NEWCASTLE BROADCASTING CO.

NEWCASTLE, WYOMING

November 28, 1954

Mr. Norman L. Maguire
1420 Columbia Drive NE
Albuquerque, New Mexico

Dear Sir:

This will confirm your reception of KASL
November 24, 1954. We are scheduled for our monthly
frequency check each third Wednesday from 1:20 AM to
1:35 AM, and hope that you will pick us up again.

Thanks for your interest.

Sincerely,

Floyd L. Sparks, Manager.

Mr. Norman L. Maguire, W5NXF
1420 Columbia Drive NE
Albuquerque, New Mexico

Dear Mr. Maguire:

Thank you for your letter of September 18th, regarding your reception of our broadcast signal early that morning. I regret that I could not get to replying until this time.

We are happy to verify your reception. KATI was making its regular monthly frequency measurement check that morning from 1:00-1:15 AM MST, for reception by a monitoring agency in Kansas City. For your records, our power is 250 watts, our frequency 1400 kc. The announcement you quoted at 1:15 AM was ours.

From your description, it appears that you have a first class "rig". We hope you hear us often.

Thank you very much for your interest.

Sincerely yours,

KATI BROADCASTING CORPORATION

J. D. Baker, for
the Chief Engineer

Albuquerque,
New Mexico,

Dear Mr. Maguire:

Thank you for the nice letter, and report of our February 28th program. From all indications, you must have become a master at reading through QRN to get almost solid copy.

This being our first report from your state, I am glad you gave the Wx report in such detail. Also your receiver and direction of antenna - both helped, no doubt.

Hoping you have many fine DX verifications in the future. I know you justly deserve this one from our station.

Yours truly,

Lizette Wolf

Dear Mr. Maguire:

We are indeed sorry that you are receiving this correspondence a little late. However, since you wrote, the Chief Engineer here has left for another job and since your letter was filed, we are just getting around to answering it now.

We are glad to hear that you received our station on 1490 kcs. on September 9, 1951. We conduct these tests every month with the Commercial Radio Monitoring Company of Kansas City, Mo. usually on the 15th of the month.

Best of luck with your DX reception and here's hoping that you will receive us again some night on your "rig".

Sincerely yours,

A handwritten signature in cursive script that reads "James E. White".

Albuquerque, New Mexico

Dear Mr. Maguire,

Thank you very much for your letter and reception report. I don't think I will have to consult my transmitter log to be able to verify your report; I was conducting the test myself and do remember the time of our frequency measurement.

Your reception of our station was better than that of the company making the reception report, and our frequency measurement, the Commercial Radio Monitoring Company of Kansas City.

With a frequency of 1490 you probably realize that we are a class IV AM station with a power of only 250W. We are also in a small town of only about 3500 population.

Thanks again for your reception report.

Sincerely yours,

Robert H. Larson
Station Manager &
Chief Engineer

Dear Sir:

I am very happy to confirm your report on reception of our DXer program of Feb. 15, 1954 from 1:30 A.M. to 2:00 A.M. MST. We ran into considerable difficulty due to a conelrad test on the West coast and WEDC in Chicago on the air and numerable other stations running Frequency tests in cluding KXLJ Helena, Montana.

Our transmitter and tower equipment consists of:

GATES 250A transmitter
200 Ft. Windcharger tower
120 ground radials 200 Ft. long

Wish to thank the National Radio Club and all the DXers for all the splended letters and cooperation they have given us. We have heard from 16 states Canada and New Zealand. We hope that we will be able to run another DXers program inthe near future.

Sincerely,

C.W. Brokaw C.E.

Feb.16,1956

Dear Norman;

In looking through my files the other day I ran across your letter concerning the receipt of our frequency check for Oct.28th.I'm terribly sorry for the delay as I know how you fellows like to receive your letter of confirmation.

I trust that this not to late to be of value to you.

Your receipt of KODI on the above date and at the above time (1:55 to 2:10 MST) is correct as that is our regular Freq. check time and date.

Sorry for the delay and I hope that this Squares things for you.

Yours Truly,

A handwritten signature in blue ink that reads "Hal Bowen". The signature is written in a cursive style with a large, sweeping "H" and "B".

MUTUAL BROADCASTING SYSTEM

TELEPHONE 4888
LARAMIE, WYOMING

April 22, 1948

Mr. Norman L. Maguire
434 North Maple
Albuquerque, New Mexico

Dear Sir:

I wish to apologize for the delay in answering your verification of reception of KOWB's signal. I have been in the hospital for some time and necessarily have neglected my correspondence.

I have checked the contents of your letter and I am pleased to be able to verify your reception.

For your information regarding Station KOWB, we are using a Collins 300G 250 watt transmitter which operates on a frequency of 1340 KC's. Our studio and audio equipment is also Collins. We are using a wincharger guyed tower slightly less than one-quarter wave length long. Our studio and transmitter equipment are contained under one roof. The building is of modern type architecture which fits in very nicely with the surroundings here at Laramie.

Station KOWB is owned by local businessmen of Laramie and started operating February 20th. We are affiliated with Mutual Broadcasting System. For your information we are conducting frequency measurements in the future on the first Thursday of each month.

Again I wish to thank you for your letter and to express my regrets at the delay in verifying same.

Sincerely yours,

Charles R. Bilyue, Chief Engineer

Dear Mr. Maguire:

This will confirm your report of KPOW's Frequency Check of Wednesday morning, March 24, from 2 to 2:30, MWT, and dedicated to the National Radio Club. I am very happy to have received all of your letters regarding this check from you members of this National Radio Club.

Our monthly check is made every fourth Wednesday of the month from 2 to 2:30 A.M., MWT.

Mr. Meyer is a Class "A" Amateur Ham, therefore, our transmitting equipment was his biggest hobby before he entered the U. S. Navy. I am trying to "keep the home fires burning" until he returns after the duration and can take over again. Incidentally, I might mention at this time that he built his own short-wave transmitter for our home and holds "WAS" and "WAC" certificates. He designed a three-beam antenna, which occupied two pages of QST Magazine of May, 1939.

I would be very happy if you would drop me a line at any time you hear KPOW on the air. If in the future you would like to have another dedication made, just drop me a line and I shall be very happy to do this.

Sincerely yours,

Rosemary C Meyer

Dear Mr. Maguire:

We are happy to verify your reception of
Radio station KTHE on December 17, 1955.

You may be interested to know that the Polio
marathon (in which KTHE remained on the air for
seventy two hour) and our KTHE Polio local talent
jamboree netted \$1010.00 for the Polio fund. It
was part of this marathon that you picked up.
We are, by the way, an independent.

Thank you for taking the time to write us.

Sincerely,
Joe C. Henry, Mgr.

Dear Norman:

Thank you very much for your reception report. The information listed in your letter is correct.

There has been some confusion as to our call letters. KTWO-TV recently purchased KSPR Radio and changed the call letters of the 1470 spot to KTWO.

We operate on 1470 kilocycles with 5000 watts power daytimes and 1000 watts at night. Both KTWO-TV and KTWO Radio are located at "Broadcast Center," 3900 East Second in Casper. KTWO beings broadcasting at 6:00 a.m. and signs off at 1:00 a.m. daily, Monday through Saturday; Sunday hours are 7:55 a.m. to 11:15 p.m.

Again, thank you for your reception report and your interest.

Sincerely,

Marion L. Cunningham
