October 9, 1943

EARL W. WINGER

Dear Mr. Geary:

Thank you very much for your kind letter of September 26 telling us of your excellent reception of WDOD. Your report was very interesting and we are always glad to hear from our listeners.

We were most happy to learn that our signal was so strong and clear and our tonal quality fine. However, this surprised us somewhat as we are now operating on a power of 5000 watts day and night using a directional antenna system at night with most of our power directed to the south and southeast. Therefore, we would not expect to have such fine reception up in your part of the country.

Thank you, again, for your splendid letter and you may consider this as your verification. Our program log checked exactly with your report. We sincerely hope that you will continue to tune us in often and that we may have the pleasure of hearing from you again.

Cordially,

Vice-President

Dial 1520 at Present.

Ed Lawson, Engineer

Hello Kermit

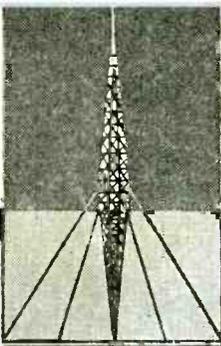

Got your letter today, at the station as I only work part time, I go up two or three times a week to check the equipment, clean, test and do maintenance as necessary, I try to keep the equipment & station in the best of sound for our listeners in Country music and Country Gospel all day on Sunday.

The information you log in your log was correct, as we run our frequency check every third Monday morning at 12:30 EST per FCC Rules and our contract with Atlanta, Ga.

at present we are 1520, and in the process of changing to 1110, and we hope to be finished by 30 April 70, the weather permitting.

Thanks, so much for your letter & keep listening after we change over to the new frequency.

Sincerely
Ed Lawson

S

W E P G, "AM-91", 910 kiloHertz;
Tuesday evening, January 12, 1982,
5:09 to 5:23 P.M., Central Standard Time:
5:09 to 5:11 P.M., Talk with the National Weather Service at
Lovell Field in Chattanooga.
5:11 P.M., Announcement:

"We'll be keeping you updated on all of the weather situation. In keeping with Federal Communications Commission emergency provisions, W E P G will remain on the air until 6:00 o'clock in an effort to keep you abreast on our dangerous conditions throughout the Tennessee Valley and the Tri-State Area. So, stay with us and stay informed on all of the latest weather and traffic conditions throughout the Tri-State Area. For W E P G, I'm Bob (Thomas or Thompson)."

5:11½ to 5:15 P.M., Recorded song: "You're the Best Break This Old Heart Ever Had".

5:15 P.M., Announcement:

W E P G: Good afternoon, 15 minutes past 5:00 o'clock. We have 22 degrees in the Valley under a snow-filled sky. Actually, everywhere there is snow on the ground. We have an inch-and-a-quarter here at the Radio Station, and we'll be keeping you abreast of all that. We'll be having a live weather update from the Weather Service at Lovell Field, and we'll also be in touch with the State Troopers."

Report on traffic conditions. It was mentioned that School Bus No. 6 was stranded for a short period of time on Morrison Lane.

5:16 P.M., Announcement of closings, including various businesses, schools and libraries; also that the South Pittsburg basketball game has been postponed due to the weather. The station was identified as "AM-91".

5:17½ to 5:21 P.M., "The Cowboy and the Lady", sung by John Denver.
5:22 P.M., Announcement:

"W E P G time is 22 minutes past 5:00 o'clock."

The announcer spoke about the snow emergency until I tuned out at 5:23 P.M., C.S.T.

Please compare the above data with your special emergency programming on the evening of Tuesday, January 12th, and if my report is correct, kindly send me a reply confirming my reception of WEPG on 910 kiloHertz. I would also like to know the power output of your transmitter. Your attention to this request will be greatly appreciated.

Best wishes to you, sir, and to WEPG for continued success in broadcasting. I hope to be able to hear you on the air again sometime in the future. Looking forward to receiving your reply in confirmation of my reception of WEPG, for which I thank you, I am,

Very truly yours,

12/1995

KNOXVILLE, TN

W U T K, 850 kiloHertz;

Thursday morning, December 21, 1995,

6:43 to 6:47 A.M., Eastern Standard Time:

6:43 A.M., Weather forecast.

6:44 A.M., Public Service Announcement, sponsored by the Environmental Protection Agency and the Consumer Federation of America.

6:45 A.M., Announcement:

"Action Ten News can be heard simulcast live on W U T K, All-News AM 850, in Knoxville."

6:45 A.M., Musical fanfare, followed by the news. The opening item reported on housing costs in various U.S. locations, with Kansas City being the most affordable. (The signal faded into the interference by 6:47 A.M.).

Thursday afternoon, December 21, 1995,

4:58 to 5:05 P.M., Eastern Standard Time:

4:58 P.M., Announcement about dancing instructions. For further information, listeners were advised to call the Community College at a "694" telephone number (the last 4 digits were either 6665, 5663 or similar number). The 2 middle digits were definitely "66".

4:59 P.M., Announcement:

"World and national news continues on W U T K, AM 850, your CNN radio....."

4:59 P.M., Weather forecast by a meteorologist.

4:59½ P.M., Announcement:

"Action Ten News can be heard simulcast live on W U T K, All-News AM 850, in Knoxville."

4:59¾ P.M., Announcement: "..... hoping you'll tune in daily for Dan Rather Reports."

5:00 to 5:05 P.M., Action News.

Please compare the above data with your programming on Thursday, December 21st, and if my report is accurate, kindly send me a reply to confirm that it was WUTK to which I was tuned on 850 kiloHertz. I would also like to know the power of your transmitter at the time of my reception. Your response to this request will be deeply appreciated.

