AGCY REPORTED 30/6: DW HAS NEW MANAGING DIR. | 15420 | | 2245-2330 | 54 | 248 | 3000-5000 | 10A3 | 100 |

NOTES:

- 9820 has been used constantly by KTWR since February 5, 1985 when the FCC first approved this out-of-band frequency for broadcast use. KTWR anticipates using it in future frequency seasons.
- 11735 was used by KTWR from 0815-1430 from D-81 season to M-83 season, from 0830-1430 from M-83 season through M-85 season at that time propagation required moving to 31 MB. Propagation is now such that we used 11735 for part of the J-87 Season. In the J-87 Season Radio Pyongyang started using 11735 from 1000 UTC.
- 11665 was used in the J-87 Season by KTWR from 0845 to 1200 UTC. We would like to continue this use.
- 11840 has been used by KTWR 0900-1100 or 0830-1100 since the J-84 season. Prior to that it was used from 0900-1030 UTC. For propagation reasons it was vacated for the D-85 and M-86 seasons only. This was stated in the S-85 frequency usage report. In the J-87 Season Radio Japan started on the frequency so we have requested 11805 instead.
- Alternates: 9780 or use 9820 1415-1500 293 deg and 9840 1445-1630 285 deg.
- 11665 was used in the J-87 Season by KTWR from 0845 to 1200 UTC. We would like to continue this use and add to it 1145-1500 UTC. When the Tentative S-87 Request was completed we based our meterband selection on IG=23. Current predictions suggest IG=45-50 is more accurate. Consequently this meterband has been changed.
- Alternate: 9870

H O N D U R A S HRXK, LV DE LA MOSQUITIA, FINALLY REACTIVATED 4910.4 6/6, HRD FROM 2350 TUNE-IN UNTIL 0145* W/DECENT SIG, THO NOT NEARLY AS STRONG AS 4755 SANI R, THEIR COUNTERPART IN PUERTO LEMPIRA. PANAMA R CONTINENTE REPORTED 9/6: AT THIS MOMENT (2102 UTC) PERSONNEL OF R CONTINENTE ARE SUFFERING FROM TEAR-GAS THROWN BY ANTI-RIOT PERSONNEL OF THE DEFENCE FORCES OF PANAMA (FDP) POSTED IN FRONT OF OUR STUDIOS. APX 400 PEOPLE HAVE TAKEN TO THE STREETS AND BLOCKED TRAFFIC. IMMEDIATELY PRIOR TO GOING OFF THE AIR, R CONTINENTE BC THIS MSG AT 2310 10/6: FRIENDS AND LISTENERS, OUR BC IS BEING AFFECTED BY ELECTRONIC [WORDS INDISTINCT] APPARENTLY BY THE MINISTRY OF GOVT AND JUSTICE. THIS IS WHY WE CANNOT CONTINUE TO BC INFO. EACH TIME WE TRY TO BC INFO ON WHAT IS GOING ON, OUR BC IS INTERFERED WITH, APPARENTLY BY TECHNICIANS OF THE FDP OR THE MGJ. YOU ARE HEARING THIS INTERFERENCE (WBI 19/6)

TELEMETRO TV REPORTED 10/6: WE BEGIN LIVE COVERAGE OF AN ATTACK ON THE STN'S INSTALLATIONS BY FORCES OF THE SPL ANTI-RIOT COMMAND OF THE FDP, BETTER KNOWN AS THE DOBERMANS. EXECUTIVE AND ADMINISTRATIVE EMPLOYEES AND REPORTERS OF CH 13 WERE BEATEN. THIS IS NOT CHILE, CUBA OR NICARAGUA. THIS FIRM WILL NOT PERMIT THIS TYPE OF ABUSE AGAINST THOSE OF US WHO HAVE THE SACRED DUTY OF REPORTING ON EVENTS IN THIS COUNTRY. (WBI 19/6)

