York, rema.

'Edited by: A. W. Oppel The Drock U.B. Ed Brandor Droke U.S. JANUARY 29, 1935. Ed Brandon

Howdy folks, we've got a lot of news on hand this week which we hope will be of interest to all of you. So, the best thing we can do is to be in 'dishing' out the information which we have at hand.

The first thing we want to talk about this week is a very fine DX program that has been secured for the members of our club, by Paul V. Trice, our Sharon, Penna. This broadcast will be a SW DN special from MIZ, 6315 Lcs., Ciudad Piujillo, D. R. to take place Saturday evening, Pebruary 15 from 10:30 to 11:30 P.H., Dominican Republic Time, which we understand corresponds with 10:10 to 11:10 P.M., EST. Mr. Matton, owner of the station informs Paul that all those reporting reception may empect varifications, providing the name and address are printed clearly and that a dime-in coin- is enclosed to cover comt of postage. As an insentive, to encourage reports on this broadcast two prizes are being offered. Both are one year memberships in the National Madio Club, the first to be a sarded for the most distant report and the second to be awarded for the most complete report. Mr. Hatton will be the judge in this contest. Don't forget to tell your friends about this splendid program and the prizes which are being offered.

Our good friend Walter C. Birch sends us some more good news for this week's Bulletin. He advises us that he has secured the promise of a DI program for the members of our club from station KFVD, 1000 kcs. Los Angeles, Calif. which will take place Saturday morning, February 29 from 3:00 to 4:00 A..., EST.

HE E and THERE

By A. W. Oppel

ALCA, 570 kes., New York City, are negotiating with several sponsors for a Dance Parade program, similar to that of WNEW's. If they are successful in acquiring twenty accounts the station will broadcast six days a week until 5 A. ... EST!

The State of New Mexico is considering the purchase of KOB, 1180 kes., Albuquerque, which now uses 10 kw power. If the purchase is consummated it is expected to increase the power to 25 kilowatts.

775, Detroit, lich., are erecting a new 100-watt ultra-high frequency experimental station, using the call WSXWJ, with the xmtr atop Detroit's tallest building--one of forty-eight stormes. Present plans call for the station to operate on 31,600 kilocycles, or 9.48 meters, but three channels of still higher frequencies will be used, as soon as the majority of receivers being manufactured include this feature.

according to the report of the FCC, ending their fiscal year June 30, 1935, there are 623 stations in the United States. In the year thirty-nine new transmitters were authorized constructed. Two stations were silenced during the same period. Thirty-one of the new stations received 100 watts power, seven 250 watts, and one of 500 watts. We do not believe these figures include new stations recently licensed.

hen Cherry & abb, owners of TPLO, buy MIC (as is expected moment arily), all emisting boston stations will fight in an united front to prevent the noving of AIC to the Boston market. It is the contention of excisting Donton shatings that this zone has adequate broadcast facilitFage two Milliand Sho C: The D. F. January 29, 1936. All times shown on this page represent the T. ies, without adding a 50 km. unit.

The Morvegian proadcasting Corp., is building a 20000-watt mmtr on the island of asker, near Bergen, to operate on 253 kilocycles. PCJ, Holland, will soon resume broadcasting on 9.59 megacycles--this information by Mal.C's John J. Baxter.

Best results on the 28 megacycle band are obtained between the hours of 9 A... and 3 F.I. on Sunlays, EST, according to Captain Hall of the N. Y. Sun.

According to a recent announcement by WIND, Gary, Indiana, it is likely that this station will also join the parade of stations broadcasting twenty-four hours daily.

Hartford merchants are making efforts to raise enough money to purchase TTC, so the station may stay in the city, instead of moving to the proposed location at, or near, Boston. Present negotiations by Cherry & /ebb are hastening this movement.

It is reported the Birmingham News are the new owners of VSGN, Birmingham, Ila. It is likely, therefore, that this will medn a new call.

Failure of manufacturers to standardize on a uniform type of receiver as retarded television service in the United States, Federal Communications Commission said last week in their annual report. They believe, however, that visual broadcasting is just "cround the corner".

