Mr. Kermit Geary,  
R.D. 2, Box 298,  
Walnutport, Pa. 18088

Dear Mr. Geary:

Thank you for your letter of July 11, 1964, reporting reception of WEWO's shortwave broadcast of a local ball game. We are grateful for your report, and you can consider this letter as confirmation of your reception, according to the details of your report.

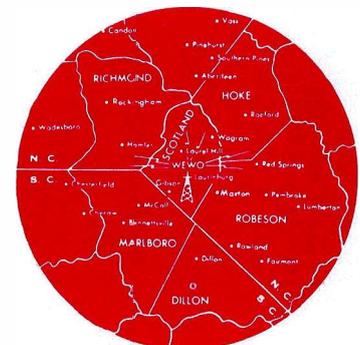

The signals you received were indeed from our portable remote broadcast pickup transmitter, a modified General Electric unit, of early vintage, operating on our assigned frequency of 26.41 megacycles. Call letters of the portable unit are KF-3181. It is capable of an output RF power of 60 watts. It is an FM unit.

Congratulations on your excellent receiving setup. I'm sure you are proud of the receiver itself.

Thank you again, and good DXing.

Very truly yours,

Dear Mr. Geary:

This will confirm your logging of WITN December 30, 1962. Of all the reports we have received in the past yours has been received with the most pleasure. We have just installed a new Gates 5 KW transmitter and we are quite pleased with the results. The day you received us was the second day of operation on the new transmitter.

I'm familiar with your part of the country having spent two years living with an uncle in Doylestown many years ago.

Thanks greatly for letting us hear from you and if you get down this way please stop by.

Sincerely,

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, Pa 18088

Dear Kermit:

We are glad to confirm your DX listening of WRTG/W RTP Garner, N.C.  
on Monday Nov. 21, 1994.

W RTP and its sister station WRTG simulcast. Together they cover the  
Raleigh/Durham Metro market.

Ours is a Contemporary Christian music format with some ministry  
programs like "Focus On The Family".

We pray in the will of the Lord to someday have an FM so we can  
broadcast 24 hrs a day. FM's in our area are very expensive. It will  
be a miracle if we can get one. Perhaps you will pray for us in  
what we are now doing as well as the possibility of FM later.

Have fun DX'ns

Sincerely,

Buddy Leathers, GM

Kermit Geary  
1266 Riverview Dr.  
Walnutport, PA 18088

Mr. Geary:

I am sorry that someone from WRNS did not get back to you before now to confirm your listening on the evening of 12/26/90. Your report, attached, is correct as to what we were airing at the time you were listening.

WRNS-AM is the old WFTC, with both stations now owned by Pinnacle Broadcasting, as of 6/14/89. We simulcast virtually 100% of the time, breaking away on the AM only for such long-form programming as Kinston Indians Baseball, North Carolina basketball and football, etc.

WRNS-AM operates daytime with 5,000 watts and evenings with 250 watts.

Sincerely,

A handwritten signature in blue ink, appearing to read "Roy F. Sova".

THE BROADCASTING COMPANY OF THE SOUTH

104 LIBERTY LIFE BUILDING  
TELEPHONE 6-3511  
CHARLOTTE 2, NORTH CAROLINA

November 3, 1952

Mr. Kermit Geary  
R.F.D. #2  
Walnutport, Penna.

Dear Mr. Geary:

Thanks very much for the report of your reception of WIST on Wednesday October 29, 1952 at 6:00 to 6:15 am. Your report is accurate and you can consider this a letter of verification.

We have received several reception reports from Pennsylvania and New York. Evidently that section of the country is at just the right distance to pick up our sky-wave in the early morning.

Thank you for your interest.

Yours very truly,

John N. Parker, Jr.  
Chief Engineer

March 8, 1983

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, Pa. 18088

Dear Mr. Geary:

Your letter of March 4th has been turned over to me. I am amazed that our signal skipped that far! I also didn't realize there were that many DX'ers out there anymore. Haven't had much DX mail lately.

As you are probably aware, WISP's daytime power is only 1000 watts and at night we reduce to 250 watts as do all class IV AM stations. The other N.C. station you mentioned, WFAI in Fayetteville is also 1000/250. I know cause I worked there also many years ago, from 1958 till 1961.

This is to confirm your reception, as the commercial you heard was for a firm called "Baker Brothers."

WISP has been known for years as WISPy, so it can be pronounced. The Dragnet you heard was part of our WISPy Little Theatre presentation, which airs each weeknight at 5:30--6PM. We feature a different old radio show each night of the week. Monday's it's The Jack Benny Show. Tuesday's Gunsmoke. Wednesdays Fibber McGee & Molly. Thursday we broadcast Dragnet and Friday's it's The Life of Riley. So as you can see, the old radio shows are alive and well here at WISP.

Interesting to read about your listening equipment. Especially the part about the 175 foot well.

Incidentally, you might be interested in the bulk of our programming other than old radio. We are broadcasting a music format called "Hit Parade." It is sort of a unique blend of music from as far back at the mid 40's right up to some of the better music of today. All the way from Frank Sinatra to the contemporary group Air Supply.

Thank you for your interest in WISP.

Sincerely,

Jim Kelso, Operations Manager

VERIFICATION OF RECEPTION

Elizabeth City, N. C.  
November 28, 1939

Mr. Kermit Geary  
Walnutport, Pennsylvania

Dear Mr. Geary:

Thank you for your most interesting letter reporting reception of WCNC on the morning of November 23. The report you submitted checks with our log.

We are using Western Electric equipment, 310B transmitter, 23B speech console, saltshaker microphones, and RCA turntables. The antenna is a Blaw-Knox, onehundred seventy-five foot vertical.

The transmitter of WCNC is located about one mile from downtown Elizabeth City on the outskirts of Disimal Swamp, and about twenty miles from the Atlantic seacoast. Elizabeth City has a population of approximately fifteen thousand, located in the extreme northeastern part of the state, about thirty miles from the Virginia line, fifty miles from Norfolk, Virginia, our nearest large town. Approximately seventy miles South of the City is located Roanoke Island, where the Lost Colony was founded and the first white settlement in America. It was here that Virginia Dare was born.

We again thank you for your interesting letter and offer an invitation to you to visit our transmitter and studios anytime you are in this vicinity.

Sincerely yours,

Nicholas V. Pieler  
Engineering Department

GREENSBORO, NORTH CAROLINA  
June 6, 1942

STATION  
**WGBG**  
980 KC

Mr. Kermit Geary  
R.F.D. # 2  
Walnutport, Pennsylvania

Dear DX Friend:

It was a real pleasure to receive your letter reporting reception of WGBG. We have checked your report against our program and transmitter logue, and find it to be correct. This letter serves to verify your reception of the station 6:01 A.M., EWT, May 2, 1942.

