SUPER

The 1941 Sales Leader

Here is a radio that has rich, appealing tone quality, brilliant performance, power, dependability and beautifully designed cabinet. The high quality and fine craftsmanship together with the remarkably low price, makes this radio one of the biggest values of the year.

5 Tube AC-DC Superhet

The powerful superheterodyne circuit has a tuning range of 540 to 1730 Kc, covering full broadcast band and upper police band. **Built-in antenna**—no aerial or ground necessary. **Large aeroplane-type dial.** Unparalleled tone quality and power with 5" **permanent magnet speaker** and beam power output. **Variable tone control** to suit every individual preference. **Automatic Volume Control** minimizes and often eliminates fading. All working multi-purpose tubes give performance equal to much larger sets. Tubes used: 12SQ7, 12SK7, 12SA7, 50L6GT, 35Z5GT. The gracefully streamlined cabinet is available in either gleaming Ivory or beautifully figured Walnut finish. Louvre grill carries out streamline design. Size 12"x7"x7" deep. Operates on 110 volts 50/60 cycles AC or DC.

D17591—In Walnut Plastic Cabinet.

Complete with tubes. List, \$14.95.

YOUR PRICE, Each \$7.99 **\$9.29**

In Lots of 3, Each

D17592—In Ivory finished Cabinet.

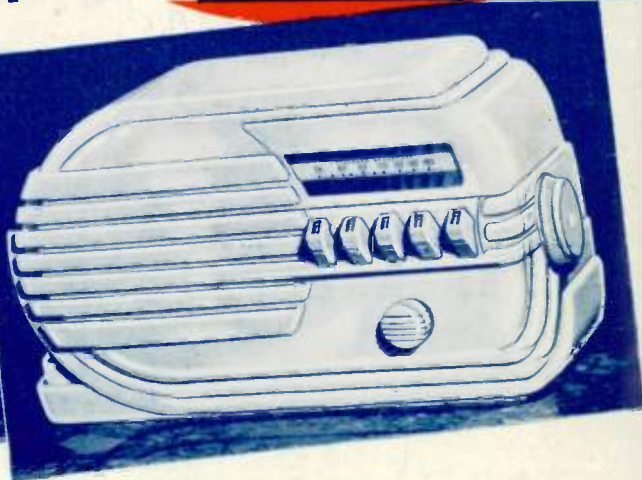

Complete with tubes. List, \$16.95.

AUTOMATIC RECORD CHANGING UNITS

Luxurious record reproducers with built-in Automatic Record Changers. Wireless Models have built-in 2 tube "wireless oscillator" and will operate at some distance from any radio set without direct connection. Does not interfere with set operation. Changer plays ten 12" or twelve 10" records automatically, re-

flects any record at will, uses crystal pickup, has needle-cup, on-off switch and volume control. Selected walnut veneer cabinet hinged lid. Table Model size: 21"x16 1/4"x12 1/4". Console Model size 21"x16 1/4"x31". For 110 volt 60 cycle AC operation.

D17672—Wireless Type Table Model. Complete with tubes.
YOUR PRICE **\$3675**

D17673—Wired Type Table Model. Same as above except requires single connection to radio or amplifier.
YOUR PRICE **\$3150**

D17674—Wireless Type Console Model. Complete with tubes.
YOUR PRICE **\$4275**

D17675—Wired Type Console Model. Same as above except requires single connection to radio or amplifier.
YOUR PRICE **\$3750**

4 TUBE RADIO-PHONOGRAPH

A 4 tube superheterodyne table model radio and record player compactly housed in attractive rich dark brown leatherette covered case with hinged lid. Has A.V.C., beam power output, and 5" P.M. dynamic speaker. Illuminated airplane dial covers complete broadcast and upper police bands from 540 to 1720 Kc. Phonograph has high fidelity true-tracking crystal pick-up. Self-starting constant speed quiet electric motor. Plays both 10" and 12" records. Tubes used: 1 each 12SQ7, 12SA7, 50L6GT and 3.25G. Size, 11 1/8" x 9 1/2" x 11 1/4" deep.

D17638—Table Model 4 tube Radio-Phono-Combination. Complete with tubes. For 110 volt 60 cycle AC.
List, \$19.95.
YOUR PRICE **\$1385**

NEWEST RECORD PLAYERS WITH BUILT-IN AMPLIFIERS

Completely self-contained electric phonographs. Will play 10 or 12" records at 78 RPM. No additional accessories required as each unit has its own built-in 2 watt amplifier and PM Dynamic speaker. Amplifier uses 2 tubes in an inverse feedback circuit that develops a rich faithful tone

D17660—Economy electric table model. Housed in leatherette covered case, size 7 1/2" wide x 12" deep x 7" high. Complete as described above with high fidelity offset crystal pickup arm rest, volume control, on-off switch and tubes. No accessories required.
YOUR PRICE, Each **\$11.72**
In Lots of 3, **\$11.20**

D17661—DeLuxe table model. Smartly designed walnut cabinet with hinged lid. Plays 10 or 12" records with lid closed. Cabinet size 13 1/2" long x 12 1/2" deep x 9 1/2" high. Complete as described above except also includes needle cup and jeweled pilot light.
YOUR PRICE, Each **\$17.95**
In Lots of 3, **\$16.95**

quality. Phono motor is self-starting rim drive type running at 78 RPM. Also included are high fidelity offset head crystal pickup, pickup arm rest, volume control and on-off switch. Complete with tubes. 110-120 Volt 60 cycle AC operation.

D17662—Portable Type. Similar to other models except has more powerful amplifier and speaker, needle cup, tone control and changer which plays ten 12" or twelve 10" records. Portable case with carrying handle is covered with airplane luggage cloth. Size, 16 x 16 x 14" high.
YOUR PRICE, Each **\$39.75**
In Lots of 3, **\$37.95**

D17663—Portable Model in warm effect striped airplane luggage leatherette with hinged lid and handle. Removable compartment holds eight 10" records. Size, 13 1/2" x 13 1/2" x 10". Complete as described above except includes tone control and needle cup.
YOUR PRICE, Each **\$15.95**
In Lots of 3, **\$15.25**

WIRED AND WIRELESS TYPE RECORD PLAYBACK UNITS

Converts any radio into an electric phonograph. Each model is equipped with 78 RPM self-starting constant speed rim drive electric motor, light weight crystal pickup, arm rest, volume control, on-off switch and needle cup. Plays all 10" and 12" records. Wireless Models do not require connection to radio and will operate with any set. Includes highly efficient built-in 2

Housed in an attractive open type walnut cabinet with graceful roll over edge. Size 12" long x 10 1/2" deep x 7" high.

HYTRON BANTAM RADIO TUBES

Interchangeable with Octal Base "G", "MG" and "GT" type and Metal Tubes. The greatest contribution to compact radios. Diameter 1 1/4". Overall height ranging from 2 1/2" to 3 1/2". Short connection leads and metal shield band at base adds greatly to stability of receiver operation. Low inter-electrode capacitance. Tube elements tightly braced making tubes especially desirable for use where excessive vibration is encountered. Complete freedom from gas liberated from envelope by use of glass instead of metal envelope. Tubes replace any octal base "G", "MG" and "GT" type or metal tubes bearing same type number with exception of the letter "T" or "GT". Includes external metal shield gasket at right at no extra cost so that tube may be used to replace metal tubes and not require re-alignment of receiver circuit.

RADIO *Readrite* TESTERS RANGER

Direct Reading Tube Checkers for Tubes of Today and Tomorrow With "Red Dot" Meter

Model 432A and Model 432A-742 tube checkers are supplied with the famous Triplett "Red Dot" lifetime guaranteed Meters as your assurance of life time service. No tester is better than the meter used in it. Triplett makes only quality instruments and uses the "Red Dot" insignia to bring to your attention the quality construction of these instruments.

Model 432A

D17027—As illustrated at left.
Size 9x8½x1".
YOUR PRICE \$17.49

D17014 — With tool and parts compartment in case.
Size 9½x10½x6¾".
YOUR PRICE \$18.47

The outstanding tube tester buy—quality without extravagance. Designed to test the tubes of tomorrow as well as today. A safeguard against further tube changes is provided by the flexible filament switching arrangement giving any voltage from 1 to 120. Tester has sockets for Local, Single Ended, Bantam Jr., Gaseous Rectifier, Ballast and all regular type tubes. Separate plate tests on shorts indicated. Instantly shows the square "Red Dot" Triplett Precision

diodes and rectifiers are provided. Neon shorts indicated. The large 3" Meter has a 1 M.A. D'Arsonval movement with direct reading 3 color scale and best quality sapphire jewel bearings. Separate line voltage meter permits constant line voltage indication and control without readjusting controls. The instrument is designed for professional appearance as well as simple operation. Modernistic etched panel in silver and black. Housed in portable leatherette covered carrying case with removable hinged cover—suitable for either counter or portable use. Up-to-date charts are furnished as new tubes appear. Complete with operating instructions. For 105-120 volt, 60 cycle AC operation.

Model 432A-742

Has Built-In
Volt-Ohm Milliammeter
Tester

D17029—In case as illustrated at right. Size 12½x8½x7½".
YOUR PRICE \$26.31

D17013 — In case with compartment for parts and tools. Size 13x10½x7".
YOUR PRICE \$27.29

This Tube Tester-Volt-Ohm-MA Tester Combination gives the serviceman everything he could expect from separate units. An outstanding quality model at a price within reach of everyone. The tube testing unit is exactly identical with model 432A listed at left. The Volt-Ohm-MA section is a separate panel with range selector switch, ohmmeter zero adjuster and jacks. Ranges provided: AC-DC Volts, 0-10-50-250-500-2500 (DC at 1000 o.p.v.). DC Milliamperes, 0-1-10-100. Resistance: 5 to 500 ohms (25 mid-scale), 0-100,000 ohms and 0-1½ megohms. Ohmmeter is battery operated. The circuit is favored by servicemen who demand more accuracy than obtained from ordinary ohmmeter power supply circuits. Both units are housed together in attractive black leatherette covered case with removable hinged cover—suitable for either counter or portable use. Panels are etched and finished in silver and black. Complete with test leads and instructions. Less battery, use 1½v. flashlight type.

"Big Boy" Volt-Ohm-Milliammeter

With 6" Scale Meter
Model 860

D17012—Model 860. Complete with test leads and instructions. Battery provided for ohms ranges up to 100,000 ohms. (Has provisions for self-contained 22½ volt C battery for higher ohm ranges).
YOUR PRICE \$17.49

Incorporates a fine quality giant 6 inch scale D'Arsonval movement type meter featuring two genuine sapphire jewel bearings. All scales are easily and readily readable. Ranges: DC Volts, 0-10-50-250-500-1000 at 1000 o.p.v. AC Volts, 0-10-50-250-1000 at 400 o.p.v. DC Ma., 0-1-10-100. Resistance, 0-500-100,000-1.5 megohms with zero adjustment. Selector switch makes all ranges instantly available at three tip jacks. Attractively designed metal case finished in maroon with cream-yellow panel and red trim and markings. Size 11½x7½x4½". Attached handle for carrying.

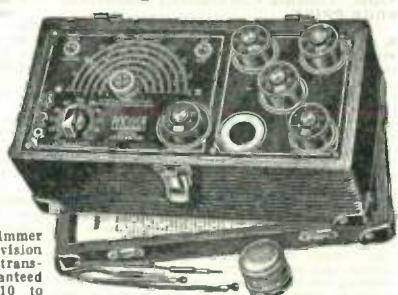

Model 557 All Wave Signal Generator

Direct Reading

A17004 — Complete Signal Generator to tune from 110 to 20,000 Kc. Batteries, cables, tubes and instructions included. List Price, \$31.50.

YOUR PRICE \$18.52

Covers from 110 Kc. to 20 Mc. all on fundamental frequencies. Each of the five plug-in coils supplied is calibrated by an exclusive method of peaking with built-in trimmer condensers. Large full vision direct reading dial with translucent dial pointer, guaranteed Accuracy of 1% from 110 to 3,000 Kc.; 2% for higher frequencies. Separate radio and audio generator stages. Free from frequency shift due to output attenuation or battery voltage. Completely shielded from static and magnetic fields. Effective attenuation and stability together with strong signal strength either modulated or unmodulated. Supplied complete with two type '30 laboratory tested aged tubes and all batteries. Size 12"x6½"x5½" high. The instrument is housed in an all metal case and placed in a fabricoid covered carrying case.

Radio Set Analyzers

Model 710A

D17026—Model 710A. Complete with analyzer plug and cable, adapters and test leads.
YOUR PRICE \$16.17

Checks all parts of radio tube circuits by plugging directly into the receiving set socket. For all 4-5-6-7 and octal prong tube types except local and miniature types (local adapters must be purchased separately). Ranges: DC Volts, 0-15-60-300-600; DC Mills., 0-15-150; and AC Volts, 0-10-140-700. Selector switch and jacks are provided to make individual range connections for each of the three meters. Black leatherette covered case. Size, 11"x8½"x4".

Model 720A Point to Point Set Analyzer

Measures resistance, capacity, continuity and voltage of any tube circuit. Point-to-Point tests are made by plugging into the receiving set sockets. Accommodates all 4, 5, 6, 7 and octal prong tubes except locals and miniature types (local adapters must be purchased separately). Tester socket terminals are arranged to RMA standards, making it unnecessary to remove chassis from cabinet. Rotation of tube elements does not affect tests. Has two meters—DC scale reading 15-150-300-600 volts, 15-150 milliamperes; AC scale reading 10-25-150-750 volts. Black leatherette covered case similar to above in appearance. Size, 11"x8½"x4". Removable hinged cover.

D17021—Model 720-A. Complete with Analyzer cable, 5 adapters and test leads.
YOUR PRICE \$14.70

Local Adapters for Models 710A, 720A, 730A.
D12053—Socket Adapter 73c D12054—Plug Adapter \$1.18

D17022—Model 730-A. Same as Model 720-A, but has Triplett DC voltmeter at 1,000 o.p.v.
YOUR PRICE \$18.23

Readrite Volt-Ohm Milliammeters

With Triplett "Red Dot" Meters

A quality constructed volt-ohm-milliammeter tester at an exceptionally low price. Attractive molded case has corners rounded with modernistic silver and blue panel. Precision life-time guaranteed 3" Sq. D'Arsonval movement meters have 2 genuine sapphire jewel bearings and zero scale adjustment screw. Range selector switch provides: AC-DC volts, 0-15-150-750-1500 (DC at 1000 o.p.v.). DC Milliamperes, 0-1½-15-150. Ohms, 0-500 (25 ohms at mid-scale) and 0-500,000. Has ohmmeter adjuster for battery deterioration. Case size: 3½x5½x2½".

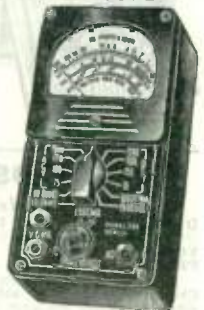

C17030—Model 739. Complete with test leads, battery and instructions.
YOUR PRICE \$9.70

C17031—Model 738. Same as above Model 739 but does not have AC voltage ranges.
YOUR PRICE \$7.35

Model 612 Multi-Tester

A universal wide range instrument. Has "Red Dot" life-time guaranteed Triplett AC repulsion type 3" sq. meter with two genuine sapphire jewel bearings. Ranges: AC-DC Volts, 0-15-150-450 at 60 ohms per volt sensitivity. AC-DC Mills., 0-15. Capacity, .01 to 20 Mfd. Ohms, 0-200,000-100,000 with zero adjuster. Does not use batteries; current source is obtained from AC-DC lines. Selector switch. Black molded case. Size, 3½x5½x2½".

C17015—Model 612. Complete with test leads, cord and plug.
YOUR PRICE \$7.79

Carrying Case

C17016—For Models 738-739-612. All leather case with strap carrying handle. Has space for accessories.

YOUR PRICE \$3.53

TRIPLETT INSTRUMENTS

Now On Time Payments

All instruments listed below, except Model 1181-B, contain the new Triplett "Red Dot" Life-time Guaranteed Meter as your assurance of life time service.

Model 1612 Modernistic Tube Tester

New Streamline Design

Modernistic heavy steel case is beautifully finished in baked-on silvered grey suede enamel with trimming and controls in maroon. For 100-120 volt 50-60 cycle AC operation.

New Low Price—Superlative Features

With Large 6" Scale Square Meter
And Roll Chart for Speed and Convenience

C17036—Model 1612 for Counter use. Size, 15 1/4" x 11 1/2" x 8".

YOUR PRICE.....\$29.24

Or \$4.50 Down and \$3.70 for 8 Months.

C17044—Model 1613 for Portable and Counter use. Has metal detachable cover with carrying handle. Size, 14 1/2" x 11 1/2" x 8 1/2".

YOUR PRICE.....\$34.14

Or \$5.25 Down and \$4.35 for 8 Months.

Graceful, flowing, streamline appearance, color contrast and the new low price. Will instantly appeal to the dealer and serviceman. Includes many features incorporated in higher priced Triplett Tube Testers. The large square "Red Dot" quality, life-time guaranteed meter has direct reading 6" scale and two sapphire jewel bearings. Illuminated roll chart indicates all control settings. Completely protected against obsolescence. Tests all tubes including octals, Locals, single ended, Bantam Jr.s, gaseous rectifiers, new high voltage series, filament and pilot lamps. Filament voltages from 1 to 120 volts are available. Separate line voltage meter eliminates necessity of readjustment of controls. Has jack for using headphones for noise indication (no headphones included). Complete shorts and leakage tests are provided with neon bulb indication. Anyone can make tube tests with the greatest speed and accuracy.

Anti-Obsolescence Tube Testers

New Sectional Panel Design With Large 6" Square Meter

Model 1620

D17057—Model 1620 Counter Model Tube Tester. Complete with operating instructions.

YOUR PRICE.....\$37.08

Or \$5.70 Down and \$4.75 for 8 Months

A sensational new tube tester with every facility for convenience of operation and non-obsolescence due to future tube releases. Constructional features include spare socket and three sectional front panel, either section of which may be changed individually, at minimum cost, should now unlooked for new tube releases ever require it. New lever type, highly flexible switching system, provides individual connections for each tube element. Simple to operate. Socket panel accommodates all present receiving tubes including octals, Locals, Bantam, Jr. and all miniature types. Filament voltages from 1.1 to 110 volts are provided. Large 6" square D'Arsonval movement, direct reading, "Red Dot" Lifetime Guaranteed meter indicates tube quality. Phone jack is provided for noise tests. Neon shorts indicator shows slightest shorts and leakages. Separate line voltage meter permits constant observation of line voltage fluctuation. Speed roll chart indicates all control and switch lever settings. Chart can be quickly removed for replacement and is furnished free should new tubes be announced during the period of one year after purchase. Impressively designed natural finish wood case. Brown-tan finish sloping panel with ivory knobs and sockets and polished chrome trim with inlaid color. Size 18 1/2" x 10 1/2" x 6 1/2". For 105-120 volt 50-60 Cycle AC operation.

For
105-120 Volt
60 Cycle AC
Operation

Model 1621 Tube Tester

Counter type tube tester identical to above Model 1620 except more compactly constructed and uses a 4" square meter. Can quickly be converted for portable use by inserting into carrying case listed below. Size 12 1/2" x 10".

D17058—Model 1621. Counter Model illustrated at left. No carrying case included.

YOUR PRICE.....\$34.14

Or \$5.25 Down and \$4.35 for 8 Months

Carrying Case for Model 1621

D17059—Portable Carrying Case with removable finish cover for Model 1621. Durably finished in snappy two-tone tweed cloth.

YOUR PRICE.....\$4.90

Anti-Obsolescence Vibrator Tester

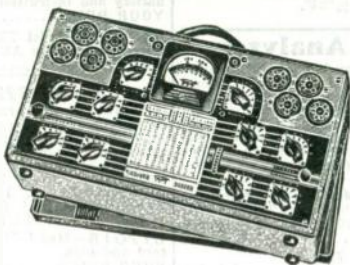

Model 1672

D17033—Model 1672 DeLuxe Vibrator Tester with all accessories and instructions.

YOUR PRICE.....\$29.24

Or \$4.50 Down and \$3.70 for 8 Months

Checks all standard 8 volt auto and home radio type vibrators. Tests are made under actual operating conditions. Easy to use. Roll chart indicates setting of all controls. Practically obsolescence proof. Individual element switches provide for testing new vibrators regardless of socket arrangement. Square case, lifetime guaranteed, 3" meter has three scales: (1) 0-10 volt scale shows input voltage supplied to vibrators; (2) 0-100 scale shows percentage of output voltage as reflected by change in input voltage; (3) Good-Bad scale indicates condition of output. Fused against damage from shorted vibrators. Blue-gray suede-enamel finished metal carrying case with snap-on cover. Attractive three tone panel. Size, 14 1/2" x 7 1/2" x 4 1/2".

Model 666H Universal Volt-Ohm-Milliammeter

Molded Bakelite Case

C17045
YOUR CASH PRICE.....\$14.20

Or \$2.20 Down and \$1.80 for 8 Months on total purchase of \$25.00.

Exceptionally compact AC-DC Volt, Ohm, and Milliammeter; easily fits into the pocket. Service engineers will find it especially useful and convenient. Contains sensitive 0-100 micro-ammeter. "Red Dot" life-time guaranteed, D'Arsonval movement, 8" square meter with zero adjustment. Ranges: AC-DC Volts, 0-10-50-250-1000-5000 at 1000 ohms per volt AC and DC. DC Ma., 0-10-100-500. Resistance, 0-300-250-1000 ohms. Zero ohms adjustable for compensating battery deterioration. Rotary selector switch selects any desired range. Test leads include attachable alligator clips. Entire case of molded bakelite. Size: 3 1/2" x 5 1/2" x 2 1/4".

C17037—Model 666. Identical to above except C17037—AC-DC Volts, 0-10-50-250-500-1000. DC Ma., 0-10-50-250. Resistance, 0-300-250-1000 ohms.

YOUR PRICE.....\$13.72

Or \$2.10 Down and \$1.75 for 8 Months
On Total Purchase of \$25.00.

Carrying Case

A good quality leather carrying case. Protects your smaller portable instruments. Fitted with leather carrying handle and snap fastener. 6 1/4" wide, 2 1/4" deep. Rich looking black finish.

D15839—Model 668.

YOUR PRICE.....\$3.59

Triplett Model 1181-C

Portable Laboratory

With Volt-Ohm-Milliammeter,
Set Analyzer and Battery Operated
Signal Generator

D17038—Model 1181-C. Portable Laboratory. Complete with test leads, adapters, batteries and operating instructions.

YOUR PRICE.....\$43.94

Or \$6.75 Down and \$5.50 for 8 Months.

Three instruments combined in one case for complete circuit analysis. Well adapted for servicing radios in rural districts. Includes:

Point to Point Test

Model 1125-A Universal Volt-Ohm-Milliammeter for testing receiver circuits directly at the receiver when accessibility permits, thus locating trouble quickly. 3 1/4" 400 microammeter has 16 scale readings; AC-DC volts: 0-15-75-150-750 at 1000 ohms per volt; DC ma.: 0-1.5-15-150; AC ma. 0-15-150; ohms: 0-1500-1.5 and 3 meg. All ranges controlled by selector switch.

Standard Analysis

Auxiliary Set Tester Model 1166C for free-point test and receiver analysis. For localizing set trouble without removing chassis from cabinet. Invaluable for estimating service costs. Includes test for new octal, local, bantam and all miniature radio receiving tubes.

Overall Performance

Model 1151B new improved All-Wave Oscillator for alignment testing tubes and methods of increasing overall gain. Oscillator covers all frequencies from 115 KC to 18 MC with four bands. 180° Dial is directly calibrated in frequencies. Has self-contained batteries. Oak case has removable cover. Size: 16 1/2" x 7 1/2" x 4 1/2". Ship. wt. 17 lbs.

TRIPLITT TESTERS *with the Famous "Red Dot" Life-Time Guaranteed Meters*

Triplitt Now on Time Payment

Any Triplitt instrument either singly or in combination with other Triplitt instruments to make a total of \$25.00 or more can be purchased on time. Use the pink time payment order blank bound into catalog at page 34 when placing order on time payment basis.

Volt-Ohm-Milliammeters

With Tilting Meter
Model 1200A

C17046—**\$21.40**
YOUR PRICE

Or \$3.30 Down and \$2.70 for 8 Months.

Has separate AC and DC "Red Dot" lifetime guaranteed meters in tilting type case. Scale reading: AC-DC Volts, 0-10-50-250-500-1000 at 2000 ohms per volt; DC Ma., 1-10-50-250; Resistance, 0.5-500 ohms with 15 ohm reading in center of scale, 0-1500 ohms and 0-1.5-3 megohms. Resistance measurements have individual zero adjustment. Selector switch for all instrument readings. Contains 22½ and 1½ V. batteries. Test leads included. Black suede enamel finished metal carrying case with snap-on protective cover. Size, 7½"x6½"x5½".

Model 1200E
25000 Sensitivity

C17047—Same as above except has 25,000 ohms per volt sensitivity on DC volt range. Also measures 0-50 microamps, and up to 40 megohms resistance. YOUR PRICE **\$25.32**

Or \$3.90 Dn. & \$3.20 for 8 Months.

Model 1200C

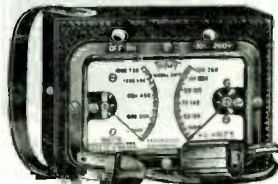

C17050—Similar to 1200A except 5000 o.p.v. Also tests 0-250 microamps and 0-7½ megohms.

YOUR PRICE **\$22.38**

Or \$3.45 Dn. & \$2.80 for 8 months.

Triplitt Portable Appliance Tester

Model 2000

error. Has cord to plug into wall socket and female receptacle for appliance under test. On-off switch cuts wattmeter in or out of circuit.

C17056—Triplitt Model 2000. In heavy leather carrying case with a leather protective flap to fold over the instrument meter. Has space for all accessories included. Size 6½"x1½"x3½".

YOUR PRICE **\$18.94**

Or \$2.90 Down and \$2.30 for 8 Months
On Total Purchase of \$25.00

Tube Tester

Model 1213

C17043—For 100-130 volts, 50-60 cycle operation. YOUR PRICE **\$21.56**

Or \$3.30 Down and \$2.70 for 8 Months.

On Total Purchase of \$25.00.

Tests all present day tubes, including Locals, Bantam Jrs., new high voltage series, single ended types, gaseous rectifiers, ballasts and pilot lamps. Provides filament voltages of from 1 to 110 volts. Large 3" Triplitt lifetime guaranteed direct reading meter. Neon short indicator. Simple to operate. Only four controls used for tube tests. Chart shows all control settings. Separate shadow type AC line meter. Black enamel suede finished carrying case with snap-on cover. Size, 7½"x6½"x5½".

Signal Generators Models 1231A-1232A

C17041—Model 1231A. Battery Operated. With batteries.

YOUR PRICE **\$26.95**

Or \$4.10 Down and \$3.40 for 8 Months

C17042—Model 1232A. For 110 volt 60 cycle AC operation.

YOUR PRICE **\$29.24**

Or \$4.50 Down and \$3.70 for 8 Months
Six bands cover 115 Kc. to 30.5 Mc., on fundamentals. Direct reading dial. Frequency stabilizing circuit. 400 Cycle note modulates output signal approximately 50%. Audio use can also be used alone. Continuously variable attenuator circuit with three tip jacks. Completely shielded. Line filter and band selector switch. Metal carrying case with protective cover. Black suede finish. Size, 7½"x6½"x5½".

Combination Tube and Set Testers

Model 1183

D17060—Combination Tube Tester, Volt-Ohm-Milliammeter and Free Point Tester. YOUR PRICE **\$48.84**

Or \$7.50 Down and \$6.20 Monthly for 8 Months

Model 1184

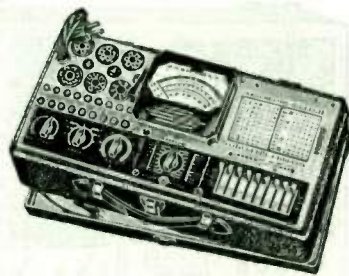

D17062—Combination Tube Tester and Volt-Ohm-Milliammeter only. YOUR PRICE **\$43.94**

Or \$6.72 Down and \$5.60 Monthly for 8 Months

Model 1182

D17063—Tube Tester Only. YOUR PRICE **\$34.14**

Or \$5.25 Dn., \$4.35 for 8 Mos.

An attractively styled tube tester housed in a portable metal carrying case. Model 1183 and 1184 incorporate a complete Volt-Ohm-Milliammeter tester. Model 1183 also includes a Free Point Analyzer built into the removable cover. A 4" "Red Dot" Lifetime Guaranteed meter is used on all models.

Tube Tester tests all tubes including local and miniature types regardless of filament voltage. Neon shorts indicator. Lever type switch gives individual control for each tube prong. Roll chart indicates control settings. Volt-Ohm-Milliammeter ranges: AC and DC Volts, 0-10-250-500-1000 at 1000 o.p.v. on DC. DC Ma., 0-1-10-50-

250. Ohms 0-500-1500-150,000-1,500,000. Free Point Set Analyzer makes all series and parallel meter connections at tester. Simply plug analyzer cable into tube socket and tube into analyzer socket. Takes all tubes, but plug adapters for analyzer cable must be purchased separately for locals and miniature types. Metal case finished in brown suede with three tone panel. Detachable cover included. Size 14½"x7½"x4½". For 110 volts, 60 cycle AC operation. Complete with accessories and instructions.

Local and miniature cable adapters for above. Specify Type. YOUR PRICE, Each **\$1.64**

Automatic Volt-Ohm-Milliammeter

Push Button Operated
25,000 Ohms Per Volt DC

Model 1200F

D17061—Model 1200F. Complete with accessories and instructions. YOUR PRICE **\$27.28**

Or \$4.20 Down and \$3.50 Monthly for 8 Months.

Push button switch instantly selects desired range. High sensitivity of DC ranges permit this instrument to be used on extremely low current circuits. Ranges available: AC and DC volts, 0-10-50-250-500-1000 at 25,000 o.p.v. on DC and 1000 o.p.v. on AC. DC Ma., 0-1-10-50-250. DC Microamps, 0-50. Resistance, 0-500-300,000 ohms and 0-3-30 megohms. Self contained battery and triple zero ohms adjusters. Output readings available on AC volt ranges thru .5 mfd. condenser and separate jacks. High quality "Red Dot" life-time guaranteed 4" square meter. Plug-in rectifier. Sturdy metal carrying case with snap-on cover. Finished in brown suede enamel with three tone panel. Size 7½"x6½"x5½".

"Little Triplitts" Pocket Meters

The Little Testers With The
Big 3 Inch Meters

A complete series of matched pocket size testers. Each instrument is completely self contained and incorporates a Triplitt 3 inch sq. "Red-Dot" Lifetime Guaranteed, D'Arsonval movement meter. Large easily readable scales. Red molded cases, size 3½"x5½"x2½". Panels are ivory with red markings and trim. Selector switch used on all models except ammeters instantly selects desired range. No test leads included. YOUR PRICE, Each **\$8.82**

Any Type Below

D17162—Model 673—AC Voltmeter, rectifier type. Ranges 0-5-10-25-50-100-250-500-1000 AC volts.
D17163—Model 675—DC Milliammeter. Ranges 0-1-5-10-25-100-250-500-1000 DC milliamperes.
D17164—Model 676—DC Microammeter. Ranges 0-50-100-250-500-1000 DC microamperes. External resistors can be used in series with this meter to provide highly sensitive volt-ammeter readings at 20,000 ohms-per-volt.
D17165—Model 677—DC Voltmeter. Ranges 0-1-2.5-5-10-25-50-100-250-500-1000 DC Volts at 1000 ohms per volt sensitivity.
D17166—Model 678—Ohmmeter. With self contained batteries for readings from .2 ohms to 10 megohms. Ranges: 0-1000-10,000-100,000 ohms and 0-1-10 megohms. Has 10 ohm center scale reading on the 1000 ohm scale

D17167—Model 674—DC Ammeter. Ranges 0-1-2.5-5-10-25 DC amperes. Equipped with 6 terminal posts instead of selector switch.

D17168—Model 670—Three Range AC Voltmeter for general power line testing. Ranges 0-150-300-750 AC volts.

D17169—Model 671. AC Milliammeter. Ranges 0-5-10-25-50-100-250-500-1000 AC milliamperes.

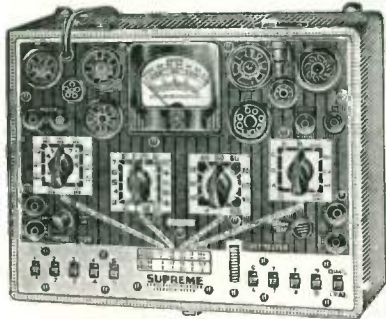

D17170—Model 672—AC Ammeter. Ranges 0-1-2.5-5-10-25 AC amperes. Equipped with 6 terminal posts instead of selector switch. (For use on 60 cycles).

Carrying Case for Above
D17171—Carrying case with compartment. Holds any three "Little Triplitts" listed above. Size 10½"x8½"x3½". YOUR PRICE **\$2.45**

SUPREME INSTRUMENTS

Easiest Installation Terms

Model 589 Tube and Battery Tester

11 1/4 x 9 1/4 x 5 5/8"

Tube Testing Circuit Tests every type tube from 1.4 volts to 117 volts, at correct plate potential and impedance load. Tests separate sections in multi-purpose tubes. Checks leakages, shorts, noise, open elements and filament continuity. Fastest and easiest to operate—simply follow arrows to proper settings indicated by correlated roll chart. Headphones may be used for noise test. Large English reading meter scale, illuminated in the 7" and 9" models which also have both standard 200M ohm and super-sensitive 2 meg., hot leakage test. Patented Double Floating Filament Return Selector Switch automatically allows rearranging of tube element connections to any possible tube base arrangement—your best possible assurance against obsolescence resulting from subsequent new tube releases. Complete information covering switch settings and testing of new tubes is supplied at least every 3 months, for one year, at no extra charge.

Battery Testing Circuit makes all tests under proper load for battery being tested. Battery condition is read on plainly marked English reading scale. Tests all type 1.5, 4.5, 6.0, 45 and 90 volt portable radio and flashlight types. Supreme engineering and construction plus the best materials the market affords, make the 589 your biggest dollar value. Portable Model: durable housed in attractive luggage type case. Counter Model: housed in black wrinkle finished metal case with chrome trim. Instrument panel has ribbed background offset by satin finished highlights, with bright red arrow-ways. Bakelite housed meter has 3-color scale. For 105-120 V. 50-60 Cye. operation.

Model 599 Tube, Battery and Set Tester

11 1/4" x 9 1/4" x 5 5/8"

Has same tube and battery testing circuits and is same size as Model 589 above. In addition has complete volt-ohm-milliammeter section with provisions for checking condenser leakage.

D17080—Portable Model. \$3871
YOUR CASH PRICE
Or \$4.50 down and \$4.33 monthly for 9 mos.

D17081—Counter Model with 7" Meter. \$4825
YOUR CASH PRICE
Or \$5.50 down and \$4.50 monthly for 11 mos.

D17082—Counter Model with 9" Meter. \$5145
YOUR CASH PRICE
Or \$5.75 down and \$4.33 monthly for 12 mos.

Volt-Ohm-Milliamper Section

D.C. Volts—0/6/15/150/600/1500 at 1000 ohms per volt. A.C. and Output Volts—(0/6/15/150/600). Copper oxide rectifier fully protected from overload. NO BUTTON TO HOLD DOWN—NO EXTERNAL CONDENSER necessary. D.C. Mills—(0/6/60/600). Ohms—0/200/20,000/2 meg./20 meg. Tests all paper and electrolytic condensers for leakage on direct reading resistance scales. For 105-120 volt 60 cye. AC operation.

Model 542 Pocket Multimeter

D17083—Model 542 Pocket Multi-meter. \$1597
YOUR CASH PRICE
Or \$5.00 down and \$4.33 monthly for 12 mos.

Compact in size, accurate and dependable performance. Pin lock connections. Ranges: D.C. Mills—0/0.3/30/150. D.C. Voltages—5,000 ohms per Volt, 0/6/150/300/1,500. A.C. and Output Voltages—0/6/30/150/600. Ohms 0/2,000/20,000/200,000/2 meg. Decibels—-6 to +10, +8 to +24, +22 to +38, +34 to +50. 3" Square meter with knife edge pointer and rugged, accurate 200 microampere movement (5,000 ohms per volt). Molded bakelite case. Batteries for ohmmeter self contained. Size 5 1/2 x 2 3/8 x 3/4". Ship. wt. 2 lbs.

Model 543 Pocket Multimeter

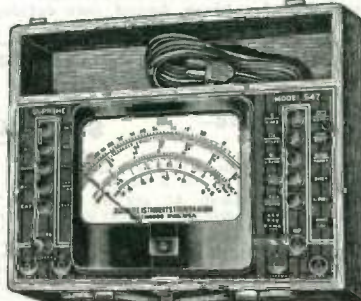

D17084 — Model 543 Pocket Multimeter. \$1171
YOUR CASH PRICE
Or \$5.00 down and \$4.33 monthly for 12 mos.

Uses same bakelite case as Model 542. Attractive two-color panel. 2" x 1 1/2" 1,000 O-F-V. meter. Single rotary switch selects all functions and ranges. Ohms—0/2000/20,000. DC Mills—0/6/60/600. AC Mills—0/15/150/600/3000. AC or DC Volts—0/15/150/600/3000. Batteries self contained. Size, 5 1/2 x 2 3/8 x 3/4". Shipping wt., 2 lbs.

Model 542 or 543 may be purchased with other Supreme equipment on Time Payment. Cash price will be divided and added to other payments. No additional down payment or finance charges are made.

Model 547 Multimeter

14 Buttons give instant selection of 36 Ranges

D17085—In Metal Case. Size—13 1/4 x 12 1/4 x 5". \$3327
YOUR CASH PRICE
Or \$4.00 down and \$4.17 monthly for 8 months.

D17086—In Solid Oak Case. Size—13 1/4 x 11 1/4 x 5". \$3577
YOUR CASH PRICE
Or \$4.00 down and \$4.02 monthly for 9 months.

Simplest, fastest and most convenient of all multimeters. Large 7" illuminated meter allows exceptionally accurate reading. All meter multipliers are metalized resistors aged for stability. Wire-wound resistors used for all shunts. Ranges, D.C. Volts: 0/6/30/150/300/600/3000, at 1000 ohms per volt. D.C. Mills: 0/6/30/150/300/600. Accuracy 2% on all ranges except 3000 volt which is 3%. A.C. Volts: 0/6/30/150/300/600/30. Output Volts: 0/6/30/150/300/600/3000. Decibels—-10/+4/+18/+32/+38/+44. Capacity: 0/2/3/20 mfd. No external condenser necessary. Copper-oxide rectifier fully protected. Fully compensated for temperature variations. Ohms: 0/200/20,000/200,000 ohms and 0/2 meg/20 meg. Megohm ranges operate from 105-120 volt 60 cye A.C. line supply; other ranges from self-contained battery. Supplied in metal case, for shop use or in portable Oak carrying case with removable cover and large compartment for test leads, tools, etc.

Model 592 Set Tester

D17088—Model 592 Set Tester. \$4307
YOUR CASH PRICE
Or \$5.00 down and \$4.33 monthly for 10 mos.

Fast push button selector sets up all ranges and functions, all of which terminate at a single pair of pin jacks, except the 14 ampere DC range, for which heavy binding posts are supplied. Push button switch selects either of two DC voltage measuring sensitivities on large 4" meter, 1000 ohms per volt for regular measurements and 25,000 ohms per volt for high resistance circuit measurements. Ranges: D.C. volts at 1000 or 25,000 ohms per volt 0/3.5/7/35/140/350/700/1400. Ohms: with self contained battery, 0/500/5,000/50,000/500,000/6 meg/50 meg. Low-ohm scale 1/4 to 500 ohms. A.C. and Output Volts: (0/7/35/140/350/700/1400) no external condenser needed. Decibels 5 ranges cover—10 to +48. Durably housed in quartered oak carrying case with removable hinged cover. Size, 9 1/2 x 7 1/2 x 6 1/4". Ship. wt. 9 lbs.

Model 504 Tube Tester and Set Analyzer

D17089—Model 504 complete in Portable Oak Carrying Case size 14 1/2 x 12 1/2 x 5". \$6463
YOUR CASH PRICE
Or \$7.25 down and \$5.94 monthly for 12 mos.

The finest instrument of its type in the entire Supreme line. **TUBE TESTER SECTION** incorporates improved circuit that correctly tests all tubes from 1.4 to 117 filament volts using normal operating voltages and loads. Tests leakers, octals, buntan midgets, single ended, television types, magic eyes, gaseous rectifiers, pilot lamps and ballasts. Tests separately, each section of all multi-section tubes and each plate of rectifiers and double diodes. Makes "hot" leakage tests up to 2 meg. Checks shorts, open elements, filament continuity and noise. Push-button selector automatically allows rearrangement of tube element connections to any possible tube base arrangement—your best insurance against obsolescence resulting from subsequent new tube releases. Fast and easy to operate—simply follow the arrows to proper settings indicated by correlated tube chart. English reading meter scale shows tube condition. **SET ANALYZER SECTION** provides 31 test ranges selected by 20 push-buttons. All ranges terminate at a single pair of tip jacks. DC Volts: 0/25/100/250/500/1000/2500, at 1000 ohms per volt. AC and Output Volts: 0/5/10/50/250/1000. DC Microamps: 0/500. DC Mills: 0/2.5/10/50/250. DC Amps: 0/1/10. Ohms: 1/10/200/2M/20M and 0/2/20 Meg. Accuracy: 2% on DC and 3% on AC ranges. Tests all paper, mica and electrolytic condensers for leakage up to 20 Megs, at any one of seven test voltages from 25 to 450 volts. Results are indicated directly on "Good-Bad" capacitor meter scale.

Model 549 Electronic Voltmeter

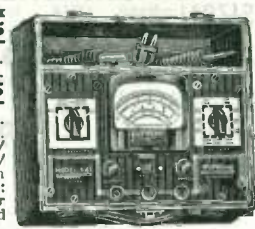

D17090—With Metal Case. Size—11 1/2 x 10 1/4 x 5". \$3915
YOUR CASH PRICE
Or \$5.00 down and \$3.90 monthly for 10 mos.

D17091—In solid Oak Carrying Case. Size—11 1/2 x 10 1/4 x 5 1/4". \$4165
YOUR CASH PRICE
Or \$5.00 down and \$4.18 monthly for 10 mos.

Ranges: DC Volts — 0/2/6/20/60/200/600. Input Impedance 15 Meg. DC Mills: 0/5/15/50/150/500 and 0/15 DC Amps. Ohms: 0/1000/100,000 and 0/1/10/1000 Megohms with self contained battery. AC and Output Volts: 0/5/15/50/150/500. Copper oxide rectifier fully protected, temperature error corrected over a working range of 40° to 100° F.

Available in metal case, for shop use or in portable Oak case with removable hinged cover and large compartment for tools, test leads, etc.

D17092—High voltage test probes and multiplier, for extending meter range from 600 to 6000 volts D.C. at 150 Megs input impedance. \$564
YOUR CASH PRICE
Or If purchased with Model 549, add 63c net to each of the ten monthly payments.

SUPREME INSTRUMENTS

Supreme Comparison

Combined Audio and Radio Frequency Oscillator

Model 561

C17073—Model 561 Oscillator. Complete with accessories and instructions. For 105-120 volt, 60 cycle AC operation.

YOUR CASH PRICE \$86.73

Or \$9.50 down and 12 monthly payments of \$7.32

A combined AF and RF Oscillator that feeds into the receiver, a practical duplicate of the signal from a broadcast station and allows complete control over this signal as regards carrier frequency, audio frequency modulation, percentage of modulation, and amplitude of signal. Specifically designed to be used in conjunction with the Vedolyzer.

lyzer, Audolyzer, or Oscilloscope listed on this page. May also be used by itself in the same manner as any individual AF or RF Oscillator. Combines in one compact convenient instrument the complete functions of a laboratory type Radio Frequency Signal Generator (Oscillator), Audio Frequency Oscillator, and Continuously Variable Frequency Modulator. Has output level indicating meter which combined with the ladder type attenuator provides an accurate means of determining AF or RF output of generator. Meter may also be used to determine % of audio modulation. R.F. Oscillator—Range is 65 Kc. to 20.5 Mc. on fundamentals and 60 Mc. on harmonics in 5 bands with push button, band switch. Accuracy guaranteed to within $\frac{1}{2}$ or 1% at all frequencies. Shadow tuning with hair line indicator on 6" dial eliminates parallax. Dual ratio tuning mechanism for locating desired frequency quickly and accurately. Extremely stable—not affected by normal line voltage variations. A.F. Oscillator—Range is 15 to 15000 cycles. 4 push buttons select output

Impedances of 50, 400, 5000, or 50,000 ohms single or push pull. Power output 150 milliwatts at less than 5% distortion over entire range. Response is flat within ± 1 db. between 30 and 10,000 c.p.s. Has zero beat adjustment. Variable control allows 0 to 15000 c.p.s. modulation of R.F. signal from 0 to 75% at any R.F. frequency. Audio output is available separately for audio tests. Shadow tuning with hair line indicator on 6" dial eliminates parallax. Attenuators—AF and RF outputs are fully controllable from zero to maximum. RF has ladder type attenuator employing 4 push buttons and vernier control, allowing continuous variation from $\frac{1}{2}$ to 100,000 microvolts. Output Meter—Built-in vacuum tube voltmeter indicates actual output of RF generator in microvolts. Also indicates percentage of modulation. Built-in Frequency Modulator—Employs electronic lock center synchronize circuit. Has standard band pass of 30 Kc. and may be used at any test frequency. Housed in Solid Oak Case with carrying handle. Size 17 $\frac{1}{2}$ x9 $\frac{1}{2}$ x12". Ship. wt. 33 lbs.

