THE RADIO & ELECTRIC SHOP

WINGHAM, ONT.

BROADCAST PERIODS

Sundays 10.30 a.m.—12.10 p.m.

4.15—5.15 p.m.

6.45—8.10 p.m.

Tuesdays 12.30—1.30 noon

Thursdays 8—9 p.m.

Special DX programmes from 1 to 2.30 a.m. on
the mornings of the 10th and 25th of
December, January and February.
(DX Programmes on 1190 K.C.)

Wishes to thank you for your communication
and hereby verifies your reception of our programme of
Jan 25/31 as the selections mentioned comply
with our log. 10B.P. is maintained by radio fans, and does
no advertising, the station is entirely home made. Wing-
ham is a town of 2400 population and is the only town in
Canada having a broadcasting station. Our operating
hours are given on the back page.

May we have the pleasure of hearing from you
again?

Yours truly,

W. Brucholash

Dear Mr. Brauner -

The frequency wobble
may have been unsteady power
our hydro varies a lot.

It is hard to account
for poor modulation as I was
careful to not overload, and
on monitor seemed O.K.

I certainly want to thank
you for the interest and good
reports given on our tests
and hope if you ever get up here
to see you. I often go to Buffalo
in summer. how far are you
from there?

Your O + Friend
W. Bruchshank

Dear Mr. Brauner:

In reply to your letter of March 11, 1933 we wish to thank you for your report on our DX broadcast.

From your report it would seem that it was C.H.M.A. you heard. The time and type of selection you mentioned are correct.

We received a splendid report from Brooklyn as well as from DX'rs all the way across the continent. Again let us thank you for the publicity you gave us for this broadcast.

Yours truly,

Station Manager.

C J O C

"The Sunny South Station"

MARQUIS HOTEL

LETHBRIDGE, ALBERTA

November 30th, 1933.

Mr. J.W. Brauner,
17 East String,
WILLIAMSVILLE, New York.

Dear Mr. Brauner:

Many thanks for your letter of November 26th, and we take this opportunity to verify your report on our station. It is a pleasure indeed to receive such a complete report on a program from people who take such a keen interest, such as you do.

In connection with the Transmission from our Station and various other stations in the North. I attribute our success mainly to the fact that we are located in the Southern part of the province on the Prairie with no trees to attenuate our signal and in view of the many many letters we have received on this DX Program, I am rather inclined to believe that the mountains which are directly to the West of us, act as a screen and make our signals very directional. This however, may be just a bad guess.

Regarding the type of music we used. We picked on this type of music particularly, in view of the fact that it is very seldom if ever, heard from stations on this continent. The records are all imported from England and consequently when we get reports on our station we can be fairly certain that it was us they heard in view of the fact that they practically have to have the details for some of the numbers. It is almost impossible to guess at them, as can be done with the recordings used in this country.

Regarding our equipment. It is a very old fashioned transmitter which will have been scrapped before this letter reaches you and will be replaced with one of the newest modern transmitters on the market today.

-2-

Mr. J.W. Brauner---

We expect to run a DX Program again early in January at which time we will be notifying your club and if we get as many reports then, as we have now, we will be more than compensated for our trouble.

Again thanking you, I am,

Yours truly,

Dear Mr. Brauner;

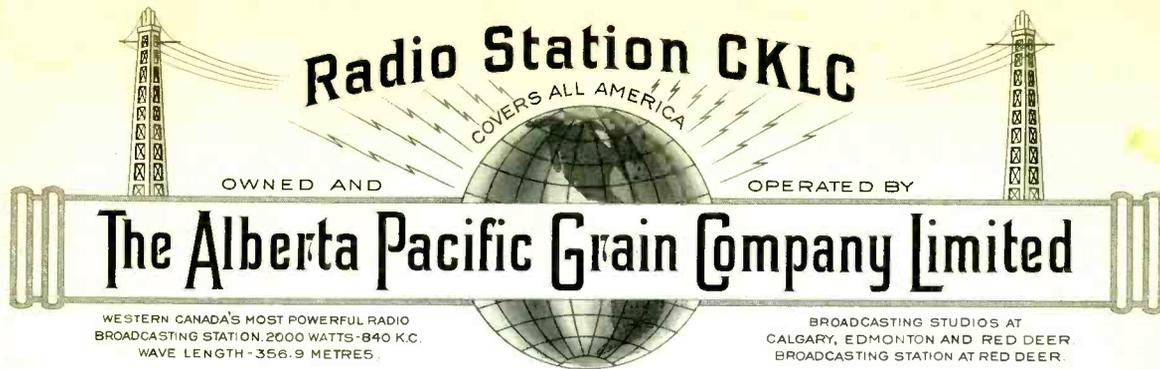

Thanks for your letter of the 11th. reporting the reception of our station on that date, we have had numerous reports stating that the weather conditions was very poor on the morning of the eleventh however we had a very pleasant and profitable (from the amount of letters that we received) from this programs

It is a pleasure to verify a report such as yours knowing the handicap one is up against with in trying to receive a transmitter such as ours with EXACTLY 100 watts over such a great distance.

I have a letter here to write to Mr. Applegate of Chicago tonight as well as a number of others so will make this as brief as possible, wishing you many good catches this coming Dx season.

Sincerely yours,

Radio Station C.K.B.I.

MARCH
SEVENTH
1934.

Mr. J. W. Brauner,
17 East Spring Street,
Williamsville, New York,
U.S.A.

Dear Sir:

I have your letter of March 3rd and thank you for your report. We are certainly meeting with very poor success in trying to reach the DX listeners of the Eastern United States and Canada. Our local conditions on that night were not good. The previous evening distant stations were coming in well, but on the night of the 2nd to 3rd reception was bad here and we felt that we would not be very successful on that night.

We shall not put on another test this season, but hope to do so in October or November, by which time certain tests and improvements to our transmitter will have been made. Our station is used for experiment and research by the Department of Electrical Engineering under whose direction the present transmitter has been built up and there is no doubt that after a summer's work we shall be in a greatly improved position for DX tests and transmission generally.

We will give your club lots of notice regarding our next test.

Yours very truly,

RADIO STATION CKUA,

Dear Sir -

Received your letter the other day and was very pleased with the information and am forwarding you one of our membership cards. This card is one we distribute locally for the purpose of obtaining money for operating expenses. We have not made a practice of putting on D.X. programs but I was down in Regina about 300 miles south of here and wanted to see how it came through, I also had a letter from a fan in Vancouver from the same program.

I am doing as you suggested writing to the Radio Press and having our call listed if possible. We are licensed for 25 watts to the antenna but on this occasion had about 75. I designed and built this station in spare time and we are on the air from 12 to 1. We normally maintain and 6. to 8 in the evening.

If at any time you hear us again I would appreciate it very much if you would drop me a line.

GEM OF THE WEST

Sincerely yours,
Lloyd Moffatt.

