DECEMBER 1998

Holiday Greetings

Quality Communications Equipment Since 1942

DRAKE

SW-2

- Full Coverage
- LW/MW/SW
- Sync. Detect.
- AML/LSB/USB
- 100 Memories
- 100 Hz Readout

Made in
America

The Drake SW-2 may be the best value in shortwave radio today. The SW-2 covers all longwave, medium wave (AM) and shortwave frequencies. Single sideband is easily tuned with separate LSB and USB positions. When a shortwave signal does start to fade you can engage sideband selectable synchronous tuning to stabilize and improve the signal. The nonvolatile memory system stores 100 channels. Other refinements include: RF Gain, Tuning Bar Graphs, Huge 100 Hz readout and Dimmer. Dual antenna inputs accept either a PL-259 coaxial or wire feedline. A mini earphone and 1/4" external speaker jack are provided. The optional remote (shown) lets you operate this radio from across the room (Order #1589 *48.95). All Drake receivers are proudly made in Ohio, U.S.A. and feature a one year limited warranty.

List \$499.00 Order #2222 *489.95 Sale \$399.95 (+7 UPS)

DRAKE

SW-1

- Full Coverage
- LW/MW/SW
- Digital Readout
- Keypad Entry
- 32 Memories
- RF Gain

The Drake SW-1 sets the stage for worldwide shortwave listening with ease, simplicity and clarity. Coverage from 100 through 30000 kHz provides solid coverage of longwave, medium wave and shortwave in the AM mode (no SSB). This makes it an ideal broadcast receiver for the desk or bed-stand. Tuning is a snap via the keypad, manual tuning knob, Up/Down buttons or 32 memories. The huge LED display features 1 kHz readout. Antenna input is via a 50 ohm terminal or SO-239 jack. A 1/8" mini jack is provided for use with earplug or headphones (not supplied). Operates from 12 VDC or supplied AC adapter.

Order #1100 *249.95 Sale \$199.95 (+7 UPS)

SANGEAN

ATS-606AP

It's all here. You get continuous coverage of LW, MW and SW (153-30000 kHz) plus FM stereo. Enjoy 54 memories, scanning, dual clock timer, 1 kHz LCD, dual conversion circuit, dial light, dial lock, keypad entry and local DX switch. Includes multivoltage AC adapter and wind-up antenna! Limited time offer. One year limited warranty.

Order #3319 *479.95 Sale \$99.95 (+6 UPS)

JRC

NRD-545

DSP

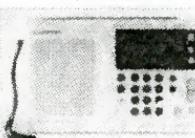

The new Japan Radio Co. NRD-545 DSP is the most sophisticated receiver ever developed for the hobby market. Please call to receive full technical details and pricing.

GRUNDIG

YB-400 PE

The new YB-400 PE has a striking titanium colored case and includes a wind-up antenna, case, SW Guide and AC adapter. This is our best selling worldband portable! List *249.95 Order #0400 *199.95 (+6) The original YB-400 is similar but with a black colored case (AC adapter optional). List *219.95 Order #0040 *169.95 (+7) Get a FREE Lucite stand with either model!

WIND-UP

The BayGen FPR-1 Freeplay radio combines the ingenious Baylis generator with the latest in radio technology. Winding the handle for 20 seconds provides 30 minutes of listening. Here is assured radio performance, day or night without the worry (and expense!) of batteries. The analog dial covers AM, FM and SW from 3 to 12 MHz. Made in South Africa. #3123 *99.95 (+7)

The smaller Freeplay FPR-2 model covers just AM & FM. #3667 *69.95 (+6) The Freeplay FPR-2SM is gray, AM & FM with solar cell. #2413 *79.95 (+6) The Freeplay FPR-2SC is clear, AM & FM with solar cell. #2443 *79.95 (+6)

**FREE
BOOKS**

NASWA Notes

Richard A. D'Angelo

2216 Burkey Drive

Wyomissing, PA 19610

Internet: rdangelo3@aol.com

Ho, ho, ho... 'tis the season to be a jolly DX'er! Happy holidays to the entire membership. Will that choice new receiver make its way into your hands this holiday season? Let's get those reminders out there for the family to pick up on!

Once again, a brief reminder that my new e-mail address is rdangelo3@aol.com. Please use it for all NASWA correspondence. My old address is no longer in use.

One of the things that makes this a great place to work is the quality of the staff that helps edit and assemble the Journal each month. Without hours upon hours of volunteer participation, there would be no Journal. A shining example of teamwork, cooperation and our club motto—Unity and Friendship—is the effort that goes into our popular Easy Listening column. Early in 1997, Rich Cuff had to step down on a temporary basis as editor. John Figliozzi grabbed a bat and pinch hit. Last month John ended an 18-month stint as temporary editor of the Easy Listening. Richard Cuff is back and his first effort, after his extended vacation, appears this month. Thank you John and welcome back Rich! Incidentally, you can catch the fine work of Mr. and Mrs. Hospitality at the Winter SWL Festival in Kulpsville in a couple of months. These two keep the hospitality suite in high gear in addition to their regular Easy Listening forum, which is one of the most popular features in FEST history.

Member Bob Padula is pleased to announce that Edition Number 6, December 1998, of

ANARC SWL Ham Net

Tune in Sunday mornings at 10 A. M. Eastern Time on 7240 LSB for the latest in shortwave, medium wave and longwave listening, DX tips, and up to the minute hobby news. Contributors share their DX tips via their own amateur radio stations or by telephoning a "gateway" station who then broadcasts the relayed tips. Contributions are also accepted via the Internet Relay Chat (IRC) channel #swl while the net is in progress. Net Controls Dave Kirby N1DK, Hause WB4JSP, and Bob Curtis W1EXZ host an always lively gang of DX monitors. (Best heard in the eastern half of NAm) Net info is also available at http://www.trsc.com/swl_net.htm. If you miss the net, you can hear it in RealAudio on the Internet, on Dave Kirby's home page, <http://www.ncweb.com/users/dkirby/>. Dave also posts text versions of loggings.

the popular *Australasian Shortwave Guide* ("ASWG6") is planned to be published on 12 December (print edition only—no electronic version!). ASWG6 is 28 pages in A4 format. Although targeting listeners from primarily in Australia, New Zealand and the Pacific Islands and secondarily in Asia, the Far East, the Indian sub-continent, the Indian Ocean, and Siberia, readers elsewhere will also find the general articles of interest. ASWG6 is a comprehensive alphabetical listing by country of programs beamed to Australia, Oceania, the Far East, South Asia, and the Indian sub-continent, for the W98 (B98) Winter Season.

Our Motto is - "Unity and Friendship"

Details are given of frequencies, times, broadcast days, target areas relay sites, languages and other information. This listing of several hundred entries is applicable for the five month period commencing October 25 and concluding on March 28 1999. There is also a new special Graphical Index on an hour-by-hour basis, referenced and linked to the main alphabetical country listings. ASWG6 will have data not published in the standard annual texts. ASWG6 will include the following features: DXing Singapore prepared by Mick Ogrizek, DXing From Asia, Austria Calls the World and International Broadcasting. Price for ASWG6 is unchanged—A\$10 in Australia (elsewhere via economy air-mail: A\$15, US\$10, 10 IRCs) from Bob Padula, 404 Mont Albert Road, Surrey Hills, Victoria 3127, Australia (E-mail: padula@compuserve.com)

It's time for another brief reminder about our monthly mailing date for the Journal. The Bulletin goes to the printer on the last Saturday of the month (publication day). The book, as Bill Oliver is fond of calling the Journal, is mailed "officially" on the Friday after the last Saturday of the month. The November edition of the Journal was actually mailed a day early on Thursday morning (November 5). Please keep this in mind when inquiring about missing bulletins. When the last Saturday is near the end of the month, the mailing date extends into the following, i.e. cover, month. Please keep this in mind when asking about missing books. Give the Journal a chance to arrive, hi!

That's it for this month. Enjoy this month's edition of the JOURNAL; it's another good one.

Musings

This column provides a forum where members can express comments, ideas, and thoughts about NASWA or the SW radio hobby. Please feel free to comment on anything presented this month (or previous months). Opinions expressed here are solely those of the submitters. Please submit all Musings to Richard A. D'Angelo, 2216 Burkey Dr., Wyomissing, PA 19610 or via email: rdangelo3@aol.com.

Joe Buch <joseph.buch@dol.net>, PO Box 1552, Ocean View, DE 19970

Following up on Jim Conrad's Musing in the October NASWA Journal, I also have been pondering what the design of a short-wave receiver should include for the next millennium. Naturally, the ability to receive and decode the new digital transmission format will be essential. I have previously presented in my Tech Topics column the features such a receiver would have according to the Digital Radio Mondiale consortium now developing the new standard. I now propose a new function I elect to call "Mute-On-Keyword".

As long as the digital receiver needs a digital processor chip or two anyway, why not implement user programmable voice recognition software as an integral part of the radio. That way I could program my radio to mute as soon as words and phrases like "Cheezuss", "salvation", "Y2K", "won't you support this ministry?", "Monica" or "cigar" are heard.

The "mute-on-keyword" function could help reverse the trend of declining short-wave listening among young people. Many of us ponder and lament in this forum why young people are no longer coming into this hobby. Could it simply be that parents just do not want their offspring's mind being warped by the mindless rantings of bigots, racists, and money-grubbing charlatans who spew their trash as the word of God? Young minds are very impressionable and easily influenced by continual streams of paranoia such as those that emanate from most US commercial short-wave broadcasters. If they are not preaching fear of the coming judgment day, or the forced return to the barter economics of caveman civilization as a result of the conspiratorial actions of the New World Order, they are

predicting the end of civilization as we know it on midnight, December 31, 1999. Why would any responsible parent buy their kid a shortwave radio?

Until commercial short-wave broadcasters clean up their act, the responsible parent must exercise the right to be selective about the ideas to which their young family members are subjected. Until listeners push commercial broadcasters to begin acting with some responsibility for what they air, the lure of easy money will continue to guarantee these rants will continue. Maybe automated, user-programmable, censorship is the answer.

The "mute-on-keyword" function of the millenium 2000 receiver would allow parents to exercise this discretionary responsibility automatically and once again restore short-wave listening to the safe hobby it was when I was cutting my short-wave eye teeth at age 10. In those days we only heard radio rantings about Communists under our beds, the world running out of oil by 1962, and imminent nuclear annihilation. Ah, for those simpler times.

Richard D'Angelo <rdangelo3@aol.com>, 2216 Burkey Drive, Wyomissing, PA

November saw our first DXpedition of the season. This was our first DXpedition to French Creek State Park. It's a little closer for our Philadelphia based contingent; also, Gifford Pinchot was booked solid so we had to find a new spot. This location had been talked about for years as an alternative so we put "Plan B" into effect.

The thorns at French Creek were not as plentiful as those at Gifford Pinchot, so my clothing held up just fine. Fred Kohlbrenner and I arrived around 2:00 PM on Thursday, November 5, but the "uniforms" in-charge wouldn't give us the key to the cabin until 3:00 PM. Everything is now computerized so when the system crashes, you can't get your key to the cabin. Apparently, the state modernized with "old" computer systems. Nothing like the lowest cost bidder getting the project. So we waited and did some antenna work prior to getting official title to the cabin for the weekend.

Bob Montgomery, Kris Field and Ed Mauger arrived, in that order I might add, on Thursday afternoon. After setting up, Ed drove home for his headphones. Thankfully, he lives only about 15 miles from the cabin. Personally, I think he was bored with us after only an hour. Conditions were far from spectacular until Saturday afternoon when some Indo's began rolling in but the cabins were electrically quiet so we now have two DXpedition sites.

There were no major weather catastrophes that usual surround our DXpeditions. There was a lot of talk about mayonnaise but I was too tired to fully comprehend what was going on.

FRENDEX: Twenty Five Years Ago....

What would December be without Charlie Loudenboomer's "Twas the Night Before Christmas?" Jimmy C. Jones was the winner of the Tall Tale contest. Jones' entry was about the freezing point of standing waves at -41 degrees Fahrenheit. Scott Reeves compiled a listing of English language programs to North America. The World Radio TV Handbook was being offered to members for \$6.50, which was \$1.00 off the cover price. Larry Yamron notified members that a local branch was being formed in Pittsburgh. Harry van Gelder sent a letter to all DX Federations, Councils, and clubs publicizing DX Rally 1974. Dan Ferguson informed members that club dues would remain at \$10.00 per year with the Mid-Month Flashsheet costing \$2.00 per year. In the QSL Report, John Campbell reports verification from the rare hospital ship "De Hoop." Other fine catches included Lakeland Radio, La Voix de Revolution, Burundi, That TV, and Turks & Caicos Islands.

Calendar Of Events

- Dec 18 Meeting.** **Philadelphia Area NASWA Chapter.** Kulpsville Holiday Inn, Kulpsville, PA at 7:30 PM. For more information contact Dan Cashin at 610-446-7831.
- Dec 18 No Meeting.** **Boston Area NASWA Chapter.** The December meeting of BADX has been cancelled. The next meeting will be January 15 at The Lexington Club, Rts. 4 & 225, Lexington, MA at 7:30 PM. The location is 1/4 mile west of Rt. 128, Exit 31. For more information contact Paul Graveline at 978-470-1971 or Internet: 74007.3434@compuserve.com. The URL for the BADX guys is <<http://www.anarc.org/naswa/badx/>>.
- Dec'98 Contest.** **1998 African DX Contest** organized by Gruppo Radioascolta Liguria ("GRAIL") will take place between 2200 and 2300 on December 20, 1998. Details in October's *Journal*. Send your entry to Alessandro Micheli, Via Lausen 16, 38050 Canal S. Bovo, Trento, Italy.
- Jan 8 Meeting.** The Tidewater SWL's meet at 6:30 PM. For more information plus meeting location contact Joe Buch at joseph.buch@dol.net
- Jan 8 Meeting.** The Cincinnati/Dayton Monitoring Exchange (MONIX) meet at the Lebanon Citizens National Bank on U.S. Route 42 in Mason at 7:00 PM. For more information contact Mark Meece at 513-743-8089 or e-mail at <mmece@siscom.net>. For additional information about MONIX, check out their web site at <<http://www.siscom.net/~mmece/monix.html>>
- Mar'99 Contest.** **1999 North American DX Championships.** Further information will be published in the *Journal* or you can send a self-addressed stamped envelope to 1999 NADXC, c/o Dr. Harold Cones, 2 Whits Court, Newport News, VA 23606.
- Mar'99 Convention.** The **12th Annual Winter SWL Festival** will be held at the Kulpsville Holiday Inn (Exit 31 on the Northeast Extension of the Pennsylvania Turnpike) on 12-14 March 1999. Organized by the infamous "gang of three" (Messrs. Brown, Cones, and Field) this all wave gathering attracts about 200 hobbyists each year.
- Apr'99 Convention/DX Camp.** The Danish Shortwave Club International will hold its **Annual General Meeting and DX Camp** during the weekend of April 30-May 2, 1999 at a scout camp in the dunes of the west coast of Jutland, Denmark. Details to follow.
- Apr'98 Convention.** The **35th Annual International World Wide Continental DX Association (IWWCDXA)** will be held in Tahiti at the Charlie Loudenboomer Estate on April 1, 1998 from noon until midnight. Charlie will lecture continuously during this 12-hour period on a variety of boring subjects some of which may actually pertain to shortwave radio. Registration fee is a modest \$150.00 with an extra \$50.00 charge for the traditional hamburger helper banquet. More information is available from Charlie at <ccl@sucker.com>.