Model 560 Vedolyzer

The Vedolyzer presents Supreme's new method of dynamic testing. A system that speeds up radio set servicing and keeps it on a profitable basis.

C17074—Model 560 Vedolyzer. Complete with all necessary accessories and easily understood instructions. For 105-120 volt, 50-60 cycle AC operation.

YOUR CASH PRICE

\$126.90

Or \$13.50 down and 12 monthly payments of \$10.63

The Vedolyzer traces the radio signal through every stage of a receiver. You see the actual signal and can study its characteristics on the screen of the cathode ray tube. If the signal cuts out, becomes distorted, or weakens it is immediately apparent on the tube. It is easy to SEE THE SIGNAL whether it be RF, IF, AF, television video, or whether it be a frequency modulated, audio modulated, or unmodulated wave. You SEE distortion factor, all types of signal distortion and amounts of amplification. The built-in vacuum tube voltmeter allows you to measure the actual RF, IF or AF voltage in MICROVOLTS! With this set-up, you can check for location, frequency, and amount of hum, and check correct IF and oscillator frequency. Using the vacuum tube voltmeter alone, you can check AVC voltages, DC Grid voltages, insulation resistance up to 1000 megohms, and all receiver voltages up to 9000 volts DC or 3000 AC. Contains a direct reading wave analyzer for determining the frequency and strength of an UNKNOWN SIGNAL. Both fundamentals and harmonics can be measured. A multiple probe input

circuit gives a progressive check of receiver stages for intermittents, dead stages, noisy resistors, leaky condensers, bad soldered joints, etc.

The Vacuum Tube Voltmeter ranges are: C Volts, 0/2/8/20/200/600/6000. AC Volts, 0/3/9/30/90/300/600/3000 at 15 megohms input. Resistance 0/137/10M/100M ohms and 0/1/10/100/1000 megohms. The Oscilloscope has all controls regularly found on an oscilloscope such as the 548 and can be used as a normal cathode ray oscilloscope. Its linear sweep, horizontal amplification and synchronization circuits result in easily locked R.F. wave. Has an internal sinusoidal line supply frequency sweep for use in hum measurements, etc., as well as an internal linear sweep from 15 to 30,000 cycles for viewing images. Attractively designed panel with all controls clearly marked. Housed in solid oak case with leather carrying handle. Size, 17 $\frac{1}{2}$ x13 $\frac{1}{2}$ x12". Ship. wt. 40 lbs.

Model 562 Audolyzer Dynamic Channel Tester

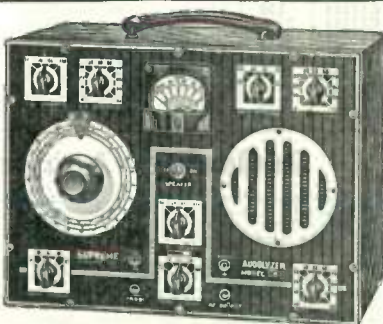

A new dynamic channel tester at a new low price. Operation is very similar to that of the Vedolyzer described above. The principle difference being that you hear the signal instead of see it. Eliminates all magic eye tubes and multiple probes. Connect a signal generator such as the 562A or 561 to the antenna post of the receiver under test and touch the Audolyzer probe successively to the grid and plate circuit of the RF, IF, Oscillator, Detector and Audio Stages. You hear the demodulated signal in the speaker of the Audolyzer until on reaching the defective stage, the signal disappears. You then use the built-in vacuum tube voltmeter to check the DC operating voltages of the defective circuit. You can in this way quickly and profitably service even the "toughest" receiver. Vacuum tube voltmeter has ranges of 0, 1, 3, 10, 30, 100, 300, 1000 volts DC at 15 megohms input impedance. This means a meter sensitivity of 15,000,000 ohms per volt on the low range and $\frac{1}{15}$ million ohms per volt on the 10 volt scale. Such high impedance permits

check of voltage while set is in operation without disturbing receiver operation. VT voltmeter can also be used for checking gain measurements in each stage. Audolyzer can be used to determine accurately the frequency to which any circuit is tuned. Also checks oscillator output. R.F. and audio amplifier of Audolyzer can be used separately with VT Voltmeter to locate intermittents. Checks AVC voltages accurately. Also checks AFC circuits. Gives accurate check on trimmer adjustments. Can be used with cathode ray oscilloscope for visual distortion indication. Housed in oak case with carrying handle. Size, 17 $\frac{1}{2}$ x9 $\frac{1}{2}$ x12". Ship wt. 32 lbs.

C17075—Model 562 Audolyzer. Complete with all necessary accessories and instructions. For 105-120 volts, 50-60 cycle AC operation.

YOUR CASH PRICE \$76.90

Or \$8.50 down and 12 monthly payments of \$6.49.

Model 571 Signal Generator

Accurate To Within $\frac{1}{2}$ of 1% At All Frequencies

Direct Reading On All Bands

C17076—Model 571 Signal Generator. Complete with accessories. For 100-120 volt, 50-60 cycle AC operation.

YOUR CASH PRICE \$39.15

Or \$4.50 down and \$4.39 Monthly for 9 Months.

An oscillator you'll be proud to own. Has unusually wide frequency range of 65 Kc. to 20.5 Mc. on fundamentals, and up to 82 Mc on harmonics. Dual ratio, drive dial, is directly calibrated and illuminated, with hair line shadow indicator which completely eliminates parallax. Guaranteed accuracy $\frac{1}{2}$ to 1%. A 400 cycle audio oscillator is incorporated for modulating the RF carrier at either 30% or 75%. However, the RF output may also be externally audio modulated or externally frequency modulated for visual alignment work. The 400 cycle oscillator may also be used separately. Double shielded ladder type attenuator provides output of 0.1 volt down to 0.5 microvolt. Double shielding is also extended to the complete chassis to minimize leakage. This instrument may also be used as a multi-vibrator by setting the dial to either 100 or 1000 Kc. and using the harmonics of these signals. An electron coupled oscillator circuit is employed using air dielectric capacitors and iron core coils. Absolutely free from temperature and humidity drift and line leakage. Beautiful black metal panel with red and silver trimming. Housed in attractive solid oak case with leather carrying handle. Size, 10 $\frac{1}{2}$ x8 $\frac{1}{2}$ x8 $\frac{1}{2}$ ". Ship. wt. 19 lbs.

Model 546 Oscilloscope

Featuring High Stability and Simplicity of Operation

An excellent companion piece for Supreme Model 561, or any other good frequency modulated R.F. Signal Generator. Especially useful in connection with all signal tracing devices for actually seeing the signal. A far faster and more accurate means of locating and correcting causes for hum noise, distortion, low gain, intermittents etc.

D17095—546 Oscilloscope complete with tubes. For 100-120 volt, 50-60 cycle AC operation.

YOUR CASH PRICE \$63.21

Or \$7.00 Down and \$5.33 Monthly for 12 Months.

Flexible in operation, has simple and logically arranged controls with sensitive linear amplifiers producing undistorted output. Has high impedance input circuits, wide frequency range and vertical and horizontal amplifier with 15 to 90,000 C.P.S. range and carefully shielded gain controls. Saw tooth sweep circuit oscillator is linear from 15 to 30,000 cycles. Means for either internally or externally synchronizing the signal under test with the sweep frequency. Vertical and horizontal spot centering controls, intensity and focus controls. Snap-lock synchronizing control snaps image into place. No image "wandering" or "waver-ing." Linear sweep range control and fine frequency adjuster. Separate power supply for cathode ray tube. Uses six tubes: 1-3" Cathode Ray Tube, 1-885, 2-6C6's and 9-80's. Carefully shielded and mounted. Solid oak carrying case with leather handle for portable or laboratory use. "No-Glare" panel. Size, 14 $\frac{1}{2}$ x11 $\frac{1}{2}$ x12 $\frac{1}{2}$ ". Ship. wt. 23 lbs.

Radio Test Instruments

VoltOhmyst RCA-Rider CHANALYST

C17156—RCA Model 163 Rider Volt-Ohmyst. For 105-130 volt, 25-60 cycle AC operation. Complete with tubes, special test leads and instructions.

YOUR PRICE.....\$57.50

A new combination Electronic Vacuum Tube DC Voltmeter and Ohmmeter providing accurate test of voltages from 0.05 to 5000 on 9 ranges and resistance measurements on 6 ranges from 0.1 ohm to 1000 megohms. The high input resistance of 16 megohms on ranges up to 500 volts and 180 megohms on higher ranges permits voltage measurements without noticeable effect upon circuit operation under test. Especially designed for measuring DC potentials at plate, screen, cathode, control grid, AVC and AFC during operation. Ohmmeter is suitable for all resistance measurements and testing leakage and insulation resistance. Meter has 4" long scales. Directly calibrated with basic voltage and one ohmmeter scale. Circuit is independent of tube characteristics or line voltage variations. No zero drift. Tubes used: 2-6X6's and 1-6X5G. Constructed of finest quality components. Sloping etched chrome plated brass panel. Steel cabinet finished in crystalline gray. Size 7½x8½x11" high. Weight 14 lbs.

Independent of tube characteristics or line voltage variations. No zero drift. Tubes used: 2-6X6's and 1-6X5G. Constructed of finest quality components. Sloping etched chrome plated brass panel. Steel cabinet finished in crystalline gray. Size 7½x8½x11" high. Weight 14 lbs.

Junior Volt Ohmyst

D17352—RCA Model 165. Electronic vacuum tube AC-DC voltmeter and ohmmeter containing many characteristics mentioned above. Ranges provided: DC Volts, .05 to 3.10/30/100/800/1000. AC Volts, .25 to 10/30/100/300/1000. Input resistance of 11 megohms. Six Ohms ranges covering 0.1 to 1000 megohms. Has signal tracing probe for checking AVC, AFC-FM discriminator and oscillator voltages, etc., with signal present. Size 6½x5½x10" high. For 105-125 volt, 50-60 cycle AC operation.

YOUR PRICE.....\$34.95

Other RCA Test Equipment

All equipment for 105-130 volt, 50-60 cycle AC operation. Supplied complete with tubes and accessories. We can supply any RCA Test Instrument. Descriptive literature will be sent on request.

Meissner "Analyst"

The latest type servicing instrument using the signal tracing method. Five channels trace signal from antenna to speaker. Quickly solves the most difficult receiver failures. All indications read on five magic eyes. Audio Channel permits complete analysis of the audio system of any set including gain measurements, hum location, etc. Electronic Voltmeter with a constant input of 10 megohms on five ranges of 0 to 500 volts checks all operating and control voltages without affecting receiver performance. Oscillator Channel for complete analysis of oscillator circuits of super-hets. RF-IF Channel for tracing signals through the RF and IF systems of any receiver. Range, 95 to 1700 kc. Line Current Indicator shows power consumption of receiver. All controls accurately calibrated and clearly marked. Any number of channels may be used at same time. Uses type 1-6BQ7, 1-6F5G, 3-6BK7, 1-6H6, 1-1852, 1-6X5G and 5-6Z5 tubes. Extremely easy to operate. Cabinet finished in black crackle. Size, 9½x13½x10½". Ship. wt., 35 lbs.

D17349—Meissner Analyst. Complete with tubes, test leads and operating instructions. Ready for operation.

YOUR PRICE.....\$68.11

Aerovox L-C Checker And R.F. Signal Generator

Tests condensers and coils for capacity and inductance and permanent or intermittent, shorts or opens, under actual operating conditions. All checks made at radio frequencies and in the majority of cases, without disconnecting any parts from the circuit in which they are operating. This regardless of whether or not any other condensers or resistors may be connected in parallel therewith. In addition will check: RF and IF alignment • Oscillator tracking • Natural resonant points of RF chokes, to be sure such are beyond operating range • Location of dead spots and resonant periods of antennae and transmission lines • Resonant points in shorted windings of unused coils • Frequency range of receivers and signal generators • Distributed capacity of coils • Tuning of wave, trap and image rejection circuits • Calibration of wave meters • And many other things much too numerous to mention here. Send for complete descriptive folder.

RF Oscillator Range 60 kc to 26 mc in 6 ranges. Accuracy: 1% on low frequency ranges and 5% at higher frequencies. Capacity and inductance measurements made well within 10% limits. Tubes: 1 each, 6J5G, 25Z5, 6E5 and VR105. Dimensions: 10½x7½x5½". Wt., 6 lbs.

C17087—Model 95 complete with tubes, output cable, capacity prod. inductance probe and terminal test leads. For 110 V. 50-60 cycle AC operation. **YOUR PRICE.....\$28.91**

C17155 — RCA Model 162 Rider Chanalyst. Complete with accessories and instructions. For 105-117 volt, 50-60 cycle AC operation.

YOUR PRICE.....\$107.50

The original dynamic channel tester that quickly localizes and identifies the most elusive troubles in any particular stage of a receiver or amplifier. Testing is done without plugs or adapters, being independent of tube types or circuit complications.

Provides 5 basic test channels with four electric eye indicators to visualize operation. The channels and uses are:

RF-IF Channel Amplifier: Traces the radio signal from first RF stage thru the second detector. Can also be used as a receiver, field strength meter, for zero beat indication and for antenna pick-up checking. Uses five tubes. Range 95 to 1700 Kc. Jack output to headphones or oscilloscope.

Oscillator Channel Amplifier: Similar to RF-IF Channel but has wider range and is less sensitive. Checks frequency output, drift, etc., of oscillators in superhets. Employs three tubes. Covers 800 to 15000 Kc., on fundamental, to 70 Mc. on harmonics.

AF Channel Amplifier: Checks gain or loss of signal thru audio stages and

indicates where it becomes distorted or takes on hum. Uses three tubes. Flat frequency response range of 50 to 50,000 cycles. Input range of 1 to 1000 volts. Output jack to headphones or oscilloscope.

Wattage Indicator: Indicates power consumption of receiver from 25 to 2500 watts either AC or DC.

Electronic Voltmeter: Measures DC potentials or the actual control voltages in RF, IF, AF, AVC and AFC circuits without disturbing operation or loading the circuit. Meter has center zero and indicates both positive and negative voltages. Four ranges measure —500/—100/—25/—5/0/+5/+25/+100/+500 volts. 10 Meg. input resistance on all scales. Accuracy 5%.

Construction: Heavy chromium plated etched brass panel. Metal case with carrying handles. Size, 14x9x3".

Precision Test Instruments

Tube Tester

D17304—Model 910MCP.

YOUR PRICE.....\$29.95

Or \$6.10 Down and \$4.60 Monthly for 6 Months.

High grade, attractive tube checker indicating tube quality by dynamic mutual conductance method. Tests all receiving tubes including local, miniature types, gaseous rectifiers and ballasts, regardless of pin arrangement or filament voltage requirements. 3" Sq. meter. Neon shorts and leakage indicator. Jacks for noise tests with headphones. Roll chart quickly indicates all settings of push buttons and other controls. Open type portable metal case. Size 12x10½x6".

Model 832 AC-DC Multi-Tester

D17310 — With battery.

Less test leads.

YOUR PRICE.....\$14.95

Features 3½" sq. meter providing 31 ranges: DC Volts, 0-6-30-150-300-600-1200 at 1000 O.P.V. AC Volts, 0-12-60-300-600-1200-2400. DC Ma., 0-1-2-12-120-600. Ohms, 0-5000-500M on self contained 3 V. battery. Ohmmeter adjuster. Decibels, —10 to +62 on six ranges. All resistors at 1% accuracy. Heavy etched brass panel. Hardwood walnut finished carrying case. Size 7x4½x3".

Triumph Test Instruments

Model 130 Video Signal Generator

C17365
YOUR PRICE COMPLETE.....\$2935

Wide range, 100 Kc to 96 Mc., includes all frequencies needed in radio and television service. Direct reading 360° dial with knife edge pointer. Accuracy, 1/2 of 1%. Unmodulated RF, 400 cycle, 0-75% modulated RF, and pure sine-wave 400 cycle audio and externally modulated RF outputs available. Housed in black wrinkle finished metal cabinet with ivory, red and black front panel. Has leather handle. Size, 13 1/2"x10 1/2". Wt., 22 lbs.

Model 830 Oscillograph and Wobbulator

D17366—YOUR PRICE COMPLETE.....\$7835

Combines in one instrument all features of a complete 3" cathode ray oscillograph and electronic frequency modulated wobbulator. Simple to operate. Positive lock in on all frequencies gives clean steady pattern. Amplifier response, 10 to 100,000 cycles. Sweep range, 7 to 30,000 cycles. Wobbulator fundamental 1000 cycles. Sweep width variable 0 to 50 cycles. Deflection sensitivity, with amplifier 4 volts per inch or direct to plates 18 volts per inch. Housed in black wrinkle finished steel case with leather handle. Ivory, black and red front panel. Size, 10 1/2"x14 1/2". Wt., 38 lbs.

A light compact combination instrument that provides complete set and tube testing. Tube Tester checks all tubes including locals and ballast types. Provides filament voltages from 1 to 120. Neon leakage and short indicator. Jack provided for noise tests with headphones. Chart gives control settings. Model 803 includes built-in "Rolindex" Roll chart. Direct reading 4 1/4" D'Arsonval movement meter. Built-in Set Tester measures AC-DC Volts: 0-10-50-500-1000. DC at 1000 o.p.v. AC Ma. 0-1-10-100-1000. DC Amps. 0-10. Ohms. 0-5-5000-1 Meg.-10 Megs. Decibels. -8/+15/+29/+49/+55. Set Analyzer Unit eliminates necessity of removing radio chassis from cabinet for testing. Measures all voltages and currents at tester with the set in operation. All adapters included. Leatherette covered carrying case with removable cover. Attractive aluminum panel. Size, 12 x 12 1/2 x 6". For 115 volt, 50-60 cycle AC operation.

Model 414P Multi-tester

With 4 1/2" Sq. Meter

D17205—Model 414P. Complete with test leads and instructions.
YOUR PRICE
\$24⁰¹

Range selector switch. Ranges: DC Volts, 0-5-50-250-2500-5000 at 2000 ohms per volt. AC Volts, 0-10-100-500-1000-5000. DC Ma., 0-10-50-250-1000. DC Amp., 0-1-5-25. Capacity, 0-0.03-3-30-300 Mfd. Resistance, 0-100-15,000-150,000 ohms and 0-1.5-15 megohms. Inductance, 25-1000 mh. and 25-100-1000-10000 henries. Built-in power supply. For 105-120 volt, 50-80 cycle AC operation. Solid maple carrying case. Size 9 3/4 x 12 1/2 x 6".

Model 702 RF and AF Signal Generator

Has an extremely wide fundamental coverage of 95 Kc. to 25 Mc. on five bands. Accurately calibrated large direct reading dial with dual ratio knob. RF output can be unmodulated or modulated 30% at 400 cycles. The 400 cycle audio can be used separately. Five step ladder attenuator with output of 1 microvolt to .5 volts. Leakage minimized by individually shielded circuits, filtered power supply and complete overall shielding provided by the leaded steel case and chassis. Coils when not used are shorted out of circuit. Double fused power supply cord. Contains all latest improvements in circuit and mechanical design.

Multi-Range Testers

Compact testers for complete point-to-point receiver analysis. All instruments have round bakelite case D'Arsonval movement meters, etched aluminum panels, self contained batteries and ohmmeter adjuster. Accuracy 2%. Test leads included.

DC Model 433

D17206—With 3" Meter. 7 Ranges thru tip jacks. DC Volts, 0-5-50-500-1000 at 1000 ohms per volt sensitivity DC Ma., 0-1-10. Ohms, 0-500-500,000. Attractive panel. Hardwood case. Size 6 x 3 x 2 3/8". Wt. 21 oz.
YOUR PRICE..... \$63²²

DC MODEL 432

C17213—With 2" Meters. 9 Ranges thru tip jacks. DC Volts, 0-5-50-500-1000 at 1000 o.p.v. DC Ma. 0-1-10. Ohms, 0-500-50,000-500,000. Metal case. Size, 5 1/2 x 3 1/2".
YOUR PRICE..... \$58⁸³

AC-DC MODEL 456

C17214—With 2" Meters. 16 Ranges thru tip jacks. AC DC Volts, 0-5-50-500-1000 (DC at 1000 o.p.v.) AC Ma., 0-1-10. Ohms, 0-5000-500,000. Decibels, -12 to +8/+28/+48/+54. Hardwood case. Size, 6 x 3 x 3 1/2".
YOUR PRICE..... \$77⁹⁹

AC-DC Model 446

C17215—With 3" Sq. Meters. 25 Ranges thru selector switch: DC Volts, 0-5-50-250-500-2500 at 1000 o.p.v. AC Volts, 0-10-100-500-1000. Output Volts, 0-10-100-500-1000. DC Ma., 0-1-10-100-1000. DC Amps., 0-10. Ohms, 0-500-100,000-1 meg. Decibels, -8 to +15/+35/+49/+55. Hardwood case. Size, 3 x 8 x 5".
YOUR PRICE..... \$97⁵⁵

AC-DC MODEL 411

5000 Ohms Per Volt Sensitivity
C17217—With 3" sq. meter. 23 Ranges thru tip jacks: AC-DC Volts, 0-10-100-250-1000-5000. DC Ma., 0-10-100. AC Ma., 0-500. DC Microamps, 0-200. DC Amps, 0-1-10-25. AC Amps., 0-2.5-25. Decibels, -10 to +69 in 5 ranges. Ohms, 0-4 megs in 4 ranges. Solid walnut case. Size, 7 1/2 x 5 1/2 x 3 1/2".
YOUR PRICE..... \$15⁹²

D17221—Portable Model 411. As above except in portable carrying case with removable hinged cover.
YOUR PRICE..... \$175⁹⁹

Model 702

Million Model DF Tube Tester

D17218—For 105-125 volt 50-60 cycle AC operation.
YOUR PRICE..... \$16⁹⁵

Provides quick and accurate emission test of all tubes including Octal, Locals, "S" series, hearing aid, etc. Direct reading 3" sq. D'Arsonval movement meter. Filament voltages from 1.4 to 120 are available. Easy to operate, only 3 rotary switches and one slide switch used for tube tests. Neon shorts and leakage indicator also tests condensers. Cream colored panel with black markings. Black leatherette covered carrying case. Size, 10 x 10 x 1 1/2". Complete with charts and instructions. Ship. wt. 10 lbs.

With Neon Leakage Indicator

Million Model OD Oscillator

Range 100 Kc to 25 Mc on 6 Bands

Greatest dollar value is represented in this fine low priced oscillator. Tunes 100 to 25,000 Kc (fundamental) on 6 bands with over 40 inches of accurately calibrated scale length. Separate coils for each band individually trimmed eliminates possibility of dead spots. Double range type attenuator provides fine and coarse adjustment. Output can be varied from a few microvolts to approx. 20,000 microvolts. 400 Cycle audio modulator can also be used separately. Uses 78 type tube as RF oscillator, 6C6 as RF amplifier, 76 as audio modulator and 12Z3 as rectifier. Full shielding and line filter practically eliminates leakage and line loss. Attractive etched bronze panel with ivory knobs. Wrinkle finish steel case with carrying handle. Size, 7 x 10 x 6".

C17191—For 105-120 volt AC-DC operation.
YOUR PRICE..... \$19⁹⁵

American RF and AF Signal Generator

Model 4102

100 Kc to 30 Mc
on Six Bands

A fine signal generator priced within the reach of every radio serviceman. Features a fundamental coverage of 100 Kc. to 30 Mc. on six bands. Large 6" directly calibrated dial, accurate to within 1/2 of 1% on IF frequencies, 1% on broadcast and 2% on higher frequencies. Employs an improved electron-coupled oscillator circuit with minimum drift and a Hartley AF oscillator. RF can be unmodulated or modulated and the AF can also be used separately for testing of amplifiers, etc. Audio and modulation is available at three frequencies of 400, 1000 and 5000 cycles. Controls on panel are RF tuning selector, band selector, audio selector, full range attenuator, power switch, modulation switch and output jacks for RF and AF. Completely shielded. Heavy gauge frosted aluminum panel finished in chrome, red and black. Grey wrinkle finished streamlined cabinet with carrying handle. Size 14 x 6 x 11".

D17199—Model 4102. RF and AF Signal Generator. Complete with tubes, shielded cables and instructions. For 90-125 volt 50-60 cycle AC operation. Ship. wt. 15 lbs.
YOUR PRICE..... \$155³³

SIMPSON 1941 "Radio Test Equipment"

Portable Tube Tester

Model 300

D17233—For 105-120 V. 50-60 cye. operation.

YOUR PRICE **\$25⁹⁷**

Tests every type of Radio Receiving Tube as well as ballast tubes, pilot lamps, Xmas tree lights and flashlight bulbs. Provides from .5 to 120 filament volts. Tests localities, single ended tubes, bantams, miniatures and gaseous rectifiers as perfectly as the balance of the popular radio tubes. Double filament switching permits testing tubes without use of special adapters or sockets regardless of filament terminal location. Neon bulb provides high sensitivity short check. Line voltage adjustable from 100 to 130 volts. 4 1/4" Fan shaped meter has Good-Bad "English Reading" scale as well as percentage scale for matching and comparing tubes. Has attractive two toned metal panel. Instrument housed in black fibrikoid covered, portable carrying case, size 8 1/2x10x5 1/2". Simplified instructions and tube charts conveniently carried in removable cover. Wt. 12 lbs.

as percentage scale for matching and comparing tubes. Has attractive two toned metal panel. Instrument housed in black fibrikoid covered, portable carrying case, size 8 1/2x10x5 1/2". Simplified instructions and tube charts conveniently carried in removable cover. Wt. 12 lbs.

DeLuxe Tube Tester

Model 400

D17234—For 105-120 V. 50-60 cye. operation.

YOUR PRICE **\$35²⁸**

One of the finest, most complete tube testers on the market. Tests all tubes released to date including localities, bantams, miniatures, ballasts, gaseous rectifiers, Xmas tree lights, flashlight bulbs and pilot lamps. Provides from .5 to 120 filament volts. Front panel divided into sections—any of which may be changed individually, at minimum cost, should now be unlocked for new tube releases ever require it. Individual 3 position switches for each tube element guards against obsolescence. Speed Roll Chart, has "quick-locator" index which facilitates spotting of any desired setting. Heavy black lines tie all readings with associated knobs, speeding operation and guarding against error. Large 4 1/4" meter with English reading scale shows tube condition, and percentage scale checks comparative efficiency. Housed in durable crackle finish metal case with handle. Your Name Engraved Free when you make your purchase. Size: 10 1/2x13 1/4x4". Wt. 16 lbs.

D17286—Durable Leatherette carrying case with removable cover, for Model 400. **\$4⁹⁰**

Giant Tube Testers

Models 500 and 350

D17235—Model 500 Giant Tube Tester—Same as Model 400 above except uses giant 9"x8 1/2" meter with black, red and green scale on silver etched background, illuminated indirectly by two 6V. bulbs. Housed in durable crackle finished metal case with sloping panel for either vertical or horizontal mounting. For 105-120 V. 50-60 cye. operation.

YOUR PRICE **\$42¹⁴**

D17236—Model 350 Giant Tube Tester—same as Model 500, above, except has 7" meter and does not have roll chart or unit panel construction.

YOUR PRICE **\$34³⁰**

By simply removing panel screws, lifting panel and chassis assembly unit from case and turning same end for end before placing in case again, either of the above models can instantly be converted for vertical or horizontal use.

Giant Volt-Ohm-Millammeter

Model 320

9" Meter—51 Ranges

D17229—YOUR PRICE **\$36⁷⁵**

Incorporates a truly giant D'Arsonval Movement Meter, 9" wide by 8 1/4" high housed in a modernistic designed black bakelite case. Meter dial has silver etched metal background with all DC scales in black and AC scales in red. Knife edge pointer permits accurate readings. Dial is indirectly illuminated.

AC and DC Volts at 1000 ohms per Volt: 0-3-7.5-30-75-150-300-750-1500-3000. DC Current: 0-1.5-7.5-30-75-150-300-750 Mills. and 0-15 amperes. Resistance: 0-500 ohms (20 ohms mid-scale), 0-50,000-500,000 ohms and 0-5-50 Megs. Capacity: .0001 to .05 Mfd., .001 to .5 Mfd., .01 to 5 Mfd. and 1 to 50 Mfd. Decibels: -20 to +48. The 48" test leads included and high voltage jacks are insulated to 3000 volts. Meter panel is steel gray background with large distinct two tone red and black characters. All ranges, except 1500 and 3000 volts, are selected by a single rotary switch with a large bakelite handle. Steel cabinet is finished in black wrinkle enamel. Size, 10 1/2x6 1/2". For 105-120 volt, 50-60 cycle AC operation.

Tube and Set Tester

Model 450

Combines Complete Tube Testing with Complete Point-to-Point Set Testing.

4 1/4" Meter

D17224—For 110 V. 60 Cyc. AC operation.

YOUR PRICE **\$38⁹⁵**

Tube Tester Section tests all tubes to date or probably yet to be released. Provides from .5 to 120 filament volts. Tests localities, bantams, miniatures, ballasts, magic eye tubes, gaseous rectifiers, Xmas tree lights, flashlight bulbs and pilot lamps. Has neon hot cathode leakage test and neon short check. Double circuit switching allows test of all tubes without adapters or special sockets. English reading "Good-Bad" Scale shows tube condition. Point-to-Point Tester Section. 4 1/4" Meter. 1000 O-P-V type. Ranges: AC-DC and Output volts: 0-7.5-30-75-150-300-750-1500-3000. Ohms entirely AC operated: 500, 50,000 5 Meg. DC Mills: 0-3-15-75-300-750. Decibels: -10 to +40. Instrument housed in fibrikoid covered carrying case with removable cover which also holds instructions and tube charts. Size: 10 1/2x13 1/4". Wt. 14 lbs. For 105-120 V. 60 cye. AC operation.

Volt-Ohm-Millammeter

AC-DC Model 215

D17228—YOUR PRICE **\$22³⁸**

Similar in construction and appearance to model 260, below. Ranges: AC and DC Volts: 0-2.5-10-250-1000-5000 at 5,000 ohms. o.p.v. on DC and 1000 ohms. o.p.v. on AC. DC microamps: 0-250. DC Milliamps: 0-10-100-500. Decibels: -12 to +55. Resistance: 0-4000-40,000-4 Megs.

Model 260

20,000 O.P.V. on DC Ranges

AC and DC Volts: 0-2.5-10-250-1000-5000. DC Milliamps: 0-10-100-500. DC Microamps: 0-50-100. Resistance: 0-1000-100,000-10 Megs. Decibels: -10 to +52. Incorporates 4 1/4" D'Arsonval movement meter. Has zero ohms adjuster. Molded bakelite case with leather handle. Size: 5 1/2x7x3". Comes complete with 48" 5000 volt insulated test prods and self-contained battery.

D17227—Model 260. YOUR PRICE **\$26⁹⁵**

MICRO TESTERS

Extremely useful where narrower ranges will meet your requirements. All are housed in sturdy red bakelite cases. Panels are of silver satin finished metal with black bakelite binding posts. Size of each: 2 1/2x5 1/4x1 1/4". Test leads and carrying case extra. D17185—Model 280 AC Ammeter 0/1/2.5/5/10/25 Amps.

YOUR PRICE **\$9⁵⁵**

D17186—Model 282 Ohm-meter 0/100/10,000/100,000/1 meg/10 Megs

YOUR PRICE **\$9⁵⁵**

D17187—Model 283 DC Milliammeter 0/1/5/10/25/50/100/250/500/1000 mills

YOUR PRICE **\$9⁰⁷**

D17188—Model 284 Microammeter 0/50/100/250/500/1000 microamps

YOUR PRICE **\$9⁵⁵**

D17190—Model 281 AC Voltmeter 0/150/300/600 V.

YOUR PRICE **\$9⁰⁷**

D17193—Test leads & prod. leatherette carrying case to hold 3 Micro-testers.

YOUR PRICE **\$1²²**

Pr. Either Type

D17192—Sturdy leatherette carrying case to hold 3 Micro-testers. YOUR PRICE **\$2⁴⁵**

Pocket Volt-Ohm-Millammeter

Model 235 DC

D17231—YOUR PRICE **\$9⁷⁵**

Rotary switch selects DC Volts at 5000 O-P-V: 0-10-50-250-500-1000. DC Mills: 0-10-100-500. DC Microamps: 0-250. Resistance: 0-2000-200,000-2 Megs. Has zero ohms adjuster and self contained battery. Complete with pair of 48" test prods. Red molded bakelite case. Size, 2 1/2x5 1/4x1 1/4".

Model 240 AC-DC

Rotary switch selects AC Volts at 1000 O-P-V: 0-15-150-750-3000. DC Volts: 0-15-150-750. Resistance: 0-3000-300,000. Has zero ohms adjuster. Battery self contained. High voltage plug-in jacks insulated up to 5000 volts. Complete with 48" 5000 volt insulated test prods with alligator clips. Red molded bakelite case. Size, 2 1/2x5 1/4x1 1/4".

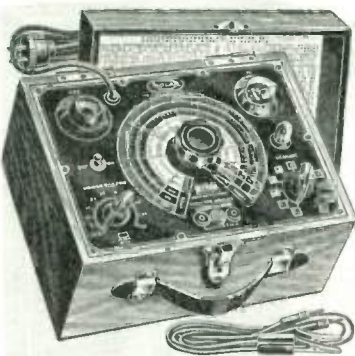

D17232—Model 240 AC-DC. YOUR PRICE **\$14⁴⁵**

1000 O-P-V: 0-15-75-300-750-3000. DC Volts: 0-15-150-750. Resistance: 0-3000-300,000. Has zero ohms adjuster. Battery self contained. High voltage plug-in jacks insulated up to 5000 volts. Complete with 48" 5000 volt insulated test prods with alligator clips. Red molded bakelite case. Size, 2 1/2x5 1/4x1 1/4".

Newest CONDENSER ANALYZERS

Solar Capacitor and Resistance Bridge Analyzer

C17180—For 105-120 volt, 50-60 cycle AC operation. Complete, less tubes.

YOUR PRICE... **\$18⁸²**

C1304—Set of Sylvania Tubes for above. 1-6E5, 1-1V.

YOUR PRICE... **97c**

Measures capacity and shows exact condition of all types of electrolytic, paper, mica and air condensers from .0001 to 70.0 Mfd. Indicates power factors from zero to 50%. Accurately measures resistance of all types of carbon and wirewound resistors from 50 to 2,000,000 ohms. Measures leakage resistance up to 1,000 megohms with an applied voltage of up to 450 volts DC. Detects shorts, opens, leaks and other defects in condensers. May be used as continuity meter for testing any circuit. All measurements are made simply and directly on five color-coded scales with more than 45 linear inches of accurately calibrated markings. Simple, fast and accurate in operation. A type 6E5 Cathode Ray tube, used as a visual bridge detector, gives a positive indication of balance on all capacity, resistance and power factor measurements. Requires no external meters, standards, headphones, or similar accessories. Uses 1-6E5, 1-1V tube. Oak finished portable carrying case with removable hinged cover. Size, 9 1/2 x 7 1/2 x 6 1/4".

Cornell-Dubilier Condenser Analyzer

Self-Contained

D17196 — Model BF-50. Complete with instructions, cord and plug and alligator clip test leads, but less tubes.

YOUR PRICE

\$24⁴⁰

D1303 — 1-12A7 and 1-6E5 Sylvania tubes for above tester.

YOUR PRICE... **\$140**

Quickly and accurately determines the capacity and operating conditions of any paper, mica and electrolytic condenser; including AC motor starting types, of from .0001 to 240 mfd. capacity. Also measures power factor from 0 to 50%, and shows insulation resistance up to 1500 meg. Uses visual eye for leakage indication and bridge balance. High sensitivity detects all leaks, shorts, and opens. Provides sharp or broad balances for quick and accurate readings. All readings are made simply and directly on six color coded linear calibrated scales. Employs Wien bridge circuit which insures accuracy and stability of measurements. Not affected by line-voltage variations. Portable walnut carrying case with sloping panel and removable hinged cover. Size, 6 1/4 x 12 1/2 x 3 1/2". Net wt. 9 lbs. For 110 volt, 50-60 cycle AC operation.

Solar Condenser "Quick Check"

D17181 — Model QC-1-60. With test leads and instructions.

YOUR PRICE... **\$11⁶¹**

Quickly indicates condition of all types of paper, mica, air and electrolytic condensers without removing them from the circuit. Consists of a balanced RF oscillator, a visual indicator and a source of power to permit positive indication of good, shorted and open condensers. Intermittent detects and RF impedance of the condenser. Simple to operate. Housed in compact metal case. Size 3 1/2 x 4 1/2" high. Wt. 5 1/2 lbs. For 110 volt, 60 cycle AC operation.

With Capacity Bridge

D17182 — Model BQC-1-60. Similar to above except combines the RF oscillator with a Wien bridge to perform condenser tests as mentioned above and also measure capacity from .0001 to 70 mfd., power factor and to serve as a continuity meter for circuit testing.

YOUR PRICE **\$15⁴³**

All other Solar Instruments supplied promptly

C-D Service Mike

D17130—

YOUR PRICE **\$221**

Provides a capacity range from 18.75 mfd. to 150 mfd. in twelve separate steps. Designed for emergency repair of motors employing electrolytic motor starting capacitors. Can be used to determine capacity required with a given motor where the original capacity is unknown. Encased in hermetically sealed aluminum container. Terminals are provided with test leads, clips and jumpers for connections. Size: 1 1/2" x 3 3/4".

C-D "Test-Mike"

D17129 — "TEST-MIKE". Complete with Test Leads, Clips and Pilot Lamp.

YOUR PRICE... **\$5⁸⁸**

Contains the same capacitor unit as the "SERVICE - MIKE" except furnished in a heavy bakelite case with six toggle switches to facilitate selection of twelve capacity values from 18.75 mfd. to 150 mfd. A pilot lamp provides a method of observing that part of a motor starting cycle during which voltage is applied to the capacitor. Size 3 1/2" x 5" x 3".

Compact Condenser Bridge

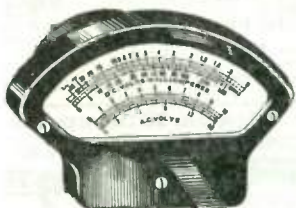

Has 3 direct readings marked in Mfd. to measure capacity from .0001 to 50 Mfd. Employs Wien bridge circuit using electric eye tube to show correct balance. Indicates power factor, open and n d shorted condensers, 110 volt, 60 cycle AC. Walnut bakelite case, 3 1/2" x 5 1/2" x 3". Complete with instructions and test leads. Uses 1-12A7, 1-6AF6G tubes.

C17197—Model BN. Less Tubes.

YOUR PRICE... **\$970**

New Radolek Universal Foundation Meters

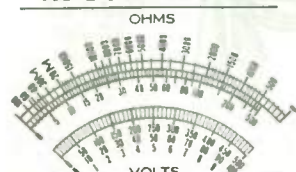

OHMS IN THOUSANDS

AC VOLTS

RADOLEK AC-DC Meter Scale

OHMS

RADOLEK DC Meter Scale

Foundation units for building a high class volt - ohm - milliammeter. All meters have rugged DC D'Arsonval movements with 2% accuracy, sapphire jeweled bearings, knife-edge pointers and zero adjustment. Supplied with either DC or AC-DC calibrated dial scales. AC-DC meters are for use with external rectifiers. All types have black bakelite cases. Fan Type Meters measure 4 1/2 x 3 1/2" across front and mount in 2 1/2" round hole. 3 1/2" Round Meter fits 2 1/2" hole. Giant 5 1/4" Meter requires 4 1/2" hole. All meters extend 1 1/2" back of panel. Wiring diagram for building a multi-tester included.

Aerovox Capacity and Resistance Bridge

D17200—Complete with Tubes and Testing Manual.

YOUR PRICE... **\$35⁰³**

Portable, easily operated Cap. and Resist. Bridge. Makes capacity, leakage and power factor tests of all condensers under actual working conditions. Built-in power supply provides any voltage between 15 and 600 volts. Capacity range .0001 to 100 mfd. in 6 ranges. Resistances of 10 ohms to 1 megohm are measured on 5 ranges. Insulation resistance can be read up to 10,000 megohms. Also provides following ranges for external tests: DC Volts, 0-60-60-300-600 at 1000 o.p.v. DC Ma., 0-6-60. Vacuum tube voltmeter measures other minute values. Readings are made from chart and meter. Three tubes are used: 6C8G, 45 and 1V. Red gumwood case has removable hinged cover and carrying handle. Size, 10 1/2" x 7 1/2" x 8". For 105-130 volt, 60 cycle operation.

Resistance Meter

Model 501

Direct reading volt ohm meter. 0-4 1/2 v o l t s. 0-10,000 ohms. 2" flange type meter. Requires 4 1/2 volt battery in series with the meter and fresh batteries.

A10360—YOUR PRICE **88c**

Tuning Meters

For Accurate Visual Tuning

For replacement in A.V.C. sets. With Type TM103 circuit is brought into resonance when needle swings to farthest point. Has opaque dial with window at bottom for illumination from tuning dial light. Type TM121 has shadow effect to indicate resonance. To select proper tuning meter, it is necessary to know plate current of tubes with which used. Less escutcheon. Type TM121 supplied with 6.3 volt bulb.

METER REPAIR SERVICE AND ACCESSORIES

Meter Dial Scales

Designed for use with one milliampere movement meters but can be used with other meters by adjusting circuit. Two types are available: etched metal and printed Bristol board. For greatest satisfaction we recommend the etched metal dials. These have clear black numerals and scales etched on white silver background.

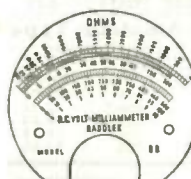

DC Volt Milliammeter Scale

Upper scale calibrated in ohms for use with 4½ volt battery. 50 divisions marked 50, 250, and 1000 for D.C. Volt, and Milliamp. Ranges.

Full Wave Copper Oxide Rectifiers

Type A 5 Milliampere Capacity

Miniature copper oxide rectifier. Guaranteed the finest made. For converting D.C. instruments drawing less than 5 milliamperes to A.C.
K3850—
YOUR PRICE **\$2.59**

Type B 20 Milliampere Capacity

Size ⅞" round discs, ¾" long.

Medium miniature size copper oxide rectifier for use in A.C. circuits of less than 5000 cycles frequency and rectifying not over 20 milliamperes D.C. Has 6-32 insulated mounting bolt.
K3851—
YOUR PRICE **\$1.95**

Type C 40 Milliampere Capacity

Size 1½" round disks, overall size 1½"x1"

Copper oxide rectifier for A.C. circuits of less than 5000 cycles frequency and not to exceed 40 milliamperes D.C. current. Excellent for rectification of 110-115 volt A.C. current for field excitation of dynamic speakers with 2250 to 3000 ohm field.
Not recommended on circuits exceeding 600 volts.
R3852—
YOUR PRICE **\$1.75**

Conant "CRS" Rectifiers

Especially designed for use with DC meters in making AC measurements. Complete instructions included with each rectifier.

A3853—Type B—Very small full-wave rectifier. Very efficient at high frequencies. Max. rating 10 volts A.C. input and 5 Ma. output. Body size, ½"x¼"x1¼".

A3854—Type M—Full wave rectifier. Used in many test instruments. Rated 10 volts A.C. input max. with 20 Ma. output. Can be overloaded 200% at intervals. Size ½"x¼"x1¼".
YOUR PRICE, Each.... **\$2.06**

Meter Repair Service

BEFORE

AFTER

Guaranteed Precision Meter Repair Service for burned out or damaged meters. Typical rates given below, for other repairs send meter for quote. Send Prepaid. We return Collect.

1. Burned out or open armatures of standard 301 type 3½" meters, including polishing of jewels and three point calibration.

YOUR COST..... **\$3.75**

2. Repair of Sluggish or Erratic movement of meters where armature is not burned or shorted, also cleaned and calibrated.

YOUR COST..... **\$2.95**

Any additional parts required, such as pointers, springs, zero adjuster, Jewel screws, case, glass, etc., will be charged for at the lowest prices.
Note: Be sure your name, address, and instructions are attached to merchandise you send in.

Analyzer Case

Oak or Walnut
K15805—
YOUR PRICE **\$2.95**

A professional type carrying case for your portable instruments. Takes standard 7" x 14" x ¾" bakelite panel listed at left. Partition for panel support provides room for analyzer cable, test leads, etc. Inside dimensions 8½"x14"x3¼" deep. Slip-hinged cover has 1½" inside clearance. Metal handle. Clasp lock. Lacquer finished.

RIDER'S Trouble-Shooters Manuals

You Need All Eleven!

Every serviceman who wants to service radios faster, eliminate guess work, and have real alignment and circuit data, should use Rider's manuals. In these 11 Manuals there is a wealth of information about every radio set manufactured—from the first in 1919 to the latest model at the time of

Volume XI publication. For only a few cents per day, you can have complete needed information on every set made. Information that will help you do your work faster, better, and enable you to make more money. Work with full confidence! Be sure of your technical facts!

VOLUME XI

You Need This Manual to Properly Install and Service Latest Model Radio Receivers.

**D15310—
YOUR PRICE \$980
POSTPAID**

The latest edition to the Rider's series of service manuals. Never before has such a stupendous compilation of technical servicing material been collected in one complete volume. No details were too minute—nothing was deemed to be too trivial to be included if it was of any value in radio servicing. Contains 1652 pages of radio service data not published in previous manuals. New "How It Works" section contains 18 pages of technical explanation of the various circuits. A supplementary "Vest Pocket Manual" is also included containing 52 pages of useful information including frequency ranges of push-button tuning units of hundreds of models of radio receivers. Cumulative index covers all previous editions, a total of 14,500 pages! Supplied with loose-leaf pages bound in stiff fabricated covers. Size 9x11½".

