MR. KERMIT GEARY  
R.D. 4, BOX 321  
WALNUTPORT, PA. 18088

APRIL 19, 1982

DEAR MR. GEARY,

RECEIVED YOUR APRIL 16th LETTER TODAY, AND FROM THE INFORMATION YOU PASS ALONG I CAN CONFIRM THAT YOU DID INDEED PICK UP WPNH LAST FRIDAY MORNING. YOU CERTAINLY PICKED UP THE SIGN ON ANNOUNCEMENT CLEARLY AND MOST OF WHAT FOLLOWED. WE RAN NBC NEWS AT 6, A.M. NEWS, SPORTS, AND WEATHER BROADCAST AFTER THAT. IN BETWEEN THE BROADCAST AND THE BULLETIN BOARD NOTES WE RAN A MOTORCRAFT COMMERCIAL - THEY ARE CURRENTLY PLUGGING A WIN THE WORLD SWEEPSTAKES.

AS YOU CAN TELL, YOU CERTAINLY WERE LISTENING TO US....THE ONLY DRAWBACK IN WHAT YOU REPORT IS THE REFERENCE TO A FEMALE ANNOUNCER...YOU SEE, I WAS ON FRIDAY AT THAT TIME.

BEST,

ROBERT F. GANNETT  
PROGRAM DIRECTOR

Dear Mr. Geary:

We appreciate your interest in our new radio station and thank you for writing us.

It is a pleasure to verify your report of reception of our test program on September 9.

Our station opened officially on Saturday, September 13, when we began broadcasting at six A.M. and we are now on the air daily from that time until sunset.

It has been very gratifying to receive so many letters from our friends who have amateur stations and we will be very happy to receive your comments or suggestions at any time.

Very truly yours,

*Robert C. Bingham*

Dear Mr. Geary:

I was happy to hear from you with regard to our recent test broadcast. Your comment has proven to be extremely helpful to our engineering staff.

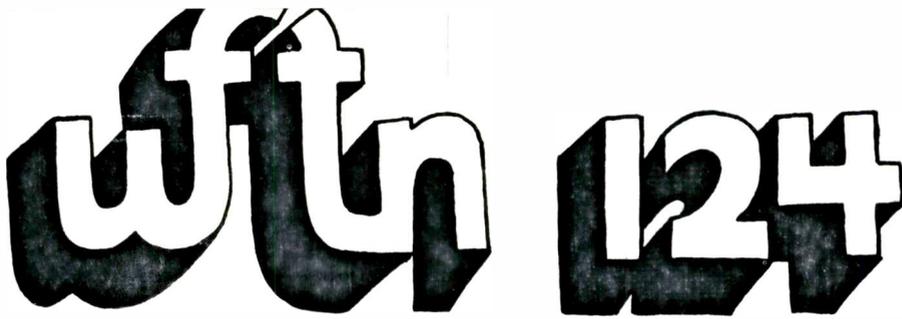

In glancing over your letter, as well as those of other DX fans, we were quite surprised to know that WKXL, operating on 1450 kc, with 250 watts of power, was able to be heard in so many remote spots.

Again I say, your comment was extremely helpful and if you are in this vicinity sometime in the future please feel free to pay us a visit.

Cordially yours,

  
R. A. Kelley  
Manager

Dear Sir:

Please pardon the form letter, but it saves a lot of time for verifications as the following!

I am pleased to verify your reception of WFTN, 1240 kHz.

DATE HEARD: 12-29-1975 (DX TEST) TIMES: 0123-0144 EST 1000 Watts  
Your report was more than excellent. Thanx for the time!  
While you were listening, I had no idea I had listeners, 250 Watts  
and was testing w/Jerry Star on the phone!!!  
WFTN generally tests every other Monday morning from 0030-0200 ELT  
for various reasons, although mainly for DXing purposes, with full power.  
WFTN IDs between selections, with telephone numbers, etc. Music is  
rock, oldies, and 1000-cycle tone. WFTN will be glad to test at other  
times upon written requests from bonafide sources.

Thanx so much for your report, and for your information, this is WFTN's  
normal broadcast schedule:      FREQ. CHECK:   THIRD FRIDAY 0010-0125+, 1kw.

MONDAY THRU THURSDAY AND SATURDAYS -	0530-0010 ELT	WFTN USES ID
FRIDAYS ONLY -	0530-0110 ELT	JINGLE RIGHT
SUNDAYS ONLY -	0700-1110 ELT	AFTER SSB.

WFTN FORMAT: Adult Contemporary/Top 40 (Country Saturday 1800-2400)

If I can be of any service, please call or write!

