## GOSSIP BY OUR MEMBERS

David Thomas says he is interested in Long Wave, BCB and SWBCB reception on voice only. He has collected 2.146 veries (Not including Hams) which includes stations from 70 to 32.000 kc of broadcast nature. He is not interested in Police or Aircraft stations. This is what we call VFB DXing and we would all like to hear from Dave on what results he has obtain on Long Wave Bands.

Cy Will says he has done very little SWBCB DXing this season but he sent in a whale of a report for this issue. Cy is interested in the photo's of the gals I have on my DX photo and wants their names. Maybe OM Leo Herz or Carl Forestieri can help Cy out or otherwise Cy may get a nervous break down there. "i.

Merton Hiatt uses a Streamliner 39 for his DXing and gets fine results.

Bob Hoynes states that DX in England has been erratic. The 19 and 25 meter bands are completely faded out and lost most night now. 20 meters also ! has been very bad lately. However Bob says he occasionally finds a good night for DXing. By the way fellows, Bob has a brand new SWL card and its a dandy.

ULTRA HIGH FREQUENCY DXING

Merton Hiatt sends us some of his experiences on these thrill bands and lets us know what stations no is hearing up there in Dryden Washington. (Quoting from his letter)
There are a number od stations operating on 31.6 megs on about 9.5

meters with W9XPD and W8XWJ getting through occasionally. Utherwise there

is nothing but a whistle there.

On 25.590 megs W6XKG and W9XUP cause so much QRE with each other that neither is heard very well here. however W9XUP can he heard occasionally through W6XKG.

W9XTA Harrisburg Illinois 26.500 megs is heard from 9:38am-10:10am EST R/6-8 Q/4-5 I beleive their QRA is 2838 So.St but I am not sure as

they give their QRA so fast.

W9XA 26.450 mcgs Commercial Radio Equipment Co., Kansas City Mo. relays KITE and acknowledges all correct reports with a excellent 4 page folder showing W9XA and what it has and hopes to do ect. Also over the mail bag which may be heard at 11:00am and 4:30pm CST daily. They have a talk on television on Saturdays at noon EST and today had a talk on UHF stations but I do not know if this is a regular feature or not. Herbert Steinmetz is the announcer on this program and he was heard quoting Perry Ferrell, Jr who heads UHF dept of the ILA.

(Thanks for this very fine report Merton on UHF DXing. We hope you yor us soon in the future with another one of these excellent reports

Thanks fellows for the fine SW report for this issue, Fred Alfred one of our new NRCer sent in three pages of materal and I have added some in this issue the rest will be forwarded to the SW Editor. From now on we should have about as up to Date SW Section as any club has, with the SW members that we have and with the A-1 Short Wave (New) that have just joined up, and from several letters that I have here we will see a-bout six more A-1 SW ers in a few days.