Volume X

Covers 1939 and 1940 Models Announced up to October 1939

**C15309—
YOUR PRICE \$980
POSTPAID**

Covers all radio models announced after publication of Volume IX, up to October, 1939. 1650 Pages of service data on radio sets, television receivers, facsimile receivers, wireless record players, etc. Also contains data on receivers not previously published. "How It Works" Section contains 64 pages of technical explanation of the circuits contained in the Volume X. Cumulative Index covers all previous editions. Supplied with loose-leaf pages bound in stiff fabrikkoid covers. Size, 9x11½".

VOLUME IX

Covers 1938 and 1939 Models Announced up to October, 1938

**A15308—
YOUR PRICE \$980
POSTPAID**

Covers all radio models announced after publication of Volume VIII, up to about October, 1938. Double spread pages are used so that complicated diagrams can be easily read. A special 36 page "How It Works" section is devoted to explanations of electrical and mechanical operations of the more complicated 1938-1939 receivers. 156 Page index also covers all previous volumes. 1640 loose-leaf pages. Stiff fabrikkoid covers. Size, 9x11½".

VOLUME VIII

Covers 1937 and 1938 Models Announced up to November, 1937

**R15307—
YOUR PRICE \$980
POSTPAID**

Over 1600 pages of real data and circuit diagrams on 1937 and 1938 models. Also information on Intercommunication Systems, Electronic Musical Devices and Public Address Systems. Stiff fabrikkoid covers. Size, 9x11½".

VOLUME VII

Covers 1936 and 1937 Models Announced up to November, 1936

**R15306—
YOUR PRICE \$980
POSTPAID**

Over 1600 pages of real data and circuit diagrams on the 1936 and 1937 models. Also includes important changes in older models. No duplication of contents. Stiff covers. Size, 9x11½".

VOLUME VI

Covers 1935 and 1936 Models Announced up to November, 1935

**R15305—
YOUR PRICE \$735
POSTPAID**

Contains 1240 pages of practical data on over 940 models, representing over 115 manufacturers. Includes information on P.A. amplifiers, test equipment, auto radios, etc. Index also covers previous volumes. Size: 9x11½ inches. Stiff covers.

VOLUME V

Covers 1934 and 1935 Models Announced up to November, 1934

**R15304—
YOUR PRICE \$735
POSTPAID**

Contains 1200 pages of data on 946 models, representing over 100 manufacturers. Enables you to quickly locate trouble and repair radios listed in this volume. All necessary information for easier service work. Separate 64 page index includes all previous volumes. Loose-leaf binding. Stiff fabrikkoid covers. Size: 9x11½".

VOLUME IV

Covers Standard Receivers from June, 1933 up to February, 1934

**R15303—
YOUR PRICE \$735
POSTPAID**

1080 pages—loose-leaf binding—with stiff fabrikkoid covers. Size: 9x11½ inches. Includes complete cumulative index for all previous Rider's Manuals. Discusses and clarifies the new tubes, reflexed circuits, A.V.C. systems, S.W. and All-Wave sets that have appeared during the period covered by this manual.

VOLUME III

Covers Sets between June, 1932 and June, 1933

**R15302—
YOUR PRICE \$735
POSTPAID**

1070 Pages. Size 9x11½". Fabrikkoid covers.

VOLUME II

Covers Sets from March, 1931 to June, 1932

**R15301—
YOUR PRICE \$735
POSTPAID**

800 Pages. Size 9x11½". Fabrikkoid covers.

VOLUME I

Covers Early Receivers between 1919 and April, 1931

**R15300—
YOUR PRICE \$735
POSTPAID**

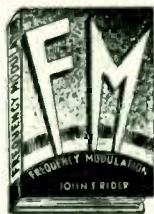

1000 Pages. Size 9x11½". Fabrikkoid covers.

Frequency Modulation

By John F. Rider

**D12511—
YOUR PRICE 98c**

Becomes fully acquainted with the latest thing in radio right at the start. This book explains the complete theory of transmission and reception of frequency modulated signals. Special attention is given to the different types of F-M receivers now available including their adjustment and maintenance. Data concerning best types of antennas is also given. Fully illustrated. Contains 136 pages. Flexible cloth cover.

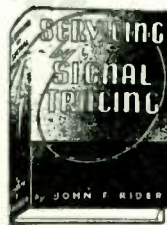

Servicing by Signal Tracing

By John F. Rider

**D12524—
YOUR PRICE \$1.96**

Completely explains a system of locating defects in radio and communication systems, both transmitting and receiving. This system is fundamental because it is based on the common denominator of all sets regardless of circuit—the signal! Also discusses functions of various parts, paths of signal currents, development of control voltages, etc. Covers all modern circuits including television and facsimile. Profusely illustrated. 300 Pages bound in hard covers.

A.F.C. Systems

By John F. Rider

**D12531—
YOUR PRICE 95c**

Contains complete information on automatic frequency control circuits. Clearly explained and easily understood. Book is devoted to DC voltages, phase relations to inductive, capacitive and transformer circuits with particular reference to their use in A.F.C. circuits. Also covers operation of discriminator circuits and various control tube circuits including push-pull

type, reflected resistance type and mutual inductance type. 102 Illustrations. 144 Pages. Hard covers.

The Cathode Ray Tube At Work

By J. F. Rider

**K12521—
Your Price Postpaid \$2.45**

Gives you complete theory underlying the operation of the cathode-ray tube and its associated circuits. Everything to which the cathode-ray tube can be applied to check electrical phenomena. Half of the volume is devoted to specific practical applications of commercial oscilloscopes to servicing and adjustment problems. 338 pages.

Servicing Receivers by means of Resistance Measurement

By J. F. Rider

**K12519—
YOUR PRICE 95c**

This book explains the usual resistance network which reduces all types of Sets and Amplifiers to a common level. Take the guesswork out of servicing by using an ohmmeter. In your diagnosis. Tells how to get the resistance between points in any circuit by working thru the socket contacts. Cloth-bound, 203 pages. Size: 5½x7½ inches.

Servicing Superhets

By John F. Rider

**K12520—
YOUR PRICE 95c**

Latest revised and enlarged edition covering a comprehensive and easily understood explanation of the superheterodyne circuit. Important information on electron coupled superhets, AVC systems, and Dual I. F. bands. 228 Pages, profusely illustrated. Cloth-bound. Hard covers. Size: 5½x7½ inches.

An Hour a Day with Rider BOOKS

On Alternating Currents In Radio Receivers

N12526—
YOUR PRICE **59c**

A comprehensive book covering the basic functions of the various components of a radio receiver... what each unit does and how it works. Various types of parallel and series resonant circuits... different kinds of coupling... inductance, resistance, impedance and how these electrical phenomena are employed in radio practice. A combination of theory and practice that explains alternating currents in a brand new way. Profusely illustrated. 96 Pages.

On D. C. Voltage Distribution

N12528—
YOUR PRICE **59c**

Every receiver contains some sort of D.C. distribution system supplying the D.C. voltages from the power unit to the elements of the tubes. The many different forms these systems take are thoroughly described in this new Rider book, which explains networks from the simplest to the most intricate. The calculations of the value of the resistors and their wattage ratings are clearly described in this brand new combination of theory and practice. Profusely illustrated. 96 Pages.

Aligning Philco Receivers

By John F. Rider

C12530—
YOUR PRICE **95c**

Contains complete alignment instructions for all Philco home and auto receivers—from the very first to the latest 1937 set. Will enable you to quickly align correctly any of 8,000—000 Philco radio sets now in use. Prepared with the cooperation of Philco engineers. The book is authentic and complete in every respect. Every trimmer is located for you in the many large diagrams. The alignment frequencies and procedures are clearly stated. 170 Pages. Profusely illustrated. Size 5 1/2 x 7 1/2.

On Resonance and Alignment

N12527—
YOUR PRICE **59c**

A clear explanation of what happens when a circuit is tuned to resonance. All types of circuits—single, double, and triple tuned systems—described and how and why they work... How these circuits should be aligned so that maximum efficiency is obtained. Knowledge of the latest high-fidelity I.F. amplifiers is becoming more and more necessary and this book tells you everything you should know about all this in Rider's easy to understand style. Profusely illustrated. 96 Pages.

On Automatic Volume Control

N12529—
YOUR PRICE **59c**

Every well made, modern receiver now has automatic volume control as a standard feature. Noise suppression systems—time delay circuits—audio frequency volume expander systems and other such networks come under this general heading and greatly increase servicing problems. A complete description of how these circuits operate in all receivers—new and old—and how they should be serviced makes this book invaluable, as it is written in a brand new manner, combining theory and practice. Profusely illustrated. 96 Pages.

Oscillators at Work

By J. F. Rider

C12510—
YOUR PRICE **\$1.47**

Explains workings of all types of oscillators and not only tells how and why they work, but how the various oscillators are used in receivers and testing equipment. Written so anyone can understand. Theory on different oscillators is given first with practical applications given later in the text. Profusely illustrated with diagrams and oscillograms. Provides all the information on oscillators that you need. 200 Pages. Bound in hard covers.

Mallory-Yaxley

Encyclopedia

of Radio Service
New Third Edition

C12441
YOUR PRICE, Only **75c**

The most complete radio service encyclopedia ever published. Gives finger tip reference to information never before published. Practically every radio receiver model is completely analyzed giving all information necessary for complete, quick radio service work. Provides parts replacement information instantly and accurately covering volume controls, condensers, vibrators, tube complement and I.F. peak frequency. See page 45 for more descriptive listing.

Books for Radio Beginners

A series of Gernsback books written especially for the beginner in radio and electricity. Written so everyone can understand. Every book is fully illustrated. Size, 5 1/2 x 7 1/2.

- C12433—Radio for Beginners.
- C12434—How to Build Radio Diagrams.
- C12432—How to Have Fun with Radio.
- C12431—Beginners' Radio Dictionary.
- C12430—All About Aerials.
- C12429—Alternating Current for Beginners.
- C12428—Television.
- C12451—Simple Electrical Experiments.
- C12428—How to Make the Most Popular All-Wave 1 and 2 Tube Receivers.
- C12427—How to Build a Duerle Short-Wave Sets.

A.R.R.L. Publications

Radio Amateur Handbook

Latest Edition

C12492
YOUR PRICE..... **\$1.00**

Includes latest and best information covering all fundamentals of amateur radio from the beginning to its present day development. Gives suggestions on how to learn the code through explanations on traffic handling procedure and good operating practices. Also includes information on design construction and operation of amateur equipment, valuable data on I.F.F., antenna design, etc. Illustrated. 560 Pages. Size, 6 1/2 x 9 1/2.

Radio Amateur License Manual

C12424—Gives in simple, easy to understand language the information you need to pass the examination to become a licensed amateur. Also includes 198 typical questions and answers such as asked in the government Class A, B and C examinations. 40 Pages. Latest Edition.

How to Become a Radio Amateur

C12425—Describes the construction and operation of an inexpensive amateur transmitting station incorporating features heretofore confined only to more advanced stations. Includes other valuable data of interest to the beginning amateur.

Building an Amateur Radiotelephone Transmitter

C12426—An introduction into amateur radiotelephony for the man who has a Class B or C license. Contains simple description and design of inexpensive low-power transmitter and modulator with complete operating instructions and some antenna data of particular interest to the amateur.

YOUR PRICE **25c**
Any Book, Each.....

Antenna Book

C12499—A comprehensive manual of amateur antenna design and construction. Data on doublets to multi-element rotaries including rhomboids, vees, u.h.f. systems, masts and feeding systems. Over 100 pages in "QST" format.

YOUR PRICE **50c**

GERNSBACK'S Manuals

Official Radio Service Manuals

Volume VII

Covers 1937 and Early 1938 Receivers

C12556—Postpaid **\$9.80**
YOUR PRICE.....

Complete radio servicing data on over 1,600 radio models. All new material—no reprint or rehash from previous editions. Over 1,800 pages and 3,000 illustrations. Includes many 1938 models not found in other manuals. Data includes: I.F. peak freq., alignment procedure and operating voltages. I.F. peak freq. alignment procedure for many of the complicated superhets. Loose-leaf pages. Flexible leatherette cover. Size 9 1/2 x 12. Includes 74 page index covering all previous manuals.

VOLUME VI

Covers 1936 and Early 1937 Receivers

C12555—Postpaid **\$6.86**
YOUR PRICE.....

Over 1,250 pages, 2,500 illustrations. Contains specific information accompanied with diagrams for each set released after publication of Vol. V.

VOLUME IV

Covers 1933 and Early 1934 Receivers

C12553—Postpaid **\$3.00**
YOUR PRICE.....

Over 2,000 diagrams—over 400 pages—many valuable illustrations, charts, layouts and schematics. Data includes information on P. A. Systems, test equipment, radio tubes and auto radio.

VOLUME II

Data on 1931 and Early 1932 Receivers

C12551—Postpaid **\$4.00**
YOUR PRICE.....

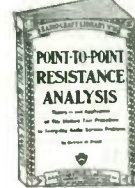

1,000 pages with 2,000 diagrams, charts and illustrations. Loose-leaf leatherette binder.

Refrigeration Manual

C12570—Second Edition. **\$4.00**
YOUR PRICE.....

Explains and illustrates the servicing of standard type refrigerators. Explaining every part and tools necessary for servicing. 350 Pages.

Gernsback's Radio-Craft Series

You can form an inexpensive library with these Radio-Craft Books. Each book contains 64 pages of easy understandable, carefully compiled authentic information, and from 50 to 150 illustrations. Bound in stiff covers. 6 1/2 x 9 inches.

YOUR PRICE, Any Title..... **35c**

- C12574—"Practical Public Address."
- N12576—"Point-to-Point Resistance Tests."
- N12576—"Servicing with Set Analyzers."

New Radio & P.A. BOOKS

Ghirardi's New Twin Gadgets Pocket Trouble Shooters

Spot troubles in a flash. Just a flip of a card and both the "test" and "remedy" for any trouble are given. Consists of a set of pocket-size cards printed on both sides in two colors and eyeletted together to cover over 400 troubles commonly encountered in radio service.

C12590—Home Sets
C12591—Auto Sets
YOUR PRICE, Either Type **50¢**

Popular Radio Books

Drake's Encyclopedia of Radio and Electronics

By Manly and Gordor

C12435—Complete non-technical reference book on over 500 radio subjects including sound pictures, short-wave, television, photo-tells and P.A. Data is simple and direct, easily understood. 1000 pages, 1178 illustrations, 235 tables and graphs.

YOUR PRICE **\$3.92**

Short-Wave Radio Handbook

By Clifford E. Denton

C12483—Everything on short-wave radio. Contains latest circuits on oscillators, TRF and super-heterodyne receivers with valuable charts and tables on coil winding. 128 Pages. 150 Diagrams and Illustrations. Size 8 1/2 x 5 1/2".

YOUR PRICE, Postpaid **\$1.00**

"Radio" Handbook

C12482—The greatest handbook published. 600 pages of valuable information for every man in radio. Tells how to build receivers and transmitters. Hundreds of illustrations.

YOUR PRICE **\$1.50**

Motorola Service Manual

D12584—Complete manual including detailed schematics, service notes, alignment data and parts lists on 72 Motorola Autodrive models up to date. 96 Pages. Size 8 1/2 x 11".

YOUR PRICE **\$1.00**

Look and Listen

The Television Handbook

By M. B. Sleeper

D12561—Contains latest theory and practice on television. Tells how to build, install and service a television set. Simply described. Over 100 illustrations. Size 8 1/2 x 9".

YOUR PRICE, Postpaid **98¢**

Thordarson Manuals

C6792—Complete Transformer Catalog on P.A., amateur and replacement types. Specify one **FREE** on your next order.

C6793—Contains sections covering radio receivers, sound amplifiers, amateur transmitters, transformer replacement data, etc. Also includes complete catalog. Approximately 114 1/2 x 11 pages.

YOUR PRICE **21c**

D12598—Amplifier Guide only as contained in above manual. Includes valuable data on building amplifiers.

D12599—Transmitter Guide only as contained in above manual. Includes valuable data on building transmitters.

YOUR PRICE Each **9¢**

Amateur Radio

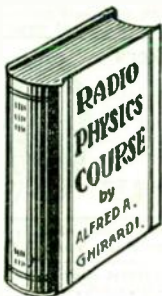

A Beginner's Guide

D12565—A fascinating textbook by J. D. Fortune of Thordarson Elect. Co. that takes you step-by-step through everything you need to know to become a licensed radio amateur and how to build and operate your own radio station. Cloth covered volume. 160 Pages. Size 6 x 9".

YOUR PRICE **73¢**

Radio Physics Course

By A. A. Ghirardi

N12586—
YOUR PRICE **\$4.00**
POSTPAID

Radio instructors in many leading schools endorse and use this outstanding comprehensive, clearly written and profusely illustrated text for teaching radio. Ghirardi's **RADIO PHYSICS COURSE** has also been placed on the "Approved Textbook List" of almost every State Education Department in the country and was selected as the training text for radio courses conducted by the exacting training staffs of the U. S. Army and Navy. You can learn radio from this great book yourself—at home! Contains a complete course in the fundamentals of Sound, Electricity, Radio, Television and Sound Motion Pictures—all in one, sturdily bound 972 page volume with over 500 illustrations.

Modern Radio Servicing

By A. A. Ghirardi

C12587—
YOUR PRICE **\$4.00**

An outstandingly complete revised edition showing how to master the art of radio servicing. Packed full of new ideas, the latest tips and angles, the most up-to-date methods used by successful technicians. Written in easy-to-understand language—profusely illustrated with over 700 diagrams and charts. Contains a complete explanation of the construction and use of Cathode Ray Oscillographs and latest testing instruments. Complete data on noise and interference elimination. 1300 pages. 706 illustrations. Size 5 1/2 x 8 1/2 inches. Hard covers.

Radio Trouble-Shooter's Handbook

By Alfred A. Ghirardi

C12572—
YOUR PRICE **\$3.00**

Contains a comprehensive collection of servicing reference data and information designed specifically to assist and save time for the serviceman on all service jobs. Includes "Case Histories" for over 3,300 receivers, IF peak frequency and alignment data for over 15,000 super-heterodyne including latest sets and auto radio data on interference elimination, installation plus car ignition and electrical wiring diagrams. Also includes trouble-shooting charts for "Home" and "Auto Radio" receivers and data on servicing sound recorders, intercommunication, P.A. systems and Trade Directories. Has over 30 charts and tables on grid-bias resistors for tubes, coil, filter, transformer design, wire sizes, RMA color codes, up-to-the-minute tube charts of every conceivable description, etc. 500 Pages. Bound in sturdy gold-stamped black fabricoid covers. Size, 8 1/2 x 11".

SPECIAL COMBINATION OFFER. Save money by buying Modern Radio Servicing and Radio Trouble-Shooter's Handbook together at only

C12589 **\$6.50**

Practical Dynamic Testing and Visual Alignment

By A. G. Mohaupt

C12545—
YOUR PRICE **98¢**

Contains a comprehensive discussion of the cathode ray oscilloscope and frequency modulated signal generator as used for visual alignment of amplitude modulated receivers. Their use and construction is completely described and illustrated with many diagrams and wave form charts which make this type of testing extremely simple and easy to understand. Connections to all parts of receiver circuits are shown and explained. This book is very helpful in getting the best benefit from your oscilloscope. 48 Pages. Stiff paper covers. Size, 8 1/2 x 11".

We have only a few of these manuals left—when they are gone, there will be no more—so buy yours now and avoid disappointment! Contains complete servicing data for over 12,000 different sets and models with hundreds of schematics, illustrations, charts and formulas. Worth twice the original cost.

McGraw-Hill Books

Principles and Practice of Radio Servicing

By H. J. Hicks

D12567—Shows and explains how to install, test and repair radio receivers. Written with minimum of mathematics in excellent self-study style for servicemen who want to improve their skill, and readers who want to learn this practical field. Includes data on public address systems. 300 Pages. 212 Illustrations. Size, 6 1/2 x 9 1/2".

YOUR PRICE **\$2.94**

Radio Construction and Repairing

By Moyer and Wostrel

D12487—Contains 444 pages of up-to-date radio repairing information enabling you to tackle the hardest kind of radio repair job and solve any form of radio trouble. 179 Illustrations.

YOUR PRICE **\$2.45**

Radio Operating

Questions and Answers

D12486—All you need to know for your Commercial License application in 600 questions and answers. Includes regulations pertaining to police, aeronautical, marine and amateur station operating. 427 Pages, 108 illustrations. 5 1/2 x 8 1/2" cloth binding.

YOUR PRICE **\$2.45**

Radio Service Trade Kinks

By Lewis S. Simon

D12563—
YOUR PRICE **\$2.94**

A quick reference manual of frequently encountered radio set troubles and their repair. Saves time in testing and trouble shooting by showing weakness of many key trouble spots of specific sets. A practical method of repair and adjustment taken from successful radio servicing experience is given. Covers hundreds of makes and models of both household and auto radio receivers. Illustrated. 269 Pages. Size 9 x 11". Spiral bound to open flat. Sturdy stiff covers.

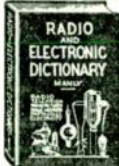

Radio and Electronic Dictionary

By H. P. Manly

A12438—
YOUR PRICE **\$2.19**

Contains 3800 definitions of technical radio words and terms. Illustrations were made especially for this book to help greatly in simplifying the definitions. 300 pages. 500 illustrations, size 6 x 9". Cloth binding.

Elementary Mathematics

By A. C. Shainmark

D12562—Stimulated study-course in mathematics. Contains basic data required for solving perplexing mathematical problems. Many illustrations and examples. A chapter is devoted to radio problem solving. 64 Pages. Size, 6 1/2 x 9".

CARRON REPLACEMENT

"A Carron Cone Improves The Tone"

If the cone you need is not listed here—here's how to help us give you **FAST SERVICE**:
 1—Send in your old cone with voice coil attached.
 2—Specify if possible set name and model number.

also make and model number of speaker from which cone is removed. 3—Be sure your name, address and instructions are attached to package. In most cases we can make immediate shipment.

For Majestic Speakers

Models G1, G2

One piece moulded, seamless fibre. The original part in these Speakers is of heavy paper and does not provide reproduction at all comparable with that of these replacements.
N16109—For G1
R16110—For G2
YOUR PRICE, EACH ... \$1.32

For RCA Victor Speakers

Models RE32, 45, 57, 75

Made of reinforced one piece fabric, coated with reticized lacquer. Apex is double reinforced, a feature not used in the original. Bakelite voice coil bobbin with 4 layers of precision wound wire. Far superior to the original part.
N16181—
YOUR PRICE, EACH ... \$1.03

1 2 3 FEATURES

- 1—One-piece seamless cones.
- 2—Due to improved molded construction, these cones surpass the originals in tone quality and durability.
- 3—Coils are machine wound, same number of turns and size of wire as originals.

Radio Noise Filters

Continental Filternoys

For Elimination of Electrical Radio Interference

Each unit is a complete filter, containing the correct capacitors or combination of inductances and capacitors, to effectively reduce or eliminate man-made static. For most effective noise elimination correct interference at source.

Suppression Type Units For Use At Interference

Combination capacitive-inductive type with capacitors shunted across receptacle. Prevents interference from entering power lines.

Rejection Type Units For Use at the Radio Set

Combination capacitive-inductive type with capacitors shunted across prong terminals. Prevents noise from entering the receiver power supply.

For Grounded Lines

C8411—Suppression Unit. Type F01H.
C8416—Rejection Unit. Type R01H.
List Price, 75c.
YOUR PRICE, Either Type..... 44c

Plug-in type. Will work very efficiently in eliminating moderate interferences on power supply lines having one side grounded. For 110 volts AC or DC lines with loads up to 300 watts. Metal case, 1 1/2 x 2 1/2".

For Ungrounded Lines

C8412—Suppression Unit. Type F01DH.
C8413—Rejection Unit. Type R01DH.
List Price, \$1.00.
YOUR PRICE, Either Type..... 59c

Plug-in type with lead for connection to suitable ground or frame of device causing interference. Efficiently blocks moderate interferences on ungrounded power lines of 110 volts AC or DC. Type F01DH rated 330 watts; type R01DH, 550 watts. Metal case, 1 1/2 x 2 1/2".

For Severe Interference Noises

C8408—Rejection Unit. **C8406**—Suppression Unit.
Type R035DH. For 110 volt Type F0501H. For 110-220 AC or DC lines, up to 250 550 watts AC or DC lines up to watts. List, \$3.00. 550 watts.
YOUR PRICE..... \$176 List, \$4.00. **\$235**

Aluminum container. For elimination of severe noises on grounded or ungrounded lines. Has plug-in receptacle, 36" cord with plug and ground connection lead.

Wire-In Type Suppression Units For Permanent Installations

C8415—Type G01DH. **C8407**—Type F1005DH.
List, \$1.00. List, \$5.00.
YOUR PRICE 59c **YOUR PRICE \$294**

Condensers grounded to container. For oil burners, neon signs, etc. Separate ground lead. For 110-220 volt AC or DC lines up to 1100 watts load. Size 3 1/2 x 4 1/2".

Wire-In Type Diverter Units

Employ capacitors only to divert interference from the high potential side of power line to ground. Use of field coils of motors as chokes makes a very effective method of silencing noisy motors. Units have no current limitation.

C8414—Type G01D. Dual capacitors grounded to case. Size 1 1/2 x 2 1/2". For 110V. lines.
C8419—Type G14T. Triple capacitors grounded to case. For use on hand operated motor driven devices. Size 3 1/2 x 1 1/2".
PRICE, Each... 29c

Plug-in Diverter

For Use at Appliance or Radio
C8410—Type F18.
List, 50c.
YOUR PRICE 29c
Display Card of 24 for \$6.35

In most cases, very effectively eliminates interference noise from home appliances, shavers, etc. Consists of 0.1 mmdf. capacitor in compact bakelite plug-in case. For 110 volt AC or DC lines.

Radiation Suppressor

C8418—List, \$1.50.
YOUR PRICE... 88c
Type OB15. Carbon element suppressor for use on ignition systems of oil or gas heating systems. 15,000 Ohms in isolantite jacket. Two usually required for each installation. Size 3 1/2 x 1 1/2". Solderless connections.

Belden Power Line Filter

Effective on Both Short-Wave and Broadcast Bands

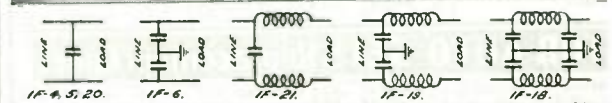

D8405—Type 8100. List, 9.50.
YOUR PRICE..... \$558

An efficient power line filter for use at the radio or interference source. Efficient with all types of receivers. Effectively reduces power line interference on both broadcast and short wave bands. Incorporates two dual condenser sections with two dual high "Q" choke coils. Separate ground connection is provided by three wire power supply cord. Maximum load rating, 3 amperes. For use on 110 volt AC or DC lines.

Underwriter's
Approved

Cornell-Dubilier "Quietone" Interference (Radio Noise) Filters

Every Quietone is a complete filter containing the correct condensers or combinations of chokes and condensers to very effectively eliminate practically every man-made noise that is radiated through power lines. Capacitive-inductive type units will eliminate the most severe noises in both broadcast and short-wave receivers. IF-6, IF-18 and IF-19 have split capacitor with separate ground connection for attaching to frame of motor or suitable ground. All units for use on 110 volts AC or DC with loads up to 550 watts, except IF-21 takes up to 175 watts.

For Preventing Interference Pick-up at the Radio Receiver

C-D Quietones for Industrial Equipment

For Use at the Interference Source

For elimination of interference caused by motors, generators, oil burners and other industrial electrical apparatus. Designed for quick installation. Capacitive type units have no current limitations. *All units for single phase circuits except IF-14 is for 2 or 3 phase (3 wire) circuits.

250 Watt Capacity

An efficient power line filter for use at the radio receiver. Has dual inductances and capacitors. Plug-in connections with ground terminal post. 1' Power cord. Housed in metal case.

Everyday Shop Necessities

Cabinet Repair Kit

C5708—
YOUR PRICE
\$1.91

A complete, practical kit for cabinet repair jobs. Easy to use—with a little practice anyone can do as good a touchup job as a professional cabinet finisher. Material included makes possible a professional job on dents, knicks and scratches in wood, plastic or bakelite cabinets, knobs, etc. Kit includes Magic Scratch Remover for slight scratches; 9 assorted Shellac Sticks for deep knicks; bottles of light and dark oil stain; metal shading lacquer; polish; alcohol lamp with fuel; spatula touch up brushes; steel wool; sandpaper; and wiping cloth. Kit comes in handy black leatherette finish box.

Creme-O-Wax Polish
C5706—9 oz. Bottle.
YOUR PRICE..... 27c
C5707—16 oz. Bottle.
YOUR PRICE..... 44c

For Radio Cabinets, Pianos and All Fine Furniture. Polish the cabinet of a repaired set before you return it to your customer. Then sell him this quality polish made particularly for fine radio cabinets. Contains no oil. Leaves a hard film of glossy protective wax.

Radio Service Solvent

For loosening cement on speaker cones, spiders and voice coils. Can also be used as a solvent or thinner for most cements listed on this page. Makes an excellent cleaner for volume controls and contacts.

C5704—1 oz. Bottle.
YOUR PRICE..... 29c
C5705—8 oz. Bottle.
YOUR PRICE..... 44c

Non-Slip Dial Compound

C5712—
Your Price 18c
For aiding in repair of slipping, friction and cable or cord driven dials. Saves much work and insures a perfect job. Easy to use. Powder form. Should be applied freely to all slipping parts. Generous supply in cardboard container: 2"x3 1/4" high.

Radio Contact Lubricant

C5710—2 oz. Bottle.
YOUR PRICE..... 21c
Eliminates noise on controls and contacts. Protects from dirt and dust. Insures proper and lasting repairs for all air-exposed contacts. Used for lubricating switches, tube prongs, etc. etc. Cleanses and lubricates. A cream solution, cannot spill.

Speaker Centering Shims

C5750—Celluloid.
Your Price, Per Kit.. 35c

For centering and adjusting cone in pole piece of speaker. Insure simple, positive—spacing and centering for Voice Coils and Armatures. Makes Speaker Repairs and replacements easier to handle. Kit includes four each of 5 size shims in following thicknesses—.005", .0075", .010", .0125", and .015". Shims are made of very flexible celluloid. Each shim is distinctively colored to denote size.

Speaker Centering Shims Swedish Steel

C5751—
YOUR PRICE, per Kit.. 38c
Serve same purpose as above shims but are made of best grade Swedish Steel. Very flexible yet strong enough so that with reasonable care will last a life time. 4 each of 4 sizes are furnished in a handy gold lettered partitioned snap case—.004", .006", .008", and .010 inches. Color coded to indicate different sizes.

Dial Lite Coloring

K5715—
List, 50c.
Your Price.. 29c

Kit includes five 1/4 oz. screw top bottles: Red, Green, Blue, Amber and Solvent. Dip dial light in the coloring and the job is done. Dries in one minute. Color remains permanently. Many new sets have several colored dial lites, replace with one of the same color and ask more money for the job.

New Air Drying Black Crystallizing Lacquer

No Baking or Heating Required
N5724—3-oz. Can. 21c
YOUR PRICE
K5717—Half-Pint. 59c
YOUR PRICE
K5718—Pint can \$1.05
YOUR PRICE
K5719—Quart can \$1.76
YOUR PRICE
Gives any metal a professional crystalline (crackle) finish. Easy to work with—just paint the panels and let it air dry. Dries in twenty minutes. Produces small swirling type designs.

Gray and Brown Crystallizing Lacquer

Cement for Bakelite Glass or Metal

K5730—
YOUR PRICE, PER CAN 21c
Made for sticking Bakelite to Bakelite, glass, metal parts, etc. For cementing loose inserts, moldings, tube base, caps, etc. Finds many uses around the shop. Generous supply in metal can.

Furniture Scratch Remover

K5725—List, 50c.
YOUR PRICE 22c
Just a touch of stain with the brush and the scratch disappears forever. Always ready for use, suitable for any color finish. Indispensable in Radio store, for touching up minor scratches and defects. Packed in permanent case, easily carried in the vest-pocket.

5000 Volt Insulating Cambric

C5736—Roll of 210
square inches.
List Price, 50c.
YOUR PRICE.... 29c
For insulating and preventing grounds and shorts on field coils, transformers, resistors, condensers, wires, etc. Will safely withstand up to 5000 volts. A dry cambric.

Radio Repair Cement

For Speaker Cones, Anchoring Wires Etc.

K5731—
YOUR PRICE,
Per Set
29c

For cementing speaker cones and voice coils, anchoring R.F. coil wires, etc. Waterproof. Makes extra strong durable joint. Sets almost instantly. Brush for applying and can of thinner included.

Silverene Enamel

K5714—1/2 Pint Can.
YOUR PRICE 59c
Gives a very high lustre and an extremely smooth brilliancy. Non-porous (air and water tight). Will not peel, chip or crack. Highly reflective to heat and light. Suitable for use on Wood or Metal.

Adhesive Rubber Cushion

Stops Rattles and Vibrations

10 Foot Roll
K5740—

K5741—1/2" thick-
ness..... 24c
K5742—3/4" thick-
ness..... 32c
50 Feet Roll.
K5743—1/4" thick-
ness..... \$1.10
PRICE
K5744—3/8" thickness..... \$1.35
A live sponge rubber material that can be quickly and easily applied wherever the prevention of vibration or shock is desired. 3/4" wide. Coated with an adhesive compound that instantly seals with slight pressure. Rubber may be compressed to one-half normal thickness. Uses: Cushions radio chassis, speakers, vibrators, condensers, etc.

Amphenol Coil Dope

Extremely Low Loss
C5790—2 Oz.
YOUR PRICE..... 29c
C5791—4 Oz.
YOUR PRICE..... 38c

A new synthetic resin polystyrene base product for impregnating coils, paper tubing, fibre, ceramics, fabrics, and other moisture absorbent materials. Provides a complete protection against moisture and dust. Non-hygroscopic. Rapid drying. Can be applied by dipping or with brush.

Thinner for Above
C5792—2 Oz. Bottle.
YOUR PRICE..... 15c

Insulating Varnish

K5720—Pint Size.
YOUR PRICE 73c
A5727—1/4 Pint Size.
YOUR PRICE 44c
For use in treating coils, noisy transformers, chokes, etc. Composed of highest quality ingredients. High dielectric strength. Is waterproof, oil proof, and non-corrosive. Can be used as dipping varnish or applied with brush. Dries in air.

Cone Cement

In Handy Metal Tube

K5732—
YOUR PRICE 24c
For cementing cloth and fibre cones, paper rings or felt to metal speaker frames. Dries in less than ten minutes and will hold permanently. Supplied in a metal tube containing three cones.

Cabinet Touch-Up Kit

Removes Scratches

R5709—
YOUR PRICE... 35c

A practical touch-up kit that will touch up those accidental scratches and dents on cabinets. Contains 4 bottles, camels hair brushes, a portion of dark wax for filling deep scratches and a rubbing cloth. A light and dark stain, and varnish stain are included. Varnish stains can also be used to touch up scratched metal escutcheons, etc.

Desk Type Stapler

For Home Office or Shop

A high quality, low priced, stapler. Just the thing you have always wanted for your desk or writing table at home or at the shop. The cost is low! Performance is unsurpassed! Holds 50 Staples Including Magazine. Rubber base Prevents Slipping or Marrying of Surface on which used. New Streamlined Modern design. Grades Even the Finest Desk.

D14199—Stapler, Desk Type. Complete with 500 staples.
YOUR PRICE, 50c.
Less 2%..... 49c
D14198—Extra Staples For Above.
YOUR PRICE Per Box of 2000 25c each, Less 2% cash discount..... 24c

Quicker
than a
Short circuit

LITTELFUSES

For Test Instruments

Especially designed for protection of delicate equipment. Break circuit in 1/100 part of time required to burn instruments. May be used on 250 Volts D.C. or A.C. The smaller sizes have been used without arcing up to 1500 volts D.C. on a 2KW supply. Illustration is actual size. Length 1 inch.

Clarostat A.C. Line Voltage Regulator

For sets with critical line voltage requirements where a dependable regulator must be employed.

Stock Num.	Type	Watts of Set	List Ea. \$1.73
K9880	O	Up to 60	54c
K9881	A	60 to 100	
K9882	B	100 to 150	

Automatic Voltage Control

For Reducing Line Voltages

N9891—List, 75c.

YOUR PRICE... **44c**

Ten for \$4.18

Protects tubes, resistors, and condensers by automatically compensating for line surges as voltage rises. Air-cooled type. Supplies 110 volts A.C. or D.C. on any line up to 130 volts. For use with any set consuming up to 50 watts.

Heavy Duty Model
A9889—For sets of 50 to 150 watts.
YOUR PRICE... **97c**

Line Voltage Reducer

Reduces Excessive Line Voltages

C9890—List, \$1.00.
YOUR PRICE... **30c**

Ten for \$2.73
Maintains a constant potential on lines on which voltage climbs. Protects tubes, condensers and resistors against line surges by automatically reducing line voltage to a normal operating voltage.

Continental "Voltacon" Line Voltage Regulator

C9884—List Price \$1.25.
YOUR PRICE... **73c**

Will regulate line voltage perfectly for radios of from 4 to 10 tubes drawing up to 100 watts. Three position switch, high, medium and low, keeps line voltages of from 110 to 135 volts at proper value for most efficient and safe operation.

Adjustable Ballast Tubes

For AC-DC Radios

Three new universal type ballast tubes that will take care of 90% of your calls for replacement ballasts. Standard Octal or 4 prong base; same size and appearance as 524 tube. Easily changed jumpers on tube prongs make possible exact duplicate replacements. Complete with instructions. Keep at least one each of these ballasts on hand at all times and you will be able to make immediate replacement of all but the very unusual types.

A9934—Type A. Octal Base. } YOUR PRICE, **59c**
A9935—Type B. Octal Base. }
A9936—Type C. 4 Prong }
In Lots of 5 or more, Each, 55c

Serviceman's Ballast Tube Kit

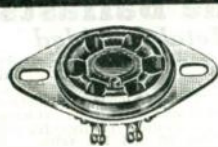

D9959—Consists of 5 of above ballast tubes (2-Type A, 2-Type B and 1-Type C). 80 Page ballast tube replacement manual, template to simplify cutting operation and cutter tool are included free.
YOUR PRICE, **\$275**

Type S

Type CP

Molded Bakelite Radio Tube Sockets

Made of molded bakelite with tube locating groove. Cadmium plated phosphor bronze contacts for easy soldering, recessed in individually molded chambers, protects them from damage. "S" and "CP" Type sockets and plugs mount without screws or rivets and are held to chassis with locking ring of spring steel. Mount in 1 1/2" keyed hole except those which fit 1 1/8" hole. Easy to mount on any material up to 1/8" thick. Use die listed on opposite page for punching chassis holes to fit these units. "RS" and "RCP" Type sockets and plugs. "S" sockets and "CP" plugs assembled on steel plate with slotted holes to fit mtg. ctrs. of 1/4" to 1 1/2". Take the place of wafer sockets.

Tube Shield Base K12228—PRICE, EACH... 2c

For use with above type S sockets except 7L and 7 Comb. Mounts between socket and chassis without use of any rivets or screws. Cadmium plated rust proof metal. Fits all standard size shields. Overall dia., 1 1/8". No socket included.

Low-Loss Steatite Sockets

Exceptionally high dielectric strength, low power factor and high electrical resistivity. Easy to mount. Metal adapter plate can be screwed or riveted to panel or removed and socket mounted directly into chassis by spring retainer ring. Socket mounts in 1 1/2" hole (large size seven prong in 1 1/8" hole). Slotted holes in steel adapter plate 1 1/4" to 1 1/2" mounting centers.

EACH PIECE PRICE 15c

Rubber Handle For Shielded Connectors

The above plugs snap into this rubber handle and are held securely in place by an inner molded shoulder. Allows easy removal of plug in recessed or hard to get at places. Also protects connection from damage. Molded from black live rubber.

C12046—YOUR PRICE..... 9c

Cable Clamps C12047—YOUR PRICE 6c

Positive gripping cadmium plated steel. Attaches to shell of shielded connectors above and relieves all pulling or twisting strain from soldered connections. May also be mounted on chassis or panels. Mounts in hole 1/4" to 1/2".

Connector Locking Covers

Cadmium plated threaded steel covers that slip over above shielded connectors. Lock connectors firmly together preventing accidental disconnection. C12048—Cable Type—Consists of two shells to slip over connectors. C12049—Chassis Type—Consists of 1 shell for connector and a threaded steel flange that mounts on socket. YOUR PRICE PER SET..... 15c

Tip Jacks and Plugs

Molded bakelite. Jacks mount in 1/4" hole in panels up to 1/4" thick and are held in place by retainer ring.

REPLACEMENT PARTS

Majestic Stator Plate Assembly

Original Part Number 52

Used In Series 70, 90, 100, 130, and 180

N10500—
Your
Pri. Ea. **59¢**

No further need to replace the large and expensive variable condensers used in Majestic chassis 15, 15B, 25, 25B, 70, 70-B, 90, 90-B, 100, 100B, 130, 130A, 150, 180, and 230A; models 71, 72, 90, 91, 92, 93, 101, 102, 103, 130, 131, 132, 151, 153, 154, 155, 156, 181, 233, 251, 251B, 253, 253B, 254, and 254B. Use this stator plate assembly to repair only the damaged sections. Eliminates necessity of discarding the entire variable condenser when only one or two sections are damaged. Easy to install. Operation requires removal of only four screws. Assembly consists of stator plates securely mounted in aluminum casting. Radolek is first to make these replacements available. Size 1 1/4" wide, 3-3/16" long.

Five Gang Condenser

Part Num. 321

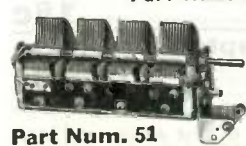

Used in chassis 90, 90B, and 100; models 90, 91, 92, 93, and 101. Identical to original. Frame constructed of durable rolled steel. Plates and stators of improved design and cast aluminum construction. Length 1 1/4", width 4 1/4".

C10501—
YOUR PRICE..... **\$2.95**

Four Gang Condenser

Part Num. 51

Used in chassis 70 and 70-B, models 71 and 72. Exact replacement conforms in every respect to original manufacturer's specifications. No changes necessary in re-aligning.

Part Num. 51

Order to make quick and accurate installation. Includes pulley wheel and pilot light socket.

D12503—Genuine Majestic Replacement Parts Catalog listing complete line at lowest wholesale dealer prices. FREE Radolek can supply Genuine or Exact Duplicate replacement parts for practically any Grigsby-Grunow Majestic Radio Set.

REPLACEMENT COILS for all Majestic RADIOS

Exact Original Manufacturers Specifications
Each coil is completely assembled and an exact electrical and physical duplicate of the original. Size, mounting holes, trimmers and color coded leads are all carefully followed.

Transformers Pre-Tuned at Factory
Coils are all precision machine wound. Highest quality materials and workmanship.
The word "Complete" after any coil description signifies that the shield can and trimmer condenser are included.

Automatic Cut-Out

For Use On Any Car
Saves Battery, Vibrator, Etc.

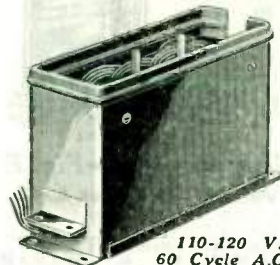

D10533
YOUR PRICE **\$1.73**

Instantly cuts out all electrical accessories including lights, radio, heater, etc. on car when starter switch is depressed. Increases voltage and spark intensity resulting in quick motor starting. Saves battery, gasoline and time. Saves radio vibrator points from becoming pitted or fused as usually occurs when battery voltage drops under load of starter. Maximum contact current 38 amps. Supplied with mounting and installation instructions.

Popular EXACT DUPLICATE Replacements

Exact Duplicate Condenser Blocks

Only New High Quality Materials Used

For ATWATER KENT

No retooling or redrilling necessary to install these exact Duplicate Power Units. They match the original electrical and physical specifications.

For Models 40, 40F, 42, 42F, 44, 44F, 45, 52, 56 and 57

D8455—Condenser only for the power pack used in above models.

List. \$3.00

YOUR PRICE \$1.47

For Models 37 and 38 Condenser and Choke

Contains 3 mfd. filter block and 3 chokes, two high voltage filter chokes and one speaker choke. Six color coded insulated 6" leads and ground terminal. Size 5 1/4" x 3 1/4" x 1 1/4".

A8450—List. \$6.00.

YOUR PRICE \$2.94

Atwater-Kent Line Ballast Resistors

Models 42, 43, 44 and 52. Size 3 1/2" x 1 1/4" x 1 1/4".

C3867—Model 42, 43 and 52. Pt. No. 13845. 28 Ohms.

R3868—Model 44-Pt. No. 13755. 21 Ohms.

YOUR PRICE, EACH 42¢

SPARTON By Pass Condensers

Exact replacement for Sparton receivers—2 1/2" long—1 1/4" diameter. Bracket on end for 3/4" screw. Mounting lug with slot at side. Fibre case with hermetically sealed ends. Paper and foil type. 1928-31 models. Working Volts 600

Exact Duplicate AUDIOS

Replacements for All Popular Sets

Made exactly like the original transformers. Mounting holes, dimensions, lugs, voltages and color of leads exactly duplicate the originals. In many instances the insulation and the safety factor have been increased wherever the originals were not entirely satisfactory. Many additional replacements have been added to our listing.

Stancor Auto Radio Demonstration Packs

110 Volt AC to 6 Volt DC

Reliable well filtered power packs for use as a substitute for 6 volt storage battery in demonstrating and testing battery and auto radios. Also useful for charging storage batteries and to operate other 6 volt DC equipment. Features dry disc rectifiers, fused line, on-off switch, binding post terminals and black wrinkle finished chassis. Operates from 110-120 volt, 50-60 cycle AC.