The famous "now ou don't, now you do" case (WARD, WVF7 and WLTH) again been postponed until February 18. If any of these three survive it is likely to be WF7, because of their "verterans" hookup, and resulting political pressure they can bring to bear.

If you have as much trouble as we do in identifying some popular tunes try this, which has helped us considerably: Have your local music or department store place you on their monthly mailing list of new recordings. Very often, while DMing, you can refresh your memory in identifying a selection by scanning these lists.

Con ratulations surely are in order to Valter C. Birch again. We have just received another letter from him bearing the fine news that he has secured the promise of a DK program for the members of our club, from PRF-4, 923 kes., Rie de Janeiro which will take place Saturday morning, whereh 14 from 2:30 to 3:30 A.M., EST. To our knowledge this is the first program of this type to be attempted from this station and we know that many of our members are going to welcome this opportunity to hear this station, which we believe should be well heard, inasmuch as they use 10 MT power, and have frequently been reported on their regular broudcasting schedule.

Off Clair (E.S.T.) By A.W. Oppel DO NOT COM... that CART, 1450 kcs., Molquim, Cuba, is now using 130 watts power, instead of a listed 50... the following changes are to be recorded in jour log book: CABN is now on 850 kcs; CABC on 970; CACJ on 1100; CABD on 1250; CABC on 1270 and CACN on 1500. CABN, Matanzas, a new station on 790 kcs., and CAGC, Mavana, new, on 1400 kcs. Other Cuban stations still remain on frequencies shown in the January RADEK... WABI, 1200 kcs., January also be expected... Fittsburgh, have changed ownership. A change of call may also be expected... MEMP 1310 kcs., Wil-

Tage three NATIONAL LABIC CLUB DA SE S JANUARY 29, 1956. All times shown on this page represent E.S.T.

waukee, is, test the second Friday of each month, from 4:40 to 5 A.M., CJIC, 1500 kcs., Sault Ste. Marie, Ontario, test for the CRC on the 19th and 20th of each month, from 3:21 to 3:29 A.M...operation of WTHT, 1200 kcs., Martford, Conn., is expected, on or about, May 1...WBX, 1200 kcs. Utica, M. T., 5-5:20 A.M.; McO, 1420 kcs., Waco, Texas and KFCU, 1240 kcs., Mandan, N.D., 5:10-5:30 A.M., all are added to the FCC checks for the second Monday of each month...WBO, 1420 kcs., Baton Mouge, La., now DX the first and fourth Sunday of each month, from 2-4 A.M., WTAQ, 1330 kcs., how in Green Bay, Mis., will DX with their 1000 watt mmtr on February 2, from 2 to 3 A.M., dedicating this program to the NNRC...WKAR, East Lansing, Mich., has been heard on 1040 kilocycles recently, and also on 1060 and 850. The latter frequency was to be their assigned channel...WBIG, 4440 kcs., Greensboro, N.C., will DX January 31 from 2 to 3 A.M., the S.A. tests will continue until, and including, February 13. The time is, as you know, from 2 to 3:30 A.M., and LR5-830 kcs; LR4-990 kcs; LR1-1070 kcs; and LS2-1190 kcs., are regularly heard. LS10-590 and LR6-960 kilocycles are also reported to be testing during these hours but the writer and many other DXers have not heard these two stations. However, we suggest trying for them on the romaining Thursday mornings?

TOURING THE SHORT LAVES

With Ed Brandon

Radio station NAA-NSS using several channels and transmitting twenty-two of twenty four hours each day has a range of radiation covering all points of the United States, England, and New Zealand. This information comes to us direct from the Communications Department of the United States Tavy in Jashington. Listeners who are not able to find NAA-NSS on their dials may find the following schedule helpful:

Time Signals and Daily Broadcasts for Naval Radio Station NAA-NSS.

Wermit Geory, Malnutport, Penna. Kermit reports some fine ten meter reception. Me says: "My 10-meter reception continues very fb. My 10-meter bil is now: -G6, D4, zs1, Lu123569, CX1 CE2, OA4, FY2, HJ3, K4, CO6, X1,

Page four MATTIME LADIO CLUB LA ME S. SAMULAT 29, 1936. All times shown on this page represent E.S.T. VK2, VE4 and all W's including one in N. Dakota using 12 watts as stated on his recently received QSL card. " Kermit recently received a fine verification from VWT2 Poona, India.