LA REPUBLICA REPORTED 19/6: "SUBVERSIVE STNS WILL BE SANCTIONED". RODOLFO CHIARI DE LEON, MINISTER OF GOVT & JUSTICE, HAS ORDERED A THOROUGH INVESTIGATION OF ALL PERSONS WHO USED R CONTINENTE AND R MUNDIAL ON 8/6, 9/6, 10/6. REQUESTED ATTY GENL'S OFFICE TO INVESTIGATE THE TWO STNS WHICH PLAYED A LEADING ROLE IN DISTURBANCES CALLING FOR A REBELLION AGAINST THE CURRENT ADMINISTRATION. INCITING REBELLION IS PUNISHABLE BY 6 MONTHS OR 2 YEARS (WBI 26/6)

TELEVISORA NACIONAL REPORTED 7/7: AT 1700 6/7, GOVT ORDERED WELL-KNOWN RADIO STN R UNO SOBERANA ON 570 TO STOP XMTG. OWNED BY LUIS ANTONIO GASPAS SUARES SIERRA, WHO IS ALSO PRES OF THE PANAMENIST PARTY, A MEMBER OF THE NATL DEMOCRATIC UNION, THE RULING COALITION. THIS TV STN WAS NOT ABLE TO DETERMINE THE LEGAL CAUSE FOR THIS ORDER, OR SUAREZ' REAXION. R UNO SOBERANA HAS MAINTAINED A BEL-LIGERENT POSITION IN REGARD TO RECENT EVENTS (WBI 10/7)

EL SIGLO REPORTED 8/7: AT ABOUT 1730 7/7, FORMER NATL GUARD LT LUIS GASPAS "TOTI" SUAREZ, PRES OF PANAMENIST PARTY, MACHINE-GUNNED THE INSTALLATIONS OF R DIEZ, WHICH HAD BEEN ORDERED TO CLOSE BY THE GOVT. SUAREZ ARRIVED AT THE PREMISES AND BEGAN TO EXCHANGE INSULTS AND OBSCENITIES W/STN EMPLOYEES. DR CARLOS IVAN ZUNIGA, STN OWNER, WHO IS ALSO PRES OF THE PEOPLE'S ACTION PARTY, WAS PRESENT. SUAREZ CHALLENGED HIM TO COME OUT. ZUNIGA DID NOT COME OUT, WHICH CAUSED TOTI SUAREZ'S COMPANIONS TO OPEN FIRE ON THE BLDG. THE NOISE OF THE SHOTS CAUSED ALARM AMONG THE NEIGHBOURS, WHO THOUGHT A CIVIL WAR HAD BROKEN OUT (WBI 17/7)

QSL BLACKLIST RE MR HAMILTON'S QSL BLACKLIST IN JUNE LN-33; PATIENCE, PATIENCE. IT TOOK 10 YEARS OF FOLLOW-UPS TO VERIFY R GAMBIA, AND 12 YEARS OF REGULAR REPORTING HAS YET TO PRODUCE AN ANSWER FROM LV DU ZAÏRE HERE. HAVE YOU QSLD MALI YET? ONLY TOOK 10 YEARS FOR ME TO DO THAT. YOU MAY WISH TO DO THE FOLLOWING WITH YOUR REPORTS:

- 1) USE ONLY 22¢ FLAG STAMPS. THE BLANDER, THE BETTER, AS SOME POSTAL WORKERS IN SOME THIRD WORLD COUNTRIES COLLECT US STAMPS THE EASY WAY.
- 2) ENCLOSE A COVER NOTE WITH YOUR REPORT. RESTATE YOUR REQUEST FOR A QSL.
- 3) ENCLOSE A SMALL GIFT. I USUALLY SEND A PACKAGE OF USED US STAMPS. THIS LOOKS GREAT, AND ADDS VERY LITTLE WEIGHT TO THE REPORT.
- 4) BE VERY SPECIFIC WITH YOUR DETAILS.
- 5) NEVER GIVE UP. EVENTUALLY, ONE OF YOUR REPORTS WILL GET AN ANSWER.

