FROM THE DESK OF:
Paul Shullins

12/27/83

DEAR MR. GEARY,

Thank you for your excellent Reception Report of WPXY-AM, on December 19, 1983.

WPXY-AM Simulcasts with our fm station 40% of the time, and we are separate all weekend and overnights weekdays. We also are separate from 10am-3pm, and 7pm till midnight weekdays. We would like to ~~Simulcast~~ Simulcast 100% of the time, but FCC Rules do not permit us to do so.

We use a brand new all solid state 5,000 watt transmitter, made by HARRIS, model SX-5, and are non directional daytime, and 4 tower directional at night. ARE transmitter is located in the town of Brighton N.Y., and our studios are in down-town Rochester. →

Thanks again for your report.

Have a good year, and Happy DX'ing!

Paul Shulins
Chief Engineer

DEPENDABLE COVERAGE AND COMPLETE ACCEPTANCE IN
"THE WORLD'S RICHEST MARKET"

July 30, 1934

Dear Newark News Radio Club Member:

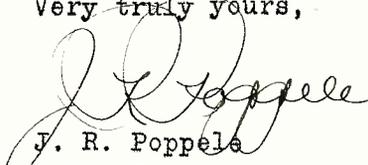

We are soliciting your cooperation in aiding us in the compilation of technical data relative to the operation and reception of WOR and WLW.

WLW, as you are undoubtedly aware, recently increased their power to 500 KW. We should like to learn from you how the operation of this new transmitter compares with their previous power of 50 KW. Have you noticed any appreciable increase in signal strength?

For the purpose of submitting an accurate report under different weather and atmospheric conditions, we are enclosing four copies of a questionnaire. This is for observing and reporting receiving characteristics over a period of a week.

We should like to thank you in advance for your cooperation.

Very truly yours,

J. R. Poppela
Chief Engineer

Greetings...

After looking over your reception report, we are happy to verify your reception of WPIE on Monday, November 8, 1993 from 12:44 AM to 2:00 AM EST/EDT, from your listening post in Walnutport, PA.

WPIE operates 24 hours daily on 1160 kHz, with a power of 5,000 watts days and 310 watts nights, with different directional patterns day & night (DA-2). Our transmitter is on Town Line Rd., Town of Hector, Schuyler County New York. 42° 32' 42" North Latitude & 76° 42' 39" West Longitude. WPIE is licensed to Trumansburg, NY and serves the Ithaca NY market and New York's Finger Lakes region. We operate from two 380 foot towers.

Thank you for your report. We do appreciate hearing from you. Since our power increase in November, 1993 we have recieved numerous reports.

Hope you have great DX'ing!

Sincerely,

Joe
Joe Loverro
General Manager

Oldies 98.9 WKLY

January 20, 1995

Kermit Geary
1226 Riverview Drive
Walnutport, PA 18088

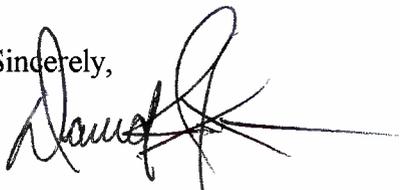

Dear Kermit,

Thank you for your reception letter of 1/2/95.

From the details of your log , and a comparison to the station and music logs, it appears that you were indeed listening to WKLY. However, WKLY does not operate in the new expanded AM band. The station operates at 98.9 MHz in the FM band.

There have been other reports similar to yours asking confirmation of reception of WKLY on 1620 kHz. The station is obviously being rebroadcast by a pirate radio station.

Sincerely,

David J. Lane, Chief Engineer
WBBF/WBEE/WKLY

**Roosevelt Island Operating Corporation
of the State of New York**

March 24, 1994

Dear Friend:

I apologize for the form nature of this letter, but the Roosevelt Island Operating Corporation ("RIOC") of the State of New York has received quite a few letters and cards from individuals who share your interest in radio communications and I find it impossible to answer each personally.

The same general questions were asked by each of you, so I will list those most frequently asked and their answers.

RIOC is a New York State public benefit corporation, which is responsible for the management and development of Roosevelt Island, which is located in the East River 300 yards from Manhattan. We are connected to Manhattan by an aerial tramway and a subway, and to Queens County, to our east, by a bridge. The island population is approximately ten thousand people, and the island itself is two and one quarter miles by a quarter mile.

As part of our attempts to communicate with both residents and visitors, we established a TIS radio station. It began test messages this past January and went on the air in late January. The system was set up by LBP Inc. of Frazer, PA. It is at 1620 and the call sign is WNZE748.

The station operates at approximately 6 watts, with an LPB AM30 TIS transmitter and a Morad SF-1620 antenna.

If there are any other questions, please feel free to write and I will answer as soon as I can.

Sincerely,

A handwritten signature in cursive script that reads "Barry".

From the

DX LISTENING POST

SIR -
THANKS FOR LISTENING TO WHTK/
Rochester. Your reception is confirmed

of: Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

April 6, 1994

Program Director
Radio Station W H T K
30 N. Union St.
Rochester, NY 14607

John Tvey
Program Director
WPXY/Rochester

Dear Sir,

It is a pleasure to report that I continue to enjoy frequent reception of WHTK, Hot Talk 1280, down here in eastern Pennsylvania. When I first heard WHTK on Saturday morning, December 18, 1993, I sent a report to Contract Engineer Tim Pauly in care of your station, requesting a confirmation of my reception, but I have failed to receive a reply. It is possible that I had obtained the wrong name. I am enclosing a copy of my original report for your information.

My most recent reception of WHTK was logged on the morning of Tuesday, April 5, 1994, when your broadcast was tuned in at 7:50 A.M., Eastern Daylight Time, and I continued to hear the program of Imus in the Morning, along with news, announcements and advertisements until 8:29 A.M., E.D.T. WHTK's signal on 1280 kiloHertz again peaked at a strong level of 20 db over S-9 and afforded clear, enjoyable program reception. Fading was moderate, along with some co-channel interference, but your signal was always in command of the frequency during the period of my reception. As always, the modulation and speech quality were excellent, and there was no atmospheric static. As the result of these favorable conditions, Hot Talk 1280 was received with good clarity and readability at this distance from Rochester of 205 air miles.

I listen to WHTK on my Hammarlund HQ-180 communications receiver, using 18 tubes. The antenna is a Model SM-2 Space Magnet, a rotatable 12-inch ferrite loopstick with 2 stages of preamplification. Ground connection is made to a well 175 ft. deep. I am situated in the eastern part of the State of Pennsylvania, 60 miles north of the city of Philadelphia near Allentown, Pa., and 21 miles west of the New Jersey state line.

I would be happy to receive your reply, kindly confirming my reception of WHTK on 1280 kiloHertz as reported above. Your verification of the fact that I heard your broadcast on Tuesday morning, April 5th, will be greatly appreciated for inclusion in my reception records, and return postage is enclosed for your reply. As proof that I was tuned to Hot Talk 1280, I give the following log of program items to which I listened:

WRMM FM/AM

Dear Mr. Geary,

Please excuse me for replying so late to your letter dated September 22, 1988. I feel bad enough that this September has gone by, but, to realize your letter (I had to read it twice to make sure of the date) was dated a year ago in September, well, I really feel bad.

Your letter somehow got in with some other papers that were filed away and it just was found where it should have been. Realizing that I knew I never replied, I felt I better do it now.

After reading your letter, I had realized that I remember getting it and checking it out against our log and your right except for some minor pronunciations.