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: rdangelo3@aol.com) or Ralph Brandi (Internet: ralph@mcs.com).

Contribute!

Send your loggings and QSL information off to our Distributing Editor, **Fred Kohlbrenner** (2641 South Shields Street, Philadelphia, PA 19142). He will forward them to the appropriate editor. Remember, Fred has now expanded his business to include QSL report information and totals for the **Scoreboard** column. He can also be reached through the Internet at: fkohl@ix.netcom.com.

Easy Listening

Richard D. Cuff

327 Springhouse Road, Apt. 102

Allentown, PA 18104

Internet: rdcuff@sprintmail.com

It's Great to be Back

Hello again! It's great to be back as the editor of *Easy Listening*. Before I go any further I wish to thank John Figliozi from the bottom of my heart for filling in for more than two years as column editor. The column has been in great hands during my absence, and I hope I can continue to build on John's excellent contributions. John certainly won't be disappearing from the hobby, as his other efforts in books and periodicals will now be able to receive a higher level of support. John will also be contributing from time to time in the column here as well.

So What Did I Miss?

The past two years have generally seen shortwave diminish in its importance as a medium for international broadcasters to deliver their message. Some key developments:

- ¶ **Radio Canada International** survived extinction threats and finally appears to be on solid footing.
- ¶ **Radio Australia**, an underfunded broadcaster even three years ago, has seen nearly half its transmitter plant shut down, and is no longer managed as an independent entity. Nearly all its programming originates from, or is also aired by, the domestic Radio National network, and Radio Australia is managed as a part of Radio National.
- ¶ **The Christian Science Monitor World Service**, a 'round-the-clock news and analysis effort, was shuttered, with all Christian Science programming now religious.
- ¶ **The Voice of America** adopted a 24-hour news and analysis format of its own, called *VOA News Now*.

¶ **Radio New Zealand International** has lost much of its independent programming.

¶ **Radio Portugal** no longer broadcasts in English.

¶ The **BBC World Service** scaled back from five program streams to three streams, and appears on the verge of launching a separate (my own speculation) 24-hour news service built on the format of *The World Today*. The Beeb continues to annoy listeners with ill-advised schedule changes and strategies.

¶ **Radio Norway International** no longer broadcasts in English.

¶ **Merlin Network One** has arrived on the air, mostly with a music format.

I'm sure I missed some of the more significant developments, but these were the station developments that came most readily to mind.

To some extent, we only have ourselves to blame. We need to make clear to broadcasters that our listening makes a difference in our attitudes, opinions, and behaviors about their country, people, and economy.

Myopic politicians and policymakers also share in the blame. Speaking as a marketing manager, I believe broadcasters are being shortsighted in eliminating or reducing shortwave as a medium, especially in the developing world, because it is very difficult to look at the cause & effect of different delivery methods in listeners' (think consumers) attitudes and opinions. As a marketer, it's very difficult to trace which marketing tools were effective in convincing a customer to do business with me. Was it an advertisement? A trade show? A press release? A direct mail piece? Tracing the initial source is very difficult.

Clearly, though, we as listeners need to become activists. At the Winter SWL Festival a few years back, I was struck by the passion of a couple attendees for a particular program host on WWCR. Do you show your passion for your favorite broadcaster or program?

The Internet and Shortwave Radio

I could consume a lot of space hashing and rehashing the relationship between the Internet and Shortwave Radio, but I won't. The 'net has greatly facilitated access to up-to-date schedule and frequency information for major broadcasters, and nearly all broadcasters can be E-mailed. However, detailed program information—the type I report on in this column—is still very difficult to come by, except perhaps 1 to 2 weeks in advance. A few broadcasters, specifically HCJB and Radio for Peace International, have created E-mail lists utilized in "pushing" program and station information to listeners.

Aside from information, the other significant role of the 'net is the availability of live and on-demand audio from more than 1700 sources, most of them radio stations. While Internet audio should still be considered somewhat experimental, with connectivity not universally reliable, the diversity of programming options – even just considering those broadcasters traditionally called "shortwave broadcasters" is remarkable. As a parent with two young children, much of my listening is "catch as catch can", and I listen to tape recorded downloaded files quite frequently.

Given the role of "webcasting" as part of the media mix, I do plan to report on programs originating from international broadcasters that air at times when a particular broadcaster doesn't propagate well to most of North America.

My reasoning is that the *message* is what's important in the context of Easy Listening,

whereas the *media* is less important. My basic criteria is that a broadcaster must have a significant shortwave presence for much of its output if it's to be discussed here. For example, an international broadcaster that's audible as part of the new *WRN from NPR* can be covered here, but NPR originated programming that's available only via satellite or webcast can't be covered here. If you'd like to debate that approach, feel free to drop me a note, or, better yet, submit your thoughts in a Musing to Rich D'Angelo.

Program Exchange

Several months back, John Figliozi started a new regular segment entitled "Program Exchange", incorporating your selections and suggestions for programming. I will keep this tradition going—as long as you support it with your submissions. I'll take written copy, E-mail, faxes (610-954-7045), or whatever format you're comfortable with.

Radio Australia: *The Planet*

Weekdays, 1300 UTC: First, from Bob Montgomery: Some fantastic music in the a.m., 1300 to 1500 UTC. *The Planet* features a wide variety of music, anything from Reggae to CW, and to real ridge runner music. Really good stuff. Some mornings, several types of music and not all the same for several hours. Can't say I have ever heard pop on at this time but much Jazz and sometimes some good folk. Blue grass this particular morning. Lucky Oceans (originally born Reuben Gosfield in Philadelphia) hosts Monday through Thursday, Robyn Johnston on Fridays. Doug Spencer produces the program for Australia's Radio National, and can be contacted at ABC Radio National, GPO Box 9994, Perth, W.A. 6001, Australia.

Radio Australia: *Money , Markets & The Economy*

Sundays, 1130 UTC: One of the problems with business and economic news these days is the emphasis on instant analysis, with very little depth. You don't see analysis, you just see reaction. Radio Australia has been offer-

ing a 13-episode series, *Money, Markets & The Economy* that seeks to demystify the external forces and political motivations that shape macroeconomic behavior. The program has been airing Sundays, 1130 UTC; the program is also available on-demand in RealAudio, (URL: <http://www.abc.net.au/money>) and other live airings, available in RealAudio, can be found from the Radio Australia website. The 13th edition will air December 6th; and the series will then be repeated starting with the 1st edition (per personal correspondence from RA).

Merlin Network One

Daily, 2000 to 0600 UTC: From John Figliozzi, here's the program schedule for Merlin Network One:

Daily except Wednesdays:

0000 *The MNO Music Jam*

2000 *The Rock Radio Network* (from 1800)

Wednesday

00:00 *The MNO Music Jam*

20:00 *The MediaZoo**

21:00 *Atmospherics*

22:00 *The 2 hour Album Zone*

North American target Frequencies:

0000–0300: 9560 kHz

0300–0600: 9895 kHz

2000–2200: 11985 kHz

HCJB—DX Partyline

Sundays, 0110 and 0410 UTC: Also, from Mr. Figliozzi: Next weekend, HCJB's *DX Partyline* starts a new feature titled "Tech Talk with Dr. Rick." This will be the first regular technical spot for SWLs since the demise of "The Two Bobs" on SRI some years ago. (Arnie Coro's program on RHC is technical in nature, but oriented more toward hams—and more advanced ones at that, IMHO.)

From what I understand, the spot will work very much like "The Two Bobs" or if you prefer the *Swiss Shortwave Merry-Go-Round*. Technical questions related to SWLing from listeners will be answered. More details are on the HCJB website.

BBC World Service Highlights

As usual, we'll preview upcoming **BBC World Service** series and occasionally profile ongoing offerings. I'll focus on prime time airings in the Americas stream, when possible given the program schedule. First, though, I'll highlight a phenomenon which happens only once every nine years.

Light Entertainment

Thursdays, 0330: *Brain of Britain* reaches a nine-year climax with the following series of programs:

December 17th: The finals for *Brain of Britain 1998*, with Robert Robinson presiding.

December 31st: The 1998 champion (crowned on the 17th) faces off against the 1996 and 1997 champions for the title *Brain of Brains*.

January 7th: The 1998 Brain of Brains faces off versus the 1995 and 1992 Brain of Brains for the crown of *Top Brain*, awarded once every nine years!

The only other Americas airing on shortwave is the prior Saturday at 0730; you might also be able to catch the European feed Mondays at 1830.

General Features

Sundays, 0130—*On Your Behalf* is a 12-part 15-minute listener contact series for listeners with a sense of curiosity regarding what they've heard (presumably, on the World Service). The program is hosted by Malcolm Billings, who hosts and produces the popular program *Heritage*. *On Your Behalf* also airs Fridays at 1615.

Mondays, 0130, beginning December 7th—*Pick of the World* returns for a 16-week run. Daire Brehan picks her favorite programs for the prior week for a repeat airing. Daire can apparently be influenced by listener suggestions regarding which programs are worth repeating; E-mail your suggestion to pick@bbc.co.uk. Also airs Sundays 1615.

Mondays, 0530, beginning December 7th—

Tying The Knot is a five-part 30-minute series looking at wedding celebrations and their cultural contexts in five diverse cultures, ranging from Nigeria to Hungary to Pakistan and beyond. Also airs Saturdays 1030 and Mondays 2130.

Saturdays, 0130, beginning December 26th—

Small Worlds is a six-part 15-minute series investigating the unique lifestyles of the world's 'microstates'—those countries small in landmass and population. Why do Monaco, Iceland, Samoa, Kiribati, Nauru, and the Seychelles all have minimal starvation, homelessness, unemployment, or crime? Repeated Fridays 1515.

Science and Technology

Tuesdays, 0145, beginning December 15th—

Wild Tales is an eight-part 15-minute series inviting eight different naturalists the opportunity to relive some of their most memorable and fascinating animal encounters. You can hear about Polynesian snails, anaconda snakes in Guyana, and leech plagues in the Amazon. Joanna Pinnock hosts; also airs Fridays 1230.

Tuesdays, 0330, beginning December 29th—

Watershed is a four-part 30-minute series examining the possibility that demand for water may soon exceed its global supply. Water has long been a source of conflict, between Egypt and Ethiopia, and Israel and Palestine, to name a few countries. Andy Kershaw discusses water problems with politicians, environmentalists, scientists, and people at the heart of the problem. Repeated Tuesdays 1130.

The Arts

Saturdays, 2230: **Play of the Week** synopses:

Saturday, December 12th: *The Cyclist* is a simple fable-cum-morality tale, where an innocent dreamer, known only as the Narrator, is desperate to see the world. He leaves his sheltered Indian village and sets off to cycle round the world. Written by Vijay Tendulkar, one of India's foremost modern playwrights.

Saturday, December 19th: *The Spectre Bridegroom* is based loosely on a Washington Irving short story as a Christmas fairytale with a distinctly science fiction flavor. Hattie, a practical, of not particularly beautiful young girl, is promised in marriage to the heir of an old and honorable family. Said gentleman shows up to claim Hattie's hand, but he is, alas, crushed to death by a passing waste disposal unit from the planet Ord. Hattie's despair is ameliorated by the Model G28 humanoid aboard the waste disposal unit, but Hattie's father isn't so sure. Written by Diane Ney, a previous winner of the BBC World Service Playwriting Competition.

Saturday, December 26th: *Mr. & Mrs. Nobody* is a stage play based on George and Weedon Grossmith's comic masterpiece *The Diary of a Nobody*. Keith Waterhouse wrote the stage play based on this and his own work *Mr. Pooter's Diary*. Dame Judy Dench and Michael Williams are featured.

That's it for December—have a wonderful holiday season! See you next year

DX Target: Radio MINURCA

United Nations Mission Radio in the Central African Republic

by Richard A. D'Angelo

During the summer of 1998, a small radio station, established by the United Nations Security Council began broadcasting on FM in Bangui, the capital city of the Central Africa Republic. By November, Radio MINURCA was able to add shortwave broadcasting, thus becoming the first UN "mission" station to operate on shortwave. I was fortunate to catch a broadcast from this new shortwave broadcast station during its first week of operation and received some interesting information from its director, David Smith. More about Radio MINURCA, its role in Africa, and its programming a little later. First, let's take a brief look at the Central African Republic.

The Country

The Central African Republic, as its name implies, lies in central Africa and is bordered on the north by Chad, on the east by Sudan, on the south by the two Congos and on the west by Cameroon. The landlocked nation has an area of 622,436 sq. km (about 240,323 sq. mi.). Bangui is the capital and largest city.