REMEMBER, PATIENCE. (GERRY BISHOP, CLARK AB, PHILIPPINES)

PUBLICATIONS DX LISTENING DIGEST HAS LOTS MORE DX NEWS, VERY LITTLE DUPLICATION, IN FORMAT SIMILAR TO LN. EACH ISSUE ALSO INCLUDES ENJOYING RADIO A TECHNICAL / PHILOSOPHICAL FORUM EDITED BY DAVID NEWKIRK.

REVIEW OF INTERNATIONAL BROADCASTING, COMPANION PUBLICATION TO DXLD, CONCENTRATES ON PROGRAMMING AND OPINION; ALSO REGULAR COLUMNS RADIO EQUIPMENT FORUM AND SATELLITE WATCH BY LOREN COX. LATEST ISSUE #119 EXPOSES "SCANDAL AFTER SCANDAL" AT VOA. SAMPLES OF EACH ARE \$2; 5-ISSUE SUBSCRIPTIONS \$10 EACH, 10-ISSUE SUBSCRIPTIONS \$20 EACH, OR BOTH FOR \$38 (NAM RATES ONLY; IN US\$ ON US BANK OR POSTAL MONEY ORDER). ORDER FROM GLENN HAUSER, BOX 490756, FORT LAUDERDALE FL 33349 (GH)

DXLD HAS BEEN VERY HELPFUL (BILL FLYNN, NEWARK CA) THANKS FOR THE SAMPLE OF DXLD. I HAVE REALLY ENJOYED IT. I WAS VERY IMPRESSED WITH IN-DEPTH AND COMPLETE COVERAGE. BASED ON WHAT I HAVE READ SO FAR, I HAVE NO HESITATION WHATSOEVER TO SUBSCRIBING TO DXLD AS WELL AS RIB (JOE KURODA, WILLOWDALE ONT)

I MUST TELL YOU HOW MUCH I ENJOY, AND LEARN FROM, EVERY ISSUE OF BOTH RIB AND DXLD. SINCE I AM RETIRED, COMMUNICATIONS IN GENERAL AND SHORTWAVE RADIO IN PARTICULAR PLAY A VERY IMPORTANT PART IN MY LIFE. THAT IS WHY I AM SO VERY GRATEFUL TO YOU FOR PUBLISHING BOTH RIB AND DXLD (MICHAEL C BYRNE, QUEENSLAND)

I ENJOYED THE SAMPLE BACK ISSUES A LOT. YOU CERTAINLY ARE THE BEST SOURCE OF INFO BOTH IN PRINTED WORD AND ON THE AIR. I APPRECIATE YOUR EFFORTS VERY MUCH--CERTAINLY IS FASCINATING! (BOB BROWN, KW3F, LANSDALE PA)

Bucarene,
County Donegal,
IRELAND.

15th January 1987

Dear Richard,

Thanks very much for your reception report for the voice of Peace on 240 kHz. Your report is correct and I enclose your PPC with signature.

I left the Voice of Peace in October last year and since then I've been working on radio stations in Ireland - firstly Radio North in Carndonagh, and at present at North West Community Radio, Bucarene (WPCR). That's why your letter took a while to find me!

This typewriter is not too good so I'll keep this letter short. Best of luck with your DX'ing!

NAMIBIA: SWABC 3295 f/d cd. w/ sticker and pamphlet in 5 mo. for ms. (Rugg). f/d "Desert" cd. w/ sticker in 5 mo. after a f/up rpt. for US \$1.00 (Kashiwabara). same in 145 ds. for 2 IRCs. (Brouillette-IL).

NEW BRITAIN: Radio West New Britain 3235 ltr. in 49 ds. for SASE and ms. v/s Simon Muraga, Provincial Station Manager. (Rippel-VA).

NEWFOUNDLAND: CKZN 6160 f/d "CBC" cd. in 25 ds. v/s R. Knowles, Manager of Regional Engineering. (Archer).

NIGERIA: FRCN 4770 via Kaduna f/d form ltr. in 69 ds. for 1 IRC. v/s Yusuf Garba. (Buer-FL).