J. W. Brauner Esq.
Williamsville N.Y.

Jan 2 1934

Dear Mr Brauner:

Your letter dated Dec 17
1933 was interesting.

You received our 25 watt
station alright, although we may
have confused you somewhat.

We have received our
50 watt Commercial (CJAT) & the
boys of course could not resist
those call letters even with the 10 AT
25 watt outfit on 1155 K.C.

You had better put your
original verification card of 10 AT
in your stamp collection - it will
be quite rare, at least in N.Y.
State.

I have used all my cards,
& any new ones we get will be "CJAT
on 50 Watts & 1200 K.C."

This however confirms your
report of reception of 10 AT (CJAT)
Dec 17 1933 on 1155 K.C. 25 Watts.

Yours truly

Dear Mr. Brauner:

It was very kind of you to write us such a nice comprehensive letter and it was with no small degree of satisfaction that we learned that this station was heard with such good results in your famous Eastern state.

The writer is sorry that you were never able to pick up Ten AY, having been associated with that amateur station until the opening of the larger, commercial station. Ten AY is no longer on the air, having taken its bow on the inception of CKOV.

It gives us much pleasure in verifying your reception of CKOV's Dec. 27th. broadcast and, for your information, please be advised that we are on the air with a late program every Thursday and Saturday night of each week from midnight until 2 A. M. Pacific Standard time.

Kindly accept our thanks for your good wishes and regards and allow us to return the compliments to your good self. We trust that if you are listening in on CKOV again in the future that you will enjoy the program coming from this orchard paradise of B.C.

Yours very truly,

J. W. Browne

Jan. 31st, 1933.

Mr. J. W. Brauner,
17 E. Spring St.,
Williamsville, New York.

Dear Sir:

We are in receipt of your letter of recent date, and this will verify your reception of our Station 10AK.

We were on the air between

3.00 & 4.30 AM. E.S.T. Jan. 27th.

with a test programme from a new Transmitter, which uses 2-210 Tubes as Amplifiers.

At this time we wish to thank you for your report on our test. For the next month we expect to be testing frequently between the hours of 1.00 & 3.00 A.M. E.S.T. We are

Yours very truly,

M.H.R

Dear friend,

I have your letter and
glad to hear from you. and to know that we got
to you again. on our Dec 10 period I received
40 some letters on the boxes one over 85 came in.

10.B.P. is a Hartley with tuning
modulation. we are permitted to couple direct to ant
so get good radiation about (2 1/4 amps) two 210's
oscillators 3-250 modulators 600 on plate. 210's
have 400 on plate. I may have told you that before
I forget. I belong to A.R.R.I. but do no brass
pounding as I do not know code. tell me what your
code stands for. I mean in your letter you mention
signals through ASA 4 to 5. modulation R.F. I take it
modulation rounded like 80% but I do not know
ASA values. although I built 10.B.P. completely
I know very little about radio. I am alone in
my business which is 90% radio. so as far as
10.B.P. goes I do most everything myself. on OX

periods I am alone, so if you listen in
 its me doing the blabbing.

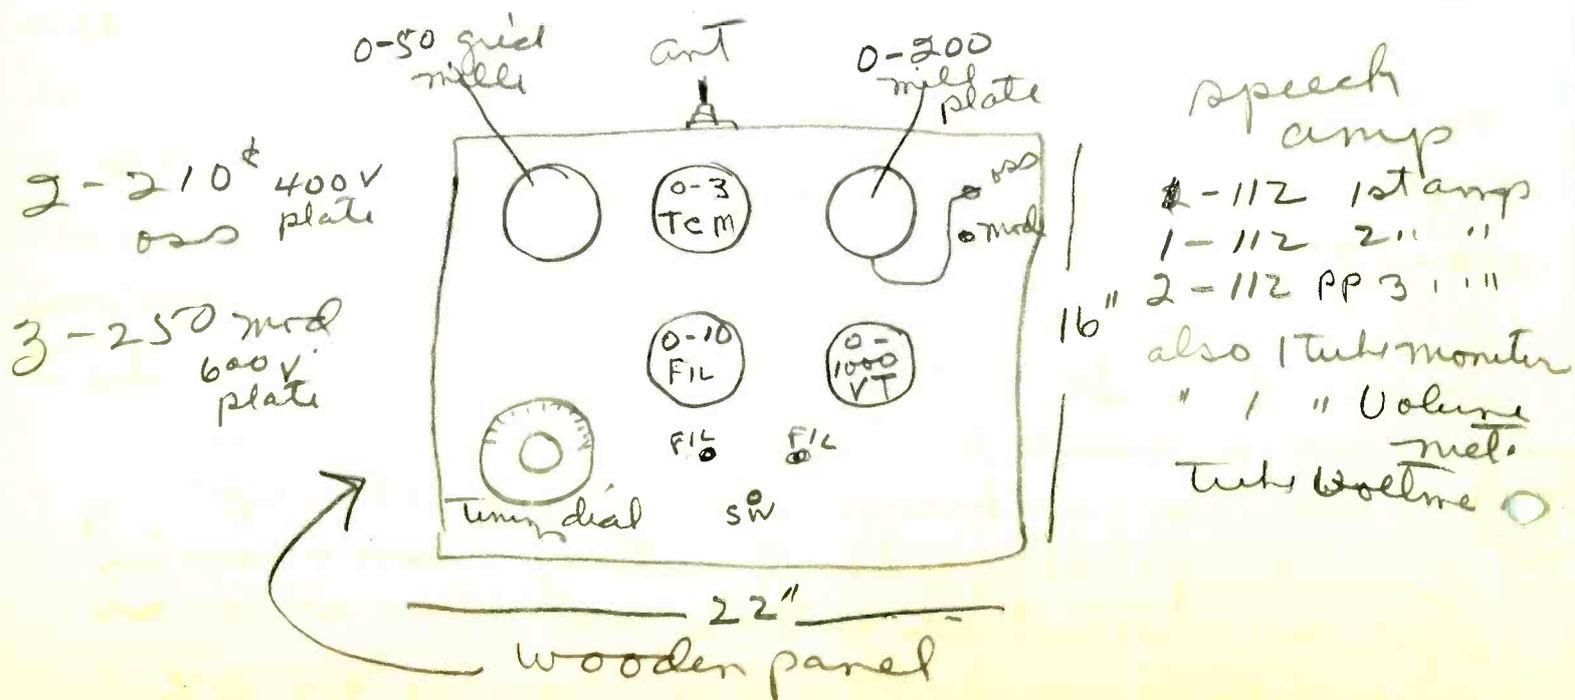

Your report is very useful
 to us as we like to know about quietness of carrier
 and if it is steady. please note if our wavelength
 alters on peaks of modulation. as heavy
 modulation with our circuit they say dont
 work so well.

I am going to write W.M.A.A.

