BAIE-COMEAU, OCTOBER 7TH, 1994

MR KERMIT GEARY
1266, RIVERVIEW DRIVE
WALNUTPORT
PENNSYLVANIA, U.S.A.

DEAR MR GEARY,

I MUST TELL YOU FIRST THAT I HAVE VERY GOOD NEWS FOR YOU.

AFTER YOUR VISIT TO OUR RADIO STATION LAST SUMMER, WE TALKED TO AN EX-ANNOUNCER WHO WORKED FOR CHLC AT THE SAME TIME YOU RECEIVED A SIGNAL FROM CHLC IN 1971.

I AM HAPPY TO TELL YOU THAT HE CONFIRMED IT REALLY WAS CHLC-580 THAT YOU HEARD THAT NIGHT. HE SAID THAT THE ANNOUNCERS USED TO PLAY RECORDS OF FRENCH CANADIAN STAND-UP COMICS, WHICH EXPLAINS THE LAUGHS AND APPLAUDS YOU HEARD.

I WISH SOMEONE COULD HAVE ANSWERED YOUR LETTER IN LESS THAN 23 YEARS, BUT AS WE SAY : "BETTER LATE THAN NEVER".

I HOPE THIS LETTER FINDS YOU AND YOUR WIFE IN GOOD HEALTH AND THAT YOU ENJOYED YOUR VISIT IN OUR REGION.

YOURS VERY TRULY,

MADELEINE ROSS (ANNOUNCER)

Mr. Kermit Geary
R.F.D. " 2
Walnut Port,
Penn. U.S.A.

Dear sir:

Thank you very much for your nice letter of January 21st, 1952, I was very glad to receive it.

I appreciate very much your report; I might add, it baffles me. Our station at night directs its waves completely in north of Quebec. Coming Back to your letter, you were positively listening to CKVM, operating on a frequency of 710 kilocycles, and 1,000 watts.

The day mentioned on your letter (January 20th, 1952) and the following log of the programs, are a good proof that you were really listening to Radio Station CKVM. The french announcer was Mr. Marcel Ladouceur.

We are the only french station in North America, to broadcast on 710 kilocycles. "ici Radio Temiscamingue" is our french identification at Ville-Marie, P.Q. Any way, your report checks out o.k. with what we really broadcasted.

Here are some notes on our equipment. We have on hand a Gates Transmitter BCLF power 1000 watts, non-directional on day and directional at night, time operation, pitching in north-western Quebec and Ontario. We also have three towers 233 ft; 900 ft above sea level. The transmitter is situated at a quarter of a mile from the Ottawa River, and two and a half miles at the east of the station. Ville-Marie is a little town of about 1500 peoples, but with our 1,000 watts, we have over 200,000 listeners.

So, once again, we thank you. Your report was very much appreciated, and we hope to hear from you very soon if you tune on us again.

Cordially

Radio Temiscamingue, Inc.

Raymond Bilocq,
Chief Engineer.

February 28th, 1955.

Mr. Kermit Geary,
R.F.D. no. 2,
Walnutport,
Pennsylvania, U.S.A.

Dear Sir:

I acknowledge receipt of your DX report and I thank you very much for it. We are glad to know that you were pleased with our special DX program dedicated to the members of NRC and NNRC.

The informations you sent us back will be very useful to our engineering department which will make a thorough analysis of the contain. You and most of the DXers noticed some interference caused by Station XEQR or XEQK in Mexico City, also operating on 1350 kcs. According to the majority of the reports made by DXers, we finally came up to the conclusion that XEQR or XEQK might have occasionally been as strong or stronger than our own station, but also that some of you DXers probably got mixed up by our Spanish announcements also made occasionally through our whole program. Of course it also depends on the strength of our signal in your own locality compared to XEQR's or XEQK's.

Anyway, your report was right in all its extent and we thoroughly controlled the details therein as being correct.