The transmitter and studios of WGBG are located in a new modernistic building designed especially for broadcasting purposes. We are located south of Buffalo Creek,  $2\frac{1}{2}$  miles south of Greensboro proper. Our ground system, which is laid in a low swampy area, consists of 180 radiales, 250 feet long. We have approximately 900 square feet of hardware cloth directly under the tower. The 235-foot Blaw Knox vertical radiator is fed at all four legs. The transmitter is a Western Electric, 1 Kilowatt, type 443-A1. Our speech equipment is a Gates Console, with associated 5-C Speech Racks. Western Electric Combination Vertical, Lateral Pickups are used in connection with two Dual Speed Presto Turn-Tables. RCA Velocity Mikes are used in all studios.

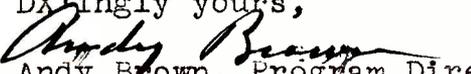

All in all, we believe we have one of the best-equipped and most modern Radio Stations in the South. We are very proud of our coverage, which reports seem to indicate is far better than the average 1-Kilowatt Station.

If at any time in the future you should be passing through Greensboro, do not hesitate to stop by and look over the Studios and Plant. All visitors are assured a hearty welcome. Of course, our control and transmitting rooms are closed to all persons, except employees, due to War-time restrictions. However, each piece of equipment has been arranged so you may view it from a large window from the outside.

At the present time, we do not have a regular monitor schedule. We will be on the air at various times in early hours, for test broadcasts, or frequency check programs. Our regular schedule is from 6:00 A.M. to 7:30 P.M. We will be happy to hear from you at any time with any comments you might wish to make regarding reception.

Again, thanking you for your letter, and with best wishes for a successful season, I am,

DXlingly yours,

  
Andy Brown, Program Director.  
GREENSBORO BROADCASTING COMPANY, INC.

P.S. Mr. Woodard is no longer with us. I hope I have given you sufficient information that you asked for.

Dear Sir:

Thank you for your nice report of reception of WHIT on the morning of December 5th, 3-4 AM EWT. Your report is most accurate and helpful. The report from the greatest distance so far is Des Moines, Iowa and Texas.

This station went on the air in April of this year and is Gates equipped throughout, with the exception of Shure Dynamic mikes, Presto Turntables and a 150 foot Windcharger tower. Transmitter, studios and general offices are located on Highway 17 South, two miles from New Bern. The building is a large modern structure designed especially for modern efficient broadcasting.

Thanks again for your very helpful report. Should you hear the station again sometime, I will appreciate your report of reception. This station conducts regular monthly frequency check with RCA on the second Thursday from 5 AM to 5:15 AM EWT.

Yours very truly,

Walnutport, Penn.

Dear Mr. Geary:

I wish to take this opportunity to thank you for a very complete and valuable report on your reception of WBBO on September 9, 1947. Your log checks with ours, so I am happy to verify your report.

At the time you received us, we were transmitting the first of a series of equipment tests prior to our official opening on September 14.

Our transmitter and studios are located two miles west of Forest City, on highway 74. The transmitter is a composite job, using two 833A's for a kilowatt output. The tower is a 300ft. Wincharger

I hope that you will continue to listen in on 780 kc and visit us if you are ever in this section.

Sincerely

A handwritten signature in cursive script that reads 'Merton Iwerks'.

Merton Iwerks  
Chief Engineer

Dear Mr. Geary:

Thank you for your letter dated January 21st requesting verification of your reception of WRBX.

From all indications, you were in deed listening to WRBX here in Chapel Hill, North Carolina located at 1530 on the AM dial broadcasting at 5000 Watts.

Once again, thank you for your letter.

Sincerely,

Ed Hughes  
Chief Engineer

Dear Mr. Geary:

This is to confirm and to thank you for your DX letter of April 15, 1948. We are glad to hear that our equipment test was succesful in your area. We are very pleased over your report on readability.

We are using Raytheon equipment throughout. The transmitter is a model RA-1000 and the control board a model RC-11. We are using the customary dual turntables, ours being Presto models, and all music heard on the test broadcast came from our Associated Transcription Library and from Records.

We take the air with our formal opening Sunday, April 25th. This is a daytime station and will operate independently.

Thanks again for your encouraging report, and we wish you continued good listening.

Yours Truly,

P.G. Sewell, Mgr.

P.S. That's some rig you have there, Mr Geary.

Dear Mr. Geary,

This is to confirm your reception report of WPGF-AM on 20 November, 1972 during a test broadcast. This test is made monthly on the third Monday morning. Time for the test is 12:20 AM to 12:35 AM however on this morning I started early and used the test tone for some modulation checks. The tone used is 500 Hz. Measurement was made at 12:20 AM of plus 2 Hz. by Van Nostrand Radio Engineering Service in Decatur, Ga. Confirmation of test was made by phone and carrier cut about 12:21 .

We operate daytime only with 1 Kilowatts of power. Enclosed is a map of our approximate coverage.

Thank you very much for your report.

Yours truly,  
Leslie A. Everhart  
WPGF Radio

Dear Kermit,

It was with pleasure that I read of your reception of our signal in Pennsylvania. The log you supplied is correct as stated.

WOOZ is a relatively new station having signed on January 1, 1977. We have been logged by several NRC members, but I believe you are about the most distant to receive us.

Sincerely,

Gregory H. Singletary, President  
Waccamaw Broadcasting Company

January 17, 1983

Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Sir;

I am happy to confirm your listening report of December 24, 1982, Christmas Eve. I was even happier, although surprised, when I checked the Operating Log, and verified the fact that WAME changed patterns at the correct time (5:15 for the month of December Day to Night).

WAME operates on 1480 with 5,000 watts day and night, DA-2. Our daytime pattern looks like a figure 8, with a fatter bottom than top, and the sides are not nearly as compressed as a figure 8 would be. Our nighttime pattern is the nightmare. The pattern is virtually eliminated to the north (there are 5 minor lobes and 6 nulls, the deepest null being on the shoulder of the major lobe, and having no more than 10 watts in it). WAME uses a four tower in line array, and uses all four towers, day and night. In fact, one tower in the night pattern is a negative tower. This means that that tower is receiving the signal from the other towers, and feeds it back into the system, to be redistributed. In our case, that fourth tower has about 250 watts in it, that gets redistributed.

Again, I am happy to confirm your listening report, and the comments about the audio quality were greatly appreciated. If you hear us again, drop us a line, or if you are in Charlotte, please stop by.

Sincerely,

  
Fred Roberts  
Chief Engineer

Dear Mr. Geary:

We should like at this time to confirm your report of reception of our signal at 4:16 A.M. on June 4, 1946.

Your report was very accurate and detailed, and we appreciate the effort which you made in compiling a report of this kind. It is indeed a great service to us.

This station does not regularly broadcast in the early morning hours, although we have an unlimited time permit. Our broadcast day is from 6:00 A.M. to midnight; however, at present, we conduct special frequency tests each Monday morning from 3:00 A.M. to 3:10 A.M., and will continue to do so until our frequency monitor is installed.

Thank you again for your report.

Yours sincerely,

Joseph C. Duncan,  
Chief Engineer.