Best wishes to you, sir, and to WUTK for continued success in broadcasting. I hope to hear your signal on future occasions when atmospheric conditions are favorable. I look forward to receiving your reply in confirmation of my reception of WUTK, AM 850, for which I thank you. Best wishes for the New Year!

Very truly yours,

Kermit Geary

Walnutport, PA 18088

Dear Mr. Geary,

This letter is to confirm that that radio station you heard on December 8th was indeed WRLT-AM, broadcasting at 5000 watts (non-directional) from Madison, Tennessee. The reason you lost our signal shortly after 5pm is that we switch to a 1000 watt directional pattern at sunset, local time.

Since the time you heard us in December, the call letters of WRLT-AM have been changed. We're now known as WHNK-AM, "The Home of the Country Legends," broadcasting traditional country music 24 hours a day. We are currently in the middle of major repairs on our transmitter and four towers at our Madison transmitter site, and I would be interested in hearing from you again if you can pick us up in the future.

Sincerely,

A handwritten signature in blue ink that reads "Dennis Thibodeaux". The signature is stylized and includes a long horizontal flourish at the end.

Dennis Thibodeaux

Walnutport, PA 18088

Dear WNQM-AM Listener,

This letter will confirm your reception of Radio Station WNQM-AM on 1300 Khz between 0300 and 0330 AM-Central Standard Time, on 26 December 1994. Reception is confirmed in conjunction with a special DX test set-up in voluntary cooperation with the IRCA.

The programming items and content you listed have been checked with our program log for that day and found to be correct.

WNQM-AM operates with a power of 10,000 Watts day and 5,000 Watts at night. Our antenna patters is non-directional in the daytime and directional mostly to the South East at night using a five tower antenna system. We operate for 21 hours a day, seven days a week.

Thank you for your report and the best of luck in your DX endeavors.

Dear Kermit:

Thanks for your letter of December 2, 1988 and follow-up letter of August 7, 1989 regarding reception of WKTP, 1590 KHz, Jonesborough, Tennessee. We are pleased to verify your reception of that station on Thursday morning, December 1, 1988.

As the folks at WUSJ(FM) (who still own WKTP 1590) probably told you, our WKPT 1400 here in Kingsport has declared itself a mini-network. WKTP, Jonesborough, is our first outside affiliate. We have reached an agreement to purchase WKTP from its present owners and are awaiting a waiver of the FCC's cross ownership rules, which is required before we can officially own the 1590 facility.

Since we began programming WKTP October 15, 1988, we've received many DX reports -- including two from Sweden!

I wish you luck in your hobby and a Happy Holiday Season!

Sincerely,

HOLSTON VALLEY BROADCASTING CORP.

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, Pa. 18088

Dear Mr. Geary:

This is to acknowledge and thank you for your report of the reception of WHJM on December 20, 1988.

I apologize for taking so long to get back to you, but just like everyone else, we have been doing a lot of year-end reports, etc. and catching up from the Holidays.

We wish for you a great New Year and all the best in '89.

Your report of reception for WHJM is accurate, however I will tell you that on January 16, we changed our format from Pure Gold to the Big Band Sound and we are known as 'The Memory Channel'. I hope that you will pick us up again but I wanted you to be listening for this new sound.

The power output of the transmitter at the time of your reception was twenty-six hundred watts. Our license is for 10,000 Watts and with 2,600 watts during critical hours. Pretty good coverage, isn't it?

Thanks again for taking time to write to us and thanks for your nice comments.

We'd love to hear from you again.

Sincerely,

Harry J. Morgan, Owner
MORGAN BROADCASTING COMPANY

Dear Kermit:

This will confirm your reception of WGOC, Blountville, Tennessee, on Monday November 14, 1994, from 05:15 PM to 5:30 PM EST.

WGOC is owned and operated by the J. T. Parker Broadcasting Corporation and is licensed to Blountville, Tennessee. Blountville is a small community located in Northeast Tennessee, in the center of the Tri-Cities of Kingsport, Bristol and Johnson City, Tennessee.

WGOC operates with 10,000 watts non-directional daytime and with 810 watts directional nighttime. The antenna system consist of a 450 foot tower for daytime non-directional and a second 190 foot tower is added for nighttime. WGOC must operate directional at night to provide protection to KFI, a 640 Khz Clear Channel Station in Los Angeles, California. The directional pattern is to the east and southeast.

Kermit, thanks for your reception report on WGOC and good DXing in the future.

Kindest regards

Mitch Sandidge
Chief Engineer, WGOC

October 24, 1988

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Kermit:

This will confirm your reception of WJTZ, Blountville, Tennessee on October 11, 1988 from 6:52 PM to 6:59 PM.

We have had some difficulties with our mail during the past year after changing call letters and changing our address. This may have been the reason I did not receive your first reception report.

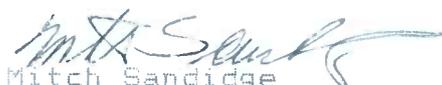

WJTZ began operations on 640 Khz on October 23, 1987. The former call letters were WGOC. WGOC was licensed to Kingsport, Tennessee and operated on 1090 Khz with 10,000 watts daytime only.

WJTZ operates on 640 Khz with 5,000 watts day non-directional and with .81 kilowatts directional nighttime. The main lobe for directional is to the southeast, 120 degrees from true north. The daytime tower is a 450 foot in height. A second 190 foot tower is used to provide the correct pattern for nighttime directional.