Land, Natural Resources, and Climate

The Central African Republic is situated on the northern edge of the Congo River Basin. Most of the land is a plateau that ranges in elevation from 610 m to 790 m (about 2000-2600 ft). There are two ranges of hills in the north and northeast that rise to maximum heights of about 1400 m (about 4600 ft). Most of the country is savanna, which is grassland interspersed with trees. Open grass-

land is found in the extreme north, and dense rain forest covers the major part of the southwestern part of the country. The mineral resources of this primarily agricultural country are relatively undeveloped. Diamonds are the dominant exploited mineral, but deposits of uranium exist, as well as iron ore, gold, lime, zinc, copper, and tin. Commercially valuable trees include the sapele mahogany and the obeche. Almost every animal of the African tropics is found in the country. However, David Smith notes, "There is fabulous scenery in the country, and I have heard that there is lots of big game too, but, after seven months in Bangui, I have yet to see anything more exotic than a dog." The climate of the Central African Republic is hot and humid; the average temperature is about 26°C (79°F). Tornadoes and floods are common at the onset of the rainy season, which lasts from June to November. Annual rainfall varies from about 1800 mm (about 70 in) in the Ubangi River valley to about 200 mm (about 8 in) in the semi-arid north.

Population

The main ethnic groups of the Central African Republic are the Baya, Banda, Sara, Mandjia, Mboum, and M'Baka. About 49 percent of the population inhabit small villages, living and working according to traditional customs. The population of the country was 2,054,610 in a 1975 census and was estimated in 1995 to be 3,429,000. Most of the population is concentrated in the western half of the country, where Bangui (Population estimated in 1988 as 451,590), the capital and chief city, is located. An estimated 60 percent of the total population follow traditional religions, about 35 percent are Chris-

tian, and 5 percent are Muslim. French is the official language, but Sango is the most common African language and numerous other African languages are also spoken. Only 38 percent of the population are literate.

Economy

The Central African Republic is one of the most underdeveloped areas in Africa. Growth of the export economy is hindered by the difficulty of transporting goods to a seaport. The country has no railroads. Consequently, river systems are important arteries of transportation. About 60 percent of the population earns their livelihood by farming. The agricultural output is fairly evenly balanced between subsistence and export crops. The principal sources of revenue are diamonds, coffee, tobacco, cotton, and timber exports. The annual national budget in the early 1990s showed revenues at \$175 million and expenditures at \$312 million.

Only about 3 percent of the total land area is suitable for crops. The government has organized agricultural cooperatives, placing primary emphasis on introducing new crops that are expected to produce a higher income. The government encourages the cultivation of tobacco, sesame, and rice. The most important cash crop has traditionally been coffee, but production declined along with market prices in the early 1990s. Cotton, which is widely cultivated, is now the leading cash crop and represents 23 percent of export earnings.

Manufacturing activity in the Central African Republic is very limited. Products include cottonseed, peanut, and sesame oils; textiles; leather goods; tobacco products; soap; flour; bricks; and paint. The annual output of electricity is about 96 million kilowatt-hours, approximately 69 percent of which is generated in hydroelectric installations. Gem diamonds account for nearly all the country's mineral output and 63 percent of its export revenue.

France and Belgium are by far the leading trade partners, and some commerce is also carried on with the nearby nations of

Cameroon, Congo, and Gabon, with which the Central African Republic is linked in the Customs and Economic Union of Central Africa. In the early 1990s annual exports earned about \$138 million while imports cost \$205 million. Station Director David Smith offers the following comments about the economy. "The only textile mill in the country closed down a couple of years ago. The UCATEX factory in Bangui is waiting for the elements to knock it down. A big part of the problem is lack of infrastructure. It takes almost a week to drive from the coast (Doula, Cameroon) and only the most sturdy of vehicles dare make the trip. A good highway and rail line to Douala could help boost the economy of this country."

Government

In 1981, army officers overthrew the government of the Central African Republic and suspended a constitution that had been approved earlier that year. A new constitution calling for a single-party republic was approved by referendum in November, 1986. Under this constitution, a president and the Council of Ministers, which the president heads, hold executive authority; the president is popularly elected to a six-year term. The National Assembly, the 85 members of which are popularly elected to five-year terms, holds legislative authority. In 1992, the constitution was revised to allow for a multi-party system. A recent series of mutinies has resulted in the current UN peace-keeping mission.

History

Most of the ethnic groups inhabiting the present-day Central African Republic entered the region in the 19th century to escape Fulani armies or to avoid slave traders operating in the Congo River Basin and modern Sudan. In the 1880s, the French annexed the area and in 1894 it was organized as the territory of Ubangi-Chari. In 1910, the dependency became part of the Federation of French Equatorial Africa. From 1946 to 1958, the territory had its own elected legislature and was represented in the French National Assembly. In 1958, the dependency gained

autonomy as the Central African Republic; it became fully independent on August 13, 1960. At one time in late 1976, the country was briefly renamed the Central African Empire.

The Station

Radio MINURCA is the UN's peacekeeping radio station in Bangui. Radio MINURCA commenced broadcasting on July 22, 1998 on FM 100.8 MHz in Bangui using a 500 watt transmitter. After running test transmissions of music from July 22 through July 27, the station's first live program was broadcast at 0815 UTC on July 27th. It consisted of an interview with the UN's Special Representative to the Secretary General, Mr. Oluymi Adeniji. Shortwave broadcasting commenced at 1600 UTC on Saturday, November 7, 1998 on 9900 kHz. The station uses a 20-kilowatt transmitter, which is running at only 12 kilowatts. Programming is targeted to the Central African Republic from studios located in Bangui.

The UN mission was established in Bangui in April, 1998, by action of the UN Security Council, in order to ensure security and stability in the country following three violent mutinies. Radio MINURCA is part of the UN's peacekeeping mission. MINURCA (Mission des Nations Unies en République Centrafricaine) was established by the UN Security Council in April, 1998, and is scheduled to continue until February 28, 1999. While Radio MINURCA is scheduled to cease broadcasting on that date, there is the possibility that either the mission will be extended or another UN agency may take over operation. David Smith, Director of Radio MINURCA, would like to see the Radio MINURCA continue because the station "is extremely popular here and provides the only independent voice in the country."

Radio MINURCA is enjoying many firsts for the UN: first mission radio to broadcast 24 hours a day, seven days a week; first UN mission radio to broadcast on shortwave; and first UN mission radio station to use local presenters for all of its programming. The first program broadcast on Radio MINURCA was called TGV Musique, presented by Carlos Valenzuela, who also hap-

pens to be chief of the station's electoral unit. The station also carried a "once-off" reggae program, in English, on Saturday, November 16, 1998, that was heard worldwide by DXers and shortwave listeners including myself. Jamaican-born Henry Thompson, the station's communications chief, who made his first radio appearance with that broadcast, presented the program. Station Director David Smith says, "The 'once-off' reggae program has proven so popular that we've decided to 'cement' it into the Saturday 2100 UTC slot. We have literally been bombarded with e-mails from all around the world complementing Radio MINURCA and Henry Thompson on REGGAE NIGHT."

Most of the station's programming is in Sango and French, although Radio MINURCA also carries some live programming from the BBC Africa Service in English (0500-0600 and 1745-1900 UTC). There are plans to run some English and French programming from Radio Netherlands in the near future. The target audience is the people of the Central African Republic and the bulk of the station's current programming deals with preparations for legislative elections scheduled for Sunday, November 22, 1998, and again on December 13, 1998. Presidential elections are scheduled for late 1999, but it is unclear whether the UN will still be in Bangui at that time.

The station is very interested in receiving reception reports. They can be sent by regular postal mail to the station at: Radio MINURCA, David Smith, Director, P. O. Box 2732, Bangui, Central African Republic. According to Mr. Smith, "e-mail is rather fragile in the Central African Republic, so I use two different systems. One of them us usually down." E-mail reception reports can be sent to David Smith at <radmin@intnet.cf> or <smith2.unep@un.org>. Alternatively, you can try sending a reception report to their FAX number 1-212-963-9715, which, by the way, is in New York City.

Grab this one while it lasts. Report loggings of this new station to Wally Treibel for the International Band Log Report and verifications to Sam Barto for the QSL Report. Good luck with this DX target.

The Ten-Tec Model RX-320 PC Radio

This has been one of the most fun-to-use receivers I have ever tested—I think that any SWL with a computer would love to have one of these radios! Since the radio's control functions and most of the signal processing are done via software, the radio has a fantastic price to performance ratio, with a price of \$295 plus shipping. The Ten-Tec RX-320 is a 3 x 6.25 x 6.5 inch black metal box that plugs into a serial port of a personal computer running Windows 3.1 or 95. The computer must be a 386 or better and have at least one megabyte of free hard disk space available. The DSP functions are handled by a chip in the receiver, so processor speed is not important for receiver performance. I used a 200 MHz Pentium and response to commands was almost instantaneous. The receiver is supplied with a 9 pin (DB9) serial cable, AC adapter, a patch cord for connecting the receiver's audio output to the computer's sound card line input, control software on a 3.5 inch diskette and a telescoping whip antenna which screws into the radio's circuit board via a hole in the top cover. Provision for an external antenna (RCA phono connector) and an external 4 ohm speaker (1/8 inch jack) are available on the radio's rear panel.

The RX-320 is a general coverage receiver with a frequency range of 100 kHz to 30 MHz. Demodulation, filtering and AGC are all done by digital signal processing. Reception modes of AM, USB/LSB and CW are supported. There is no synchronous AM mode. The receiver's IF bandwidths are 8, 5, 2.5, 1.8 and 0.5 kHz (shape factor 1.5:1 or better) on the latest models. The receiver was originally equipped with 6 and 3 kHz values instead of the 8 and 5 kHz and the advertising

I have seen as late as the November 1998 QST still shows values of 6 and 3 kHz. The folks at TenTec told me that the change was made for better SWL performance. AM sensitivity is rated as 0.64 uV with the wide filter (80% modulation, one kHz tone, 12 dB S+N/N). SSB sensitivity is 0.3 uV with the 2.5 kHz filter. Third order intercept is specified as +10 dBm with a 90 dB dynamic range with the 2.5 kHz filter with 50 kHz signal spacing. The radio is a triple conversion design with intermediate frequencies of 45 MHz, 455 kHz and 12 kHz—the final conversion being for the DSP circuitry.

Installation

I really appreciate that TenTec supplies all the necessary cables for connecting the RX-320 to a computer. They even include a RCA connector for the external antenna jack. The radio does require a free serial port to be connected to, but it can be configured to use COM 1-4. The serial cable and the audio patch cable are six feet in length, to allow placing the receiver away from the computer and monitor. The control software is loaded from a 3.5 inch diskette and takes up less than a megabyte of hard disk space. The software version I received with the radio was Version 1.25, but Version 1.26, which repairs a couple of glitches, is now available on the TenTec Website. I initially had no audio output from the sound card, but this was a problem with my computer. I had to activate the line input via the sound card's mixer program. It took longer to figure this out than it did to install the software and start using the radio! If your computer doesn't have a sound card, the RX-320 provides a one watt output to drive an external 4 to 8 ohm speaker.

Gee, it looks like a radio!

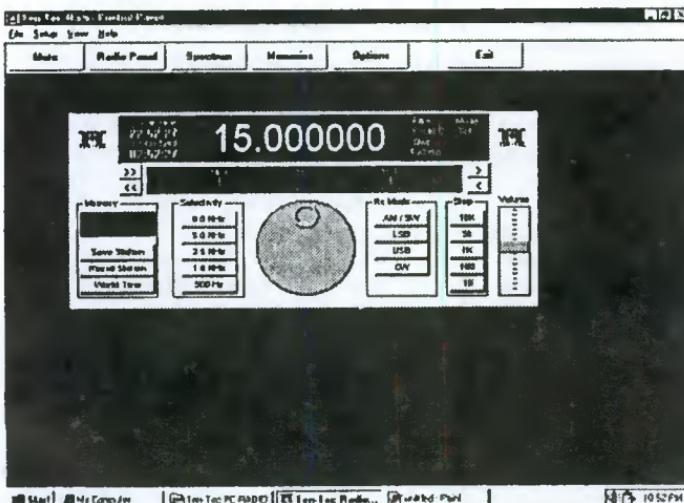

At this point, I strongly advise you to go to TenTec's Website (www.tentec.com) and download the RX-320 control program software, since a picture is worth 10,000 words. The software will operate without the radio. Once the control program is started, the main screen comes up with three windows: the radio panel, the memory window and the spectrum scan display. These windows can be opened or closed by clicking on buttons on the program's toolbar or via the "View" option on the Menu bar. The radio panel window is the primary one that most operators will use. It looks just like the front panel of a typical communications receiver with frequency display, tuning knob (with spinner indent!), pushbuttons for mode, filter and tuning step and a slider for volume control. The computer's pointing device (I prefer a trackball to a mouse, due to limited real estate on the desk) is used to select the desired function. The top portion of this window has the frequency display, with readout to 1 hertz. Along with the frequency the current filter, mode and tuning step are displayed. There is a clock with both local and UTC times displayed. The radio's clock is slaved to the computer's clock. Offset between UTC and local time is set via the "Options" button on the toolbar or via "Setup"

on the Menu bar. Just below the frequency display is the log scale. The log scale is calibrated in 2 kHz steps and covers a span of approximately 260 kHz. A red index line in the center of the log scale indicates the currently tuned frequency.

Where's the tuning knob?

The log scale can be "dragged" to retune the receiver—very useful for quick frequency excursions, but not very precise. At the right end of the log scale are right and left arrowheads. When these are clicked the radio will tune in steps based on the currently selected step size in the direction of the selected arrowhead. Available step sizes are 10, 5 or 1 kHz or 100 or 10 hertz. When a specific mode is selected, a default tuning step is selected: 5 kHz in AM and 100 hertz for SSB/CW. These defaults cannot be reset. At the left end of the log scale are double left and right arrowheads. When these are clicked, the radio tunes in steps equal to 10 times the current step size.

Yes, there is a (virtual) tuning knob. By pointing to the tuning knob on the panel display the radio can be tuned by clicking. Point to the upper half of the knob and a clockwise arrow appears. The receiver then tunes up in frequency by the selected step size for each click—point to the lower half of the knob to tune downward. The receiver tunes continuously if the left mouse button is held depressed. For those who refuse to use a mouse, the computer's Up and Down arrow keys will also tune the radio.