Walnutport, PA 18088

Dear Sir:

This letter will confirm your reception of <sup>WLXN</sup>WBUY on February 25, 1985 from 1745 Hrs. to 1800 Hrs.

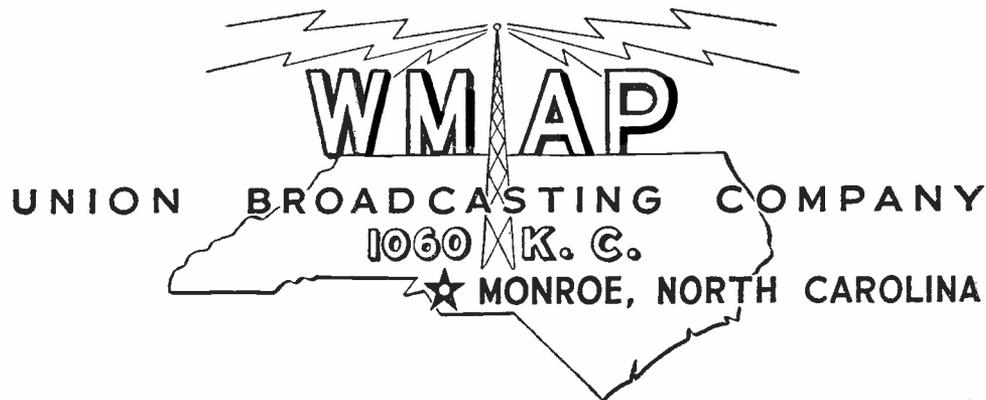

WBUY was established in 1947 and is still operated by the original owners, the Davidson County Broadcasting Company. At the present time our transmitter for daylight hours is a Collins 828E-1 with 5000 Watts output and pulse width modulation. The antenna is a 220 foot guyed tower which also supports our FM antenna for WLXN(FM). During night-time hours we broadcast from a second site 3 miles west of our studios. There we have a Collins 20V-3 1000 Watt transmitter with a three tower directional array, the major lobe to the southeast.

We thank you for your reception report and wish you continued success and pleasure as a SWL.

Yours truly,

WBUY/WLXN *AM-FM*

Allan C. Godwin  
Chief Engineer

November 15, 1947

Mr. Kermit Geary  
R.F.D. # 2  
Walnutport, Penn.

Dear Mr. Geary:

It is indeed a great pleasure to be able to verify your reception of our programs on Sunday morning, November 9, 1947. Your data was exceptionally correct. The announcer signing on that morning was Frank Funderburk. He was greatly amused by your report and promises to enunciate more distinctly in the future.

Here is data concerning WMAP which may be of interest to you. Our transmitter is a Gates 250-C-1. The antenna is a 225' tapered, guyed shunt fed vertical radiator with a ground system consisting of 120 radials 250' long of buried copper wire. The station is housed in one building which includes offices, a reception hall, studios (A, B, & C), and a control and transmitter room.

Two of the station's engineers are amateurs also. The chief engineer, W4RX, and myself, W4KYL, enjoyed your signal strength reports a great deal. W4RX is not active at the present, but I have 100 watts CW with which I work 80 and 40 meters. I am in the process of building a modulator, in order to work 20, 10, and 75. My receiver is an HQ-129-X. (Wish I had an HRO) Your station is indeed an enviable one.

Again may I express the sincere thanks of the entire WMAP personnel for your most interesting letter.

Sincerely yours,

George Sutton,  
Engineer

P.S.

WMAP's operating hours for December will be from 7:15 am to 5:15 pm.

17 October 1987

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Kermit:

This note is to confirm your reception of WZKY as per your log of September 29, 1987.

Our power during the time of your reception was only about 11.5 watts! Considering the power level, we consider your reception to be rather exceptional. We feel that two factors contributed. First, it does not appear that many stations are taking advantage of the pre-sunrise authority granted to stations such as WZKY that have been broadcasting on Canadian clear channels. Second, we are informed by a number of folks that the period of time during late September and early October in critical hours has been one of unusually good "skip" signals.

A few other facts you might find interesting about us...we have a daytime power of 1000 watts and we broadcast in C-Quam AM stereo. We have been stereo since early 1986 and it has been very successful for us. In fact, we have a hard time understanding why many other AM stations have not already converted to stereo. We have two transmitters and we take pride in maintaining state of the art studios with a strong maintenance program.

Thanks for the report, and if you have the opportunity, come visit with us in Albemarle.

Sincerely,

A handwritten signature in black ink that reads 'Bill Norman'.

William Norman, Jr.  
President and General Manager

MADISON - MAYODAN

February 16, 1983

Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Mr. Geary

I was very pleased and surprised to hear from you. 400 air miles is quite a long way for our signal to travel. The programming information you provided in your letter is consistent with the broadcast of Feb. 6, 1983 5:55PM to 6:01 PM. Please consider your reception confirmed.

WMYN is a daytime station, with pre-sunrise authority, giving our station a year-round sign on at 6am with full power. Sign off is at local sunset, this month at 6PM. We broadcast at a power of 500 Watts.

Thank you for your letter and happy DXing in the future

Sincerely

  
Andy Pettigrew  
Program Director, WMYN

Dear Mr. Geary:

We are pleased to verify your reception report of this station from 4:04 to 4:32 AM, EST, on the morning of December 6th, 1947.

Sorry you never received an answer to your previous letter last July. I don't find it in my own letter file and can only assume that it got lost in the shuffle and usual confusion of opening a new station.

Thanks a lot for your interest.

Very truly yours,

RADIO STATION WABZ

Dear Kermit,

In the rush to get the station on the air and operating satisfactorily, I have not been as prompt as I would like to have been in answering several DX reports such as yours. This is to confirm reception by you of our station and we are very pleased that you were able to receive us so clearly. Guess I ought to get a raise. This morning I am down at the transmitter working a shift and trying to keep my eyes open in as much as I opened up this morning and went to a party last night. We should like to hear from you again if you run into us on the air waves again.

Sincerely,

  
John H. Thomas  
Chief Engineer

Walnutport, Pa.

Dear Sir:

With regards to your letter of February 1, 1959, WRMT was on the air from 5:30 A M to 5:40 A M with it's monthly frequency check.

WRMT is a new station just on the air since December 15, 1958. We have all Collins equipment with a 550 A-1 250 watt transmitter and 150 foot antenna.

WRMT is on the air from 5:30 A M until 12:00 midnite, with the exception of Sunday when we are on from 7:00 A M until 11:00 P M.

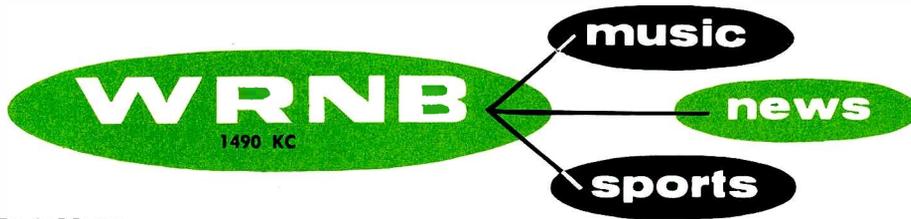

I greatly appreciate your interest.