Blountville is located near the center of the Tri-Cities of Bristol, Kingsport and Johnson City, Tennessee. Operating from this site, WJTZ's 5 Mv/M contour encompasses all three cities, both day and night, and is the only AM station in the Tri-Cities to provide complete fulltime AM coverage.

Kermit, thanks for your reception reports on WJTZ and good DXing in the future.

Kindest regards,

Mitch Sandidge
Chief Engineer, WJTZ

Walnutport, PA 18088

Dear Mr. Geary,

We at WBRY were most happy to hear that you were able to pick up WBRY-AM, Woodbury, TN. on January 17, 1992 between 4:53 and 5:00 p. m. From your letter I can confirm that you did pick us up. WBRY is a daytime station with a daytime power of 500 watts. I would note here that when you lost us at 5 p. m. cst that that was the end of our full power and we cut our power to 42 watts at 5 p. m. for our post sunset time.

WBRY's transmitter is a RCA BTA-IRI that was used to put WBRY (then known as WBFJ) on the air in 1963. WBRY is a non-directional station using a 150 foot single tower with 120 radials. The studio-transmitter building is located one mile west of the town limits of Woodbury in a "hollow". Our true location is north latitude 35° 49' 53", west longitude 86° 06' 42".

I have passed a copy of your letter to our contract chief engineer Mr. Homer Wilson who takes care of our electronic equipment.

Please let us know if you pick WBRY 1540 AM up again.

Sincerely,

Dave Bunge

Dear Mr. Geary:

This is to confirm your reception of radio station WDXN. I wish to thank you on behalf of the staff of WDXN and myself for your D. X. report on our station.

WDXN went on the air 12:00 noon Sunday, November 14, with regular programs. We are a daytime station only, operating on 540 KC with a power output of 250 watts. We have a continental electronic transmitter and remote control equipment with a tower 372 feet high.

Again may I say I wish you lots of luck in D. X. work and we sincerely appreciate your report.

Sincerely yours,

William Davis

Dear Sir:

First of all, let me appoligize for not answering your letter sooner. You see I am a senior in high school, and with working nights, I don't have much free time, but here is your reply, finally!

Yes, you did recieve a frequency test from WDXL on the morning of Jan. 16. We were operating on 1KW power. You were correct about the code words, and the complete test transmission schedule.

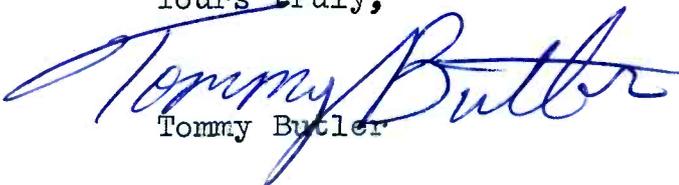

Thank you for taking the time and trouble to notify us of the fact that you picked us up, and going into detail about the clarity of the broadcast.

And for your information, the Van Nostrand Radio Engineering Service (for whom the test originated) measured us at 1490.000 KC,, Right on the money! However we were reported to be varying from 1490.001 to 1489.999. So I guess we have a fairly stable transmitter here.

Thank's for your inquiry.

By the way we have another test scheduled for 2:30 A.M., CST, Feb. 20, 1967 (If I can get out of bed), maybe you can pick us up again.

Yours truly,

Tommy Butler

Dear Sir:

This will verify your reception of WDXI on the morning of October 22, 1948 from 3:05 to 3:30 am Central Standard Time.

I was very pleased to read your report and to note how thorough you reported your reception and of course I was also pleased to know that WDXI came in so clearly.

I am sorry that I have just now gotten around to sending you a veri. but I have been very busy as I am also chief engineer of WENK, Union City, Tenn.

In the event you may be interested I will give you our frequency check schedule. We transmit our frequency checks on the second Monday morning of each month from 2:15 am to 2:25 am Central Standard Time. Again I wish to thank you for your very neat and complete report.

Very truly yours,

James S. Thomas

Hi Kermit,

Thanks for your excellent report on reception of our station up "Pennsylvania" way. Was good news to hear, and frankly -- it surprised me as to what 250 watts will do during early morning hours. We are, however, proud of our daytime coverage of the mid-south.

It seems as though this idea of acknowledging all communications -- and my ad lib to that effect -- has led to my answering your letter. Also, I must answer others from far western points, including Vancouver, British Columbia.

Our Chief engineer -- Ed Lacy -- wishes to thank you for your report; but he, like most Tennesseans, doesn't care much about writing. Since I happen to be the only dyed-in-the-wool Yank on the staff -- I get the job. It's fun though. I'm not from your area, my home happens to be in a little burg, called Peoria, in Illinois.

Gad man, for my purposes your letter is too technical, but I note with interest that you have my announcements down pat. Almost leads me to believe you recorded it.

You see, Kermit, we have to take turns once a month on these freq checks, and this happened to be my turn. Ordinarily, my duties are solely those of news editor. Bet I sounded sleepy as "hell" that morning; in fact, I barely made it. Since I am still single, I have to depend on my own ambition to get me out of bed, and down here, one doesn't know the meaning of that word, "ambition."

Well, guess that takes care of my promise, so with a wish for more, and better, reception on your night-owl stints, I'll bring this to a close. Thanks again for your report.

Very truly yours,

Jimmy Craigen,
News Editor,

Dear Sir;

This letter will verify your reception of our equipment test broadcast on Tuesday morning October 22, 1946, from 1:50 AM to 2:16 AM CST. I also wish to verify your reception of our frequency test on Friday, November 22, 1946 from 3:16 to 3:25 AM CST. Your reports are the most complete and informative of any which I have received and we appreciate it greatly.

