Walnutport,  
Pennsylvania

Dear Sir:

We wish to thank you for your DX inquiry of WHLL. We are pleased to tell you that the reception of WHLL at the times you indicated and the programs mentioned agree 100% with our logs. We are very happy to know that our signal is getting out so well. We have 1000 watts 6 AM to Sunset with 2 elements array 60 degrees apart and fed 97 degrees out of phase with compression down to 250 watts on a line N 50 degrees E,

Thanking you for your inquiry, I am

Sincerely yours

  
Kenneth H. Forney  
Manager & Chief Engineer

Dear Mr. Geary:

We wish to acknowledge and offer thanks for the fine report you sent us, in regards our frequency test broadcast, on April 14th. We certainly appreciate your report, and were glad to learn that we had a strong signal, in your locality. Your log was correct as stated.

We have received a number of reports, from the DX'ers in the following states: Pennsylvania, Ohio, Connecticut, Rhode Island, New York, Georgia, and, West Virginia. In addition to these reports, we were happy to receive a report from a listener, in Ontario, Canada. We are certainly pleased with the results of this test, and hope we can hear from you again in the future.

Your verification Card is enclosed, as per your request.

Very truly yours,

*Jo Ann Humphreys*

*Dear Kermit :*

Thank you for your report of having heard our station.

We appreciate hearing from (DX) listeners and are glad to know that our signal is getting beyond the local city limits.

We are quite pleased and concerned that since we changed to 1600khz., that we are serving a much larger audience and we want to do so well, both from the standpoint of good programming and clarity of signal.

We began broadcasting on the new frequency and higher power At 11:00 O'clock on the First of November, 1971.

Forgive me for going to a duplicate method of responding to such inquires as yours, but in the interest of conserving time I feel this is necessary.

Sincerely Yours

John T. Echols, Jr., CE-WNEU & WA8RDX

Walnutport, PA 18088

Dear Mr. Geary:

This letter is in response to your letter of February 3, 1998. I confirm your DX Log as listed in your letter.

I am sorry that it took so long to answer you but you are probably unaware that WYLi has ceased operations as of February 1, 1998. We began broadcasting on May 8, 1996.

I am enclosing a copy of an article from Radio World about WYLi in the October 1, 1997 issue. We know for many objective reasons that we had a very large listenership. However this was not born out by Arbitron. It was a noble experiment that would also have worked very well on FM.

Thank you for your interest in the station.

Sincerely,

David A. Strock, President  
RASA Phoenix Corp. and GM of WYLi Radio.

DEAR SIR:

IT'S MY PLEASURE IN CONFIRMING YOUR RECEPTION OF W.E.I.F. RADIO, 1370 KC IN MOUNDSVILLE ON THE EVENING OF FRIDAY, APRIL 16. YOUR LOGGING OF PROGRAM ITEMS COINCIDED FAIRLY WELL WITH OUR OWN PROGRAM LOG. W.E.I.F.'S TRANSMITTER IS A GATES BC1J WITH A FULL POWER OUTPUT OF 1,000 WATTS. THE TRANSMITTER IS IN EXCELLANT CONDITION AND IS ABOUT FIVE YEARS OLD. VERY RARELY DO I HAVE ANY DIFFICULTY WITH IT.

WE BROADCAST DAYTIME ONLY AND WE ARE THE ONLY RADIO STATION IN MARSHALL COUNTY. THE STATION'S FORMAT IS OF THE STRONG TOP-FORTY VARIETY AND I'M ENCLOSING A SURVEY SHEET WHICH WE ALSO PROGRAM FROM.

I, MYSELF, AM A COMBO MAN. I HOLD DOWN THE 10:00 A.M. UNTIL 2:00 P.M. AIR SHIFT DAILY AND ALL ENGINEERING DUTIES COME UNDER MY EMPLOYMENT. HERE'S HOPING THAT YOU HAVE CONTINUED SUCCESS IN RECEIVING COMMERCIAL BROADCAST RADIO STATIONS AS YOU DID IN OUR CASE. ALSO CONGRATULATIONS ON YOUR FINE RECEIVING EQUIPMENT.