Its nice to know that someone can pick us up like you have so we know where we are transmitting to when conditions are just right. It was interesting to know that you heard us back on November 1, 1955. I believe it was around October 22, 1955 when WLSV first went on the air.

I came in 1979 and bought out WLSV in 1983.

I want to apologize again for this letter being so late. Hope you had a nice Xmas and will have a Happy New Year.

Sincerely yours,

RADIO SERVICES OF WELLSVILLE, INC.

CURTIS R. "BUZZ" ERICSON
President

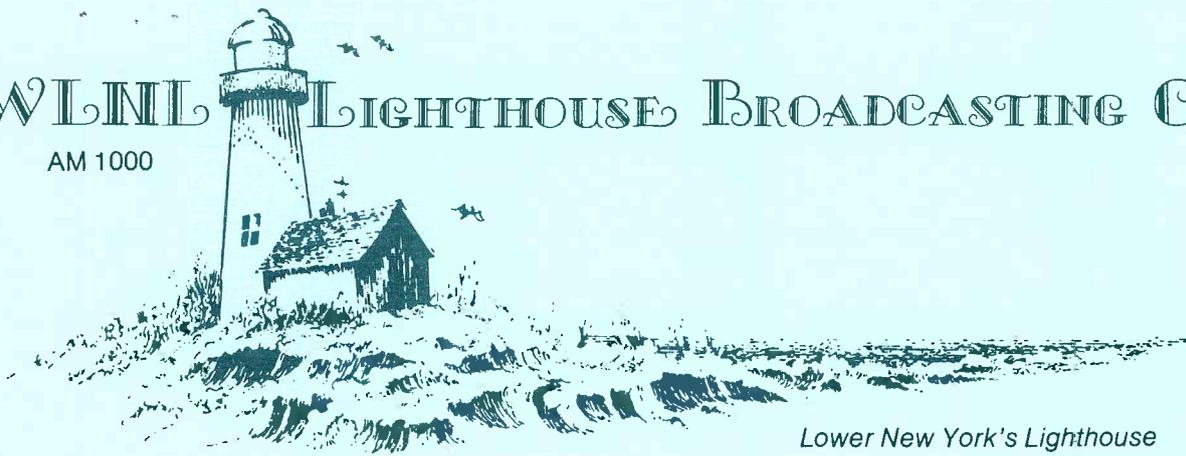

P.S. I have enclosed your 25¢ stamp back because of my lateness.

AM 1000

Lower New York's Lighthouse

February 22, 1988

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary,

Thank you very much for your letter concerning reception of WLNL. It was very interesting and quite informative. The dates and times you did mention and the program content is correct. I wish everyone in our area had reception comparable to yours.

We've been experiencing some technical problems as of late and I wonder if it's effected your reception of WLNL. We discovered February 9th that our line equalizer-amplifier wasn't giving us our full audio potential from our transmitter. Under F.C.C. regulations we are allowed 125% power and my engineer informs me that we are only @ 65-80%.

The phone company will be replacing our equalizer-amplifier on our audio line hopefully the 26th of this month. I would appreciate it, if you would sometime the following week, tune us in and compare our signal to our previous broadcast which you monitored. Enclosed is a stamp for your reply.

Thank you again Mr. Geary, may the Lord bless you in your endeavors.

Sincerely,

J. Mitchell Nichols
Operations Manager

Dear Mr. Geary:

Thank you for your November 3rd letter requesting confirmation of your receipt of our signal on November 1st. Your detailed description of your reception is accurate, and we are pleased to know you were listening. Inasmuch as we only went on the air with our Christian format on October 25th, you can see you caught us early in our broadcast life.

The 1390 frequency formerly had the calls WFBL, which stands for the First Broadcast License in Syracuse...so we have a proud history on this frequency.

I have included a bumper sticker and program card which will be of further interest to you.

Thank you for writing.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Sue Bahner', written over the typed name.

November 29, 1995

Dear *Kermit Geary*

This is a letter confirming your recent reception report of station WDCS, AM 1190, Cobleskill, N.Y. 12043.

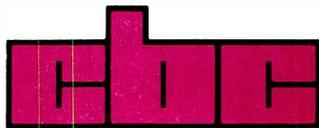

We did run a test broadcast on Monday November 20, 1995 From 12:00 midnight to 12:32am EASTERN STANDARD TIME. We Operated our transmitter at our normal daytime power of 1000 watts, with average modulation of 70 to 80%, symmetrical. Our transmitter is a Gates BC-1T, about 30 years old. Our antenna is a single tower 192' with a folded unipole, shunt fed. Our station was "dark" from December 1, 1994 until I put it back on the air September 5, 1995. The Station was formerly known as WSCM. Thank You for participating in the test.

Sincerely,

Kevin A. Smith

Debbie Jackson
Station Manager
WBAB*

Dear Sir,

It is a pleasure to report that I enjoyed hearing your AM station on 1240 kiloHertz reach over here into Eastern Pennsylvania on the evening of Tuesday, November 29, 1988. WBAB-AM was tuned in at 4:34 P.M., Eastern Standard Time, and I heard a program of rock music from "Long Island's Home of Rock-and-Roll", followed by a traffic report by Debbie Jackson and several recorded advertisements until your signal was covered by interference at 4:47 P.M., E.S.T.

WBAB's signal on 1240 kiloHertz peaked at a strong S-9 level during the above period, overriding the co-channel interference with fairly good clarity at this distance from Babylon of 130 air miles. Fading was shallow, and there was no atmospheric static. The carrier was clean-cut and fully modulated, and the tonal quality was very good. It was a pleasure to hear WBAB-AM reach this distance in a clear and readable condition, and you are to be congratulated on the power and efficiency of the transmitting equipment. With the coming of sunset, however, other stations on 1240 kiloHertz began to crowd in, and your broadcast was lost in the co-channel interference at 4:47 P.M.

I heard WBAB-AM on my Hammarlund HQ-180 communications receiver, using 18 tubes. The antenna is a Model SM-2 Space Magnet, a rotatable 12-inch ferrite rod with 2 stages of preamplification. Ground connection is made to a well 175 ft. deep. I am situated in the eastern part of the State of Pennsylvania, 60 miles north of the city of Philadelphia near Allentown, Pa., and 21 miles west of the New Jersey state line.

Please confirm my reception of WBAB-AM on 1240 kiloHertz as reported above. Your verification of the fact that I heard your broadcast on the evening of Tuesday, November 29th, will be greatly appreciated. Return postage is enclosed for your reply. As proof that I was tuned to Long Island's rock-and-roll station, I give the following description of the programming to which I listened:

From the

DX LISTENING POST

Dave is no longer here.
my name is George Belva.

Sorry about the delay - letter got lost in a pile of papers. November 1, 1990
lot of new tech changes here so I've been

Chief Engineer
Radio Station W B N K
P. O. Box 997
Binghamton, NY 13902

Very busy - Thanks for listening

Setb

of: Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Sir,

First off, if David Frost is still the Chief Engineer, I would like to express my sincere appreciation for the outstanding letter he sent me on February 3, 1986, when I reported my first reception of your AM station as WRSG, ex-WKOP. Charlie Hallinan's WKOP QSL card was greatly appreciated, along with the photograph of the erection of the tower in 1947 and the pictures of Dave Frost at the base of the tower and with the night transmitter and antenna phasing unit. The history of WKOP was very interesting, as was the information about your present operation and the fact that your major signal lobe is to the north on both your day and night patterns. It is gratifying when a radio station takes interest in a reception report, and I thank you for this consideration. I hope that Dave can still find the time to do some occasional Broadcast Band DX'ing.