In the event that you are interested I will give you the equipment layout here at WENK. The transmitter is a Western Electric 451-A-1 high efficiency grid modulated rig. The antenna is a $\frac{1}{4}$ wave vertical with a height of 180 feet. The studio equipment consists of a Raytheon control console used with Western Electric transcription pickups and microphones. The transcription turntables are Presto.

On behalf of the management of WENK, I want to thank you for your very fine report and to personally wish you much luck and pleasure in your hobby.

Respectfully yours,

January 16, 1969

Dear Kenmit:

Thank you very much for your letter of signal report on our equipment tests during the experimental period of the morning of January 13, 1969. Your letter described a very good skip signal into the ~~PA~~ Pennsylvania area.

Your assumption of a 1000 watt transmitter was caused by my assistant engineer identifying the station as operating at 1000 watts and possibly you thought we were doing so then but we weren't.

Our reason for being on in the experimental period was to test some new equipment involved in taking our transmitter power~~er~~ output at low power position of 250 watts and reducing that to our new Pre-Sunrise Authorization power output rating of 7.85 watts!

To explain a rather complicated situation let me say that on 1090 kilhertz there are two class 1B stations: WBAL in Baltimore, Md. and KAAV in Little Rock, Ark. There are many class 1A stations like WGOC on 1090 Kilohertz some with powers of 5000 watts or more! Since the class 1B stations are fulltimers they must do something to be able to operate simultaneously; so they operate directional; KAAV a bipolar nighttime pattern approximately NNW by SSE and WBAL a "half-circular" pattern arranged to cover the East coast nighttime with all stations on 1090 Kilohertz or at least most of them omni-direction daytime since distance is used then to keep interference down. Since we aren't able to sign-on until the sun rises with 1000 watts we will not interfere with them. There is a power~~er~~ output rating however that will permit us to operate "pre-sunrise" without bothering them yet allowing us to serve our town with a reasonable power with additional time and that is 7.85 watts. The advent of very low power commercial broadcast stations has revolutionized the business. Extreme care must be taken with the antenna system so the very low power~~er~~ will also be very efficient however~~er~~. We have accomplished this as you have heard. So let me add a rare piece of DX to your files.

Kermit, when all of the paperwork is completed on this type of operation i will mail to you a list of other stations like WGOC who have decided to dive into the field of very low power operation. I'm sure that they, like us, eventually will be on the air during the experimental period testing their low power operation and will QSL you also.

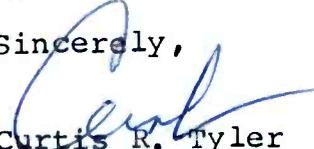

Also when i get some regular BC DX QSL cards i will send you one complete for your files as your letter will go in my personal file and will be marked to mail a QSL card for the low power signal report.

Kermit as you may have guessed I'm also an amateur radio operator (Conditional Class from a few years back) either too lazy or too busy to move to the higher class amateur tickets. Conditional class gives me all band operation which is all i really want, tho. Also I'm a very poor typist as you can see but i am in a little rush at the moment wanting to get some type of reply out to you.

Kermit, I must get back to the shaft=mine now but will be awaiting any questions you may have pertaining to the business or anything else i can help you with.

Again I thank you very much for the signal report.

Sincerely,

Curtis R. Tyler

Walnutport, Pa.

Dear Mr. Geary:

This is to confirm your reception report of W.T.R.O. May I thank you on behalf of our staff and myself for your excellent report.

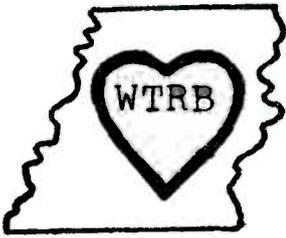

W.T.R.O. officially signed on the air March 1, 1957. All of our equipment is "Gates", tower height 200 ft. Our regular frequency check is the fourth Wednesday each month from 12:15 to 12:30 AM CST.

May I again thank you for your report and wish you lots of good luck in D.X. listening.

Sincerely,

William E. Davis

Dear Sir:

We wish to acknowledge your letter of December 7 stating that you had heard signals from WTRB .

We would like to confirm that your log is correct and we appreciated hearing from you very much.

WTRB is using all new R.C.A. equipment with RCA-BTA250 watts transmitter. WE have a 200 ft. tower and day time reception has been received good for about fifty miles radius.

Ripley's Radio Station, WTRB, went on the air for its' first time Saturday, December 11.

In closing once again we would like to say thanks.

Yours very truly,

Earl W. Daly

Dear Mr. Geary:

In reply to your letter of September 21, 1961 reporting reception of WFCT at 2:01 to 2:31 A.M. Eastern Standard Time on the same date. We are happy to verify the complete accuracy of your reception report.

We are always happy to receive information which indicates the area coverage by our transmitting equipment. Your report was very detailed and indicates a very active and enthusiastic D-Zer.

We test our transmitting equipment at about the same time each week and every third Thursday morning from 1:45 to 2:00 A.M. we conduct a frequency calibration check. A letter acknowledging reception of our station will be appreciated at any time.

Yours very truly,

Jim Clayton,
Chief Engineer

Kermit Geary
R.D. 4, Box 321
Walnutport, Pa. 18088

Dear Mr. Geary,

In regards to your letter about picking up our station the evening of November 25th. Let this letter serve as confirmation of your reception. It's always a delight for me to receive letters like yours and to share it with the rest of the staff here at WTJT.

