

Radio Station KHAC-880 AM-10.000 WATTS

P.O. BOX F • WINDOW ROCK, ARIZONA 86515 • (505) 371-5749

Reception Verification

Thank you, Kermit Geary, for your reception report of KHAC's DX test on February 3, 1992 from Walnutport, PA. Your log is correct.

As of February 12, we have received ten reception reports of the DX test from California, Arizona, Montana, Missouri, Nebraska, Pennsylvania, North Carolina, Florida, and Ontario, Canada. Signal strengths ranged from strong in California to very weak with interference on the East coast and Canada. Only the morse code IDs were copied in the Eastern areas and Canada. Much interference from 50KW WCBS on the East Coast. I was surprised how many listened to the entire hour test, I could've played more interesting music!

KHAC is licensed to Tse Ponito, NM, a small community next to the state line. Our Post Office is acrossed the state line, that's why the Arizona address.

This DX test was conducted with 10KW, our normal night power is only 430 watts. Unfortanently, Skywave interference from other stations can be heard in the background at night only about two miles from our transmitter site under our 430 watts! Especially during the winter nights.

Thanks for your interest in this DX test.

Respectfully,

Bill Hurne

Walnutport, Penna.

Dear Mr. Geary:

This will verify your DX report of November 10 for our frequency check of November 9, 1939 as correct.

I would like to thank you for this report and I might say that it is one of the most complete reports received by me since being connected with KCRJ. My best wishes for you future DXing.

We have a composite transmitter here and are operating with a power of two hundred fifty watts since the third of October at which time we were granted an increase in nighttime power. We have a vertical antenna which is one hundred fifty feet in height. We have moved into our own building and have generally increased the general appearance of the station as a whole. If you should ever be in this part of the country please accept this as a personal invitation to drop in and pay us a visit.

May I again thank you for the report and wish you 73's and the best of luck in your future dxing.

Very truly yours

Mr. Kermit Geary,
R.F.D. # 2,
Walnutport, Pa.

Dear Mr. Kermit

Thank you for your letter verifying the fact that you received our frequency check transmissions on the morning of December 1, 1953. You can take this letter as my reply and verification of you having received that broadcast on that morning.

I have the National Radio Club to thank for the information that there was a station in Flagstaff (KGPH) operating on the frequency of 690 kc all night. That was something that I thought the FCC did not allow. It also was a check to see if our measuring company in Kansas City could receive us with the interference caused by the Flagstaff station. Lucky for us they can due to the high level of tone modulation we use for these tests

Once again thank you and the radio club for these cards and letters. We do test on the first Tuesday morning of each month at one to one-fifteen A.M. Mountain Standard Time.

Sincerely Yours,

Peter Trowbridge
President
General Manager
Chief Engineer.

Dear Mr. Geary,

We're pleased to confirm your report of reception of the KCEE DX test of 12-19-60 with this letter of verification. Your report is the most complete we've received from the East Coast and checks out in every detail with the log I kept here. The station I.D. was word for word as I gave it.

Other correct reports in so far from Smicksburg P.A., Washington (2), California (4) Colorado, Texas, Iowa, Illinois, Minnesota, Ohio New York, R.F., and Ontario, Canada.

Had we were able to do so well against WTAR and the other AN's on 790 KC.

Thanks again for a very fine report.
Best of DX in the New Year.

Sincerely,

Ed Hepp

KCNA

DIAL 2-4664 • P.O. BOX 2348 • TUCSON, ARIZONA

Jan. 16, 1952

Mr Kermit Geary,
R.F.D. #2
Walnutport, Penna.

Dear Mr. Geary:

I received your very nice letter & request for verification of reception of both K.C.N.A. 1340 & 580 last Saturday. After a little search, I found what I believe to be your first request on 1340. Somewhere between Walnutport & Tucson, the letter got very wet & muddy. I was unable to make out the address without the help of your last letter.

I am very happy to confirm the reception by you of KCNA 1340 on October 1, 1951. Sorry you were forced to write a second request.

Since that time, our transmitter site has a new location. While on 1340 our studios & transmitter were located less than two miles from downtown Tucson. Due to F.C.C. regulations & limited space we built our new transmitter in the Catalina Mountain, foothills, nine miles Northeast of town. Our transmitter is one of Gates latest. It is named BC 5-10 B, I might add that we are just a little bit proud of it. We think the sound & fidelity has a quality all it's own, & is the best construction, from the maintainence standpoint, that we have seen.

We have three "Sky-Borne" towers 346 feet high, & 427 feet apart. They were constructed & erected by Allison Steel of Phoenix, Ariz. The reason for the three towers, is, we have to reduce power to 500 watts from sundown to sunrise, which explains our announcement, "Covering Southern Ariz. with the sun".

Thank you for your letter on your reception of us on 580, as we have had very few reports from east of the Mississippi River.

Very truly yours,

K

"Serving Flagstaff and the World-famous Grand
Canyon Area from one of the Highest Transmit-
ting Towers in the world in the heart of the larg-
est Ponderosa Pine Forest."

Thank you very much for your reception report of Feb 6.
This is in verification of that report.