Consequently, many thanks for the wonderful cooperation brought to make our test program a real success and best wishes to you personally,

Yours very truly,

Dear Sirs:

It was a pleasure to have received your letter regarding your CJRP reception report.

According to our station logs your description and air schedule correspond exactly, for which we offer you our compliments.

Our transmitter is a Gates B C 10P, 10,000 watts. We operate 24 on-air hours per day on a directional radiation pattern towards north-east.

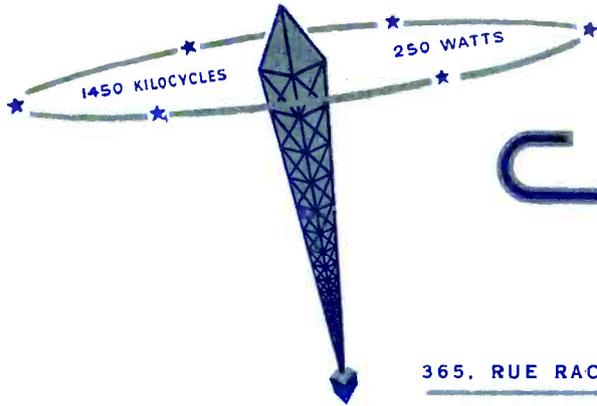

Our frequency of course is 1060Kcs, and our towers are located in St-Nicholas Station, about 10 miles from our studios; we have three 250 feet towers with bases located 300 feet above sea level.

Hoping that you find this information to your complete satisfaction, we look forward to your Quebec City visit.

Sincerely,

*NORMAN KNIGHT

Mr. Kermit Geary,
Box 321,
Walnutport, PA.

Dear Mr. Geary;

As you can understand, we like to reply to DXer's since their reports are of interest to us, regarding the whereabouts of our signal. I don't know why your previous letter was unanswered, unless we did not receive it. Anyway, delighted to hear from you (again?).

As I mentioned to your fellow club member, we have just moved our transmitter site so your reports are especially valuable now. We have two AM licenses (unique in Canada) in relatively the same back yard, and both stations radiate from the same towers. CJMR is a daytime only operation while CHWO goes 24 hours.

We have been in the process of proving our new patterns and having troubles in one location where the signal was supposed to be cut back, but appeared on the meters stronger than ever. The trouble was finally located in a concrete bridge, braced internally with steel. The bridge apparently is reflecting our signal into what is supposed to be a null. Our engineers, in co-operation with the Department of Transport, Dept. of Highways etc. etc., are now tuning the bridge so it will not pick up our signal, and bounce it.

Thanks again for letting us know CJMR is in Walnutport.

Sincerely,

Barry Morden
Program Manager

Quebec City, March the 30th 1960.

Mr. Kermit Geary,
R.D. 2, Box 298,
Walnutport,
Pennsylvania,
U.S.A.

Dear Sir,

We received with great pleasure your letter dated March 7, showing that our station reached you, in Walnutport.

The description of the signal strength your give us means that the signal, at that time, was very good. Of course, we cannot assure you of a continuous good signal, because your location is quite far from here, and away from our normal radiation pattern direction.

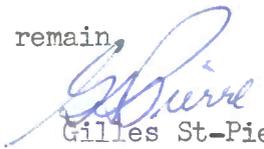

We are operating on 1060 Kc/s, with a power of 5000 watts, and a directional radiation pattern directed towards a line 60° East of True North.

According to our program logs, the description you are giving us about our programs is right, and we are sure you were actually tuned to our station.

We are enclosing herewith a copy of our contour map which indicates our coverage to a certain extent. Our signal goes much further away, as you know, but our basic territory is the one indicated.

We are sorry for the delay in answering to your letter, but finally we could find a few minutes to do it. It was a pleasure.

Hoping to hear again from you, we remain,

Gilles St-Pierre,
Chief Engineer,
CJLR STATION.

Dear Mr. Geary:

I was quite pleased to receive your letter dated October 26th., in which you report reception of our Radio Station CJLM during its regular program schedule during two mornings.