I heard WHAS giving us a boost Mon night

We'll must go and fix a
 set so but y luck.

your truly
 W. L. Mickshank

Dear Mr Brauner;

I am sorry to be so late in answering your fine letter reporting on our tests. we certainly are glad to have the information which you took so much trouble to give us. all the other tests were recorded but this last one which was a studio concert.

I am sending you a clipping or I may send the paper with part of your letter in it. I must say that we are proud of the way this little old set is putting we received a letter from a chap in Beverly Hills Cal who had us on Feb 9 or 10 here. we just got this letter.

I feel I almost know you boys who have helped us on these tests and I intend to drop around and see you when I am in Buffalo. until then I remain

10 B.P. HEARD IN TWENTY-TWO STATES

The local broadcasting station concluded their series of 6 DX programs last week with a studio program and from reports received was the best of the series. In all six DX programs have been put on in the past three months, being heard in four provinces and twenty-two states. Letters have been received from as far west as Montana and as far east as Nova Scotia, and south to Carolina. The station received 273 letters from different listeners.

The following are the number of letters received from the different States and Provinces: New York 50, New Jersey 79, Illinois 41, Ohio 14, Pennsylvania 29, Massachusetts 3, Quebec 2, Wisconsin 4, Maryland 13, Virginia 5, Michigan 3, Ontario 19, Indiana 5, New Hampshire 4, Connecticut 5, and one from Vermont, Missouri, Nebraska, Nova Scotia, Manitoba, Maine, Carolina, Kansas, Montana, District of Columbia and Iowa.

At the late program of the Chicago Daily News Station on Monday evening the announcer stated that 10 B.P. was the best known low-powered station on the dial.

The following is clipped from a letter received from J. W. Brauner, of Syracuse, N.Y., in regard to the last broadcast, and speaks for itself as to the reception of this distance.

"I certainly enjoyed your program this morning, you had one fine bunch of artists present, the first group I heard was the Hawaiian trio who opened a group of selections with "Hila March" at 1.15. I also am addicted to old time music and your old timers were very good, so naturally I enjoyed their portion of the program. I wish I could personally thank the tenor who sang "Moonlight on the Colorado" and "When It's Spring-time in the Rockies."

NOV 3/32.

Mr J W Brauner
 Williamsville,
 N.Y.

Dear Friend:

I was glad to hear from you and to advise you of our intentions for this seasons Pt. I am enclosing our schedule which I trust is what you have in mind. we will be glad to dedicate the N.Y.P. to some of the programs.

We have rebuilt our station to oscillator amplifier with class B 100% modulation which helps the quality (which was badly needed) we use 25 watts input which is different than the American way of rating as an American station the power is based on output which makes 10 B.P. 12½ watts the American way of rating. This applies to all Canadian stations, a 100 watt American station is allowed to use an input of 200 watts which is about 100 watts output, while a Canadian station of 100 watt rating is only allowed 100 watts input, which at the antenna is only 50 watts. This might be good information for your club to know.

Dear Mr. Brauner,

Glad to hear from you again and to hear you are still located at Williamsville. Sorry to hear that part of our program was interrupted by interference. Our transmitter at CFCH is a brand new Marconi job, the latest in every respect being installed only about 4 months ago. The old rig, the one you mentioned, is the transmitter being used at CKGB in Timmins.

I am sorry I must cut this letter short but thanks a lot for taking the trouble to write us and I hope that this will serve as a verification. We will be on the air again with another DX broadcast on January 20th, 1935.

Yours DXingly,

December 7/32.

J. W. Brauner, Esq.,
17 East Spring Street,
Williamsville, N.Y.

Dear Sir/-

You will please accept my apology for not answering your most interesting communication of November 24th sooner. The fact of the matter is that one of our representatives was carrying it around in his pocket for a number of days showing it to newspaper reporters, and interested friends. I have finally managed to get my clutches on it and it gives me great pleasure to acknowledge its reception.

For some peculiar reason or other this station persists in pounding into the New England and adjacent states, particularly when we conduct any sort of unofficial DX test. On the particular evening which you mention we had been having trouble with a tank condenser spilling over. After making some adjustments we decided to split the ether for a few hours overtime just to give the entire mechanism a test. Having received permission from the Department of Marines and Fisheries, we also have been experimenting with frequency channels and that is probably the reason you found us on 950 KC instead of 930KC.

We have a new 100 watt, 100% job under construction and it should be on the air by Christmas time. You picked us up on our present equipment--50 watts, Hartley circuit--which is anything but efficient. We expect our new equipment to give us 400watts on peak modulation and as a result you should have no difficulty in contacting us provided we are successful in locating a channel that will allow us to operate without being cut to pieces. At the present time that is our chief difficulty.

C F C H

Northern Supplies' Radio Station

Capitol Theatre Building

North Bay - Ontario

2.

Your comments with regard to programmes and their presentation are much appreciated--particularly by myself. I major in this type of work and have had reason to be much gratified. Radio presentation in a small city is anything but a bed of roses as you may well appreciate but we are doing our best to maintain the recognized position--that of operating the finest of small radio stations in the Dominion of Canada. We are a member of the basic network of the Dominion Broadcasting Company and of the Canadian National Railways, which in itself is quite a distinction. I mention these items, not in bombastic fashion, but just as one radio man to another.

In conclusion I might say that we do not issue a special stamp but use a verification card one of which I am including in this letter.

Thanks for your letter old man and I shall be more than pleased to hear from you at any time. We shall be conducting tests when our new equipment takes the air and I shall make a point of arranging in advance to contact you so that we may have your comment.

Yours very truly,

RADIO STATION CFCH.

Dear Mr. Brauner:-

I felt that I must answer your letter personally so left it till last.

Sorry to hear that you have been unable to get our Sunday morning program but as you say the air is pretty well jammed up at that time.

Your report on our D.X. Program, which by the way is the first one we have put on since that one back in December 23rd, is received with thanks, as also your nice remarks. We have spent a lot of time and money to make the station as efficient and easy to listen to as possible and apparently have succeeded.

Talking of VE3DF reminds me of olden days; up until two years ago I was VE3CS of London, Ontario, Hi, working on 16, 20, 40 and sometimes on 80 Phone, you may have heard me.

Well old man, thanks again for your report and will be pleased to hear from you anytime,

73,

Dear Mr. Brauner:-

This is to acknowledge your letter of December the 12th, for which we thank you very very much. Both your Dec. 11th and Dec. 8th we can verify as being correct.

We are certainly pleased at the completeness of your report and wish to congratulate the members of the "Smallest DX Club in the World".

In this morning's mail I see another letter from you regarding our Special DX program on Tuesday Dec 23rd A.M. We might say that we have received letters from 35 States in the Union to date and still coming strong so your remark that we must have reached the east coast in fine shape is true!

A Special verification card for the DX program will follow in a day or so.

Again we thank you for your fine report and we take this opportunity of wishing you a happy and prosperous New Year.

Sincerely yours,

RADIO STATION C.F.C.O.