Direct frequency entry is also possible via the numeric keypad (Num Lock must be enabled). I found it easiest to enter frequencies in MHz for-

mat, i.e. with a decimal point. Kilohertz entry can be forced by typing "k" instead of "Enter" after the desired numerals. The instruction manual states that the program will attempt to determine the format based on the numbers entered. This didn't work too well—entering frequencies less than "1000" tuned the radio in kHz, but numbers greater than 1000 resulted in the radio tuning to hertz. For example, entering "7,8,0,Enter" tuned to my local talk station on 780 kHz, but typing "1,2,9,0,Enter" tuned the radio to 1.290 kHz—below the reception range of the radio! I found it easier the use the "k" method to enter medium and longwave frequencies and the decimal point and "Enter" for shortwave—zeroes after the decimal point do not have to be entered. By clicking on the frequency display, a numeric entry window is opened and the desired frequency can be typed in, but I don't see much point in this, as it requires an additional mouse click compared to the keypad entry method.

Other controls

To the left of the tuning knob are the buttons for bandwidth selection: 8, 5, 2.5, 1.8 and 0.5 kHz. Any of these values can be selected for any mode, but the defaults when a specific mode is selected is 8 kHz for AM, 2.5 kHz for LSB/USB and 1.8 kHz for CW. Further to the left of the tuning knob are the memory controls. At the top of this column is the memory display—this shows the station identifier (i.e. "BBC") when the receiver is tuned to a frequency that has been saved in memory. Below this window are the memory save and recall buttons. When the "Save" button is clicked, the "Station Information Sheet" pops open. This permits entering the station callsign or identifier, frequency, mode, bandwidth, country, language and notes. Pressing the "Recall" button pulls up the memory window—which I will describe later. The bottom button in this column is "World Time"—clicking this button tunes the radio to 10 MHz in AM mode. The default frequency for the "World Time" button cannot be altered. Unfortunately, there's no way to go back to the frequency the radio was tuned

to, other than using the keypad or the other tuning methods—it would be nice if clicking the "World Time" button a second time would return the receiver to the previously tuned frequency.

To the right of the tuning knob are the mode buttons: AM, LSB, USB and CW. The AM button is labelled "AM/SW", I presume for those North Americans who equate "AM" with the medium wave band. Contrary to what is shown in the ads for the RX-320, there is no "SAM" button for synchronous AM detection (hopefully a future development, but "not at this time" according to TenTec). Further to the right are the tuning step buttons: 10K, 5K, 1K, 100 and 10 hertz. There are no provisions for 9 kHz steps for overseas MW listeners. The minimum tuning step of 10 Hz is adequate for SSB/CW signals, but is still too coarse for really good ECSS tuning of AM signals with music content, although it is adequate for voice programs. The other obstruction to ECSS tuning is outlined below. Any tuning step can be selected for any mode, but switching modes resets the receiver for the default step for that mode; 5 kHz for AM and 100 hertz for the other modes. In addition, switching modes changes the resolution of the tuning display to the default tuning step for that mode.

Zero-beating, Not!

This can present a problem when attempting to "zero-beat" a station to measure the exact frequency or for ECSS tuning of AM signals. An example is in order to illustrate this. If the radio is tuned to a signal at 9.755 MHz in AM mode, then switched to USB and 10 Hz tuning step selected, the signal is zero beat at 9.75486 (the master oscillator is off slightly—TenTec says that the capability to adjust this oscillator will be incorporated into future software revisions), then switch to LSB to compare the sidebands. At this point, the tuning step switches to 100 Hz, which is OK, because it can be changed, but the receiver retunes to 9.75480 MHz (note that the tuning goes to the lower 100 Hz increment, not the nearest). Therefore, one sideband cannot be

compared to the other without resetting the tuning step size and retuning. If the AM mode is then re-selected the receiver retunes to 9.755 MHz, since the tuning step defaults back to 5 kHz and the display reverts to 1 kHz resolution. Going back to the zero-beat frequency requires resetting the tuning step and retuning the radio. The solution would be to have "sticky" defaults where the software remembers the last step used for a particular mode or being able to specify the defaults via an options menu.

Unique S-meter

A non-standard "S" meter can be displayed by checking a box in the User Options brought up by the "Options" button on the toolbar or via the "Setup" choice on the Menu bar. It is non-standard in two ways: it has a 0 to 80 scale rather than "S" units and it has TWO needles! The lower needle indicates the current relative received signal strength while the upper is a "peak hold" indicator with a decay time of about one second.

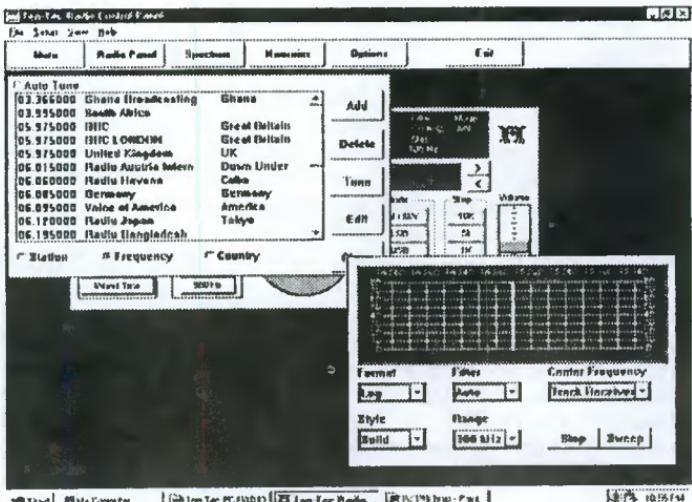

Other features

So far, what I have described is a radio with a virtual front panel. However, the RX-320 software has two additional components that make it more than that. Although these features are available through software control programs for other radios, TenTec's implementation of them make them very functional and easy to use.

The first of these features is the memory window. When this option is selected, a window opens with a list of stations stored in memory displayed. The memories can be reviewed by scrolling through the list. The

memories can be displayed in order of callsign/station identifier, country of origin or frequency. Clicking on a memory highlights the listing and it can be tuned, deleted or edited. The edit command pulls up the "Station Information Sheet" which contains fields for station, frequency, mode, bandwidth, country, language and notes. There is no "Copy" command for making duplicate entries where only one field such as the frequency needs to be changed. On the main memory screen is a radio button for "Auto Tune"—when this option is selected, the radio will automatically tune to the desired memory channel with a single mouse click.

I found the memory list to be very useful and quick to use. The number of available memory channels is only limited by the computer's available RAM, according to the manual, although surely what is meant is hard disk space, since the receiver's memories are non-volatile. The manual states that any PC will store 1000's of memories. The only drawback I can foresee to this memory capacity is that there is no way to search the list of memories. I think it would be nice if there was a search function, especially if it was the type of search that Microsoft uses in some of their programs where the search results automatically narrow as more characters of the desired search target are typed in. Unfortu-

nately, based on my correspondence with TenTec, there are no plans to implement such a feature at this time.

Is the band open?

The other feature of the RX-320 that I found quite exciting was the spectrum window. This window is a spectrum analyzer display, which shows a plot of signal strength vs. frequency. The sweep widths available are 1.5 MHz, 750, 300, 150, 75, 30 or 3 kHz. The center frequency can be the frequency that the receiver is currently tuned to or can be input by the user. The sweep time is 25 seconds and the receiver mutes during the scan. Once the scan is completed, the user can point to the spikes on the display and tune to that frequency by clicking. I found that the spikes lagged the actual frequency by one or two kilohertz, so some fine-tuning may be required. This was no big deal, since it just involves moving the mouse pointer and clicking a time or two. The spectrum analyzer works quite well—it does a good job of distinguishing signals from noise. I really enjoyed this capability, especially for band-scanning and searching for new stations.

Is it a good radio?

Since the RX-320 has no front panel controls and signal detection and processing are handled by a couple of integrated circuits, the overall cost of the radio is low. I would comfortably state that this is the best radio available for \$300. Due to the inherent cost savings in the design, overall performance is approximately equivalent to "normal" radios costing up to twice as much. Of course, one must factor in the cost of the required computer system, but most people that would be interested in the RX-320 have a computer already. I don't have any experience with the Icom PCR-1000 or the Winradio, so I can't compare how the TenTec performs relative to these other PC radios. The PCR-1000 and Winradio do have VHF/UHF coverage, unlike the RX-320, which only goes up to 30 MHz.

Due to its lack of advanced features such as passband tuning and notch filter, the RX-320 isn't a replacement for kilobuck DX machines, but it does a creditable job for both program listening and DX'ing. Sensitivity is more than adequate, especially with an outdoor antenna. I could routinely copy hams on ten meters and got plenty of stations on the tropical bands. The filtering, due to the tight skirt selectivity inherent with DSP filters, is outstanding. The 8 kHz bandwidth was excellent for program listening and the 5 kHz value works well for rejecting adjacent channel interference. The 5 kHz filter sounds somewhat "pinched" (consistent with the tight skirts), but the receiver could be off-tuned by one kHz or so to "brighten up" the sound while still rejecting interference. Both the 2.5 and 1.8 kHz filters were very useful for listening to hams. The AGC characteristics were good overall, although there was some "thumping" on weak signals. I couldn't detect any difference in the AGC when switching from AM to SSB modes. I was unable to detect any spurious signals from local MW broadcasters, either above or below the standard AM broadcast band, even with a half wavelength 90 meter dipole. TenTec rates the receiver's dynamic range at 90 dB (2.5 kHz bandwidth at 50 kHz spacing) and the third order intercept at +10 dBm. I thought that the audio quality was excellent, but this will be dependent on the quality of the sound card and speakers that are attached to the host computer. The built-in audio amplifier had more than enough power to drive a Drake MS-4 speaker to room-filling volume. The external speaker output can be used for headphones, but a mono to stereo adapter is required for stereo headphones.

Hints and quirks

With my particular computer and monitor, I was unable to use the RX-320's whip antenna for anything more than a quick test due to computer noise. Most of the noise was from the monitor. Based on my experience, I would recommend locating the antenna for

the radio as far from the computer as possible and using good quality coaxial cable to connect the antenna to the RX-320. Initially, I still had a noise problem when using an outdoor antenna with a coax lead-in—I found that center conductor of the coax had a poor solder joint at one of the connectors. Resoldering the joint almost completely removed the noise. The connecting cables for the radio are six feet in length, so the radio can be placed away from the computer and closer to the antenna. A good earth ground can be useful for reducing noise, as well.

When I used the control program with my monitor set for large fonts, the bottom 1/5 of the clock digits were cut off. Switching the monitor preferences for small fonts restored the full clock display.

I did notice some quirks with the memory display window on the radio panel. I had saved the frequencies for RFPI (6,975 and 15,049 kHz) in memory. I was quite surprised to see "RFPI" pop up in the memory window as I was tuning the 160 meter ham band one evening, at 1942 kHz. Subsequently, "WLW" (normally at 700 kHz) appeared in the window as I tuned past 13,807 kHz while bandscanning. Note that the radio didn't tune to these frequencies—just that the stored station identifier appeared in the display window. I'm not sure what causes these anomalies.

Occasionally, the control program wouldn't start—a "floating point error" message was displayed. This is a bug that occurs when the S meter display option is chosen. Version 1.26 of the control software supposedly fixed this bug, but I still had the problem intermittently. While cycling the power switch in frustration during one occurrence of this problem, I managed to break the switch. Fortunately, the power switch is the only component that is not mounted on one of the RX-320's two circuit boards, so a quick trip to

Radio Shack and some soldering was all that was needed. The power switch is somewhat awkward to reach, but the receiver can be left powered up at all times.

The fun factor

I really enjoyed using the TenTec RX-320. My usual radios are beyond an arm's length from my computer, so it was really nice to be able to open the receiver's window and retune the radio while using the computer. I had no conflicts while using the radio with any software. While I would like to see some changes, primarily being able to specify defaults, adjust the master oscillator and adding a search function to the memory page, the RX-320 is a solid performer and is really fun to use. Selectable sideband synchronous AM detection would also be a nice addition, but I am unsure of the feasibility of this modification. A programmer's reference guide is available at TenTec's website, so it will be interesting to see if any third-party software becomes available.

I think that the highest compliment that I can pay to a piece of review equipment is that I end up buying it instead of sending it back. That's my plan for the RX-320. I would also like to compliment TenTec's factory service—I managed to break the potentiometers on my 1254 kit receiver—they sent me replacements at no charge. If you would like to see another review of the TenTec RX-320, check out Tom Sundstrom's review in the Receiver Shopping List at the Radio Nederlands website (www.rnw.nl)—he gives it five stars and I concur. The price for the receiver is \$295 plus shipping direct from TenTec. The radio has a 30 day money back guarantee (minus shipping charges) and a one year warranty. TenTec's address is 1185 Dolly Parton Parkway, Sevierville, TN 37862; (800) 833-7373; E-mail: sales@tentec.com; Website: www.tentec.com.

The Sun And Short-Wave Reception (Part 7)

This month the glossary of terms associated with the sun and shortwave propagation continues.

PLAGE Bright areas in the chromosphere overlying sunspots. The source of EUV radiation. It exists from the emergence of the first magnetic flux until the widely scattered remnant magnetic fields merge with the background.

PLAGE CORRIDOR A space in chromospheric plage lacking the usual intensity and coinciding with the polarity inversion line.

PLAGENIL Spotless disk free of plage.

PLASMA An ionized gas in which there are approximately equal numbers of positive ions and negative particles. There may also be many neutral particles, as is the case for the ionosphere.

PLASMA FREQUENCY The maximum frequency of the internal oscillations of a plasma. The plasma frequency is proportional to the square root of the electron density.

PLASMAPAUSE The outer boundary of the earth's plasmasphere. The plasmasphere resides in the magnetosphere and consists of ions and electrons. The plasmapause may be considered an extension of the ionosphere.

POLAR CAP ABSORPTION (PCA) An anomalous condition of the polar D Region ionosphere whereby HF and VHF (3-300 MHz) radio waves are absorbed, causing blackouts, and LF and VLF (3-300 kHz)

radiowaves are reflected at lower altitudes than normal. PCAs and proton events occur simultaneously. PCAs are almost always preceded by a major solar flare on the visible hemisphere of the sun. The time between the flare event and the onset of the PCA ranges from a few minutes to several hours. Transpolar radio paths can be disturbed for days or weeks following the end of a proton event.