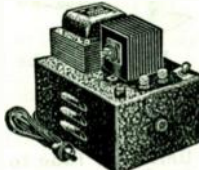

Model 132 Super Pack

D5996—Delivers 8 to 12 volts in seven steps without load. 3 to 6 volts at 12.5 ampere load continuously and 2 to 5 volts at 16 ampere load intermittently. Voltmeter indicates output. Overload relay. Size 1 3/8x3 1/8x8" high. Ship. wt. 26 lbs. **YOUR PRICE \$19.55**

Model 131 Economy Pack

D5995—Low priced compact unit. Delivers 11 volts at no load, 6.5 volts at 17 ampere continuously and 4.5 volts at 15 ampere intermittently. Has pilot light indicator. Size 8x6x7 1/2" high. Ship. wt. 16 1/2 lbs. **YOUR PRICE \$13.67**

Highly efficient compact transformers designed to fit the majority of present day receivers. Universal mounting brackets present a neat appearance and give flexibility in mounting in any position. Transformers are fully shielded to meet Underwriters' approval. Quality construction. Color coded wire leads. All Transformers are for 105-115 volt 50-60 cycle AC operation.

*Both windings may be used at one time at full rating.

†Has additional Tuning Motor Winding tapped at 18-24-50 volts.

New Type Shell Allows Two Point Flush Mounting

Stancor Catalog

C6987—Complete Replacement Transformer Catalog including public address and exact duplicate types. . . . FREE.

Stancor Hamamul

C5993—Completely describes seven transmitters giving parts content, transformer listing and working diagrams. . . . FREE.

Stancor Testing Autoformer

D5981—Pt. P6299. **\$411**
YOUR PRICE
Applies overload voltages to set for testing, causing hard to find intermittently defective parts to break down and thus indicate their location. Tap switch provides 90 to 150 volts output. 150 Watts capacity. For 115 volt, 50-60 cycle AC operation. Size 3 1/2x3 1/2x4 1/2".

Speaker Field Substitute

D5985—Pt. C2302. **\$235**
YOUR PRICE
Takes place of speaker field when checking receiver on test bench without set speaker. 3000 ohms tapped at 2500, 1000 and 500. Provides resistances of 250, 750, 1000, 1750 ohms at 60 Ma. or 75 Ma. intermittently and 500, 1500, 2000, 2250, 2500, 3000 ohms at 40 Ma. or 55 Ma. intermittently. Size 3 1/2x2 1/2x3 1/2".

Big Savings on Transformers!

KEYSTONE

Universal Replacements

POWER TRANSFORMERS

Exceptional Quality at Low Cost

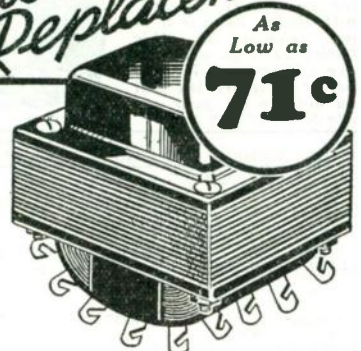

Keystone Power Transformers are the finest quality, best transformer values obtainable at these low prices. Expert engineering and high grade materials are used throughout. The compact sizes and universal mountings are designed to meet the majority of your replacement needs. Conservatively rated to assure ample safety factor. Precision machine wound coils, proper impregnation, and carefully stacked heavy oversize laminations provides highest efficiency, low operating temperature and long life. Shells are black enamel finish. 90-day RMA Guarantee. Diagram furnished. All primaries are for 105-120 volt, 50-60 cycle AC operation.

Universal Mounting

Transformers may be mounted in any position. Mounting centers are sufficiently adjustable to allow replacement in most radios without drilling holes. Fully shielded. Coded leads.

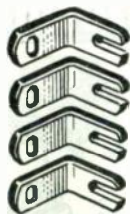

Flush Mounting

These Transformers fit the physical and electrical requirements of the majority of receivers. Any combination of tubes may be used providing the current ratings are not exceeded.

Tinned soldering lugs firmly attached to coil.

These 4 Universal Mounting Brackets are furnished with Universal Type only.

1st. \$3.00.

YOUR PRICE **\$1.76**

Couples up to 6 speakers on 500 ohm line. Tapped primary impedance 500/1000/1500/2000/2500/3000. Tapped secondary impedance .06 to 8 ohms when used on 500 line. 12 to 16 ohms when used on 1000 ohm line, etc. 10 Watts. Size 3 1/2 x 2 1/2" x 3" high.

Universal Tube to 500 Ohm Line

Secondary is adjustable .1 to 29 ohms.

D6660 T1825 2500 to 7000 60 10 \$1.91

D6661 T61826 8000 to 14000* 65 10 2.06

Universal Tube to Universal Speaker

Secondary is adjustable .1 to 29 ohms.

D6603 T13842 1500 to 7000 55 10 .88

D6634 T57801 4000 to 14000* 36 8 1.18

D6606 T13841 3000 to 10000* 60 20 1.62

*Center tapped for single or push pull output tubes. Size: T61825, T61826 and T13841: 3 1/2 x 2 1/2 x 3" high. T13842: 2 1/2 x 1 1/2 x 1 1/2" high. T57801: 2 1/2 x 2 1/2 x 3" high.

Tube Tester Transformers

With Tapped Primary

Supplies Filament Voltages of 1.5 to 110 Volts.

D6728—YOUR PRICE **\$1.39**

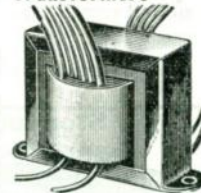

For constructing or modernizing tube testers. Supplies correct filament voltages for testing all receiving tubes. Voltages provided: 1.5, 2.0, 2.5, 3.8, 5.0, 6.3, 7.5 at 2 amps., 12.6, 25.0, 37.5, 45, 70 and 110 volts at 1.5 amps. Tubes of other filament voltages should be tested on next lower voltage specified above. Primary tapped for 95-105-115-125 volt.

50-60 cycle AC operation, compensates for varying line voltages. Also suitable for use with tube testers having line voltage adjustments. 8" Leads. Channel frame mounting. Size 2 1/2 x 2 1/2 x 3 1/2" wide. Mtg. ctrs. 3".

With Plate Winding

D6729—Supplies a plate voltage of 250 volts AC at 40 Ma. In addition to filament voltages specified above. Other specifications and sizes exactly as above.

YOUR PRICE **\$1.95**

Audio - Input - Output TRANSFORMERS - Filter CHOKES

Output Transformers

A type and size to fit every dynamic speaker requirement. Output transformers of these specifications and characteristics are standard equipment on thousands of speakers. The two sizes listed fit any standard make of speaker. Match practically any dynamic speaker voice coil.

For Single Tubes

Stock Num.	Plate Imped.	Pr. Ma.	Core Size	Mtg. Ctrs.	Your Price

*For Portable Battery Operated Radios having type 1A5G or 1E7G output tubes and 3 to 6 ohm P.M. Dynamic Speakers.

Special Value

Heavy Duty Output Transformer

C6354—Same mounting style as above transformer. Matches any single or P.P. tubes requiring 4000 to 5500 ohm load impedance to speaker voice coil of 6 to 15 ohms. 65 Ma. capacity. Slotted mtg. ctrs. 3/4 to 3/8". Size, 2 1/2"x1 1/2"x2 1/2".
YOUR PRICE **34c**

10 for \$2.90

Universal Output Transformer

Matches Any Tube To Any Speaker

Equipped with a high impedance center tapped primary and a secondary having a combination of taps making it possible to correctly match any single or P.P. tube to any speaker or voice coil of 10 to 30 ohms impedance. Cadmium plated channel frame. Constructed of high quality materials. Thoroughly impregnated. Instructions included.

C6409—Handles 4 Watts Output. Size, 1 1/2"x1 1/2". Mtg. Ctrs. 2".
YOUR PRICE **39c**

C6909—Handles 8 Watts Output. Size, 1 1/2"x1 1/2". Mtg. Ctrs. 2".
YOUR PRICE **48c**

Heavy Duty Universal Output Transformers

Correctly Matches All Tubes to any Speaker

An essential stock item for every serviceman. Designed with a high impedance primary having a special tapped secondary to permit ratio of turns in winding to match any standard power tube plate impedance, singly or in push-pull. Matches any voice coil between 0.11 ohm and 54 ohms. Complete with instructions.

Will Handle 12 Watts Output
C6850—With Vertical Mounting Frame as illustrated. Mounting hole centers 2 1/2".
C6933—With Horizontal Mounting Frame. Mounting hole centers 2 1/2".
YOUR PRICE, Each..... **69c**

Will Handle 18 Watts Output
C6851—With Horizontal Mounting Frame. Mounting centers 3".
YOUR PRICE, Each..... **85c**

Thordarson Class "B" Output Transformer

For Push-Pull 19, 30, 1J6G, 1J6G, 49 and other Class "B" power tubes requiring 10,000 ohm load at 15 Ma. Secondary is tapped at 4 and 8 ohms. Black enameled steel frame. 6" Leads. Size 1 1/2"x1 1/2"x2 1/2" high. Mounting ctrs. 2 1/4".
C6658—Code T81801. List, \$1.50.
YOUR PRICE **88c**

Class "B" Audio Driver Transformer

Single 30 to 1-19, 1-1J6G, or 2-30's

Couples a type 30 tube to push-pull 19, 1J6G or 2-30 tubes in Class "B." Used in battery receivers. Cadmium plated frame. 6" Leads. 1 1/2" Core. Size, 1 1/2"x1 1/2" high. Mounting ctrs. 2 1/4".
C6908—List, \$1.65.
YOUR PRICE **59c**

C6906—Same as above except 1 1/2"x1 1/2" core. 2" Mtg. Ctrs.
YOUR PRICE **55c**

THORDARSON Class "B" Driver Transformer

For Battery Sets

Couples a type 30 tube plate to grids of a type 19, 1J6G, or 2-30 tubes in Class B. Primary impedance 20,000 ohms at 7 Ma.; 1/2 secondary, 3500 ohms. Size, 1 1/2"x1 1/2"x2 1/2" high. Mounting ctrs. 2 1/4".
C6630—Code T78D46. List, \$1.50.
YOUR PRICE **88c**

Push-Pull Input Transformer

High quality transformer carefully constructed. Fully impregnated for protection against moisture. For use as replacement in all Class "A" circuits. Ratio of overall winding is 1 to 3. May be used as straight audio by disregarding secondary center tap. Core semi-shielded. Cadmium plated channel frame. 6" insulated leads. Size: 1 1/2" high, 1 1/2" long, and 1 1/2" deep. Mounting centers 2 1/4".
area is 3/4" square.
C6736—
YOUR PRICE **69c**

Special Value Push Pull Input

C6431—1:3 Ratio. Semi-shielded. Cadmium plated channel frame. Core size, 1 1/2"x1 1/2". Mtg. Ctrs. 2 1/4".
C6853—Straight Audio for Sgle. Plate to sgle. grid. 1:3 Ratio. 10 Ma. Pri. Cap. Plate to sgle. 2 1/2". Mtg. Ctrs. 2 1/4". Fully shielded.
YOUR SPECIAL PRICE **29c**

C6853—Straight Audio for Sgle. Plate to sgle. grid. 1:3 Ratio. 10 Ma. Pri. Cap. Plate to sgle. 2 1/2". Mtg. Ctrs. 2 1/4". Fully shielded.
YOUR SPECIAL PRICE **29c**

Universal Replacement Audios and Output Transformers

Three different mountings. All types have universal electrical characteristics. High quality transformers suitable for use in the finest receivers. Bright cadmium rust-proof finish. Diagrams and instructions included. For use on either A.C. or D.C. receivers.

Horizontal Frame—Overall 2 1/2" wide, 1 1/2" deep. 2 1/4" high. Mtg. Centers 2 1/4".
Vertical Frame—Overall 1 1/2" wide, 1 1/2" deep. 1 1/2" high. Mtg. Centers 2 1/4".
Universal Bracket—Overall 2 1/2" wide, 1 1/2" deep. 2 1/4" high.

Physical Dimensions

Ratio 3:1. Feeds from any type of general purpose tube into a stage of single audio.
K6400—Horizontal Frame.
K6401—Vertical Frame.
K6402—Universal Bracket.
YOUR PRICE **69c**

Push-Pull Audio Inputs

Overall ratio 3:1. Feeds from any general purpose tube either in single or push-pull into a stage of single or push-pull audio.
K6403—Horizontal Frame.
K6404—Vertical Frame.
K6405—Universal Bracket.
YOUR PRICE **69c**

Universal Output Transformers

Couples all combinations of power tubes, either single or push-pull to all dynamic or magnetic speakers. For voice coil impedances 1 to 30 ohms.
K6406—Horizontal Frame.
K6407—Vertical Frame.
K6408—Universal Bracket.
YOUR PRICE **69c**

30 Henry Filter Chokes

Layer wound and layer insulated coils. Silicon steel core. Cadmium plated rust-proof frames. 6 inch insulated leads. K6385—30 Henries. 50 Ma. D.C. Resistance 550 ohms. Dimensions: Core 1 1/2"x1 1/2". Height 1 1/2". Depth 1 1/2". Mounting hole centers 2 1/2".
1 1/2". Length 2 1/2". Mounting hole centers 2 1/2".
List Price, \$1.40.

New IRC Insulated Resistors

Types BW and BT

Highest quality molded bakelite insulated resistors. Fully protected against shorts or moisture break down. 1/2" leads are securely anchored. Metallized resistance element has exceptionally low noise level; unexcelled for use in any circuit. Wirewound types are especially designed for use in circuits requiring lower resistances. Accuracy $\pm 10\%$. Will stand overloads of 100% for short periods. Individually marked as well as color coded.

IRC Wire Wound Precision Resistors

Type WW-4
1 Watt
1% Accuracy

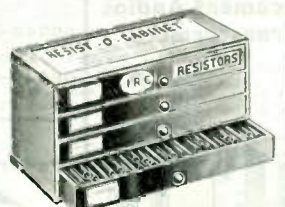

Actually bridge-tested and guaranteed to be accurate within 1%. Space wound with highest quality enameled resistance wire in layers on Insulokite and impregnated with moisture resisting compound to insure against variation due to moisture absorption of temperature fluctuation. Non-inductive—low distributed capacity due to high insulation between turns and multiple layer design.

With Bristol Board Chest

- D15820—Contains 56 assorted Type BT-1 (1 Watt) Insulated Metallized Resistors in Bristol-board chest. 8 Drawers. Size 4 1/2" x 1 1/2" x 8 1/2" high. List value of resistors, \$11.20. **\$659**
- YOUR PRICE, With Chest... **\$659**
- D15821—Chest only. **88c**
- YOUR PRICE **88c**
- Only Popular Values Are Supplied.

IRC Calibrated Resistance Indicator

A continuously variable calibrated indicator. For use as a voltage divider, for determining correct resistance values by the substitution method, etc. Covers range from 0 to 1 megohm. Direct reading. Etched scale. Reads 0 to 30,000 ohms on high current carrying wire wound element and continues to 1 megohm using metallized type resistance element. 4-leads with alligator clips.

R2742—
YOUR PRICE **\$485**

IRC All Metal Power Rheostats

Constructed with sturdy cast aluminum frame for rapid heat dissipation. Heat is uniformly distributed permitting safe operation at full rated load down to 25% of full rotation. Silent spiral connector gives positive contact between rotor arm and center terminal. Terminals mounted on porcelain and insulated from frame. Heavy mica insulation between element and frame. 1/4" Shaft 1/2" long. Single 3/8" hole mounting in panels up to 3/4" thick. Size: 25 Watt, 1-21-32" dia. x 31/32" deep, 50 Watt, 2 1/8" dia. x 1 1/8" deep, 1 1/2" Ar-row knob included.

CARBON

RESISTORS

The Only Safe
Kind to Use

Radolek Quality
is always the Best

New Insulated Carbon Resistors

Certified Quality

Finest quality, new fresh stock direct from the factory. The development of years of extensive research and manufacturing experience. Resistance is permanent, within a narrow range even when operated at overloads for a long period of time. Fully insulated. Impervious to moisture, heat, and mechanical strain. Resistors may touch each other without shorting. Conservative wattage ratings.

Variations from values are negligible. Ratings guaranteed within 10%. Average variations close to 5%. Unusually quiet and become MORE QUIET the longer in use. Very strong and sturdy. Will stand all reasonable handling in manufacturing and repairing. All have heavy 1/4" long tinned copper wire leads. Perfect and permanent electrical and mechanical contact. Each resistor marked with standard R.M.A. color code or labeled with rated resistance. Accuracy and quality guaranteed.

Buy With Confidence

These Radolek highest quality carbon resistors are made by the recognized leading Resistor Manufacturers. We well know that there are resistors offered by many others at lower prices than quoted here. But Radolek refuses to handle products of doubtful quality. Servicemen can always be sure of receiving only the Highest Quality Carbon Resistors when dealing with Radolek. We always have supplied only the finest quality resistors as "Radolek Certified Carbon Resistors."

No Serviceman Can Afford to Waste His Time or Jeopardize His Reputation Using Inferior "Job Lot" or "Surplus" Resistors. Resistors Offered At Lower Prices Are of Inferior Quality and Expensive At any Price.

Resistance Indicator

Handy pocket size color code indicator with three rotary dials in colors. Indicates value of any resistor which is color coded according to RMA Standards. Free with order for any 24 resistors. C2299—PRICE, If Purchased Separately..... **9c**

CASE
ONLY
R3996—
49c

These kits enable the serviceman to make practically any resistor repair regardless of any unusual value resistance needed. Twenty-four of the most popular value resistors are included as follows: 1 each—100, 250, 400, 500, 800, 1,000, 2,000, 3,000, 5,000, 6,000, 10,000, 12,500, 15,000, 20,000, 25,000, 30,000, 40,000, 50,000, 60,000, 75,000, 100,000, 250,000, 500,000 ohms; 1 megohm; 2 megohms. If value wanted is not in kit, combinations can be made to give a resultant resistance of any exact value needed. Simple chart and calculating formulae included in kit. Accuracy guaranteed within 10%, and most values are actually within 5%.

In the Metal Box

Resistors are always ready and safe. Strong, green lacquered heavy gauge steel boxes protect the resistors against the roughest handling. Drop the kit in your tool box, on the job, you are always sure to have the correct dependable resistors ready to use. The right resistor when you want it.

Wire Wound Resistors *For Use in Circuits of High Power Dissipation*

Vitreous Enameled Resistors

Wire wound on a $\frac{1}{8}$ " porcelain tube $1\frac{1}{2}$ " long with a $\frac{1}{8}$ " hollow center. Coated with high quality Vitreous enamel and fired at red heat making an enamel coating which is fused tightly to the wire, terminal connections, and base. Either the solder lugs or $\frac{1}{16}$ " (tinned wire leads may be used for mounting unit in circuit.

YOUR PRICE.....39c

Cement Coated Resistors

10 Watt Size
Highly Moisture Proof
Will Stand 500% Overload

A new process now makes cement coated resistors more highly moisture proof, greater heat resistant and longer lived than higher priced vitreous enameled resistors. Will take up to 500% overload. Will not crack, peel or flake. Truly a superior resistor in every way—yet priced so low as to guarantee you a big profit.

Candohmeter Resistance Indicators

R3870—Range 0 to 10,000 and 0 to 100,000 ohms. List Price, \$2.00.
YOUR PRICE \$1.18

An accurate, uniform wire wound resistor insulated from and enclosed in metal housing with exposed slot permitting contact with resistor. Furnished with insulated handle test prods. Has two scales, the upper one to determine approximate value, the lower to permit more accurate reading within that range. Serves to determine proper resistance to replace a defective resistor.

Mallory-Yaxley Truvolt Wire Wound Adjustable Resistors

High quality resistance wire wound on fire-proof lava tubes. Adjustable clip, permits tapping at any desired point. Size, $\frac{1}{2}$ "x $\frac{1}{2}$ " long.

New Test Instruments

Dependable
Volt-Ohm-Milliammeter
Kits

Has
3" Meter
1000 Ohms
Per
Volt

A one Ma. foundation meter of the D'Arsonval type. Has easily read calibrations on long multi-range scales. Square bakelite case. Scale ranges of: 0.5/50/250/500/2500 Volts DC, 0.1/10/100/500/1000 Volts AC; 0.1/10/100/1000 DC Ma.; 0.1/10 DC Amps; 0/500/100,000/1,000,000 Ohms; —8 to +15/+12 to +35/+26 to +49/+32 to +35 DB. Accuracy within 2%. Complete operating instructions and all necessary wiring diagrams are included. Ohmmeter circuit requires 3 flashlight cells, 1½ volts each, which are furnished with the DC parts kit. Necessary parts for building complete testers are listed below.

D17151—Meter only. \$294
YOUR PRICE

Parts Kit for D.C. Ranges

All parts needed for above DC ranges. Includes a drilled and etched aluminum panel 7 1/8"x3 1/2"; selector switch, 13 bakelite tip jacks, ohmmeter control rheostat, 2 knobs, 12 specially calibrated resistors (6 wire wound); 3-1½ V. batteries. Complete instructions and necessary wiring diagram.

D17152—DC parts kit only. \$293
YOUR PRICE

Parts Kit for A.C. Ranges

Add this kit to the above DC kit to make a complete AC-DC instrument having all of the ranges indicated in the description above. Includes a copper oxide rectifier, specially calibrated multiplier, jack, mounting bracket.

D17153—AC parts kit only. \$162
YOUR PRICE

Instrument Case

D17154—Hardwood meter box to house either of above kits. 8 1/2"x5 1/2"x3 1/4". \$83¢
YOUR PRICE

Special Value Paper Condensers

Quality paper di-electric condensers made by a well known manufacturer. Use them for general replacement or experimental purposes.

Tubular Types

D8691—.25 Mfd. at 400 volts. In 1/2"x2 1/2" moisture-proof cardboard tube. 4" Leads.

D8692—.05-.05-.005 Mfd. at 125 volts AC (400V. DC). 1/2"x2". Long cardboard tube. Has 3 leads. Note: .005 is coded by longer insulation on lead. See diagram at upper left.

Either Type
YOUR PRICE, Each..... **4¢**
Ten for 30¢. 100 for \$2.00

In Metal Container

D8690—Six condensers in metal container with spade type mounting lugs. See diagram at upper left for capacity and voltage ratings. Size, 2 1/2"x2 1/2"x1 1/2" high.

YOUR PRICE, Each..... **8¢**
Ten for 60¢. 100 for \$4.50

Special Value Carbon Resistors

1/2, 1 and 2 Watt

Fine quality carbon resistors. RMA Color coded for easy identification. These resistors represent values that you cannot afford to miss.

1/2 and 1 Watt Resistors, Each **3¢** 100 for **\$2.25**

2 Watt Resistors, Each **4¢** 50 for **\$1.75**

Solar Model CE Exam-eter

Tests for Capacity, Shorts, Opens, And Impedance under Actual Operating Conditions

D17172—Solar Model CE Exameter complete with all necessary tubes, test leads and instructions. For 110 volts 60 cycle AC operation. **\$31.31**

YOUR PRICE

Makes all measurements necessary to determine the true condition of any type condenser used in radio receivers. Tests for shorts, opens, R.F. impedance, intermitents (dynamic circuit). Has capacity range from 10 mfd. to 2000 mfd. in 10 steps. Measures resistance in five ranges from 50 ohms to 10,000 meg-ohms; leakage measurements are made directly on meter in Ma; Bridge meter plus power factor scale shows power factor from 0 to 50%. Has variable D.C. voltage supply of 0 to 550 volts. DC vacuum tube voltmeter measures D.C. voltage from 0 to 600 in three ranges; A.C. vacuum tube voltmeter (input resistance 10 meg.) has range from 0 to 30 volts; meter can also be used to check continuity. Employs 1-6L6, 2-6J5GT's. With leads. Portable case is 8 1/2"x11 1/2"x5 1/2" high. For 110 volts, 60 cycles A.C. Complete with tubes.

New Carron Test Units and Kits

Signal Tracing Amplifier

Model CCH
D17287—YOUR PRICE \$39.20

Makes gain and frequency measurements over a range of 55 Kc to 17Mc in 5 bands. Uses 6U5 electron eye as an indicator tube; 4 step 60 db. attenuator; built-in speaker. Input capacitance of only 2 mmf. Tests all RF, IF and oscillator functions. Grey wrinkled metal cabinet. Complete with 30' co-axial cable and 7 tubes. Size, 9"x9"x7". Shpg. wt., 14 lbs. For 115 V. 60 cycle.

B.F. Audio Oscillator

Model CCA
D17326—YOUR PRICE \$24.45

This instrument is indispensable for providing overall fidelity checks on audio amplifiers and receivers, determination of modulation capabilities, checking for speaker rattle, etc. Covers from 20 to 16,000 cycles per second. Has sinusoidal wave form with maximum distortion under 2%. Output flat within 1.8 db. over range. Has a 15-volt 11M8 output into a 100,000 ohm load. Grey wrinkle finish metal cabinet, 7"x7"x5". Full-vision dial. Uses 2-6XJ7, 2-6C5, 1-5Z4, 1-6U5. Has a 60 cycle calibrator. Complete with tubes. For 115 V. 60 cycles.

Model CCH Kit

D17288—Essential Kit. Consists of 5 band 2 stage IF assembly, two-gang condenser, dial and hdw., chassis panel, case, switch and 18 tubes. **\$17.15**

Model CCA Kit

D17327—Kit contains oscillator unit, filter, 3x5 mmf. variable condenser, a punched and drilled 7"x9"x2" chassis base, panel and cabinet, hardware, dial parts, etc. **\$10.25**

D17328—Tubes and Miscellaneous Parts. Contains resistors, condensers, transformer, sockets, etc. Includes 2-6XJ7, 2-6C5, 1-5Z4, 1-6U5 tubes. **\$9.75**

IRC STANDARD Metallized CONTROLS

WITH THE NEW SILENT SPIRAL CONNECTOR

Absolutely quiet! Features metallized resistance element, spiral spring connector, 5 finger contactor and bakelite case with dust-proof metal shield. Available in large size Type CS measuring 1 1/2"x1 1/2" dia., andidget Type D size 1 1/2"x1 1/2" dia. *Include 300 ohm resistor.

TAPERS: A Linear resistance. C For Grid circuits. D for combination Antenna and Cathode Bias. F For Plate, Screen or Cathode Bias circuits.

Standard Controls—Type CS

With attached 1/4"x3" long shaft. Less switch. List, \$1.00.

YAXLEY Universal Replacement STANDARD and MIDGET Controls

STANDARD SINGLE CONTROLS

MIDGET REPLACEMENT CONTROLS

Ruggedly constructed, quality controls. 3" long fluted aluminum shaft, easily cut or filed. Size $\frac{1}{8}$ " deep by $1\frac{1}{2}$ " dia. on carbon types and $1\frac{1}{2}$ " on wire wound. H.R.—Are high resistance carbon types. W.W.—Are wire wound. Have adjustable minimum bias feature. HR types are supplied with external bias resistor (when used as cathode bias control). Have slotted shaft for auto sets. Have $\frac{1}{2}$ " long shaft with additional $5\frac{1}{2}$ " long slotted extension shaft and coupling, for auto sets.

Ruggedly constructed midget replacement controls. Supplied in plug-in shaft type or with shaft attached. Control measures $1\frac{1}{2}$ " in dia. by $\frac{1}{2}$ " deep. $\frac{3}{8}$ " bushing. Supplied less switch.

Exact Duplicate Replacement Controls MALLORY

Special Replacement Controls

See Your Mallory-Yaxley Radio Service Encyclopedia for Individual Set Listing or Specify Receiver and Model and we Will Send Correct Replacement Control.

Single "SRP" Controls

Controls are exact duplications of original. Nuts and washers are included but switch and other accessories are not supplied. Use standard attachable switch listed on opposite page.

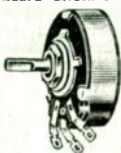

Controls less switches as listed below (except SRP 273 and SRP 280) List Price, \$1.50.
YOUR PRICE, **88¢**

*Controls SRP 273, SRP 280 include switches. List, \$2.00.
YOUR PRICE **\$1.18**

†Have right hand switch action. H.R. are high resistance carbon type controls. W.W. are wirewound type.

Resistance Taper Curve Chart

Taper I—Used in antenna, RF and Audio Grid Shunt circuits where very little current flows. Only center and left hand terminals are used.

Taper II—Used in series cathode, screen and plate circuits where considerable current flows. Center and right hand terminals used.

Taper III—Is a combination taper of I and II where control must perform use of both above tapers. As in antenna-cathode circuits.

Taper IV & IVA—Indicate linear controls. Used where taper is not necessary as in voltage divider circuits—voltage being directly proportional to rotation of shaft.

Taper V—Control with tone compensation tap. Used in audio shunt circuits.

Taper VI—Indicates control with tone compensation tap at very low resistance. Used in audio shunt circuits.

Taper VII—Used in wirewound controls—same use as Taper III.

Mallory-Yaxley Encyclopedia of Radio Service

New Third Edition

The First and Second Edition proved that this Book meets an overwhelming serviceman's need. And now this new edition with 256 Pages of Real, Time-Saving Information fills that need even more fully at a greatly reduced price. Printed on Quality Paper and Bound in Flexible Heavy Paper Covers. Size, 8 1/2" x 11".

C12441—List, \$1.25.
YOUR PRICE **75¢**

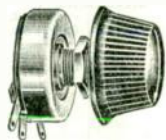

The most complete radio service encyclopedia ever published. Gives finger tip reference to information never before published. Over 17,000 radio receiver models are completely analyzed giving all the information necessary for complete, quick radio service work. Provides parts replacement information instantly and accurately covering volume controls, condensers, vibrators, tube complement and I.F. peak frequency of each model.

Contains 56 pages of service information, including data on automatic tuning systems, receiver and amplifier design, complete tube data, cathode ray testing, alignment, antenna design, etc. All formulas, schematics and diagrams and other miscellaneous data of not much use to the average serviceman were omitted to greatly reduce the cost. You won't have to waste time "digging" through dozens of books for service replacement data. This third edition is complete in itself and includes all the valuable service data of the first and second editions. This book supplements—does not replace—manuals like Riders, and so a Riders' Trouble Shooters Manual page index is also given in the MYE for quick reference thereto.

Midget Wire Wound Potentiometers Dissipates 2 Watts

Ideal for test instruments or midget ohmmeters. Diameter less than a half dollar, only 1 1/2". Extends 1/2" back of panel. 3/4" mounting hole, 3/8" threaded shank, 1/8" shaft, 1/8" beyond shank. Linear resistance. Contact arm and center terminal are grounded to frame. Knob not included.

Volume Control Accessories

Aluminum Extension Shafts

For use where longer shafts are required. Aluminum shaft easily cut to proper length. 4" long. For 1/4" volume control shafts.

A11285—Code RS-242—Dia. 1/4". 3/4" flat. List Price, 30¢.
A11286—Code RS-243—Dia. 1/4". 1/2" flat. YOUR PRICE, **18¢**
A11287—Code RS-244—Dia. 1/4". 1/2" flat. EACH

Auto Radio Control Shafts

Adapts universal volume controls to auto radio use. One end of extension shaft fits slotted or tongue type remote control cable end fittings and other end fastens securely on volume control shaft. Enclosed in tight fitting tube, 2" long.

A11288—Code RS-245—Slotted type. Dia. 1/4". 3/4" slot.
A11289—Code RS-246—Tongue type for slotted end fitting. Tongue: 1/4" wide, 1/8" thick. List Price, 35¢.
YOUR PRICE, EACH **21¢**

Extension Bushing

Permits mounting any standard Yaxley Control 1/4" back from the panel. Slips over shaft and screws on volume control end threaded for fastening to panel with standard control nut.

A11284—Code EB-247. List, 20¢.
YOUR PRICE **12¢**

Hex Shoulder Nut

Centralab STANDARD REPLACEMENT VOLUME CONTROLS

STANDARD RADIOHMS

MIDGET RADIOHMS

ADASHAFT MIDGET RADIOHMS

Popular Carbon Composition replacement controls used in the majority of radio receivers. Has many exclusive features contributing to small size, quiet operation and long life. 3% Long. 1/4" diameter milled aluminum shaft is easily cut or filed to proper flat for push-on knobs. Controls are supplied with or without switch, however, attachable switch listed below can be attached at any time. Control size: 1 1/2" diameter, 3/8" deep. Switch type is 1/8" deep and has S.P.S.T. switch rated 2 amps at 125 volts. Potentiometer type (3 lugs).

EXACT DUPLICATE REPLACEMENT VOLUME CONTROLS Centralab

Controls Exactly Fit — No Changes are Necessary

See Your Centralab Volume Control Guide or Listing Below for Proper Replacement or Specify Receiver Name, Year and Model and We Will Ship Correct Control.

Radolek has in stock practically every Centralab Exact Duplicate Replacement Control for immediate delivery. Controls shown below are the most popular types and help you select the correct replacement by manufacturers' part number. If the control you need is not shown below, give set name, model number and other available information and we will make immediate shipment. Centralab controls have a uni-

versal reputation for superior performance and quality construction. Controls have improved characteristics over originals. Shafts exactly duplicate original and require no changes for installation. Switch type control will be supplied where original has a switch. When ordering controls from Centralab Volume Control Guide, deduct 40% & 2% from list price to obtain your net price.

Radolek will fill your order promptly and at lowest prices for all your Centralab requirements. Centralab catalogue sent on request.

Taper Curve Chart

Curve 1. Uniform resistance change at either end of control. Used in any circuit where negligible amount of current flows through control as in voltage divider circuits.
Curve 2. Current type control used as series rheostat in cathode, plate or screen grid circuits where current flows through control.
Curve 3. Combination Antenna-Cathode Bias type volume control. Controls bias of 1 or 2 tubes and also antenna input.
Curve 4. Same as curve 3 control but for higher current cathode circuits (controls cathode of 2 or more tubes and antenna input).
Curve 5. Proper control for use in antenna (low resistance types) and grid or tone control circuits (high resistance types) where little or no current flows through control.
Curve 10. Curve of tapped controls used in audio grid circuits having tone compensation.

Knurled Shaft Midget Radiohms

New midget controls with long 1/4" diameter brass knurled shafts. Shafts are slotted for easy cutting to length. Electrical and physical specifications are exactly similar to other midget controls listed on opposite page. Priced less switch. Uses attachable switch listed on opposite page.

Genuine Philco Controls
Radolek can supply any Philco part. Give Philco part number and description and we will ship at lowest dealer price.

KEYSTONE Electrolytic CONDENSERS

WORLD'S GREATEST VALUES!

Compare These Construction Features

Typical of all Keystone Condensers

- 1-Condenser unit wound with highest quality aluminum foil, 99.8% pure.
- 2-Two thicknesses of high-grade cellulose separators. Will stand up under abnormal surge voltages.
- 3-DOUBLE-SEALED. First, with a Moisture-proof "Humidistat" Wrapper, then a coating of heat resistant mineral plastic over condenser unit.
- 4-Terminal leads securely and permanently anchored to condenser unit. Special method of tab construction eliminates corrosion of leads.
- 5-Machine wound insuring uniform capacity characteristics.
- 6-Six inch insulated, push-back leads.
- 7-Sturdy cardboard container. Wax impregnated. Fully moisture-proof.
- 8-Mounting tabs securely support condenser in place. May be cut off.

Guaranteed for 1 Year!

All Keystone Condensers are guaranteed for 1 full year! Should any fail to provide 12 months of satisfactory performance when operated at correct rated voltage, we will replace it, no charge. "KEYSTONES" are the world's finest condenser values!

Midget Dry Electrolytics

Etched Foil Type

450 V. Wkg.—525 V. Peak

Unconditionally guaranteed. Extremely low leakage. High surge voltage. Low power factor. The smallest sized condensers of their capacity. Hermetically sealed in metal tubular containers (single units only) insulated with impregnated fiberboard. Absolutely protected against "Blow-up." Sturdy solid wire leads support condenser in any position and offer quicker and easier mounting. Uniform size lengths permit several of these condensers to be bound in one unit with strap listed below.

ILLINOIS Dry Electrolytic Condensers

Illinois condensers are known for their uniformly high quality. They are produced in a modern factory employing special forming and sealing equipment. Skilled engineering results in close control, with accurate capacities and low power factor. Only pure chemicals and the finest of raw materials are used. Multiple units have separate leads for each section. FRESH STOCK. PACKED IN INDIVIDUAL CARTONS.

A—Rectangular Cardboard Case

Cap. Mfd.	Stock Num.	Peak Volts	Size Inches	Price Each	In Ten Lots Each

*4 separate leads.

High Voltage Paper Condensers

To Replace Electrolytic Units

For replacing defective electrolytics of the values specified below. Cardboard containers are identical in size and appearance to electrolytic units. 6" long heavy insulated leads. All single units have 1 Pos., and 1 Neg., lead. Dual condensers have 2 Pos., and 2 Neg., leads. Non-inductive.

475 DC Wkg. Volts—600 Peak

Stock Number	Cap. Mfd.	Size L. W. D.	Your Price

NOTE: Capacities given are sizes of electrolytics replaced and NOT actual capacity of Paper Condenser quoted.

ELECTROLYTIC AEROVOX CONDENSERS

Tubular Dry Electrolytics

Plain foil type. Will stand up longer than etched foil and should therefore be used in preference where condenser is subject to hard service. Insulated in cardboard tube containers. Completely sealed. Light and compact. 2 1/2" leads. Single section—2 leads. Double section—3 leads.

CORNELL

Replacement

DUBILIER

Condensers

Blue Beaver Midget Electrolytics

Type BR Tubulars

In spite of its extremely small size, full capacity and voltage ratings are built into this unit. Will fit tight spaces where other condensers will not. Gang the individual units and use to replace exact duplicates. Contained in an all-aluminum tube protected by varnished cardboard sleeve. Properly vented to allow escape of gases. 3" Wire leads.

Inverted Stud Mounting Dry Electrolytics

Type EB

In full sized aluminum containers. Preferred for quality repair jobs where there is plenty of space. Dual units are separate sections. All units are insulated from container. 8" Flexible wire leads. *Has single lug connection, container is negative. \$500 DC working volts, 875 volts surge.

Type UP Twist Lock Dry Electrolytics

In Metal Containers

A new type dry electrolytic rapidly replacing the older types in radio set manufacture. Advanced engineering assures operation equal to or better than larger units. Mounting is by means of metal tongues which fit into slots in chassis and twist to lock condenser in place. Complete with necessary mounting plates. Multiple units have common negative grounded to can. Size, 1" diameter.

Stud Mounting

Wet Electrolytics

Type EY

Use Wet Electrolytics for applications subjected to high voltage surges. Self healing feature re-forms condenser instantly if overloaded. Improved vent construction provides proper escape of gas without leakage of electrolyte. Positive lug terminal connection. Can is negative.

Mallory Grid Bias Cell

Small acorn shaped, no current neutral device. Supplies 1 Volt plus or minus 10%. Adaptable to all circuits of grid bias where current does not exceed one microampere. Circuit is identical to "C" battery. Designed principally to bias first audio tubes in high gain amplifiers. Eliminates the necessity of high capacitive cathode-by-pass condensers. Will give indefinite life if not overloaded.

Neon Glow Lamps

Genuine G.E. neon glow lamps that glow with a brilliant orange-red radiance. Both electrodes glow on A.C. One remains dark on D.C. Operate on extremely minute current.

Used in tube checkers for inter-element short tests; in series with A.C. or D.C. for continuity, leakage, and high resistance tests. Used as pilot or signal lamp on all types of electrical circuits. Check ignition leakage in auto-radio noise elimination work. Voltages listed are minimum striking voltage; minimum operating voltage may be approximately 50 volts lower for A.C. or 20 volts lower for D.C.

D10545—1/4 Watt. Candelabra Base Tubular Shape Clear Bulb. 1/4" diameter. Replacement for Weston and other tube testers employing neon short tests. For 105-125 volts, A.C. or D.C.
YOUR PRICE, Each.....36c
TEN FOR.....\$3.25

D10546—1/4 Watt. Double contact bayonet base. 1/4" diam. Tubular shape clear bulb. 1/4" diameter. Used as replacement in Tohe-Condenser Analyzer and other test equipment requiring a neon bulb without a resistance in the base. For 105-125 volts A.C. only.
YOUR PRICE, Each.....41c
TEN FOR.....\$4.05

D10547—1/2 Watt. Standard Edison medium screw base. Clear Globular Bulb. 1 1/4" diameter. Electrodes shaped like half cylinders. Approximately 5/100 candle power. For 105-125 volts A.C. only.
YOUR PRICE, Each.....36c
TEN FOR.....\$3.25

D10548—1/2 Watt. Same as above but with skirted candelabra base.
YOUR PRICE, Each.....41c
TEN FOR.....\$3.65

D10549—1 Watt. Standard Edison medium screw base. Clear Globular Bulb. 1 1/4" diameter. Approximately 5/100 candle power. Central cylindrical electrode surrounded by wire spiral electrode. For 105-125 volts A.C. or D.C.
YOUR PRICE, Each.....36c
TEN FOR \$3.25

D10551—1 Watt. Double contact bayonet base. Otherwise same as above.
YOUR PRICE, Each.....45c
TEN FOR.....\$4.05

D10550—1 Watt Stand-ard Edison medium screw base. Clear Globular Bulb. 1 1/4" diameter. Electrodes shaped like half cylinders. For 200-240 volts A.C. or D.C.
YOUR PRICE, Each.....36c
TEN FOR.....\$3.25

D10552—2 Watt Standard Edison medium screw base. Clear pear shaped Bulb. Diameter 1 1/4". Electrodes in shape of split disc. Approx. 1/2 candle-power. For 105-125 volts A.C. or D.C. Used in tube testers. Also popular size for night-light, advertising, exit indicators, stroboscope, and signal use.
YOUR PRICE, Each.....45c
TEN FOR.....\$4.05

D10553—3 Watt standard Edison medium screw base. Clear pear shaped bulb. Diameter 1 1/4". Electrodes in shape of split disc. For 105-125 volts AC or D.C. Used in tube testers. Also very popular size for night-lights, signal lamps, etc.
YOUR PRICE, Each.....54c
TEN FOR.....\$4.86

Cathode Glow Neon Indicator Lamps

Used on many types of test apparatus. Clear glass cylindrical bulb, about 1/4" diameter, 1" long. Wire leads about 3/4" long. Electrodes consist of two small parallel cylinders sealed in neon gas. Operate on A.C. or D.C. average voltage break-down, 60 volts A.C. or 90 volts D.C. when no resistor is used. On D.C. only the negative electrode glows. Voltage Range *105-125 Volts. †105-250 Volts.

Cleat mounting Edison base porcelain socket. May be mounted on baseboard for experimental work. Screw terminals.

Aerials and Accessories

ICA Tennascope

C9960—
YOUR PRICE **\$1.03**

Eliminates the use of an outside aerial and ground on any airtel or console radio set. Easily connected without changes in circuit wiring. No soldering necessary. For broadcast band use only. Has trimmer adjustment for proper set matching and maximum selectivity. Static shielded. Instructions included.

Inside Aerial and Noise Filter

D8404—
YOUR PRICE **80¢**

Combination indoor aerial and line noise filter. Plugs into power line and has outlet receptacle for radio power cord. Serves to reduce line noises and eliminate outdoor aerials simultaneously. Binding post connections for aerial and ground.

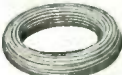

Aerial Eliminator

D9965—
YOUR PRICE **\$1.05**

Eliminates outdoor aerials. Built-in coil and condenser allows reception equivalent to 75 feet of aerial wire. Binding post terminals for set aerial, set ground and external ground connections. Compactly constructed for installation in receiver cabinets. Size 8x2x1 1/2".

Galvanized Guy Wire For Supporting Aerial Masts

K4917—50 foot coil.
Your Price... **15¢**
Ten rolls for \$1.39

A special grade, tough, non-stretching galvanized wire. Annealed.

All-Wave Antenna Systems

Belden No. 8300

Clear-Channel Antenna

The "L" type antenna plus an additional half-doublet, shielded low loss transmission line and newly developed dual iron core transformer couplers produce clear channel reception with maximum efficiency at all frequencies from 400 to 20,000 kilocycles. Up to four radios can be operated from the same antenna.

Includes: 60' and 25' coil 7x22 enameled aerial wire, 50' coil shielded transmission cable, receiver and antenna coupling transformers, 25' coil ground wire, 2-porcelain nail-on knobs, 2-porcelain insulators, 6" stand-off insulator, ground clamp and instruction sheet. Lightning arrester not necessary.

All-Wave Ant. Coupler

A4932—
YOUR PRICE... **38¢**

Fixed, all-wave antenna coupler designed to properly match all-wave radio receivers to antenna transmission lines. Matches all types of receivers. Effectively reduces noise and increases signal strength. Shielded in round aluminum container. Simple to install.

Vertical Pole Antenna

A new type vertical pole antenna, neat in appearance—no overhead wires. Four telescopic sections are adjustable from 6 to 24 feet in height. Easy to erect in small space. No guy wires or footing necessary. 5 ft. pipe driven into ground serves as ground connection and support. Can also be used with Parapet Mast Support shown below. For best results use RCA Magic Wave Receiver and Antenna Coupling Transformers with underground transmission line lead-in as listed at left. Any number of radios can be accommodated by using one distribution transformer and one receiver coupling transformer for each set to be used. Made of steel heavily cadmium plated. Wt. 20 lbs.

I. C. A. Doublet Arrester

Absolutely weatherproof and non-grounding. Can be installed indoors or outdoors. Made of black enameled porcelain. Supplied with mounting screws. Special quality carbon resistance used.
N4793 List, 40¢.
YOUR PRICE **23¢**

Duplex Vis-O-Glow Neon Lightning Arrester

Doublet Type

Arrester electrodes are suspended in a neon gas tube. No resistance element is used. It is more sensitive than any other radio arrester and also will carry the heaviest discharge. Causes no loss of signal strength. Particularly desirable for Short-Wave and All-Wave receivers. You can see it operate.
K4790—List, \$1.40.
YOUR PRICE **78¢**

Antenna Lead-in Window Strips

Duro impregnated web covered conductors. Waterproof insulation. Fits between sash and sill.
K4781—12 inches long.
Fahstock connectors. EACH..... **3¢**

Zenith All-Wave Doublet Antenna

Part Num. S5000

A15940—List Price, \$5.00.

