From the Publisher: Jim Tedford is continuing to deal with some medical issues and will need to step aside, at least for the time being, as DDXD-West editor. We wish Jim the best of health and hope he'll be back to 100% soon.

If there is a member, preferably in the Central, Mountain, or Pacific time zones, who would like to edit DDXD-West on a temporary or permanent basis, please let David Yocis know of your interest at NRCDXNews@gmail.com. Also, for the time being, please send DDXD-West submissions to the same address.

In addition, we are still looking for a successor to Rick Dau as College Sports Networks editor. Contact David at the same address for more info.

[NRC-AM]: [NRC-AM] has moved from the Rocky Mountain Ham Radio servers to Google Groups. and is NRC-AM@googlegroups.com. The group is moderated by long time NRC member and former Publisher Russ Edmunds and is a subscription group. To be added to the groups email Wayne Heinen at his new address amlog@nationalradioclub.org from the email that you wish to subscribe to the list with and he'll get you added. You'll see Wayne's address for club email has changed to amlog@nationalradioclub.org. The old address at nrcdxas.org has been receiving over 1000 pieces of spam weekly and many NRC-related items were being missed. You'll find that address listed in the 38th edition of the *AM Radio Log* and everywhere Wayne's contact information is listed in DX News. Watch for more online changes in the coming months.

Pro Sports Networks: Barry Finkel writes: Bill Hale reported some errors/typos in my NFL column. The "major" correction is in the network lists, where the announcers for the Dallas Cowboys Expanded Terrestrial network are wrong; I copied the announcers from the Houston Texans. The correct announcer list is in the flagship list at the top of the column.

Unreported Domestic Stations

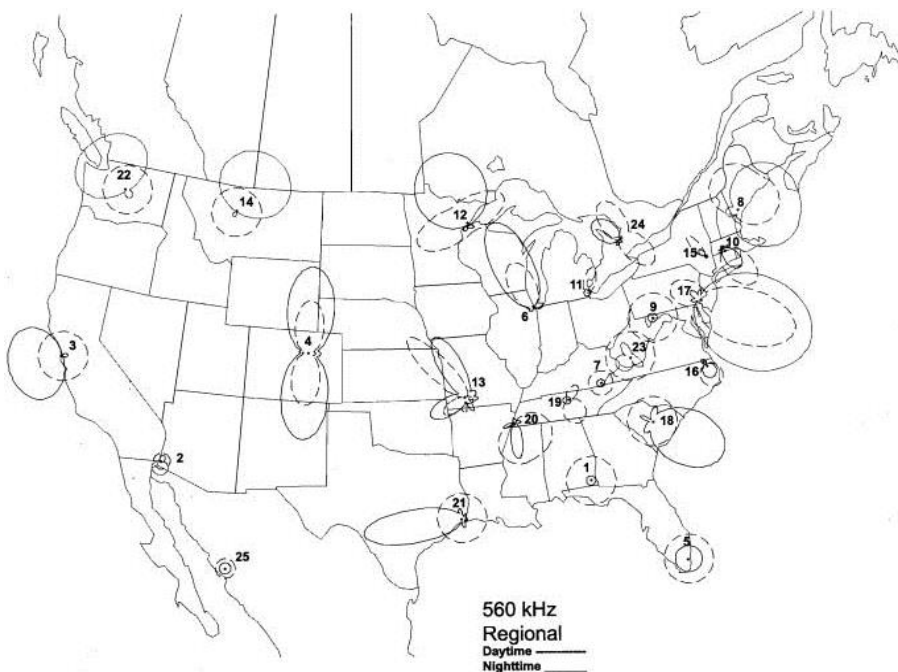

Two new stations – KNTR-980 and WKLF-1000 (ex-980) – are reported to DDXD this issue for the first time since at least 1999-2000 (Volume 67). We are now down to 406 currently licensed stations in the United States and Canada that haven’t been reported in DDXD during this period.

NRC Antenna Pattern Book, 7th Edition

The 7th Edition of the NRC *Antenna Pattern Book* is now available. This all new edition prepared by NRC’er Paul Swearingen is an all-inclusive book of patterns for both Day and Night operation of stations in the USA, Canada and selected foreign stations. The data for the book comes from the 34th Edition of the *AM Radio Log* and NRC’er John Callerman’s comprehensive Mexican station listing.

The book comes shrink wrapped in 8½ by 11 three hole punch format for placement in your own three ring binder. There are 240 pages and the book has maps covering 530 through 1700 kHz depicting the lower USA, Canada and Mexico. Hawaii and Alaska are shown on separate maps at the of the book.