Mere in New Canaan, we find reception improving somewhat on 20 and 30 meter waves. Kermit deary finds reception excellent for South African stations on the 20 meter band between 4:30 and 6 P.M. Last Friday (24th) we heard V3DOG in Delaware contacting and exchanging good R8 reports with HI5K. This contact was on 75 meters. On 31 meters we heard EAM and LSA with real good signal strength. An unidentified Spanish speaking station and a Canadian on the 25 meter band were also heard with remarkable clarity. Our broadcast set has a tuning range down to 180 meters and we have heard the following calls and each one has a terrific signal in this part of the spectrum: WPSP WPAC TPHS WPGG WPHK.

With the Stations:Again Kermit Geary scores with this fine information.
WV9NC, "Onder Populares" Caracas, Venes. heard evenings on 7850 kc.
HC2CW Guayaquil, Ecuador, heard near/8400) kcs. evenings.
HIL Ganto Domingo, D. R. 6500 kc. heard 6:30 to 7 PM with fine sigs.
Hils Puerto Plata, D. R. 6425 kc. heard regularly evenings.
HjlABC Cincelejo, Colombia 7100 kc. till 10 P.M.
CTLIA is now heard quite well on 970 kc.
HJSADD Bogota, Colombia is now operating on 6060 kc.

in last weeks column. Fr. Trice reports this Colombian as operating on 9.27 megs and Fr. Trice reports the Colombian as operating on 9.27 megs and Fr. The States that he hears them on 9.075 megs. This station is owned by the Mational Mailroad Company of Colombia and uses the slojan.—Woice of The Pacific" using both Spanish and English in their announcements. Various hours and dates have been reported, but they suem to show that Laturdays, Sundays, Tuesdays and Thursdays are the principal periods of transmission and are heard until 11 P....

Mr. Trice also reports that YNIOP state that they won't verify SWL reports unless an TMC is sent with the report. He also says that KKM, Monolulu, can be heard Tues. A.M. 12:30 to 1 A.M. on 7.52 megs.

TV1211 is heard quite regularly on 6.30 megacycles. This new broad-caster is received during the evening hours. TV12711 transmitting from Laracay, Venezuela and HJU Buenaventura, Colombia are particularly anxious to hear from listeners and reports will be promptly verified.

Before you sit down for your evening meal, tune for HRW 11040 kc. Our 'book of schedules' shows that the broadcasts from VE9JR Middlechurch Man., are 8-11:30 f.m. on 11,715 kc. or a wavelength of 25.60 meters. This Canadian uses a power of two kilowatts.

This concludes this issue of the S7 section and we hope that you have found some improvement over previous issues. It is hoped to mark the beginning of bigger and better columns for the short wave radio friends. Four comments will be appreciated. 73, Ed.

NATIONAL POST OBSERVERS. J.WARREN ROUTZAHN, NPO #1. York, Penna. - Reports reception of BBC stations on 668, 804, 877 and 1149 kcs. on Tuesday morning, Jan. 21.