PAPUA NEW GUINEA: Radio Western Highlands 3375 p/d ltr. in 20 ds. for ms. v/s Esau Okole, Station Technician. (Davis). Radio West Sepik 3205 f/d ltr. in 98 ds. for ms. v/s Gabriel Deckwalen, Station Manager. He stated that the former v/s Luke Lumbo is now station manager at Wewak. (Cones-VA).

PERU: Radio San Martin 4810 n/d personal ltr. in 3 mo. for a SP rpt. and ms. Pennant rcvd. v/s Jose Roberto Chong, Gerente. (Palmerheim). p/d cd. w/ personal ltr. for a SP rpt. and ms. (Dillon). Radio Union 6115 f/d "Logo" cd. in 120 ds. after a f/up rpt. in SP w/ ms. v/s Gonzalo Iwasaki Sanchez, Gerente. (Van Horn).

PHILIPPINES: VOA 15425 via Poro/Tinang f/d "White House" cd. in 2 wks. for ms. (Wallace).

ROMANIA: Radio Bucharest 9510 "Folk Costume" cd. in 57 ds. w/ schedule. (Levison).

SRI LANKA: VOA 15250 via Colombo f/d "White House" cd. in 1 wk. after sending back a copy of a cd. w/ Poro listed as the wrong site. Also sent a copy of their frequency schedule page which listed this site as Colombo. I rcvd. yet another Poro cd! It took two additional f/up rpt. each asking for an explanation as to why I was not getting an answer. What a mess! (Wallace-MA).

SUMATRA: RRI Banda Aceh 4955 p/d ltr. in 24 ds. for an EG/IN rpt. and used stamps. v/s S.H. Rosakim. (Bishop-PHIL).

SYRIAN ARAB REP: Radio Damascus 9950 f/d "Logo" cd. via registered mail in 137 ds. for an AR rpt., EG rpt., and a tape. Station patch was rcvd. (Hardester-PA).

Dear listener -

We thank you for your report and are pleased to confirm that you have heard Radio Norway

9590 or 9605 kHz 29.05.87 date month year

9590 via the new Svec transmitter.

9605 was transmitted from Harvey.

via Richard D'Angelo Sincerely yours,

Richard D'Angelo
RADIO NORGE 13
01-22548 57-132

That's it for this month. Good DXing.

Had a great time at Kaps house on the 12th. Meet several old friends and a few new ones. Kap, did you get the impression of the door removed from your forehead?...Sam.

Sam

John Eckert in Collegeville, PA informs us that he has just QSLed his 100th country. It took 2½ years to confirm Cameroun. A total of 9 reports were mailed - none of which were received by Mr. Fontem. Congratulations!...Sam. Harold Levison received a well illustrated booklet from Sudwestfunk Radio in Germany. The publication outlines all of their network stations. Peter Dillon in Colombia, MD recently managed to upgrade his amateur radio license to technical class - N3PNE. Unfortunately, he can't get his transceiver to work. Peter also informs us that TWR publishes a magazine with some fairly interesting articles. For a copy write to: TWR, P.O. Box 98, Chatham, NJ 07928. Werner Rutsch in Switzerland says if you have a problem obtaining a f/d QSL from SRI send your reports directly to: PTT, Technische Direktion, Speichergasse, CH-3000 Berne...Thank you. Harold Cones informs us that the Great Circle Shortwave Society is a publication trying to reach the old WPEs. It is a very interesting publication with many fine articles written by the "old-timers". If you are interested write to Harold at: 2 Whits Court, Newport News, VA 23606. Ken Kashiwabara in CA says that conditions are terrible - what else is new! He has 44 reports outstanding along with several follow up reports. Also received some interesting correspondence from Tom McElvy in VA.

Distributing Editor: John F. Henault, 55 Lincoln St., Abington, MA 02351

Here we are at the end of another month my friends. Not too bad a turnout for the summer month and as noted, by loggings received here, lots of good activity being heard on the higher frequencies and yet the lower ones are still pretty active as well.

I trust that all who have had the chance to travel to ANARCON will have had a very enjoyable time and reveled in the gracious company of others who also share our grand hobby.