The transmitting equipment at KCLS consists of a Raytheon
RA250 running 1.85 amperes to a 165 foot uniform cross-section
guyed tower. (Wincharger). The associated equipment is the
required frequency and modulation monitoring, Doolittle and
Gates in that order, with a Gates limiting amplifier.

The transmitting site is .6 miles south of Flagstaff on U.S. 89,
the beautiful Oak Creek Canyon road. Rising to the north are
the San Francisco Peaks, and beyond the world famed Grand Canyon.
The Flagstaff folks enjoy an attractive yearly income from the
principal industries of lumber, tourist trade and railroading.
The Arizona Snowbowl is the Winter Sports headquarters of the
Southwest.

KCLS operates a full commercial independent schedule from 7:00 A.M.
to 10:15 P.M. daily. If you should ever be in the Flagstaff-KCLS
area, and it's a wonderful area in which to vacation, please stop
in and see us. You'll find that the great Southwestern hospitality
has no equal.

Dear Mr. Geary:

We received your letter reporting the reception of our station on Sunday night, November 29, 1964. A buddy of yours in the National Radio Club from Weston, Ontario had picked us up the same evening. Yes, we are only 250 watts with 1190 KC's on the dial but broadcast directional. When some of the larger stations sign off you can hear us at a great distance. We checked our log to verify your reception and know you were listening to KRDS. We have just mailed our application to FCC for increased power and in the near future, no doubt, you will be hearing us more frequently.

Our transmitter is located in Tolleson, Arizona, with offices in the beautiful Bali Hi Motor Hotel in downtown Phoenix, (card enclosed). We hope if you ever get this far west you will pay us a visit, and we thought you might like to join our window sticker club, (sticker enclosed). Over 40,000 of these have been distributed throughout the Valley of the Sun.

With best regards,

KSTM/KVVA

● 147 E. Garfield • Phoenix, AZ • 85004 • (602) 257-9363

DATE: 16 January , 1984

This is to confirm your reception of KVVA-AM on 860 KHz from _____

12:22 A.M. (MST) to 1:00 A.M. (MST)

on 09 January, 1984 .

The Federal Communications Commission in the United States has classified the frequency of 860 KHz as a Canadian Clear Channel. A station's coverage is dependent upon the station's location in the United States, its power output and the class of station. KVVA operates with 1000 watts non-directional daytime, and 1000 watts directional night-time utilizing a three-tower directional antennae system. Our primary coverage is the Greater Phoenix Area including Tucson.

Thank you for your interest in KVVA-AM. We hope that you will join the growing family of KVVA listeners whenever atmospheric conditions allow.

Sincerely,

Edward J. Knight

Dear Kermit,

Thanks for the fine DX letter old man, and congratulations to you on both your excellent receiving equipment and your general system. Your log is correct in every detail, except that live announcements were made first and later played back from a transcription. This was done in order to get through to the receiving station measuring our frequency which is located in Long Beach, California. We've had extreme difficulty. If you hear us again, we'd appreciate another DX letter.

Our equipment is Western Electric, with a grid modulated 451-A transmitter, 1126-C limiter, and 25-B controls. Our antenna is an Allison Steel 153' guyed job.

In case you may be interested in dragging in more Arizona DX, KCNA in Tucson is going 5 KW in six weeks or so on 580 KC. They're now 250 on 1340. Don't know what their pattern will be, but you might keep an ear out for them.

Thanks again for the FB DX letter.

73's

Ben Greenhaw
Chief Engineer/KNOG

P.S.

By the way, it's interesting that Nogales is the Spanish word for Walnuts.

Dear Kermit;

I checked our log for the morning of Monday 27th of April as reported in your letter and this is to verify that we did conduct a frequency check from 1:00 to 1:15 A.M. as you described.

I was happy to hear that you were able to tune us in again with our new call letters and would like to wish you the best of DX.

Yours truly,

Don Peltz

Dear Sir:

Thank you very much for your most complete report of reception of KGLU on the night of December 3rd, from 11:35 to 12:15, MST. Your report is correct with both our program and operating logs, and is the most complete of any we have recently received from the eastern part of the United States.

We appreciate your good wishes, and your interest in forwarding us this fine report of reception.

With all best wishes for your continued success, and for the Holiday season, we are,

Sincerely,

Gila Broadcasting Company

Paul Merrill

Dear Mr. Geary:

Your very complete report of reception of KOY during our test of the morning of Dec. 31st, 1937, received for which we thank you kindly.

Your report is correct and this letter can be considered as verification of the program.

We plan, in the near future, to carry on more of these test programs and will appreciate a report from you if you should tune us in.

Yours very truly

E. E. Alden

Dear Mr. Geary:

This is to verify your reception of this station on January 16, 1937. Thank you very much for your report, and we certainly hope that you enjoy the brochure which we are sending you.

We will possibly be having another DX Program within two months and will let you know well in advance.

Very truly yours,

THE ARIZONA BROADCASTING CO.

Dear Mr. Geary:

This is to verify your reception of Radio Broadcasting Station KTUC from 1:32 to 1:42 A. M. on December 19th, 1942. Your report checks against our program log.

KTUC operates with power of 250 watts on 1400 kc. We are using Western Electric transmitter feeding 181 foot vertical radiator. We wish to thank you very much for your report.

Yours truly,