POLARIZATION In an ionized medium in the presence of a magnetic field, a radio wave is split into two circularly polarized components. Each component propagates independently. These components are called the ordinary and extra-ordinary waves. The division of wave energy depends on the angle the wave makes with the magnetic field. At low frequencies, the extra-ordinary wave is heavily attenuated.

PRODUCTION In the ionosphere, "production" refers to the process of producing free electrons.

PROMINENCE A term identifying cloud-like features in the solar atmosphere. The features appear as bright structures in the corona above the solar limb and as dark filaments when seen projected against the solar disk.

Figure 4 shows several prominences as viewed in H-Alpha light. (See Part 5 of this series.)

PROTON A positively charged nuclear particle associated with solar flares.

PROTON EVENT By definition, the measurement of at least 10 protons/sq.cm/sec/steradian at energies greater than 10 MeV. A steradian is a solid angle in spherical geometry. There are π steradians in a sphere.

PROTON FLARE A flare that liberates significant amounts of high energy protons. If this stream intercepts the earth, the protons can cause a polar cap absorption (PCA).

QUIESCENT PROMINENCE (FILAMENT) A long, sheet-like prominence extending nearly vertically above the solar surface. Figure 4 shows some.

QUIET A description of geomagnetic disturbance conditions meaning a geomagnetic Ap index level of less than 8. Another definition refers to solar activity levels with less than one chromospheric event per day.

RADIO EMISSION Emissions of the sun in radio wavelengths. These emissions are roughly categorized into two types, bursts and long duration background radiation. Radio burst emissions provide to scientists an early alert signal that a flare has occurred. The intensity of the radio emission from the sun often increases during solar flares and above large sunspot groups. In addition, the sun produces a background radio noise flux which depends on frequency and varies in the course of the solar cycle. Units for solar radio flux are 10^{-22} Watts/meter² (also known as a solar flux unit or s.f.u.). Solar flux units are measured at a wavelength of 10.7 centimeters and reported on WWV and on the web by the NOAA Space Environment Center. The background flux level averaged over a 30 to 90 day period is strongly correlated to ionospheric ionization levels and maximum useable frequencies.

Four categories of radio emission bursts have been defined:

- **Type I** A noise storm composed of many short, narrow-band bursts in the metric range (50 to 300 MHz)

- **Type II** Narrow-band emission that sweeps slowly downward in frequency from around 300 MHz toward the vicinity of 10 MHz. Type II emissions occur are correlated roughly with major flares and are evidence of a shock wave moving through the solar atmosphere.

- **Type III** Narrow-band solar noise bursts that sweep from about 500 MHz to 500 kHz in a few seconds. Type III bursts often occur in groups and are sometimes associated with complex solar active regions.

- **Type IV** A smooth continuum of broad-band bursts primarily in the 30 to 300 MHz range. These bursts are associated with some major flare events beginning 10 to 20 minutes after the flare maximum, and can last for hours.

RADIO EVENT Flares with centimetric bursts and/or correlated with a Sudden Ionospheric Event (SID).

RECOMBINATION The process of joining together of ions and free electrons in the ionosphere to form neutral atoms or molecules.

RECURRENCE Describes the recurrence of physical parameters on the sun every 27 days (the rotation period of the sun).

REFLECTION Radio waves are refracted in the ionosphere. The rays actually bend like a column of soldiers marching from a smooth surface into a muddy field at an angle. The column will bend in the direction of the muddy field. The amount of refraction depends on the electron density of the ionosphere and the operating frequency. To simplify ray path analysis, scientists often substitute a simple straight-line ray path for the real ray path, as though the ray reflected from a mirror. Thus radio waves are often referred to as being reflected from the ionosphere.

REFRACTIVE INDEX An index to define the amount of refraction a wave will undergo when it enters a medium.

RETARDATION The delay in radio wave propagation caused by the slowing down of the wave as it goes through the ionosphere. This is an effect that must be compensated for in precision satellite navigation systems like GPS. GPS measures the difference in arrival time of a signal transmitted on two frequencies. The difference in delay is proportional to the total delay allowing receivers to compensate for total ionospheric delay time.

RIOMETER (Relative Ionospheric Opacity meter). A specially designed radio receiver for continuous measurement of cosmic noise reaching the surface of the earth. The absorption of cosmic noise in the polar regions is very sensitive to the solar low-energy cosmic ray flux.

SEASONAL ANOMALY See Winter Anomaly.

SECTOR BOUNDARY An area of demarcation between sectors of the solar wind and the predominant direction of the interplanetary magnetic field.

SHORT WAVE FADE (SWF) A subset of Sudden Ionospheric Disturbances (SIDs) whereby short-wavelength radio transmissions, VLF, through HF, are absorbed for a period of minutes to hours. When you hear your first one, you will think your radio is broken or the antenna fell to the ground.

SHORTWAVE FADEOUT See Daylight Fadeout.

SID Sudden Ionospheric Disturbance. See Daylight Fadeout.

SIGNAL-TO-NOISE-RATIO The ratio of the power of a signal to the power of the noise in the receiver equivalent noise bandwidth. Usually expressed in decibels.

$S/N \text{ db} = 10 \log (P \text{ signal}/P \text{ noise})$

SKIP DISTANCE The minimum distance from the transmitter for which a reflected wave will return to earth from the ionosphere when the operating frequency is above the vertical incidence critical frequency. Within the skip distance, only ground wave propa-

gation is possible. The higher the operating frequency, at a given level of ionization in the ionosphere, the longer the skip distance.

SKY WAVE The radio wave which propagates to and from the ionosphere. Sometimes called the ionospheric wave to distinguish it from the direct (line of sight) wave and the ground wave.

SMOOTHED SUNSPOT NUMBER An average of monthly sunspot numbers centered on the specified month. Smoothed numbers tend to obscure the effect of short term variations to allow major long term trends to be identified. The smoothed sunspot number is used to define the start and end times of a solar cycle.

SOLAR ACTIVITY A generic term to describe any change in the sun's appearance or behavior. You will hear solar activity described as very low, low, moderate, high, or very high.

SOLAR CONTROL The term used to indicate that the behavior of an ionospheric region is dominated by the sun.

SOLAR CYCLE Solar activity levels go up and down over a period of about 11 years. At solar maximum, the solar activity is high and so too the radiation output which affects the ionosphere. At solar minimum, the opposite is true. Some scientists think they also see a 22 year cyclic component. There have been times in history when the usual solar cycle disappeared for decades. These periods have been associated with droughts on earth as determined from old tree growth rings and historical records. Long period solar cycles may be responsible for climatological cycles on earth such as the widely touted global warming.

SOLAR FLUX UNIT Unit of radio emission from the sun defined as 10^{-22} Watts/meter². At the minimum of the solar cycle, when there are no sunspots, the solar flux measured on earth at 10.7 centimeters wavelength is about 68 solar flux units. At solar maxima this measurement can rise into the hundreds of solar flux units.

Provincial station *Takhar Radio* is on 7085 kHz (BBCM) 7070v Afghanistan (t) 1200-1330 weakish station 3 time pips at 1230 and Afghanistan and Kabul in ID. Frequency moves and much ham QRM. (25-Nov/Goonetilleke-SRI)

ALGERIA *Radio Algiers International* in English noted on 6160 at 1600-1700. (1-Nov/RVI Radio World/BC-DX/Bueschel-GER)

ANGOLA 4914.43 *R. Nacional de Angola*, 0413-0428, "R. Nacional da Angola a seu servicio" Talking abt the death of some one. (28-Oct/Iversen/DSWCI DX-Window/Petersen-DEN)

4950 *Radio Nacional de Angola*, 0039-0045, W speaker in Portuguese talking to various people on the phone. Clear ID at 0041. 24343 (20-Nov/Veldhuis/DSWCI DX-Window/van den Boogert-TWN)

11954.74 *R. Nacional*, 0125 nice signal with mix of PT-language and US/UK pop music, even some country mx, announced by man. Considerably stronger than WINB-11949.94 at the same time. (4-Nov/Novello-NC)

ARGENTINA 15820.0L *Radio Rivadavia*, Buenos Aires, 0700-0710 good, after the usual canned ID, the 5 minute micro news "El Rotativo del Aire" was broadcast with weather report. (22-Nov/TIN-JPN/Relampago DX) //13363.50 (22-Nov/van Rooy/DSWCI DX-Window/van den Boogert-TWN)

BHUTAN 5030 *Bhutan B.S.*(p), 1250, in Nepali. Heard local pops in good condition but was gone due to carrier came on of BBC at 1256. (3-Nov/Iwata/Kanto DXers Circle/DSWCI DX-Window/van den Boogert-TWN) 5030 *Bhutan BS* local lang into EE at 1315 to 1400*. Much better signal now, and will improve as winter progresses. (23-Nov/Goonetilleke-SRI)

BOLIVIA 3493.8 *Radioemisora Padilla*, 0023-0105, sports news about Oriente Petrolero and Copa Bolivar. ID "Usted esta en sintonia de Radio Emisora Padilla, transmitiendo en la frecuencia de 3475 kHz, banda de 90 metros onda corta...Padilla, capital de la provincia en nuestros estudios son las 9 de la noche 5 minutos." (6-Nov/Iversen/DSWCI DX-Window/Petersen-DEN)

4471.85 *Radio Movima*, 2310-2315, Spanish, talk, mid-sentence ID (23-Nov/Phillips/DSWCI DX-Window/van den Boogert-TWN)

4549.45 *Radiodifusora Tropico*, 2300-2320, Spanish, continuous talk, ID, teleprinter and CW QRM (23-Nov/Phillips/DSWCI DX-Window/van den Boogert-TWN)

4702.21 *R. Eco*, San Borja, Beni, 2255 M announcer with monologue including numerous IDs in passing. Canned ID 2302. Gobbled by huge chirping ute 2304. First time I've heard this one since last May. (23-Nov/Novello-NC)

The missionary organization SIM reports that *Radio Mosoj Chaski* will soon go on the air in Cochabamba, following the recent granting of a license by the Bolivian government. The station has already produced and recorded 1 year of programs in the Quechua language. The construction of the studio building is completed, and the programming team has moved in. Construction continues on the caretaker's quarters at the 10 kW transmitter site. *Radio Mosoj Chaski* will proclaim the Christian Gospel in Quechua to the entire nation. I would assume by this that the station will use SW, since a 10 kW MW transmitter would not give national coverage. (Colin Miller-CAN, VE3CMT, Oct 28/BC-DX/Bueschel-GER)

BRASIL 4865.14 *Radio Missoes da Amazonia* 0904 in Portuguese with lively music, definite canned ID @0910, then talking atop music (voice mixed too low and unintelligible); both music and voice ended at 0914*, when station seemingly pulled the plug. If this is a real signoff time, North American DX'ers will have to be up at a godawful hour to log this one! (25-Nov/Quaglieri-NY)

CENTRAL AFRICAN REPUBLIC 9900 *Radio Minurca* (Mission des Nations Unies en République Centrafricaine) is active. Sked appears to be: BBC 1800-1900 French 1900-2000 music 2000-2230+ Address is B.P. 2732, Bangui, Central African Republic, FAX 236-61-2108, E-mail: radmin@intnet.cf (Berg+Kohlbrenner+Fine+Nordic DX)

CHILE *Radio Voz Cristiana* is operated by the UK-based Christian Vision organization, which also operates Christian Voice radio in Zambia. Main production studios are in Miami (USA).

1200-1630	6165D 7185D 9830D
1630-1730	6235D 7305D 9830D
1730-1900	6235D 7305D
1900-2030	6235D
2030-2400	6165D
2100-2200	13830J

D=Deanovec, J=Jülich (6-Nov/EDXP/Padula-AUS)

DOMINICAN REPUBLIC 2700.09h *Ondas del Yuna*, Bonao, 2305 noted back on the air with merengues with a rural flair mixed with usual bachata mx and live, excited M and W announcers. 0000 finally a canned "Ondas del Yuna" ID; heard well past 0230 with this format. A pleasure to hear this one back post-Georges, and at its former good strength. (13-Nov/Novello-NC)

4779.86 *Onda Musical*, 2300 making one of its infrequent appearances with bachatas, "incon-

fundible" IDs, and good signal despite low het. (15-Nov/Novello-NC)

ECUADOR 4814.35 *Radio El Buen Pastor*, Saraguro, 0149-0251, saludos between songs, mentions of "Saraguro" and a bank in "Loja." ID's in passing as "...sintonia de 90.3..." (probably their FM outlet?), and program "Programacion Romantica." 0247 switch to a 3 minute dramatic promo which included a canned "Radio El Buen Pastor" ID, then back to announcer and musical romantica (19-Nov/Mohrman/DSWCI DX-Window/van den Boogert-TWN)

ERITREA Conflicting reports from various sources have made for some confusion re the actual schedule for *Voice of the Broad Masses of Eritrea* (VOBME), the official government-run radio of Eritrea. Below is my best guess-AQ. ID in Arabic: "Huna Asmara, Idha'at Sawt al-Jamahir al-Iritriyyah." ID in Tigrigna: "Ezi Kab Asmara Zemehalalef Medeber Radio Demtsi Hafash Eritrea Eyu." ID in Amharic: "Yeh be Asmara ketema yemigene yesifwir yirteha hezeb demtsi yeamarigna agelgilot new."