I am proud to hear that quality was good at 390 air miles from Joliette, and your complete report proves that you really tuned to CJLM on Thursday, October 25th and on Friday, October 26th 1973.

I accept on behalf of our radio station your congratulations for the power and efficiency of our transmitting equipment. Our consol is a McCurdy, 10 channel, model SS-4360 and our transmitter RCA BTA-10U 10K watts.

We surely hope you will be able to hear us again in Walnutport, Pennsylvania, and I thank you most sincerely for your kind letter.

Yours very truly,

Pierre Cardin,
Technical Director.

Dear Mr. Geary,

Thanks very much for your letter of August 16, 1956. We are happy to hear that you are picking up a good signal from cJET at Walnutport, Pennsylvania. This will verify that your log of our programming from 7:58 to 8:15 $\frac{1}{2}$ p.m., Wednesday, August 15, 1956, is correct in every respect.

Again, thanks for writing.

Yours sincerely,

Radio 1070, cJET.

Dear Mr. Geary,

I am glad to confirm your reception of CHRS on the afternoon of Wednesday, January 16, 1957. Your description of the programs you listened to concords with our log.

We are indeed pleased but surprised of putting a pretty fair signal so far in the United States.

You may be interested to learn, prior to an official announcement coming from the National Radio Club, that CHRS will conduct a special DX test program on Monday, February 18th 1957, between 4.00 and 4.30 a.m. I hope you will be able to listen to it. Thanks again.

Yours truly,

Bernard Turcot

Mr. Kemmit Geary
Walnutport
Penna. U.S.A.

Dear Mr. Geary,

This is to acknowledge with great pleasure your report on our DX Program transmitted from our Station on the morning of the 14th. inst., from 4.30 am. to 5.30 am. We are glad to inform you that the musical selections, songs, etc., as reported are in conformity with those inscribed on our program. As further confirmation, we submit for your perusal a copy of our complete program.

Contrary, however, to the belief of the majority of those who have sent in reports our Station operates with a power of 100 watts only, though we have hopes to increase it to 250 watts in the near future.

We wish to thank you for the technical details which you have given us. These details should prove to be useful.

You will no doubt be pleased to hear that we have received to date some 30 reports from various places in the United States as well as a few from parts of this country. (list is attached herewith).

In conclusion, we should like to say that this has been a most interesting experience and we shall look forward to participate in another DX Program at the request of the National Radio Club, particularly if, and when we have increased our power to 250 watts.

We take the opportunity to invite you to visit Sorel and our Station, should you have the occasion at some future date to be in this vicinity.

With Cordial thanks,

Yours very truly,

Radio Station C J S O.

CHRL, 910 kiloHertz;

Monday night, 2 December, 1974,

~~08.05~~ 8.05 to 11.16 p.m., Eastern Standard Time:

~~08.05~~ 8.05 to 10.26 p.m., Play-by-play account of the hockey match between the Montreal Canadiens and Atlanta, in

~~08.05~~ 10.32 p.m.: Announcement by the male announcer (in French). /French.

~~08.05~~ 10.32 $\frac{1}{2}$ to 10.34 $\frac{1}{2}$ p.m.: Popular song in French by a vocal group.

~~08.05~~ 10.34 $\frac{1}{2}$ p.m.: Announcement by the female announcer (in French).

~~08.05~~ 10.35 to 11.00 p.m.: Program of popular recorded music. The program consisted of music and songs by various musical groups and vocalists. Announcements by the female announcer were heard occasionally.

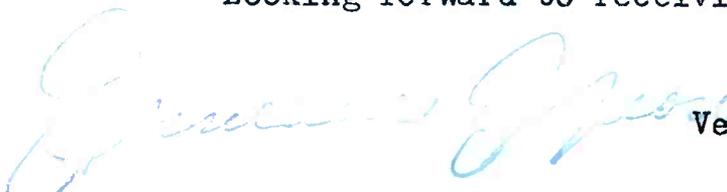

~~08.05~~ 11.01 p.m.: Announcement by the male announcer (in French).