Yours Truly has finally been returned to active duty with the Police Dept. that I work for and I can honestly say that nothing makes my day more enjoyable than getting up in the morning and having someplace to go and do some real work, sure beats sitting around the house playing "Mr. Mom" hihi.

Some interesting items of note perhaps, first off, Log A Editor Mike Harris has compiled an article concerning his travels to the EDXC Convention in Finland. Regular Contributor Raymond Slagt of Aruba will be the house guest of mine for awhile in August with arrival scheduled for Aug. 14th. We will try and show Raymond the Historical Sites of Metropolitan Boston as well as some of the interesting locations that relate to Radio Hobby. Contributor Gerry Bishop should be trying to settle into his new duty station in Florida by the time this sees print. Old Time Contributor Norman Bobb is getting a taste of Summer Fun, his Daughter and Son In Law have taken Norman out of Minneapolis and set him up with a nifty listening post at their Summer home at Lynwood Lake where Son in Law has strung two nice longwire antennas for Norman to use, seems that Norman loves the idea, especially the nice peaceful scenery and quiet reception location. Norman uses his Wadley Barlow RX at the Lake listening post. Log C editor Joe Freeborn has been out at Camp Perry with his Coast Guard Pistol Team, I trust that Joe and his fellow guardsmen all shot straight and true and came home with a load of trophies. There are of course other items and I could go on for pages, however it will have to suffice to wish one and all the very best during all their summer activities. We look forward to having one and all back here in print in the fall.

That is all from here this month my friends. Looking forward to seeing you all againg in 30 days time. OH Yes, PLEASE CUT THOSE LOGGINGS INTO USEABLE STRIPS, my scissors are getting dull from so much cutting my friends !!!!

Warmest Regards

THE WINDOM DIPOLE

by
 THOM GIELLA
 6126 CREEKSIDE LANE
 LEAGUE CITY, TX 77573

After 15 years of DXing the radio bands, I have ended up with several types of receiving antenna's, a 304' longwire, a commercially made trap dipole and 12 dipoles cut for each shortwave band, all with varying performance factors and a backyard begging for a lightning strike.

I thumbed through my library of antenna books and decided to try out an all band dipole over 50 years old called a windom. A conventional 1/2 wave dipole cut in the middle will have an impedance of 68 - 73 ohms in free space, but in reality, will vary from 10 - 100 ohms depending on its height and proximity to objects. The dipole will work well on the band that it is cut for, 468/Fmhz and will also work well on every third odd harmonic 7 mhz, 21 mhz, etc. The windom dipole is different in that it is cut 33.3% from the end, or 16.7% off center. The antenna feed point impedance for the windom will be 300 - 400 ohms, again depending on height and nearby objects. A 4:1 balun will have to be used if coaxial line will be used for the feedline in order to get maximum signal transfer. A windom is resonant on every even harmonic 2mhz, 4 mhz, etc. The antenna length should be a 1/2 wave at the lower frequency of interest.

I chose a length of 140' 9", which corresponds to a 1/2 wave on 3325 Khz. One leg of the wire is 93' 10", and the other 46' 11". The wire is #14ga insulated stranded copper wire. Three insulators will be needed, I use the 2 1/2" plastic type. The coax feedline used is military grade 75 ohm, 11 feet, in my case. The 4:1 balun is a Radio Shack, 75 to 300 ohm impedance transformer. The complete antenna cost is less than \$10.00.

The ground system I use consists of an 8 foot hollow copper conduit with an 18 foot #14 gauge radial. The grounding strap from receiver to ground is three #14 gauge wires, 4 feet in length. The grounding strap should, whenever possible, be less than 1/4 wave in length on the highest band of interest.

The receiver I use is the Kenwood R-1000. I feed the windom into a Grove minituner 3, keeping the tuner on bypass, except when I need to knock out intermod on LW and MW. The windom is broadside NE-SW and 9 feet off the ground, though the higher the better. The VSWR at 3325 Khz, is around 2:1, 5:1 or less is acceptable for receiving.