I am writing now to report my reception of your AM station under its new call letters, WBNK. WBNK was first tuned in here on the evening of Tuesday, October 30, 1990, at 4:46 P.M., Eastern Standard Time, and I continued to hear your news and information broadcast until 4:57 P.M. WBNK was again heard on the following morning of Wednesday, October 31, 1990, between 6:30 and 6:45 A.M., E.S.T. It was interesting to learn that News Director Kathy Whyte, whom I heard on WRSG on January 27, 1986, continues to do a great job of reporting on WBNK.

WBNK's signal on both occasions peaked at a fairly strong, S-8 level which was sufficient to override the interference from other stations on 1360 kiloHertz during most of the time segments mentioned above. On Tuesday, October 30th, with semi-local WPPA, Pottsville, Pa., nulled by means of my directional receiving antenna, your broadcast dominated the frequency until 4:55 P.M. when interference began to appear from WCHL, Chapel Hill, N.C., and blocking my reception of your signal after 4:57 P.M. On Wednesday morning, October 31st, interference from co-channel WMNS, Olean, N.Y., overrode your broadcast between 6:34 and 6:41 A.M. The signal strength was fairly steady at all times, and there was no atmospheric static. The carrier was well modulated, and the tonal quality was excellent. As the result of these favorable conditions, WBNK was received with fairly good clarity and readability at this distance from Binghamton of 95 air miles.

My receiver is a Hammarlund HQ-180 communications set, using 18 tubes. The antenna is a Model SM-2 Space Magnet, a rotatable 12-inch ferrite rod with 2 stages of preamplification. Ground connection is made to a

Dear Kermit:

Thanks again for your interesting letter. You indeed picked up WDNY. Your logging is correct.

WDNY operates at 345 watts daytime and 250 watts nights. So we were on 250 watts when you were listening. We soon will be filing for 1000 watts days.

I use to work at WEEEX in Easton in 1975 and enjoyed the area. Sorry I missed you when you visited here.

Keep listening.

Sincerely yours,

A handwritten signature in blue ink that reads 'David Mance'.

Dear Mr. Geary, (member of National Radio Club)

Thank you for your report. It is correct, except one item.

We did not give our Call letters in Code. That would be illegal.

I can understand why you thought so however. We were making a frequency test with Cambridge Crystal co. in Cambridge, Mass on both AM (1490) and FM 96.7.

You did hear us, as you stated with test tones between 12:34 and 12:56 Am Monday, May 3, 1971.

Our next scheduled Frequency test will be the night of Aug.

1,2. Actually about 12:30 am Monday Aug. 2. 1971

We generally put on our carrier about 12:01am , play music or tones, sometimes both and then wait for Cambridge Crystal Co. to call us via telephone for the frequency tests. The actual time can vary plus or minus about 25 minutes. Since we have the transmitters on, we often take this opportunity to make other technical tests, during the same night.

Hope this letter gives you the information you want.

Good luck on you DX'ing!

Sincerely yours,

Henry Spahr
Chief Engineer

May 11, 1972

Mr. Kermit Geary
R.D.2 Box 298
Walnutport, Pa. 18088

Dear Mr. Geary,

In response to your letter of May 2, 1972, WDLC was conducting frequency tests during the morning of May 1, 1972 from 12:01 AM to 12:45 AM Eastern Daylight Savings Time. It seems to me that you not only heard us, but you also received another station conducting frequency tests as well.

It is common practice for a company like Cambridge Crystal to check several stations in one night. At 12:01 AM we all go on the air and then wait to be called and have our frequency checked. Since 1490KHz is a local channel, there are several stations in the area using that frequency. The closest one to us is WKNY in Kingston, N.Y. and I also know that there is a spanish speaking station in New York City on this same frequency.

It would also seem logical to assume that if Cambridge Crystal set its scheduals to check several stations on the same frequency on the same night, then they would have to do a lot less tuning and knob twisting.

WDLC started its test at 12:01 AM with intermittant 1 KHz tone from approximately 12:20 AM until the end of the test at 12:45 AM. Then we left the air and you picked up another station on the same frequency. This is how I would explain what you heard.

In answer to your question regarding our test schedual, we are still on the monday morning quarterly schedual with Cambridge Crystal and the next test is due at 12:01 AM on august 7, 1972.

Mr. Spahr is no longer with WDLC as he was called back to Cape Kennedy to get his old job back. Mr. Spahr was an aerospace systems engineer and was at WDLC during a layoff period. We all miss him very much here.

I would like to thank you for your signal report, Mr. Geary, and I look forward to hearing from you again.

Sincerely,

Philip S. Gale WA2PBG
Chief Engineer

Dear DX'er:

Your report of reception of WDOE on APRIL 21, 62
From 0610 to 0630 is correct as you logged it.

It may be of interest to you that we have 1000 watts of power during daylight hours with a non-directional pattern. At night we use a directional antenna system with 500 watts of power. The major portion of our signal at night is in a north direction. WDOE is presently operating from a new plant on Willow Road here in Dunkirk where both the studio and transmitter is situated. The plant is modern and well outfitted.

We are located in Chautauqua County in the southwest corner of New York State on the Shores of Lake Erie. Dunkirk is a community of about 30,000 and is in the heart of the "Grape Belt". People from throughout the country find our location ideal for summer vacationing because of the pleasant climate and good beach and picnic facilities.

Thank you for your interest in our operation.

Mr. Kermit Geary,
R D 2, Box 298,
Walnutport, Pa

Dear Mr. Geary:

I am sorry that no reply made to your inquiry of last Sept 20th, but here is a reply to your letter of Jan 31st, confirming your reception of W-F-Y-I on 1520 Kc.

We are now on 10,000 Watts with 3 directional antennas, and there is a possibility that you may not hear us now, but would be interested to get a report from you.

We operate from dawn to dusk, 7 days a week.

Thanking you most sincerely for your interest we are,

Cordially Yours,

Radio Station W F Y I

WALNUTPORT, PA 18088 .

DEAR MR. GEARY:

WE WERE HAPPY AT WSPQ TO RECEIVE YOUR LETTER, SORRY IT HAS TAKEN SO LONG TO GET BACK TO YOU. THE PROGRAM YOU HEARD WAS MY MORNING SHOW, MY NAME IS FRED HAIER. I WISH I COULD TELL YOU TO ENJOY WSPQ ALL TIME, BUT YOU SAY THAT WADJ SIGNS ON AT 6am AND I'M AFRAID THAT WE WON'T BE BROADCASTING ON DAY PATTERN AGAIN BEFORE 6am UNTIL JUNE OF NEXT YEAR. OUR STATION IS LOCATED IN SPRINGVILLE, N.Y. WHICH IS ABOUT THIRTY MILES SOUTH OF BUFFALO. WE HAVE THREE TOWERS AND USE TWO DURING THE DAY AND WHEN WE SWITCH TO NIGHT PATTERN WE GO ON TO THE THIRD TOWER AS WELL. AS YOU MAY HAVE GUESSED WE SWITCH OUR PATTERN WHEN THE SUN SETS AND RISES. WSPQ IS LICENSED FOR TWENTY-FOUR HOURS BUT IS ON FROM 5:30am-12 midnight. WE HAVE BEEN ON THE AIR SINCE APRIL OF 1986. WE BROADCAST A THOUSAND WATTS ALL THE TIME, THE PATTERN SWITCH MERELY SHRINKS OUR BROADCAST AREA. LISTEN AGAIN IF YOU ARE EVER IN NORTHERN CATTARAUGUS COUNTY OR RIGHT IN ERIE COUNTY WHERE SPRINGVILLE IS LOCATED. IF YOU DON'T GET THIS WAY, THEN WE WILL SIGN ON AT 5:30am WITH OUR DAY PATTERN IN JUNE AND THEN IN JULY WE DON'T GO ON DAY PATTERN UNTIL 5:45am. AFTER THAT I'M AFRAID IT WILL BE TOUGHER TO GET US. THANK S AGAIN FOR THE LETTER. HAVE A GOOD DAY.

