Dear Mr. Geary:

We are pleased to verify your report on
the reception of Station WWSR on Saturday, Aug. 2/41.

We were pleased to know that someone had
picked up the station from such a distance at that
time of day.

Thank you for your kind interest and best
wishes.

Very truly yours,

Dear Mr. Geary,

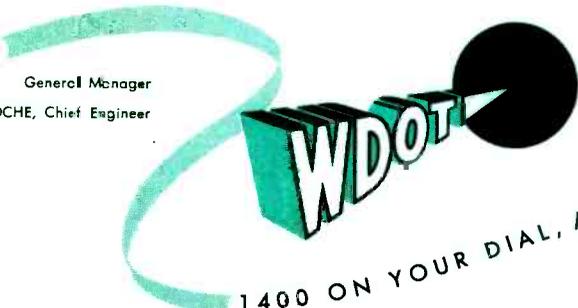

Thank you for your letter of February 16, 1999 reporting reception of WKDR 1390 AM Burlington.

As you indicated in your letter, we are the Burlington affiliate for One-on-One Sports and ABC Network News.

Thanks for tuning into WKDR, though I was sorry to hear the Syracuse station at 1390 AM was off the air.

Sincerely,

Mark Johnson
Chairman

December 15, 1950

Kermit Geary
R.F.D. #2
Walnutport, Pa.

Dear Sir:

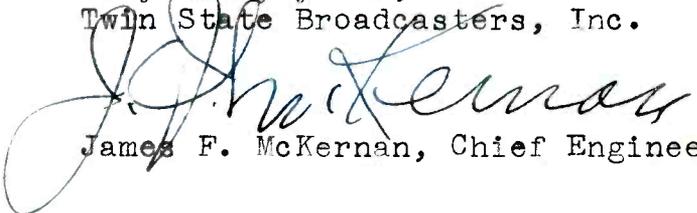

Thank you for your letter of December 4th reporting reception of station WTWN on our test transmission of December the 4th.

Your report checks favorably with our station log and you may consider this letter as your verification of reception of WTWN.

For your information, station WTWN has no regularly scheduled frequency check but usually tests during the first week of the month. Taking into consideration the interference we experienced on 1340, we believe that WTWN 'did all right for itself' during the test transmission.

Once again, thank you for writing us and may you continue to have good luck in your DX'ing.

Very truly yours,
Twin State Broadcasters, Inc.

Dear Mr. Geary:

Thank you for your DX report on Radio WHWB. It certainly was complete as well as correct. As you know, we are a daytime station and will begin program tests on Sunday, at 6 am. (I am rather proud to get letters from Penna since my home is in Kingston Penna.) There isn't much I can tell you about the station since you heard the story as told by Col. Wilson and Bob Harris. Again let us thank you for writing.

very truly yours

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18008

Dear Kermit,

Thank you for your in depth letter concerning the reception of AM 1100 WTNW. We are a new station in format (we changed our format from country to Christian November 1, 1999) but we have existed since 1976 as an AM/FM station. The AM side simulcasted the country heard on our FM side 101.3 WYKR. The AM format and call letters were changed to give it a separate identity.

Here is some information I think you were looking for as far as our equipment:

Nautel Ampfet 5KW / Unipole Non-Directional / Tubeless / Daytimer

The programming you heard and gave me details about were accurate. Thank you for taking the time to respond to us in such detail. You are to be commended for your professionalism and in-depth interest in radio.

May God bless you in your life and if I can ever be of any help to you in any way please let me know.

Sincerely,

Glenn C. Hatch

Dear Mr. Geary:

Thank you for an excellent reception report of WIKE'S regular monthly frequency check broadcast. Your log is perfect and this letter will serve as verification of our signal. It is very interesting to us to receive various reception reports during our frequency checks. Yours will put another pin on our map of the United States.

It might be of interest to you to know that during this frequency check that you reported, we were also received in Albuquerque, New Mexico. The New Mexico report is the furthest we have had so far.

WIKE conducts its frequency check the second Tuesday of every month from 5:00 - 5:15 A.M. Eastern Standard Time.

Enclosed you will find a coverage map of this station, which, I am sure, you will find interesting.

I want to thank you again for the fine reception report and wish you a VERY MERRY CHRISTMAS.