I am personally on my fifth year here at WTJT and before April 11th of 1980 our call sign was WAGG. With a transition in management so came the change in call letters. Once in a while I'll receive a letter like yours asking me to confirm the reception of our station in another state, but to my knowledge I don't believe I have ever gotten one from someone as far away as Pennsylvania. Incidentally, the voice you heard on the SIGN-OFF announcement that night was in fact the Tom T. Hall. He and some associates of his bought the radio station in April of 1980.

Again, thank you very much for your letter. I feel a certain amount of envy for the great hobby you have there...it must bring you a lot of pleasure and personal pride. Have a Merry Christmas and best wishes in the coming year.

Sincerely,

A handwritten signature in black ink that reads "Mark A. Schier".

PROGRAM GUIDE ENCLOSED.

THANK YOU

Lloyd E. Keen

LOYD E. KEEN CHIEF ENG.

I heard WWGM on my Hammarlund HQ-180C communications receiver (18 tubes). My antenna is a single-wire inverted "L", 200 ft. long and 30 ft. high, extending toward the southeast, with the lead-in to the receiver coming off the northwest end. My ground connection is made to a well 175 ft. deep. I am situated in the eastern part of the State of Pennsylvania, 60 miles north of the city of Philadelphia and 90 miles west of New York City.

Following is my reception log of the closing portion of your broadcast as reported in this letter:

W W G M, 1560 kiloHertz;

Tuesday evening, December 19, 1972,

4:28½ to 4:30 P.M., Central Standard Time:

4:28½ P.M., Closing program announcement. The speaker mentioned "Glad Tidings", and said that Ron -----ville "will talk to you again to-morrow morning, 11 to 12"; also mentioned was a program "to-morrow morning at the same time of 6:15". He concluded at 4:29 P.M. by saying:

".....talking to you about the Will of God abiding forever."

4:29 P.M., Closing prayer:

"Hallowed Jesus, we thank Thee for the day you gave us. Thank you, Lord, for all that You've done for us.....We ask You that You take this radio broadcast and use it for Thy Kingdom and the upbuilding of souls to be saved by salvation. In Thy Name we pray; amen."

4:29:20 to 4:29:30 P.M., Melody played on chimes.

4:29½ to 4:30 P.M., Sign-off announcement:

"This is W W G M, the Wonderful World of Gospel Music, in Nashville, Tennessee, now ending another day of broadcasting service. W W G M is owned and operated by ----- Radio Enterprises, Incorporated, and is licensed to broadcast at 1560 kiloHertz with a power of 10,000 watts. We invite you to join us to-morrow morning and throughout the day for the Wonderful World of Gospel Music."

W W G M left the air at 4:30 P.M., Central Standard Time.

Please compare the above data with your Station Log for Tuesday, December 19th, and if my report is correct, kindly confirm my reception of WWGM, Nashville, on 1560 kiloHertz. I shall be happy to hear from you in verification of this reception report, and am enclosing return postage for your reply.

Best wishes to you, Mr. Keen, and to WWGM and its Personnel for continued success in gospel music programming. I hope to hear your signal again on future occasions when propagation conditions are favorable. With all good wishes for a Happy Holiday Season, and looking forward to receiving your reply in confirmation of my reception of WWGM, I am,

Very truly yours,

Kermit Geary

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

While sorting and filing correspondence for Mr. Hill this weekend, I came upon your letter. Since I am unable to confirm whether or not we acknowledged your reception, I am writing to do so.

Your report is correct regarding the Oliver North Show, the various advertisers, and the sign-off information for WPWT PowerTalk 870, Colonial Heights, Tennessee.

I sincerely hope this is a followup to an earlier confirmation. If not, I apologize for the delay.

Sincerely,

Patricia A. Jones

RADIO STATION WDEF

THE STATION OF PUBLIC SERVICE

CHATTANOOGA, TENNESSEE

JOE ENGEL
PRESIDENT

FRANK S. LANE
GENERAL MANAGER

January 15, 1944

Mr. Kermit Geary
Walnutport, Pennsylvania

Dear Mr. Geary:

Thank you very much for the nice letter you sent to us regarding the reception of station WDEF.

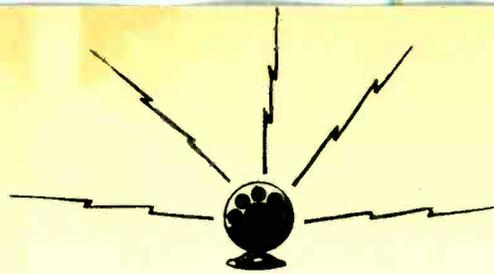

This is to verify the fact that the description of the programs you heard corresponded with our program log.

WDEF is a 250 watt station using a 250-K RCA Transmitter. The antenna is a vertical radiator located on the top of a twelve story building in downtown Chattanooga.

Very truly yours,

B. C. Baker

Memphis, Tennessee
October 14, 1940

Kermit Geary,
Walnutport, Penn.

Dear Radio listener:

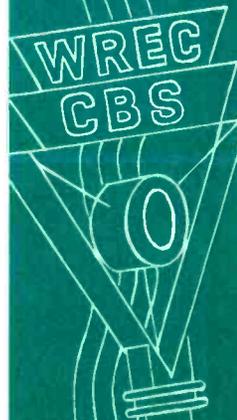

This will acknowledge receipt of your letter of October 6th,
in which you report reception of Station WREC.