FRED HAIER

Dear Kermit:

My apologies for being so long in getting back to you.

I just wanted to drop a note saying everything mentioned in your letter of 2/10/82 is correct. It was a snowy, slippery morning in the twin-states and WTBQ activated a local EBS. There's one very small correction to make on your records, at the time, our news director was George Dacre, rather than "Baker".

Best wishes & keep in touch.

Dear Mr. Geary:

First of all, I would like to thank you for your reception report.

After examination of station logs and itinerary of our previous proof, I am pleased to confirm that based on the data you provided, you were tuned to 92 WGHO "Where Your Friends Are"!

Please find enclosed a bumper sticker, station profile and coverage map for your records. WGHO operates with 5 kw at 920 kHz DA-1 three towers. Our main transmitter is a Harris Sx-5a solid state, and auxiliary tube-typed Collins 21-E, both 5 kw.

On behalf of the entire staff and management of 92 WGHO, thanks for tuning us in. Good luck in the future!

Very truly yours,

Donald J. Stewart

RADIO RECEPTION VERIFICATION

Dear Mr. Geary:

Thank you very much for your reception report.

(X) We are pleased to confirm your reception of radio station WWWG
at 1460 KHz. on Monday, 29 May, 1978
at 2:00AM (EST) (GMT).

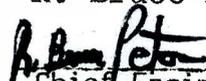

() We regret that due to insufficient information we are unable to
confirm your reception of WWWG. We encourage you to file
another report. Reception reports should contain:

- + The call letters of the station monitored
- + The frequency of the station monitored
- + The date and time period the station was successfully monitored, in GMT or EST.
- + Reception conditions (preferably using the SINPO system), together with identification of interfering stations, if possible.
- + A brief log of programming events monitored, and the times of broadcast.
- + A description of the antenna and receiving equipment used for monitoring.

WWWG operates with 5KW AM day and night. Daytime antenna is a 200-foot series-fed tower with an omnidirectional pattern. Nighttime antenna utilizes three such towers to generate a modified cardioid directional pattern with the major lobe favoring true North and covering 60° of arc.

Thank you for listening to WWWG and for your report. We wish you good DX and 73.

Very truly yours,
R. Bruce Peters

Chief Engineer

Dear Kermit:

This letter is to confirm your reported reception of RADIO STATION W W L E on the morning of November 17, 1969.

You report is of great interest to me and have also received a reported reception from Fairfax Virginia from a Internation RADIO Club DXer.

For your information W W L E is operated on 1170 KH_Z with a power of 1000-Watts.

After talking with some local DXers I have found out that you might be interested in finding out when W W L E does a frequency check. If you would like W W L E does a frequency check the first Saturday in the month, between the hours of Midnight and 1:30Am.

Again I thank you for your interest in your reception, and I must say your log is indeed quite accurate.

Happy DXing

Sincerely yours

Walnutport, PA 18088

Dear Mr. Geary

This is to confirm your detailed report of reception of WTLA,
1200 khz, North Syracuse, NY.

We have had an unusually large response from DX'ers such as
yourself since we took over the operation of this station and
changed it's format to "Unforgettable Radio" on January 15th,
1995.

The station operates with 1,000 watts full time non-
directional days, two-tower directional nights. It received
it's license to operate on 1200 khz in 1991. The station was
originally known for many years as WSOQ, a daytime-only
station at 1220 khz.

We appreciate your comments about our modulation, tone
quality and efficient operation. Much of the audio
processing equipment was built in-house, however, the
transmitter is a new, solid state Broadcast Electronics unit.

Thank you for report.

Sincerely,

David E. Doughty
Chief Engineer

RD # 2
Walnutport, Penna.

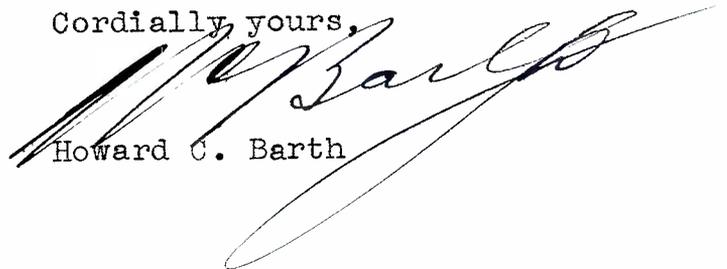

Dear Mr. Geary:

This will acknowledge with thanks your letter of July 23, and will verify your listening check under date of July 22, from 5:30 P.M. to 6:00 P.M., E.D.S.T. of Station WAGE in Syracuse, New York, and transmitter in the town of Salina, on the outskirts of Syracuse.

We are very pleased to learn that you are able to receive our signals so strongly and clearly, and thank you for your good wishes for our success.

We trust we may have your continued listening audience.

Cordially yours,

Howard C. Barth

Dear Mr. Geary:

Thank you very much indeed for your report of reception of WATN on the early morning of January 30th. You heard WATN's very first test which was a frequency check with the RCA Receiving Station at Riverhead, LI. The results of the test were very gratifying, and we started broadcasting on Monday, February 3.

The weather here, at the time of the test, was cloudy with occasional light snow flurries, and the temperature was ten degrees below zero.

If you should hear us again in the future, we would be glad to hear from you.

Thanking you again for your excellent report, I am

Sincerely yours,

AD*RG

Dear Mr. Geary-

5/7/86

Thanks so much for writing on 4/7/86 regarding your reception of W6HQ's proof-of-performance.

Based on the data you provided (which I might add was very complete and impressive!) you were indeed tuned to 92-W6HQ "where your friends are!"

We are 5 kilowatts PA-D. Please find enclosed bumper stickers, profiles and coverage maps of both AM and FM.

Again - Thanks for writing!

Sincerely

Donald J. Stevens CE

Please confirm my reception of station WGHQ, Kingston. I shall be happy to receive your reply, kindly verifying the fact that I heard your broadcast as reported in this letter. Return postage is enclosed for your reply. As proof that I was tuned to WGHQ, I give the following log of program items to which I listened:

WGHQ, 920 kc.; Saturday evening, March 10, 1962,

5:45 to 6:00 P.M., Eastern Standard Time:

5:45 to 5:52 P.M., Concluding portion of a program of Concert Music. The selection being played sounded like Tchaikovsky's Piano Concerto.

5:52 P.M., Concluding program announcement. It was stated that this has been a presentation of Herald Tribune Radio.

5:52½ P.M., Announcement of a party on Wednesday night on the 2nd floor of Montgomery Ward in Kingston. Send your reservations to Montgomery Ward, c/o WGHQ, Kingston.

5:53½ P.M., Advertisement of the 1962 Comet automobile.

5:54½ P.M., Announcement of the News at Sunset, to follow.

5:55 to 5:57 P.M., Latest World News.

5:57 P.M., Weather Forecast. The present temperature was announced as 38 degrees.

Listeners were advised to call Federal 1-5555 for the weather report anytime day or night.

5:57½ P.M., Announcement that the news has been edited in the WGHQ News Center.

5:57¾ P.M., Announcement:

"Now we end our day with a few words of meditation."