Dear Sir;

Thank you kindly for your letter of recent date.
You are obviously a member of the Owls Club.

Regarding your question pertaining to the hours
on the air of CHCS, a local station, I beg to say that this
station very rarely, if ever, broadcasts. It is operated by
the Hamilton Spectator Newspaper and when on the air uses
only a power of 5 Watts. To my knowledge this station hasn't
been heard in over 2 years and then it was only used to
broadcast civic election returns.

I am, Sir, Trusting that this answers fully your question

Very truly yours,

THE MAPLE LEAF RADIO CO. LTD.

Dear Sir---

Replying to yours of September 28th we are pleased to give you the desired information...C J K L is on frequency check from 1.31 AM until 1.39 AM on the morning of the 19th of each month and the 20th of each month... This is for the benefit of the Canadian Radio Broadcasting Commission but our signals of late have not been received due to heavy interference...in fact they may put us on later due to increased power on the U S stations...

Our regular hours of operation are from 12 o'clock noon until 1.30---that is 1 1/2 hours---then we return at 5 and remain on until 8 in the evening at which time we sign off and carry an occasional remote control dance broadcast usually between 10 PM and 11 PM

CHNL, New Lisheard is still unopened and will probably not be, until certain matters are ironed out with the Commission...This was to have been part of our Northern Broadcasting Company chain but the whole matter is in abeyance at this time...

Hoping this will be of some use to you, and thanking you for your interest, we remain.

Your truly

Dear Sir:

Just got your letter and must say I was glad to hear from you again. I too must thank you for that fine report you certainly covered it complete which is just what we wanted.

In regard to our frequency being 1198 in your judgment I can say that we are not crystal control yet but expect to have our crystal in ten days when we should be zero beat with 1200 kc. This may clear up the whistle but I don't expect to do well in your direction due to CKTB and your own stations. We are using 50 watts and glad to know we were even heard there. At the time you heard us it was raining hard here and as my counterpoise has a ground on it it reduced the output considerable. We are on the air each day except Wed from 12 to 1 noon and each Mon and Thur 6:30 pm to 9:30 pm. If things were favorable you might be able to hear us again.

It would be swell if we could have a clear wave to ourselves. I always

STUDIO AND TRANSMITTER IN

CKNX

THE RADIO & ELECTRIC SHOP

W. T. CRUICKSHANK, MANAGER

WINGHAM,
ONTARIO2

Thought 1190 would be a good one, but it is not a banddian wave. if you thought there would be any use we might arrange a late broadcast say about 230 am some morning after we get the crystal. another thing we have to do is to put up a new antennae system as we have used the present one for 6 or 7 years and it is too small for 50 watts.

Our new A cut crystal is supposed to keep us within 10 cycles so that's fairly close. we made the change over on Fri Apr 26th and were heard down in Baltimore by Mr P.E. Base who reported fair reception most of the time.

I wish in closing to again thank you and hope you will try us again and let us know. your reports are more valueable to us that any we get and it must be a lot of trouble to get it all in shape. I may look you up this summer as I have an uncle in Buffalo whom we visit at times. Thanks and

Best wishes

Williamsville, N. Y.

Dear Mr. Brauner:

We thank you for your acknowledgment in appreciation of our broadcasting program from Toronto on the evening of March 27th, and we think it very kind of you to take this trouble.

In compliance with your request, we have pleasure in enclosing herewith verification Reception Stamp of the station from which we broadcast.

We are very glad indeed that we were able to entertain you, and trust that you will be one of our regular listeners every Tuesday night from 10:00 p.m. to 12:00 p.m., Eastern Standard Time, when we will be broadcasting from Station C.K.O.W., (Canada's Kow), Toronto, 517 meters.

Again thanking you for your kindness, and assuring you that we thoroughly appreciate it, we are,

Very truly yours,

NESTLÉ'S FOOD COMPANY OF CANADA LIMITED.

Williamsville,
N.Y., U.S.A.

Dear Sir:

Your letter of the 28th. of April, to hand. Glad to state that your report on our signals is authentic. As we have no verification cards, as yet, I am taking the liberty of writing you this personal letter. Our transmitter is an R. E. L. job rated at 50 watts output, and uses the 100 percent system of modulation.

I will give you our schedule of broadcasting as it stands at present, Sunday: 9-10 P.M. E.S.T.

Monday: 12-1 P.M. E.S.T. & 7-8.30 P.M. E.S.T.

Tuesday: " " " " " "

Wednesday: " " " " " "

Thursday: " " " " " "

Friday: " " " " " "

Saturday: " " We will broadcast the Ontario Pro. League baseball games on Sat. afternoons, commencing Sat., May 10th. These broadcasts will be by remote control, and the time will be from 3.00 P.M. E.S.T. till about 5.30 or 6.00 P.M. E.S.T. Would certainly appreciate any reports on these remote control programmes.

In closing I want to state that we certainly appreciate your kindness in writing to us about your reception of our signals; such reports will always be answered, by me personally. Also I want to thank you on behalf of the artists. Trusting that I will have the pleasure of hearing from you again at some future date, I remain,

Yours very truly,

Willamsville, New York.

Dear Sir:

We have your letter advising us of reception on our DX program, and are glad to say that you are correct.

CKPC is a station recently operated in Preston, Ont., and now operates as The Voice of the Telephone City in Brantford. Our power is 100 watts, Crystal Controlled, and our antenna consists of wooden towers 112 ft. high. Our exact location is 65 miles W. of Buffalo on a direct line to Detroit and to the American border across Lake Erie we are 60 miles.

We shall be glad to hear from you again at any time if you are able to pick us up. With very best wishes for your DX-ing.

Cordially,

EMF/GMC

--Re: Buffalo DX Club Broadcast:--

Dear Sir:-

Please pardon my delay in attending to the proposition which you have to offer us in your letter of March 1st.1930.

Since you have not doubt not heard of our frequency allocation we might refer you to the letter-head.

It would not be convenient for us to run according to your suggestion, however I might suggest a program of an hour and a half duration - 12:00 (mid-night) until 1:30 a.m. on Saturday morning, April 19th. The time is Eastern Standard. This would give you ample time in which to notify the members, and the other clubs, as you suggested.

Since changing our frequency we are reaching out to more distant points, and you should experience no difficulty whatever in logging CKPR at the hour stated.

Our frequency may be occupied to a certain degree by a side band from WFIW or KMA, but we could arrange a slight alteration in wave to overcome this difficulty.

Please notify me at once if this will be satisfactory to you and your associates, as we must know in lots of time.

Yours very truly,

"C.K.P.R."

Dear Mr. Warner:

Thank you very much for the great help you gave on our recent DJ program, and also for the copies of News Service which I surely appreciated.

As you will see from the enclosed copy I have arranged another DJ program for February 17th. I do not know if there will be time enough for publicity, but arrangements have just been completed. I am enclosing a letter that may be published if you wish, as I understand that the time is short.