  
Chuck Morgan, Engineer

February 3, 1992

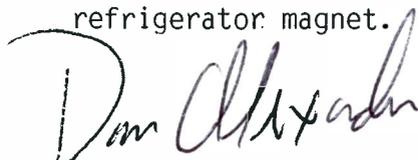

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Kermit,

Yes, you did pick up WMYF on January 20, 1992. We are licensed to Exeter-Portsmouth, NH, on the "seacoast" of the state. Our Music Director, Steve McVie, is also a DXer (on the FM) and was quite impressed. He is a member of WFTDA.

WMYF's format is nostalgia, and broadcasts the programming offered by Stardust on the Satellite Music Network. The on-air talent was most likely Eddie Hubbard. The voice in the primary coverage promo was John Collins, our local morning anchor and News Director.

I am sending you a WMYF bumper sticker (actually a few), and a WMYF refrigerator magnet.

# WDCR At Dartmouth College HANOVER, NEW HAMPSHIRE

May 10, 1959

Mr. Kermit Geary  
RD#2, Box 298  
Walnutport, Pa.

Dear Mr. Geary:

Thank you for your prompt reply to thw WDCR DX broadcast of April 13, 1959. The results have not been overwhelming because of the interference from WIRY in Plattsburg, New York; however, a new distance record was set. Mr. David F. Thomas of Proctorville, Ohio was able to catch bits of our braodcast between 2:00 and 3:00 am. By rough calculatians, I estimate that Proctorville, just outside Huntington, W.Va., is more than 700 miles from Hanover.

Exact verification of your report by the times you listed will be difficult since we kept no accurate log of our programming. However, since your leter mentioned such key phrases as "Send a card to WDCR, box 1032, Hanover, N.H." and "This is WDCR doing DX programming", I can believe that you actually did receive WDCR that evening. The music played included sound effects, marches, and dixieland jazz. Please take this then as a verification of your report.

When all of the letters are in, I hope to make a map showing the places where WDCR as heard that evening. Please look for the map as it will be along within a few weeks.

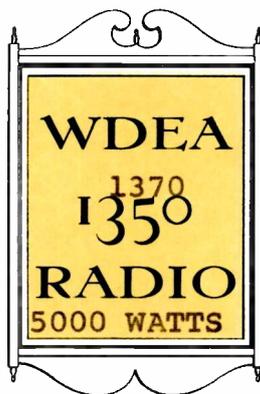

Again thanks for making this program a success.

Sincerely yours,

Don B. Knapp,  
Techincal Director, WDCR

Please excuse the impersonality of a printed verification, but I have really been inundated with reception reports resulting from the test. Consider this a verification of your reception of that test as logged, and my congratulations go to those of you who were successful at great distance. We have received reports from the Midwest, and the metro NY area as well as more local contacts. Our station is a 1 kw daytime and 250 w nighttime nondirectional operation, with a contemporary music format, with a strong emphasis of DJ personality. Much of our news and public affairs programming is highly locally oriented and we offer something for just about everyone.

Enclosed is a copy of our coverage map, with the area of the map located in central New Hampshire. As you can see, our 1 kw signal, heavily audio processed (equalization, reverb, and CBS Audimax - Volumax limiting) serves a reasonably large area.

Best of luck in your continuing BCB DX hobby from the entire WEMJ tech staff.

Regards, *A. W. Forward, G. F.*

March 8, 1985

Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Mr. Geary

I am happy to write to you to confirm your reception report of February 28, 1985. We receive, on average, a half a dozen reports a year, most of them from the New England area. I'm always interested to see how far our signal carries when the atmosphere's right.

Our station operates with a 5 kilowatt directional pattern in the daytime and at 1 kilowatt with a different directional pattern at night. Our programming is news and talk, including the all-news AM and PM reports, ABC TalkRadio and Talknet from NBC. Weekends we also carry the Ed Busch Talk Show from AP. We make heavy use of satellite technology receiving ABC and NBC from one dish and UPI and AP high speed wire services and Ed Busch from another.

Thanks for your report and happy DXing!

Sincerely,

A handwritten signature in blue ink that reads "Warren K. Small". The signature is written in a cursive, flowing style.

Dear Mr. Geary:

Thank you for your reception report. We are pleased to confirm your reception of WSMN 16 Dec. 1962.

Our station employs a directional antenna consisting of three 160 foot series fed steel towers, in line, spaced 103 feet apart with their base 190 feet above sea level and oriented 53 degrees true with a front to back power ratio of 540 to 1 and a forward ERP of 15,000 watts.

WSMN is licensed to operate fulltime with one pattern and currently is on the air 5:30am Monday to 11:00pm Sunday.

Yours truly,

Donald F. Ayers  
Chief Engineer

April 1, 1991

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport PA 18088

Dear Mr. Geary:

I am writing to confirm your reception of WCQL-AM 1380 on December 28, 1990. A cross-check of our programming at the time confirms the details of your reception report.

At the time, WCQL-AM was carrying syndicated talk programming. New was produced locally and the voice you heard was that of your former News Director Scott Tranchemontagne. Unfortunately, Scott is no longer with us. On January 12, 1991 we rolled our AM back into our FM and are now programming Oldies on the AM. If you should try to pick up the AM again you will hear it referred to as "COOL 95.3."