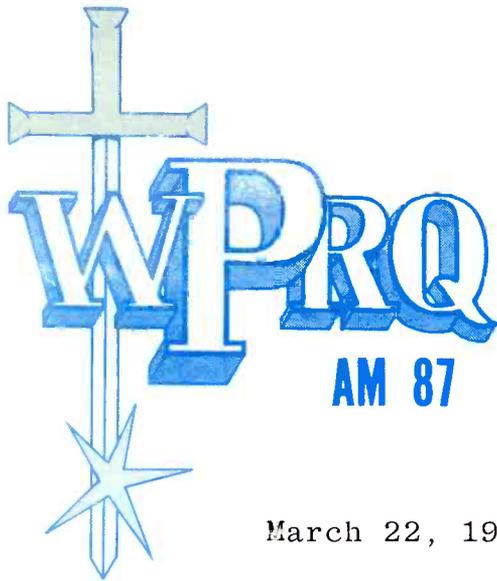

We are always glad to send verification of our Station. The
Program you received was Hotel Peabody Orchestra, playing from
The Hotel, in which our studios are located. We operate on 600
Kcs, and are located in Hotel Peabody, The South's most beautiful
studios, and also Hotel.

I have checked your times and numbers with our log, and your
verification is absolutely correct.

Very truly yours,
WREC BROADCASTING SERVICE.

BY: M. Hughes.

March 22, 1985

Dear Kermit,

Thanks for your letter describing your reception of WPRQ! We seem to be covering a bit larger area than we had planned!

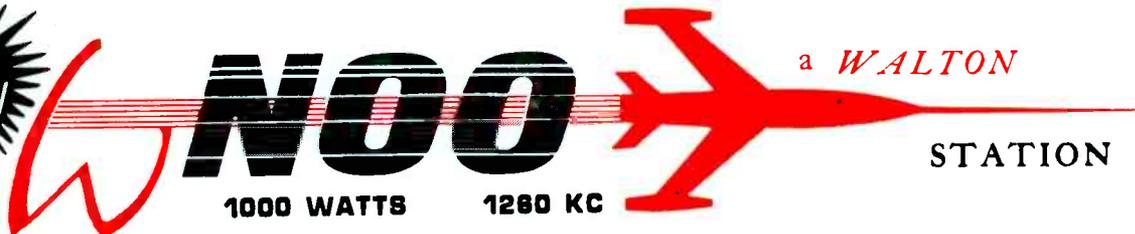

We are a relatively new daytimer on 870 kHz with a power of 5,000 watts non-directional, with neither pre-sunrise nor post-sunset operation. We transmit via a ~~10~~ 190 foot ~~Rohr~~ 45-G tower, coupled to a full quarter-wave ground system including 120 radials, each 283 feet in length, bonded to a 24' X 24' copper mesh groundscreen. As you are probably aware, unlike class 3's & 4's, we share a relatively clear channel - thus, the background noise is lower, improving the usable signal you are getting during critical hours.

Enclosed is a short cassette tape. If you have the facilities, please send us an aircheck. We'd like to compare it to one we received from Youngstown, Ohio, if we could.

Again - THANKS for your letter - keep listening!!

Sincerely,

Dave Murray
Owner/General Manager

Dear Kermit:

This is to confirm your reception of WNOO on the morning of April 16, 1963, during a frequency- deviation test.

Sorry I have been so long in answeringI took over as Chief Engineer here April 10 and have been busy trying to get things in decent order equipment-wise.

I don't know whether you have info on our equipment or not, but if you want it, here it is:

- Transmitter----- Collins 20-V2
- Antenna----- Truscon. Self-supporting, series-fed at 4.11 amps.
- Studio Equipment:
- Microphone: E-V model 664.
- Audio console--Built by G. E. Channells and myself especially for WNOO. 8 mixing inputs, -1db at 15 and 45,000 cps. Less than 1/2% distortion. Program channel has built-in limiting amplifier for constant output level.
- Turntables: 16" Presto 3-speed. Gray Viscuous pickup arms with G. E. cartridges.
- Tape: 'Spotmaster' cartridge units for jingles & spots.

BEST OF LUCK WITH YOUR D-X ING !!

Dear Mr. Geary:

It was a very pleasant surprise to receive your letter dated May 23, 1984, stating that you had been able to pick-up the final fifteen minutes of WBCV's Christian broadcasting on May 22. We were thrilled to know that we had reached your area by means of radio with such clarity.

From the information given in your letter, it sounds as if you were, indeed, listening to Bristol's Christian Voice.

We, at WBCV, thank you for listening and for taking the time to let us know that you heard our program. We hope that sometime in the near future, when atmospheric conditions are favorable, you will again be able to tune us in.

Sincerely yours,

Rev. Jennings Dotson

April 5, 1988

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

I am writing to confirm your reception of WXQK at 6:00 am Eastern Standard Time on March 12, 1988. It was quite a surprise to hear of our signal reaching such a distance.

At the time of your reception WXQK was operating at our authorized power of 500 watts non-directional. The station maintains this power level from 6:00 A.M. until 8:00 P.M. or 1/2 hour past sunset each day (whichever comes first).

Although I am not interested in devoting a great deal of time to it, I am somewhat interested in some limited "DX-ing" and have been trying to find out how to build an adequate A.M. antenna. If you happen across any information on the subject please drop it in the mail. I would be very interested in more details of the SM-2 Space Magnet which you indicated you were using. Obviously it must be doing an incredible job.

Thanks for writing !