I remain

DEAR KERMIT,

WE RECEIVED YOUR LETTER THE OTHER DAY AND I AM SORRY FOR NOT GETTING IT OFF TO YOU SOONER, THE ANSWER THAT IS.

WE WERE ON THE AIR AT THE TIME THAT YOU HEARD US AND I WISH WE HAD SOME QSL CARDS PRINTED UP, BUT AM STILL WORKING ON THAT. I AM A HAM AND CAN APPRECIATE YOUR FEELING FOR DX AND THE LIKE, WE DONT GET VERY MANY REQUESTS FOR CARDS OR VERIFICATIONS SO VERY NICE TO GET YOURS.

THE PROGRAM LOG VERIFYS THE GENERAL WHOLESALE AND BUILDING SUPPLY CO. SPOTS SO I GUESS YOU DID GET THIS PEA-NUT WHISTLE AT TIMES. WE ARE ONLY RUNNING 250 WATTS OUTPUT AT PREASNT, BUT HOPE TO INCREASE SHORTLY TO A K.W.

THE NIGHT YOU WERE REFERING TO WAS PRETTY MILD, THAT IS COMPARED WITH THE ONE THAT FOLLOWED. MY EMERGENCY GENERATOR WENT OUT RIGHT IN THE MIDDLE OF HELENE AND WE WERE WITHOUT POWER FOR QUITE A WHILE, BUT FINALLY GOT BACK ON.

WELL I HAVE GROVES OF THINGS TO DO, IT WAS VERY NICE TO HEAR FROM YOU AND SURE HOPE YOU WILL CONTINUE TO WRITE, ITS ALWAYS NICE TO HEAR FROM PERSONS INTERESTED IN THE RADIO GAME.

YOURS TRULY,

WANCHESE, North Carolina 27981

*Serving N. C. Outer Banks from Point Harbor To Cape Hatteras*

# 1530

KC ON YOUR DIAL

To: Mr. Kermit Geary

This is to verify reception of WOBR Radio, Wanchese, North Carolina on the following date and time:

4:47 P.M., November 11, 1970

WOBR is a new station (May 29, 1970) operating on Clear Channel 1530, with 250 watts of power, daytime only, from studios and transmitter one and one-half miles north of Wanchese, N. C., on Roanoke Island, between the Outer Banks and the mainland of the state. We are about 90 miles south of Virginia Beach, Va., and only three miles from the world famous Nags Head and Hatteras Island resort area of the Atlantic Ocean.

We have received reports of clear DAYTIME reception all along the coast from Quogue, Long Island, New York, to as far south as Myrtle Beach, South Carolina. Ships at sea have reported reception of a clear signal as far as 500 miles away. Because of the position of our station on Roanoke Island, we cover a radius of about 80 miles with a strong, clear signal.

We have all new Collins Radio equipment, including a Collins 820-D 1 AM Transmitter.

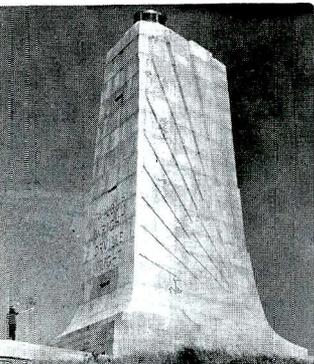

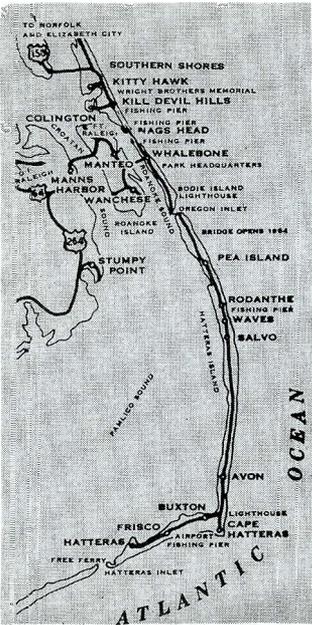

Thank you for your interest in WOBR, and feel free to stop by the studios for the "grand tour" if you are ever in our area.

Yours truly,  
OUTER BANKS RADIO COMPANY

November 21, 1962

Kermit Geary  
R. D. 2, Box 298  
Walnutport, Pennsylvania

Dear Mr. Geary:

We received your reply on our test broadcast of the 29th. of October which stated your ability to receive the program. You were (correct , not correct ) in your statement on the program content.

Our operation consists of a 250 Warr Gates Transmitter, a 120 ft. series fed Non-directional tower. We are presently operating with a Gates Studicette Console, but will shortly install the Yard by Gates. It will give us more versitility in use of our turntables, an Ampex 601 Recorder and a Roberts Recorder, and are using electrovoice mikes.

Since we are new on the air (August 23, 1962), our record library is not sufficiently stocked as we would like to see it. But in time to come we hope the improvement will show through. There is one fact that we think stands out and that is the quality contained in our small selection. Joni James, Percy Faith, Johnny Mathis, Mitch Miller, Bobby Darin, etc. We do not file all the music we get, but what we think is best from each field.

We have five staff members. Ted Boysworth, father of two and Engineer, Jim Hobbs, father of three, Announcer-Salesman, Gene Flowers, single, Announcer-Salesman, Peggy Shreve, Traffic-manager, wife of Bill Shreve, Manager, and they are mother and father to three. We do have a part-time man, Johnny Johnson who is a Junior at Davie County High School. We think we have a fine station for a small community and a fine staff to go with it.

Our Programming consists of Music (popular, Country & Western, Rock & Roll, Gospel, Hymns), Religious programming, Sports, News, Farm School, Public Service.

Why don't you drop in to see us when you are in the neighborhood, and we do hope that you enjoyed our program.

*About 75 Reelz! Thanks for  
your nice comments!*

Dear Mr. Geary,

This letter is to verify your report of reception of station WFAI on March 5, 1952. Your letter checks with our logs.

Pleased to hear of our signal strength in Walnutport on that date.

If there is anything I can do for you at this end of the line, please let me know. Thanks once again for the very nice letter.

Good luck to you and your dx'ing.

Yours truly,

Walnutport, Pa. 18088

Dear Kermit:

This is a letter to confirm your reception of WJIK on January 3, 1982. I am very impressed that our station was received as clear as your report states. At the time of reception we were operating on low power....5,000 watts.

We trust that you have enjoyed listening to our programming of MOR Contemporary Christian Music and await further reports of reception.