YOUR PRICE **89¢**

Genuine Zenith All-Wave Doublet Antenna

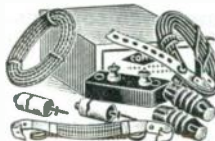

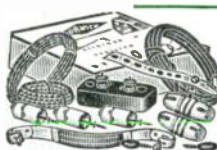

System as supplied for Zenith Radio Sets. Scientifically designed for highest efficiency of operation on both the standard broadcast and short-wave bands. Consists of 2-30 ft. lengths 7-21 tinny covered antenna wire coupled to 50 ft. rubber covered transmission cable through porcelain junction box, 2 porcelain antenna insulators, 2-5" screw eye stand-off insulators and 10 insulated staples.

A4972—Coupling transformer for use with above antennas on older model sets which do not have provisions for connection of doublet antenna. Similar to Zenith Part Num. 95-376.
YOUR PRICE **59¢**

Aerial Kits—Low Priced

STANDARD KIT CONTAINS:

50 ft. No. 7/26 stranded aerial wire; 30 ft. rubber covered lead-in wire; 1 approved lightning arrester; 2 porcelain insulators; 1 ground clamp; 1 window lead-in; 2 porcelain nail knobs.
K4945—YOUR PRICE **37¢**

SPECIAL KIT CONTAINS:

100 ft. No. 7/26 stranded aerial wire; 40 ft. rubber covered lead-in wire; 25 ft. ground wire; 1 standard approved lightning arrester; 2 porcelain insulators; 3 porcelain nail knobs; 2 galvanized screw eyes; 1 window lead-in strip; 1 ground clamp; 1 instruction sheet.
K4946—YOUR PRICE **69¢**

I. C. A. Window Pole Aerial

A beautifully nickel plated telescopic window aerial. Especially suited for use in apartment buildings, homes, offices, etc. Ideal for radio demonstration purposes. May be tilted to any angle. Very efficient on short wave bands. Requires only two screws for installation on any wood window sill. Mast sections are made of rust proof brass, highly nickel plated. Sturdy insulator. Includes window lead-in strip and screws.
D15900—With 3 telescopic sections adjustable to 8 feet.
List Price, \$2.75.
YOUR PRICE, Each..... **\$1.62**
D15901—With 4 telescopic sections adjustable to 12 feet. List Price, \$3.75.

Belden Magnet Wire

Finest quality. Uniform. Carefully inspected insulation. One continuous length only on each spool. Sizes are exact standard B & S gauge. Specifications conform to those given by leading manufacturers for radio apparatus, motor and generator windings, etc. Guaranteed. Quality considered, our prices represent the very best values obtainable.

DeLuxe Coil Winder

KI 1691—**\$4.35**
YOUR PRICE

For winding Honey Comb, Spider Web and Solenoid Coils of different widths and diameters. Will use wire of different gauges. Accurate coils can be made. Equipped with necessary accessories for winding various types of coils. Has a recorder with adjustable pointer for counting number of turns.

Public Address **WIRE** Auto Radio

Belden High Quality Cables

Extraordinary High Quality Cables made by "Belden" one of the largest wire manufacturers, noted for the quality of their products. Only the best quality pure copper wire and the highest grade insulating materials are used. The construction of these cables eliminates all possibility of chafing between the single conductors or shield and insures the longest possible life. This cable is far superior. No finer cable is made.

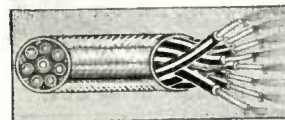

Glazed Braid Overall

Particularly recommended for Connection of Magnetic and Dynamic Speakers on Indoor Installations where a cable will not be subject to wear. Also for use as battery cables.

Each conductor size 20 (10 strands No. 30) tinned copper wires, paper wrapped for flexibility and quick soldering, .02" rubber insulated. Each covering is distinctively colored for easy tracing. Individual conductors are banded together and covered with brown glazed abrasion proof "basket-weave" braid overall. Very Flexible.

Stock Number	Num. Cond.	10 feet for	100 feet for
K16502	3	20c	\$1.56
K16503	4	25c	2.09
K16504	5	29c	2.48

For Single Conductor use fixture cord or hook-up wire. For Two Conductor, use lamp cord or twisted pair transmission line.

Analyzer Cable

6, 7, 8 and 9 Conductor

Has Two Heater Leads of size 16 Stranded Tinned Copper Wire with .031" rubber insulation. Balance of conductors are size 20 with .020" rubber insulation. All conductors are color coded. Paper wrapped for flexibility and quick soldering. Individual conductors are banded together and covered overall with a glazed brown abrasion proof "basket-weave" braid. The flexibility and long life of the cable are greatly increased by the Jute Filler Center.

Low Capacity Shielded Mike and Auto Aerial Lead-in Cable

Rubber Jacket Overall

Absolutely essential for high impedance circuits. Prevents loss of signal in cable when used for microphone to grid inputs, auto aerial lead-in circuits, etc. Single size 26 conductor consists of combination stranding of tinned copper and phosphor bronze wire for extra flexibility and tensile strength. Conductor is covered by low capacity rubber core with celanese braid covered by tinned copper shielding with double celanese wrap and rubber jacket overall. Fully water proof. Capacity per foot, 28 Mmfd. Outside Dia., .215".

D16529	10 feet for	44c
	100 feet for	\$3.67
D16527	Same as above except has 25 Mmfd. capacity per foot. Outside diameter .245".	49c
	100 feet for	\$4.19

Heavy Duty Cable

D16530—Consists of single size 20 tinned stranded copper conductor other wise same as above. Fully waterproof and very rugged. Cap. per foot 44 Mmfd. Outside dia. .260".

	10 feet for	39c
	100 feet for	\$3.30
	For Phono Pick-ups	
D16531	Shielded phonograph pick-up wire with cotton braid overall. Size 20 conductor. Cap. per foot 55 Mmfd. Outside diameter .160".	20c
	100 feet for	\$1.57

Belden PA and Communication System Cables

For Inside or Outside Use

With One Shielded Conductor

Consists of size 19 solid tinned copper conductors each with 1/2" rubber insulation and color coded waxed cotton braid. Conductors are banded together with fillers and covered overall with weatherproofed impregnated cotton braid for indoor or outdoor use. Tinned woven copper shield on one conductor.

D16540	Two Conductor. One shielded, one plain. .315" O.D.	39c
	100 feet for	\$15.00
D16541	Three Conductor. Two plain, one shielded. .380" O.D.	49c
	100 feet for	\$20.45

Amphenol Co-Axial Cable

A concentric transmission line for carrying high frequency power. Especially adaptable for use as microphone cable, shielded high frequency leads in short-wave receivers, transmitter wiring and as antenna lead-ins for both receiver and transmitter. #12 solid copper wire is insulated from woven shield with beads made of Amphenol "912-A" pure polystyrene insulation. Two cotton braided coverings over shield are lacquered to repel moisture and prevent abrasion. Outside diameter, .12". Radius of maximum bend, 1". Impedance, 72 Ohms. Loss per 1,000 ft., 1.75dB. Inductance per ft., .1 microhenry. Capacity per ft., .15 mmf. Resistance per ft., .024 ohms. Conductance per ft., .092x10-16 ohms. (All measurements made 1,000,000 c.p.s.). Net wt. 1 oz. per ft.

A16599—YOUR PRICE, Per foot 30c

The above cable is available with other various smaller sized conductors or with copper tubing shield at no extra cost and also with synthetic resin outer covering at slightly higher cost.

Also available in two-conductor type for balanced transmission lines.

Belden Rubber Covered Co-Axial Cable

Similar to above except has porcelain beads and rubber covering overall. Outside diameter, .483". Impedance 73.9 ohms. Capacity per ft., 17.7 mmfd. at 1500 Kc.

C16598	Per Foot	34c
	100 Ft. Coll. Price	\$29.40

Amphenol Cable Connectors

For Co-Axial Cables

Fits Belden and Amphenol Co-Axial cables. Ultra low loss "912" insulation. Polished nickel finish. Connectors held together with locking ring.

Belden Automotive and Auto Radio Cables and Shielding

Shielded Low Capacity Cable

Without Rubber Jacket

For auto antenna lead-in and other high impedance circuits where a low-loss cable is essential for best performance. Consists of size 20 (10x30 tinned) stranded copper conductor with cotton wrap, heavy solid rubber core insulation with a cotton braid and closely woven tinned copper shielding overall. Outside diameter, .225". Capacity between conductor and shield, 27 mmf.

C16548	10 feet for	34c

ABC Armored Bushed Cable (B.X.)

Tinned copper conductors, rubber insulated and wrapped with cotton braid saturated with moisture resisting, flame retarding, compound. Protected overall by heavy kraft paper wrapping and heavy flexible galvanized steel armor. 20 Anti-short bushings furnished free with each 250 ft. of cable. Underwriter's approved.

Non-Metallic Sheathed Cable

Moisture and Fire Resistant
Approved by Underwriters. Meets code requirements in most cities and can be used instead of BX or Conduit to save time and labor. Especially recommended for farm wiring. Very flexible, will take right angle bends without cracking.

Newest Full Electric Design

A—For 110 Volt AC Operation

D18047—Model 84ACJ. Uses type 78 and 2A4G radio tubes for safe current output control. Fence line is completely isolated from power line. Window shows operation. Complete with tubes and 25 line and 4 corner insulators. For 110 volt, 50-60 cycle AC use. Size $6\frac{1}{2} \times 12\frac{1}{2} \times 9\frac{1}{2}$ " high. Wt. 17 lbs. List, \$17.95. **\$11.95**
YOUR PRICE.....

B—For 6 Volt Battery Operation

D18045—Model 83J. Operates from 8 volt hot shot or 4 dry cells. Less batteries. Size $3\frac{1}{2} \times 8 \times 6\frac{1}{2}$ " high. Wt. 6 lbs. List, \$6.95. **\$4.95**
YOUR PRICE.....

C—With Battery Compartment

D18046—6 Volt Battery Operated Model 83J. Has compartment for hot shot battery or 4 dry cells. Battery compartment size, $3\frac{1}{2} \times 8 \times 10\frac{1}{2}$ ". Overall size, $6\frac{1}{2} \times 12\frac{1}{2} \times 9\frac{1}{2}$ " high. Built-in detachable fence tester. Includes 25 line and 4 corner insulators. Less batteries. Wt. 16 lbs. List, \$11.95. **\$7.85**
YOUR PRICE.....

Each above include lightning arrester, ground clamp, 6 ft. ground wire and instructions.

The New Economical Way of Farm Fencing

Farmers everywhere have been sold on the safety, effectiveness and economy of electric fences. Get your share of profits being derived from national advertising on electric fences. A simple demonstration will clinch the sale to even the most skeptical farmer prospect.

Saves on Material and Labor

Only one wire, or two at the most, is required to effectively hold the stock. As the cattle do not attempt to push this fence, only widely spaced small sized stakes are necessary to support the wire. Saves on time and labor. One man can quickly install the complete fence. Temporary fences, easily erected with very low labor and material costs, thus reducing to a profitable level the cost of fencing in temporary pastures and harvested fields. Profits of many times the cost of the fence are obtained by "hogging down" corn fields, "gleaning" husked corn fields, feeding over fields of pasture oats, barley, wheat, etc.

Low Operating Cost

Intermittent application of current, about once per second, makes current consumption very low. On the battery model a set of dry cells or a "hot-shot" battery will, when properly installed, last an entire season. 3 Position switch provides either high or low voltage output to suit various fence lengths and climatic conditions. Only one moving part used. Power cost on the AC model runs only a few cents per month. Heavy, wrinkle finished, steel case. Suitable for indoor or outdoor installation. No oiling or adjustment is necessary. Operates in any position. Fully guaranteed against all defects. Complies with state regulations. Harmless to man or beast, shock interval is so short the effect is that of a sting. Effective under all weather conditions.

Electrical Wire and Cables

Wire Prices Subject to Market Change.

Waterproof Cable For Underground Wiring Lead and Rubber Covered

Heavy, pure seamless lead covering over rubber covered solid copper wires give permanent water tight protection to underground or underwater wiring. Where there is danger of mechanical injury, cable should be installed in rigid or thin wall conduit. Underwriter's approved. Can be supplied in continuous lengths up to 2500 ft.

Stock Num.	Wires and Size	100 ft.	500 ft.	1000 ft.

Building Wire Small Diameter

U.S. Rubber Laytex Type RU

For rewiring installations where it is impractical to increase conduit size to increase wire capacity. Insulation is superior to regular building wire and fully complies with 1940 National Electric Code. Consists of solid tinned copper wire with .018" Laytex pure rubber insulation, cellophane wrap and fibrous trap with flame-moisture resistant finish. Underwriter's approved.

D4764—E—Large Type Knob	29c	2.75
D4771—F—Leather Nail Head Washer. Prevents breakage when fence post knobs are nailed down.		
YOUR PRICE, Per Box of 1000		39c

Twistite Pin

Fastens fence post knobs to any type metal posts. No holes necessary in post. Made of #14 galvanized wire.

Kwik-Klip Wire Holder

Easy, quick, secure way of fastening fence wire to insulators. Can be used over and over.

4x8" Metal Sign

Yellow background with 1" black letters. Attaches to fence wire or post. Required by law in some states.

Lightning Arrester Kit

D4791—Consists of Twin Tower lightning arrester with mounting screws, ground clamp and wire terminal clamp.
Your Price, Per Set **37c**

D4792—8 Point Ground Clamp as above. Fits any rod or pipe $\frac{1}{2}$ to 1 $\frac{1}{2}$ " dia. Cadmium plated.
YOUR PRICE, Each..... **7c**

D4799—Wire Terminal Clamp. Insures good electrical contact for wire connections.

KWIK GATE

D4789—Improved type. Consist of sturdy spring built into a thoroughly impregnated hardwood handle.

Ten for \$1.95.
YOUR PRICE, Each..... **21c**

Fence Tester

D10306—Handy pocket size tester with built-in neon bulb. Indicates when electric fence is operating correctly. Can also be used for testing power lines, auto ignition, etc., either AC or DC. Phenolic, insulated case. Insulated test leads.
Your Price, Each **59c**

"Hot Shot" Type Battery

D130 YOUR PRICE. **\$120**
Four No. 6 dry cells sealed in one water-proof unit. Fits inside case of battery operated fence control. Size, $2\frac{1}{2} \times 6 \times 10\frac{1}{2}$ ".

POPULAR ELECTRICAL SUPPLIES

Belden "Corditis-Free"

Appliance Cord Set

A nationally advertised appliance cord set. Includes 6 ft. glazed cotton braid covered, size 18, 3000 cycle, heater cord wire. Impact resistant appliance plug. Rubber plug on other end. By Underwriters.

C4409—Complete Cord Set. 36¢
Five for \$1.57. Each.

D4410—Appl. plug only. 19¢
Ten for \$1.30. Each.

For Coffee Makers, etc.

C4411—Miniature cord set. Components underwriters approved. 40¢
Five for \$1.65. Each.

Special Cord Sets

Very serviceable though not as high quality as those listed above. Includes 6 ft. 3000 cycle, glazed cotton covered heater cord, bakelite handle and bakelite appliance plug. Component parts approved by Underwriters. Available with or without switch.

Switchless
C4445—Cord Set. 20¢
Ten for \$1.95. Each.

Self-Tapping Screw Assort.

C11925-Contains 50 self-tapping screws in blunt and gimlet points with square and round heads. In popular sizes.

Lock Washer Assortment

C11972-Contains 120 lock washers. Includes split-lock and shake-proof. 10 of #4 hole, 65-#6, 25-#8 and 20-#10.

Fibre Washer Assortment

C11829-Contains 75 fibre washers. Complete range of sizes. Plain and shoulder types are included.

Solder Lug Assortment

C11973-Contains 90 solder lugs of assorted types listed below including locking type.

Angle Bracket Assortment

C11828-Contains 24 angle brackets built for radio work. Made of brass, nickel plated.

Rubber Grommet Assortment

C11809-Contains 30 rubber grommets of assorted popular sizes.

Spacer and Bushing Assortment

25 Spacers and bushings in 1/4" and 3/8" diameters from 1/4" to 3/4" long.

D11954-Insulated Type.

D11955-Brass Type.

All Steel Metal Parts Cabinet

Convenient and Practical

A15865—YOUR PRICE, Only..... \$3.53

In Lots of 3 or More, Each, \$3.37
A cabinet value that is hard to beat. Provides a very convenient storage place for all small radio parts and tools. Sturdy all steel construction. Finished in dark green crackle enamel with drawers in smooth green enamel. The 6 drawers have compartments properly divided with permanently fastened partitions to accommodate a variety of different size radio parts: 1 drawer has fifteen divisions, each $2 \frac{1}{2} \times 2 \frac{1}{2}$; 1 with 12 divisions, each $2 \frac{1}{2} \times 3 \frac{1}{4}$; 2 with 6 divisions, each $4 \frac{1}{4} \times 4 \frac{1}{4}$; remaining two drawers have 4 divisions, one size $3 \times 8 \frac{1}{4}$ and three of $2 \frac{1}{2} \times 9 \frac{1}{4}$. Card holders on each drawer. Size of cabinet: $10 \frac{1}{2} \times 11 \frac{1}{2} \times 13 \frac{1}{4}$ deep. Two or more can be used to provide a larger unit.

C15867—Same as above cabinet in construction and finish but smaller in size. Measures 9" high, 6" wide, 8" deep. 6 Drawers, each 5×8 . 2 Drawers have ten compartments, 2 have six and 2 have 3. Ship. wt., 6 lbs.

YOUR PRICE, Each..... \$1.76

In Lots of 3 or More, Each, \$1.65

Economy All-Steel Parts Cabinets

D15866—Small Size 4 Drawer Cabinet. An outstanding value at this low price. Four 5×8 drawers; 2 drawers have six compartments and 1 has three. Size $5 \frac{1}{2} \times 10 \frac{1}{2} \times 11 \frac{1}{2}$ high. Smooth green enamel finished. Ship. wt., 4 lbs.

YOUR PRICE, Each..... 88c

In Lots of 3, Each 83c

D15868—Large Size 4 Drawer Cabinet.

Sectional construction permits any number to be grouped and bolted together. Has four $9 \times 11 \frac{1}{2} \times 2 \frac{1}{2}$ drawers divided into 12 equal compartments. Two-tone green finished; wrinkle finished case with smoothly enameled drawers. Size $10 \frac{1}{2}$ wide, $11 \frac{1}{2}$ deep, $10 \frac{1}{2}$ high. Ship. wt. $10 \frac{1}{2}$ lbs.

YOUR PRICE, Each..... \$1.89

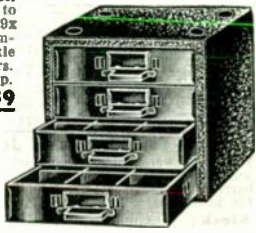

In Lots of 3 or More, Each \$1.79

D15869—2 Drawer Cabinet. Similar to above. Two $9 \times 11 \frac{1}{2}$ drawers, one has 9 various sized compartments. Dark green enamel finished. Size $9 \frac{1}{2} \times 11 \frac{1}{2}$ wide, $11 \frac{1}{2}$ deep, $5 \frac{1}{2}$ high. Ship. wt. 6 lbs.

New Yaxley Rotary Tap Switches

Series 1200L and 1300L

Switches are identically same construction as used and specified by majority of radio manufacturers making all-wave receivers. All contacting members are heavily silver-plated to withstand severe wear throughout life. Lowest contact resistance and capacity permits use of this switch in any circuit. Most perfect and positive indexing system used eliminates possibility of setting switch between contacts.

Adjustable stop feature provides various circuit combinations in each switch. 3/4" Aluminum shaft 2" long is knotted to permit easy cutting at popular lengths. Multiple gang switches have 1/2" spacing between decks. Shorting switch provides a continuous circuit without any break between contact settings. Supplied with bar knob. All switches take 30 degree dial plates listed below.

Yaxley Series 3100J and 3200J

Single Gang Combination Switches

Newly designed compact single gang switches used in majority of compact all-wave receivers. Heavily silver-plated contact points. Low capacity and low contact resistance. Various circuit combinations are provided when only certain sections of the switch are used and with the use of the adjustable stop plate.

New 2" long, 1/4" dia. universal shaft is notched to provide easy cutting at popular lengths. Shaft bushing fits into 3/8" hole. Body thickness 1 1/2". Maximum body depth including terminal lugs is 1 3/4". Diameter 1 1/4". Take 30 degree plates. Have adjustable stop feature and diameter of 1 1/4". Take 20 deg. plates. Bar Knob included.

Kraeuter Pliers

The Choice of Skilled Mechanics

Only the best material and perfect workmanship go into the production of Kraeuter pliers. Pliers are drop forged of extra high grade steel. Blued steel finish knurled handles will withstand a pressure of 140 to 165 lbs. without breaking. Jaws are milled and tested for pulling strength. Cutting edges are triple tested—first, to cut plow steel wire; second, to cut silk covered wire; third, for cutting hard drawn nails. Heads are highly polished. Made in America. *Pliers are especially suitable for delicate work such as meter or watch repairing, having fully polished finish.

1/2" Capacity

New Electric Drill

Takes Up to 1/4" Drills

DI 1699 **\$5.65**
YOUR PRICE
For 110 Volt AC-DC Operation

A sensational new value in electric drills. A fine high quality high speed electric drill at a price that you would expect to pay for a good hand-drill. Indispensable to servicemen and radio dealers for use in auto radio installation and general radio work. Very rugged, yet light and easy to handle. Ample ventilation permits motor to run cool. Handy on-and-off thumb controlled switch. A knurled collar permits easy removing and inserting of drill bits. Entire assembly constructed for durability and hard wear. Finished in aluminum and red. 6' Rubber covered cord.

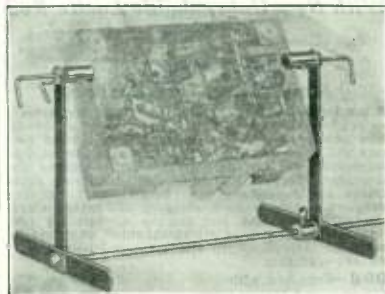

Adjustable Handy Lamp

AI 1692—
YOUR PRICE **89c**

Handy for supplying light when servicing radios. Clamps on side of cabinet. Double ball swivel joint allows adjustment to any angle. Strong spring clamp securely fastens to any object and holds light firmly in place. Rubber covering on clamp. Push through type switch. Shade diameter 5 1/2". Takes any size bulb. Nickel finished. All rubber cord 5 1/2' long. Bakelite plug. Bulb not included.

Acro Chassis Cradle

NI 1654—Adjustable radio chassis holder. Complete with clamps. Holds any chassis up to 21" long. **\$3.25**
YOUR PRICE
CI 1651—Extra Set Clamps, Pair. **\$1.95**

Holds any make or size radio, P. A. Amplifier, or power supply chassis in any desired position. Prevents damage to radio components and tubes mounted on the chassis. No more broken dials, smashed tubes or damaged coils—just place chassis in rack and tilt to working position, upside down if you wish. Special mechanical clamps hold chassis in vise like grip—no danger of chassis slipping or falling. Entire assembly sturdily constructed of cold rolled heavy steel.

Radio Chassis Guards

CI 1649—YOUR PRICE **\$1.23**
Per Pair.....

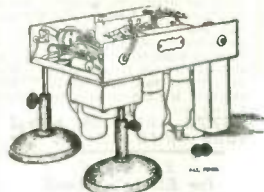

New type low cost, practical chassis guard cradle that conveniently supports radio chassis and protects dials, tubes, coils, etc. against damage when chassis is inverted or carried around. Easily and quickly applied. Adjustable to fit any chassis.

Radio Chassis Jacks

DI 1650—
YOUR PRICE **73c**
Per Pair.....

These New All-Metal Chassis Jacks provide a strong yet flexible means of supporting a radio chassis on your work bench. They are quickly adjustable to any chassis regardless of size or shape. They require little space on the bench when not in use. Two pairs of these jacks in any service shop will more than pay for themselves in time saved.

Bench Stools With Back Rest

CI 6665—26" High, Metal seat. **YOUR PRICE, Each, \$3.15**
With Wood Seat

CI 6666—24" High. **Each \$4.50**
CI 6667—26" High.
CI 6668—28" High.

These stools enable the radio serviceman to "take the load off his feet" while working. Welded construction, stool will never become wobbly as rivet types inevitably do. Properly reinforced to stand rough handling. Back rest, adjustable in height, can be easily removed and re-installed. Heavy spring bar and hinged back rest provide proper tension for correct body posture. 14" Dia. seat. Bottom of legs well formed to prevent marring floor. Finished in durable olive green enamel.

Stools without Back Rest

With Metal Seat **With Wood Seat**
CI 6660—28" High **CI 6662—24" High**
CI 6667—26" High **CI 6663—26" High**
CI 6671—30" High **CI 6664—28" High**
Each \$1.95 **Each \$2.57**

Note: All above stools can be supplied with rubber feet on special order at 40c extra.

SOCKET WRENCHES-SCREW DRIVERS

Probe Flashlight

With New Unbreakable Lucite Rod

Makes Light Turn Corners

A practical, low cost flashlight for radio servicemen, electricians, mechanics and technicians of all kinds. New unbreakable lucite rod takes light around corners and fully illuminates those hitherto inaccessible tough-spots. Saves time and error in making inspections, diagnosing trouble and identifying parts values, serial numbers, etc. Invaluable for reading numbers on tube sockets, checking bad solder joints, bad switch contacts and tracing circuits. Flashlight case is made of "Unbreakable" onyx plastic material. On-off switch allows intermittent or permanent operation.

Speedy Trouble Shooter

K11594—List Price, \$4.00
YOUR PRICE ... **\$2.25**

A fountain pen size analyzer for quick diagnosis of radio and other electrical troubles. Tests open and shorted condensers while in operation. Tests up to 2000 volts and distinguishes between A.C. and D.C. Tests for static, alignment, output, open and shorted transformers, dielectric efficiency, low volume, oscillation, distortion, fading, etc. Number of tests limited only to ingenuity of user. Overall size is only 9"x3/4". Made of best quality fiber tubing. Comes equipped with 20' flexible lead and insulated alligator clip. 1/4 watt Neon bulb, and complete instructions on how to make all tests.

Magic Electric Pencil

Engraves and Embosses

An electrically heated scriber about the size of a fountain pen. Embosses in beautiful colors—copper, gold, silver, green, blue, purple, on any material. Reproductions can be made of drawings, designs, initials, emblems, etc. Very useful for marking test panels, tools, books, advertising materials, tube bases, etc. Enough embossing paper supplied to emboss hundreds of words. Works on 100-120 volt A.C. or D.C. Heats quickly. Maintains even temperature. 8 feet cord.

Neon Tattelite Tester

With Non-Breakable Neon Lamp

A11186—List, \$1.00.

59¢

YOUR PRICE
Convenient testing light for locating electrical voltages, defective fuses, resistors, condensers, etc. Shows whether current is AC or DC (AC causes both electrodes to glow, on DC only negative glows). Glows at only .0005 ampere current. Operates on 90 to 550 volts. 5" Insulated leads fitted with pin tips.

Short Tester

A11179 — Complete

with battery and bulb.

88¢

YOUR PRICE
Handy test prod with built-in battery and bulb. Indicates whether circuits are opened or closed.

Probe Light

C11754—

88¢

YOUR PRICE
An indispensable fountain pen size probe light. Provides plenty of light where and when you want it. Bulb is completely protected. Supplied with 6 foot cord and plug. For 105-120 volt, AC-DC operation.

Snap Type Insulated Test Handle

K11452—Black Color.

K11453—Red Color.

38¢

YOUR PRICE
A new "deep sea" electric test clip that eliminates danger of short circuits. A 6" long insulated fibre tube is fitted with spring contact jaws operated by a push of the thumb. Test wire connected under insulated binding post. Will pick up screws, etc., dropped into inaccessible places.

Alligator Test Clips

New type. Long thin jaws. Strong spring will grasp the smallest terminal lug or lead with a tight, sure, positive contact.

Barrel end will fit Banana Type Spring Contact Plug-in prongs or can be securely soldered to test cable.

K11457—Small size. 2" long, 1/4" wide.

A large Radio manufacturing company formerly experienced much trouble with their electric soldering irons. So they put their highly trained Engineering Department on the job of building a long lasting trouble free solder iron. Here it is! One of the finest ever made! And what a value! Bound to give long satisfactory service. (Absolute Guarantee on Heating Element for a Full Year of Use!)

Heats quickly, holds heat a long time. 3/4" solid copper alloy tip. Fine quality 6 foot heater cord. Unbreakable rubber attaching plug. Polished nickel barrel. Black rubberized handle. First quality in every point! For 105-120 volt current A.C. or D.C.

Radio Experimenters' Supplies

Microphones for Experimenter

Carbon Microphone
C9968—Single button carbon mike in brown enameled metal case 3 1/2" high. Supplied with cord and adapters.
YOUR PRICE \$54c

Desk Models

Make your own broadcast over your own radio to entertain your friends at gatherings, parties, etc. These microphones will provide much amusement and surprise. Mikes are supplied with adapters, attachment cords and instructions for easily attaching to any radio.

Quom Microphone
C9984—High impedance permanent microphone. Can be used on wireless record players, radio sets, etc. Connects directly to tube grid. No field excitation necessary. Freq. range 60 to 8000 cps. Output —50 Db. Case 5 1/2" high. 5 ft. Cord with phone tips, no adapters supplied.
YOUR PRICE \$176

Hand Microphones

C9964—Similar to Type B but not quite as well made. Has wooden handle with switch. Complete with cord.
YOUR PRICE 98c

C9969—Type A. Single button carbon microphone in metal case. Looks like a professional crystal type mike. Has switch in handle and 10 ft. cord.
YOUR PRICE \$118

C9970—Type B. Single button carbon microphone in attractive cast metal case trimmed in bright nickel. With switch in handle and 10 ft. cord.
YOUR PRICE \$162

Type B

Permo-Magnetic Microphone With High Impedance Output

D9967—A high quality microphone using the new type high impedance permanent magnet unit. The high impedance output permits direct connection to tube grid and ground. Highly sensitive. Frequency range of 60 to 8000 cycles assures perfect response. For either hand or desk use with receivers, amplifiers, transmitters, record players, recorders, etc. Contained in attractive professional type crystalline finished case with metal base. 5 ft. Cord with phone tips and full installation instructions included.
YOUR PRICE \$232

Microphone-Speaker

Oxford P.M. Type

A new midsize 3 1/2" PM dynamic speaker housed in brown bakelite case, size 4 1/2 x 1 1/2". Useful for many applications

such as auxiliary extension speaker, intercommunication systems, etc. Requires no field excitation. The microphone model is of dynamic type and is unusually sensitive with good frequency response. Just connect to output transformer of receiver or to grid of tube when used as microphone. Sturdy construction. Voice coil imp. 3 1/2 ohms.

D15658—For use as speaker. Less output transformer. Use output transformer on receiver or transformer listed below.
YOUR PRICE \$206

D16659—For use as microphone. Includes shielded input transformer for matching speaker to tube grid of amplifier or radio.
YOUR PRICE \$265

D6953—Universal Tube Output Matching Transformer for above.
YOUR PRICE \$50c

Grid Cap Adapters

Inserts between grid cap and tube for connecting high impedance crystal or magnetic phono-pick-ups, microphones or matching transformers to tube grid. Does not interfere with circuit. Completed connection is made by using jumper across clips, or switch may be inserted for cutting in and out.

D12329—For Large Grid Caps.
D12274—For Small Grid Caps.
List Price, 50c.
YOUR PRICE, Each \$26c

Carbon Mike Kit Adapters

For matching any carbon microphone to a high impedance input such as a tube grid of an amplifier or radio. Consists of carbon mike-to-grid matching transformers, 4 1/2 volt battery and current limiting control with on-off switch, dial plate and knob.

D13587—Kit for Single Button Carbon Mike.
YOUR PRICE \$149

D13588—Kit for Double Button Carbon Mike.
YOUR PRICE \$175

Mike or Phono Adapters
D12186—5 Prong.
D12187—6 Prong.
D12188—7S Prong.
D12189—8 Prong.
for Octal tubes.
YOUR PRICE \$54c

Split cathode connections. Used as a low impedance phono or microphone adapter by inserting under detector or 1st stage audio tube.

Wafer Adapters

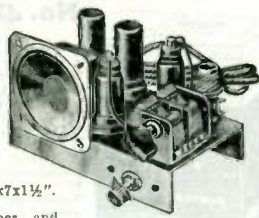

For making connection to any tube prong. Two discs of bakelite riveted together. Holes punched for tube prongs. In each hole is a metal contact connected to a lug. Lugs can be bent to any position or clipped off if not needed.

D12190—4 prong.
D12191—5 prong.
D12192—6 prong.
D12193—7 prong.
PRICE, Each \$12c
10 for \$1.05
D12194—8 prong. For Octal base tubes.
YOUR PRICE, EACH \$19c

4 Tube AC-DC TRF Kit

Complete kit of parts for a quick, easily assembled, extremely compact, sensitive AC-DC TRF set. Uses a pair of high gain 112 wire wound coils covering 1550 to 540 Kc with a 2 gang variable tuning condenser. Built-in wire antenna. Circuit employs four metal tubes, types, 6K7 as RF Amplifier, 6J7 Detector, 25L6 Output Amplifier and 25Z6 Rectifier. 3/4" Electro-dynamic speaker delivers plenty of volume. Volume control has attached on-off switch. Pilot light. Line cord resistor. Includes punched and drilled chassis finished in black wrinkle enamel, size 4 1/2 x 7 1/2".
For 105-120 volt, AC or DC operation.

D16421—Complete kit of parts less tubes, and cabinet.
YOUR PRICE \$475
D1334—Set of 4 tubes when purchased with above.
YOUR PRICE \$1.65

"Wireless" Phono Oscillator Kit

A complete kit of parts for constructing your own phonograph oscillator. Permits any record player having a high impedance magnetic or crystal pickup to be played thru any broadcast receiver without connection between the two. Compactly designed so as to fit into the record player case. Chassis finished in gray crackle lacquer. Adjustable trimmer permits oscillator to operate between 900 to 540 Kc. Uses 70L7GT tube. For use on 105-120 volt, AC or DC use.

D16422—Less tube.
YOUR PRICE \$175
D1335—Sylvania 70L7GT Tube.
YOUR PRICE \$1.13

Plug-in Coil Kits

Space wound on 1 1/2" dia. x 3/4" high bakelite coil forms. 4 Prong coils have primary and secondary. 6 Prong coils have primary, secondary and tickler. For use with .00014 mfd. tuning condenser. Instructions for building an efficient short wave and broadcast receiver are included.

Short Wave Coils
Set of 4 coils to cover 9.5 to 200 meters or 1500 Kc. to 31.5 Mc.
C13491—4 Prong Kit.
YOUR PRICE \$85c
C13492—6 Prong Kit.
YOUR PRICE \$135

Broadcast Coils
Set of 2 coils to cover 100 to 570 meters or 525 Kc. to 3000 Kc.
C13493—4 Prong Kit.
YOUR PRICE \$65c
C13494—6 Prong Kit.
YOUR PRICE \$85c

Bakelite Coil Forms

Bakelite forms measuring in 1 1/2" dia., by 2 1/4" high. Rim on top makes it easy to insert and pull out of socket. Rim is grooved for color coding.

D9800—4 Prong }
D9801—5 Prong } **10c**
D9802—6 Prong } Each

Small Ribbed Type
Low-loss ribbed amber colored bakelite forms with rim for easy changing. Size 1 1/2" dia., 2 1/4" high.
D9803—4 Prong }
D9804—5 Prong } **12c**
D9805—6 Prong } Each

Large Ribbed Type
Low loss ribbed molded bakelite construction. Size 1 1/2" dia., 3 1/4" high.
D9806—4 Prong }
D9807—5 Prong } **17c**
D9808—6 Prong } Each

Code Practice Set

C9961—Single Unit.
YOUR PRICE \$85c
C9962—Double Unit with 50 ft. wire for two-way communication.
YOUR PRICE \$185

Suitable for code practice or sending and receiving between two stations. Consists of high frequency buzzer and blinker light with change-over switch for using either, and telegraph key. Uses 2 standard size flashlight cells each unit. Code instruction card mounted on top of unit. Less batteries.
C58—Flashlight Cells.
Each. **6 1/2c**

Morse Code Linguaphone Records

Learn the Morse Code Quickly and Easily
D15393—List, \$12.50.
YOUR PRICE, Per Set \$750

Learn the International Morse Code quickly and easily by the sight and sound method. Consists of 5 double faced records with album and code book. You learn the code by playing the records and watching the dot and dash equivalent in the code book. No tedious drudgery of practice. Study at home in your leisure time. A scientifically correct way to learn the code as it simulates actual operating conditions. Sending speed can be adjusted to suit personal requirements by varying phonograph speed.

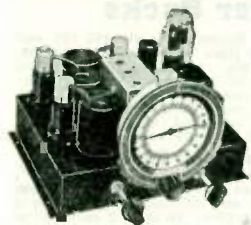

Radio Experimenters's Supplies

Meissner Radio Set Kits

4-5-6

Tube Sets

These new radio set kits are designed to obtain the highest efficiency possible from the number and types of tubes used. The finished job will surpass the performance of most factory built sets of equal number of tubes. Particularly recommended for beginners in radio who wish to gain experience by building their own sets. Tuning range 535-1600 Kc. Complete kits include chassis, tuning condenser, airplane dial and escutcheon, resistors, controls, condensers, sockets, all coils, shields, knobs, hardware, wire, solder, power transformer (AC sets only) and complete pictorial and schematic wiring diagrams. Tubes, speaker, cabinet and panel are not included.

C16450—4 Tube AC-DC TRF Kit For 105-120 volt, AC-DC operation. Chassis size, 7x4 1/2". **YOUR PRICE.....\$955**

C1300—Set of 4 Sylvania Tubes: 6K7, 6J7, 25A6, and 25Z6. **YOUR PRICE.....\$242**

C16451—5 Tube AC TRF Kit. (Illustrated.) Has 3 gang tuning condenser and tone control. For 105-120 volt, 50-60 cycle AC operation. **YOUR PRICE.....\$1382**

C1301—Set of 5 Sylvania Tubes: 2-6K's, 6J7, 6B6 and 5Y4G. **YOUR PRICE.....\$248**

C16452—6 Tube AC TRF Kit. Has 4 tuned circuits, AVC, tone control, iron core coils and calibrated dial. For 105-120 volt, 50-60 cycle operation. Chassis, 12x10". **YOUR PRICE.....\$2117**

C1302—Set of 6 Sylvania Tubes: 3-6K's, 6Q7, 6V6G and 5Y4G. **YOUR PRICE.....\$280**

C16453—Metal Cabinet and Panel for 6 Tube Set. Drilled and cut. Black crackle finish overall. Size, 11x14x10". **YOUR PRICE.....\$372**

Speakers for Above

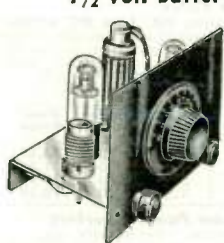

C15747—5" P.M. Dynamic for 4 tube set. With output transformer. **YOUR PRICE.....\$133**

C15748—6" Speaker for 5 tube and 6 tube sets. Supplied with universal output transformer and 1800 ohm field. **YOUR PRICE.....\$147**

C15749—8" Speaker **YOUR PRICE.....\$164**

C15617—8" Speaker **YOUR PRICE.....\$270**

1/2 Volt Battery Set Kits

Latest developments in radio design are incorporated in these new battery sets. Particularly designed for the radio beginner and experimenter. Easy to wire and remarkably efficient in operation. Chassis base is punched and drilled to take up to 3 tubes so that a one tube set can be later converted to a 2 or 3 tube set. Each kit includes all necessary parts such as chassis, panel, sockets, resistors, condensers, wire, hardware, knobs, broadcast band, plug-in coil, etc. Tubes, batteries, headphones and cabinet are not included. Three tube set has sufficient volume to operate a speaker.

C16454—One Tube Set. Uses 1E4G tube and 1-1/2V. "A" and 1-45V. "B" batteries. **YOUR PRICE.....\$294**

C16455—Two Tube Set. Uses 1E4G, 1C5G tubes, 1-1/2V. "A," 1-7 1/2V. "C" and 2-45V. "B" batteries. **YOUR PRICE.....\$353**

C16456—Three Tube Set. Uses 1C5G, 1E4G and 1H5G tubes, 1-1/2V. "A," 1-7 1/2V. "C" and 2-5V. "B" batteries. **YOUR PRICE.....\$441**

Add-On-Kits for Above

No tubes included. Uses same tubes as above. **C16457—Converts 1 tube set to 2 tube.** **YOUR PRICE.....\$44c**

C16458—Converts 2 tube set to 3 tube. **YOUR PRICE.....\$109**

Accessories for Above Sets

C9718—Plug-In Short Wave Coil Set. 3 Coils for 17 to 200 meters. **YOUR PRICE.....\$105**

C9410—Single Headphone with Band. Pr. 59c

C952—1 1/2 V. A Boready Battery. Price.....19c

C965—7 1/2 V. C Boready Battery. Price.....43c

C975—45 V. B Boready Battery. Price.....96c

C1152—Sylvania 1C5G. Price.....68c

C1169—Sylvania 1E4G. Price.....68c

C1226—Sylvania 1H5G. Price.....54c

Carron Crystal Sets

Provides real economical radio enjoyment in localities near broadcasting stations. Housed in attractive solid walnut cabinets. Full instructions included with each set.

Midget Model

A16400—Set with single headphone and roll of ground wire. Size, 4 1/2 x 3 1/2 x 2 1/4". **YOUR PRICE.....\$131**

D16401—Set only. **YOUR PRICE.....88c**

Junior Model

A16402—Set with single headphone with headband and roll of ground wire. Size, 5 3/4 x 4 1/4 x 2 3/4". Illustrated below. **YOUR PRICE.....\$198**

D16403—Set Only. **YOUR PRICE.....\$147**

DeLuxe Model

A16404 — Looks like a real AC radio. Has variable tuning condenser with tapped coil for adjustment of selectivity and sensitivity. Superior sensitive crystal. Supplied with headphones and ground wire. Size, 6 3/4 x 5 1/4 x 3 3/4". Complete with headphone and roll of ground wire. **YOUR PRICE.....\$329**

A16405—Set Only. **YOUR PRICE.....\$235**

Philmore Crystal Sets

"Little Wonder Set"

D9006 **YOUR PRICE.....\$59c**
Compact in size but big in results. Receives broadcasts within 25 miles from station. Open type, super-sensitive crystal detector permits finest adjustments to be made. Slider is provided for station selection. Attractive bakelite case.

The "De Luxe"

C9001— **YOUR PRICE.....\$195**

Looks like a midget receiver. All one has to do is to hook up the aerial and the ground and headphones and tune in. Two pairs of headphones can be used. Housed in beautiful bakelite case. Crystal detector is set to most sensitive spot and permanently sealed. Tuning dial is operated by knob for station selection. Complete less headphones and aerial.

The "Supertone"

C16407— **YOUR PRICE.....69c**

A well constructed crystal set. Gives loud and clear reception. Has glass enclosed fixed crystal detector. Bakelite case. Range about 25 miles.

Crystal Sets

"Top Notch"

C9000— **YOUR PRICE 80c**

A super sensitive crystal set. Crystal is mounted under dust proof glass cover. Brings in stations with full volume and clarity. Housed in black crystalline metal case. Complete but less headphones and aerial.

headphones and aerial **YOUR PRICE.....59c**

"Low-Loss"

C9002—An inexpensive crystal set that will bring in many programs. Has adjustable slider for station selection. Simple to operate. Complete less

Philmore 1 and 2 Tube Radio Sets and Kits

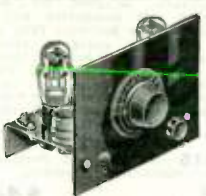

Efficiently designed 1 and 2 tube radio sets and kits. Easy to wire. Large picture diagrams makes errors almost impossible. Uses plug-in coils to tune the broadcast and short-wave bands (13 to 550 meters) covering police calls, amateur bands, etc. Sets are complete including broadcast coil. Batteries, tubes, headphones, short-wave coils and aerial are not included.

1 Tube Battery Set— Uses one type 30 tube, one 1 1/2 volt A battery and one 45 volt B battery. **C16410—Kit.** **YOUR PRICE.....\$118** **C16411—Wired.** **YOUR PRICE.....\$165**

2 Tube Battery Set— Uses two type 30 tubes, one 1 1/2 volt A battery and two 45 volt B batteries. **C16412—Kit.** **YOUR PRICE.....\$149** **C16413—Wired.** **YOUR PRICE.....\$198**

2 Tube AC-DC Set— Uses two type 76 tubes. Operates on 110 volts either AC or DC current. **C16414—Kit.** **YOUR PRICE.....\$225** **C16415—Wired.** **YOUR PRICE.....\$285**

2 Tube AC-DC Kit Uses two type 76 tubes and plug-in coils tuned by a variable condenser giving excellent selectivity and volume for headphone reception. For 110 volt AC or DC operation. **D16408—Kit.** **YOUR PRICE.....\$323**

Set of 4 Short Wave Coils, 13 to 240 Meters. **C9675—For Battery Sets.** **C9676—For AC-DC Sets.** **YOUR PRICE, Per Set.....72c**

"3 in 1" Radio Tuner

D9005— **YOUR PRICE 27c**

For installation in antenna circuit to serve as wave trap for elimination of undesirable signals, aerial eliminator or an antenna tuner to improve selectivity of set. Instructions included.