VERIFICATION OF DX REPORT

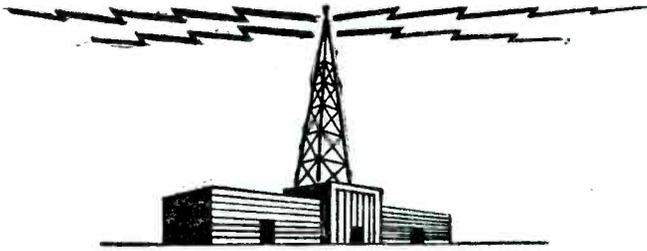

It is with pleasure that we hereby verify your reported DX reception of WMTN. We have received many fine reports from both far and near and certainly appreciate your taking the trouble to listen for us and send us your report.

For your information, WMTN is completely RCA equipped. We are operating into a two tower direction array, which is very unique, in that we are obtaining somewhat of an egg-shaped pattern. Our towers are in a line bearing NW-SE. Their height is 150 feet and the average terrain is 1250 feet above sea level. The terrain around us is gently rolling hills.

Thank you very much for your report of reception of WMTN. And should you ever be in this vicinity, please be sure to drop in to see us.

Very truly yours,

James A. Fleming,
Chief Engineer

March 21, 1981

Kermit Geary
Rt. 4, Box 321
Walnutport, Pa. 18088

Kermit,

It is always a pleasure for us to verify distant reception of our station. From the information supplied, I can verify that you heard our station last Saturday afternoon. Most of the information was correct. The name of our corporation is J Starr Broadcasting Company, and the announcer on duty at the time was Teri Hammons.

We are a directional station, but as you can see from the enclosed coverage map, you are not in a direct lobe. We are a new station, having begun operation less than a year ago, May 9, 1980.

We expect to file an application with the FCC within the next few weeks for 5,000 watts and anticipate seeking full-time approval in about three years. Once this is accomplished you might be able to hear us more regularly. However, there is another day-timer on our frequency in Danville, Kentucky that should limit our distant reception. We have heard from other DXer's, primarily in a straight line with you.

Sincerely,

Barry Crowe

Walnutport, Pa.

Dear Kermit:

We are always glad to hear reports on our signal, especially from as far away as you are. We run our frequency modulated tape for a frequency check the 1st Thursday of each month. Claude Gray of Birmingham, Alabama, is our monitor.

WATO came on the air 1490 kc, 250 watts in 1948. WOKE started operation in 1952, I believe, 1290 kc, 1 kw day 500 w directional at nite, we moved our 250 w equipment to Fountain City about 20 miles away as WROL, 1490 kc and took over the operation of the old WOKE equipment January 18, 1958, as WATO, 1 kw daytime 500 w directional nite time. The call WOKE is in Charleston, South Carolina, by the original owner of the Oak Ridge WOKE.

Thanks for the very interesting letter.

Very truly yours,

January 12, 1958

Mr. Kermit Geary,
R.D. 2, Box 298,
Walnutport, Pa.

Howdy Kermit:

We thank you very kindly for your excellent DX report on the reception of signals from WCLC on Monday, January 6, 1958. All the program items that you list are correct so please accept this letter as our verification of your reception.

That record that you made reference to as Sunday or Monday morning, is Fats Domino's Blue Monday, and the other selection in question was Patty Baby. This was my first experience at announcing but CE Jim Spires said that if I would do the talking he would play the records. HI. I did knock off for a few minutes at 4 AM, EST in order to get a log on WEEP's DX on 1080 on my car radio. However, WLEO didn't make it here.

So far we have received 39 reports from our test broadcast and expect a few more, we are very pleased with the results on the unfavorable 1260 spot.

WCLC started regular program schedule at 5 AM, CST on the morning of October 28th, 1957. We are now operating from 5 AM to 5 PM CST, Daily.

Jamestown is the county seat of Fentress county, Tennessee and is located atop the beautiful Cumberland Plateau, about 100 miles east of Nashville.

Thanking you again for your fine report, I am

DXingly yours,

Bill Prater

RE: Reception Report

Dear Mr. Geary:

This is to verify receipt of your reception report of October 12, 1947. We are gratified to hear of your reception of our first test broadcast and that we were sending such a strong and quality signal into your district even though WWDC is only one hundred and fifty miles away from your home compared to our five hundred and fifty. All information you submitted coincided with our program log.

For your information we go on the air each morning at 4:00 for a duration of ten minutes for a commercial frequency check. These daily tests will last for only a short time on a seven day a week schedule.

Trusting that this information is sufficient for your files,
I remain:

Sincerely yours,

Laurence Martin

Kermit Geary
R.F.D. #2
Walnutport, Pennsylvania

Dear Sir:

We sincerely appreciate your report on our signal, and are glad to oblige with this confirmation. Your report was very complete and extensive, and we are very grateful for this information.

We were on the air Tuesday, November 19, from 1:00 a.m. to 4:40 a.m.; Wednesday, November 20, from 1:00 a.m. to 4:01 a.m.; and Thursday, November 21, from 3:01 a.m. to 5:01 a.m. We have no definite schedule for testing but are trying to find a time at which our frequency monitoring service can get us best in Birmingham, Alabama. He is having a hard time picking us out of the interference. We plan to have our opening going on the air at 7:30 p.m., Central Standard Time, November 25.

We are using Raytheon equipment through-out, except the turntables are Prest-o. The transmitter is the RA 250. Its output tubes are 810's push-pull plate modulated by 810's push-pull. We are using 325 feet of RG-8U solid dielectric (polyethylene) cable series feeding a quarter-wave Windcharger tower. We are getting 70 per cent efficiency with this set up. We have no modulation or frequency monitors as yet and are using the scope section of an AN/APA-10 Panoramic Adaptor for checking modulation.