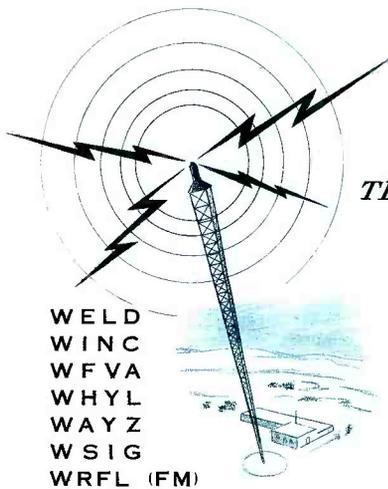

VERY TRULY YOURS,

*Randy Davis*

Sir:

Thank you for your recent letter that you are listening to our radio station on March 1, 1982. We were glad to hear that we are reaching out that far and we are heard so clearly.

We are a 5000 Watt AM Country Station in Rupert, WV. We are on from 6:00 to 6:30 this month but this will change every month. We have been on the dial 1250-AM since December 9, 1981. Power comes from our tower which is about 2 miles north of our office on Big Mt. Road. in Rupert.

On the evening of March 1 you heard Cidy Dunford a Part-time DJ. We have 5:30 to 5:33 News from Wards Exxon, 5:33 to 5:57 Music-Country, 5:57 to 6:00 News, 6:00 to 6:27 Country Music and Hym of the hour, 6:27 to 6:30 Sign Off WYKM. This is what you heard when you tuned us in.

I hope this is the reception that you heard when you tuned in. We sincerely thank you for writing us to tell us that we are reaching that far and that you are interested in our station. If you have any other question feel free to call or write us whenever you like.

Sincerely:

Kermit Geary  
R.D. 4, Box 321  
Walnutport, PA 18088

Dear Kermit,

I would like to thank you very much for the report of reception of WVMR's signal. It was a pleasure to learn that our signal could reach that far out.

I'll tell you a little bit about us. We are a community owned-and-operated public radio station. We began operation at 1 KW in mid-July of 1981. I am including a copy of our March 1982 programming guide to give you an idea of the types of programs we present.

We have a ROHN 180' AM broadcast tower with a 180' radial ground system.

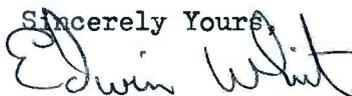

We use a MC MARTIN BA 2.5K transmitter operated at 2.5 Kilowatts.

The MC MARTIN is a single tube type. The 4-1000A is used, one pair operating in parallel in the Class C RF power amplifier stage, and another pair serving as class AB-1 modulators.

The BA 2.5K uses plate-screen high level modulation.

Again, thank you very much for your report, which I am happy to confirm. I look forward to seeing you whenever you are in the area.

Sincerely Yours,

Edwin White  
Acting Chief Operator

This letter is to acknowledge and verify your reception of WVOW's signal on 1-23-52. Your report was naturally of great interest to us inasmuch as we were conducting equipment tests at that time.

A great many of those writing to us for verification of their reception have expressed a desire for further information about our operation. For the information of those so concerned here is a list of facts pertaining to "West Virginia's Newest and Finest Radio Station".

Owned and operated by The Logan Broadcasting Corporation.  
5000/1000 Watts AM - 22,000 Watts FM  
1290 Kilocycles AM - 92.3 Mc FM  
Directional system employing 4 towers in parallelogram.  
Towers are 205 ft and are located on Stratton Mountain in Logan, West Virginia. Elevation 2,150 feet.  
Studios are located on the 2nd Floor of The Consolidated Bus Terminal Building in Logan, West Virginia. The studio plant consists of two complete control rooms which operate independant of one another; studio A, and studio B; plus the auditorium which seats approximately 400 people.  
Primary coverage area is 6850 sq mi and reaches a potential audience of 750,000 people.  
Broadcasting hours will be from 4:30 AM to 1:00 AM.  
Our present plans call for us to begin regular commercial broadcasting activities on or about March 1, 1952.

Thanks again for letting us hear from you, and good listening in the future.

Sincerely yours

The Valley's Voice of Worship

March 10, 1986

Kermit Geary  
Walnutport, PA.