A. J. OFFEL, NPO #2. Irvington, N. J. - Reception Jan. 21, quite good.

These T.'s heard R-7: Rennes, Fecamp, Post Parisien and Normandie, at 2:30 A... CKBI, R-4, MEAQ, R-5; CMKF, R-7. The latter two new catches for the Selical Reports good. for me. SW's also very good, with English stations taking the honors. Especially interesting were the various services in memory of the King of England. Reception Jan. 23, good. Stations in the northwest especially good, with KGA, KFBK and KOIN R-7, and KFI, etc., almost as good. Fecamp like a local, as were the SA's again. Frankfurt was R-7 on 1195 kcs. J. J. DECKER, Sr. NPO 35. Hamilton, Ohio - Reports poor reception Thursday, Friday and Saturday mornings of last week. Sunday however was a big improvement. Also says he reported on MRC broadcasts from CKCR, KEPC and MIFD. Also picked up TORL and CHNS on Sundaymorning as two new stations. NFBK come through marvelously with their new xmtr nearly every AL. C.RL FO ESTIERI, RFO %6. New York City - Reports that during the past week /IN have been signing off at 2 A.M. and then return to the air at 3 A.M. Jan. 20 - 1:45-2:15 noise very high, KFI heard R2. Jan 21 - noise as usual but strong signals from West. KFI, KPO, KFBK R9. MEHO, MEFB, (new) M8. TA's M7. COL tested at 3 M.M. Jan. 22. Bad static as well as plenty of local interference but TA's R5. Algiers R6. WMBQ heard at 2:30 A. . with test. WIMI on with Election returns. Jan. 23. 3-3:45 A.M. LNI, LR4 and LS2 were heard despite bad static and noise. Jan. 24. 1:45-2:30 had battle royal on 1010 kcs. WSFA R7 at 2:10 A.M. Jan 25 1:45-2:30 A.M. Coasters R9, This out DDZ on at 2:10 with test. MALTER C. BIRCH, MFO #8. East Lynn, Mass. - Reports having heard the death announcement of George V's death over West Regional at 7:08 P.M. over Fedamp at 7:16 P.M. and over Radio Toulouse from 7:20-7:35 P.M. All on Honday evening, Jun. 20. The Canadians all signed off early so Walt tried for some of the SA's that operate on The same frequencies with the Canadians and his efforts were rewarded with some excellent reception from LR9. The morning of Jan. 21st Walt heard BBC stations on the following frequencies: 668, 767, 804, 877, 977, 1013, 1050, 1122, 1149, 1285 and 1474. Or in other words Walt heard every one of the British stations except Flymouth on 1474. Walt reports that the 20 KW National Stations on 1149 kcs. are synchronized. In addition to that Walt tells us that LS5 are still coming in well in the evenings on 1115 kcs. Which of course is a good tip for many of our members that have thus far been

unable to log this station.

DR. O. W. GIBBS, MPO #14. Dallas, Texas - Says that from the 17th to the 24th inclusive severe static made DKing very difficult in Dallas, with the exception of one or two mornings. This severe static was due to a snow storm the first part of the week. Jan. 18th - Static very severe. Logged TEFB SA5 H6. The 19th and 20th were so poor that stations using 50 km pover on the coast guch as KFI and KPO were almost blotted out with static. Jan. 21 - Conditions some better TAMZ QSA4-H4. Jan. 23 - LS2 135-A8 and LN4 13.4-R6. Jan. 24 - WSFA heard with fine NRC dedication SA4-A7. Dr. Gibbs says that he hopes that the majority of our club members heard this program and enjoyed it as much as he did.

FRANK FIELD, Ur. MFO #17. Johnson City, Tenn. - Mr. Field is one of the newly appointed MFO's for our club. Reports reception conditions very uncertain for week of Jan. 12. Reports excellent Cuban reception on the Continued on last page.)

National Fost Observer Reports (Contined) night of the 14th, up until 9 P.M. The same condition existed on the 19th. The South Americans were very poor and the only one positively identified on the 16th was LR1: London Regional was heard on the 17th during their tests for the Mational Bureau of Standards! Jan. 14 - found the Facific Coast stations very strong. The DK program from MEFB came in R6 at times but faded badly. Logged the following new stations: Jan. 12- CLK:, CJIC, CADI. Jan. 19 KFDY. KFBK heard R8-9 on Jan. 14th. KEMO also unusually good on the 17 and 18th in spite of static:

CKOV

MAROLD BUTTELS, NPO #15, Aurora, Ill. - Jan. 13 MABB QSA5-R9, a t 2:18 A. .. KEAQ at 2:35 was 05A4-R4-6. WASD QSA5-R9., at 3:10 A.H. KALB QSA5-R9 at 4:33 A.H. WTAL QSA5-R8 at 5:10 A.H. KDON at 5:21 QSA2-R3-4. Jan. 22 ASFO heard at 2:19 A.M. with plenty of QRM, faded badly. Reports having heard Than coming through WHFC at 8:55 P.M. one evening last week. They left the air at 9:01 P.M.

Joe Becke r, our ever active Vice-Pres. advises us that CMBX 1380 kcs., will be on the air for our club on Sunday mornings, February 9, "arch 15 and April 19. Thanks for having secured these programs for us oe. This fine work is greatly appreciated.