5:58 to 5:59 P.M., Closing meditation by the Pastor of Old Dutch Church.

5:59 P.M., Sign-Off Announcement. It was stated that WGHQ operates on an assigned frequency of 920 kilocycles with a power of ~~1000~~ 5000 watts by authority of the Federal Communications Commission. WGHQ is owned and operated by the ----- Corporation, with studios and offices at 82 John Street, Kingston, N. Y.

6:00 P.M., Station WGHQ left the air.

Please compare the above data with your Station Log for Saturday, March 10th, and if my report is correct, kindly send me a reply confirming my reception of WGHQ, Kingston, on 920 kc. Your attention to this request will be greatly appreciated.

Best wishes to you, Mr. Shein, and to WGHQ and its Personnel for continued success in broadcasting. I hope to have the pleasure of hearing your programs again on future occasions. Looking forward to receiving your reply in confirmation of my reception of WGHQ, for which I thank you, I am,

Very truly yours,

Kermit Geary

Dear Mr. Geary:

Thank you for your detailed report of reception of WGLI and its sister station WTFM (FM) - both in Babylon, Long Island.

Your report of such good reception is interesting inasmuch as our transmission is highly directional in east-south-easterly direction. We operate with 1,000 watts of power AM and have approximately 4,700 watts in our major lobe.

Your log coincides with ours exactly, with the exception of our FM call-letters, which as I mentioned, is WTFM.

Thank you again for your interest.

Yours very truly,

William Reuman, Jr.

July 19, 1948

Kermit Geary
Walnutport, Pa.

Dear Mr. Geary;

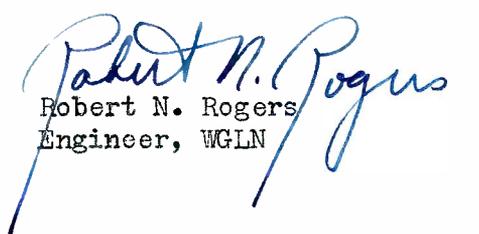

It is with great pleasure that I am able to confirm your report of reception of our station, WGLN and the special broadcast of the Democratic Convention on last Thursday, July 15, 1948. I regret that we do not have QSL cards but hope that this letter will serve. You are to be congratulated for the accuracy of your report and we do greatly appreciate it. I personally handled verification cards for several years for the "Voice of America in North Africa" and rarely did I receive as useful and complete a report as yours.

We are using at present a Raytheon RA-250 transmitter normally rated at 250 Watts but due to license limitations now operated at 100 Watts which is accomplished by voltage dropping resistors in the buffer and final circuits. The modulation circuit is unchanged. We use a Raytheon RL-10 limiter and a Gates 20-B console. All announcements and sign-off were transcribed. The antenna is a single guyed pylon 200 feet high with a radial ground system 200 feet in radius.

I am unable to give you any information as to the date of our increase in power and change of frequency. It is in the hands of the Commission but our new CP is expected in the near future.

Our Chief Engineer, Mr. Worthing and myself both wish to thank you for your excellent report and to wish you the best of luck with your very fine hobby. We have both been engaged in International Broadcast work and therefor really appreciate the work done by listeners such as your self.

Very truly yours,

Robert N. Rogers
Engineer, WGLN

Lake Shore Road
Fulton, New York 13069
(315) 593-1313

May 5, 1989

Dear Kermit,

Thanks so much for the report and verification copies!

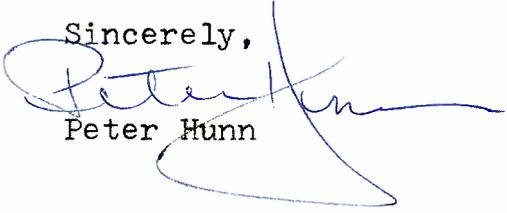

WEXT 1550 was the first station I ever visited. Knowing I was interested in broadcasting, my folks called a number of the stations near our Connecticut home for a tour. All were too busy for such kids... except for WEXT. My Dad dropped me off at WEXT's basement studio, and picked me up some 7 or 8 hours later. Wow, did I learn a bunch about real radio!

The WZZZ I was interested in, was the Boynton Beach, FL 1510. It lost its license in the late 60s. Other than that info, it's a mystery. (WBZY 990 Torrington, CT was another one that just vanished from the airwaves with little remaining info other than "financial woes.")

Your 1949 logging of WOSC emanated from a huge GE XT-1-A 1,000 watt transmitter. It's still in my building, although it doesn't fire-up too well. When I bought WOSC last year (for \$1 for the license) the old GE was the only bit of history left. Your verie makes a nice addition to the "history" file.

Thanks again for your letter.

Sincerely,

Peter Hunn

Robert M. Morris
Radio Facilities Engineer

March 4, 1998

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, Pa. 18088

Dear Mr. Geary:

I wish to thank you for your correspondences, and to confirm that the radio stations operating on the 1630 AM and 1700 AM bands were transmitting from John F. Kennedy International Airport located in Jamaica, New York.

John F. Kennedy International Airport is operated by the Port Authority of New York and New Jersey under a lease agreement with the City of New York since June 1, 1947. JFK is located in the southeast section of Queens County within New York City on Jamaica Bay. It is fifteen miles by highway from midtown Manhattan. The geographic reference points for the airport are: 40° 38' 28.5" north, 73° 46' 41.9" west. The size of JFK encompasses the area from 42nd Street to the Battery within Manhattan Island, or 4,930 acres. Kennedy International Airport is also 12.7 feet above sea level.

The Port Authority instituted the 1630 kHz Station as a Highway Advisory Radio Station in April 1997, and the 1700 kHz Station during September 1997 to broadcast relevant traffic advisories and other information to our customers as they enter and depart the airport. The equipment being used to transmit these messages is the same DR1000A system. This system is an all solid-state multi-message, audio recorder/player with an advanced microprocessor control system that has been manufactured by Digital Recorders, Inc., of North Carolina. The DR1000A was designed by Digital primarily for use as a Highway Advisory Radio broadcast station. The DR1000A can record and play back up to 25 1/2 minutes of audio messages that can be constantly repeated over a long period of time without degrading the audio quality. The station is powered by a 10-watt transformer that is connected to a solar panel system at the site.

Finally, we are returning the stamps that you enclosed for return postage. Hopefully, you will be able to monitor other stations, and be able to forward these stamps to the operator in order that you might receive other letters of verification for your collection. In addition, we are returning the audio-cassette you forwarded, I was extremely surprised to note the clarity of the recordings from these Highway Advisory Radio Stations.

THE PORT AUTHORITY OF NY & NJ

Again, thank you for taking the time to write me regarding your ability to monitor our Highway Advisory Radio Stations at Kennedy Airport.

THE Music of Your Life

January 27, 1982

DX Listening Post
Kermit Geary
R.D. 4, Box 321
Walnutport, PA. 18088

Dear Mr. Geary:

In reply to your letters of October 20, 1981 and December 27, 1981, I am happy to confirm your reception of Radio Station WGRC on Monday, October 19, 1981 from 6:11 to 6:15 P.M. E.D.T. and Saturday, December 26, 1981 from 4:26 to 4:30 P.M. E.S.T., respectively.

WGRC's format is "Music of Your Life", which would include the Big Band Era, adult songs of the 50's, 60's, 70's and some contemporary songs of the 80's. The station's output power is 500 watts directional with a three antenna array system that has a north western pattern. The station has been on the air since December 15, 1977 and has been owned by Rockland Media Corporation since its existence.

All of us here appreciated hearing from you and the time you took out to inform us that we were received so clearly in eastern Pennsylvania.