Mounted Detector Crystal

C10556— Sensitive mounted detector crystal. Fits all standard crystal holders. **YOUR PRICE.....40c**

Meter Tested Crystal

C9012—Genuine Galena. Tested on sensitive laboratory meters to provide highest efficiency. **YOUR PRICE.....10c**

Cat Whiskers

C9013—Spring wire silvered to give best results. Correct tension holds sensitive spot. Set of Three.....**8c**
10 Sets for 70c

Crystal Detector Assembly

C9010—Universal joint swivel arm for quick adjustment. Includes crystal. **YOUR PRICE.....12c**

Enclosed Crystal Detector

C9011—Ideal for crystal reflex circuits. Dust proof glass enclosed assembly. Includes crystal. **YOUR PRICE.....22c**

Fixed Crystal Detector

C9003—Sensitive Galena Crystal with contact permanently set for maximum efficiency. Mounted in molded case. Screw terminals. **YOUR PRICE.....43c**

BATTERY CHARGERS--POWER SUPPLIES

Gas Engine Driven AC-DC Generator

300 Watt Model

C16899—Delivers 110 Volts, 60 Cycle AC at 300 Watts or 6 Volts DC at 200 Watts. $\frac{1}{4}$ HP Engine. 1 Gallon fuel tank in base for 12 to 16 hours operation. Size, 17"x16"x12" high. Wt., 103 lbs.
YOUR PRICE.....\$5788

450 Watt Model

C16888—Delivers 110 Volts, 60 Cycle AC at 450 Watts and 6 Volts DC at 200 Watts. Equipped with 1 HP engine. 3 qt. fuel tank at top for 5 to 6 hours operation. Size, 17"x15"x12" high. Wt., 90 lbs.
YOUR PRICE.....\$8873

C16887—Radio Noise Filter necessary when above generators are used with radio sets.
YOUR PRICE.....\$441

Equipped with AC voltmeter, push-button starting on control panel and rope-pull auxiliary starter. Hand starting not necessary when used with 6 volt battery. The 6 volt DC output can be used to keep starting battery fully charged. Governor assures constant frequency and uniform voltage output. Sturdily constructed.

A dependable, economical source of electric power for operating sound systems, radios, lights, etc. Especially adaptable for mobile use. Both AC and DC outputs can be used at one time, providing full capacity of either is not used. DC Output terminals on panel, AC available thru BX cable connection at side. 4 Cycle, single cylinder, air-cooled gasoline driven engine.

Homcharger Battery Chargers

Especially designed for keeping any 6 volt automotive and home radio storage batteries fully charged. Tapered charging rate decreases as battery becomes charged—no chance of overloading battery. Attractively designed—sturdily constructed. All types are non-radio interfering. For 105-120 volt, 50-60 cycle AC operation.

5-3 Ampere Booster

A16915—Includes auto steering post mounting connector and cables.

YOUR PRICE.....\$441

10 Ampere Charger

A16916—Heavy duty type charger. Supplies 10 amperes for fast charge. Complete with built-in ammeter, 10 ft. cable and auto dash mounting receptacle and plug.

YOUR PRICE.....\$1147

6 Ampere Charger

A16917—Vibrator type 6 volt storage battery charger. Self-polarizing; entirely automatic in operation. With cord, plug, clamp and cables.

YOUR PRICE.....\$735

Globe—Union 6 Volt Radio Storage Batteries

Highest Quality materials and workmanship. Extra heavy thick plate construction. Designed especially for radio and P.A. service. Holds charge longer than other batteries of similar capacities. Equipped with handle. F.O.B. Shipping Point Near You. 18 Month guarantee.

100 Ampere Hours. **A18050—YOUR PRICE \$639**
150 Ampere Hours. **A18051—YOUR PRICE \$976**
180 Ampere Hours. **A18052—YOUR PRICE \$1249**

Hydrometer

Provides accurate readings for all wet cell batteries. Large size, suitable for garage use. Octagon nozzle prevents instrument from rolling. Beaded float does not adhere to side of tube when testing. Length approx. 13".

N11281—YOUR PRICE.....28¢

N11282—Beaded hydrometer floats. Fit $\frac{1}{8}$ " tubes. Length 4 1/4". **YOUR PRICE.....10¢**

10 Ampere Bulb Type Battery Charger

Charges 1 or 2 Batteries

D16918—Complete.
YOUR PRICE \$1666

For 105-120 Volt, 50-60 Cycle AC Operation

A complete charger that can be taken right to the car and connected to the battery. Particularly made for the used car dealer, small or medium sized oil stations, radio stores, etc. Charges batteries at the more efficient 10 ampere rate in about 6 hours. Can be used for charging either 1 or 2 batteries at once at the 10 ampere rate. Uses a bulb type rectifier providing greatest economy, life and performance. Fully guaranteed against transformer burnouts and defective workmanship or materials. Insulation in this charger is fire-proof, moisture-proof and vermin-proof. Easily replaced, plug fuse. Sturdy steel case with carrying handle, size 5 1/2"x6 1/2"x8 1/2" high.

Battery Terminal Connectors

D11456—PRICE, Each \$1.69
TEN FOR \$1.69

Fasten to post of any auto storage battery to adapt it for use with radio set. Has binding screw for connecting lead wire.

GTC Porta-Power Packs

For operating battery sets on 105-125 volt 50-60 cycle AC lines when testing, servicing, demonstrating, etc. Also used for converting battery sets for AC line operation. GTC Porta-Power Packs supply all voltages necessary. Ruggedly built and dependable in operation. Complete with line cord, and on-off switch. There's a model for every battery set.

For 2 Volt Battery Sets

D16912—Model L. Supplies "A", "B" and "C" Power for 4 to 8 tube battery sets designed for 2, 2.5 or 3 volt operation. Delivers 2 volts DC at 880 Ma. for tube filaments, "B" voltages of 67 1/2, 90, 112 1/2 and 135 volts and 1, 2 or 3 "C" voltages from 1 1/2 to 2 1/2 volts as desired. "B" section can be adapted to supply 45 volts also if needed. Power consumption less than 30 watts. Has screw type terminal connections. Size: 6x3 1/4"x7".
YOUR PRICE.....\$585

For 6 and 12 Volt Sets

D16911—Model P. Converts 6 and 12 Volt Battery Sets to all-electric operation. Providing two separate 6 volt DC 1 1/4 amp. power sources. Size: 3 1/2"x6 1/2"x5 1/2". Wt. 8 lbs.
YOUR PRICE.....\$820

For 1.5 Volt Battery Sets

D16913—Model U. Provides "A" 1.5 V. up to 250 M.A. "B" 90 to 101 V. for 1 1/2 V. 4 and 5 Tube battery sets. Plug-in sockets accommodate practically any type battery plug. Size 2x3 1/4"x6". Light weight—fits in cabinet in place of "A" and "B" batteries. Operates in any position.
YOUR PRICE.....\$441

D16914—Model G. Same as Model U above except for larger 5 and 6 tube sets including consoles. Size: 3 1/2"x6 1/2"x5 1/2".
YOUR PRICE.....\$558

Stancor "A-B" Battery Power Packs

For 6 Volt DC Operation

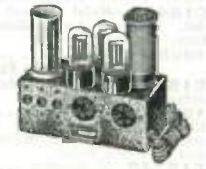

D16919—Pt. 138. Permits 4, 5 or 6 tube sets using 1 1/2 Volt "A" and "B" batteries to operate from a 6 volt "hot shot" storage battery or other DC source. Provides 1.4 volts at 300 Ma. and 90 volts at 18 Ma. Well filtered. Has plug-in connections for battery plugs and battery clips. Relay control in pack allows "on-off" operation from battery switch on radio. Black wrinkle finished metal case. Size 5x5x2 1/2". Ship. wt. 3 1/2 lbs.

YOUR PRICE.....\$735

D16920—Pt. 135. As above but supplies 2 volts DC at 480 Ma. and 67, 90, 112 or 135 volts at 20 Ma. Size 5 1/2"x3 1/2"x2 1/2".
YOUR PRICE.....\$820

For 110 Volt AC-DC Operation

D16921—Pt. 137. Permits 4, 5 or 6 tube sets using 1 1/2 Volt "A" and "B" batteries to operate on 110 volt AC or DC lines. Supplies 1.4 volts DC at 300 Ma. and 90 volts at 18 Ma. Plug-in connections. Black wrinkle finished metal case. Size 5 1/2"x1 1/2". Ship. wt. 2 lbs.
YOUR PRICE.....\$526

DC to 110 Volt AC Inverters

With Radio Interference Filter

Operates AC radios, sound systems, small appliances, etc. from DC voltage sources. Uses ten contact dual arm vibrator with 1/4" contact points assuring long life and reliable service. Includes voltage regulator, fuse protection and on-off switch. All deliver 110 volts, 60 cycle AC. Size 7 1/2"x8 1/2"x4 1/2". C16863 Size, 7 1/2"x9 1/2"x6 1/2". Less interference filter. *For shavers, etc.

Mallory Vibrapacks

6 V. D.C. Input Six volt DC, vibrator operated, power supply providing a dependable source of DC plate voltage for portable radio receivers, transmitters, P.A. amplifiers, etc. Equipped with built-in noise suppressors but do not include high voltage "B" supply filter.

C16837 — VP551. Delivers 125, 150, 175 or 200 DC Volts at 100 Ma. Uses synchronous vibrator.
YOUR PRICE.....\$882
C16838 — VP552. Delivers 225, 250, 275 or 300 DC Volts at 100 Ma. Uses synchronous vibrator.
YOUR PRICE.....\$1088
C16839 — VP554. Delivers 225, 250, 275 or 300 DC Volts at 100 Ma. Uses tube rectifier. Required only for applications where B— cannot be at ground potential.
YOUR PRICE.....\$1176

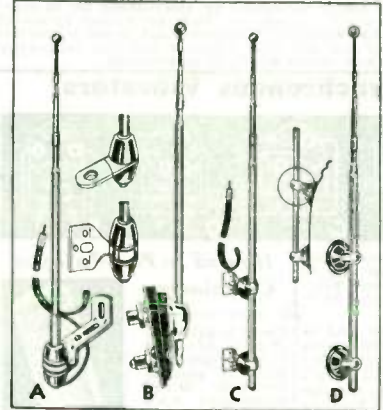

NEWEST Auto Radio Aerials

Ward Auto Aerials

A Type for Every Installation

Guaranteed Rust and Rattleproof

Finest quality auto aerials. Designed for quick, easy installation on any automobile—from an old-time "jalopy" to the latest streamliner. Improved anti-rattle telescopic construction, adjustable to any height. Lower sections are made of seamless bronze tubing. Top telescopic rod is of electric bronze with anti-rattle ball tip. Split proof caps protect ends of tubes. Heavily chrome plated—guaranteed not to rust. 36" low-loss shielded loom cable included. Lead-in has universal set connector to fit radios with either standard bayonet sockets or Motorola type sockets.

Type A—Tri-Mount Aerial. All necessary installation brackets are included to accommodate three types of installations—Side Underhood, Alligator and Hinge.

Stock Num.	Model Num.	Num. Secs.	Adjust. to Hgt.	List Price	Your Price
D15932	T2-48	2	48"	\$1.95	\$1.15
D15933	T3-68	3	68"	2.90	1.70

Type B—Single Mount Flex-Angle Cowl. Single stanchion double bolt mounting. By means of an adjusting nut at base the antenna can be swung through a range of 16° so that it will stand vertically on any cowl design.

D15935	F3-68	3	68"	\$3.35	\$1.97
--------	-------	---	-----	--------	--------

Type C—Double stanchion Under-Hood Cowl.

D15964	U3-93	3	94"	\$3.65	\$2.15
--------	-------	---	-----	--------	--------

Type D—Side Cowl. Double stanchion type with low-loss glazed ceramic insulators. Necessary conversion parts for Torpedo and Chrysler bodies are included.

D15916	5XXL	3	66"	\$2.95	\$1.72

Above listing contains only popular types. We can supply plates for most cars.

Star Control Head Mechanism

One Star control mechanism with other supplementary units listed below and a panel kit listed at left fits all cars and all radios. Adjustable to fit all types of installations. No drilling or filing necessary. Supplied with interchangeable gears to provide ratios of 6, 8, 10, 12 and 16 to 1, either clockwise or counter-clockwise. A pair of end fittings, housing adapters, pilot light socket with bulb and lead, and mounting hardware are also furnished. No plate kit included. Less switch and tone control.

C14010—Code 3801. List, \$3.50.
YOUR PRICE..... **\$206**

Tone Controls

Tone and volume control combination with wing knob. Displaces volume control unit on above control head mechanism.

Less Switch
C14011 Code T-1, 3 Tap Type Control.
C14012 Code T-2, Continuously variable, 100,000 ohm control.
List, \$1.00.
YOUR PRICE..... **\$118**

PRICE, Each.....

With Switch

With on-off switch, fuse retainer, pilot light socket, bulb and leads.
C14013—Code ST-1, 3 Tap Type.
C14014—Code ST-2, Continuously variable, 100,000 ohms.
YOUR PRICE, Each..... **\$176**

Molded Knobs

Tapered design $\frac{3}{4}$ " long, $\frac{3}{4}$ " dia. For $\frac{1}{8}$ " and $\frac{1}{4}$ " shafts.

Auto Aerials and Accessories

RUNNING BOARD AERIAL

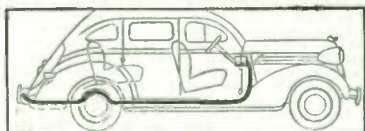

Completely Sealed In Rubber

Quick, Easy Installation

D15904—
YOUR
PRICE **85c**
EACH.....
In Lots of Ten
In Single
Lots, Each ... **93c**

Mounts under running board, using bolts or holes which are already in the running board supports. No drilling necessary. Brackets are adjustable along entire length of aerial. Aerial consists of continuous 15 ft. length of steel rod fully sealed in rubber covering which provides protection against all weather conditions. Moisture, ice or mud does not affect aerial nor interfere with radio reception. Will not rattle. Size: 48" long. Includes 36" lead-in wire.

Use the BUMPER for the AERIAL

Does Not Weaken Bumper

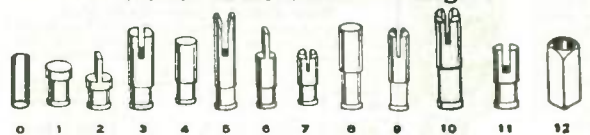

A15948—Complete set of fittings including—four rubber insulated brackets, 5 foot insulated shield cable for front, 10 foot regular cable for rear and 5 mounting clips. Full instructions for easy installation included. List Price, \$4.50.

\$2.65

Easy to Install

A practical satisfactory answer to the antenna question. By insulating the rear bumper it will provide maximum pick-up with elimination of projecting poles, rods, etc. Reduces fading. Less static. Shielded lead-in and distance of bumper from ignition system insures least electrical interference. Fits all cars and all bumpers. Easily and quickly installed.

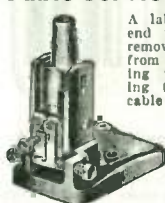

Auto Radio Cable Fittings

A type for every cable now in use. Match old fitting with illustration and order by stock number. Highest quality. Made of brass. Exact duplicates of fittings used on the majority of auto radio cables.

UTAH PERMO-MAG PERMANENT MAGNET DYNAMIC SPEAKERS

No Field Excitation Required

Use these speakers for your Public Address installations. Especially suited for use where extremely long lines must be run as only two connecting wires are needed. The saving effected in wire very often pays the entire cost of the speaker. True high fidelity reproduction, high volume carrying capacity and amazing high efficiency make these speakers fully equivalent in every way to the corresponding type of electro dynamic speakers.

Improved tone quality is definitely assured due to the exceptionally high magnetic flux made possible by Utah's latest magnet design and special alloy construction. Speakers are far superior in tone quality and ruggedness of construction over previous types of P.M. speakers, insuring permanency and freedom from trouble. Voice coils are specially impregnated and baked to take abnormal sound peaks. *Especially designed for trumpet type baffle.

REPLACEMENT SPEAKERS TO FIT ANY RADIO

Utah 12 In. Speakers

Excellent sound reproduction and high output combined with ruggedness of construction make these speakers especially suitable for DeLuxe Console Receivers. Will handle peak loads of 15 watts. Recommended field input on field excited models, 9 watts; no field excitation required on P.M. types. Voice coil, 8 ohms. Universal Output Transformers match any tube, Single or P.P. Line Transformer tapped for 500-1,000-1,500-2,000 ohm lines.

RADIO'S FAVORITE VOICE

A complete line of field excited Electro Dynamic replacement speakers. Each unit is rigidly welded to form a one piece rugged assembly. No screws or fastenings to get out of adjustment. Universal speaker mounting bracket packed with 4", 5", 6 1/2" models. Field coil pots on these models are also drilled and tapped for chassis mounting. These features allow replacement of speaker on practically any set. All models are dustproof.

Quam Permanent Magnet Dynamic Speakers are designed especially for replacement purposes where high quality dynamic speakers which do not use field excitation are required. Excellent for automobile and battery set replacement. Particularly adaptable to Public Address Systems as extension speakers. Fully dust and weather proof. Rigid, welded construction insures long, trouble-free life.

4 and 5 Inch Electro-Dynamic Speakers

For AC and AC-DC midjet sets. Conservatively rated at 3.5 watts output. Voice coil impedance 4 ohms at 400 cycles. 4" Model: Extra shallow for Pee Wee sets. Depth, 1 1/4". Mounting dia. 4 1/8". 5" Model: Mounting dia. 5"; Depth, 2 1/4".

RADIO and PUBLIC ADDRESS SPEAKERS

Radolek Electro-Dynamic Speakers Use External Field Excitation

For replacement in radio sets which supply speaker field current or where a low priced efficient unit is required. Models are listed for replacement in practically any radio set. Heavy pressed steel frame holds assembly absolutely rigid, assuring perfect alignment of voice coil even under severe operating conditions. All speakers fully dustproofed. Speakers with field coil resistance other than those listed can be supplied on special order at slightly higher prices.

Radolek P.M. Dynamic Speakers Require No Field Excitation

Made of finest materials by one of the largest speaker manufacturers in the country. Equal to other speakers selling for much more than the low prices below. Latest type highly saturated permanent magnets are used, which retain their strength indefinitely. For practical applications these speakers are superior to field excited dynamics. Heavy pressed steel frame holds assembly absolutely rigid assuring perfect alignment of voice coil even under severe operating conditions. All speakers fully dustproofed.

12" and 15" Public Address Dynamic Speakers

For All Public Address and Radio Replacement Uses

Fine quality, highly efficient dynamic speakers. Designed particularly for Public Address Installations and Radio Set replacement use where high power handling capacity must be combined with high sensitivity and faithful reproduction. Made of best quality materials. Rigid pressed steel frame finished in smooth black enamel. One piece moulded weatherproof cones. Entire unit fully dustproof. Supplied less output transformer. Electro-Dynamic Speakers are supplied with base stand as shown at left, above. P.M. Dynamics are supplied less stand as illustrated.

P.A. BAFFLES - PROJECTORS - HORNS

A

B

C

D

E

These fine quality public address speaker baffles give an even directional distribution of sound and have sufficient flare to effectively reduce feed-back. All units are ruggedly constructed for both indoor and outdoor use. Very well adapted for mobile installations. All steel baffles are finished in durable weather-proof baked-on gray enamel.

Fine Quality All-Metal Speaker Baffles and Trumpets

A—Re-Entrant Baffle

D15150—All-Steel Trumpet for 8" speakers. Light in weight. 22 1/2" Dia. bell. 17 1/2" long. Height from base 27". Welded on mounting support bracket, fits standard 1/2" pipe fittings. With Crowfoot swivel mounting support.

YOUR PRICE, Less Speaker **\$1814**

D15151—As above but complete with heavy duty 8" P.M. speaker.

YOUR PRICE **\$2295**

B—Midget Baffle

D15182—Suitable for call systems. Takes any 8" or smaller cone speaker. Sturdy all-steel vibration-less two piece construction. Welded on bracket socket takes 1/2" pipe fittings. Bell 10" dia., 3" deep. Overall depth, 9 1/2". Grey wrinkle finish. With pipe bracket but less pipe fittings. **\$441**

YOUR PRICE, Less speaker.. **\$441**

C—Steel Aluminum Baffles

D15176—Steel Aluminum Baffle. Designed for all 12" cone speakers. Rugged construction. Popular with mobile installations. Has breather holes to relieve speaker back pressure. Bell is of spun aluminum, back of heavy gauge steel. Easily demountable into two sections. Loops provided for hanging. Can also be mounted to wall or ceiling by use of standard pipe fittings or used with bracket listed below. Bell 18" dia., 10" deep. Length overall 20". Less speaker. **\$425**

YOUR PRICE **\$425**
In 6 Lots or More, Each **\$3.95**

D—All Steel Baffles

For 12" Speakers. Two piece wedge-fitted rattle-proof all steel construction. Has screened breather openings to relieve speaker back pressure. Welded on mounting bracket fits 1/2" pipe fittings. Less speaker and adjustable bracket. Bell 17" dia. Overall depth 20". **D15180**—With 1/2" pipe fittings as described. **\$720**

YOUR PRICE **\$720**

D15184—Adjustable Crowfoot Mounting support for above. **\$1.47**

YOUR PRICE **\$1.47**
D15183—Less pipe fittings but with eye rings for suspension. **\$6.98**

YOUR PRICE **\$6.98**

E—P.A. Trumpet

With 8" P.M. Speaker Unit

D15165—Trumpet and Speaker. A scientifically designed speaker-baffle combination suitable for outdoor installations where sound must be distributed over a great distance with minimum feed back. Includes a powerful 8" permanent magnet driver speaker that will handle up to 15 Watts power output without distortion. Speaker voice coil impedance 8 ohms. Baffle is constructed of heavy spun-steel. Bell diameter 24". Length overall 38". Ship. wt. 17 lbs. Welded on bracket fits 1/2" standard pipe fittings. Less adjustable mounting support. **\$2495**

YOUR PRICE **\$2495**

D15167—Horn, Less Speaker. **\$20.46**

D15166—Adjustable crowfoot mounting support bracket for above. **\$1.98**

YOUR PRICE **\$1.98**

Weather-Proof Horn Covers

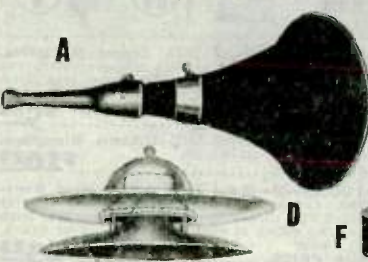

For above metal horns. Provides complete protection against rain, snow, dust, wind, etc. for speaker cone when not in use. Slips over bell openings. Made of water-resisting cloth with elastic band.

D12443—For 12 to 18" bells.

YOUR PRICE **95¢**

D12439—For 18 to 20" bells.

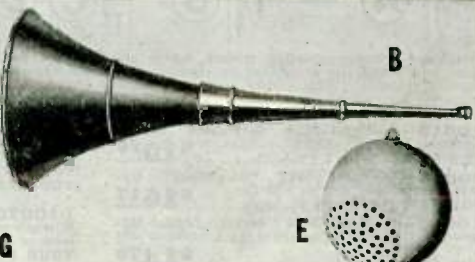

YOUR PRICE **\$1.35**

A

C

B

Racon High Quality Public Address Sound Equipment

A & B Racon Trumpets

Best for adequate distortionless coverage of large areas as auditoriums, fields, etc. Demountable for easy transportation. For use with Type F Horn Units.

Type A. For indoor use. Made of patented acoustic material which does not vibrate. Cast aluminum throat. Has suspension hook eyes.

Stock Num.	Total Lgth.	Bell Dia.	Throat Lgth.	Wt. Lbs.	List Price	Your Price

G—Racon Swivel Bracket

For supporting all types of cone projectors as illustrated at top of page. Tooth ratchet swivel. Base has holes for mounting.

D15195—Without base. **\$176**
YOUR PRICE **\$176**

D15196—With base. **\$265**
YOUR PRICE **\$265**

D—Racon Radial Cone Baffle

Distributes sound over a 360° area with even intensity. Brings out high frequencies lacking in directional type horns. Upper deflector and speaker housing made of heavy gauge steel. Lower deflector of special acoustic material to prevent resonant effects. Storm proofed for all weather conditions.

D15140—For 10" or 12" cone speakers. Reflector or dia. 31". Total height, 14". Wt. 10 lbs. List Price, \$27.50.

YOUR PRICE, Less Speaker **\$1617**

D15141—For 5" or 6" cone speakers. Reflector dia. 17". Total height, 7". Wt. 3 1/2 lbs. List Price, \$9.50.

YOUR PRICE, Less Speaker **\$558**

E—Racon Ball Type Baffle

Projects sound over a 45° beam area. Blends with all types of architecture. Excellent for reproduction of both voice and music. Made of steel finished in silver enamel.

D15142—For 6" cone speaker. 9 1/2" Dia. Wt. 3 1/2 lbs. List Price, \$7.50.

YOUR PRICE, Less Speaker **\$441**

D15143—For 8" cone speaker. 12" Dia. Wt. 6 lbs. List Price, \$9.00.

YOUR PRICE, Less Speaker **\$529**

D15144—For 10" cone speaker. 14" Dia. Wt. 9 lbs. List Price, \$12.00.

YOUR PRICE, Less Speaker **\$705**

F—Racon P.M. Type Units

High grade compression units for use with straight and re-entrant type trumpets. Made from finest grade Alnico steel magnets and Armo Iron throughout. All units are carefully measured and tested for highest flux density and power handling capacity.

Baffle Supports

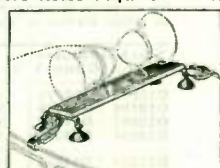

Floor Stand for Speaker Baffle

K15178—Stand only, no speaker or baffle included. **YOUR PRICE** **\$595**

For use with speaker baffle listed at top of page. Recommended for large Public Address Systems that are not permanent or where it is impractical to mount speakers on wall or ceiling. Collapsible stand provides stable base and ease of portability. Height of stand can be adjusted from 48 inches to 96 inches. Equipped with tilting bracket so that baffle can be placed at any angle.

Car-Top Horn Carrier

No holes required — Will not mar finish

For temporary or permanent installations of horns or trumpets on car tops. No drilling necessary. Consists of maple platform, with sturdy supporting brackets secured to four large vacuum cups. Cups securely hold to any metal car top to which a film of glycerine has been applied. (Also fits Ford 1933-36, Plymouth '34-'36, Chevrolet '33-'34 or other fabric tops not wider than 41 1/2"). Doubly secured by straps anchored to drip rail over doors by rubber protected hooks.

D15199—Ship wt., 9 lbs. **\$408**

YOUR PRICE **\$408**

ASTATIC MICROPHONES

D10003-A—Model WR-20 Double Dual-Diaphragm Crystal Microphone with tilting head. Response free from peaks and dips to 10,000 c.p.s. High impedance output at -56 db. Cannot be acoustically overloaded. 25 Ft. cable and connector. Chrome finish. **\$1735**
YOUR PRICE

D10000-B—Model T-3 Crystal Microphone. Response 30 to 10,000 c.p.s. Perfect for entertainers and orchestras. Output level-52 db. Satin chrome finish. Genuine Bimorph crystal. Semi-directional, but has tilt head for aiming direct at sound. Chrome finished. Has plug-in connector with 25 ft. cable. **\$1470**
YOUR PRICE

D10001-C—Model GT-3 Crystal Microphone with desk stand. Same as above. Grip-to-talk switch built in stand tubing. Gripping stand with palm of hand puts mike in operation. With 8 ft. cable. **\$1764**
YOUR PRICE

Above Microphones for 1/8"—27 thread stands.

D10004-D—Model D-104 Crystal Microphone. Especially designed for speech. Rising frequency above 500 c.p.s. stresses important speech frequencies. High impedance output at -48 Db. Response 500 to 4000 c.p.s. With connector and 8 ft. cable. Fits 1/8"—27 stands. Chrome finish. **\$1323**
YOUR PRICE

D10040-D—Model D104HS Crystal Hand Microphone. Same as Model D-104 listed above, but has convenient handle. Thumb off-on switch built in handle. Perfect for mobile work. Will not overload or block from close talking. Chrome finish. **\$1499**
YOUR PRICE

D10005-E—Model UT-48 Crystal Microphone. Designed for clean crisp speech with rising characteristics above 500 c.p.s. to a maximum of 3500 c.p.s. High impedance output at -48 db. Tilting head. Chrome finish. 7 Ft. cable with connector. **\$970**
YOUR PRICE

D10012-F—Model DN-HZ Dynamic Microphone with tilting head. High impedance output at -55 db. Response 50 to 7000 c.p.s. Two tone gray and chrome finish. Plug-in microphone connector with 25 ft. cable. **\$1323**
YOUR PRICE

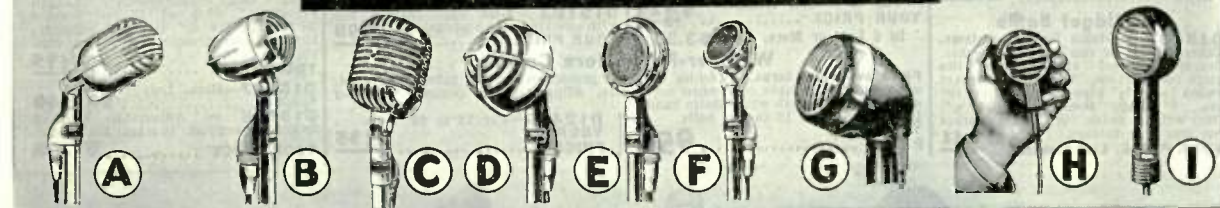

D10014-G—Model R-3 Crystal Microphone. High impedance output at -52 db. Response 30 to 5000 c.p.s. Brown finish with metal grille. 7 Ft. attached cable. **\$585**
YOUR PRICE

D10041-H—Model JT-30-TT Crystal Microphone. Wide range, semi-directional. Response 30 to 6000 c.p.s. High impedance output at -52 db. Finished in opalescent-gray and chrome. 7 ft. attached cable. **\$970**
YOUR PRICE

D10042-H—Model JT-31-TT. Same as model JT-30-TT above except furnished with cable connector and 25' cable. **\$1117**
YOUR PRICE

Above microphones for 1/8"—27 thread stands.

SHURE MICROPHONES

Microphones feature appealing modern design and excellent performance. Dynamic microphones are very rugged and practically unaffected by climatic conditions. Ideal for severe indoor or outdoor use. Smooth frequency response. Wide pickup angle at front and dead at rear, solves feedback problems. Tilting head (except E) for variable directional pickup. Detachable cable connector. Rich satin chrome finish. All types have high impedance output and fit 1/8"—27 thread stands.

D10016-A—Model 708A "Stratoliner" Crystal Microphone. Output -50Db. **\$1029**

KEYSTONE QUALITY MICROPHONES

A Microphone for Every Public Address Requirement

Low in Cost—High in Performance

The microphones listed below have been selected on the basis of quality and utility and will fulfill the requirements of your public address jobs. All are made by well known standard microphone manufacturers and are same quality as microphones ordinarily sold at considerably higher prices. All microphones fit standard $\frac{1}{8}$ "-27 thread microphone stands and are equipped with detachable cable connectors. All units except D10045 Dynamic have a high impedance output for direct connection to tube grid of amplifier. Type D10045 is recommended where long microphone cables are necessary or microphone must operate under noisy line conditions.

A—Dynamic Mike

Extremely rugged construction. Smooth high level semi-directional response. Tilting head. Range of 50 to 9000 c.p.s. Purposely not flat to allow better intelligibility under poor acoustical conditions. Output —54 db. No blast under close talking conditions. Not affected by wind when used outdoors. Case attractively finished in pearl grey. Complete with 25 ft. cable and connector.

D10038—High Impedance Output Dynamic
YOUR PRICE **\$9.95**

D10045—Low Impedance (50 Ohms) Output Dynamic
YOUR PRICE **\$9.50**

B—Anti-Feedback Mike

A new directional crystal microphone. For use wherever feedback has been a problem. Can be operated close to speakers. In low ceiling rooms, in front of noisy crowds. Ideal for rental sound systems which must work under various adverse acoustics. High level —58 db. allows use of cables up to 50 ft. Flat response from 30 to 10,000 c.p.s. with no peaks. Moisture-proof crystal with barometric compensator. 90° tilting head permits aiming at sound to be picked up. Finished in polished chrome.

D10046—Complete with 25 ft. cable and connector
YOUR PRICE **\$10.95**

C—Crystal Mike

Broadcast quality and streamline appearance at new low cost. Here is a mike that will give you excellent all-purpose performance with truly high grade professional appearance of higher priced models. High impedance output. Range 30 to 8000 c.p.s. with no peaks to cause feed-back. Crystal cushion mounted. Output —52 DB. Semi-directional pick-up. Will not blast. Not affected by wind when used outdoors. Streamlined case beautifully chrome finished.

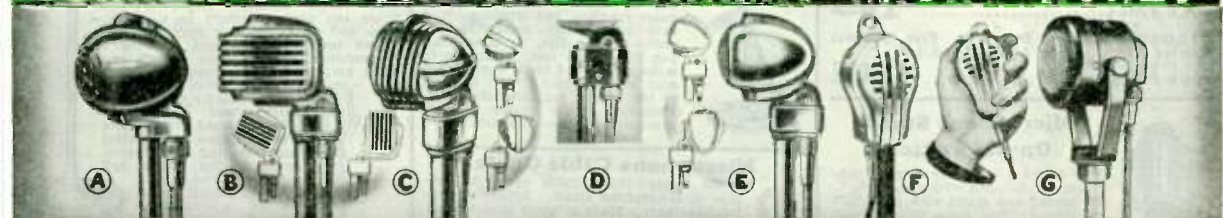

D10036—Complete with 25 ft. cable and connector
YOUR PRICE **\$6.25**

D—Velocity Mike

Particularly desirable for use where high-fidelity hum free pickup for public address, recording or radio broadcast is required. Has narrow pickup arc of approximately 90°. Built-in on-off switch. Response essentially flat with slight accentuation of lows. High impedance output. May be used with most any amplifier having 4 stages or more. Cast metal case in grey wrinkle finish. Shock-proof swivel mounting. Fits $\frac{1}{8}$ "-27 stands.

D10039—Complete with 25 ft. cable and connector
YOUR PRICE **\$10.25**

TURNER CRYSTAL AND DYNAMIC MICROPHONES

D10068—A—Model CX Crystal Microphone. Fine quality, low priced and dependable. Suitable for all P.A. recording and ham use. Remarkably free from feedback and will not blast from close talking. High impedance output at —52 db. Frequency range 30 to 1000 c.p.s. Rich brushed chrome finish. Fits $\frac{1}{8}$ "-27 thread stands. 7 Ft. cable with detachable connector included.
YOUR PRICE **\$8.82**

D10069—A—Model CD Dynamic. Same as above except has a more rugged high impedance output dynamic unit.
YOUR PRICE **\$9.70**

D10095—B—Model 44X Crystal Microphone. 90° Tilting head provides directional and non-directional pick-up. Frequency range 30 to 10,000 c.p.s. High impedance output at —58 db. Rich satin chrome finish. Fits $\frac{1}{8}$ "-27 thread. 25 Ft. cable with detachable connector included.
YOUR PRICE **\$16.17**

D10096—B—Model 44X with switch D.
YOUR PRICE **\$17.35**

D10070—C—Model 33X Crystal Microphone. 90° Tilting head provides semi or non-directional pick-up. High impedance output at —52 db. Frequency range 30 to 10,000 c.p.s. Satin chrome finish. Fits $\frac{1}{8}$ "-27 thread stands. 25 Ft. cable with connector included.
YOUR PRICE **\$13.23**

D10071—C—33X with switch D.
YOUR PRICE **\$14.41**

D10077—C—Model 33D Dynamic. As above but has range 40 to 8,500 c.p.s.
YOUR PRICE **\$14.70**

D10078—C—33D with switch D.
YOUR PRICE **\$15.88**

D10091—E—Model 22X Crystal Microphone. Has all features of above Model 33X but with frequency range of 30 to 7000 c.p.s.
YOUR PRICE **\$10.58**

D10097—E—22X with switch D.
YOUR PRICE **\$11.76**

D10092—E—Model 22D Dynamic. As above but has range 40 to 8,000 c.p.s.
YOUR PRICE **\$12.64**

YOUR PRICE **\$13.82**

D10062—F—Han-D Crystal Microphone. Fills the job of two mikes. Has built-in suspension hook for hanging, can be held snugly in your hand or mounted on a $\frac{1}{8}$ "-27 thread banquet or floor stand. High impedance output at —48 db. Frequency range 60 to 7,000 c.p.s. Built-in on off slide switch. Rich brushed chrome finish. 7 Ft. cable and detachable connector included.
YOUR PRICE **\$13.23**

D10063—F—Han-D Dynamic Microphone. Same as above except with a rugged high impedance output dynamic unit.
YOUR PRICE **\$14.70**

D10075—G—Model 88 Dynamic Microphone. Tilting head provides semi or non-directional pick-up. Has crisp natural reproduction. Wind and blast proofed. No "boomy" response. Weighted frequency response, 40 to 9,000 c.p.s. High impedance output at —54 db. Chrome finished. Fits $\frac{1}{8}$ "-27 thread stands. 25 Ft. cable with detachable connector included.
YOUR PRICE **\$14.70**

Literature will be sent on above Turner microphones on request. We can make quick shipment on other models not listed.

CARBON MICROPHONES

B—Radolek Ring Model

D10037—Fine quality double button carbon microphone, carefully selected after exhaustive tests. 50 frills, just real microphone quality priced very low. 24 kt. gold button contacts. Response 50-1500 p.p.s. 200 Ohms per button, total 400 ohms. Faithfully reproduces voice and music. Not to be confused with toy microphones selling at same price, this is a well assembled instrument for long trouble-free service. 2 1/2" Dia., 1/2" thick. Gun metal finish.
YOUR PRICE **\$2.94**

C—Radolek Stand Type

D10034—A streamlined stand type carbon mike that looks and performs like the more expensive crystal models. Sensitivity can be adjusted over a wide range for close talking or for minimum feedback, to full orchestral pickup. The high output makes it especially suitable for use with the audio amplifier of a radio receiver or low gain P.A. amplifier. Shockproof, mounted in a handsome moulded, gunmetal finished metal case. Fits stands with standard $\frac{1}{8}$ "-27 threads.
YOUR PRICE **\$4.41**

A—Electro-Voice Model 202

D10028—Single button carbon hand microphone. Has built in suspension hook for hanging or can be held conveniently in the palm of your hand. Speech is crisp, clean and blast proof. Push-to-talk switch is right at your thumb. Has 6 ft. rubber covered shielded cable. Ideal for amateur use and P.A.
YOUR PRICE **\$7.35**

D—Universal Model W

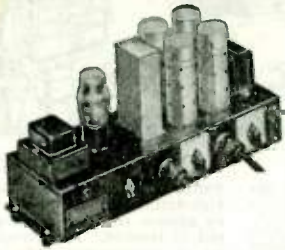

D10032—Watch Model. A compact single button carbon microphone. Only 1 1/4" in dia., 1/4" thick. Highly sensitive. Has pure gold spot center diaphragm. Ideal for detective work.
YOUR PRICE **\$1.76**

E—Universal Model XX

D10030—Double Button Carbon Microphone for ring mounting. One of the finest carbon mikes made. Truly faithful and natural tone. Frequency range 40 to 6000 c.p.s. Pure gold contacts. Duralumin stretched diaphragm. Ruggedly built for long service. 2 1/2" Dia., 1" thick. 200 Ohms per button.
YOUR PRICE **\$5.88**

MICROPHONE ACCESSORIES and STANDS

Dual Channel Microphone Pre-Amplifiers

These Radolek Pre-Amplifiers, when coupled to your amplifier will supply the additional gain (65 D.B.) that is needed to utilize the advantages of Crystal, Velocity or Dynamic mikes. Compact in size. Single unit construction. High impedance microphones can be connected without use of coupling transformers. Plug-in outputs and inputs. Output has 500 and 200 ohm taps for line connections and high impedance tap for direct connection. All tube noises, AC hum, motorboating and oscillation troubles have been eliminated. Size: 7 1/4 x 5 1/8 x 1 7/8. Two input channels. 5 Tubes. Two microphones or one microphone and phono can be used at the same time and mixed or faded in any proportion. Operates on 105-120 Volt, 50-60 Cycle AC.

C15065—Factory Wired. Laboratory Tested. Instructions included. As described. Less Tubes. List Price, \$44.00.
YOUR PRICE.....\$19.95

C15066—As above but With Five Sylvania Matched Tubes. 2-75's, 2-6D6's, and 1-80. List Price, \$49.30.

Cable Rack

Fits Any Mike Stand

C15265—Rack only—no stand. List, \$1.25.

YOUR PRICE.....74c

Ten for \$6.75
A new, convenient method of storing microphone cable that eliminates tangling and tripping. Will save you enough money in increased cable life, to more than pay for its low cost. Snaps on to mike stand, and holds secure even with a heavy load. Will hold up to 100 feet of regular mike cable. Phosphor bronze spring clamps. Smooth black enamel finish.

Microphone Cable Guide

Cable Guide—Holds Cable neatly to outside of Microphone stand. Attach to tubing near base. Made of black gum rubber. Can be stretched to pass over obstacles.

D12266—For 1/4" or 3/8" diameter tubing stands. List, 35c.

YOUR PRICE.....21c

Third Hand Holds the Mike

C9971—

YOUR PRICE.....\$145

If you announce sports events, drive a sound equipped automobile, operate a transmitter or need both hands free while talking over a microphone, the Third Hand holds the mike close to your mouth, yet keeps it out of your line of vision. Slips over your head, fits comfortably. Weighs only 12 oz. less mike. Flexible goose neck allows adjustment of microphone to any position. Fits any standard microphone having 3/8"-27 thread female mounting.

Microphone Handle

D11087—5" Light weight handle. 3/8"-27 Thread fitting. Gun-metal gray.

YOUR PRICE.....30c

Suspension Yoke

D11088—Two hole suspension yoke for any mike with 3/8"-27 thread fitting. Gray wrinkle finish.

YOUR PRICE.....30c

Desk Stand

R10073—List, \$2.24.

YOUR PRICE.....\$1.32

A modernistic desk stand finished in black crackle. Octagon shaped ring is 3/4" inches in diameter. Will mount practically any carbon microphone. Heavily weighted 5" dia. base prevents stand from tipping. Overall height 9". 3 microphone springs included.

Suspension Ring

D10072—Similar to above except with loop for suspending mike from ceiling. With 8 mike springs. No base included.

YOUR PRICE.....88c

Radolek Special Microphone Stands Best Quality—Best Values

Our Finest Floor Model

K15260—List Price, \$17.50.
YOUR PRICE.....\$8.70

The finest in workmanship and quality of materials. Attractive modernistic design. Particularly suited for High Class Broadcast and Public Address installations. Fourteen pound Cast Base 12" diameter finished in Baked Black enamel. Rigid seamless brass two piece standard is adjustable from 40" to 72". Lower section 1 1/4" Dia. New friction clutch allows instant raising and lowering of microphone. Clutch keeps smooth constant pressure which prevents collapsing of stand even with the heaviest velocity microphone. Standard finished in triple plate highly polished chrome. Comes with swivel joint coupling for microphones having either 1/4" pipe thread or 3/8" 27 thread fitting. No Ring or Microphone Included.

De Luxe Floor Stand

K15261—List, \$10.00.
YOUR PRICE.....\$4.55

A neat and attractive floor stand built for convenience and hard usage. Nine pound 10 1/4" diameter cast base makes stand very rigid. Seamless brass spinning covers casting. Rigid seamless brass two piece standard is adjustable from 40" to 68". New friction clutch allows instant raising and lowering of microphone. Clutch keeps smooth constant pressure which prevents collapsing of stand even with the heaviest velocity microphone. Entire stand finished in highly polished triple plate chrome. Comes with Swivel Joint coupling for microphones having either 1/4" pipe thread or 3/8" 27 thread fitting. No ring or microphone included.

Standard Floor Stand

K15262—List, \$8.50.
YOUR PRICE.....\$3.55

Identical construction to above stand except base is only 8" Dia. and weighs only 6 lbs. Stand includes swivel joint with coupling for microphones having either 1/4" pipe thread or 3/8" 27 thread fitting. Triple chrome plated. No Ring or Microphone Included.

Portable Floor Stand

R15266—List, \$13.50.
YOUR PRICE.....\$4.95

Attractive floor stand similar in mechanical construction to above stands. Particularly designed for use with portable P.A. systems. Easily and quickly detachable into four pieces. (2" base and three 17" sections). Each section is inside threaded to form a smooth surfaced, rigid stem. No bulky and unsightly external couplings are used. Various number of sections can be used to make mike stand adjustable from 20" to 34", 37" to 51" or 54" to 83". Fits microphones with 3/8" 27 thread. Base finished in black wrinkle enamel. Stem and clutch are polished chrome. Weight 8 lbs.

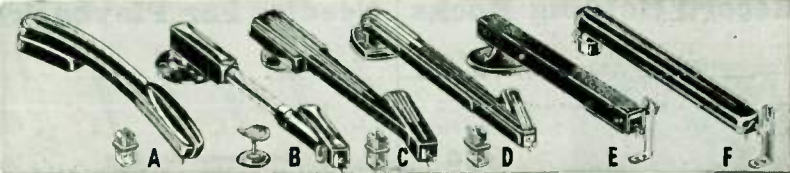

Banquet Stand

R15267—List, \$2.50.
YOUR PRICE.....88c

A very attractive banquet stand. Suited for all public address and amateur purposes. Height without microphone 19". Heavy cast metal base has 3 feet which allows cord to come out at bottom. Base is black crackle finish, stem of highly polished chrome. Thread fits microphones or rings having 3/8" 27 thread. No ring or microphone included. Weight 3 lbs.