UNID

- 630 unID** -- - 10/13 0624 – "Creation Moments" gospel program on a local Saturday morning thus presumably a dedicated religious format station, mention of creationmoments.com which shows loads of stations carrying, too many for my patience sifting through by state, but best candidates on 630 kHz would be KSLR, San Antonio, TX however not parallel their stream nor the program listed at this time, or KYFI, St. Louis, MO but not listed as carrying this hour. Faded and lost too soon for any chance of identifying. **(TLK-FL)**
- 990 unID** -- - 10/11 2236 – Occasionally popping up with Mexican music; one promo mentioned "...AM"; thought I heard "Tijuana," but not //XECL web feed. "La Nueva" promo at 2256 but not //WDYZ Orlando web feed. So is this domestic or Mexican? **(HF-MI)**

PIRATE/BOOTLEG

- 1710 ----** **LA Baton Rouge** – 10/12 0614 – "Radio Reten lo que Tienes" with screaming Spanish male preacher and audience response, parallel live stream <https://www.radioretenloquetienes.com>. Decent signal. Also in well around the same time on October 14. How long will this one last? **(TLK-FL)**

- 590 **MEXICO** XEPH México, DF OCT 6 1056 – Faster version of the Mexican national anthem, into the NRM Comunicaciones network song (which is also heard on 1000 *Radio Mil*), "XEPH-AM" ID by woman. Signal started to fade down into WCAO IBOC noise, then another unID Mexican with a man faded up which went into the national anthem at 1100 UTC. [Saylor-PA]

- 630 **MEXICO** XEFB *La FB*, Monterrey, NL OCT 13 1059 – Unusual orchestral (not the common choral) Mexico anthem, which should make identifying this one easy when airing the anthem, excited male "XEFB, La FB... - 630 **MEXICO** XEPBGJ *Jalisco Radio*, Guadalajara, Jal. OCT 6 1103 – End of Mexican anthem, group of 3 ascending notes then another group of 3 notes on a vibraphone, into ID by a woman as "Jalisco Radio" and then a call that didn't sound like XEJB. I originally thought it sounded like it ended in "FB" leading to the assumption it was XEFB. But after listening to the web stream for XEJB, it appears they are now using a different 6-letter call. The full ID sounds like "Jalisco Radio, XEPBKJ, seis ciento treinta, AM, transmitir diez mil wats potencia..." followed by an address in Guadalajara. However, according to a Wikipedia article, the call sign actually changed to "XEPBGL" earlier this year. Still trying to sort out what the call actually is, new information came to light on this station. The actual call sign of the station on 630 in Guadalajara that was formally XEJB is now XEPBGJ. I finally found an official document from their version of the FCC that lists this call sign. This is backed up by hearing those calls on the webstream. So this is my final answer. [Saylor-PA]
- 640 **MEXICO** XENQ *La NQ*, Tulancingo, Hgo. OCT 14 1046 – Mexi-tune, male "en la NQ... la mañana... México, NQ... en NQ..." into instrumental snippet of "Let It Be" then a famous old easy listening movie score that escapes me. Audible in tight *R.Progreso* null. [Krueger-FL]

"Can't We Try" by Dan Hill & Vonda Shepard, "W Radio" ID in Spanish at 2330, "You Are the Sunshine of My Life" by Stevie Wonder. Fair at times almost over WLW to very poor. OEM is Organización Editorial Mexicana, which besides newspapers has 24 radio stations www.oem.com.mx/oem including link to *ABC Radio* www.abcradio.com.mx which leads back to 760 for Ciudad de México. [Hauser-OK]
- 780 **MEXICO** unID OCT 6 1101 – Weak Mexican national anthem, no chance at any ID. Several 5 kW and 10 kW stations on this frequency. [Saylor-PA]
- 800 **BONAIRE** PJB *TransWorld Radio*, Kralendijk OCT 13 0100 – Tropical jazz, woman "Radio Transmundial, ochocientos AM... transmitiendo desde Bonaire, isla del Caribe Holandesa"; loud! [Connelly-MA]

A year or so back someone requested a view concerning "the state of our hobby." Ain't no cure for the summertime blues, they say. The internet has changed all that.

Never in my wildest dreams did I think of listening to West Coast stations all day. Just like being there, huh? Thus, we can say "the state of our hobby," that is, distance listening, has never been better.

To be sure, it was a fascination in the 1920s & 30s. Today the ordinary listener is satisfied with local yokels. The rest of us still seek the thrill of far away places.