Sincerely,

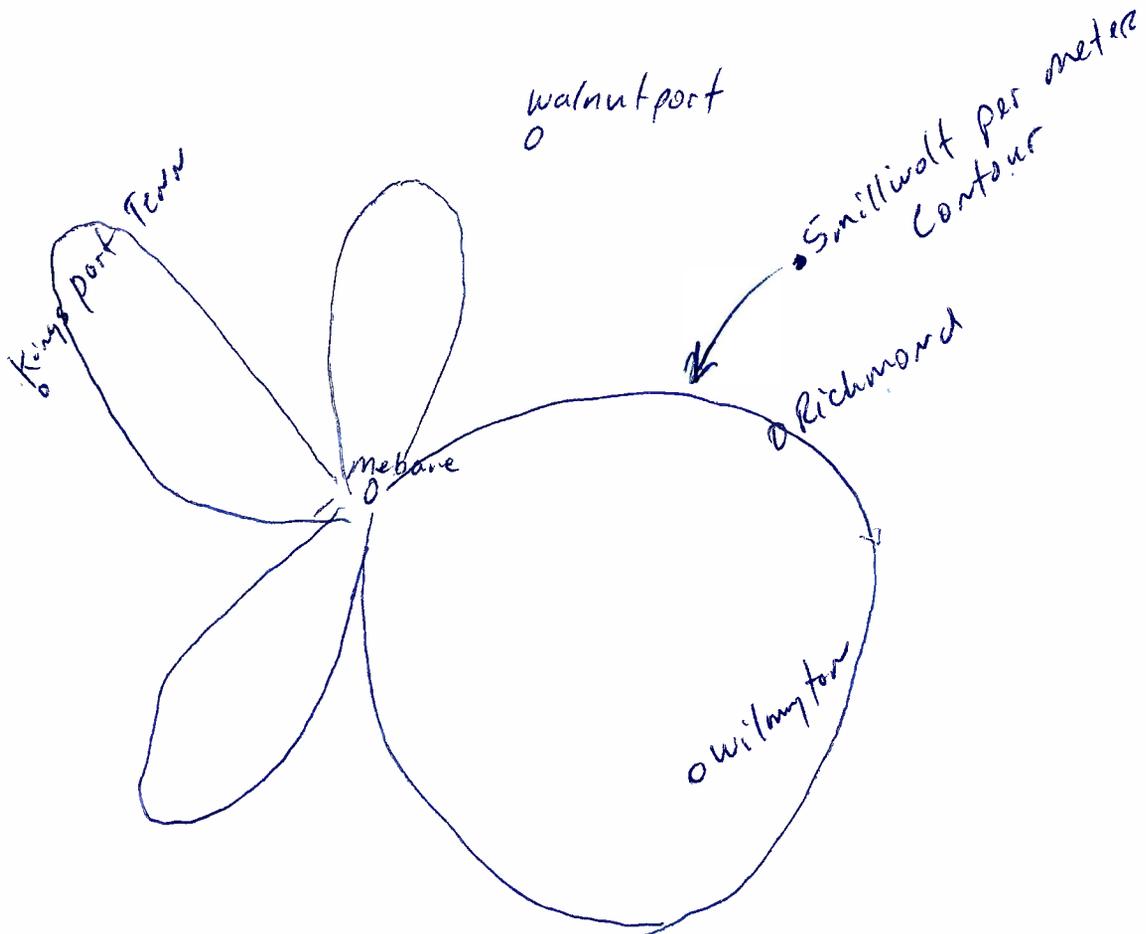

JIM GRZESLO  
MANAGER

JG/ec

Kermit,

As Chief Engineer of WGLH I was very excited to receive your DX Report. The power output at the time you were listening was 500 watts. Kermit we operate this station under what is called Critical Hours authorization (CH) This means that two hours ~~B~~ After sun up we go to authorized power 1000 watts and two hours Before sunset we reduce to 500 watts on this particular Day we signed on at 6:45 AM with 500 watts till 8:45 increasing to 1000 watts till 3:15 PM Reducing to 500 watts till signoff @ 5:15 PM The station operates as a DA-3 (Directional antenna day and night with changing patterns, and an additional pattern change. We are one of the few stations in the USA that operates DA-3. This is because of the critical protection that KYW requires here in this part of the country. We operate a 3 tone Directional array excited by a 1 Kw CCA Transmitter. The array pattern is sketched for you on the next page - This is the pattern we were using

at the time of your reception report

Thanks again Kermit. Also Do you know where I could buy a Hammarland, Hifacrafter or Drake receiver. If you could help me get a line on one of these units I would appreciate it

LYNN CASLER,  
Secretary-Treasurer

Mr. Kermit Geary,  
Route 3,  
Walnutport, Penn.

Dear Mr. Geary:

Thank you very much for your nice remarks about our station. We have worked hard to make it what you say we have. I wanted to answer your letter sooner, but it seemed that I just could not do it. We had some bad luck the morning that you heard us. The HV plate transformer shorted and put us off the air at 3:28 AM. It was Thursday morning of the next week before we could get back on for test. We had to have it rewound.

I know you are interested in the equipment we have so I'll give you some dope on it. We have a Temco Model 250 GSC Communications Transmitter, modified for Broadcast service. We also have a REL Console and a Raytheon RL-10 Limiting Amplifier. Our tower is a triangular welded, uniform cross section Fisher 275 ft. high. On top of this guyed tower is a REL Model 642 3-bay FM Antenna which is 14 ft. and 11 in. above the top of the AM tower. Our FM station WSIC-FM is 96.5 mc. 1000 watts power. We use an open-wire transmission line to the tower and the same to the top of the tower to the REL Antenna. The FM coupling unit I made up of copper  $\frac{1}{2}$ " tubing—two section 3" apart on centers and shorted at one end with the transmitter line to one section and the FM Antenna line to the other. These two sections are about  $\frac{1}{8}$ " apart. Our antenna resistance measured 900 ohms without the FM coupler—with it 285 ohms.

Before I forget it, I want to confirm the fact that you were listening to our station WSIC when we were on the air for frequency check.

Cordially yours,

T. K. Abernethy,  
Chief Engineer

February 22, 1983

DX'ers:

Sorry for the delay in a response to letters we received following the test on January 31, 1983. Seems like letters just kept coming in. Most of the letters came from listeners Northeast of North Carolina. Distant locations included Florida, Texas, Oklahoma, Nebraska and several letters from Canada.

It was interesting to note the difference in reception from listeners located close to each other. Many listeners reported hearing the test clear enough to copy everything word for word while others could only name a song or pick out a word here and there. Most DX'ers noted interference from XEQ in Mexico. All DX'ers who sent us letters did mention something which proves it was WKYK they heard. This letter confirms the reception of WKYK on January 31, 1983. The test was conducted from 7:30am until 2:00am EST and consist of pop music with Id's after each selection and 1,000 hertz tones several times during the test. The test was conducted with a power of 5,000 watts, non-directional using a Continental Electronics type 315R-1 Power Rock transmitter. WKYK operates daytime hours on 940 khz with 5,000 watts, non-directional and 250 watts nighttime with directional antenna. Two of the three towers are self supporting and one is a guyed tower. All three towers are folded unipole fed towers 206 feet tall. WKYK programs Country music through the day and beginning at 6:00pm soft rock music at night and is presently on the air from 6:00am to 11:00pm, Monday thru Saturday and 7:00am to 10:00pm on Sunday and is automated with a Cetec 7,000 broadcast computer.