Crystal and Magnetic Phono Pickups

Astatic Crystal Phonograph Pickups

9466—TYPE A—Model FP18. Modern low pressure pickup with permanently attached sapphire stylus. Eliminates needle changing. Stylus protected against damage. Low stylus pressure of 0.5 oz. and reduced torque of wire coupling vibrating system greatly prolongs record life. Freq. range 10 to 7000 c.p.s. High impedance output at 0.85 volts. Plays up to 2" records. True tracking arm in statuary brown finish. **\$970**

Metal Needle Cup

May be bolted onto motorboard or mounted in 1 1/4" hole. Spring hinged cover. Overall size 1 1/2" dia. x 1 1/2" high. Holds approximately 100 needles.

D9303—YOUR PRICE **8c**

Phono Pickup Scratch Filter

D9340—YOUR PRICE **79c**

For use with crystal pickups. Tuned to point of greatest scratch intensity. Sealed against atmospheric changes.

Needles For Playback

For Manual Play Only

D9394—Type A—Genuine RCA Victor Full Tone Needles. For commercial records. 10 Pkgs. for 75c. Per Pkg. of 100. **10c**

D14100—Type B—Genuine RCA Victor Red Seal Needles for playing Red Seal records. 10 Pkgs. for \$1.85. Per Pkg. of 50. **20c**

D14101—Type C—Trailing shoe-needle for playing acetate recordings with heavy acoustic or electric pickups weighing 2 1/2 oz. or more. Plays approx. 25 records perfectly.

YOUR PRICE, Per Pkg. of 100. **63c**

D9304—Type D—Acetone Green Shank Transcription Type. Tested under magnification of 200 times to assure perfection. Plays 5 pressed records without change.

YOUR PRICE, Per Pkg. of 100. **38c**

D9307—Type D—Acetone Red Shank Type. Perfectly formed and tested as above Type D. Excellent for playing acetate discs.

YOUR PRICE, Per Pkg. of 100. **38c**

D14102—Type E—Hi-Fidelity Transcription Needles for professional and home use. Shadow-tested. Fine enough to play the best acetate and commercial records in any studio. Famous for uniformity and hi-fidelity.

YOUR PRICE, Per Pkg. of 75. **49c**

D9399—Type F—Bamboo Needles for playback of aluminum and commercial recordings.

YOUR PRICE, Per Pkg. of 100. **54c**

Sapphire for Manual Play

Walco Sapphire Playback Needle. Tip is shaped to fit record groove. Will play approximately 2,000 commercial records and 5,000 acetate recording discs without injury.

D14103—Type H—Bent Shank type for pickups having 2 1/2 oz. or more needle pressure.

D14104—Type C—Straight Shank type for new light weight crystal pickups.

YOUR PRICE, Either Type, Each. **88c**

For Record Changer and Manual Play

D9301—Type I—Very quiet in operation with true, natural reproduction of voice and music. Plays 10 to 15 records without change.

YOUR PRICE, Pkg. of 30 Needles. **23c**

D14105—Type J—Eldene Classic. High grade inexpensive needle tipped with a precious metal that minimizes wear and reduces surface noise. Gives 2,000 perfect playings.

YOUR PRICE, Each. **29c**

D14106—Type K. Permo-Elliptical Point Needle with tip coated with osmium-iridium composition. Plays over 2,000 pressed records with excellent tone. Recommended for coin machines.

D14107—Type L. Permo-Fidelitone Needle as Type K but with round tip having wider frequency response.

YOUR PRICE, Either Type, Each. **50c**

Lots of 5, Each. **45c**

D14108—Type M. Presto-Transcriptone Needle same as Type K but has excellent high fidelity response. Recommended for playback of acetate coated discs.

YOUR PRICE, Each. **\$1.00**

Phonograph Adapters

Adapts any radio set for phonograph operation.

changes in circuit wiring. For use with high impedance magnetic or crystal pickups. Includes 18" shielded leads and phono-radio switch that can be mounted anywhere. Instructions included.

D14115—A. With octal adapter. For radios using a 6116 2nd detector tube.

D14116—B. With 5 prong adapter. For radios using a 27, 37, 56, 76 etc. (tubes without grid cap) as detector or first audio.

D14117—C. With grid cap adapter. Fits both large and small grid caps. For sets having detector or first audio tubes with grid caps.

D14118—D. With octal adapter. For sets having 6C5, 6J5, etc. metal tubes without grid caps as first audio amplifier.

YOUR PRICE, Each. **71c**

Record Album Cabinet

Holds Nine 10" or 12" Albums

D17600—Walnut Finished.

D17601—Mahogany Finished.

YOUR PRICE

\$8.75

A fine, sturdily constructed cabinet that provides a quickly accessible storage space for your records. Designed

to hold up to nine 10" or 12" record albums of the type listed above or others not measuring over 2x14x13" high. Sectional dividers hold albums upright. Overall size 26" wide, 26" high and 16" deep. Fashioned of choice grained veneers and hardwood richly finished. Albums not included.

DeLuxe Album Cabinet

Holds Ten 10" or 12" Albums

D17602—Walnut Finished.

D17603—Mahogany Finished.

YOUR PRICE

Either Type

\$9.95

A beautifully constructed record album cabinet. Quality built throughout of choice grained veneers and

hardwood. Richly finished. Attractive carved legs and trim. Sectional dividers hold the albums upright. Cabinet holds up to ten 10" or 12" albums of the type listed above or others not measuring over 2x14x13" high. Albums not included.

AUTOMATIC PHONOGRAPH RECORD CHANGERS

A—RCA DeLuxe Changer

Compact—Efficient—Dependable

Plays Seven 12" or Eight 10" records automatically. Exceptionally efficient—practically fool-proof in operation. Rejects any undesired record at will. Includes new top loading crystal pickup with automatic needle ejector and receptacle. Pickup is 1½ volt output, wide range type, matches input of any public address amplifier or can be used in conjunction with practically any radio set. Compact, easily slipped into limited space. Ideal for replacing manually operated phonographs. Requires mounting space of only 14½" wide x 11½" long x 4½" under mtg. plate x 4½" above mtg. plate. Operates on 110-120 volts, 60 cycle AC.

A15386—RCA DeLuxe Automatic Record Changer. List Price, \$34.95.
YOUR PRICE **\$20.55**

B—General Industries Changer

Plays Twelve 10" or Ten 12" records

Requires no more space for installation than most manually operated units. Plays twelve 10" or ten 12" records at 78 R.P.M. Fully enclosed direct drive motor. One lever to set for record size or manual operation. Any record may be rejected at will. Mechanism is positive—quiet in operation and will not jam or damage records in any way. Sturdy base-plate assures complete rigidity. Size: Base plate 14x14". Mechanism extends 5½" above and 3½" below.

D15364—G.I.—C120 Automatic Record Changer. Complete with true-tangent crystal pickup, and on-off switch. List Price, \$58.00.
YOUR PRICE **\$34.80**

C—Webster Standard Changer

Compact—Quiet—Jam Proof

Compact construction permits installation in same space usually required by manual units. Automatically plays ten 12" or twelve 10" records at 78 R.P.M. Push buttons for 10" to 12" changeover, record rejection and manual playing. Positive trip action insures changer operation as soon as needle reaches eccentric groove at end of record. Entire unit rubber mounted for noise-free operation. Grey wrinkle finish. Size: plate 14x14". Projects 5½" top and bottom. For 110 V. 60 cye. AC.
D15389—Webster W5570 record changer with crystal pickup. List, \$34.50.
YOUR PRICE **\$20.29**

Webster DeLuxe Changer

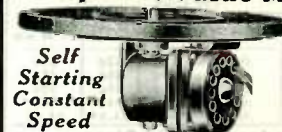

Plays up to 17 mixed 10" and 12" records.

D15373—Model 5590
List Price, \$55.00
YOUR PRICE **\$32.34**

Finer construction, appearance and operation than Model W5570 above. Automatically plays up to 17 mixed ten and twelve inch records—at 78 R.P.M. Pickup balanced to 2 oz. needle pressure, minimizing record wear. Mechanism stops automatically after last record has been played. Heavy die-cast mounting plate. Hammered bronze enamel finish. Size, Mounting plate 13½x17½". Mechanism 5½" above and 4½" below plate. Ship wt. 30 lbs.

Special Value Motor

Self Starting Constant Speed

D15399
List, \$8.50.
YOUR PRICE, Each **\$3.95**

A dependable well built unit. Maintains uniform speed regardless of ordinary record drag or line fluctuation. Large well oiled bearings and special helical cut laminated bakelite gears assure smooth silent operation and long life. For 105-120 volt, 60 cycle AC operation. Complete with 9" turntable, and mounting screws.

D15396—A dependable unit at a sensationally low price. Smooth running friction rim drive eliminates gears. Motor is shock mounted to prevent vibration.

YOUR PRICE **\$2.45**

GENERAL INDUSTRIES PHONOGRAPH MOTORS

Self-Starting—Constant Speed

Low Cost—Light Weight—Compact. Have ample power to play 10" and 12" records. Fan cooled motors, designed to comply with Underwriters Lab. requirements. Can be installed in small cases without over-heating. Quiet in operation. For 110 Volt 60 cycle AC operation.

Rim Driven Types

Self-starting 78 R.P.M. friction rim drive. Motor is rubber insulated from both mounting plate and turntable to insure quiet operation. Oil-less bronze bearings.

D15367—A—Model LX with 9" turntable and 2 pole motor. Depth from mounting plate to bottom, 2". List Price, \$4.65.
YOUR PRICE **\$2.79**

D15368—A—Model RX with 10" turntable and 4 pole motor. More powerful and smoother running than Model LX. Depth from mounting plate to bottom, 2½". List Price, \$6.35.
YOUR PRICE **\$3.81**

Gear Driven Types

D15370—B—Model CX. 78 R.P.M. Extra dependable performance at exceptionally low cost. 12" turntable. Very quiet in operation. Powerful synchronous motor rubber insulated from turntable, minimizing motor rumble. Positive direct drive through silent, helical cut gears sealed in oil. Mounting hardware furnished. Depth from mounting plate to bottom, 3¼". List, \$9.55.
YOUR PRICE **\$5.73**

Governor Controlled Motors

D15369—C—Model A. 78 R.P.M. Centrifugal governor speed control provides a positive means of accurate maintenance of uniform speed even with fluctuating line voltages. Silent operating induction motor, rubber suspended from mounting plate, directly drives 12" turntable through helical gears. Motor dimension 6¼x3½"—suspends 3" below baseboard. Mounting hole centers 3¼x5¼". Mounting hardware included. For 105-120 V. 60 cye. AC operation. List Price, \$13.70
YOUR PRICE **\$8.22**

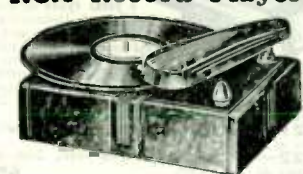

D15365—C—Model D. Dual Speed 33½-78 R.P.M. 12" turntable. Overall dimension of motor 8¼x5¼". Suspends 3½" below baseboard. Mounting hole centers 3¼x5¼". Otherwise same specifications as Model A above.
List Price, \$18.10.
YOUR PRICE **\$10.86**

D15366—C—Dual Speed model with special weighted 12" turntable which is very essential to best reproduction of 33½ RPM records. Automatic stop switch included. Otherwise same specifications as Model D above.
List Price, \$20.60.
YOUR PRICE **\$12.36**

D15372—C—Model G. AC-DC-78 R.P.M. Same specifications as Model A above except operates on 110 V. AC-DC line power.
List Price, \$20.45.
YOUR PRICE **\$12.27**

RCA RECORD PLAYERS - PHONOGRAPH RECORDS - RECORD RACK

RCA Record Player

A Compact, High Quality Portable Electric Phonograph suitable for use in conjunction with Radio Sets or Public Address Amplifiers. Will play up to 12 inch records at 78 R.P.M. Operates on 110-120 Volt, 60 Cycle AC current. Consists of RCA Midget True Tracking Crystal pickup, RCA Synchronous Midget Phono Motor and Volume Control all mounted in an attractive Walnut Bakelite case, size 11½"x9½"x3". High impedance output. Has connector for connecting to RCA radio. List, \$9.95.
D15377—RCA Model R-93-F.
YOUR PRICE **\$5.28**

C4959—RCA 9824 connecting switch and cable for connecting above player to any radio receiver. Switch changes from radio to record.

Techniques of Recording

By Goldsmith and Geisel

D12560—YOUR PRICE **\$125**

A practical hand-book containing 43 pages of concise data on recording, its associated equipment and their individual applications. The 16 chapters each deal with specific facts and functions of recording. Clearly written and fully illustrated. As a recording operator you should have this helpful book in your library. You will refer to it again and again for expert solution of problems that are sure to arise. The authors, both fully versed in the design and operation of recording apparatus, have presented their facts in a very practical and fully usable manner.

HOME & PROFESSIONAL RECORDING EQUIPMENT

Make Commercial Quality Recordings Right in Your Own Home or Studio

Presto Model "K" Portable Recorder

Records up to 12" Discs at 78 or 33-1/3 RPM—Illustrated at right

Designed to fill the need of those who require a dependable, high quality recording system. Will record voice and music with fidelity fully equal to the finest commercial recordings. Suitable for radio entertainers, musicians and schools in speech, dramatic and foreign language classes and rehearsals. Operating features: 12" turntable driven at rim by self-starting, constant speed motor. Allows reproduction without slightest waver or "wow." Cutting head and playback pickup are magnetic type with wide frequency response of 80 to 5000 c.p.s. Cuts 100 lines to the inch from outside to inside. Built-in 4 stage amplifier has 3 watts output, uses 6 tubes, 1-6F5, 1-6SF5, 1-6N7, 2-45's, 1-80. 10" Speaker is mounted in the detachable cover of carrying case. Case is grey airplane cloth covered and measures 19 1/2"x15 1/4"x14". Recorder comes complete ready to operate with tubes, high quality crystal microphone mounted on adjustable floor stand and operating instructions. Recording discs and needles not included. For 110 volt 60 cycle AC operation. Complete descriptive literature on above equipment or other recorders will be sent on request.

D17630—Model K6—As above with single speed 78 RPM motor.
YOUR PRICE \$208.00

D17631—Model K7 Recorder with dual speed 78 and 33 1/3 RPM.
YOUR PRICE \$223.00

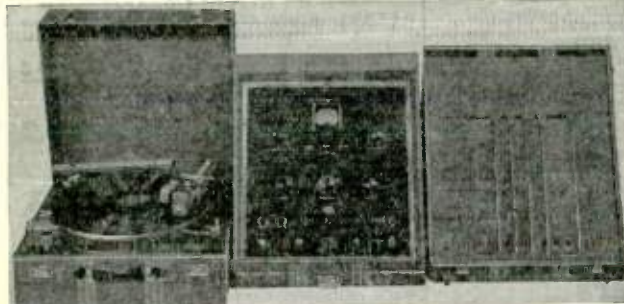

Presto Model "Y" Recorder

Cuts up to 17 1/4" Discs at 78 or 33-1/3 RPM

D17645—Model "Y." A complete portable recorder incorporating all advantages of portability and capable of producing the finest recordings. Designed to fill the requirements of schools and colleges, radio broadcast stations, advertising agencies, commercial recording studios, etc. Features: 18" R/W drive turntable, 50-8000 cycle recording range, cuts 112 lines per inch, records from inside-out or outside-in. 10 Watt Amplifier incorporates frequency stabilizers to boost bass or treble response and mixer for 2 talks and phono. Volume indicator shows recording level. Recorder housed in portable case 20"x11x19 1/4". Wt. 44 lbs. Amplifier and 10" speaker housed in separate portable case, size 23 1/2"x12"x20". Wt. 47 lbs.

YOUR PRICE, Less Recording Discs and Needles \$950.00

Recorders for Home and Studio

Speak-O-Phone Model 88

Records up to 12" Discs at 78 RPM

D17632—Complete recorder ready to operate. Less discs and Needles.
List Price, \$87.50.
YOUR PRICE \$58.33

A compact, efficient recording and playback assembly—complete in every detail—nothing else to buy except recording discs and needles. Consists of a 3 stage amplifier, speaker, crystal microphone, desk-type stand, motor, 10" turntable, recording unit, playback pickup and gearing mechanism all mounted in a compact carrying case, size 15 1/2"x15 1/4"x9 1/2". Case covered by an impressive looking simulated plaid. Amplifier frequency range is to 5,000 c.p.s. Power output is 4 watts. Driving mechanism consists of a powerful motor specially designed for recording equipment. The specially weighted turntable is driven by means of an idler gear, thus tending to cut down motor rumble and noises. Tracking mechanism is completely positive. The Ortho-acoustic speaker arrangement has been designed as an integral part of the lid of carrying case, using an 8" built-in dynamic speaker. Playback reproduction is "wide-range" in its true meaning. Playback pickup is the latest Astatic model. For operation on 110 volts, 60 cycle AC.

Order all of your recording equipment from Radolek. Radolek's stock is complete! Write for literature on any other models in which you may be interested.

Speak-O-Phone Model 1-52A

Records up to 12" at 78 and 33-1/3 RPM

D17633—Complete recorder ready to operate. Less discs and needles. For operation on 110 volts 60 cycles.
List Price, \$179.50.

YOUR PRICE \$119.66

A compact, efficient recording and playback assembly complete in every detail—nothing else to buy except recording discs and needles. May be used equally well on 8", 8 1/2", 10" or 12" aluminum or acetate discs. Consists of a 3 stage 4 watt high fidelity amplifier, speaker, quality crystal microphone, collapsible chrome plated floor stand, dual speed motor and 12" turntable, cutting head and play-back pick-up. Meter for monitoring volume level during recording has illuminated dial. Drive mechanism consists of a powerful rim driven General Electric motor and turntable, constant speed type. Speed is instantly adjustable for either 78 or 33 1/3 RPM. Tracking mechanism is entirely concealed; has patented positive feed cutting arm. Cutting head is a true fidelity magnetic unit with adjustable needle angle. Cutter can be used for aluminum or acetate. Crystal playback pick-up follows same arc as cutting head. Housed in compact leatherette covered case 16x10x20", with inclined front panel on which all controls are mounted.

Carron Portable Recorder and Playback Combination

D17636—Carron recorder complete as described below, ready to operate, but less recording discs and needles.

YOUR PRICE \$19.75

A Complete Self-Contained Recorder

A completely self-contained portable recorder an electric phonograph for cutting up to 8" acetate disc and playing up to 12" records. Reasonably good results may be obtained for microphone or radio recordings. Consists of combination record cutter and playback pickup, constant speed 78 RPM motor with weighted 8 1/2" turntable, built-in 3 tube amplifier complete with tubes, volume control, PM dynamic speaker, crystal microphone and desk stand. Complete unit is housed in Alligator grain bakelite covered case, size 13"x13"x7". Uses standard acetate disc and needles. For 110 Volt 60 cycle AC operation.

Carron Basic Recorder

For Recording and Playback

D17637—YOUR PRICE \$7.25

Recording and playback chassis as used in above recorder. Includes combination cutting head and playback pickup with feed mechanism constant speed 78 RPM motor with 8 1/2" weighted turntable and needle cup installed on 3/4" leatherette covered mounting board ready to use with your own microphone or recording amplifier. May also be used in conjunction with most radio receivers. Mounting space requires 12 1/4"x12 1/4". Depth 3" below board and 3 1/2" above board. For 110 volt 60 cycle AC operation.

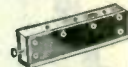

Brush Crystal Cutting Head

A dependable and exceptionally high quality cutting head suitable for use in cutting acetate or vinylite blanks. Cutting response within $\pm 3\text{dB}$ from 50 to 9000 CPS. Only 3 watts driving power required. Metal case size 3 1/2" long x 3 1/2" high x 1 1/2" thick. Net Wt. 4 1/2 ozs.

D13124—YOUR PRICE \$11.25

YOUR PRICE \$14.95

RADOLEK INTERCOMMUNICATORS

Master Selective Intercommunicator

The most economical system to install and operate, yet fulfills most intercom requirements. Designed for use where an executive or other centrally located person wishes to call up to five outlying Sub-stations. Each Sub-station can be called individually for private conversation, or all Sub-stations can be called at one time for paging purposes. All Sub-stations can call or answer the Master station, but Sub-stations cannot call each other.

Power output supplies sufficient volume from substation for calls to be heard up to 50 feet from substation. Volume level is controlled at master station. As much as 2000 feet of wire may be used between master and substations without cutting down efficiency. Quiet position shuts out noise unless substation or master calls. Master station is housed in wood cabinet of polished Walnut, size 9 3/4" long x 5 1/4" deep x 8" high. Sub-station is housed in Brown wrinkle enamel metal cabinet, size 5 3/4" long x 3 1/4" deep x 7" high. For 105-120 volts AC or DC operation. Operates as shown in diagram C.

D17685—Type B Master station for up to 5 substations. Complete with tubes and instructions, less connecting cable. List Price, \$27.50.
YOUR PRICE \$13.95

D17686—Type B Master Station for up to 10 Substations. Identical in features and operation to master described above but will operate any number of substations up to 10. Complete with tubes and instructions. Less connecting cable. List, \$34.00.
YOUR PRICE \$17.95

D17687—Type A Substation for use with either of above master stations. Less connecting cable. List, \$9.95.
YOUR PRICE \$4.95

D16565—Master to substation connecting cable, 10 ft. for.....19c

Super Selective Intercommunicator

The most flexible and versatile intercom system. For use where the greatest amount of utility is required from an inter-communicating system. Consists entirely of master stations and any number from two to five may be used. Any station may call and converse with any other station with complete privacy. Two complete conversations may be maintained at the same time without interference from another station.

Will operate with full power with up to 2000 ft. of cable between furthest units. Volume may be adjusted at each master from a whisper to a loudness that can be heard 25 to 50 feet away. Silent feature prevents noise between conversations yet does not interfere with incoming calls. Cannot be set choice walnut, size 12 1/2" x 8". For 105-120 Volt AC-DC.

D17691—Type B Master station for up to 5 sta. use. Complete with tubes and instructions, less cable. List, \$32.00.
YOUR PRICE \$15.95

D16568—Connecting cable for up to 5 stations, 10 ft. for.....50c

D17692—Type B Master station for use in a 10 master sta. group. Up to five 2-way private conversations may take place without interference. Complete with tubes and instructions, less cable. List, \$36.00.
YOUR PRICE \$17.95

D16567—Connecting cable for up to 10 stations, 10 ft. for.....75c

Combination Systems

Similar to above systems but allows intermixing of master stations and substations as shown in diagram E permitting the following type of intercommunication: (1)—Master stations may converse with each other, (2)—Any master may call any substation, (3)—Each master may in addition have substations which it alone may call. For 105-120 Volt AC-DC.

	10st	YOUR PRICE
D17693—Type B 5 Sta. Master	\$34.00	\$17.95
D16561—Cable for above, 10 ft. for		58c

D17695—Type A Sub-station, Less Talkback Switch	8.95	4.50
D16563—Cable for connecting Substa. to Master Sta. 10 ft. for		15c

Luxe Intercommunicator with Earphone

A DeLuxe line of intercommunicators that operate in the same manner as the Master Selective and Super Selective intercommunicators outlined above. However, the DeLuxe line is more powerful allowing operation of units with up to 3000 feet of cable between them. Up to 10 stations may be used and a privacy earphone is included with each master. Privacy earphone may or may not be used as desired. When it is in use communicator acts like a telephone, voice does not come out of loudspeaker and loudspeaker is used only as a microphone. Housed in wood cabinet of polished walnut, size 11 1/4" x 8" x 7 1/4". For 105-120 Volt AC-DC operation.

D17688—Type F DeLuxe Master Selective Station for use with up to 10 substations, operates as shown in diagram C. Complete with privacy earphone, tubes and instructions, less cable. List Price, \$62.50.
YOUR PRICE \$31.95

D17689—Type G DeLuxe Substation only in wood cabinet of polished Walnut, size 7 1/4" x 5 1/4" x 7 1/4". List, \$14.95.
YOUR PRICE \$7.95

D16566—Connecting cable for interconnecting masters to substation, 10 feet for.....35c

D17690—Type F DeLuxe 10 station Master for use in a Super Selective setup in conjunction with 9 other masters. Operates as shown in diagram D. Complete with privacy earphone, tubes and instructions. List Price, \$62.50.
YOUR PRICE \$31.95

D16567—Cable for interconnecting master stations, 10 ft. for.....75c

Power Stage for Paging

For use in Noisy Locations

Designed for use in conjunction with the master units listed on this page for high power paging where large areas must be covered in noisy locations. An unlimited number of power stages may be connected together in a single network, operating from a single channel of the master. Also additional speakers may be connected to each power stage obtaining their power from it. Volume may be adjusted to desired level at each power stage. Power stages may have up to 3000 ft. of cable connected between it and the master station. Housed in sturdy brown wrinkle enamel steel case, size 12 1/2" x 8". Complete with 8" 20 oz. magnet PM Speaker. For 105-120 Volt AC operation.

D17696—Type H 15 watt Power Stage. Complete with tubes and instructions, less cable. List, \$45.50.
YOUR PRICE \$22.50

D17697—Type H 8" PM Extension speaker in metal case. Less Switch and Volume Control. List Price, \$15.95.
YOUR PRICE \$7.95

D16563—Cable for connecting power stages to master stations, 10 feet for 15c

Communicator for Use with Power Stages

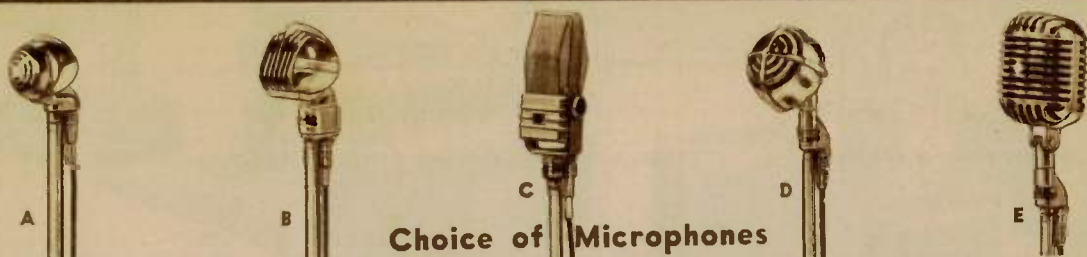

Power stages in themselves cannot be used for talkback in master station. If talkback feature is required the communicator station is connected to power stage, and talkback to master is carried on over this unit. For use with Master Selective and Combination Masters only.

D17698—Type A Communicator station only. List Price, \$9.95.
YOUR PRICE \$4.95

D16565—Cable for connecting communicator station to Master station (eliminates connection between master station and power stage), 10 feet for.....19c

P.A. Accessories As Included With Sound Systems

Choice of Microphones

To suit the needs of your individual installation Radolek offers you a choice of microphones for use with the Sound Amplifying Systems shown on the following pages. Any of these microphones are satisfactory for use under most conditions. However each microphone has specific characteristics which particularly adapt it to certain operating conditions. The selection we offer will cover the requirements of

practically any operating conditions that may be encountered. All microphones have built-in cable connector and are supplied complete with 25 ft. of heavy duty rubber covered shielded microphone cable having an Amphenol locking type plug at each end for screw on connection to amplifier and microphone. Amplifiers are equipped with correct socket, so that any microphone may be used with any amplifier.

TYPE A Bullet Crystal Microphone is an excellent all around indoor or outdoor microphone that may be used very satisfactorily for the reproduction of either speaking and singing voice or instrumental music. Rich Satin Chrome Finish. Size $2\frac{1}{2}$ " dia. x $3\frac{1}{2}$ " long. One Type A microphone will be supplied with any system at no extra charge, and will always be supplied with systems except where some other choice is indicated.

TYPE B Bullet Dynamic Microphone has approximately the same response characteristics as TYPE A but is considerably more rugged and is recommended for use where microphone must withstand rough handling and extremes of heat and humidity. Rich Satin Chrome Finish. Size $2\frac{1}{2}$ " dia. x $4\frac{1}{2}$ " long. One Type B microphone will be supplied with any system instead of Type A at an extra charge of \$3.50.

TYPE C Velocity Microphone is best for reproduction of instrumental music. May also be used for voice reproduction if the microphone is kept approximately 12" away from the mouth. Semi-directional characteristic assists in reducing feedback. This microphone is not recommended for outdoor use where wind is likely to affect its per-

formance. Head tilts through 180° angle and has built-in On-Off switch. Baked Grey Wrinkle Enamel Finish. Size $2\frac{1}{2}$ " wide x 2" deep x $6\frac{1}{2}$ " high. One Type C microphone will be supplied with any system instead of Type A at an extra charge of \$3.50.

TYPE D Shure Uniplex Crystal Microphone is recommended for reproduction of speaking or singing voice and instrumental music in either indoor or outdoor installations. Gives finest reproduction over entire frequency range. Special design eliminates sound pickup from rear of microphone yet allows wide angle pickup at front. This feature allows placement of microphone in practically any position with respect to loudspeakers without danger of feedback. Head tilts through 90° angle. Rich Satin Chrome Finish. Size $2\frac{1}{2}$ " dia. x $3\frac{1}{2}$ " deep. One Type D microphone will be supplied with any system instead of Type A at an extra charge of \$8.00.

TYPE E Shure Unidyne Dynamic Microphone is essentially the same as the Uniplex in response and anti-feedback properties. Rugged shockproof construction particularly recommend this unit for use in installations where microphone is subject to

rough handling or extremes of heat and humidity. Head tilts through 90° angle. Rich Satin Chrome Finish. Size $4\frac{1}{2}$ " high x $3\frac{1}{2}$ " wide x $2\frac{1}{2}$ " deep. One Type E microphone will be supplied with any system instead of Type A at an extra charge of \$13.50.

Extra Microphones

Only one microphone is supplied with each sound system at the prices quoted for complete systems. When more than one microphone is required for your installation, additional microphones may be purchased for the prices specified below at the same time as the complete sound system is obtained. Microphones are supplied complete with floor stand, 25 ft. of cable and 2 connection plugs.

Stock Num.	Type	YOUR PRICE

D15076	D	19.11
D15077	E	26.46

Speakers and Speaker Baffles

The Dynamic Speakers supplied with Radolek Sound Systems are of the latest design Permanent Magnet type which eliminate the need of supplying magnetizing power to the speaker either from the amplifier or an external power supply. Dust covers protect voice coils from foreign substances and prolong the life of the speaker. Each speaker is equipped with universal line matching transformer so that long speaker lines may be run without power loss. Each speaker is also equipped with a parallel wired outlet socket into which an additional speaker or speaker combination may be plugged making it unnecessary to run each speaker cable back to amplifier. Only two wires are used for connection to amplifier. This feature saves many feet of cable.

TYPE A 12" Permanent Magnet Dynamic Speaker with 20 oz. Magnet supplied as standard equipment on 15 Watt Sound Amplifying Systems. Two of these speakers when properly baffled will handle the entire output of the 15 watt amplifier without distortion.

TYPE B 12" Permanent Magnet Dynamic Speaker with 31 oz. Magnet, supplied as standard equipment on 30 and 50 Watt Sound Amplifying Systems. Two when properly baffled will handle the output of the 30 watt amplifier, four the output of the 50 watt amplifier.

TYPE C 12" Permanent Magnet Dynamic Speaker with 46 oz. Magnet supplied as standard equipment on 30 and 100 Watt Sound Amplifying Systems. Three when properly baffled will handle the entire output of the 30 watt amplifier, six the output of the 100 watt amplifier.

TYPE D Wall Baffle. A flat type baffle that will spread sound over the widest possible area but will not project the sound as far as the projector or trumpet type baffles. Constructed of $\frac{1}{2}$ " plywood with dark blue leatherette covering. Size $16\frac{1}{2}$ " x $15\frac{1}{2}$ " x $8\frac{1}{2}$ " deep. Has separate speaker mounting board.

TYPE E Projector Baffle has moderate directional qualities which allow wide coverage and sound projection over a somewhat greater distance than flat baffle. Especially desirable for use in over-crowded "dead spots" and eliminating "feedback". Bell is of spun aluminum. Back is of spun steel. Will withstand reasonably rough usage. Bell Size 18" dia., 10" deep. Speaker mounting $12\frac{1}{2}$ " dia., 10" deep. Has two rings for ceiling suspension.

TYPE F DeLuxe Projector Baffle. Has essentially same characteristics as Type E but of steel construction, will withstand much rougher usage and will offer much better protection to speaker against weather when used outdoors. Mounting bracket fits standard $\frac{1}{2}$ " pipe. Two rings for ceiling suspension. Size $20\frac{1}{2}$ " long, $17\frac{1}{2}$ " bell dia. Supplied with systems using Type E at an extra charge of \$3.00 for each baffle. See page 89 for price of adjustable crocket stand.

TYPE G Trumpet Baffle projects sound in a more directional beam and over a greater distance than the other types described. Recommended for installations such as Athletic Fields, Stadiums, Battery Chime Systems Etc. Comes complete with 8" or 16" Permanent Magnet Dynamic Speaker, which will handle a full 15 watts of power. Horn is of heavy duty all steel construction. Size, Bell dia. 25" overall length 34". Equipped with mtr. bracket threaded to fit standard $\frac{1}{2}$ " pipe. Supplied less crocket bracket but complete with 8" speaker instead of Type E baffle and 12" speaker on systems specifying Type E at an extra charge of \$15.00 per baffle.

Additional Speakers

In many installations extra speakers are required. For your convenience speakers are available separately complete with 25 ft. of connecting cable, speaker outlet socket, and amplifier connection plug. Any speaker may be used on any amplifier.

Stock Num.	Type	PRICE EACH
D15070	A	\$ 7.65
D15071	B	8.41
D15072	C	10.75

Additional speaker cable for any speaker 2c per foot.

Microphone Stands

TYPE A Banquet Stand. Has heavy cast metal base, stem is of highly polished chrome. Overall height less Microphone 10". Supplied as standard equipment on all 15 watt Sound Systems.

TYPE B Standard Floor Stand. Consists of 2 piece standard, adjustable from 40" to 68" and 9" dia. base with spun brass canopy. Entire Unit is finished in highly polished triple plated chrome. Friction clutch allows instant raising and lowering of microphone and keeps smooth constant pressure which prevents collapsing under the heaviest microphone. Total weight 4 lbs. Supplied as standard equipment on 30, 50 and 100 watt systems except portables.

TYPE C Portable Floor Stand. Similar in mechanical construction and appearance when set up to Type B. Designed for use with portable systems. Easily and quickly detachable into 4 pieces (9" base and 3-17" sections). Each section is inside threaded to form a smooth surfaced rigid stem. Total weight 8 lbs. Standard equipment on 30, 50 and 100 watt portable systems.

- 1—3 Stages—4 Tubes.
- 2—High Gain for Crystal microphone and phonograph.
- 3—Microphone and Phonograph Volume Control.
- 4—Continuously Variable Tone Control.
- 5—Simple Plug-in Connections.
- 6—Sturdy Portable Carrying Case.

Ready to Operate

Covers An Indoor Crowd of Up to 500 People or An Outdoor Area of Up to 3000 Square Feet

Ideal for use in the smaller installations such as Store Advertising, Electric Guitars, Class Rooms, Club rooms, Rally-hoos, Window Display Demonstrations, etc. Can also be used with a record player to provide recorded musical entertainment. Has separate input connections for microphone and phonograph. Special switching arrangement allows use of either at one time. Installation is easy, takes but a few minutes. Anyone can do it. Nothing to hook-up, all connections are polarized plug-ins, just plug into A.C. socket. Extremely simple operation. System includes: 7 Watt Amplifier, Set of 4 Sylvania Tubes consisting of 1-6SJ7, 1-6SE5, 1-6AL5 and 1-6X4, High Quality Crystal Microphone with 25 ft. of shielded cable. Mike desk stand, 8" PM Dynamic Speaker with 25-ft. cable and plug, all housed in an attractive blue fabric-covered portable carrying case. Size 12" x 12" x 7 1/2". For 105-120 volt, 50-60 cycle A.C. operation.

D15135—7 Watt P. A. System as described, complete with High Grade Crystal Microphone and Stand, 25 ft. of Shielded Microphone Cable and Plug, 4 Sylvania Tubes, Speaker and carrying case, ready to operate.

Electric Musical Instrument Amplifiers

For Use with Wind or String Instruments

Everything you need to adapt any musical instrument for electric sound amplification is included in the two systems listed. Simply take any guitar, violin, mandolin, ukulele, banjo, accordion, saxophone, clarinet, etc. Tape on clamp on the special pickup and you are all set to swing into this new musical technique. Installation does not harm or alter the instrument in any way. May be used to create special effects in conjunction with orchestras or for solo work to build up volume coverage. Sufficient connecting cable is supplied so that speaker need not be located near musician's feet but can be placed anywhere within a radius of 35 feet. Two systems are available: The 7 watt system fully described above is suitable for use in small orchestras or for solo work to audiences of up to 1000 people. The 15 watt system (fully described on page 101-103) may be used for small or large audiences and has sufficient available volume to handle any normal requirements. Any high impedance microphone can also be used in addition to the instrument pick-up on the 15 Watt System.

Price 7 Watt System

Includes Amperite Kontakt musical instrument pickup with 15 feet of connecting cable and plug. Pickup Volume Control, Amplifier, Complete set of Sylvania tubes, and 8" PM speaker with 25-ft. cable, all housed in a compact attractive blue fabric-covered carrying case, size 11" x 14" x 11". Completely Portable

The entire outfit comes complete in a compact, light weight, carrying case. Easily carried anywhere. Professional in appearance. Cases are sturdily constructed and attractively finished in rich leatherette with convenient leather handle on top. Amplifier may be removed or left in case as desired. System is convenient to handle and is easily carried.

Easy to Install

The tiny inconspicuous pickup unit fits under the strings of the instrument or on bell of wind instruments. May be quickly and easily attached or detached. Does not mar instrument. A small piece of adhesive tape or special clamp (see below) holds pick-up securely in place. No wiring to be done. No technical skill required for installation.

Electric Musical Instrument Accessories

Amperite Kontakt Mikes

Radolek 15 Watt Deluxe

Compare These Features!

Entirely self-contained. Remarkably fine tone response essentially flat from 50 to 10,000 cycles. Inverse feedback provides clean reproduction at maximum output. Continuously variable tone control quickly accentuates bass or treble as required. Polarized connecting plugs and sockets eliminating all possibilities of a wrong connection.

Attractive Modern Appearance

Radolek Amplifiers bring you styling and deluxe professional appearance that will make a favorable impression in any installation. The base is finished in baked maroon crackle enamel. The Streamlined Protective Shield is finished in baked grey crackle enamel, attractively trimmed with chrome bands and handles. Control indicator plates are etched black with frosted silver numbers. Knobs are red pointer type.

For Use on 105-120 Volts
50-60 Cycle AC

Full 15 Watts — Powerful — Compact — High Gain Push-Pull For Crystal, Velocity or Dynamic Microphone and Phonograph

Many Applications!

The ideal amplifier for low-priced installations. These applications represent just a small percentage of the numerous opportunities offered for installation of this compact, high quality public address unit—Call Systems, Store Advertising, Inter-Communicating Systems, Small Auditoriums, Telephone Boosters, Restaurants, Cafes and Lodges. The low hum, triple filtered circuit makes it especially commendable for use in Funeral Parlors, Classrooms and Clubs. The compact size and rugged construction of this amplifier make it well adapted for many portable applications.

Perfect coverage for indoor audiences up to 8000 people, and outdoor areas 3000 to 10,000 square feet!

Quality Equal to Larger Systems

Designed by the same engineers and built of the same high quality parts as the larger, more expensive Radolek Amplifiers. Each system is subject to careful test and guaranteed to provide satisfactory performance.

Phonograph Input

Plug-In Phonograph Connections with individual volume control. Any type of high impedance crystal or magnetic pick-up may be used. Phono tap described below may also be used. Perfect reproduction of records is assured. Separate phono volume control on front panel permits phonograph music to be blended with speech input to any degree of ratio desired.

Uses Push-Pull 6L6 Power Tubes

A pair of 6L6's are capable of delivering up to 15 watts of output power. The Radolek 15 Watt High Gain Amplifier uses these highly efficient tubes in the output stage, operating them at an ultra conservative point so that a full-distortion free 15 watts is obtained (considered on a commercial basis). In addition to the exceptionally clean output that results you can count on an extraordinary long life from the tubes.

Simplified Mixer and Fader

Complete Input Control System including separate Volume Controls for Phonograph and Microphone is built right into the Amplifier. The inputs are so inter-connected that complete mixing or fading between them can be accomplished easily and efficiently. Enables a voice announcement to be superimposed on a musical background from Phonograph, etc. Genuine Electronic Mixing system allows volume adjustment of either input without affecting the volume level of the other. "Cross talk" is absolutely eliminated.

Tone Control

Radolek's newly developed "feedback" tone control circuit provides a total adjustment of output heretofore unobtainable in any amplifier of this size. Delivers a full distortion-free 15 watts of power regardless of tone control setting. Bass register is brought out without distortion of high frequencies, as is common to most amplifiers.

4 Stage—High Gain

Most amplifiers of similar rating provide only 3 stages of audio. Radolek gives you 4 high gain stages which provide ample amplification for using low output microphones even when exceptionally long cables are necessary.

Phonograph Attachment

Consists of constant speed phono motor with 9" turntable and high grade crystal pickup mounted on amplifier protective shield. May be substituted in place of regular shield. Amplifier has plug-in connection jacks mounted so that all connections are enclosed inside of shield. May be purchased with amplifier or added to amplifier at a later date.

D15093—Phono attachment unit as described less amplifier. List, \$35.25: **\$745**
YOUR PRICE

Biggest Sound Value!

Here Radolek offers you a Class "A" push-pull output Fifteen Watt, Four Stage Six Tube amplifier at lower cost than is usually asked for lower power amplifiers using single pentode tube output. Only with genuine Class "A" push-pull output can high fidelity, distortion-free reproduction be secured. Combination input, high gain for crystal, ribbon velocity, or dynamic microphones. Separate input for crystal or magnetic phono pickup. COMPARE—we ask!—this amplifier represents a value that today stands unequalled in the field of Public Address equipment.

Amplifier Specifications

1. 15 Watts Push-Pull Class "A" output.
2. 4 Stage High-Gain Input with Six new multi-function tubes, 1-6SF5, 1-6SC7, 1-6N7, 2-6L6's, 1-5V4G.
3. Extremely Low Hum Level. Only .1 at 15%.
4. Only .002 volts input Signal required to obtain maximum output.
5. 130 DB. gain for microphone. 5 Db. gain for phono.
6. Resistance coupled right to final output assuring flat response. Plus or Minus 2 Db. 50-10,000 cycles.
7. Output Impedances, 4, 5, 250, and 500 ohms from built-in output transformer. Two speaker sockets.
8. Polarized Plug-In Input and Output connections.
9. Mixer and Fader is electronic type built into amplifier.
10. Two Volume Controls, one for microphone, one for phonograph.
11. Master Tone Control and on-off switch.
12. Universal Input for Velocity, Crystal or Dynamic Microphone and Phonograph.
13. Inverse Feedback—insures greater output without distortion and improved tone quality on peaks.
14. Easily replaced fuse.
15. Pilot Light shows when amplifier is "on."
16. Overall height including protective shield, 6". Base size, 5 1/2" wide, 14 1/2" long, 3" high.
17. Net Weight, 7 lbs. Shipping Wt., 10 lbs.

Prices 15 Watt DeLuxe Amplifier

Public Address Systems

Choice of Microphones

You may choose any of the microphones illustrated when ordering the Sound Systems described on this page. If you choose: Type A Bullet Crystal No extra charge, Type B Bullet Dynamic or Type C Velocity add \$3.50 to your order, Type D Shure Unidyn add \$8.00, Type E Shure Unidyne add \$13.50. If no choice is specified Type A will be supplied. See page 100 for a complete description of these microphones.

Fast—Easy Set Up and Operation

Radolek Amplifiers and Sound Systems are easy to install and use and are reliable in operation. No technical knowledge or experience is required to obtain best results as everything possible has been done to simplify the system's operation. Systems come to you complete—ready to set up in a few minutes. Speakers and microphones are supplied with cables connected to polarized plugs. Just "plug-in" the easily identified connections and you're all set to go. Each system is carefully assembled and wired. A thorough test of the completed system is made before shipment, assuring you of trouble free operation when you receive it. Complete instructions included with each system.

Speakers

The speakers supplied with the systems listed below are the latest type heavy duty 12" Permanent Magnet Dynamic Speakers with 20 oz. magnets. Speakers do not require external field excitation and use only two wires for connection to amplifier. Each speaker is equipped with a parallel wired outlet socket into which an additional speaker or speaker combination may be plugged making it unnecessary to run each speaker cable back to amplifier. Saves many feet of cable.

Microphone Stand

The mike stand regularly supplied with systems listed below is a 10" high desk type having a heavy cast metal base. Base is black crackle finish, stem of highly polished chrome. Floor stand may be substituted on any of the systems at an additional cost of \$2.80. Demountable floor stand suitable for use with portable systems may be substituted at an additional cost of \$4.06. See Page 100 for complete description.

15 Watt Public Address System for Permanent Installations

Economy Model

An ideal system for small installations such as Clubrooms, Restaurants, Store Demonstration systems, Taverns, etc. Complete system includes: 15 watt high gain push-pull amplifier with protective installation shield, set of six matched Sylvania tubes, choice of microphone as explained above with 25 ft. cable and plug, microphone desk stand, one 12" heavy duty PM dynamic speaker with 25 ft. of cable and plug, and one blue fabrikoid covered wall baffle. All parts are completely wired ready to install. For 105-120 Volt 50-60 cycle AC operation.

Servicemen! Use this system as a demonstrator in selling P.A. Its high standard of performance makes it possible to give your customer a real idea of what he may expect from the system he buys.