The results with the windom dipole were very surprising. In general signal strength on the windom were 20db stronger than the trap dipole, 10db stronger than the 304' longwire, and +1 - 2db compared to the individual dipoles. The strange thing that I can not figure out is that the windom outperforms the longwire even on LW and MW. As it turns out, the windom dipole antenna is a very good all band antenna. Needless to say, I have taken down all of my other antennas.

LOG REPORT

section D

11700 and above

Editor: Wallace C. Treibel, 357 N.E. 149 St., Seattle, WA 98155

- 11700 ALASKA KNLS in EG 1635, mx variety, ID, free Bible offer (Tuchscherer WI 6/29)
- 11720 CANADA CBC North. Service in EG 1815, big band mx, ID, f (Cobb ME 6/21)

My thanks to R.C. Watts of Louisville for sending along the schedule of the Red Cross, and to Ken Kashiwabara of Panorama City, CA, for the schedules of ANR-Asia, RAI and the Voice of Asia. I had a nice conversation with Chuck Roswell, PJ4CR, on June 28. Chuck is an engineer at TWR, Bonaire, and operates on the Divi-Divi Net (14340 kHz USB on Su-Tu-Th at 1145-1215 UTC). He has kindly placed us on the mailing schedule for TWR Bonaire broadcasts.

Other notes: Glenn, I like the larger type face in LN, but I would prefer upper-and-lower case to make it easier to read. Don Carlson of Havertown, PA, in Log Report C last month cleared up why I had not been hearing Radio Earth on WHRI-7355 for a while, but in late July it apparently has not yet returned. The ANR-Asia schedule assumes two transmitters will be on the air by the time you read this.

The next round of English-language transmissions from The International Committee of the Red Cross will be: 8/30 1100 on 7210 Eu; 8/31 1700 on 7210 Eu; 8/31 and 9/31 0740 on 15570 11905 9885 9560 Aus, 1040 on 17830 15585 15570 11935 FE, 1310 on 17830 15585 15570 11955 11930 SE As, 1510 on 17830 15430 11840 9885 NE/E Af; 9/1 and 9/4 0310 on 12035 9885 9725 6135 MA. All except those to Eu are 17 min long; to Eu, 30 min.

The MUF has really started to rise as we go to press. As the solar flux numbers rise to above 100, the results can be readily seen on the 19m and 17m bands during the late evening and early morning hours here.

 Pinelands RBBS offers the weekly Sweden Calling DXers electronic bulletins, Radio Nederlands Program Preview and other goodies. Propagation and sunrise/sunset programs, other SWL and amateur radio programs, plus the best of the recent shareware/public domain programs for the MS-DOS family of PCs. Join the SWL conference and add your contributions to the messages therein. Call 609-859-1910 at 2400, 1200 or 300 baud, 8 bit, no parity, 1 stop bit.

 Does your computer interfere with your radio? SNAP-ON r.f. chokes can reduce or eliminate interference in cases where the computer r.f. signal travels along cables from the computer out to accessories. The chokes are placed around cables -- modems, serial and printer, monitor, power -- without having to disassemble the plug ends from the cables. More information on bulletin 13 on Pinelands RBBS or via mail (\$10 SASE please). \$15 for a package of 4 SNAP-ON chokes, plus \$2 shipping (NJ residents add .90 sales tax). Check or money order payable to TRS Consultants, address above.

This report covers changes entered between 06/26/87 and 07/24/87.

SOLAR FLUX & A-INDEX: Jan-Sept 1987

Data broadcast by WWV

THE MARKETPLACE REPORT

The Marketplace Report is published monthly in the ANARC NEWSLETTER. It is prepared by Harold Sellers, ANARC Technical Editor. Readers are invited to contribute news and information on equipment, companies and services of interest to radio listening enthusiasts. Our address is P.O. Box 161, Station "A", Willowdale, Ontario M2N 5S8; Canada.

New Sony Receivers

According to Bob Grove, writing in MONITORING TIMES, the new Sony receivers, expected in 1987, will be the ICF-SW55 (SW50 in Europe), replacing the ICF-7600A, with an added digital display. It will have a price of US\$269.95 list. The ICF-SW77 (SW70 in Europe) will be an improved AIR-8 handheld receiver, with added VHF coverage.