One of the most interesting letters we received was from William J. Prater, an inmate at a U.S. Penitentiary in Terre Haute, Indiana. He copied a good signal using a G.E. Superradio model 7-2880 with a built in antenna and it was battery operated.

We believe WKYK is a very unique radio station especially for a small market (Town 1500 people, County 16,000) 30 miles from Metro-Asheville. I have enclosed some information about the station that you should find interesting. Many listeners requested bumper stickers and other promotional items. However, we just recently finished a promotion giving away \$9,400 in cash and prizes and do not currently have any bumper stickers or other promotional materials on hand.

Thanks again to everyone who tuned us in. If you are ever through the mountains of North Carolina be sure to stop in to see us.

Sincerely,

*Michael A. Sink*

W L A S World's Largest Amphibious Station

---

JACKSONVILLE, NORTH CAROLINA

Kermit Geary  
Walnutport, Pa.

Dear DX Fan:

This is to verify your report of reception of Radio Station W L A S. We were on the air from 3:30 AM until 5:00AM Eastern Standard Time on the morning of December 13, 1954 with a special DX program.

The program was conducted by Pfc Tom Cooper of the U. S. Marine Corps stationed at nearby Cherry Point Air Station. He is the son of the well known DXer, Dick Cooper of Kittaning, Penn.

W L A S is located just outside Jacksonville, N.C., and about five miles from the main gate to Camp Lejeune, N.C. --- The World's Largest Amphibious Station. Approximately 50,000 Marines are stationed at Camp Lejeune, the home of the 2nd Marine Division.

Our equipment is Gates throughout, feeding a 250 foot tower. Antenna current is 5.22 amps from 2600 volts and 610 milliamps on our 833A's in the RF final.

For your information, W L A S is on the air for frequency measurement at 4:50 Eastern Standard Time on the morning of the first Friday in each month.

Thanks for your report, and maybe sometime in the future we'll be able to provide you with another DX broadcast so that other DXers will be able to add W L A S to their list of verified stations.

Yours for better listening,

Tancil A. Horne  
Chief Engineer

December 21, 1953

Mr. Kermit Geary,  
R F D #2,  
Walnutport, Pa.

Dear OM,

This will acknowledge the receipt of your letter of December 16 in reference to your reception from our station on that date.

We are very happy to verify your report, in toto, and appreciate your informative description of our signal and its quality.

WLSE first hit the air on May 17 of this year. We are 250 watts, full-time, with Mutual network. We have had quite a few reports from other members of the National Radio Club. Being an old-time ham, for many years, the writer knows what pleasure verifications bring. It has always given pleasure, in working ham radio, to QSL whenever requested; of course, also, many went out but were not replied to, hi.

Thanks again for your letter. Here's the very best of holiday wishes to you and the NRC.

Sincere 73

W. D. Tabler (ex W8-now  
Chief Engineer W4AYG)

Dear Mr. Greary:

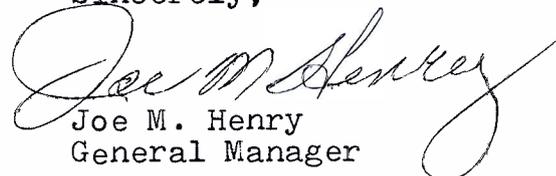

In reply to your letter concerning the confirmation that you picked up our signal from Franklin, North Carolina is correct. We are 1480-WLTM and am surprised also to hear that our signal can be heard so far away. The following information will fill in any questions or words you may have missed concerning our sign off.

The announcer on the air at the time was Keith Curtis, asking everyone to "Get out of bed in time to shine with Ron Franklin tomorrow." He added the weather and "May God bless you and keep you is our prayer". 5:27 is your sign off: "This concludes another broadcast day for WLTM in Franklin, North Carolina. WLTM is owned and operated by Mountain Broadcasting Company and serves you from the Highlands Road at the Franklin overpass. We hope that you have enjoyed our programming for today and will join us tomorrow morning when WLTM will again return to the air. On behalf of the management and staff this is Yvonne Rogers, bidding you a very pleasant good evening!" Then the "Star Spangled Banner" closes us out.

WLTM is 1480 kiloHertz, is a 5000 W-D station.

Thank you very much for your nice letter and feel free to write us at any time, just to keep in touch.

Sincerely,

  
Joe M. Henry  
General Manager

Walnutport, Pa.

Dear Kermit,

Thank you so much for your very fine reception report of our frequency check transmission of last Saturday, March 17. It was about the most complete that I have ever received here or at any other station where I've worked. Your log was, as close as I can remember, word for word as I transmitted it. It is gratifying to know that our KW is doing so well.