73's,

DONALD A. THURSTON
Chief Engineer

January 30, 1996

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary,

I was most amused and delighted to receive your letter today confirming your reception of WZBZ way down in Walnutport, PA. Your log of our programming announcements was right on the money for every day you listened. The only thing that fooled us a little was the mention of Easy Listening music. We are an all talk station. I suspect that our Canadian friends in Monkton may have been playing the music! We are some 19 miles away from our transmitter site in Peru, New York, and we even get interference from CBA just before sign-off!

You might be interested to know that other DX letters have come from Waltham, Massachusetts, and Cornwall, Ontario. I'm kind of surprised that you receive us, instead of WINA in Charlottesville, VA. I think they are 10,000 watts days on 1070.

Thanks again for your interest in WZBZ.

Sincerely,

Barry P. Lunderville
General Manager

3/18/91

Dear DXer,

Thank you for your listening report which we confirm.

WWWT-AM is owned and operated by Stokes Communications Corporation, a family owned business. We also own and operate WCVR-FM, a 3KW FM station on 102.3 Mhz. WWWT-AM transmits on 1320 kHz. twenty-four hours daily. Our daytime power of 1KW is reduced to various levels during the post-sunset, nighttime, and pre-sunrise operating periods. Our transmitter is a 1968 vintage Gates BC1G using 833 amplifier tubes. The antenna is a 200' guyed vertical Rohn tower located in a swampy area behind the station. Our programming comes from the Satellite Music Network's StarStation service.

We always appreciate hearing from DXer's. So far, our most distant report is the one that came from Germany several years ago. Within North America, the most distant report is one that came from Colorado many years ago. By the way, I was an avid AM DXer back in the late '50s when my best catch was WBZ, which I received several nights in December 1958 on my souped-up AC/DC receiver in Watsonville, California.

Yours truly,

Ed Stokes
President & General Manager

Dear Mr. Geary:

Enclosed you will find a QSL card to confirm your reception of WMMJ-AM on February 17, 1986.

As you can see, we have changed call letters since the last printing of our QSLs. I trust this will not be a problem in your confirmation. For your information, the work you may have heard as "MARKET" was probably "MARK EDWARDS" saying his name. Also, by looking at our stationary you can see that boss have again saved some money by not updating our letterhead paper, but since we ran out of envelopes, we did get updated in that department.

Thank you for the reception report. We appreciate the time and effort taken to send us the information.

Best regards,

Joel O'Brien

Program director

Walnutport, Pa.

Dear Mr. Geary;

I am in receipt of your letter and reception report of September 23, 1969. Thank you very much for both.

As your most complete and detailed log compares and even surpasses mine I am forced to send you a letter of confirmation, therefore consider this letter a 'Confirmation of Reception' of WCVR Randolph, Vermont 1320 Khz on September 22, 1969 between the hours of 0026 and 0115.

WCVR Randolph is a new station having only been on the air since December 1, 1968 with a power of 1000 watts daytime only. We are located approximately 3 miles to the east of Randolph, Vermont on a side hill. The transmitter is a Gates BC-1G feeding a usual vertical antenna 200 feet above ground. Later in the year I expect to run another series of test programs similiar to the last ones to see what the DX will be during the cold weather. These tests, I hope, will be noted in the several publications of the DX clubs well enough in advance to afford everyone a chance to pick WCVR Randolph up.

Again I want to thank you for your interest in WCVR Randolph and if we can be of any further assistance to you please feel free to call upon us.

I remain

Sincerely,

David H. Chestnut jr.
Engineer WCVR

Mr. Kermit Geary
RFD #2
Walnutport, Pennsylvania

Dear Mr. Geary:

Thank you for your very complete reception report of September 26, 1953. The program content was correct, so I am pleased to verify your reception report.

We are very glad to know our signal is reaching down into Pennsylvania and that it is sharp and clean.

WJOY, as you probably know, operates on 1230 KC with 250 watts. The transmitter is a RCA BTA 250-L. The single tower is about 228 feet high. We recently celebrated our 7th birthday.

We usually conduct our frequency check with RCA Labs, Riverhead, L.I., during the first week of the month. The day varies but the time is about 1:00 AM local time. We have no test program, just a 1000cycle tone interrupted a few times for adjustments and then carrier identification. I expect this month, I'll do it October 2nd or 3rd.

Thank you again for your very complete and correct reception report.

Sincerely,

Donald M. Wheatley
Chief Engineer