Thanking you again we are,

Sincerely yours,

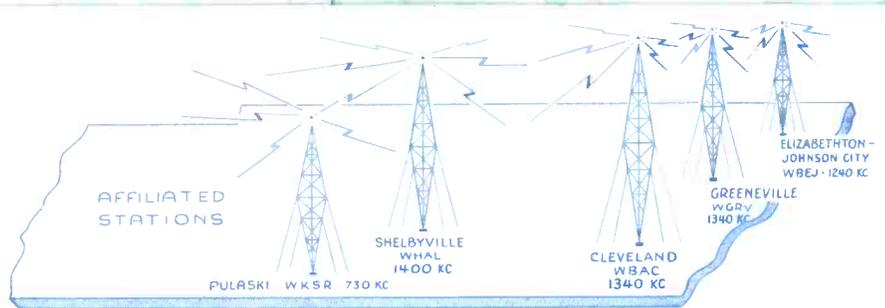

Revis V. Hobbs, Chief Engineer

Lenoir City, Tennessee

November 15, 1950

Kermit Geary
RFD # 2
Walnutport
Pennsylvania

Dear Sir,

This is to thank you for sending in your report of hearing WLIL, November 7, 1950, and to verify your report. Our A.M. equipment is Gates. Our transmitter is the new Gates BC-1F-1-Kw Transmitter, operating on 500 watts. The antenna is a .2 WL-284 feet tall, and is located on top of a hill. A.M. is daytime, only.

We just finished installing a new G.E. 3-Kw F.M. Transmitter to use in conjunction with the A.M. and to use in the evening. The F.M. antenna is an Andrew, 4 bay Multy V., mounted on the side at the top of our A.M. and F.M. tower, and has an ERP of 8.8 KW. The reason for the test was to see how well the A.M. and F.M. worked together.

Sincerely,

William T. Newton

Dear Kermit:

Thank you for your letter of October 10, 1984 in reference to listening to WBZW 1040 AM in Powell, Tennessee. We are a 2500 watt daytime station located approximately ten miles from downtown Knoxville, Tennessee. The days you stated of October 4th and 8th are very correct. Also, October 9th. Hope you will continue to be able to pick us up.

If you are in the Knoxville area, be sure to look us up.

Thanks for your information.

Best regards,

Thank you so very much for participating in the recent WLNT & National Radio Club "DX" test on Sunday Morning February 26, 1984.

This letter will confirm your reception of WLNT. We are most grateful to the hundreds of people who responded to our test in spite of the fact that WRVA in Richmond, Virginia had their carrier on during part of the tests.

WLNT began operating January 1, 1983 and operates on 1140 Khz with a power of 1000 Non directional, Sunrise to Sunset. Our tower is 190' tall and has a 16" face. Our transmitter is a Harris MW-IA complete with built in audio enhancement. We process our audio with a Harris MSP-90 system and use a 15Khz equalized line from studio to transmitter. As our entire transmitting system is located in a flood plain, we have set our transmitter building on stilts 4 feet above ground level. Our tower base is also 4 feet above ground, eliminating flooding possibilities.

Again, thanks for your help in making our test possible and I appreciate you letting me know of your reception of WLNT.

Sincerely,

TELLICO BROADCASTING COMPANY, INC.

Walnut Port, Pennsylvania

Dear Mr. Geary:

Thank you very much for your nice letter of January 13th regarding your reception of K-WAM on January 12th, 1962. Your account of our programming was one hundred per cent accurate.

We have a 160 degree non-directional antenna with 240 half wave ground radials all located in the muddy banks of the Mississippi. We have a Gates transmitter and employ both a sta-level and a limiting amplifier in our audio line which we have found will help us keep a very high level of modulation on our signal.

Thanks again for your time and account of reception of our station.

Sincerely,

E. W. Bie
General Manager

Thank you so very much for participating in the recent WLNT & National Radio Club "DX" test on Monday Morning November 21, 1983.

This letter will confirm your reception of WLNT. We are most grateful to the hundreds of people who responded to our test in spite of interference from WRVA in Richmond, Virginia and various Mexican stations.

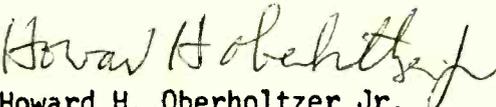

We have recently learned that WRVA, Richmond signs off at 12 Midnight Saturday's, and therefore have contacted our local NRC representative regarding the possibility of scheduling another test in early 1984.

WLNT began operating January 1, 1983 and operates on 1140 with a power of 1000 watts, Sunrise to Sunset. Our tower is 190' tall and has a 16" face. Our transmitter is a Harris MW-1A complete with built in audio enhancement. We process our audio with a Harris MSP-90 system and use a 15KC equalized program line from studio to transmitter. As our entire transmitting system is located in a flood plain, we have set our transmitter building on stilts 4 feet above ground level. Our tower base is also 4' above ground, eliminating flooding possibilities.

Again thanks for your help in making our test possible and I appreciate you letting me know of your reception of WLNT.

Sincerely,

TELLICO BROADCASTING COMPANY, INC.

Dear Mr. Garry,

Thank you very much for your letter of November 17, 1957.
We sincerely appreciate your interest.

We have checked our log and find your report correct.

WGLE is located in Cleveland, Tennessee. We operate
with 1000 watts, all Gates Equipment. Our antenna system
consist of 300 Ft. tower and ground system of 280, 300 Ft.
buried radials.

Wishing you much success with your DXing.

Sincerely yours,

Bob Garry
Chief Engineer