~~08.05~~ 11.01 to 11.16 p.m.: Continuation of the program of popular recorded music and songs by popular vocalists and rock groups. Announcements were heard between selections.

Further reception was blocked at 11.16 p.m. by interference from CKLY, Lindsay, Ontario, on 910 kiloHertz.

Please compare the above data with your program schedule for the night of Monday, December 2, 1974, and if my description of your broadcast is accurate, kindly send me a reply confirming my reception of station CHRL on 910 kiloHertz. I would also like to know the power output of your transmitter at the time of my reception. Your attention to this request will be greatly appreciated.

Best wishes to you, sir, and to CHRL and its Personnel for continued success in broadcasting. I hope to be able to hear your station on future occasions when atmospheric conditions are favorable. Looking forward to receiving your reply, for which I thank you, I am,

Very truly yours,

Dear Sir,

I'm sorry for the delay I took to answer to your letter. I am chief engineer for 10 radio stations in Quebec and I am very very busy. I am a technical consultant and I have included ^{to you} my business card. Quebec city is a very bold one discovered in 1534 by french people and that's why people talking french are about 95% of the population.

The output power of CFLS transmitter is 10 KW and the model is MW-10A from Idaris. This transmitter has been built by an american company (Idaris) in Quincy Illinois.

I confirm you that your report is correct concerning the reception of CFLS on 920 KHZ.

Je t'ai inclus quelques petits affiches publicitaires utilises par CFLS.

Bonne journée

Royal Canadian Air Force
Senneterre, Quebec

March 23, 1964

Kermit Geary (18088)
R.D. 2, Box 298
Walnutport
Pennsylvania, U.S.A.

Dear Mr. Geary:

We were very pleased to hear from you once again. We would like to thank you for your patience in waiting for a reply from us. The reason for the delay was because there was a big change in the staff of CFSE. Our Manager, Chief Announcer, and our Secretary were all changed. In the change, there was a misplacement of many DX Reports, yours being one of them. But, now we have straightened nearly everything out and have started to reply to you and your fellow DX'ers.

After a check of our log, we are very pleased to verify your reception of CFSE on your mentioned dates. The following is a short summary of the technical features of our station:

1. 50 watts power output
2. AT3 transmitter
3. Long wire 225' mismatched to detune transmitter
4. 1450 Kc's assigned.

You stated that lately our DX programmes have not been picked up. The probable answer for this is that we just had our transmitter re-tuned and we are now right on 1450 Kc's. We have had many DXer's ask us if we had changed our position. The above is the reason for not picking us up. We are seriously thinking of putting DX programmes on every Saturday evenings but that is still in the planning stage.

For your own information, the new Manager is Flying Officer Cliff Cassidy, the new Chief Announcer is Tony Mauza, and the new Secretary is Al Harvie.

Once more we thank you for your patience in waiting for our reply and hope to hear from you and your fellow DXer's in the very near future. All the best in your future DXing.

Sincerely yours

F/O C. Cassidy
(Manager CFSE)

Mr. Kermit Geary,
R.F.D.No. 2
Walnutport,
Pennsylvania,
USA -

Dear sir:-

Every day, we receive letters from members of your club, telling us they have been listening to CFGT.

Every time, the specifications, like in your case, are proving that they really tuned our station.

I would like you to know that starting this Saturday January 9, instead of signing off at midnight, we will keep our program on till 2.00 am.

Any time, you will write for the announcer to give you a Q.S.O. of offer you musical selection at your request, we will be pleased to do so.

May I let you know that the man who put our transmitter on the air is Mr. Otto Desbiens, V.E.-2.- A.O.S.

I take the liberty of asking you to pass on this message to as many members of your club as possible.

Yours truly,

LIONEL MORIN, manager