0330-0430	Afar	7175 Sa
0330-0430	Arabic	7175 Mo-Fr
0330-0430	Tigrigna	6190 7100 Mo-Fr
0400-0500	Tigre	6190 7100 Sa
0430-0500	Amharic	7175
0430-0530	Tigre	6190 7100 Mo-Fr
0500-0600	Afar	7175 Mo-Fr
0500-0600	Arabic	7175 Sa
0500-0700	Tigrigna	6190 7100 Sa/Su
0700-0730	Tigrigna	6190 7100 Su
0930-1030	Arabic	7175
0930-1030	Tigrigna	6190 7100 Mo-Fr
1000-1300	Tigrigna	6190 7100 Su
1300-1400	Arabic	7175 Mo/Th/Sa
1300-1400	Tigre	6190 7100 Su/Tu
1300-1400	Tigrigna	6190 7100 We/Fr
1400-1500	Afar	7175 Su-Fr
1500-1530	Bilen	7175 Mo/Th
1500-1530	Saho	7175 Tu/Fr
1500-1600	Kunama	6190 7100
1530-1600	Amharic	7175
1600-1700	Tigre	6190 7100
1700-1800	Arabic	7175
1700-1830	Tigrigna	6190 7100

(BBCM + Goonetilleke-SRI)

ETHIOPIA 9560.2 *Radio Ethiopia*, Gedja, 1352-1359, Native music, M speaker in Afar, IS at 1358, followed by opening announcement of Arabic Service and chimes. (19-Nov/Veldhuis-HOL/DSWCI DX-Window/van den Boogert-TWN)

7160 *Radio Ethiopia* in FF 1700-1730, very good signals //9560. One is reminded of Radio Voice of the Gospel ETLF in the '60ies when these transmitters were their property. Wonder if they ever got any compensation? (23-Nov/Goonetilleke-SRI)[I don't believe so. - AQ]

GERMANY *High Adventure Ministries* have eliminated their evening European English broadcasts

(1900-2100 on 5975 and 2100-2300 on 6000 kHz), replacing them with a daily 4 hour morning block of programming to Europe, 0700-1100 on 5975 KHz, via DTK Jülich. (Darg-HAM UK/DSWCI DX-Window)

5850 *Sunrise Radio* via Jülich, 1420 with usual programming, back here ex-6110. Discovered by checking out a cry for help from a listener, who misses his favourite office station "since a couple of days." (13-Nov/Ludwig/DSWCI DX-Window/Petersen-DEN)

GUYANA 3289.93 *Voice of Guyana* noted at 0940 in English at listenable level (finally) with hindu-type music interrupted every measure for an English translation by W, pgm ended 0950, then hyper car dealer ad, then M "You are tuned to the Voice of Guyana...", into W more subcontinental-type mx. (25-Nov/Quagliari-NY)

INDIA 4950 *AIR Srinagar*, 1535-1550, news in English, AIR ID; mention of Kashmir after the news, but again a general ID and continuing with news in vernacular. Poor signal. (20-Nov/Pijpers/DSWCI DX-Window/van den Boogert-TWN)

4960.05 *AIR Ranchi* (p), 1530-1544, TS, short instrumental tune, W with ID and news in English, correspondent reports. News ended at 1544 with short instrumental tune. Quite good until 1533. The only source that lists AIR here is Klingensfuss '98, and it says transmitter site is Ranchi. Can anyone confirm this? Haven't seen this one mentioned in the DX press recently. (2-Nov/Veldhuis/DSWCI DX-Window/Petersen-DEN) 4960 *AIR Ranchi* tested here only a few days in early November, but is now off. Earlier in '98 tested 3305 again for few days. (22-Nov/Goonetilleke-SRI)

12040 is another new frequency from *AIR* in Hindi at 1615-1730 hrs to ME. (8-Nov/Dasgupta-IND/DSWCI DX-Window/Petersen-DEN)

INDONESIA 2960.0 *RPDT2 Manggarai*, talk of local information by M at 1145. Local pops at 1147. Jakarta news relay at 1200. ID by M at 1223 as "...siaran kami Radio Pemerintah Daerah Tingkat Dua Manggarai," local pops at 1237. Not relayed Jakarta news at 1300. Poor. (14-Nov/Yamada-JPN/Jembatan DX)

3074.20v Unidentified, 1156-1315, no relay of RRI Jakarta news at 1200. Popular music, dangdut music, and M mentioned as "...Kalimantan Selatan." Also mentioned "...Kalimantan Selatan" at 1303. At 1315 signal going down. First heard this on Nov. 5. Weak. (5-Nov/Schulze-PHL/Jembatan DX/Yamada-JPN)

3204.4 *RRI Bandung*, at 1353 with W talk. Local news started at 1400. Also heard at 1813 with Sundanese traditional music. SCI at 1858 and Jakarta news relay at 1900. ID at 1907 then Sundanese traditional music again. Poor. (14-Nov/Yamada-JPN/Jembatan DX)

3231.9 **RRI Bukittinggi**, local news was heard at 1531. The ending music was "Bagimu Neg'ri" with chorus. ID at 1536 then short local traditional play. ID again at 1538 and followed to lagu melayu. Fair. (7-Nov/Yamada-JPN/Jembatan DX)

3395.1 **RRI Tanjung Karang**, 1046-1055, Bahasa Indonesia, with Indonesian pop music, 1048 Qu'ran. (14-Nov/Kecskes/DSWCI DX-Window/Petersen-DEN) I believe the new name for Tanjung Karang is Bandar Lampung. (Veldhuis-HOL) **RRI Bandar Lampung**, 1450-1500, BI, man talking, local ID. (7-Nov/Schnitzer/DSWCI DX-Window/Petersen-DEN)

3644.3 **RRI Fak Fak** (p), M talk at 1835. Already not heard at 1900. (14-Nov/Yamada- JPN/Jembatan DX)

3905 **RRI Merauke**, *1858, S/on with music, followed at 1859 by Song of the Coconut Island. At 1900 Warta Berita by M speaker in Bahasa Indonesia, followed by choir with Love Ambon. At 1905 on Nov 19 ID by W speaker: "Radio Repblik Indonesia Merauke," and on Nov 20 same by M speaker (also at 1905), followed both days by western popmusic with Indonesian M songs. (19-Nov/van Rooy/DSWCI DX-Window/van den Boogert-TWN)

3976.1 **RRI Pontianak**, 1420, M speaker in Bahasa Indonesia, by re-check at 1455 western popmusic with Indonesian M songs, at 1457 M speaker in Bahasa Indonesia until 1459, then Song of the Coconut Island, followed by Warta Berita at 1500 by M speaker. (22-Nov/van Rooy/DSWCI DX-Window/ van den Boogert-TWN)

3985.8 **RRI Surabaya**(p), all night wayang kulit program at 1855. Not relayed Jakarta news at 1900. Poor. (14-Nov/Yamada-JPN/Jembatan DX)

4606.45 **RRI Serui** (p), 1135-1150 fade out. Traditional Indonesian mx w/ talks by W anncr in Indonesian. (4-Nov/Rippl/DSWCI DX-Window/ Petersen-DEN)

4606.3 **RRI Serui** 1250 w/beautiful Indo ballads. (23-Nov/Goonetilleke-SRI)

4696.50 **R. KIP**, 1927-1932, BI with Gamalan play (14-Nov/Kecskes/DSWCI DX- Window/Petersen-DEN)

4753.3 **RRI Ujung Padang**, 2020-2144 carrier cut, interesting mix of music with choir vocals and middle-eastern type music. Carrier cut in the middle of a long talk by a man and woman about Ujung Padang. Fair. (7-Nov/D'Angelo-PA/DSWCI DX-Window/Petersen-DEN)

4766.2 **RRI Medan**, Jakarta news relay at 1203. Dangdut music at 1213. ID by W then radio drama. Heard today only. Still not heard regularly. (6-Nov/ Yamada-JPN/Jembatan DX)

4777.1 **RRI Jakarta**, 2148-2225 fade-out, Vocals until SCI at 2158, Jakarta news at 2200 and more music until fade out. Poor to fair. (7-Nov/D'Angelo- PA/DSWCI DX-Window/Petersen-DEN)

4789.13 **RRI Fak Fak**, 1155 lagu selections and impossibly deep-voiced M announcer; SCI three times 1159, then RRI ID. (9-Nov/Novello-NC)

4874.38 **RRI Sorong**, 1150 local Elvis doing "Can't Help Falling In Love With You;" Leo Sayer's "When I Need You;" M and W announcers; SCI twice just before 1200. Signal only fair, but readable. (3-Nov/Novello-NC)

4925.0 **RRI Jambi**, *2156-2245 fade-out, IS to RRI Jambi ID by woman at 2158, followed by SCI. At 2200 another RRI Jambi ID followed by local news with many items about Jambi. (7-Nov/D'Angelo-PA/ DSWCI DX-Window/Petersen-DEN)

11760.0 **RRI Jakarta**, Cimanggis, Badminton [badminton?-AQ] game of Indonesia open was heard at 1315. //3355.3kHz, 4606.4kHz, 4753.4kHz, 4777.1kHz, 4925.0kHz, 5040.0kHz, 9565.0kHz, 9630.0kHz, and 15125.0kHz. (1-Nov/Yamada-JPN/ Jembatan DX)

RRI Ambon 4945.0 inactive recently. (Schulze- PHL)

RRI Banjarmasin 3250.0 still inactive.

RRI Jambi 4927 and 3355.3kHz reactivated on Oct 26 after several days absence.

RRI Manokwari 3987.2 not heard at local evening.

RRI Medan 4766.2 active again on Nov 11.

RRI Padang 3959.7 still inactive.

RRI Sorong 4874.4 Nov 14 active after several days absence.

RRI Ujung Pandang 2490.0 not heard at local midnight, 14-Nov. (Yamada-JPN/Jembatan DX)

IRAN Again, ignore the full schedule in last month's LN! Here's the *Voice of the Islamic Republic of Iran* current observed schedule (Nov 12-13) including a lot of new frequencies:

("Club DX"/VOR/RUS-DX/Klepov-RUS)

KENYA 4880 *KBS* in vernaculars 1600-1700+. Note that Nairobi/4935 is off the air due to transmitter problems. Should come back soon from past experiences. (23-Nov/Goonetilleke-SRI)

KOREA—NORTH 2850 *Korean Central Broadcasting Station*, Pyongyang, 2211, M and W talk in

Korean and martial music. Loud for a couple of minutes.//3350. (22-Nov/Harms-MD)

KYRGYZSTAN 4010 *Radio Bishkek*, 1757, W speaker in Kyrgyz with pieces of rock music with Kyrgyz M songs, followed by ID by W speaker at 1759 sounding as "Kyrgytski Radio." (13-Nov/van Rooy/DSWCI DX-Window/Petersen-DEN)

LAOS 4683 *Houa Phan* noted 1030-1230 with fair reception, also *Luang Prabang* good on 6974 1000-1230* and *0050-0110*. Both relay Vientiane with bell chimes and news from around 1159. //6130. (7-8-9-Nov/Davies-THA/BC-DX/Bueschel-GER)

LIBERIA 5100 *Radio Liberia International* with rap music at 2251. Radio Liberia ID at 2259. (9-Nov/Ross-ONT)

LITHUANIA *Radio Baltic Waves* is a surrogate broadcaster for Belarus transmitted from Lithuania. Station heard testing on 6240 at 1630 on 13-Nov (Kuhl-GER), and earlier (4-Nov, by Elbe) on 6235 with 8-letter groups in Russian. The transmitting facility is already installed somewhere in the Northern Lithuania with a 10 kW transmitter and a zenith radiation antenna system in order to get a better coverage of such a close target area. The reason for creating of the RBW/RG sce is a very bad situation concerning the human rights and freedom of expression, which occurred due to the current behavior of the Belorussian authorities. (Vadim Alexeev-RUS/MIDX/Bashkevich-RUS/BC-DX/Bueschel-GER) According to e-mail QSL transmitter location was Utena, Power 2.5 kW, antenna fullwave dipole, 1/5 wavelength height, beamed 135/315. Here's an excerpt of an eMail of RBW, from Rimantas Pleikys, riplei@rc.lrs.lt (Elbe/DSWCI DX-Window/Petersen-DEN)

MADAGASCAR 3287.7 *RTV Malagasy*, Antananarivo, 1641. Traces of music under noise and UTE-QRM. Weak, but definitely // stronger 5009.5 kHz. (21-Nov/Veldhuis-HOL/DSWCI DX-Window/van den Boogert-TWN)

5009.56 *RTV Malagasy*, Antananarivo, easy listening songs, low pitch M announcer. (Schaay-HOL/DSWCI DX-Window/van den Boogert-TWN)

MALAYSIA *Radio Malaysia Sarawak* noted signing on at 0100 with IS and ann on 7130 Kuching, so this daytime-only freq evidently is active (but reception is difficult later in the day here). Still no sign of 5030 Kuching and 6060 Miri, the latter freq in particular is a clear channel all evening so I'm fairly convinced Miri is now inactive. (30-Oct/Davies-MLY/BC-DX/Bueschel-GER)

MOLDOVA All *Radio Moldova International* shortwave broadcasts are transmitted via facilities located at Galbeni, Romania.

2300-2325	English	7520

(BBCM)

7520 R. Moldova Int., Oct 25, 0510 strong signal but oh! That transmitter hum! Underneath, barely distinguishable English program surely they know about this colossal problem. (Ormandy) [So why don't they do something about it, huh? HvB] They surely want to do something about it, but they don't have the power to do so. I had regular correspondence with Radio Moldova a while back. The only thing they can do is pass on complaints to the Romanians, but it's Romania who apparently refuses to use a better transmitter for RMI's broadcasts. (Schaay-HOL/DSWCI DX-Window/Petersen-DEN) [Audio analysis of the horrible signal reveals sharp spikes of hum at 50, 100, 150 and 200 Hz, which would indicate faulty regulation of the transmitter's power supply.-AQ]

MOROCCO RTVM, B98 via "Morocco" transmitters, Arabic: 0000-0500 11920, 1100-1500 15335, 2200-0000 15335. I am unclear as to whether Tangier or Briech is the site. (EDXP/Padula-AUS)

MYANMAR 5973 Myawadi Broadcasting Station in Burmese 1200-1300, again 1430-1530 UTC causing heterodyne to BBC. A regular in Colombo. (22-Nov/Goonetilleke-SRI)

5985.85 Radio Myanmar, 1340, M and W speakers in Bamar, at 1358 local hsiang waing music with drums called pat waing and a circular rank of small bulbed bronze gongs called kyi waing, followed by M speaker in Bamar at 1400. Not // 4725. (21-Nov/van Rooy/DSWCI DX-Window/van den Boogert-TWN)

NEPAL 5005.3 R Nepal, 0030, VN, ID, reports, trad-mx (8-Nov/Schneeberger/DSWCI DX- Window/Petersen-DEN) Who knows the correct shortwave transmitter-site location of R. Nepal? WRTH 98, TBS and Tropenbandliste are saying Khumaltar; PWBR says Harriharpur; and Klingenfuss Shortwave Frequency guide says Pokhara during winter monthsand Bardibas during the summer. Maybe they have a mobile transmitter: -) (Schotmans/HC-DX/DSWCI DX-Window/van den Boogert-TWN) (See LN Extra, last page of International Loggings, for the answer.)