Dear Kermit,

I'm pleased to verify your reception of the WVWV DX test on Feb. 17, 1986 from 12:59 to 1:32am EST.

I've received over 30 reports on the test to date. Reports were received from: New Hampshire, Mass., Ct., NY, PA, Ontario, IL, TN, MD, MO, IN, OH, NJ and Sweden.

As soon as I get time I'll send a report to the musing column detailing the test results and reintroducing myself (I haven't mused for several years).

If everything goes well we'll be on 630 kHz (500w- ND, day) by next dx season and I'll do another test(s) then.

Sincerely,

*Bob Eddy*

The Valley's Voice of Worship

Nov. 27, 1985

Kermit Geary  
1266 Riverview Drive  
Walnutport, PA. 18088

Dear Kermit,

I am pleased to verify your reception of WVWV on Nov. 17, 1985 from 5:07 to 5:13pm EST.

WVWV studios are located at Greens Run Road, St. Marys, WV. along with WRRR-FM (W3R) which operates on 101.7 MHz with 3 kw ERP. W3R's format is adult contemporary.

The WVWV transmitter (Harris MW1 solid state) is located in Newport, Ohio approximately 2 miles from the studio. The antenna is a 150 ft. vertical, base insulated tower.

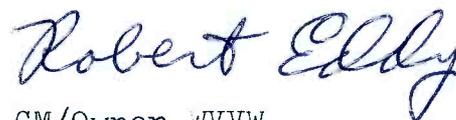

We currently have an application on file with the FCC to move to 630 kHz with 500 watts. Hopefully this will happen sometime next spring.

I would be interested in doing a DX test sometime this winter. You might pass this along to the other NRC members. Call me at 304-684-3400 or write a letter with some preferred dates and times.

I haven't done much DXing after midnight the past few years and am not sure which nights are best on 1570 as far as interference is concerned.

Thanks for the report and tape.

Sincerely,

GM/Owner WVWV

Dear Mr. Geary,

Thank you for your letter 2/16/70. According to our programming of Sunday, February 15, 1970, you did pick up our station WVAR.

The only difference was the D.J. was Chuck Tyree instead of Chuck Barry. Your record of our sign off was correct except we are on Cemetery road instead of Military road.

Thank you and we hope you will pick us up again.

Yours Truly,

*J. Mundy*

Dear Kermit,

We most certainly appreciate you writing to let us know just how we are doing with our signal.

I am enclosing a copy of the last page of your letter marking the words you had wrong, but there is sure no doubt but what you had us zeroed in.

The Sales Manager just informed me that the Sec. answered your letter but, I will also.

Here is a little history of the station:

Built in 1957----operated by two different companys until 1966-- at this time we purchased it-- we are home town boys--one is a Senator, one a banker, and I am an Electronic Engineer.

I now own 50% of the Stock.

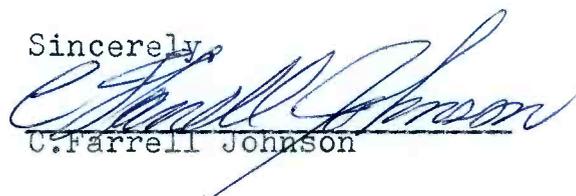

Our ant. is 3500 Ft above sea Level--our equipment is generally Gates--the transmitter is a Gates BCJ-1.

We may have a brochure soon and if I don't misplace your name I will send you one. I have completely rebuilt all of this equipment in the last three years.

Well Kermit thanks alot for the report and I hope this letter is what you expected.

In the meantime, I am,

Sincerely,

C. Farrell Johnson

Dear DX'er:

This letter will verify your reception of Radio Station WBRW, Welch West Virginia, on Oct 10th, 1940, at 5:06 AM, E. S. T.

We sincerely appreciate your interest in our station, and we find your report to be very valuable in determining our signal strength, and coverage in your territory.

WBRW is located in Welch, McDowell County, West Virginia, in the heart of the largest and finest deposit of coal in the world. Not only is this part of the country endowed with natural riches of inestimable value, but it is beautiful beyond description. The majestic rugged beauty of West Virginia's picturesque mountains offers a haven not only to the pleasure seeker, but to the home builder as well. It is here that the tourist, taking advantage of the road-builder's art in overcoming insurmountable obstacles, is able to slip away from the hum-drum of this work-a-day world and explore first hand the wonders of nature unspoiled and unmarred by the soiled finger of industry.