Grundig Shortwave Receivers

Grundig AG of West Germany has a new North American representative in Lextronix, Inc., 3520 Haven Ave., Unit L, Redwood City, CA 94063, tel. 415 361-1611.

The Grundig Satellit 650 receiver is now being launched by Lextronix at a price of US\$999. The Satellit 400 will be available later in 1987.

The Satellit 650 receives longwave (148-420 kHz), mediumwave (510-1620 kHz), shortwave (1.6-30.0 MHz) and FM (87.5-108 MHz), in the AM, SSB, CW and FM modes. It may be operated from 115 or 230 volts AC or DC. The DC supply may be from six batteries (plus two for the clock and memory) or an external DC supply.

Tuning may be by numeric keypad or manual tuning dial. Via the keypad frequencies may be entered in either kiloHertz or MegaHertz and leading or trailing zeros are not required to be punched in. Manual tuning may be accomplished in one of two speeds. When turning the dial slowly the frequency increments in 1 kHz steps on the AM bands and 10 kHz on FM, but when turned quickly the steps increase to 3 kHz for LW, 5 kHz for MW, 110 kHz for FM and either 11 or 111 kHz for SW. The sound is muted during fast tuning. A preselector is used for peaking AM reception. Coarse tuning is accomplished by a motor-drive and fine tuning is then done by hand tuning.

There are 60 memories possible in this receiver; 4 on LW, 8 MW, 16 FM and 32 SW. Bandwidths are narrow, broad and super-broad. The broad is intended for most general AM mode listening, while the super-broad is for hi-fidelity audio on MW or FM, when no interference exists.

The clock is a 24-hour type. The clock/timer allows the radio to be automatically turned on and off for up to three different periods. There are two speakers; a broadband speaker and a tweeter. Both speakers or just the tweeter may be switched off.

The Satellit 650 weighs 8.5 kg, without the batteries, and measures 504x242x202 mm. There is a built-in telescopic whip antenna for FM and SW, and a ferrite rod antenna for LW and MW. Rear-panel clamps are provided for an external antenna and a ground and there is also a coaxial antenna connector. Besides these there is a DIN-type connector for the connection of a longwave DF (direction-finding) antenna. Switches are provided to switch from internal to external FM/SW antenna and from ferrite to DF longwave antenna.

Other features are : noise limiter, headphone jack, external speaker jack, auxiliary audio (from recorder or phonograph) input and high-level audio output. Grundig also offers a dryfit accumulator 476, which is a rechargeable battery pack, to take the place of regular batteries in the receiver.

Lextronix provides sales, service and parts for both the United States and Canada. They are also representing Grundig's line of video products.

A unique item available from Lextronix is an 18 minute video instruction manual. This videotape explains the operation of the Satellit 650.

AR-2002 Scanner Dropped by Grove

Grove Enterprises has dropped the AOR AR-2002 scanner from their product line, due to delivery problems, according to the March 1987 issue of MONITORING TIMES.

Regency R1090 Scanner

The R1090 is a 45-channel scanner covering VHF-Low (30-50 MHz), VHF-Amateur (144-148), VHF-High (148-174), UHF-Amateur (440-450), UHF (450-470) and UHF-T (470-512). Forty-five of the most popular frequencies are pre-programmed by the factory. Frequencies may be grouped into any of four channel banks for "bank scanning". The "weather scan" feature allows reception of the National Weather Service at the touch of a button. The suggested retail price is US\$239.95. Regency Electronics Incorporated may be contacted at 7707 Records St., Indianapolis, IN 46226.

Regency Turbo-Scan 800

Also from Regency is the new Turbo-Scan 800 which also features the high scanning speed found on the Informant, ie. 50 channels per second. Twelve frequency ranges are covered: 806-950 Mhz, amateur 10, 6, 2 and 1-1/4 meter bands, space research 136-144 MHz, VHF-AM aircraft 118-136 MHz, Federal government land mobile 406-420 MHz, plus the standard VHF and UHF bands. Among its other features are 75 memories. The price is US\$499.95. The Model TS-2 comes with two telescopic antennas, for standard VHF and UHF, as well as 800 MHz reception.