Thank you again for your co-operation, and trusting that we may continue to work together. I wish to remain,

Yours very truly,

Dear Mr. Brauner:-

It was certainly a pleasure to hear from you, particularly since you were reporting reception of CKPR (even though the report was not all we could wish for).

Realizing that weather conditions were unfavorable we are pleased with the reports up to this time, although it is early for the real DX.

It is certainly a great help to get such a complete and TRUTHFUL report as yours. We need more like you.

Kindest personal regards.

Yours very truly

Dear Sir:-

We are very sorry indeed that you have not received your verification and Ekko Stamp promptly, but this was due entirely to the many thousands of similar letters received at our office. We had no idea when we started our new broadcasting station that we would have so many listeners. We have on hand in our office at present 18,000 letters not answered.

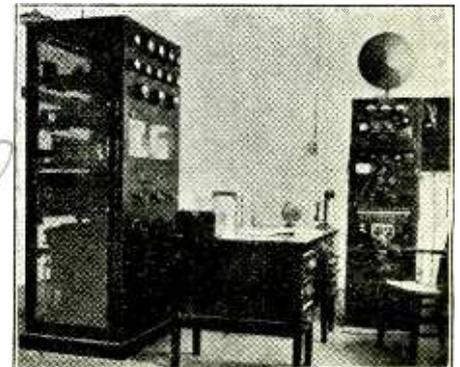

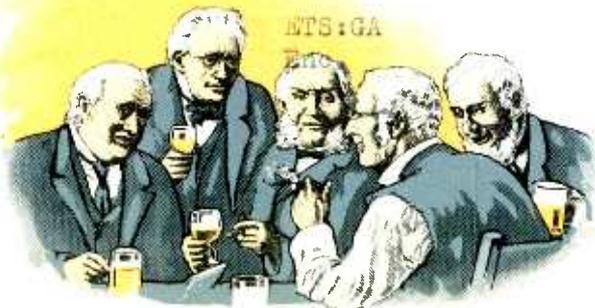

We are glad to know that you only live a few miles from Buffalo, and that you visit Canada frequently, and we are exceptionally pleased that you are familiar with our products. Sometime when you are visiting Canada and have an hour to spare would be pleased to have you call at our plant in St. Catharines, when we will try and make you at home, at least we can reason together.

We have much pleasure enclosing you an Ekko Stamp accompanied with Verification card.

THOMAS MAHER,
VICE-CHAIRMAN—VICE-PRÉSIDENT

LT.-COL. W. ARTHUR STEEL

Ottawa, May 5th, 1933.

Dear Sir,

This will acknowledge your letter of April 23rd, in which you give certain information with regard to radio conditions in Canada.

The data which you give in connection with the changes on Hamilton and Toronto stations is very interesting, as it is quite different from what we have been led to believe by the station owners themselves. I should be very glad indeed to hear from you occasionally, and we are particularly interested in whether the conditions you describe continue into the summer. Station CRCO in Ottawa was formerly known as CNRO and operated on 500 kilocycles. It has now been moved to 880 kilocycles. We would expect some decrease in coverage, but can assure you that within the service area of the station there is a vast improvement. Undoubtedly with your greater proximity to your high-power American stations you will have trouble in your own area. The description you give of the programs heard on 880 kilocycles on April 22nd would indicate that you were listening to the Ottawa station CRCO. At the time you mention, this station was operating without crystal control. I would be glad to know whether at the present time there is any difference in the receiving conditions which you describe.

I am enclosing herewith a copy of the new list of frequencies in use in Canada. I trust that this will be of some use to you in your work.

Yours very sincerely,

(W. Arthur Steel) Lieut.Col.
Commissioner.

J. W. Brauner, Esq.,
17 East Spring St.,
Williamsville, N. Y.

Dear Sir:

We have yours of the 4th. instant and are certainly very glad indeed to have you report that you listened to our D.X. program on December 4th.

You must realize that, when boys are working all day long, they do not like to get up in the night and put on a special program. However, we did happen to persuade them to do it in this case, and we are well satisfied with the results obtained.

We are very proud of our little transmitting equipment here, manufactured by the Marconi Company, and we think it is as good as anything on the market.

We are also very proud of our announcer, who is giving wonderful satisfaction.

There is no question at all about you hearing our Station, as all you told us was absolutely correct.

We have had over one hundred and fifty letters already, from as far south as Baltimore and as far west as Detroit, and, no doubt, the mails this week will bring in many more letters.

We hope to put on another program a little later, made up of local talent, but, before doing so, will advise your Radio Clubs, so that the American fans will be listening for us.

Thanking you for writing us, we are

Yours truly,

December 27, 1934.

Mr. J. W. Brauner,
17 East Spring St.,
Williamsville, N. Y.

Dear Sir:

Thank you for your communication of December 22nd and the detailed report which you have given. We certainly assure you that the pains you took are appreciated.

It might interest you to know that we made considerable coverage during these tests, having already heard from the western part of Ontario and as far south as Pennsylvania, although we feel certain, from the signal strength reported, that we must have travelled much further. Naturally, the interference on the same wave length would be sure to cut us off sooner than our signal would be otherwise affected.

We are already in communication with your co-worker, Mr. W. H. Applegate, and you will likely hear of a DX test from this station shortly, through your regular club channels.

Again thanking you for your report.

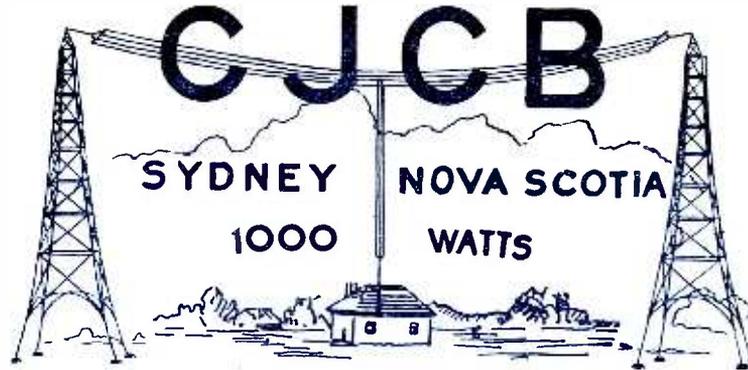

Very truly yours,

RADIO STATION CJCB

February 8, 1935.

Mr. J. W. Brauner,
17 E. Spring St.,
Williamsville, N. Y.

Dear Sir:

Thank you for your detailed report of January 27th, reporting reception of our DX test on that morning. Your further comment on the clarity and strength of our signal is also noted, and is deeply appreciated.

We note your reference to WXYZ interfering with reception from this station during our regular broadcasting hours, and in this connection would point out that we have replies from several parts of New York State that report just the opposite, that is that we blanket WXYZ. Frankly, therefore, it seems to be a fight between the two of us for coverage in New York State, but since we are considerably further away than WXYZ, we feel that we are doing very good under the circumstances.