West Virginia's door is open -- the welcome sign is prominently displayed. WBRW joins in welcoming you to partake of our hospitality. Indeed, we are looking forward to an opportunity to meet, not only you, Radio Friend, but all our friends and listeners throughout the country.

With best wishes for lots of DX, we are,

Sincerely yours,

THE McDOWELL SERVICE COMPANY

Dear Mr. Geary:

We were glad to get your letter of September 23rd and to find out that our signal was reaching as far as you reported it.

We have checked your logging of this station on the dates mentioned in your letter and we find that they are correct. You did not, however, get all of our opening announcement, or at least you did not mention it in your letter. That which you did mention was correct.

Our signal could not be expected to be clear that far away, due to the fact that we operate on only 100 watts. But it was certainly good to hear that you could hear us early in the morning.

We have an application for 250 watts, and if Federal Communications Commission grants it, then you will probably pick up our signal much stronger.

Thanks again for your friendly letter. We certainly did appreciate hearing from you. Good luck.

Yours very truly

HURRICANE, WVA

W V K V, 1080 kiloHertz;  
Saturday evening, March 22, 1986,  
6:26 to 6:30 P.M., Eastern Standard Time:

- 6:26 to 6:29 P.M., Song: "Am I Losing You?", by a male vocalist, concluding a program of country music.
- 6:29 P.M., Concluding program announcement by the male announcer, with mention of a Sports Program "tomorrow afternoon at 1:00 o'clock; ..... be there!" The program will continue "until 5:15 when again we'll bring you ..... " another program of country music.
- 6:29½ P.M., Sign-off announcement:

"The staff and management of W V K V wish you a very pleasant Good Evening. ....  
W V K V is owned and operated by ..... Radio ....., and operates on a federally assigned frequency of 1080 kiloHertz with a power of 5000 watts.....  
Join us again tomorrow for another day of the best of country and the latest news....."

Station WVKV left the air at 6:30 P.M., E.S.T.

Please compare the above description with your programming on the evening of Saturday, March 22nd. Although there were breaks in my reception as noted because of the interference, I trust that there is sufficient data to prove that I was tuned to WVKV and that you will be able to confirm my reception. Your attention to this request will be greatly appreciated.

Best wishes to you, sir, and to WVKV for continued success in broadcasting. I shall continue to check your frequency and I hope to hear your signal again when atmospheric conditions are favorable. Looking forward to receiving your reply in confirmation of my reception of WVKV Country, for which I thank you, I am,

Very truly yours,

Thank you very much for your report of reception of WOAY on the morning of May 15, which this will verify.

In going through the files of correspondence before I arrived here I note another report from you. This may have been verified before, but if not, please consider this as verification of your reception report of Sunday, March 30, from 7:00 to 7:30 AM, EST.

We are currently signing on at 6:30 each day of the week, including Sunday, and will appreciate hearing from you if you happen to pick us up.

Very truly yours,

Harold B. Shaw  
Station Manager

Dear Mr. Geary:

I am pleased to confirm your reception of station WANR on Sunday, February 20th, 1983 from 5:50-6:00pm. The facts you provided do correspond with our programming for that time period.

WANR broadcasts a 5000 watt non-directional signal employing a Gates BC-5H transmitter and a 186' series fed antenna located atop Glenwood Heights in Wheeling, one of the highest points in Ohio County.

Thanks very much for your letter, and I hope you have continued success in your DX-ing efforts.

Sincerely yours,

A handwritten signature in blue ink that reads 'Rich Schlosser'.

Dear Mr. Geary:

This is to confirm your reception of our station on March 25, 1957.

Your report on our signal was very helpful. The distortion on our recorded music was probably caused by our over-modulating our transmitter slightly, since we were trying to keep our carrier as fully modulated as possible without over-modulation.

Our report on the program has been very successful. So far I have received 35 reports, ranging from all parts of the United States and parts of Canada. Even as far away as California.

Thanks for your very nice letter.

