## NOTES OF INTEREST

The new KSL Studios are located on the Salt Lake City skyline at the head of Main Street. This is exactly on the Salt Lake Base and Meridian as determined by the pioneers the year of their arrival in Utah.

The famous KSL transmitter is 15½ miles due west of the city on the shores of Great Salt Lake, where 17½ miles of copper sheeting and wire sunk in the briny waters near the lake form an incomparable ground. This water carries a salt density of about thirty per cent.

Great Salt Lake is in almost the exact geographical center of the eleven western states. Its shores, therefore, offer a magnificent site for a powerful radio transmitter, to serve the vast western area, and fill in the gaps, covering the great sparsely settled areas where consistent broadcasting service is not otherwise available.

The beautiful Hotel Utah, situated directly opposite the Temple Grounds, is one of America's most famous hotels. Ideally situated in the heart of Salt Lake City, the Hotel Utah lives up to its reputation as "Utah's Hotel Beautiful." Under the management of Guy Toombs.

*We are happy to verify your report  
of reception on Nov. 1, 1936 - 3:24 - 4:15 AM MST.

Date: 3-17-38

Dear Radio DX Listener:

This will acknowledge your reception report on our station, for which we thank you. Now we would like to tell you something about ourselves and our city.

This station is owned by the "Voice of Longview," a Texas corporation, with Judge James R. Curtis as President, and Rogers Lacy as Secretary-Treasurer. T. R. Putman is the Station Manager, and Ralph DuBois is the Technical Engineer. The equipment consists of R. C. A. New High Fidelity Equipment. We use inductor microphones and R. C. A. turn-tables. The transmitter is a R. C. A. ET-4230 ~~100~~ 250 watt high fidelity transmitter. The antenna system consists of a quarter wave vertical tubular steel pole approximately 175 feet high with eighty buried ground radials.

We live in Longview, which is the Gateway to the World's Largest Oil Field. Longview is the county seat of Gregg County. It is located near the Sabine River, 150 miles East of Fort Worth, Texas; 200 miles North of Houston, Texas; and 65 miles west of Shreveport, Louisiana. The elevation is 368 feet above sea level. The average temperature is 68 degrees with an annual rainfall of 36 inches. The 1930 U. S. Census was 5,036. The Great East Texas Oil Field was discovered in 1931. The present population is 25,000 for Longview and over 100,000 people in Gregg County.

Longview has over 600 progressive retail firms, 25 wholesale houses and over 45 industrial plants. We have twelve churches, including all leading denominations. Longview has eight public schools with over 5,000 students. The largest oil refinery in the East Texas Oil Field is located in Longview.

The East Texas Oil Field has over 20,000 oil wells. The revenue from oil production is over \$500,000.00 daily. The field is approximately 50 miles long and is over 6 miles wide. The pay sand is approximately 3650 feet and produces a high grade of oil.

When you come to the 1936 Texas Centennial, be sure to visit Longview and the Great East Texas Oil Field.

We shall be pleased to give you further information concerning the possibilities of Longview, a land of a million opportunities.

This will verify your reception report of KBMR, 1130 Khz., Bismarck, North Dakota's DX test on 3/7/94 at 12:00-12:30 am CST. During this time, KBMR was conducting the test using a power of 50,000 watts, directional to the Northwest, The announcer at the time of reception was Andy Anderson.

Date: 3/15/94

Signed,

Chief Engineer, KBMR

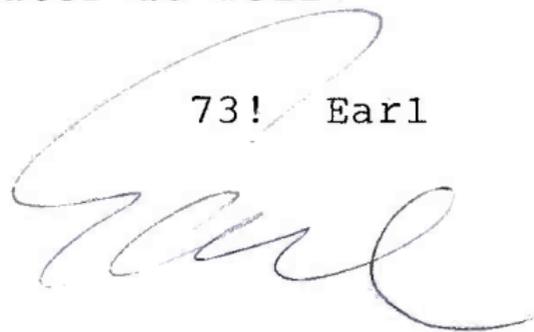

Dear Kermit,

Thanks for your patience in hearing "The BIG One!"  
on January 24th/25th, 1993

It was a pleasure for me to come down and do the  
test. We were "automated" at the time, all I had to  
do was be here and plug in the coded i.d.'s I wasn't  
satisfied with the code i.d.'s sent to me from the club  
so I made my own for the test.

I am an extra class amateur operator as well.

73! Earl