It is not likely that we will be putting on DX tests for some time to come, which is a resumption of our previous policy to refuse DX test broadcasting, because of the improbability of a clear channel and the very early hours of the morning we have to go on the air.

Very truly yours,

RADIO STATION CJCB

Preparing for

YARMOUTH'S **175TH** ANNIVERSARY

Address all communications to
KIERAN KELTY, Executive Secretary
P. O. Box 179
Yarmouth, N. S., Canada

February
8
1936

Dear Mr. Brauner:-

Just a hearty hello for it seems like hearing from a long-lost boy to receive your letter. Although I am not connected with CJLS at the present time- having my hands full with the big celebration we are preparing for,- I do thank you for your fine letter and report on reception, not only for myself, but for our dandy little station. I assure you I am quite proud of it, and hope to see better things come from it in the future.

The Dx programs this year- for the NNRC- originate with the 175th Anniversary Advertising Committee, and I assure you we are getting our money's worth in responses. It has been a real pleasure to work with Bill Applegate, and around here the NNRC can ask for most anything they want and get it.

Incidentally, I have invited the NNRC to hold their Convention here this summer, and extended a personal invitation to every member to visit us, one way or another.

I might advise that you listen in the 5th of April, when I will have our local band (Yarmouth Military) **thirty-six pieces-** on the air in a concert program for the NNRC. I fancy that will climax my efforts with local talent.

I have on one or two occasions, said hello to you during these programs, and asked if you were sick, sore or lost, but I see from your letter that you were busy and I'm glad to hear that you are. I have passed along your thanks and regards to all the talent, and they all send -with myself- greetings, thanks and best wishes, and- hope we may have the pleasure of a visit from you sometime.

Cordially yours,

Kieran Kelly
Executive Secretary.

Mr. J. W. Brauner,
17 East Spring Street,
Williamsville, N. Y.

Dear Sir:

Thank you for your letter of December 24th, criticizing the form of verification used by Station CKLU. As a matter of fact, this Station is non-commercial, has practically no income, uses University funds, and provides DX programs at all only because persistently requested to do so. They do not come within the regular program of the Station.

I quite see your point of view in the matter. It came at a time when the entire office staff was especially busy and there was no alternative to this in the acknowledging of the hundreds of letters received from all over the United States and Canada.

Yours sincerely,

J. W. Patterson

President.

Dear Sir:-

We have just received your letter of November 21st reporting reception of our Station and wish to verify this report. We have been getting out unusually well lately, and have had reports of reception from St. Catherines, Ontario, several in Massachusette, New York, New Jersey and New Hampshire.

Although we have already promised to dedicate our DX program of December 4th to the New England Radio Club. We are also broadcasting a special DX program on Saturday December 3rd from 5.00 to 5.30 P.M. to the International Radio Club, and would appreciate it very much if you will arrange to give this special some publicity.

Yours truly,

R. T. HOLMAN LIMITED.

Dear Mr. Brauner:-

Very sorry to hear that your letter verifying a reception in 1929 was not acknowledged. However, this time to verify the DX Broadcast that you logged on the 23rd of April, 1932. I am surprised to hear that the broadcast came in so good and clear.

As asked on yours, CKCI is on the air everyday at 1. p.m. DST and also uses 645 kcs. I understand by your letter that you get this station, will you kindly verify that and also hope that you'll get CHRC in the evenings.

Yours very truly,

Radio Station CHRC,

Dear Sir:-

We are in receipt of your very kind letter regarding our broadcasting station C.H.Y.C. and we have looked up your letter of April 18th and in sending you the information that date you are absolutely correct and the "Song of the Vagabond" was one of the numbers played at that time. You can therefore, tell your Club that this is quite in order and that they should recognize this letter as an authority from our station assuring them that you heard the broadcast in question.

We thank you for your kind remarks contained in your letter and kindly be advised that we will be on the air again with a very powerful plant of 5 KW capacity, on September 15th.

Yours very truly,

Dear Mr. Brauner,

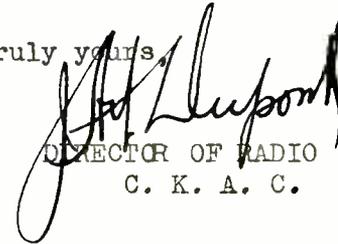

It is with great pleasure that we acknowledge
your letter of Sept. 25th.

We are glad to hear that you are enjoying our
programs. It is our policy to broadcast as much classical
and semi-classical music as possible, leaving jazz aside. Al-
though there are some very good dance orchestras which are a
delight to listeners-in.

We have no Ekko stamps, but are pleased to verify
your reception of our "Teaberry Chewing Gum" program, from
5.45 to 6.00 P.M., EST., and the morning program of "popular
melodies", from 9.45 to 10.00 A.M., EST.

C.H.Y.C. use our transmitter on Sundays only,
broadcasting from 11.00 to 12.30 in the morning and from 7.30
to 9.00 P.M. We are returning your coin.

Truly yours,

Dear Mr Brauner,

We greatly appreciate your letter of the 20th instant relative to our broadcast of August 17th between the hours of 7.25pm. and 8.00 $\frac{1}{2}$ pm. Eastern Daylight Saving time.

We are glad indeed to learn of the clarity with which our signal was received in Williamsville and to verify your reception of Station C.K.C.H. by your remarks concerning our program. It is a pleasure to receive word from our friends at distant points most especially when in the form of the very descriptive letter with which you have favoured us.

Radio Station CKCH, Hull, Quebec operates on a frequency of 1200 Kcs. with an output of 100 watts using the most modern Marconi equipment throughout.

We shall be glad to hear from you again at any time or from any member of the Newark News Radio Club who might happen to tune in on this Station.

With best wishes for your future "DX" efforts,

I remain,
Yours very truly,

AG-EWW

Dear Sir,

We have great pleasure in confirming your reception of a program from CJRW, Fleming, Saskatchewan, on June 16, 1929.

We do not as a rule send out confirmation of reception. We so rarely receive incorrect reports that we find it better to send out schedule cards or booklets to all listeners whose reports indicate actual reception. When we do receive an incorrect report, we make a practice of writing to the listener informing him of his error.

Thanking you for your interest in our station.

Yours very truly,

JAMES RICHARDSON & SONS, LIMITED

Broadcasting Manager.