Yours Truly,

*William E. Ford*  
William E. Ford,

February 4, 1985

Dear Kermit,

Greetings to you from Sunny South Charleston!

Thank you for your recent DX Listening Post letter. Yes, I confirm the details you wrote us about in reference to WSCW's programming. We are "the Beautiful Sound of Praise", with an inspirational format, that includes some contemporary Christian music. All of the data you wrote to us was correct with some minor changes...Robbie Hiner (a man with a high voice) was the "female vocalist" who sang the patriotic song, "God Bless the U.S.A."

We are indeed 1410 kiloHertz with a daytime power of 5000 watts. We are owned by AMG International, a mission organization.

Thank you so much for your encouraging letter! And, if you're so inclined, pray for us.

Thanks again.

Sincerely,

A handwritten signature in blue ink that reads "Jerry Newcombe".

Dear Mr. Geary:

As I promised on my program tests May 7th, and May 8th, here is an acknowledgement of your "D. X. "report. I certainly appreciate your fine letter and the detailed account of your reception.

We have been having difficulty in ironing out several technical "bugs" in the equipment but it looks as though everything will be completed by this week-end and just as soon as the F. C. C. gives their approval we will be on the air with our programs.

Thanks very much for your co-operation and much success in your hobby.

Very truly yours,

Dear Mr. Heary.

Received your interesting letter of Oct 14, 1982. Please take this as confirmation that you did receive WKGA 1260 Kilohertz, Grafton, W.V. on Wednesday 10-13-82 8:00 AM EDT.

We program Mutual News at 8:00 AM followed by Shrine City news with John Callahan sponsored by The Blueville Bank.

We transmit at 500 wts. from 6:00 AM till sunset. Our musical programming is Country til 10:30 AM then gospel til 1:00 PM then resume with Country. We are located in a mountainous area of West Virginia and our 300 foot free standing Tower sits on top of a mountain at 2200 feet elevation.

Please do not be confused by the stationary. We bought WVVV in February 1982 and in July changed our

Buckhannon, West Virginia

April 20, 1961

Mr. Kermit Geary  
R. D. 2 Box 298  
Walnutport, Pa.

Dear Kermit:

Your report of the reception of WBUC on April 15, 1961 was logged correctly. We thank you for your report of the reception.

A word about WBUC. We have been on the air 16 months. We hope to have a power increase to 5 kw soon. The present transmitter is a Gates 1 kw using 833-A tubes for modulators and RF amplifiers. The tower is 200 feet high, placed on low lying ground, 380 feet from the transmitter. The tower is fed with buried co-ax.

The announcement you heard was a tape recording of our sign off announcement, and I was doing the announcing.

Studios and transmitter site are the same.

WBUC regularly programs using three turntables, three tape decks, and three microphones, as well as the other auxiliary inputs, remote lines, beep phone etc. A Gates "Yard" console with 8 inputs is used.

Once again, thanks for the report.

Sincerely

*Jesse D. Newman*

R. D. 2 Box 298  
Walnutport, Pa.  
18088

Dear Mr. Geary:

Your reception report of WBUC Radio October 15, 1967 is correct. I am pleased to send you this letter of confirmation.

At the time of our test, we were conducting our yearly proof of performance measurements, measuring the distortion, noise level and frequency response of our broadcast equipment. It is during these tests that WBUC ever has any nighttime broadcasts since our monthly frequency measurement is made locally. So, it is quite rare that we are on at night unless there is something special to do.

WBUC normally broadcasts daytime only with a power of 5,000 watts. The station was established by me in 1959. The transmitter is a Gates Radio Co. BC5P2. Our turntables, console, monitoring equipment, limiting amplifiers were all supplied by Gates.

The transmitters uses a single 3X2500F3 Eimac tube in the final amplifier with a pair of the same tube type operating in the modulator. We are now using the newer version, a 3CX2500F3. The tube operates with a normal plate voltage of 5,300 volts and a normal plate current of 1.3 amperes.

The antenna is a 200 foot uniform cross section tower located 380 feet from the transmitter.

Thank you for your interest, and good listening to you.

Sincerely

*Jay Newman*  
Jay Newman