Very truly yours,

Jon Partyka
Chief Engineer

DX Listening Post
Kermit Geary
R.D. 4, Box 321
Walnutport, PA. 18088

Dear Mr. Geary:

Sorry for the delay in replying to your letters dated October 20, 1981 and December 27, 1981, but hope with the following explanation, you will understand.

I work as the Chief Engineer for WGRC on a part-time basis approximately six to eight hours a week. My full-time job is Jr. Technical Manager of RF Maintenance and Operations for the American Broadcasting Companies (ABC) in New York. I was intensely involved in the New York City Marathon Show, which aired on Sunday morning, October 25, 1981 from 10:00 A.M. to 1:15 P.M. (approximate off air time show ran over). The show involved about 80% RF equipment. There were three separate communications systems, one for engineering, one for production and one for control room directing and several RF microphones and microwaving, which is described below.

Just for a quick summary of the show, we rented four helicopters for microwave relays to the Empire State Building. The lead vehicles were following the runners and were microwaving their camera picture to the helicopter, which in turn sent the signal to the Empire State Building. From there, we had four receivers which were cabled to our studios. Also, there was one back-up helicopter receiver point at the World Trade Center. Along with that, there were also five emergency back-up points along 26 miles, 385 yards of the marathon for the helicopter receiver points. There were also eleven other microwave points along the route for most of the other cameras involved in the show. I had worked over 120 hours that week and got all of 24 hours sleep in eight straight days.

Right after that we started moving the studios and offices of WGRC to Church Street, Spring Valley, N.Y. We are still in the middle of the move, having had other problems develop at our sister station, WLIR on Long Island. Now that the problem with WLIR has been corrected and things are beginning to get back to normal, I am finally able to get time to write to you.

P.O. BOX 1300 99 WEST NYACK ROAD NANUET, NEW YORK 10954 914-623-8500

Page Two (2)

WGRC's output power is 500 watts directional local sunrise (6 A.M. FCC Waiver) to local sunset with a three antenna array system. The pattern of the station is north by north-west. The transmitter is a Gates BC 1G and a Gates Vanguard I is an auxiliary.

Enclosed is some technical information on WGRC.

Very truly yours,

A handwritten signature in blue ink that reads "Jon Partyka". The signature is fluid and cursive, with the first name "Jon" being more prominent than the last name "Partyka".

MEREDITH SYRACUSE RADIO CORP.
LOEW BLDG., SYRACUSE 2, N. Y.

April 20, 1954

Mr. Kermit Geary
R.F.D. #2
Walnutport, Pa.

Dear Mr. Geary:

Thank you very much for your very complete and interesting reception report of WHEN on April 8, 1954, from 6:00 AM to 6:40 AM, EST.

Your log is quite correct in every way and I am pleased to verify it herewith.

Your submitted information is not only unusual but useful. It is not often that our listeners utilize field strength meters!

WHEN's daytime power is 5 KW non-directional, 250' tower, Western Electric transmitter using the Doherty circuit. The nighttime transmitter is a Collins 1 KW, 20K, into a 4 tower array directional north and south. Our audio equipment is basically Collins except for the limiting amplifier which is a GE BA5A averaging 8 DB compression.

Thank you again and I wish you the best of DX!

73,

D. F. Langham
Chief Engineer

Walnutport. Pennsylvania 18088

Dear Kermit;

Yes, you have recieved 1120 WHTT AM from Buffalo. I am sorry to inform you that I don't know the eminated power of WHTT-AM due to the fact that I work there as a log keeper , etc. but my educated guess is somewhere in the vacinity of 30 K Watts. I imagine you are on a high elevation.in relation to Buffalo.Although the transmitter is on an escarpment equal to the height of Niagara Falls in relation to Buffalo, you are probably higher than the transmitter (mean sea level).

WHTT is a top 40 type radio station with a nice slice of the Buffalo radio market. The station boasts morning drive time DJ Sandy Beach, formerly with WKBW- AM which now is WWKB 1520. I'm sure you must get 1520. WHTT is simulcast on FM stereo & AM mono.

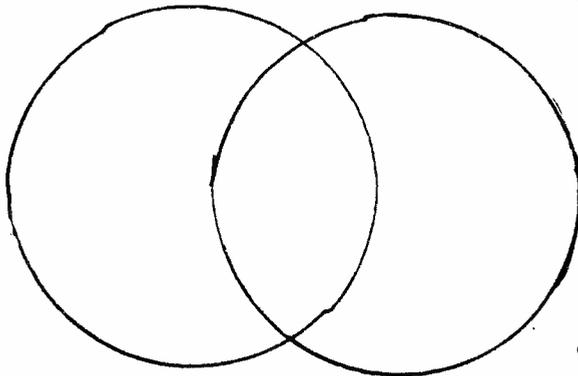

I wish I could give you more detailed info for your collection but the station itself just gave your letter to our engineering group because I guess that they are too busy with production and what not. thanks for the letter. I'm writing this on Christmas Day from my girlfriend's workplace and I hope this holiday season finds you happy and healthy.

Sincerely,

E. Michael Brydalski

5000 WATTS

December 31, 1969

Dear Medium Wave Listener:

Please excuse this "form letter" but as we received quite a few reports we cannot send out individual letters. Let me thank each one of you and the IRCA, NRC, and RCA for your help in making this test a success.

Your reception of WHHO (AM) on Monday, December 15, 1969, between the times of 4:00 and 4:50 AM is hereby verified on (5,000 watts) (500 watts).

In regard to the many questions we have received I will give you a brief profile of our station. It should answer most of your questions.

Our programming is very up tempo MOR, almost bordering Rock. After our AM transmitter goes off at local sunset, our FM stays on to 11:00 PM with wall of music programming. Both transmitters are turned on at 6:00 AM, with the AM transmitter operating at 500 watts until local sunrise. During January, our AM sign off time is 5:00 PM EST. Our AM transmitter is a 1957 Collins 21-E, and our FM transmitter is a 1969 GCA FM-300-D. It replaces a 1946 General Electric that was in very bad shape. Both transmitters are located on top of Meeks Hill, the highest land for miles around. The terrain is very hilly in this area of the country, and our FM center of radiation is 585 feet above Average Terrain. The transmitters are remote controlled by a Gates Remote Control System.

Our Studio equipment consists of a 1969 GCA 8 channel control console in the main studio, with a 1946 General Electric 6 channel dual control console in the production room. We use QRK turntables, 3 tapecaster cart machines, an Ampex AG 440, and an Ampex AG 600 reel to reel tape machines.

We do not conduct regular frequency checks, as we only check our frequency once a year. Our equipment is usually stable to 1 cycle on AM and 250 cycles on FM after a years time.

Some of the locations that received us are listed on the enclosed sheet giving location, power that they heard us on, and any interfering stations.

Again thanks for helping make this test a success. Hope you have a good year.

Riek Jorgensen, C. E.

Dear Mr. Geary:

It gives me great pleasure to verify your reception of Station WHAZ, Troy, New York on Tuesday morning, December 1, 1953. This was the first DX Program WHAZ has scheduled in a number of years. In the Early Days of Radio such programs were conducted monthly. It was very gratifying to receive so many reception reports and letters of thanks on behalf of the National Radio Club.

Good luck with your future DXing.

Dear Kermit,

It is my pleasure to confirm your reception of AM 990 WLGZ, Rochester. The Crawford Broadcasting Company is thrilled to be broadcasting to residents of the Rochester area and to DXer's around the world.