(1-Nov/Green-UK/DSWCI DX-Window/Petersen-DEN)

PAPUA NEW GUINEA 3315.00 **Radio Manus**, 1016-1030, In Pidgin with Top music chart count down. (14-Nov/Kecske/DSWCI DX-Window/Petersen-DEN)

3335.0 **Radio East Sepik**, 1029-1035, Pidgin ID, Time checks, program info, PNG's native

drums and sing-sing music. (14-Nov/Kecske/DSWCI DX-Window/Petersen-DEN)

3345 **Radio Northern**, 1136, Back to back "Island Music." ID and mentions of PNG by M announcer at 1145. Back to Island music with M chorals. (15-Nov/Rippe/DSWCI DX-Window/Petersen-DEN)

3385 **Radio East New Britain**, 1155, Beautiful M chorals. ID by W and time check at 1151 into program announcements. (15-Nov/Rippe/DSWCI DX-Window/Petersen-DEN)

PERU 3127.2 **Radio Municipal** (t), 0943, tent. propagation fair, but static preventing firm ID, news at 1000 and mention of Peru by W news reader, lots of pennywhistle instruments. Logged here only to advise others that it is still on. (13-Nov/Norrie/DSWCI DX-Window/Petersen-DEN)

3235 **Radio Luz y Sonido**, with QSL card in 71 days, letter with a stations introduction, both signed by Pedro Martinez Tineo, Administrador, two postal-cards, a 100 Intis banknote, Address: Jiron Dos de Mayo No. 1286, Oficinas 308-309, Huanuco, Peru. (Monges/DSWCI DX-Window/Petersen-DEN)

3250.77 **Radio Comas**, 0430-0456*, very nice Andean music (huaynos) in program "Folclore peruano por Comas AM. (5-Nov/Schmid/DSWCI DX-Window/Petersen-DEN)

4563.73 **R Uno**, Chiclayo, 0941-1043, Andean music, TC's and ID's "Somos Radio Uno la Diferente..." wildly swinging carrier frequency between 63.73 and 64.26. (22-Nov/Mohrmann/DSWCI DX-Window/van den Boogert-TWN)

4700.58 **R. Origen**, Huancavelica, 2345 Peruvian flutes and Andean vocals, M DJ, ID "...en Radio Origen" in passing 2352. (18-Nov/Novello-NC)

4748.29 **R. Huanta 2000**, Huanta, Ayacucho, 1058 noted in passing with ad string and ID by man, weak signal in rising noise. (14-Nov/Novello-NC)

4824.42 **Radio La Voz de la Selva**, Iquitos, *0954-1000 fair, s/on with salsa, then a canned ID "La Voz de la Selva, que buena voz" was announced. (21-Nov/TIN-JPN/Relampago DX)

4855.57 **R. La Hora**, Cuzco, 2320 excited man with live commentary of what sounded like a parade, numerous ID's in passing. Good signal but faded considerably by 2345 or so. (5-Nov/Novello-NC)

4935 **R. Tropical**, Tarapoto, 1113 news being read by two M announcers taking turns, phoned-in reports from correspondents, numerous IDs in passing. (14-Nov/Novello-NC)

4950.15 **R. Madre de Dios**, Puerto Maldonado, Madre de Dios, 0032 tuned in just as M was giving a full ID: "...Radio Madre de Dios, una voz en el servicio del pueblo...", and mentioning AM and FM frequency. Nice to get an instant ID on this one after other sessions of listening to the entire rosary. (19-Nov/Novello-NC)

4970.97 Radio Imagen, 0934-0950, program "El Tatu Tatu Madrugador" with chicha music. (3-Nov/TIN/DSWCI DX-Window/Petersen-DEN)

5018.65 R. Horizonte, Chachapoyas, 0010 W DJ with pretty local flute-led stuff, very nice audio but splash from Rebelde-5025. 0049 canned ID, then into church remote. (6-Nov/Novello-NC)

5024.98 R. Quillabamba, Quillabamba, Cusco, 0115 presumed the one talking here with fair signal in Rebelde-5025's absence. (6-Nov/Novello-NC)

5305.01 Radio La Inmaculada, 1120-1130, program "Alegre Despertar" with folklore nacional. ID "Ud. escucha a La Inmaculada, su radio." (7-Nov/TIN/DSWCI DX-Window/Petersen-DEN)

5522.23 Radio Sudamerica, Cutervo, 1057-1012 fair, no stop chicha songs until 1110. At 1110 ID "Usted escucha a Radio Sudamerica transmitiendo desde la Provincia de Cutervo, Cajamarca, Peru." (21-Nov/TIN-JPN/Relampago DX)

5677.98 Radio Ilucan, 0348*, caught their sign off announcement. Very strong, excellent signal. (13-Nov/Mohrmann/DSWCI DX-Window/Petersen-DEN)

5558.19 R. Lajas, Chota, Cajamarca, 0002 M harmony group vocals with rustic guitars, into comunicados by man after ID 0004. (19-Nov/Novello-NC)

5949.32 UNID OA station which had been first observed on 22/AUG/98, was heard again at 1113, with a religious programming in Spanish. Sometimes mentioned "Gloria Dios..." According to "Latinoamerica DX" of Emilio P. Povr zenic, this outlet identified itself as "Proyeccion Cristiana" for the station name or program. Need more work. (21-Nov/TIN-JPN/Relampago DX)

5995.22 Radio Melodia, Arequipa, 0805-0830, romantic music, folk tunes, announcing "Melodia, Romantica!" (7-Nov/Phillips/DSWCI DX-Window/Petersen-DEN)

6535.7 Radiodifusoras Huancabamba, 2335-2340, Spanish, musical interlude, talk, Huancabamba heard mid sentence. (23-Nov/Phillips/DSWCI DX-Window/van den Boogert-TWN)

6618.57 Radio Super Sensacion, Huancabamba, 1042-1045, poor modulation, playing huaynito criollo. (3-Nov/TIN/DSWCI DX-Window/Petersen-DEN)

6674.76 Radio Impacto, Aramango, 1024-1046, poor signal with QRM from a utility station. Playing many rustic OA folklores. At 1040 ID "Somos Radio Impacto Internacional y saludamos a toda la gente que nos escucha en Aramango y diferentes puntos de la Provincia de Bagua. Tambien saludos especiales para los oyentes de Rioja, Nueva Cajamarca, Naranjos, Tarapoto, Moyobamba, y todos...gracias por su amable sintonia." (21-Nov/TIN-JPN/Relampago DX)

6690.06 Radio Estudio DW, Naranjos, 1046-1052 weak signal, huayno s & saludos. At 1052 ID "Estas con la primera, Estudio DW." (21-Nov/TIN-JPN/Relampago DX)

6797.58 Radio Ondas del Rio Mayo, 1051-1055, a new version identification was heard as "OBX9N 1490 kHz onda media, OAX9Q 5045 kHz onda corta banda internacional. Es Radio Difusora Comercial Ondas del Rio Mayo con sus oficinas centrales en el Jiron Huallaga 348, Distrito Nueva Cajamarca, Provincia de Rioja, Republica del Peru," then local ads. of some stores in Nueva Cajamarca. Interestingly, the station now announces its shortwave outlet as 5045 kHz with callsign OAX9Q instead of former nominal channel 6803 kHz. (3-Nov/TIN/DSWCI DX-Window/Petersen-DEN)

7003.37 Radio La Voz de las Huarinjas, Huancabamba, 1118-1130 poor, program "Amanecer en los Andes." (21-Nov/TIN-JPN/Relampago DX)

7745.8 Radio Cristal, San Hilarion, 2345-0005, Spanish, andean music with announcements by woman. (13-Nov/Schnitzer/DSWCI DX-Window/Petersen-DEN)

PHILIPPINES R. Pilipinas, B98: All via Tinang—English and Filipino 0230-0330 15120 15270 11805, 0330-0400 17730 15330 13770. (Padula-AUS/EDXP) **11730 Radyo Pilipinas**, 1900, Filipino, ID, politics and news. I think this is a new frequency on a clear channel. (9-Nov/Schneeberger/DSWCI DX-Window/Petersen-DEN) Both Klingefuss '98 and the latest ILG database list them here in English, 1730-1930.—Veldhuis. 11890 **Radio Pilipinas**, 1804, program in Filipino (14-Nov/Mendez/DSWCI DX-Window/Petersen-DEN)

DZRM Quezon City is listed on 9616 (yes, 9616) for B98 in the ITU's Tentative HF Broadcasting Schedule, with 3 kW, 2100-1500, non-directional. (Padula-AUS/EDXP) Further info from a QSL letter: Call sign: DUR2 Power: 250 Watts Transmitter: modified BC-610 US Army Signal Corps Antenna: 2dB bi-directional quad loop antenna directed north and south. Antenna/transmitter location: Marulas, Valenzuela, Metro Manila Programming: relays DZRB Radyo ng Bayan 738 kHz or DZRM Radyo Manila 1278 kHz. (van den Boogert-TWN)

QATAR QBS was noted on new 11820 (ex-17895) at 0705-1305. (12-13 Nov/Timofeyev- RUS/DSWCI DX-Window/Petersen-DEN)

RUSSIA Current Radio Minsk schedule: 0200-0400 and 2000-2200 on 7105 and 7210. English service: Mo 0300, Tue 2030 and 2130, Wed 0300, Thu 2030 and 2130, Fri 0300, Sat 0300, Sun 0300. German service: Wed 2030 and 2130, Thu 0300, Sat 2030 and 2130, Sun 0330, 2030 and 2130. (R. Minsk/Ludwig-GER)

Latest check of *R. Kyzyl* shortwave transmissions is: *2322-approx.0130*, *1120-approx.1230*—all on 5550.3v, local program till 0000, 0010-0100 and till 1200—other time with *R. Rossii* program //5290 (28-29-Oct/Timofeyev-RUS)

(Timofeyev-RUS/DSWCI DX-Window/Petersen-DEN)

SEYCHELLES FEBA in Divehi still being jammed on Fridays only from 1630-1700 on 11665. This is the first Divehi foreign broadcaster and Maldives is against any Christian broadcasts claiming to be a 100% Islamic State. Jamming is of a varying tone hardly noticeable interference, but maybe strong in the Maldives. They are listed to have one 30Kw and another 7.5 shortwave transmitter. What lengths people go to. (20-Nov/Goonetilleke-SRI) [Indeed.-AQ]

SOLOMON ISLANDS SIBS 5020 1134-1156*, Easy listening instrumentals and vocals hosted by a woman. Fair to good reception and sudden off while checking Merauke. (8-Nov/D'Angelo-PA/DSWCI DX-Window/Petersen-DEN)

SOMALIA 6843 *R. Hargeisa*, good reception for last few days and English/Somali lesson has been observed at 1739-1746 and it is interesting to note that after *R. Mogadishu/V.O.P* Radio Hargeisa also has started to broadcast English program. However still no trace of *R. Mogadishu/V.O.P.* it was on 6873v 3 months ago. (15-Nov/Vaghjee-MAU)

SOUTH AFRICA Channel Africa change to schedule in last month's LN: 1700-1730 English and 1730-1755 Portuguese now on 17860 (ex-17870). (Otto-SENTECH)

TAJIKISTAN 4635 *R. Dushanbe* 1, 1800, Tajik with mention of Dushanbe, piece of music and news. At recheck 1814 Tajik talk with mention of Dushanbe, Turkish Tartar music with handdrums and local flute and Tajik M songs at 1825 local sitar with Tajik W songs (sounding the same as the music you hear from Uzbek Radio) (13-Nov/van Rooy/DSWCI DX-Window/Petersen-DEN) 7515 *Tajik Radio* 1828 new freq for Dushanbe with Central Asian vocals and lengthy, mournful instrumental selections till 1849, when into talk by woman in presumed Tajik (closely related to Farsi). Back to instrumentals at 1856, followed by brief announcement at 1900 and off. Audio seemed to fade up and down at times. ID per Padula in EDXP. (1-Nov/Hill-MA)

7465 *Voice of Tibet* 1220-1255 in Tibetan on air on new channel 1225-1255 via Dushanbe, ex- 7470. No more //11520. (25-Nov/Goonetilleke-SRI)

Democratic Voice of Burma observed on new 7490 via Dushanbe (x9985, x11580), //DTK Jülich on poor co-ch stns spoiled 15330. Always time delay noted between both channels! (14-Nov/Bueschel-GER/BC-DX/Bueschel-GER) 5945 NF Democratic Voice of Burma in Burmese 1245-1345 deliberately close to Yangon/5985 kHz, //15330 and 7490. (23-Nov/Goonetilleke-SRI) [A report from the same day and same reporter (Victor Goonetilleke) lists the three freqs for this broadcast as 5945, 7490 and 15330. Which combination is correct—this one or the previous?-AQ]

THAILAND 6070 *R. Thailand* 1100-1600 mixing Singapore to 1400, then in the clear. // to better 4830 and poorer 7115. (23-Nov/Goonetilleke-SRI)

TUNISIA RTT was noted on a new freq of 7215 (ex-7225) at 0400-0700, 7225 at 1700-2330 at present (other channels are: 7280 0400-0600 1700-2330, 11730 0700-1700, 12005 0500-0600 1700-2330, 15450 and 17735 0600-1700) (12-13-Nov/Timofeyev-RUS/DSWCI DX-Window/van den Boogert-TWN)

URUGUAY While visiting 9650-*Emisora Ciudad de Montevideo* we learned from Jorge Yizmeyian that they are thinking to leave the current frequency in the 31mb and take move into the 49mb (still on an unknown channel). He did no mention of the also assigned 19mb fcyc and probably there is no

connection with the pair of 49 mb frequencies recently offered by the telecom authorities. (Niguro-URU)

USA 2939.84H **KVLH**, Pauls Valley OK, 0050 Super-strong with FM country format and no ads at all; 0124 ID for "KVLH-KTOK." 2 x 1469.92. (8-Nov/Novello-NC)

25910 **WJFP** Fort Pierce, 1523-1600, with Gospel program in English and several IDs, FM feeder; quite good at times, but heavy fading; completely disappearing soon after getting dark outside (15-Nov/Kuhl/DSWCI DX-Window/Petersen-DEN)