A New Clock, for DXers, is available from Azimuth Clock, 11030 Santa Monica Blvd., Suite 100, Los Angeles, CA 90025. The Azimuth World Time Dual-Zone 24 Hour Station/Travel/Alarm Clock has two displays, one for UTC and the other for local time at any one of 24 selectable cities or zones around the world. The price is currently US\$19.95 plus \$1.95 shipping and handling.

Pocom AFR-2010 CW-RTTY All Mode Receiver

The Pocom AFR-2010 Decoder is available from several sources in Europe, but may also be imported to North America from its Swiss manufacturer. The AFR-2010 is capable of decoding almost all types of RTTY signals. Automatic detection of speed, shift and phase takes place and decoding takes place within five seconds of tune-in. A number of optional plug-in boards are also available for the decoding of specialized signals. Further information is available from Poly-Electronic, Spranglenstr.30, CH-8303 Bassersdorf, Switzerland.

Active Audio Filter

A new audio filter being advertised is VOICEGATE, manufactured by Jabco Electronics in Indiana. Priced at \$100 US, the manufacturer says VOICEGATE has gated audio, dynamic range expansion, two independent carrier nulling filters, one audio bandpass filter, record direct jack, cassette remote control and more. If you want to find out what all that means you can write to Jabco Electronics, Route 1 Box 386, Alexandria, Indiana 46001 for more information or send \$3.50 for a demonstration cassette recording.

Radio West has changed ownership. Grant Manning has sold the company to Steve and Suzanne Miller and as a result the address has changed to 850 Anns Way Drive, Vista, CA 92083, telephone (619)726-3910.

Universal Shortwave have issued catalog #86-11, which may be obtained for \$1.00 from Universal Shortwave Radio, 1280 Aida Drive, Reynoldsburg, OH 43068. Several new products and publications are included in this issue.

Regency R1070 Scanner

This is a 10-channel scanner covering the VHF-Low (30-50 MHz), VHF-Amateur (144-148 MHz), VHF-High (148-174 MHz), UHF-Amateur (440-450 MHz), UHF (450-470 MHz) and UHF-T (470-512 MHz) bands. No crystals are required and the scanner is pre-programmed with ten of the most popular frequencies, but new ones can be easily stored. A dual level vacuum fluorescent display flashes messages to aid in programming and once a frequency is entered into a channel, a special test key automatically verifies the frequency while checking all microprocessor functions.

Scanning can take place over the 10 stored channels or an entire frequency range. During power failures a special capacitor will hold the power for several hours, thus saving stored frequencies. No battery is used for this purpose.

The suggested retail price is US\$159.95. More information is available from Regency dealers or Regency Electronics Inc., 7707 Records St., Indianapolis, IN 46226.

Radio Equipment Review, a compilation of equipment reviews and news, published by Ronald Pokatiloff has been terminated because of a lack of support and contributions.

Heathkit Catalog: Browsing through the 1986 Heathkit catalog we find the HDP-7800 SWL Antenna, which is actually the popular Eavesdropper antenna. A 75 ft. longwire antenna is also offered - the GRA-72. There is a communications receiver speaker in an attractive cabinet - the SP-99. The HD-1418 Active Audio Filter, HFT-9 Antenna Tuner, HD-1424 Active Antenna, HD-1422 Antenna Noise Bridge and HD-1420 VLF Converter are other useful accessories. The SW-7800 Shortwave Receiver continues to be available as well. For a copy of the latest catalog write to Heath Co., Benton Harbor, MI 49022 or 1020 Islington Ave., Toronto, Ontario M8Z 5Z3.

A copy of the Grove Enterprises 1987 catalog is now available from Box 98, Brasstown, NC 28902.

MORE EQUIPMENT NEWS NEXT MONTH. TUNE IN THEN.