I call my old HAMMARLUND the National League. It's like watching the pitcher hit. You'll get hold of one now and then, but the internet adds so much to the game.

DX News Submission Guidelines

Most NRC members contribute to DX News by contributing to one or more of our columns. Each column has a volunteer editor who compiles information sent in by club members, or found through research or personal knowledge.

Station loggings and tips should be sent to Domestic DX Digest (for stations in the United States and Canada) or International DX Digest (for all other stations). DDXD in turn is divided into East and West columns, with the line between the Eastern and Central Time Zones as the boundary. By longstanding custom, DDXD uses Eastern Local Time (meaning EST or EDT, depending on the season) and IDXD uses Universal Time (UTC). These columns run in every issue of *DX News*.

By and large, loggings should be current (usually not more than one month old) and should give some details of the logging. The goal is to provide a tip that fellow DXers would find helpful in hearing the station themselves. Loggings should be of unusual or rare stations for you. For DDXD, loggings of 50 kW “clear channel” stations within 600 miles or so, or stations you hear on a regular basis, should not be submitted. The rule of thumb is to report a domestic station not more than once a year. However, station news such as changes in format, call sign, patterns of reception, etc., can justify exceptions to these rules of thumb.

Your editors will very much appreciate it if you submit your loggings in the format you see here in print in *DX News*. For example, dates should be “4/14” in DDXD and “APR 14” in IDXD. The more time editors spend changing each of your loggings that say “4-14” or “04/14,” the less time they have to focus on the content of the column (and the more irate they’ll be when they see your next submission). Please try to keep abbreviations to a minimum; many *DX News* readers are not native English speakers. Ham abbreviations (other than QRM for man-made interference, e.g. other stations, and QRN for naturally occurring interference, e.g. static, which seem to be common usage among DXers) should not be used – your publisher is particularly not fond of “OM” and “YL,” not to mention “XYL,” which strike him as a bit dated and sexist for use in print these days.

Stations that still “verify” receptions with written or electronic responses to DXer reports are reported to Confirmed DXer (published every two months).

The next major group of columns are station news columns. AM Switch is a weekly column that includes official station changes from the U.S. and Canadian licensing authorities and format, slogan, network, and relay station information to update your *NRC AM Log*. This column was edited for many years by Jerry Starr and then by Bill Hale, but hasn’t had a formal “editor” since September 2012 – the publisher combines information researched by several different members. Members with information to contribute can send it to the publisher directly, or to Wayne Heinen, the *NRC AM Log* editor. Stations carrying professional and college sports networks are updated each year in Pro Sports Networks and College Sports Networks. Other network lists are published from time to time. If you run across a list (or even a URL to an online network list), please send it to the publisher.

Fifty years ago, most of *DX News* was devoted to Musings of the Members, edited for many years by the late Ernie Cooper, with narratives from each member about recent loggings and other activities. Today, Musings is rarely used to report loggings, but we still encourage members to write in about their DX activities and comment on the hobby and the club. Active debate and discussion is good, but please keep it DX-related. Virtually every political and personal viewpoint can be found in the NRC, but we have many other places to debate those things. Here, we share the hobby of DXing, and even if we differ on other matters, we can be brought together by radio.

We also run a number of achievement columns. Graveyard DX Achievements has mileage records for the stations on the local or “graveyard” channels of 1230, 1240, 1340, 1400, 1450, and 1490 kHz. These are maintained online (at www.nrcdxas.org) and updated in *DX News*. Domestic DX Achievements and International DX Achievements report total stations heard and/or verified by members. The publisher maintains these totals and runs them in *DX News* as space is available.

Finally, DX Toolbox is a (more or less) monthly column with tips on DX strategies, web resources, and other miscellaneous topics. SDR loggings that are too old for DDXD or IDXD but are nonetheless of general interest can be reported here.

DX News also includes feature articles on DXpeditions, technical topics (receiver reviews, antenna design, propagation theory, etc.), radio history, station profiles, DXing techniques, and anything else that may be of interest to the MW DXer. Material for publication not falling into any of our columns should be sent directly to the publisher. In general, you should not try to make your submissions “camera-ready” for publication – use minimal formatting and we’ll take it from there.

If you’d like to contribute to a column, but aren’t sure how to do it, you can always contact the column editor first for suggestions. Or you can contact the publisher – preferably by e-mail at NRCDXNews@gmail.com, or by regular mail too. Participation and contribution by the members are always welcome ... we hope to see your DX news in *DX News* soon!