Dear Mr. Brauner;

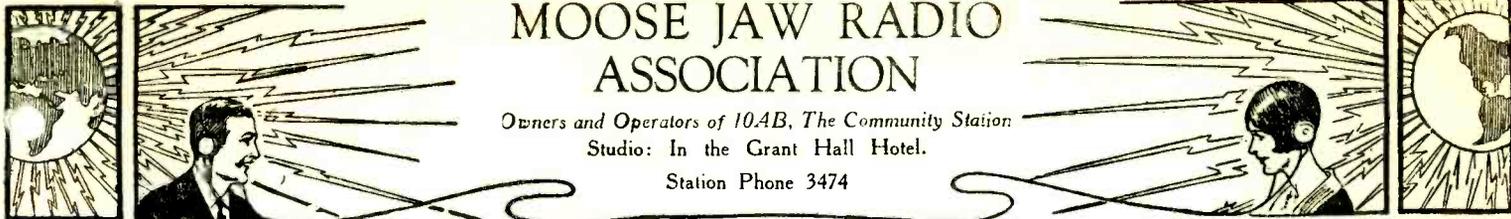

I have your letter of the 3rd inst. and was sorry that you were not able to pick up our station last Sunday morning. Apparently the weather was poor for broadcasting, nevertheless the replies began to come in yesterday and today in a very encouraging manner. For your information I am enclosing a clipping from last night's Moose Jaw Evening Times and this morning I received letters from Brooklyn N.Y.; Toledo, Ohio; Tacoma, Washington; Chicago Ill.; Drummondville, Quebec; and Victoria, British Columbia, all of whom undoubtedly had heard our program. Practically all reported heavy static so we are hoping for better weather next Sunday and the Sunday after.

We were very pleased indeed to get copies of the Newark news you so kindly sent us and we hope next fall to be able to put on another series of these programmes. We have certainly been surprised at the distance the station has carried. For your own confidential information our authorized power is 50 watts but our volt meter is broken and our power may be a little higher. We certainly appreciate the opportunity your organization have given us to put on these DA programmes and as I said before will be glad to co-operate with you again later in putting on another series. I will be writing you again later to give you any further interesting items in connection with this series of DA tests.

Yours truly,

MOOSE JAW RADIO ASSOCIATION.

We were interested ^{ed} to get your letter of April 10th but sorry that there was so much static that you were unable to hear our programme at all clearly. From the information you have in your letter you heard it alright but I hope that last Sunday morning was better from the static point of view and that you heard us at that time *letter*.

We have now completed our three tests for the Newark News Radio Club and are very pleased indeed with the result of these tests. We have had letters from the Atlantic and Pacific coasts from California, South Carolina, Colorado and Kansas. For your information I am enclosing an item appearing in our local paper last Saturday in this connection. The response has been so gratifying that we have decided to put on another two DX tests, one on Sunday morning May 1st at the request of the World Radio Reception Club and the other on Sunday May 8th at the request of the Transcontinental DX Club, both programmes commencing at 1:00 P.M., N.E.T.

I only hope it was as interesting to the members of the Newark News Radio Club to receive this programme as it was for us to broadcast it. May I thank your club for the splendid co-operation they gave us in connection with these programmes.

I notice, by the way, in your letter that we are running over our schedule time. That is true. We had some replies from Victoria B.C.

April 30th, 1932.

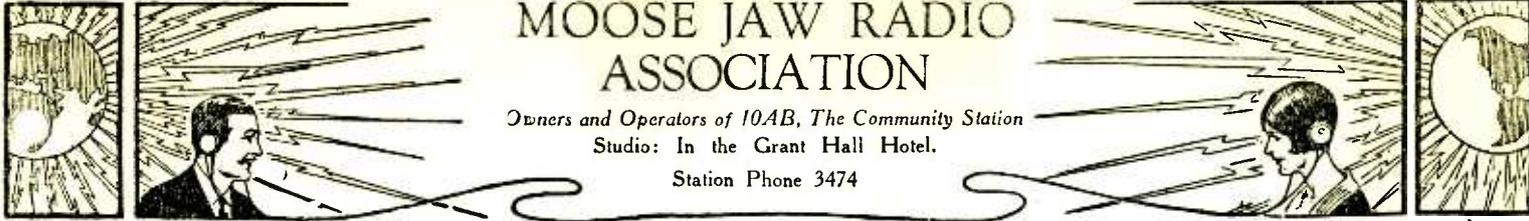

Mr. J. W. Brauner,
17 E. Spring St.,
Williamsville, N.Y.

Dear Mr. Brauner;

I was again pleased to receive your letter of April 21st but sorry you did not catch us on our three broadcasts.

I also want to thank you for the papers and clippings which have been sent and especially the Newark News which reached here this morning, giving a record of our proposed DX programme tomorrow morning. I read with interest your letter to Mr. Paine. Not being an "old hand" myself I was rather mystified at portions of your letter but Mr. Paine very kindly explained them to me. The matter of the results of our DX tests came before our executive at it's last meeting and I was instructed to write you on their behalf expressing the sincerest appreciation of the association to you, the Newark News Radio Club, the Newark News and other agencies in the States who co-operated with us so kindly and so freely in connection with these tests. We are more than pleased at the results and had we known the possibilities of DX programmes we would have put a number on earlier in the season. We hope however, this fall that we will be able to work with you again to put on a series when the weather is more propitious for broadcasting.

We were able to verify 31 letters and cards reporting reception on the first test, 82 on the second, and 27 on the third. We found Chicago got our programmes particularly well, also the district around Denver and Kansas

City. We also have had reports of good reception from Hamilton Ontario, Drummondville Quebec, Brooklyn N.Y., and different points in North Carolina, Ohio, West Virginia, Alabama, Michigan, Indiana, Colorado, Texas, Missouri, California, Washington and intervening states. I enclose herewith a list of members of your club who identified themselves by writing to this station. I thought it might be interesting to you.

I am very sorry that you did not hear these programmes because I should have liked to have your criticism for future improvement. If however you have heard of any criticism or could offer any we would certainly appreciate hearing from you. As I intimated before we have been ignorant of the possibilities of these tests and have not bothered much whether we were in any of the logs or not. I would like however to have the station mentioned for next fall in as many radio logs as possible. I was wondering if you could give me a hint as to how to go about this. If so it will be greatly appreciated.

I think when I answered you first letter last winter I told you that we were expecting to get new equipment. We have every expectation notwithstanding hard times of getting some money to purchase this equipment to be installed next fall and I am sure you can look forward to hearing us at that time even though we may not have got out to you this spring. I do not expect we will get any more results from the programmes tomorrow morning and the following Sunday morning but it will give us experience anyway.

With best wishes,

Yours truly,

November 17, 1932.

Mr. J. W. Brauner,
17 E. Spring St.,
Williamsville, New York

Dear Sir:-

We wish to thank you for your interest in writing us in connection with our DX Tests which commenced at 12:30 A.M. Mountain Standard Time on Sunday Morning, November 6th. 1932.

From the information contained in your letter concerning the Test, there can be no doubt but that you heard it, and we have pleasure indeed in verifying your reception.

We wish we could write you a more personal letter, but you will appreciate that each test brings so many letters that it would be a colossal task to answer them all as we would desire.

We broadcast tests every first and third Sundays in the month between 12:30 A.M. and 2:30 A.M. Mountain Standard Time and we would be very pleased to hear from you again.

Yours very truly,

MOOSE JAW RADIO ASSOCIATION.