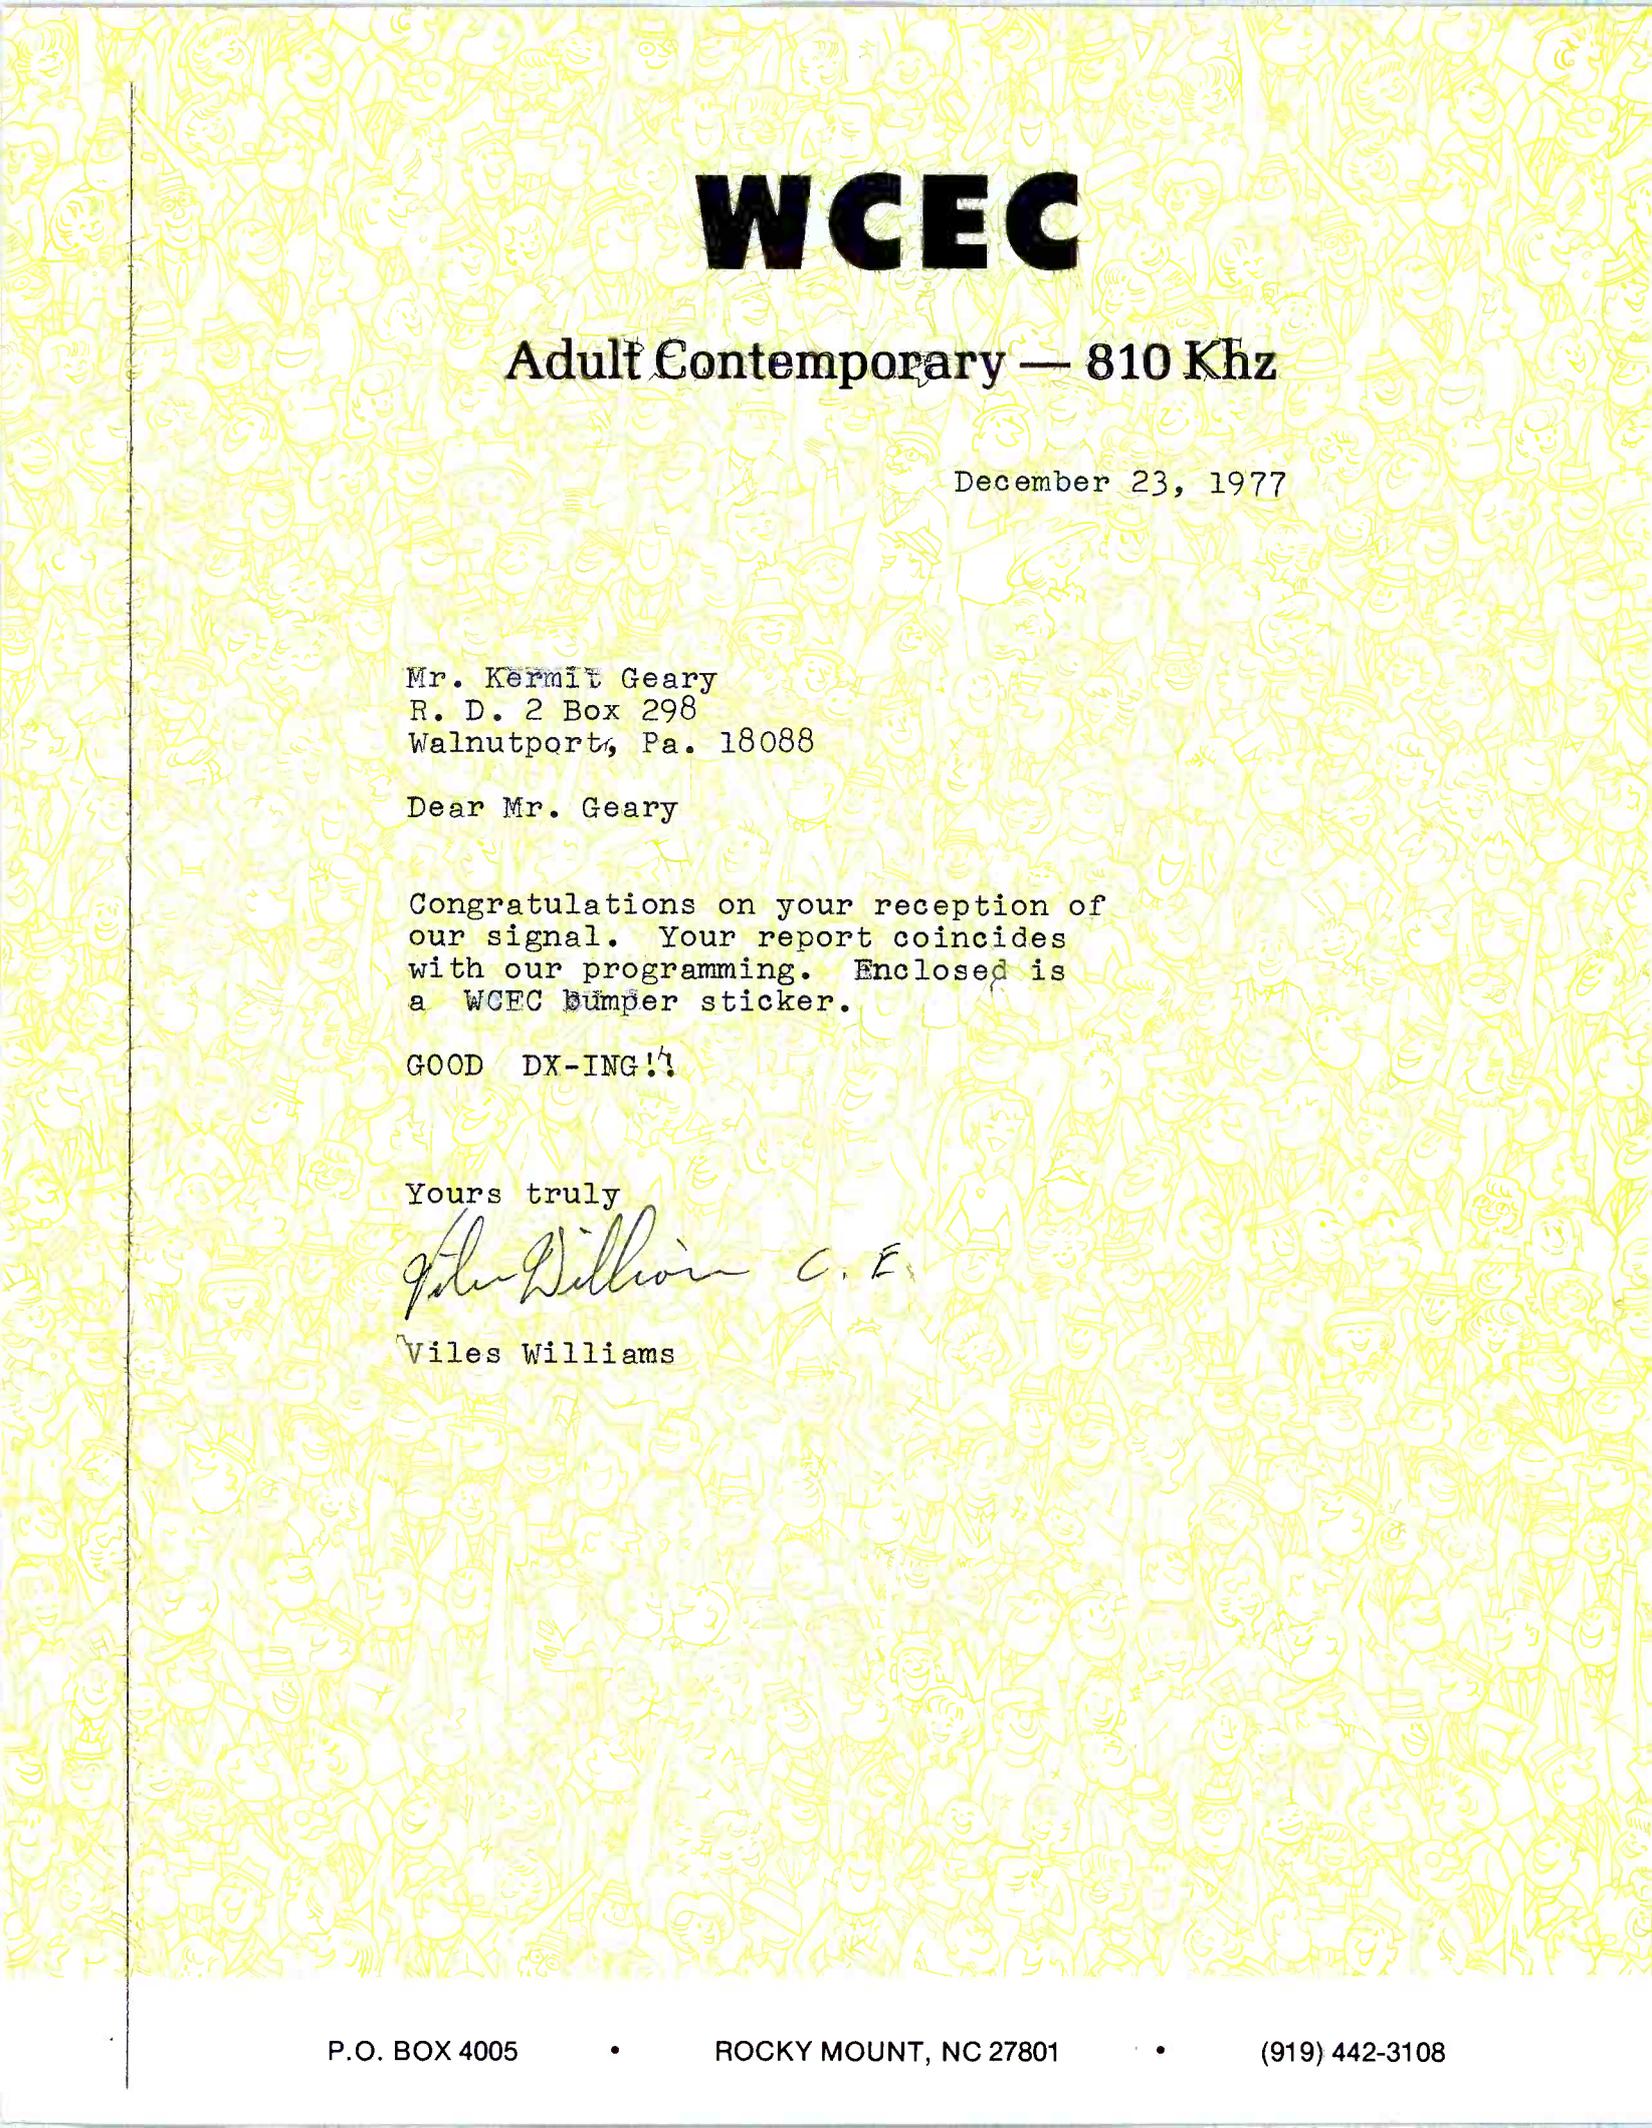

We are comparatively new in the broadcast industry, having officially signed on the air last November 19. So far we are doing pretty nicely, and the future looks nothing but better.

We conduct frequency test broadcasts the third Saturday of each month, and I hope you will listen for us again.

Thank you again for your very nice and welcome letter.

Sincerely,

  
Douglas E Ames  
Chief Engineer

December 27, 1982

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Kermit:

As per your QSL of November 26, 1982, confirmation is hereby given on your Thanksgiving Day reception of WKGX Radio. In reciprocation, we are quite pleased with the clarity of our Skywave as far away as Walnutport, and you are to be commended on your high quality equipment.

Although I was not employed by WKGX at the time of your reception, the format of the newscast follows what you heard. Highway 321, Hudson, and Icard are in our coverage area, and Bob Brown is one of our news stringers. In addition the script you enclosed of our sign-off almost matched our sign-off format word-for-word, so that more than confirms your reception. Broadcast of "The Lord's Prayer" was originated by us, and we were operating at 2500 watts (critical hours) at your reception.

WKGX Radio is an adult-contemporary station which has been on the air since 1969. Most people in Lenoir and Caldwell County know WKGX as "TOP GUN" by our slogan starting during our country days. WKGX has been operating at 5000 watts (2500 watts CH) since 1979.

Once again, thank you for your QSL. Enclosed is a coverage map for your study, and I hope that one day while you're DXing you may again pick us up.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Alan McPeck', written in a cursive style.

Dear Kermit:

Thanks for the very nice report on our signal on February 21 between 3:30 and 4:00 AM. I am very glad to verify your reception on the "HRO" and the 150 ft. antenna. Thanks too for the signal strength of 25 microvolts CKVL must be pretty powerful, got reports of their signal from all over.

Best regards.

Sincerely yours,

A handwritten signature in cursive script that reads 'Art Humphrey'.

Dear Mr. Geary:

Thank you for the information submitted in your letter informing us of the reception of our station during equipment tests.

W.K.J.K. is a new station with studios and transmitter located on Highway 321-A, Lovelady Township, Caldwell County, Granite Falls, North Carolina.

Our format will consist of news, local community events and music (pop, country & western and gospel). We have no network affiliation at this time.