Uzbek*-Uzbek R. HS 2nd program (//4850 0000-2300) Uzbek**-FS (R. Vatandosh) Uighur at 0000, 1330, 1400 and 1500 only as a tentative language. (28-29-Oct/Timofeyev-RUS)

7105 **Radio Tashkent** noted well in English 0109. (26-Nov/Fine-VA)

After a brief stay on 7400 kHz **IBRA Radio** in Begnali from Tashkent is now back on 15470 kHz at 1330-1400 hrs. (30-Oct/Dasgupta-IND)

VENEZUELA 9640 *Ecos del Torbes* 2124 man in Spanish with play-by-play of sporting event (presumably ftbol), including lots of goooooooals. Stronger than // 4980, which was just beginning to fade in; buried at 2130 by AWR s/on. First time I've heard the 31M channel in ages. (1-Nov/Hill-MA)

VIETNAM Regionals audible here incl *Lao Cai* 5597 and 6668 (both vary +/- 1 kHz or so) at 1200-1340 (noted 8 Nov among others). Both freqs in // whenever I have checked. Also UNID location on 6468, 1000-1030 & 1200-1330, additional relays Hanoi HS prgr1 0930-1000 //5925, 9875 on certain days only. No trace found of *Son La* on clear channel 4740, may have changed freq or be inactive. (9-Nov/Davies-THA/BC-DX/Bueschel-GER)

5034.74 *Dia Tieng Noi*, Hanoi, 1155 Hmong language service with fragile-sounding reed instrument mz to 1159, short orchestral theme with probable ID spoken over by M then by W, bit of talk by W, then into extended talk by M after 1200, then into solo vocalizations by W 1210. All // 6165 which was stronger, and lasted until AIR *1229. Growl on xmtr but good audio on a very good Asian morning; and definitely varying from 5035.00 as logged by Hans van den Boogert in September. (20-Nov/Novello-NC)

RADIO FREE IRAQ *Radio Free Iraq* is on the air. Schedule:

0300-0400	5965K	7110K	7275K	9740L
1600-1700	6130K	9540W	9850L	11915W

K=Kavala L=Lampertheim W=Woofferton (Clandestine Radio Watch/Schoech-GER) (DX'ers can now kiss Ethiopia-7110 goodbye-AQ)

UNIDENTIFIED There is a weak signal on 6055 after Rwanda goes off, heard virtually every day, but neither Al Quagliari-NY or I have been able to figure out who this is. (Sundstrom-NJ) Re the weak stn you and Tom Sundstrom are hearing on 6055 after Rwanda s/off at 2100 (DXW 139), a possibility is JOZ. Beginning around this time of year, we move toward grayline at that hour—sunrise in Japan, sunset here. The 3925 outlet becomes fairly regular for about two months around 2100-2200, and there's no reason the 6055 outlet wouldn't propagate as well. (Hill-MA)

UNID Russian 6915, 2150 western songs man in Russian, ad "upotenie" then close at 2200*; modulation problems (19-Nov/Liangas-GRC)

RAMADAN Ramadan will begin on December 20th this year. (Veldhuis/DSWCI DX-Window/van den Boogert-TWN) Ramadan will begin on December 20th this year. (Veldhuis/DSWCI DX-Window/van den Boogert-TWN)

Pirate Radio Report

Chris Lobdell

P.O. Box 146

Stoneham, MA 02180-0146

Internet: clobdell@mediacone.net

Hello and welcome to the last PIRATE RADIO REPORT of 1998! I hope all of you had a great Thanksgiving. Now it's time for Christmas.

FCC Cracks Down on Pirates!

I've you've been tuning the pirate bands over the past few weeks and haven't heard anything, don't worry. It's not bad propagation, a broken radio or antenna that's the cause.

What some are calling "*The Great Halloween Pirate Massacre of 1998*" occurred on October 30th and 31st when the friendly FCC agents tracked down and visited four alleged pirate operators in Massachusetts, Illinois, Texas and California. The stations were handed violation notices, told to stop operations immediately and warned that fines or equipment seizures would be forthcoming if broadcasts continued.

These were the first such busts since 1995 and word traveled throughout the pirate community like lightning, causing all those not visited to go silent.

In addition to the FCC visits, word leaked out of an operation "*Clean Sweep*" in which the FCC is going to keep track of all SW pirates, obtain search/seizure warrants and bust all those selected on the same day. This story has not been confirmed and some are doubting its validity.

Despite all this, we do have some logs to report, although most were made before the FCC enforcement activities occurred.

My thanks go to our faithful reporters Bill Wilkins in MO and David Krause in Ohio. Many thanks guys! If not mentioned it was 6955 kHz.

JERRY RIGGED RADIO was heard with their Halloween show on November 1st at 0001 UTC featuring a séance and eerie music. [Wilkins-MO]

PARTIAL INDIA RADIO, a funny parody of AIR was heard on October 17th at 0026 UTC reading letters from listeners and mentioning Pakistan. [Wilkins-MO] Also heard on October 25th at 2145 UTC. [Krause-OH]

RADIO EUROGEEK usually makes an appearance just before or after the annual *Radio St. Helena* broadcast. This year was no exception. They were heard from 1804-1841 sign off. Format included pop mx and talk about leaving pirate radio due to financial difficulties. The frequency was 11092.5 USB. They use the Providence drop. [Wilkins-MO, Krause-OH]

RADIO FREE SPEECH, featuring Bill O. Rights was noted in the AM mode at 1144 UTC on October 24th with a scary Halloween show. [Krause-OH]

RADIO METALLICA WORLDWIDE, popped up on 7415 kHz on October 17th at 1948 UTC. Dr. Tornado was playing rock and German steel metal music. [Krause-OH]

RADIO ONE, was heard on October 17th at 2324 UTC with station IDs and Rockabilly mx. They use the Belfast drop. [Krause-OH]

It's Europirate Season Again!

Now that darkness is upon us, don't forget to check for *Europirates* between 0600-0900 UTC in the frequency range of 6200-6400 kHz on Saturday/Sunday AMs.

Farmers From Holland is usually found around 6300 kHz. If they are coming in good, try looking for a few others. Some others may be testing from Europe between 2300-0500 on 6955 kHz if the frequency is vacant. If you hear anything, be sure to report in to us here at the PIRATE RADIO REPORT!

Until next month, Merry Christmas and Happy Pirate DX!

—Chris

NOTES: Denis Pasquale says that he now has a little more time for DXing again. Reception seems to be running hot and cold but not quite as good as was predicted. Hopefully it will improve. He also wants to start sending out more reception reports. Its a good time for follow up reports also...Sam. Paul Brouillette says he has about 20 reports currently outstanding but at least he has gotten some replies. Sometimes its like a crap shoot...Sam. Mickey Delimage, VP of CIDX, says that he has been a NASWA member for many years but has never gotten around to sending in any reports for the Column. I'm very glad to have you with us and keep the reports flowing in...Sam.

We thank you for your reception report and are pleased to confirm that you have heard our station on **28.02.78** at **22.00 - 20.10** GMT on **13.660 Hz** SPC

Sincerely yours **A** PRIORITY PAR AVION

There is a good source for the transmission schedules of Radio Kuwait¹ now. The page is on the Web servers of the Ministry of Information.

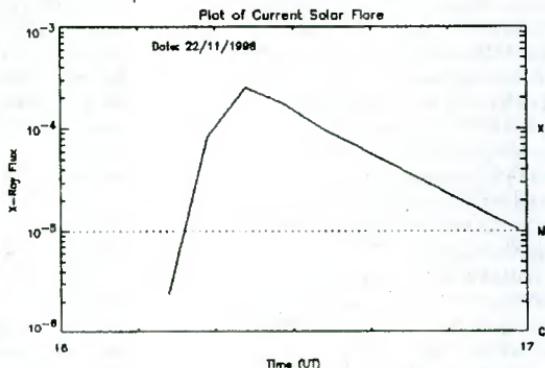

Those of you active on the Internet know of the long-running Drake R8 in North Carolina that you can tune and listen to audio clips with a Web browser. Now there is a virtually complete compilation of all such receivers on the Web, compiled by a Danish radio amateur.²

On Sunday, Nov 22 a number of us were "chatting" online in the #swl IRC channel³ and I was listening to some great music from Porgy and Bess on the BBC-Africa service on 15400. At 1619 UT, within 30 seconds the signal disappeared completely, as did all other signals on the

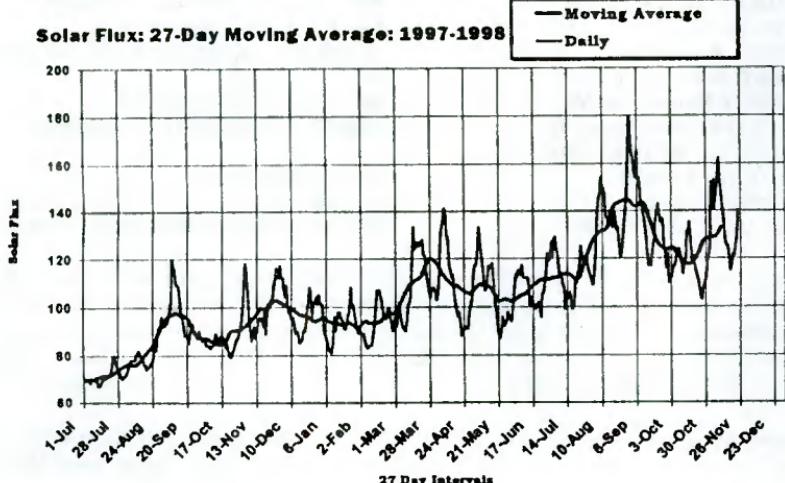

HF spectrum.

It was a flare, and Mark Fine pointed us to a page on the IPS Australia Web site. The "Real Time SWF Coverage Prediction"⁴ page provides a map of the impact and a link to a second page⁵ that updates every 30 seconds with the flare intensity as it rises and falls in magnitude. The flare ended at 1700 UT.

Very interesting, indeed!

Loggings from Kris Field, Rich D'Angelo, Bob Montgomery, and I were made while on a Dxpedition to French Creek State Park near Reading, PA. Also attending for the first time was NASWA member Ed Mauger. It was our first trip to this park, and the lack of the underbrush and thorn bushes we're used to at Gifford Pinchot Park made stringing antennas there almost a pleasure. We've already scheduled another trip to French Creek for December.

I'd like to thank our members who have taken the time to contribute to the Journal over the past year, and I wish everyone in the club Seasons Greetings and a very Happy New Year!

NEPAL On several occasions over the years, I have visited all of the main facilities of Radio Nepal. This is the answer to your query as mentioned in your bulletins.

1. **Singha Durbar.** This location is in the capital city Kathmandu. It was previously a school for the children of the royal family and it was taken over for use by Radio Nepal in 1951. The original transmitter here was a 250 watt shortwave unit. This facility was subsequently rebuilt and it is in use as the main offices and studios of Radio Nepal.

2. **Jawarlakhel.** This location is on the edge of Kathmandu. It was assumed in 1962 and the original shortwave transmitter was re-installed to this location and re-tuned to a mediumwave channel. Four more transmitters were installed here, each made by AWA in Australia. These were two at 5 kW on shortwave and two at 1 kW mediumwave. When the Khumaltar base was established, the units at Jawarlakhel were used only on an emergency basis and they were tested regularly just once each year. This facility is probably by now no longer in use.

3. **Khumaltar.** This location is further up on the edge of Kathmandu, though by now the area may be already built up. It was opened in 1967 with a Marconi 100 kW for use on SW and a 5 kW for use on MW. Two additional 100 kW units from Harris were installed in 1977 & 1982, both for use on SW.

4. **Pokhara.** No SW transmitter has ever been in use at this location, though it had been under consideration. There is a 100 kW MW unit at Pokhara, which is located towards the middle of the country. It is a beautiful tourist location.

5. **Hariharpur.** This is an alternative name for the location of the SW base at Khumalata and it is listed this way in Passport to World Band Radio, but not in the WRTVHB.

In view of the interest in this topic, we will present a "Station Profile" on Radio Nepal in "Wavescan" early in the New Year. All other major topics in Wavescan for the remainder of 1998 are already allocated. (Petersen, AWR, IN)

12th Annual Winter SWL Festival

March 13-15, 1999
Holiday Inn
Sumneytown Pike
Kulpsville, Pennsylvania

Last Fest Before The Millennium!

Plan to attend your favorite forums Friday and Saturday. Enjoy meeting with your friends in the Hospitality Room. Bring radio related items for the swap meet or to donate for the Silent Auction. Check out your friends receivers, bring one of your own for others to try!

No frills; just shortwave, longwave, mediumwave, pirates, and scanning. Once again you will enjoy the camaraderie of your hobby friends.

Registration Options include:

FULL — Includes forums, hospitality room, lunch and banquet

— \$40

PARTIAL — Includes forums, hospitality room but NO meals

— \$17

SPOUSE — Includes hospitality room and meals

— \$22

GRAND PRIZE To be announced

SPECIAL Register early to win a SW portable! One free entry for an early bird registration received by February 12, 1999.

Please bring items for the Silent Auction. Proceeds are donated to charity.

Checks should be made payable to WINTER SWL FEST. Register directly with the hotel for your rooms by calling the Holiday Inn at (215) 368-3800. For 1999, one special rate \$69 single or double! Tell the hotel staff you're with the WINTER SWL FEST to receive this special room rate. Up to the minute info. can be heard on the ANARC SWL.NET on 7240 LSB at 10 AM Sundays.

The Holiday Inn is located at EXIT 31 of the PA Turnpike Northeast Extension-Lansdale Interchange. Improved access from the south with the Blue Route—ask for details. Limo service is available from Phila. Int'l Airport directly to the Holiday Inn.

Please submit the following form with your registration amount or send for more information to:

Winter SWL Festival

PO Box 591
Colmar, PA 18915

Name _____

Address _____

City _____ E-Mail: _____

Circle: FULL PARTIAL SPOUSE (Spouse Name) _____

Banquet Check: Roast Beef _____ Chicken _____

Registration Fee Enclosed: \$ _____

I wish to purchase _____ raffle tickets
(\$1 ea / 6 for \$5 / Special 13 for \$10)

Tickets I've Enclosed: \$ _____
