Dear Sir :

I am pleased to confirm reception of our station, by you, as given in your report on 21 Jan 51 during the time 2:42 to 2:45am CST at which time we were conducting an equipment check. Our regular frequency check is the first Tuesday of each month from 1:50 to 2:05am CST. I invite you to tune in if you happen to be up at that hour.

Your report is sincerely appreciated at this station and will be kept on file with others.

Sincerely,

ROBERT W. NICKLES, *General Manager*
ROGER P. FOX, *Station Director*

13 March 1951

Mr. Norman L. Maguire
W5NXF
434 North Maple
Albuquerque, N.M.

Dear Mr. Maguire:

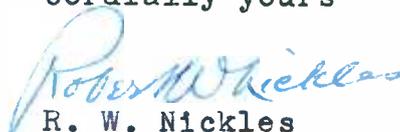

Thank you for your letter of March 1st reporting the reception that date of KFAL in Albuquerque.

Your report of reception is confirmed by our station log as 559:30 PM (CST) to approximately 605:15 PM.

We are indeed interested in this report, for reception over such distances is unusual. Apparently the skywave signal was building up considerably as sunset approached. This so far is our maximum DX reported on daytime operation.

KFAL operates with 250 watts into a quarter-wave guyed vertical, using a quarter-wave ground system. The transmitter is a Western Electric 310-B using six 242C tubes in the final stage.

Cordially yours

R. W. Nickles
(ex-W9EPX)

Dear Mr. Maguire:

We wish to thank you very much for the report. We were conducting equipment tests for a few nights and your report was very helpful.

We are a new station in Joplin, operating on 5000 watts day and 1000 watts night. We went on the air November 20, 1948

We use Gates equipment throughout - SA-50 console, three (3) turntables, BC-5A transmitter and three (3) 200 foot wincharger towers directional day and night.

We don't expect to be on in the future except for an occasional test program. Thanking you again for this report, I remain

Yours sincerely,

Ralph E. Meador

KICKAPOO PRAIRIE BROADCASTING CO., Inc.

FLOYD W. JONES, PRESIDENT • CHARLES E. SEIFERD, VICE-PRESIDENT AND GENERAL MANAGER

610 COLLEGE STREET + + + SPRINGFIELD 3, MISSOURI

April 1, 1950

To verify or not to verify, that is the question.
Whether 'tis nobler in your mind to suffer,
Wondering of your outrageous fortune in hearing our call,
Or for us to take arms against a sea of reports, and
By verifying, deplete them?

To verify - to confirm --

Once more; and by confirmation say we end your
Headaches, and the thousand natural cursings
That a non-verifier is heir to - 'tis a confirmation
Devoutly to be wished for.

To verify - to confirm --

To verify! Perchance to be indefinite!

Aye! There's the rub!

For in a verification which is indefinite, what words may come
From an unsuspecting DXer as he reads the phrase, 'Thanks for your
Report - due to ad-lib announcing, we cannot verify-' must give us pause.
There's the station that makes a calamity of so much DX.
For who cannot say that listener Norman Maguire
Has won the hard fought battle on 1340 and correctly
Heard KICK? Who can delay in notifying this dial twister
Of his merit, brought on by his patience on our miserable channel,
When we were engaged in a special transmission on March 27, 1950.
Who could fail to verify your reception at 2:19-2:36 AM, CST,
As you fought and cursed the all nighters covering our signal?
But that our dread of the incapability of our
Gates Equipment, that the 176' height of our Lehigh Tower,
That our RCA speech equipment might fail - puzzles our engineers,
And your reports make us bear in mind that we need not fear these things.
For our good equipment does bring KICK to all,
And thus, the native hue of the Kickapoo Prairie is
Scattered all over these United States and Canada.
And with great pleasure, and not pity, at this moment,
With due regard, we realize your radio currents were tuned to
Our call, K I C K! You heard us then - so know you now,
Our station is Mutual - largest of the networks.
Be all our programs remembered!

Dear Mr. Maguire;

Thank you for your report on the "test signals" of this station
Jan. 15.

The time at which you heard the signals coincide close with the station
maintenance log.

The test was a maintenance run but we make regular frequency checks
on the first of every month after which we receive a number of reports.
So far most of the signal reports have been from the East Coast and
very few from the West. The Eng.-Announcer was myself and my Ham
call is listed in the book. Maybe we can have a two way contact in the
future. Thanks again for the report.

Sincerely,
Gene Clay--WØIAR

Dear Mr. Maguire:

Thank you very much for your reception report on our frequency check run of November 11.

Your log of reception agrees precisely with our log here, so we are more than pleased to verify your report.

Your reception report is exceptionally welcome because it is the first we have had from any point west of Springfield. KTTS does not employ a directional radiator; however, most of our reception reports have come from Ohio, Pennsylvania, and New York. This made us wonder whether some unknown factor was influencing our skywave in the easterly direction.

We shall be greatly pleased if you can conveniently report on reception of our future test programs. These programs are regularly scheduled for the second and fourth Wednesdays in each month 2:00-2:15 a.m. cwt.

Sincerely,

Frank L. Barker
Chief Engineer

Dear Mr Maguire:

We were indeed pleased to have your report of reception of our station on January 28, 1943. I am attaching our formal card of verification which will acknowledge your DX report.

Quite recently KWTO moved its transmitter site and we have within the past two weeks returned to our full power, 5000watts. Naturally, a check on reception at more distance points is especially welcome at this time. We trust that you will be able to tune us in from time to time and will let us hear from you.

Please note the invitation on the verification card to tune to our "sister station" KGBX on I260 kilocycles. This transmitter signs on the air at 6:30 a. m. CWT and operates on a power of 5000 watts.

Again our sincere thanks for your report;

Very truly yours