WCQL-AM is 1000 watts. Surprisingly, we are directional to the north at sunset which makes your reception that much more impressive.

Incidentally, I noticed in your "Broadcasters' Guide to DX" a photocopy of a letter from WQLX/WGLX in Galion, Ohio. That is the station that gave me my first job in radio ten years ago. Your letter indicates that Maumee Valley Broadcasting was the owner of the station. I'm not sure when the ownership change took place, however the station is now owned by Malone Broadcasting. It was a bit of a flashback to see that letter in your flyer.

I've enclosed a station bumper sticker for you. Though it is for our FM, we do simulcast and at this point the AM is not where we are placing our efforts. I appreciate hearing from you and if I can answer any further questions, please feel free to contact me.

Sincerely,

Scott Mason  
Program Director

The Twin State's Most POWERFUL AM  
FM 99.7 mhz New London

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

January 16, 1993

Dear Mr. Kermit Geary,

This is to confirm your reception report of WNTK AM 1020 test on January 4, 1993 between 0300 and 0330 AM Eastern Standard Time. WNTK AM is licensed to the town of Newport, New Hampshire. WNTK-AM is the highest powered AM in New Hampshire operating with a daytime power of 10,000 watts. Our transmitter is a one-hundred percent solid state Nautel Amphet 10. Our antenna is a 209 foot vertical with a new set of ground radials. WNTK-AM is located at 43°-21'-52" North Latitude, and 72°-10'-45" West Longitude. At the time of the test we were operating 10,000 watts.

In regard to the January 4, 1993 test we have received todate 23 reception reports, from fifteen (15) different states, ranging from the closest being New York and Iowa being the furthest. We also received reports from two other countries those being Winnepeg, Manitoba - London, Ontario--Canada and Jamaica, West Indies.

I want to thank you for the completeness of your reports. Also I was particularly impressed with the enthusiasm for the hobby that was evident in all of the letters. Finally, the fact that KDKA a 50,000 watt clear channel station was on the air and that through the use of C.W. you were able to read our test speaks very much for the necessity of the continuance of the practice of using Morse Code.

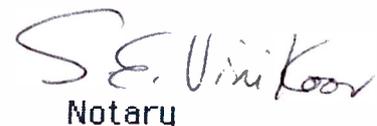

A bit of personal information WNTK is owned by my wife and me and (of course the bank). I am 46 years old and have been a ham radio operator for the past 33 years. My call is W1HUX and I like to operate twenty meters around 14.200 or we have a "5th Estate Net" that meets each Sunday evenings at 8 Pm Eastern on 3.820 ± 10 kc.

I look forward to participating in the future with other tests and like each of you it would be great to have reception reports from all 50 states.

Dear Kermit Geary  
R.D. 4 Box 321  
Walnutport, Pa 18088

We are happy to verify your correct reception report of Radio Station WKBB, Keene, N.H., on March 16, 1981.

WKBB conducted the special equipment reception tests at the request of the National Radio Club.

We operate daytime using a Harris MW-1A solid-state 1000 watt transmitter and a 170 foot non-directional antenna. Authorized presunrise power is 500 watts.

Thank you for your reception report and for this opportunity for our station to obtain coverage information.

Dear Kermit,

I enjoyed meeting you and hearing your recording of WQMI AM 1380, which you made on Friday, January, 22, 1988 at 7:38 am. Your tape recording was clear and sharp and almost unbelievable for our 1,000 watt station, to come in at your home in Walnutport, Pa..

Thank you for stopping by WQMI and giving me the opportunity to personally verify your listening.

All Best Wishes,

A handwritten signature in blue ink that reads "Dick Walsh".

December 31, 1975

Mr. Kermit Geary  
R.D. 2, Box 298  
Walnutport PA 18088

Dear Mr. Geary:

This is to confirm your reception report for WASR from 0005 to 0008, 24 December, 1975. The information contained in your reception report agrees substantially with our logs and test records for that time and date.

While the items from 0005 to 0008 are just about on the nose, the 0008:20 entry must have been from another station, as we continued the test procedure from this time until 11 after the hour.

Thanks for tuning us in....and I hope you'll try us again in the summer of '76, when we hope to have 2500 watts!

Sincerely yours,

  
Alan W. Severy

1/21/85

Mr. Kermit Geary  
1266 Riverview Dr.  
Walnutport, PA 18088

Dear Mr. Geary

It does indeed appear that you were listening to WKZU on the 15th of January, 1985. I am happy to confirm your reception report.

WKZU has three levels of power output:

- 330watts pre-sunrise
- 5000watts daytime
- 112watts post-sunset

All are non-directional. The quality of reception is even more remarkable considering our level of operation on the date of your confirmed reception.

Many thanks for your friendly and informative report.