Our positioning statement is "Legends 990, Where Legends Come Alive!" I hope you will continue to search for our signal and discover our "Legends" music.

Please write if you have further questions or comments.

Sincerely,

A handwritten signature in blue ink that reads 'Melissa Patrick'. The signature is fluid and cursive, with the first name 'Melissa' and the last name 'Patrick' clearly distinguishable.

Melissa Patrick
Office Manager

WRSB, 1310 kilohertz;

Friday evening, January 19, 2001,

5:50 to 7:04 P.M., Eastern Standard Time:

5:50 to 5:59 $\frac{1}{4}$ P.M., Program: "Investigative Journal", hosted by David Breshningham. The guest on the program was Dr. Wallace Hahn (?-spelling), author of the book, "The Lights Are On, Is Anybody Home?: Education in America".

5:59 $\frac{1}{4}$ P.M., Announcement, accompanied by music:

"You're listening to 1590 AM, WASE, Brockport-Rochester; 1310 AM, WRSB, Canandaigua-Rochester; and WMJQ, Brockport-Rochester, your Sunshine Network."

6:00 P.M., Announcement:

"It's 6:00 o'clock on the Sunshine Network. Time now for Hour Number Two of 'Investigative Journal' with David Breshningham."

6:00 $\frac{1}{4}$ to 6:59 P.M., Program: "Investigative Journal", Part 2, conducted by David Breshningham:

6:00 $\frac{1}{4}$ to 6:05 P.M., Investigative Journal News Headlines.

6:06 to 6:59 P.M., Investigative Journal, with David Breshningham.

6:59 P.M., Sunshine Network announcement, same as at 5:59 $\frac{1}{4}$ P.M.

6:59 $\frac{1}{2}$ P.M., Program of Christian music:

6:59 $\frac{1}{2}$ to 7:01 $\frac{1}{2}$ P.M., Song: "Standing in the Need of Prayer".

7:01 $\frac{1}{4}$ to 7:04 P.M., Instrumental music.

Please compare the above data with your programming on the evening of Friday, January 19th, and if my report is correct, kindly send me a reply to confirm my reception of WRSB, Canandaigua, on 1310 kilohertz. I would also like to know the transmitter power of the station. Your response to this request will be deeply appreciated.

Best wishes to the Sunshine Network for continued success in conservative religious broadcasting. I hope to hear your programs again on future occasions. I look forward to receiving your reply in confirmation of my reception of WRSB, Canandaigua, for which I thank you.

Very truly yours,

Kermit Geary

Dear Hermit,

We enjoyed receiving your Jan. letter and receiving the news that it was a pleasure for you to hear WRSB on the Lon Shine Network. (Lon - is for the Lord Jesus Christ)

A clean cut and fully modulated signal with excellent tone quality is what we love to hear.

Pa. is a beautiful state, your equipment description signals you certainly know your business. I had to smile about the well connection - the new still needs the old.

Your programming is confirmed. Our transmitter power for WRSB is 1000 for AM/pm. Thank you for the postage and we hope you will be able to hear our programs again on future occasions.

Respectfully,
Shil Reed, secretary

Dear Kermit,

This letter will confirm your reception of Rockland County's Public Safety Residents Information Broadcast Station (PS RIBS) on 1640 kHz that you heard on June 9, 2000.

The programming items you listed are part of our residents' information broadcast and are played on a repetitive basis. Currently we have 11 messages recorded and are working on improving the quality and variety of the messages. In fact we have been working on obtaining a "professional voice" to make some recordings for us. It is our hope that doing so will increase our listening audience.

The station was put in place after Tropical Storm Floyd, which caused much damage to our area and stressed our public information capabilities to its limits. Myself and other members of the Office of Fire & Emergency Services have recorded the messages. Although none of us have any professional radio experience, I think we did okay.

For now our broadcasts are focused on emergency information. However, we have begun broadcasting interesting things about Rockland County.

Thank you for your comments and I hope you will continue to keep an ear for us and let us know how are doing.

Sincerely,

Pablo A. Ramos
Enhanced 9-1-1, Director

Dear Mr Geary,

I hereby confirm your reception of the seventh annual WTBQ DX test, conducted 1 April 2002.

Lynn at IRCA e-mailed me and said that the test was heard by DXers in Burnt River, ON; Toronto, ON (tentative); New Brunswick and Marshfield, LA. (Unsuccessful tries included Spring City PA; Louisiana; Detroit; Alabama; Louisville; Alberta and California (!).)

Previous DX tests have been heard in other parts of Canada, plus Michigan, North Carolina (how he heard it over WBT, I'll never know!) and the Bahamas!

By the way, the songs you heard were "How Long Are You Staying" by the MSR Singers, "Gentlemen Marry Brunettes" by the Spencer-Hagen Orchestra, and "You Good Boy (You Get Cookie)" by the Teen Queens. (These are not songs one is likely to hear on other radio stations, to say the least!)

You've been a member of the NRC for 69 years? Wow!

Dear Mr. Geary:

Many thanks for your letter of December 27, reporting reception of our DX program of that morning. This letter is to verify that WIGS did actually broadcast the program material you describe in your report at the same time.

Most of those who sent us reports commented on the tone tester, which did make it difficult for most to tune in to us. However, I'm very glad that you were able to receive some of our program, despite the interference.

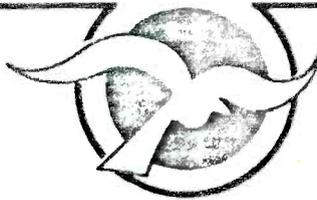

We are very glad that we were invited to run the program and hope that we will be able to work with N.R.C. again in the future.

Again, thank you for your report and for your interest.

Very truly yours,

April 10, 1960.

Chief Engineer,
Radio Station W-Y-S-L,
Amherst, N. Y.

EAB
Chief Engineer
4/14/60

Dear Sir,

I have pleasure in reporting my reception of your Radio Station WYSL during the concluding portion of its regular broadcasting schedule on the evening of Saturday, April 9, 1960. I tuned in at 6:42 P.M., Eastern Standard Time, and continued listening to your recorded program of "Beautiful Music" until you signed off and left the air at 7:03½ P.M., E.S.T. WYSL was transmitting on its assigned frequency of 1080 kilocycles, and put a good signal down here into Pennsylvania despite considerable interference. I am situated in the eastern part of the Keystone State, 60 miles North of Philadelphia and 90 miles West of New York City.

WYSL's signal in this area had excellent strength, S-9, with an input voltage into my receiver of 10 microvolts as measured on the signal-strength meter. Fading was negligible, and there was no atmospheric static. As mentioned above, however, interference was encountered from the 50-kilowatt station WTIC, Hartford, Conn. (only 170 air miles Northeast of my location), which operates full time on your frequency of 1080 kc. Nevertheless, your transmission coming from a greater distance had sufficient power to break through the interference with fairly good clarity (Readability-3), so as to permit the logging of your broadcast at a point this far from the Buffalo area. Your carrier was sharp, clean-cut and fully modulated. The tonal quality of both speech and music was perfect. It was a pleasure to hear WYSL reaching out in such fine shape on this occasion, and I enjoyed the opportunity of listening to your station for the first time since your call letters were changed from WINE. Congratulations on the power and efficiency of your transmitting equipment.

I heard WYSL on my National "HRO" 9-tube communications-type superhet, 1935 model. My antenna is a single-wire inverted "L", 150 ft. long and 30 ft. high, extending toward the Southeast, with the lead-in to the receiver coming off the Northwest end. My ground connection is made to an iron water pump in a well 175 ft. deep. The weather here at the time of my reception was clear and cool, with the temperature at 38 degrees Fahrenheit.