Our transmitter is a Gates, Type BC-1-T (reduced to 500w.) The antenna is a 150' (153' overall height) uniform cross-section, guyed, series excited, steel tower and our ground system consists of 120 radials 156' long and buried four to six inches.

We are operating on 1580 KC with an output power of 500 w. with a non-directional antenna.

Further information upon request.

Thank you for your interest and information.

Yours truly,

C. C. Weymer  
Chief Engineer

Dear Mr. Geary:

Thank you for your reception report. We are pleased to confirm that you did receive WLLL (AM (FM) on Thursday, September 30, 1971, from 7:25 p.m. to 7:30 p.m., (Eastern Standard Time (Eastern Daylight Time).

WLLL-AM operates on 930 kilohertz with 5000 watts non-directional power output from local sunrise to local sunset, and is also authorized to operate from 6:00 a.m. local time to local sunrise with 500 watt non-directional power output.

WLLL-FM operates on 98.3 megahertz with an effective radiated power of 3000 watts, polarized horizontally and vertically, and an antenna height of 240 feet above average terrain. The antenna is side-mounted at the top of our 345' AM tower.

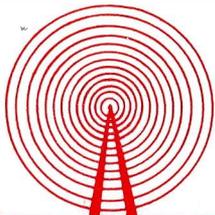

Our studios and transmitters are located two miles west of Lynchburg, just north of U. S. Route 221 (formerly U. S. 460 West).

Thanks again for your report, and your interest in WLLL.

Sincerely yours,

David R. Freer,  
Chief Engineer

Dear Sir:

In reply to your letter of March 13, 1948, This confirms your report of transmissions by Radio Station WLOE. The report is correct with exception of the power which is 100 instead of 200 watts as you understood. We appreciate your interest in sending this report and hope you will be able to log this station again in the future.

October 29, 1987

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Mr. Geary:

Thank you for your report of reception of WLXN.

This letter will verify your reception as logged on Saturday, October 24, 1987 from 5:59:30 PM to 6:11 PM.

WLXN broadcasts with 5000 Watts Day and 1000 Watts Directional Antenna Night. We use separate locations for each mode. Our daytime plant is at our studio on Business I-85 Northeast of Lexington. It uses a 220 ft. guyed tower fed by a Rockwell 828-E1 transmitter of the pulse width modulation type. The night-time plant is about 3 miles west of the daytime plant and consists of a three tower array with the main lobe directed to the Southeast over the city and uses a Collins 20-V3 one kilowatt transmitter, plate modulated.

Thank you for your comments on our signal quality and I hope you continue to enjoy radio, particularly ours.

Yours truly,

Allan C. Godwin  
Chief Engineer