MOOSE JAW, SASK.

November 18, 1932.

Mr. J. W. Brauner,
17 E. Spring St.,
Williamsville, N.Y.,

Dear Mr. Brauner:-

We certainly appreciate the very close co-operation you have extended to us in all our DX programmes. While we dedicate isolated programmes to different radio clubs, as you know, the Newark News Radio Club is our standby, and we cannot express our appreciation too sincerely of both your and their co-operation with us.

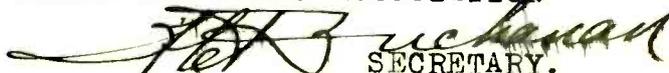

I was very interested to note the contents of your letter of Nov. 6th. We will try out New Zealand toward Spring as you suggest.

I do not myself feel competent to write you a letter about our transmitter. It is entirely home-made and I am going to ask the man who made it to write you about this, but you must not expect to hear from him at once as he has been very busy with new equipment and I just don't feel like asking him to write and do his subject justice just now.

You will be interested to know that we had over one-hundred and sixty replies to our last DX test from all over the North American Continent, the farthest away being Tampa, Florida. We heard from Mountainair, New Mexico, so have now heard from every state in the U.S.A. The letters we have received have been most gratifying in that practically every one has been able to give us absolute proof that they heard our programme.

We will surely appreciate hearing from you at any time. We know you must have a lot of correspondence to handle, but any time you can find the opportunity to write, we would appreciate your doing so.

Yours very truly,
MOOSE JAW RADIO ASSOCIATION

Feb. 28. 34.

Dear Mr. Brauner:-

I find no difficulty at all in being able to Officially Verify your report on reception of CFQC. on Feb. 24th. at 2.04.am.IST.

You give us no less than nine correct numbers, announcements etc.

Every word of this program was closely recorded, in case we would have to refer minutely to the log, therefore, I had but little difficulty in checking your report, and found it correct.

Please accept this letter as an Official Veri, and I am more pleased than I can tell, to be able to do it.

I imagine your location must be the worlds worst for Saskatchewan stations, as I have had many reports from nearly every state in the Union, including three from New Jersey.

Ninety per cent of the reports state that our signals came in fine, the average signal strength being R7 -8, and to our gratification and suprise, most of the reports were exceedingly comprehensive. One from West Virginia and another from New Jersey, gave us practically every number and announcement made correctly.

Radio is a strange and wonderful thing, and all apparently depends on the particular location of the reciever. The power of the reciever seems to mean nothing. One chap in Greenville Pa. gave four numbers rating us at R4, saying that he heard us with difficulty, and using a Scott 12 tube outfit, whereas another fellow, also in Greenville Pa, using a four tube custom built set, gives us the whole program, word for word, at R8 - 9. What can you make of such results?

No other reports mentioned any particulat weakening of our signals, from 2.30. on!

Thanking you once again for your report.

Yours very Sincerely, and thanks for the

Williamsville.
N.Y. USA.

Dear Mr. Brauner:-

Many thanks for your courtesy in writing to us, regarding your reception of our Transmission re the above program.

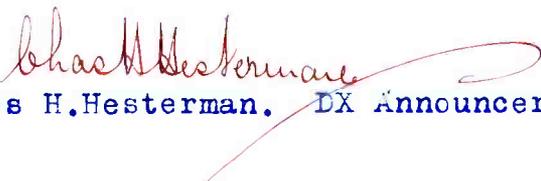

As on the last occasion, your report is correct, I mention this, as you may perhaps wish at some later date, to enter the competition for CDXR Special programs, in that event, this verie would come in useful.

We at CFQC, appreciate very much the Technicalities of your report, they are certainly useful and instructive, as it is only by recieving technical reports, that we are able to know of our weaknesses.

Reports have been recieved from many States and Provinces, and curiously enough, many of them complain about "Code" QRM. Where on earth it came from is a mystery, we are endeavouring to get a line on it, through comparing the reports in certain localities. We definitely have assured ourselves, that the QRM did not originate in Saskatoon.

Thanking you once again for your kindly report, and wishing you evry success in your future DXing activities.

I am, yours very Sincerely,

Charles H. Hesterman. DX Announcer.

Dear Mr. Brauner:

It was very good to hear from you again and your kind letter of January 28th was particularly interesting to us all here.

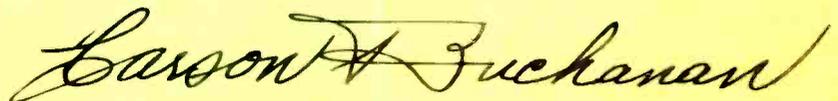

We had a very good response to this test here from Victoria, B.C., in Western Canada, Gananoque, Ont., in Eastern Canada, and from Maine, Conn., Maryland, Alabama, Missouri, Indiana, Iowa, Illinois, New York City, Colorado, Pennsylvania, Ohio, Mass., Vt., New Jersey, Mich., Neb., Kans., Tenn., Nevada, Calif. We were not able to get to the south-west portion of the States this time, apparently on account of Station KGFJ who were on at the same time. Every letter we got contained more than sufficient information to verify reception, although some in the east complained of very heavy static.

We have been approached by the International Dxers' Alliance to put on a test and we are doing so on the morning of March 11th, between 1:00 & 5:00 A.M., MST. We could not, however, leave the Newark News Radio Club out of any of our Dx 's so ^{we} are dedicating part of the program to your Club, between 2:00 & 3:00 A.M., MST.

With very best regards from us all here.

Yours very sincerely.

Dear Mr. Brauner:

Thank you very much indeed for your letter of January 28th, reporting reception of our Dx test Sunday morning, January 28th, between 1:00 & 2:00 A.M., MST.

We have carefully compared the items given in your letter with our official log, and find they are correct. We, therefore, take great pleasure in verifying your reception.

Again thanking you for your interest and information, we are,

Dear Mr. Brauner:

It was indeed good to receive your letter of December 16th, and I was glad to know you had heard us on the Relief Broadcast. The contents of your letter were not only very interesting but will be very helpful to us and we are very much obliged to you indeed for taking the trouble to write. You might be interested to know that the pick-up for this broadcast was identically the same for both stations, being supplied by the Telephone Company.

May I take this opportunity to reciprocate your very kind wishes for the New Year. and trust that we will be hearing from you again at the DX on January 6th.

Yours very sincerely,

Dear Mr. Brauner,

We have your letter of Nov. 28th. and offer our apologies for the delay in replying.

The program which you tuned in on the morning of the 28th. was indeed, coming from this station, and we thank you very much for your letter.

As a matter of fact we were not putting on a DX program in the usual sense of the word.. Our engineer wanted to go on the air after midnight in order to make some adjustments, and since I had to stay up late to announce it I thought I might just as well have some fun. Believe me I did. It's really surprising the number of people who have written considering the fact that we were only on the air for a half hour.

With best wishes,

Radio Station CHWC.