W V I N - AM, 1380 kiloHertz;
Monday evening, March 12, 1984,
6:01 to 6:15 $\frac{1}{2}$ P.M., Eastern Standard Time:

6:01 to 6:05 P.M., AP Network News.

6:05 P.M., The announcer said:

"I'll be right back with WVIN local,
area and state reports."

6:05 P.M., Advertisement of the Bath National Bank.

6:05 $\frac{1}{2}$ to 6:10 P.M., Local, area and state news.

6:10 P.M., WVIN Editorial.

6:11 P.M., Announcement:

"This has been a WVIN Editorial."

6:11 P.M., Advertisement from ACME Markets:

"You have 48 hours to save a lot of
money at ACME's Half-Price Bakeware Sale."
It was announced that Pyrex, Corning-Ware,
Silverstone, etc., are all on sale at one-half
price on Monday and Tuesday at ACME.

6:15 P.M., Sign-off announcement from WVIN-AM, with an
invitation to tune to WVIN-FM, 98.3 on the
FM dial.

WVIN-AM left the air at 6:15 $\frac{1}{2}$ P.M., E.S.T.

Please compare the above data with your programming on
the evening of Monday, March 12th, and if my report is correct,
kindly send me a reply confirming my reception of WVIN-AM on 1380
kiloHertz. Your attention to this request will be greatly appreciated.

Best wishes to you, sir, and to WVIN and its Personnel for
continued success in broadcasting. I hope to hear your signal again
on future occasions when atmospheric conditions are favorable. Look-
ing forward to receiving your reply in confirmation of my reception,
for which I thank you, I am,

200 NORTH AVENUE,
NEW ROCHELLE, NEW YORK
NEW ROCHELLE 6-0800

transmitter: 411 Fifth Avenue New Rochelle, N.Y.

23 March 1959

Mr. Kermit Geary
R.D. 2 Box 298
Walnutport, Pa.

Dear Mr. Geary;

Thank you for your very interesting letter dated March 14, 1959. I have checked your report against our program log and have found it to be correct. I guess that there is really nothing more to add to the previous report.

WVOX operates on a frequency of 1460 kc. with a power of 500 watts to an RCA Type BTA-500M transmitter. The antenna is as follows: 190' uniform cross-section, guyed, series excited radiator, the top 10' being an FM antenna. Ground system consists of 120 radials average length 167' of buried copper wire, plus a 48' square copper ground screen. WVOX-FM operates on a frequency of 93.5 mc. with a power of 1000 watts ERP to a Radio Engineering Laboratories Transmitter Model 518D-DL. The antenna is a Raytheon Model RFW-1A with the supporting structure 190' used as our AM antenna. The modulation system is a Type BA-25A AGC program amplifier feeding a Gates compression amplifier. This insures that we modulate 90-95% at all time on AM whereas the FM feeds directly off the board which keeps the dynamic response necessary to good quality FM transmission.

I guess that you have every thing that there is to know about our station. Once again thank you for your interest.

Yours in DX,

A handwritten signature in blue ink that reads "Edwin T. Karl".

Dear Sir;

Your letter to was greatly appreciated and we were very glad to hear that our signal was so well received.

Its a great aid to have all you fellow radio men take the time and trouble to inform us of the quality of our signal.

Yours in broadcasting,

Albert Cohen

Dear Mr. Geary:

Thank you for your reception report of radio station WINR for Thursday, 26 December 1946. It is correct and surprisingly complete.

We were interested to learn that WINR can occasionally be heard in your section. Here's wishing the best of listening for the coming year.

Adelbert Kelley
Chief Engineer

WXRL "THE VOICE OF MODERN COUNTRY MUSIC
5360 William Street
Lancaster, New York 14086

Dear Kermit :

This is to verify your reception of our station, WXRL, on 2/28/79
at 4:25 P.M..

WXRL operates at 1300 Kh with a power output of 1,000 watts daytime and
500 watts pre-sunrise. Our antenna pattern is a directional figure eight
with the main lobe in a northwest direction.

Sincerely,

~~Robert A. Stone~~

Walnutport, Pa.

Dear Sir:

Thank you for your letter of April 18, 1948 reporting reception of WXRA from 6:22 P.M. to 7:00 P.M. E.S.T. on 1080 kilocycles. Your letter is sufficient to indicate to us that our signal is doing all right, and that you have correctly logged the program material featured at that time.

We are glad to know that our signal is doing so well and we hope that you will continue to listen to WXRA.

Very truly yours,

WESTERN NEW YORK BROADCASTING CO.

Walnutport, Pennsylvania

Dear Mr. Geary:

This will confirm your reception report of our radio station on June 4, 1962, from 3:13 A.M. to 3:22 A.M.

To date, we have had 7 DX reports in addition to yours. We received them from Milan, Michigan; Southport, Connecticut; Walpole, Massachusetts; Pointe Claire, Quebec, Canada; Paterson, New Jersey; and Burlington, Vermont.

It may be of interest to you that we are using a 5/8th's antenna system which should keep our skywave to a minimum. Our power is 500 Watts.

Thank you for your interest in WXKW.

Very truly yours,

Richard O'Connor,
Vice President &
Chief Engineer

Dear sir:

This will verify your report of reception of WXKW from 3:37 until 4:23 AM August 25, 1948. We were interested in your complete report and particularly with your comments on signal strength and fading.

Thank you for your interest and please excuse the delay.

Very truly yours,

Arthur F. Schoenfuss

Box 298
Walnutport ,Pa.

Dear Mr. Geary;

Thank you very much for your report dated March 8,1959.I am very pleased to know that our "peanut whistle" as power in commercial circles,is getting out so well.I deeply appreciate the great pains that you have taken to log us.That is why I put your letter# ahead of the others that I have waiting.I had best explain the stationary.WWES was a temporary call that we chose until the FCC approved our request for the new call.Since approval might have come at any time we deemed it foolish to have new stationary printed.

WVOX operates on a frequency of 1460 kc. with a power of 500 watts and WVOX-FM operates on a frequency of 93.5 mc. with a power of 1000 watts. WVOX,WSKN,WVIP,and pending FCC approval,WVIT all compose the Herald Tribune Radio Network.

The only discrepancy that I found in your report was that you mentioned a spot for Bond Bread.We do not have them as a sponsor however considering your difficulty in hearing us through the "hash" on 1460 I think that you have done a remarkable job of reporting.

Enclosed is some material that we had made for advertising,but,it provides a good history of the network.Once again Thank Yo u.

Yours in DX,

A handwritten signature in cursive script that reads "Edwin T. Karl".

October 8, 1983

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, Pennsylvania 18088

Dear Mr. Geary:

I'm pleased to confirm your reception of WWCN on September 27th, 28th, and 29th, at 7:00 to 7:14 PM, 6:35 to 6:48 PM, and 6:37 to 6:45 A.M., respectively. Your information was quite accurate, and indeed most helpful to us, as was your "SINPO" stats. It is rare that we receive such detailed information, and I thank you for it.

As per your question concerning our pattern and power output, the enclosed coverage map can answer the first part of the question a bit better than myself. As for power output, we have a 3 tower array of 5KW-D non-directional, 5KW-N directional, and our transmitter is a Gates BC5HA.

I must apologize for not being Mr. Chris Devine, the person you'd written to, however because of my knowledge in the area, I usually handle the QSL replies. And for good reason- I too am an avid Dxer, so I couldn't resist passing up your letter!

Again, thanks for writing.

enc.