D15091—DeLuxe 15 Watt System. Complete with all equipment, less Amplifier Shield, ready to operate as described at right.

List Price, \$78.00.

YOUR PRICE

\$39⁵⁰

DeLuxe Model

A highly practical Public Address System that will fulfill the requirements of many installations. Suitable for use as Office Call Systems, in Small Auditoriums, Small Ballrooms, Carnival Concessions, Night Clubs, etc. Complete system includes: 15 watt high gain push-pull amplifier, set of six matched Sylvania tubes, choice of microphone as explained above with 25 ft. of cable and plug, microphone desk stand, two heavy duty 12" PM dynamic speakers each with 25 ft. of cable and plug and two wall mounting blue fabrikoid covered baffles. All units are completely wired and system is ready to operate. Each system is subject to careful test before shipment. For 105-120 Volt 50-60 cycle AC.

15 Watt Public Address Systems for Portable Use

Economy Model

System consists of 15 Watt High-Gain Push-Pull Amplifier, set of six matched Sylvania tubes, heavy duty 12" PM speaker, choice of microphone and desk stand housed in one sturdy, convenient leatherette covered carrying case, size 17 x 17 x 9 inches. Mike and speaker each have 25 ft. of connecting cable and plug. Meets the need for a compact and inexpensive Sound Distribution System. Each System is subject to careful test before shipment and guaranteed to provide satisfactory performance when used under the conditions for which intended.

System Prices

D15083—Economy 15 Watt Portable System complete with all equipment, including protective amplifier shield, ready to operate as described at left. For 105-120 Volt 50-60 cycle AC.

DeLuxe Model

Designed for compactness, yet case is large and heavy enough to allow proper baffling for speakers and provide excellent reproduction of either voice or music. Includes 15 watt high-gain push-pull amplifier, set of 6 Sylvania Tubes, 2 heavy duty 12" PM speakers, each with 25 ft. of cable and plug, choice of microphone with 25 ft. of cable and plug, microphone stand housed in one unit. All parts are mounted to provide proper weight distribution. 3 Piece case is covered with durable blue leatherette size, 14x18x19". Net weight 28 lbs.

Radolek 30 Watt DeLuxe

Attractive Modern Appearance

Radolek Amplifiers bring you styling and DeLuxe professional appearance that will make a favorable impression in any installation. The base is finished in baked maroon crackle enamel. The Streamlined Protective Shield is finished in baked grey crackle enamel, attractively trimmed with chrome bands and handles. Control indicator plates are etched black with frosted silver numbers. Knobs are red pointer type.

Operates on 105-120 Volts 50-60 Cycle AC

Three Channel Input For Two Microphones and Phonograph

Covers Indoor Audiences of up to 8,000 People or an Outdoor Area of up to 30,000 Square Feet

Biggest Value—Widest Use

Here is the most amplifier for your money in the entire PA field. Alert modern engineering leadership and volume production have produced this super value. Finest quality in every detail. Widest usefulness. Tremendous power. Use this amplifier for your rental jobs as well as for permanent installations. It can be tuned down to handle the small installation and has sufficient reserve power to handle any but the largest setups. Feel confident to sell and install this High Quality Amplifier under toughest competitive conditions.

Simplified Mixer and Fader

Complete Input System including separate Volume Controls for Phonograph and Microphones is built right into the Amplifier. The inputs are so inter-connected that complete mixing or fading between them can be accomplished easily and efficiently. Enables a voice announcement to be superimposed on a musical background from Phonograph, etc. The volume on the microphone can be individually adjusted so that the different sections of an orchestra can be tuned down or brought out as desired. One microphone can be used to carry the orchestra as self-background music; the other microphone for a singer, etc.

Dual Rectifiers

A new feature providing greater operating efficiency, longer life and cleaner power output. Dual Rectifiers—one for plate and grid bias voltages—one for screen voltages. Voltages remain constant in spite of varying power output levels providing a true "Class A" output than can otherwise be obtained. These new rectifiers are also of the slow heating type allowing the filament of the other tubes to heat up before plate voltage is applied—this prevents high initial voltage surges giving condensers less abuse and longer life.

Fast—Convenient—Easy Installation

List Price \$60.00.

YOUR PRICE

\$29⁸⁹

Bass and Treble Tone Controls

Either low or high frequencies may be accentuated, both highs and lows may be accentuated at once, or a flat uniform response can be obtained. Innumerable variations are possible so that any tonal requirement may be fulfilled. This feature is particularly valuable for installations which must fit every type of public speaker, singer, orchestra and hall. Accentuating the highs makes a speaker's voice far easier to understand. Accentuating bass response will make a high pitched voice sound more pleasing to the ear, will bring out the low notes as desirable in reproducing organ music, and will often assist in eliminating acoustical feedback. True wide range response is now possible as never before.

Phonograph Attachment

Consists of constant speed phono motor with 9" turntable and high grade crystal pickup mounted on amplifier protective shield. May be substituted in place of regular shield. Amplifier has plug in connection jacks mounted so that all connections are enclosed inside of shield. May be purchased with amplifier or added to amplifier at a later date.

D15013—Phono attachment unit as described less amplifier.

Amplifier Specifications

1. 30 Watts "Laboratory Certified" Push-Pull 6L6 "Beam Power" Output.
2. Four stages, eight tubes: 2-6SF5's, 1-6SC7, 1-6N7, 2-6L6's, 1-5V4G, 1-6X5.
3. 133 Db. usable gain for all stages of microphones.
4. Frequency characteristic curve flat within 2 Db. from 50 to 6000 cycles.
5. Three channel input—Two Microphone and one Phono.
6. Polarized Plug-in connections for three speakers, two mikes and phonograph.
7. Complete built-in genuine electronic 2 channel Mixing and Fading System.
8. Separate volume control for each of three channels.
9. Provisions for connection of remote control.
10. Dual tone controls. Treble and bass boost circuit.
11. Inverse Feedback. New balanced feedback development assures freedom from distortion peaks.
12. Output Impedances: 2, 4, 8, 166, 260, and 500 ohms. Impedance selector for convenient speaker adaptability.
13. Extraordinary low hum level—only .1 of 1 per cent.
14. Power consumption 150 Watts.
15. Power supply, 105-120 volts, 50-60 cycle AC.
16. Fully protected with easily accessible quickly renewable fuse.
17. Pilot light shows when On or Off.
18. Separate On-Off switch.
19. Dimensions, with shield: 7½" high, 6½" wide, 16½" long.
20. Net weight, 33 lbs. Packed, 39 lbs.
21. Bottom protecting plate.
22. Finished in baked-on red crackle enamel.
23. Protective steel shield with chromium bands standard equipment.

Remote Control Unit

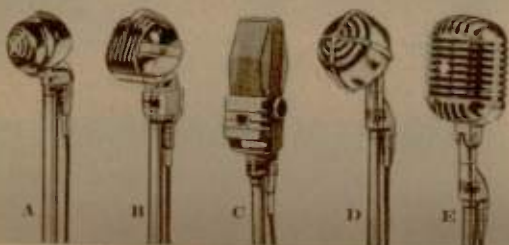

D15136—Optional Equipment. Permits control of volume for two microphones at a remote point. Amplifier is already arranged to use remote control, no wiring or changes necessary. Complete with 50 ft. of cable and plug.

Public Address Systems

Choice of Microphones

You may choose any of the microphones illustrated when ordering the Sound Systems described on this page. If you choose: Type A Bullet Crystal **No extra charge**, Type B Bullet Dynamic or Type C Velocity add \$3.50 to your order, Type D Shure Uniflex add \$8.00, Type E Shure Uoldyve add \$13.50. If no choice is specified Type A will be supplied. See page 100 for a complete description of these microphones.

Complete Ready to Operate

Radolek Amplifiers and Systems are quickly and easily installed and are reliable in operation. You need not have sound or engineering ability or other technical knowledge to obtain best results. No complicated wiring! Just "plug-in" the easily identified connections and you're all set to go. Speakers and microphones are supplied with cables connected to polarized plugs making it impossible to plug into the wrong place. Radolek engineers check each system after it is wired and assembled and before it is shipped assuring correct and trouble-free operation when the system reaches you.

All PA Systems on this page operate from 105-120 Volts 50-60 cycles AC.

Finest Quality Speakers

The speakers supplied with the systems listed below are the latest type heavy duty 12" permanent Magnet Dynamic Speakers with 31 oz. magnet. The two speakers will handle the full output of the amplifier without distortion. They do not require external field excitation and use only two wires for connection to amplifier. Each speaker is equipped with a parallel wired outlet socket into which an additional speaker or speaker combination may be plugged making it unnecessary to run each speaker cable back to amplifier.

Microphone Stand

Full 68" tall, highly polished chrome plated stand with weighted base. Friction clutch allows instant raising and lowering of microphone. Weight of mike will not cause slipping. Will not tip easily.

30 Watt PA Systems For Permanent Installations

Includes all equipment required to install a High Fidelity Public Address System for indoor locations. Equipment supplied: 30 watt DeLuxe Amplifier with protective shield fully described on opposite page. Set of Eight matched Sylvania Tubes, Choice of Microphones with 25 ft. of connecting cable and plug as explained above. Heavily weighted all chrome plated Microphone Floor Stand, Two heavy duty 12" PM Dynamic Speakers each with 25 ft. of connecting cable and plug and Two Wall Buffers, covered with attractive blue fabricoid.

Has Automatic Volume Control

Remote Control

Optional Equipment. For use with above Amplifier. Permits control of volume for two microphones at any remote point up to 1000 ft. from amplifier. Control cables plug into amplifier. Amplifier is already arranged to use remote control, no wiring or changes necessary. **D15136 — Radolek Remote Control Unit.** Complete with 50 ft. of cable and necessary plugs.

YOUR PRICE \$5.50

For Use on 105-120 Volts 50-60 Cycle AC

For Crystal, Dynamic or Velocity Microphones

A SUPER POWER Amplifier engineered for the sound specialist who demands the best quality reproduction combined with convenience in operation and attractive appearance. Every detail of design has been carefully worked out. 50 Watt "Beam Power" Laboratory Certified output. Tremendous in power yet compact in size and conveniently flexible in operation. A perfectly balanced combination especially suited for the most exacting installations. Remarkably easy to connect and operate. Arranged to eliminate all possibilities of costly mistakes in set-up. Anyone without technical experience or training can handle every function of operation with perfect satisfaction.

Perfected Dual-Action Tone Control

Either low or high frequencies can be accentuated as desired. This feature is particularly valuable for installations which must fit every type of speaker, singer, orchestra, and hall. Accentuating the highs makes speakers' voices far easier to understand. Accentuating bass response will make a high pitched voice sound more pleasing to the ear, will bring out the low notes in desirable in reproducing organ music, and will often assist in eliminating acoustical feedback.

Speaker Matching Switch for Speakers

Eliminates complicated wiring. As many speakers as desired can be used by just "plugging-in" to polarized sockets. A special impedance-changing switch provides instant changeover and correct adaptability to various types and quantity of speakers. Switch may be locked in position.

Phono Attachment

Consists of constant speed phono motor with 9" turntable and high grade crystal/pickup mounted on amplifier protective shield. May be substituted in place of regular shield. Amplifier has plug in connection jacks mounted so that all connections are enclosed inside of shield. May be purchased with amplifier or added to amplifier at a later date.

D15011—Phono attachment unit as described less amplifier.

For Use on 105-120 Volts, 50-60 Cycle AC

D15130—Radolek 4-Stage, 50 watt, High-Gain DeLuxe Six Channel Input Amplifier. Factory wired and Laboratory Certified. Supplied with protective shield but without tubes.

List Price, \$100.00 **YOUR PRICE \$49.50**

D15131—Complete Amplifier with Set of Fourteen Matched Sylvania Tubes consisting of 4-6SF5's, 2-6N7's, 1-6H6's, 4-6L6's and 2-5Y3's.

List Price, \$115.34 **YOUR PRICE \$58.67**

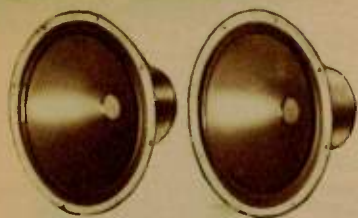

Super-Power Features

1. 50 Undistorted Watts to speaker voice coils. Completely free from drawing grid current on peaks within normal power.
2. Six Input Channels with plug-in connections. Four high gain 130 db. for all commercial microphones and two for phono input 85 db. Each channel independently controlled.
3. Automatic Volume Control keeps output at practically constant level regardless of talker's position with relation to mike.
4. Remote Volume Control. May be connected to regulate volume of two microphones from remote point.
5. Fourteen Multi-function Tubes, 4 Stages: 4-6SF5's, 2-6N7's, 1-6H6, 4-6L6's, and 2-5Y3's.
6. High Fidelity Tone with frequency characteristics flat within 2 db. from 40 to 9900 cycles.
7. Tonal Color Control. Accentuates bass or treble as may be preferred.
8. Complete Mixing and Fading System. Perfect control over each input providing any combination of tone and volume.
9. Plug-in polarized receptacles for four speakers.
10. Automatic Speaker Matching. A convenient impedance changing switch permits use of various types and number of speakers. A single setting of this control assures a perfect impedance match with practically any selection of speakers.
11. Output impedance tapped at 1/2, 2, 4, 8, 125, 166, 250 and 500 ohms.
12. Only .005 Volts Input to obtain full output. Permits microphone cable lengths up to 200 ft.
13. Exceptionally Low Hum Level, only .1 of 1% of total output.
14. Low Power Consumption, 180 Watts. Power supply required 105-120 volts, 50-60 cycles AC. Safety Fused.
15. Strong Steel Chassis in lustrous red crackle finish. Dimensions, 18 1/2" long, 8 1/2" wide, 9" high including shield.
16. Net Weight 20 lbs. Shipping weight 35 lbs.

Public Address Systems

READY TO SET UP AND OPERATE IN JUST A FEW MINUTES: Radolek Amplifiers and Systems are easy to install and operate and are reliable in operation. You need not have sound or engineering ability or other technical knowledge to obtain best results. By following a few simple instructions anyone can quickly set up and take down this equipment without error. No complicated wiring! Just "plug-in" the easily identified connections and you're all set to go. 30 Watt Mobile Amplifier and Sound Systems

Operates From 6 Volt Battery or 110 Volt AC Line

- Extra Power Output—50% more than usual on mobile systems.
- One complete unit—no external power pack or current supply needed.
- Phonograph record player—optional—can be added later if preferred.
- Controls conveniently accessible. Easily handled even in heavy traffic.
- P.M. type speakers draw no field current, provide highest efficiency and greatest power with least battery drain. Can be used any place.

Choice of Microphones

You may choose any of the microphones illustrated when ordering the Sound Systems described on this page. If you choose: Type A Bullet Crystal No extra charge, Type B Bullet Dynamic or Type C Velocity add \$3.50 in your order, Type D Shure Unimic or Type E

Shure Unidyn add \$13.50, Type G Shure Crystal Hand Mike with "press to talk" switch add \$3.50. If no choice is specified Type A will be supplied. See page 100 for a complete description of these microphones.

D9971 Type H Shoulder Microphone Carrier for any of above microphones. Less Mike. **YOUR PRICE \$145**

No External Power Pack Required

Your Power Source troubles are over with this New Radolek General Purpose Public Address System. Operate it indoors from the 110 Volt AC Power line or set it up in a truck or passenger car with 6 volt storage battery. When your sound car is used in picnic groves or other locations where you stay in one spot use 110 V. AC power if available or if not, a 6 volt storage battery will do. Changeover instantly—no complicated connections, just plug into power line or clip onto battery, throw the power switch, and you're ready to go. Both 6 V. and 110 V. power packs are built into the amplifier. No external equipment used. Delivers tremendous volume with rich clear tone. Covers an audience of 8,000 people indoors. Under favorable conditions can be heard up to 1/2 mile away, outdoors.

Easy To Install

READY TO SET UP AND OPERATE IN JUST A FEW MINUTES: The Radolek 30 Watt Mobile System is easy to install and operate. You don't have to be an engineer. The most inexperienced novice can quickly set up and take down this equipment without error. No Wiring! Just plug-in. A few simple connections and you're all set to go. Plug-in connectors come already wired and are polarized making it impossible to plug into the wrong socket. Complete installation and operating instructions included.

Most Versatile Amplifier

Big money will be made this year renting and selling public address systems for gatherings of every kind. In the entire P. A. field, the Radolek 30 watt Mobile amplifier gives you most for your money. Adequately covers indoor gatherings from a hundred or less up to large crowds of 8,000 and outdoor events of every type from a single tennis court match or small swimming tank meet up to athletic events on large fields 30,000 square feet in size.

Maximum usefulness is obtainable as a result of the combination 6 volt battery and 110 V. AC line operation provided in this amplifier. Dances — Dramatics — Concerts — Call Systems — Clubs — Schools — Churches — Auditoriums — Parks — Playgrounds — Garages — Parking Lots — Theatres and hundreds of places you can think of. Right Now are good prospects for P.A. equipment. Prepare now to Cash in on the many P.A. installation possibilities in your locality—feel confident to sell and install this amplifier under the toughest competitive conditions.

Amplifier Specifications

1. Dual Purpose Amplifier—For operation on 6 volt storage Battery or 105-120 volt, 50-60 cycle AC line. No external power pack.
2. 30 Watts "Laboratory Certified" Output—Powerful new High-Gain "Inverse Feedback" circuit. Newest engineering. You can use every bit of the distortion-free power developed by this amplifier. Uses high impedance microphones such as Velocity, Crystal, Dynamic, etc.
3. Uses Ten Tubes—2-6SF6's, 2-6SC7's, 1-6J5, 2-6L8C's, 2-6X5G's.
4. Three Channel Input—Two for microphones, one for phonograph.
5. High Fidelity Output—Full rated output from battery or power line.
6. Built-in Mixing System—Each input independently controlled for volume and mixing.
7. Hi-Low Tone Control—Complete control of tone, either high or low may be emphasized or normal tone brought out with greatest purity.
8. Electrically operated Record Player—(optional equipment). Smooth running, self-starting, reliable motor. Fine quality crystal pick-up gives life-like reproduction.
9. Speakers—Provision is made for operation with either one or two P.M. dynamic speakers. Connections made with polarized plugs. No chance for wrong connections.
10. New Streamlined Design—All steel case. Finished in two-tone wrinkle enamel. Lower section is in two-toned. Top shell is grey wrinkle, trimmed with chromium. Carrying handles permit easy transportation. Extra strong. Ample ventilation. Size: 9" high, 18" wide, 9 1/4" deep.

Outstanding Radio Set Values

Radolek 11 Tube Superheterodyne

6 Push Button Tuning—Built-in Aerial—Tuning Eye
3 Bands Tune 540 to 18,000 KC—12" Dynamic Speaker

Every possible refinement and engineering improvement necessary to provide the highest quality of radio reception and reproduction has been included in this Deluxe 11 Tube Super. Standard broadcasts come in with amazing clarity and delicacy. 6 button Synchronomatic tuning brings in favorite stations instantly, tuned exactly right. Short-wave bands provide reception for two-way airline broadcasts, for amateur operators all over the continent, and for foreign short-wave announcements of momentous events overseas. This is a radio for pleasure, for entertainment and for adventure, designed to give listeners the greatest possible enjoyment.

Consider These Features!

In every respect the receiving unit matches the superb quality and fine craftsmanship of the cabinet. No quality feature has been omitted. 11 tube superheterodyne circuit includes Tuning Eye for accurate dial settings. Automatic push button tuning is combined with improved one-piece variable condenser and tuner. Built-in antenna eliminates aerial and ground connections. 12" electro-dynamic speaker provides balanced reproduction of all programs. Tuning range includes 540 to 1800 Kc., 1750 to 6000 Kc., and 5500 to 18,000 Kc. Slide-rule dial. Size of console, 32"x28"x15". Power output approximately 6 watts. Tubes: 1-80, 1-6K7G, 3-76, 2-6AC5G, 1-6K8G, 1-6K7G, 1-6Q7G, 1-6U5. For 110-120 Volt AC operation.

*A fine Quality
Radio
That is Sure
to please*

- Two Band Tuning covers 535 to 1600 Kc and 5750 to 18,300 Kc. • Large Edge lighted Slide Rule Dial.
- Built-In Aerial. • Tone Response Control. • Automatic Volume Control. • Phono Connection.
- Push Pull Audio Beam Power Output. • 6" Electro Dynamic Speaker. • Walnut Veneer Cabinet.

One of the Year's Sensational Values—More radio for your dollar than we have ever before been able to offer. Unbelievably low in price yet contains DeLuxe features usually found only in sets selling at a much higher price. Faithful tone, highly visible easy tuning, phonograph connections, attractive styling, and many other sales building factors.

Foreign and Short Wave Reception—Get the latest world news first hand, sometimes even before it appears in the papers or is read over the air by local news commentators. Hear all sides of current international problems now broadcast in English from leading foreign short wave radio stations. Listen to the music of many lands. Hear ships at sea conversing with stations on shore, planes in flight receiving instructions and latest flying weather reports from their traffic control bases on the ground; radio amateurs conversing with one another; police calls, and many other broadcasts.

New Edge-Lighted Slide Rule Dial—Attractive, highly visible edge-lighted slide rule dial with vernier drive allows accurate tuning of all stations. Large 4 color direct reading tuning scales for quick finding and logging of stations. Relieves all eye strain and eliminates tensed or cramped tuning position necessary with other types of dials. Scales are direct reading over entire two band tuning range of from 535 to 1600 Kc (broadcast and upper police) and 5750 to 18,300 Kc (U.S. and foreign short wave stations).

Incorporates Latest Features. Automatic volume control circuit minimizes and in many cases entirely eliminates fading. Continuously variable tone control allows tone range adjustment of voice or music.

Built-in Loop Antenna allows perfect reception without the need for unsightly external aerial and ground wires. Permits operation of the set any place in the room, on the porch or outdoors—in fact any where a 110 volt 60 cycle AC outlet is convenient—Simply plug in and play.

Push-Pull Audio Output brings you finer, more realistic reproduction with a new richness and tonal perfection. Beam power output with heavy duty 6" electro-dynamic speaker handles full power without effort, reproducing each program with true lifelike quality and adequate volume. Tubes used: 1-6SA7, 1-6SK7, 1-6SQ7, 1-6SF5, 2-6K6G and 1-5Y3G.

Richly Styled Table Model Cabinet finished in selected Walnut veneers with mahogany and maple inlay trim. Decorative speaker baffle bars are finished in matched grain walnut. Knobs are molded bakelite mahogany finish. The entire cabinet is rubbed to a lustrous polish. Size: 20 3/4" x 10 1/4" x 10 1/4" deep. Ship. wt. 14 1/2 lbs.

7 Tube 2-Band-Super Chassis and Speaker

Makes Ideal Replacement Receiver

For Installation in Any Cabinet

For the person who has a radio cabinet which is valued quite highly yet would like also to have the advantages of up-to-date radio reception, this 7 tube AC Super chassis with a 10" dynamic speaker makes an excellent 1941 replacement unit. This is the same receiver chassis as used in the Radolek 7 tube AC Super described above.

Has All Latest Features

All the latest 1941 features have been incorporated: built-in aerial, automatic volume control, tone control, 2 band tuning covering 535 to 1600 Kc (Broadcast and upper police bands) and 5.75 to 18.3 Mc (Short wave and foreign bands), latest slide rule tuning dial etc.

Latest Superheterodyne Circuit

Has maximum sensitivity and selectivity for bringing in hard-to-get distant stations. Push-pull audio and beam power output furnish true lifelike tone and plenty of volume. Connections are provided for phonograph record player, television sound or F-M radio tuning adapter. Tubes used: 1-6SA7, 1-6SK7, 1-6SQ7, 1-6SF5, 2-6K6G and 1-5Y3G. Size, 12" wide, 8 1/4" deep and 7 1/4" high.

7 Tube Super Combination Radio Recorder and Phono

Automatic Phonograph
with Record Changer

SW and Broadcast
Console Radio

Home Recorder
and PA System

4 INSTRUMENTS IN 1

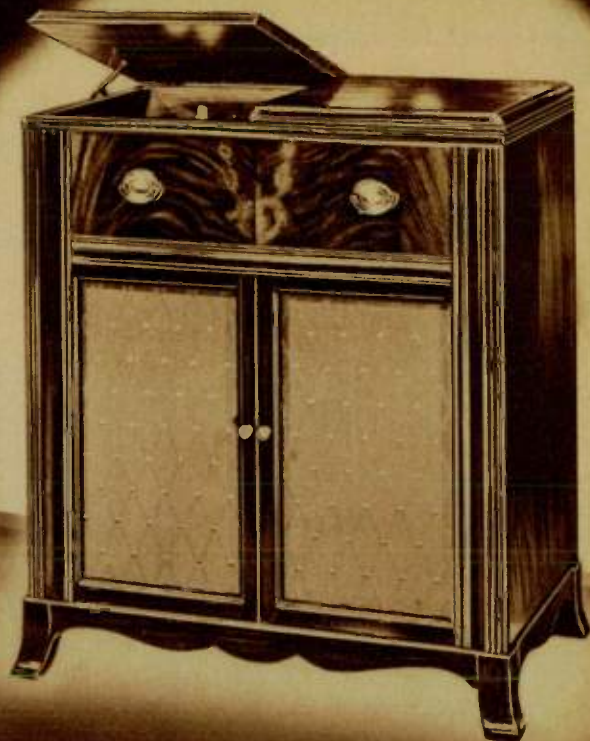

Complete Home Entertainment Within the Reach of Everyone. Never before in the history of radio has so little money been able to bring you so much real enjoyment, such **Big Value** as is contained in this modern 4-Way combination radio set, phonograph, recorder and public address system. The entire assembly has been housed in a very attractive Walnut or Mahogany **Authentic 18th Century Hep-plewhite, Highboy Cabinet**—a magnificent instrument that will gratify the most discriminating buyer.

Make Your Own Records at Home—it's so simple, anyone can do it—with perfect results. Latest high fidelity crystal microphone with desk stand and 10 ft. of cable comes already attached to recorder amplifier, ready for instant use. The entire family and all your friends will enjoy having records made of their voices or musical accomplishments. In addition, recordings can also be made directly from the radio—important events, famous people, concert orchestras, dance music etc. With the microphone your own voice may be added to any radio program thus enabling you for instance to sing with the world's greatest orchestras or to add your own impromptu remarks or announcements. Excellent recordings may be made using acetate or composition discs up to 10" dia. **Public Address System for Speeches and Concerts.** The same microphone used for recording, can also be used for talking or playing music through the loud speaker thus utilizing the speaker and amplifier as a public address system. This is especially useful when making speeches or giving concerts before medium sized crowds.

Latest 7 Tube 2 Band AC Superhet Receiver with broad-est and shortwave band tuning, brings you Foreign as well as U.S. stations. Has many newest features—edge-lighted slide rule dial, variable tone control, automatic volume control, push-pull output, 10" electro dynamic speaker and others. For more detailed information see opposite page. Overall cabinet size: 29 $\frac{3}{4}$ x 35 x 17 $\frac{1}{2}$ " deep. Ship. wt. 110 lbs.

Automatic Record Changer

Automatically plays and changes fourteen 10" or ten 12" records except non-recording models which take up to eight 10" or seven 12" records. Both types manually play all acetate and commercial records up to 12" dia. Records can be rejected at will. Pickup used in each is latest high fidelity crystal type with true-tracking light needle weight arm.

7 Tube 2 Band AC-Super Console

A splendid value in a console that is very attractively priced yet incorporates many Deluxe features ordinarily found only in higher priced sets. Clear high fidelity tone, high visibility tuning, (\$35 to 1600 Kc for U.S. and Canadian regular broadcast stations and \$750 to 13,300 for U.S. and foreign short wave programs) connections for external phonograph attachment, television sound or FM tuner and many others that delight the eye and ear winning immediate sales appeal.

The short wave band will give the listener a never ending series of interesting broadcasts both domestic and foreign. Get the latest world news, enjoy foreign entertainment programs, hear ships at sea, aeroplanes in flight and hundreds of thrilling broadcasts to be found on the short wave band 5,750 to 18,300 Kc.

Many Big Features—New edge-lighted vernier drive slide rule dial, in four harmonious colors, provides a quick and accurate means of tuning all stations both local or distant. Individual direct calibrated scales for each band relieves all eye strain and eliminates tensed tuning position often necessary with other types of dials. Tone control is continuously variable

allowing wide range adjustment of tonal color to suit the individual taste. Automatic volume control maintains constant volume level on local stations and minimizes or in many cases eliminates fading of distant reception.

Built-in antenna allows perfect reception without the need for external aerial and ground connections. Push-pull output circuit delivers full power to heavy duty 10" electro dynamic speaker which reproduces voice and music with rich harmonious tonal quality. Attractively styled console cabinet is finished in selected Walnut veneers and other contrasting woods. Recessed sloping tuning panel is set apart by curved pilasters and harmonious speaker grille bars backed by neatly designed grille cloth. Tubes used: 1-6SA7, 1-6SK7, 1-6SQ7, 1-6SF5, 2-6K6G's, 1-5Y3G. Size: 29 $\frac{3}{4}$ x 37 $\frac{3}{4}$ x 12" deep. Ship. wt. 47 lbs.

Push Button TUNING Radolek 8 Tube 3 Band AC Super Push-Pull OUTPUT

● Push Pull Audio. ● Beam Power Output. ● Automatic Volume Control. ● Tone Control. ● Built-In Aerial. ● 3 Band Tuning 535 to 1600 Kc., 2.2-7.6 Mc., 7.5 to 24 Mc. ● Large Slide-Rule Dial. ● Edge-Lighted Tuning Scale.

8 Tube 3 Band AC Super—Unparalleled value in an automatic push button receiver. Incorporates many worth while features generally found only in larger more expensive radio sets. Everyone will enjoy the fine tone and excellent performance of this superb receiver with its ample 7 watts output and attractive up to the minute cabinet styling that blends with all kinds of furnishing and decorative schemes.

Three Tuning Bands. Foreign and Short Wave Reception—Get foreign news and foreign entertainment first hand on the two Short Wave bands 2.2 to 7.6 and 7.5 to 24 Mc. These bands bring in all the important foreign and domestic short wave stations. Everything of interest, foreign music, foreign news, ships at sea, aeroplanes in flight and many more interesting entertaining and educational broadcasts are yours at the twist of a dial. Standard broadcast and upper police bands from 535 to 1600 Kc. bring in regular broadcast reception from American and Canadian stations. Extreme sensitivity and exacting selectivity brings in distant stations with ease.

Illuminated Slide Rule Dial—Large, easy tuning slide rule dial with vernier drive is clearly calibrated with separate easy-to-read calibrations for each band. Fully illuminated four color scales with knife edge indicator, make tuning a pleasure. You know exactly band and frequency tuned.

Automatic Push-Button Tuning—A row of piano key push-buttons conveniently located beneath the tuning dial, allow the selection of any 6 stations for automatic finger tip tuning. Stations so chosen can be set up instantly and just as quickly and easily changed, singly or in groups, whenever desired. Control knob is provided for Manual Tuning of any station.

● Automatic 6-Push-Button Tuning. ● 6" Electro Dynamic Speaker. ● Selected Walnut Veneer Cabinet. ● Record Player Connection. ● Connection for Television. ● Connection for F-M Tuner.

Every Useful Feature—Built-in loop antenna allows perfect reception without the need for unsightly external aerial and ground wires heretofore necessary. Continuously variable tone control gives opportunity for adjustment of tone color for music or voice, to suit the individual taste. Automatic volume control circuit minimizes and in many cases entirely eliminates fading. Push-pull audio system feeding 7 Watts to heavy duty 6" electro-dynamic speaker gives thrilling life-like quality reproduction with plenty of volume. Connections are provided also for external phonograph, television sound, or F-M tuning adapter.

Attractive Styling—Richly styled table model cabinet finished in selected walnut veneers with mahogany and maple inlay trim. Decorative speaker baffle bars are finished in matched grain walnut. Neatly designed grille cloth is securely anchored in place. Knobs are molded bakelite, mahogany finish. The entire cabinet is rubbed to a lustrous polish. Tubes used: 1-6SJ7, 1-6SA7, 1-6SK7, 1-6SQ7, 1-6SF5, 2-6K6C and 1-5Y3G. Size: 20 3/4" x 10 1/4" x 10 1/4" deep. Ship. Wt. 30 lbs.

Housed in a handsome rubbed Walnut wood cabinet, this expensive-looking receiver will harmonize with practically any furnishings. Extremely selective as well as powerful. Separates close-together stations with knife-edge accuracy. Has big, easy-to-read airplane type dial. Tone control is continuously variable throughout entire range. Broadcast band coverage, 540 to 1600 kc. Improved circuit AC-DC superhet chassis has 6 tubes, two of which are dual-purpose tubes. Powerful "Large Area" permanent magnet dynamic speaker gives exceptionally fine reproduction over a wide tone range. Phantom Scope Antenna built inside case is a specially designed and integral part of the famous Arvin Phantom Antenna system. This built-in antenna gives outstanding pick-up and almost unlimited range of reception. Radio plays anywhere it is plugged in without bothersome aerial or ground connections. Tubes: 1-12SA7, 2-12SK7, 1-12SQ7, 1-35L6GT, 1-35Z5GT. Size: $14\frac{1}{2}'' \times 8\frac{1}{4}'' \times 8\frac{1}{4}''$. For 105-120 Volts AC or DC.

For Performance RADIOS for 1941

Arvin Model 722

6 Tube AC-DC Superhet

Has Built-in Loop Antenna

Packed with outstanding quality from the beautifully designed plastic cabinet to the powerful superheterodyne chassis. The cabinet is attractively finished both front and back. May be set anywhere in a room—no need to keep its back against a wall. Cabinet has convenient built-in handle for easy moving. Available in either Ivory or Walnut finish plastic cabinet. Big, easy-to-read airplane-type dial. AC-DC superhet chassis has 6 tubes. Two dual-purpose tubes in improved superheterodyne circuit gives performance that equals many 8-tube sets. High selectivity allows knife-edge separation of close-together stations. Band coverage ranges from 540 to 1600 kc. Continuously variable tone control and powerful "large-area" permanent magnet speaker give fine reproduction over wide tone range. Famous Arvin Built-In Phantom Scope Antenna give unusual pick-up and almost unlimited range of reception. Radio plays anywhere it is plugged in, without aerial or ground connections. Size, $12\frac{3}{4}" \times 7\frac{1}{4}" \times 7\frac{1}{4}"$. Tubes: 1-12SA7, 2-12SK7, 1-12SQ7, 1-35L6GT, 1-35Z5GT. For 105-120 Volts AC or DC.

Has Built-in Loop Antenna

A compact, beautifully styled receiver that features high-quality performance. This model is an unusual value at the present low price. Simple flowing lines of modernistic plastic cabinet blend well in any surroundings. Powerful AC-DC superheterodyne chassis has 5 tubes, 12SA7, 12SQ7, 12SK7, 50L6GT, 35Z5GT. Improved superheterodyne circuit with 2 dual-purpose tubes gives performance equivalent to many 7-tube radios. Full coverage of broadcast band from 540 to 1600 kc. Airplane-type dial is large and easy to read. Has long-life light. Interference between stations close together on the dial is completely shut out by the quadruple tuned I. F. amplifier that provides hair-line selectivity. Equipped with Phantom Scope Built-In Antenna for instant operation anywhere it is plugged in—eliminates ground and aerial connections. Connection on back of loop antenna permits convenient use of outside aerial when extra distance is desired. Rich, clear tone produced by high sensitivity electromagnetic speaker. Size: $11\frac{1}{4}" \times 9\frac{1}{4}" \times 6\frac{1}{4}"$. For 105-120 Volts AC or DC operation. Complete with Tubes.

Has Built-in Loop Antenna

Impressive selectivity of tuning and clear, full-tone reproduction—qualities usually found only in large, expensive radios—are built in to this compact 5 tube superheterodyne receiver. An amazing value at the present low price. Convenient small size makes it easy to move from room to room. Simple, elegant design fits in well in any surroundings. Plug in anywhere—no fussing with aerial or ground connections. Custom-built antenna is especially designed for fine performance. Knife-edge tuning selectivity with quadruple tuned I. F. amplifier. Has 5 tubes. Two dual-purpose tubes give performance equal to many 7-tube radios. Beautiful unbreakable cabinet, is available in either Walnut or Ivory finish. Large airplane type dial is easy to read. Covers broadcast band from 540 to 1600 kc. Rich, clear tone quality with electrodynamic speaker. Underwriters' Approved. Size: $7\frac{1}{2}" \times 5\frac{1}{2}" \times 4\frac{1}{2}"$. Tubes: 12SA7, 12SK7, 12SQ7, 50L6GT, 35Z5GT. For 105-120 Volts AC-DC Operation. Complete with Tubes.

ARVIN DeLuxe 5 Tube AC-DC Superhet

Has Built-in Loop Antenna

Truly a deluxe receiver both in style and performance. The handsome rubbed Walnut wood cabinet is designed to combine graceful, flowing lines with a massive, expensive-looking appearance. The rich sheen of walnut blends well with any type of home furnishings. Reproduces all music and voices with true fidelity. High-quality performance guaranteed by 5-tube chassis which includes power rectifier and 2 dual-purpose tubes. Full broadcast band coverage, from 540 to 1600 kc. Power output of 2 watts brings in distant stations without distortion. Perfect selection of close-together stations with quadruple tuned I. F. amplifier. No aerial or ground connections needed. Simply plug in, and Arvin Phantom Scope Built-In Antenna does the rest. Convenient connection for outside aerial when extra distance is desired. High sensitivity electromagnetic speaker. Oblong airplane type dial is beautifully ornamented, easy to read, and equipped with long-life light. Size of cabinet: $12\frac{1}{4}" \times 8\frac{1}{2}" \times 6\frac{1}{4}"$. Tubes: 12SA7, 12SQ7, 12SK7, 50L6GT, 35Z5GT.

Increased Brilliance • Low Operating Cost • Cool Light

The Fluorescent Units listed here will meet the needs for practically all types of installations in stores, factories, offices, etc. They provide better light than ever before available at savings of 50% and more in operating cost. The prices quoted here assure you of the best values for your money. Guaranteed lasting satisfactory service. Fixtures shown are particularly desirable for the radio shop and store. The pleasing attractive lighting effects will improve your working conditions and build your prestige with your customers.

Each unit comes completely assembled and wired, with all auxiliaries, ready for use. Easy to install, any radio serviceman can quickly make a proper installation. Fluorescent lamps are not included at prices quoted for fixtures. The lamps must be purchased separately. Lamps are available in seven brilliant colors—Daylight, White, Blue, Green, Pink, Red and Gold. Daylight lamps are used in most installations. However, lamps of different colors are interchangeable thus insuring that you can meet any lighting requirement.

Universal Mounting

A Wider distribution of light for concealed or exposed illumination. Metal case and flat reflector in satin aluminum finish. Convenient screw mounting holes in top and sides and $\frac{1}{4}$ " pipe knockouts (3 in the top and 1 on each end)—allow fixture to be mounted in any convenient manner—either singly or ganged. Completely wired with auxiliary and separately replaceable starter switch. No lamp included. 2" wide, 1 $\frac{1}{2}$ " deep.

Novelties and Necessities

Knapp Natural-Angle Shaver

Speedster Model
D18601—List Price, \$6.00. **\$3.25**
YOUR PRICE

The comfort and convenience of dry shaving at a price every man can afford. Two in one shearing head fits every face and makes every face feel fit. Has two sizes of slots to fit both coarse and fine beards. Self-honing—always stays keen and sharp. Famous Knapp Natural-Angle Head means easier, smoother shaves right from the start. No experimenting or painful breaking-in period. Nothing new to learn. Super speed motor moves cutting edges so fast they can't jerk, pull or skip over whiskers. Motor makes 7200 strokes per minute. No oiling needed. Shaver has narrow plastic case with chrome trim. Packed in leather pouch. Detachable cord. 110-120 volt AC only.

DeLux Model

D18500—List Price, \$10.00. **\$6.50**
YOUR PRICE, Each

Simplest, most convenient electric shaver ever made. Shaves quicker and closer without danger of skin burn. No lather, no new awkward shaving positions to learn, no difficulty with any type of beard. Exclusive Knapp Natural-Angle feature allows shaver to be held just like blade razor. Unique two-in-one shearing head equipped with No. 9 cutters for fine beards and No. 11 cutters for coarse beards. Does a perfect job on any face. Powerful universal triple-pole motor receives 3 separate power impulses per revolution, and has speed of 7200 revolutions per minute. Shaver has black plastic case trimmed with chromium. Shaped to fit the hand. Packed in sturdy steel case covered with Fabrikoid. Detachable cord. Underwriters' Listed. 110 volts AC-DC.

The Yankee Clipper

Brings back the exciting romance of the days when the Yankee Clippers were true princes on the Seven Seas. Ideal for den, study, living room or bedroom. Men like its nautical atmosphere, women appreciate its attractive appearance. The hull is shaped of selected solid wood in hand rubbed Walnut or Swedish Modern finish. Sails, masts, flags, bowsprit and miniature fittings are highly chrome plated. 4" dia. Clock framed in ship's wheel has accurate self-starting Sessions electric movement. 18 1/2" high, 18 1/2" long, 11 1/2" deep. 60 cy. AC. D18507—Swedish Modern Finish. D18506—Walnut Finish. Pennwood Numechrom Electric Clocks—"Time at a Glance"

The Zephyr

Classic beauty translated into a brilliantly modern design makes the Pennwood "Zephyr" a timepiece of unusual distinction. Styled to harmonize with the finest of interior decorating. Equally appropriate for drawing room, library or an executive's desk. Rich Walnut wood case, hand rubbed to a lustrous finish. Large, easy-to-read numerals give "Time at a Glance" correct to minute and second. No old-fashioned dial, no need to search for hour, minute and second hands. 10 1/2" long, 4" high and 4" deep. D18535—List Price, \$8.95. **\$5.40**
YOUR PRICE, Each

The Petite

Startlingly new and different modern design. Streamlined, irregular shape suggests the furniture of the future. Pennwood "Time at a Glance" features 5 styles of plastic finishes with bases trimmed in gold. Size: 5 1/2" long, 3 1/2" high, 3 1/2" deep. D18538—Walnut bakelite. D18537—Black bakelite. List Price, \$2.95. **\$2.23**
YOUR PRICE, Each

The Moderne

Another Pennwood version of up-to-date clock style. Double-purpose design—can be used as book end on table top or desk. Simple combination of straight lines and rounded corners fits in any modern room. Accurate "Time at a Glance," with easily legible black-on-white numerals. Book end and base of clock are dark red. Body available in 3 plastic finishes. Metal trim in polished Gold finish. Size, 5 1/2" long, 3 1/2" high, 2 1/2" deep. D18541—Mottled Walnut Tenite. D18542—Ivory Tenite. D18543—Hunter's Green Tenite. List Price, \$4.95. **\$3.35**
YOUR PRICE, Each

The Arcturus

Designed for discriminating people who want a modern timepiece that has dignity and elegance. Compact enough for a desk top or shelf, yet its simple lines and rich wood case give the impression of massiveness. "Time at a Glance" numerals give correct hour, minute and second instantly. Suitable for a busy executive's desk or for any well-furnished home. Reliable self-starting Pennwood electric movement. Handsome Walnut wood case with the rich sheen that only hand rubbing can give. Size overall 7 1/2" long, 4" high, 4" deep. An unusual gift. D18544—List, \$7.95. **\$4.75**
YOUR PRICE

Sparklet Syphons and Aerator

Sparklets provide a never-failing supply of sparkling club soda for highballs and other tall drinks—charged water for a home soda fountain that makes delicious sodas—a kitchen helper that beats eggs and whips cream. Just put plain water in a Sparklet, insert charging bulb, and you have a quart of charged water. Sparklets are foolproof and safe to operate—easy to use, easy to clean—a dependable, economical accessory for the modern home.

C Sparklet Aerator

A new kind of household accessory. Can be used either as a syphon for making club soda or as an aerator to whip cream, beat eggs, mix waffles and do a number of other kitchen chores. Full quart capacity. Has large, convenient mouth and simple method of charging. When used as aerator for whipping or mixing contents can be discharged without removing head because of absence of syphon tube. Body is stainless steel. 3 Bulbs included. List, \$5.95. D18579—Red Head. D18580—Black Head. **\$4.25**
YOUR PRICE, Ea.

A Standard Model

Finished in highly polished heavy chromium plate. Full quart capacity. Has wide mouth for ice cubes, easy cleaning and use of whipping bulbs. Charges through bottom. Lined with pure tin. Complete with 3" bulbs. List, \$5.00. D18576—Red Head. **\$3.57**

Finest Automatic Irons

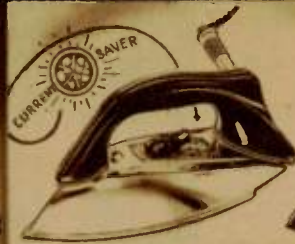

Samson Dial-A-Heat Automatic Iron

D18284—List, \$4.95.
YOUR PRICE.....

\$3.48

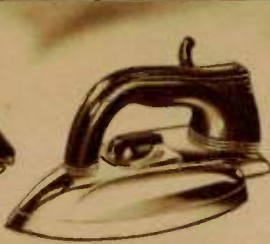

We believe this to be the finest ironing value on the market. Includes every desirable ironing feature, is of highest quality construction yet low in price. Can be set to correct heat for any fabric. Simply turn dial to heat desired—automatic control holds temperature indefinitely. Thin sole plate brings ironing surface only $\frac{1}{8}$ " from nickel chrome element, heating quickly and evenly. Tapered and beveled toe simplifies ironing around buttons, ruffles and pleats. Tearproof heel. Heat dissipating fins make the one-piece bakelite handle always cool and easy to hold. Handle serves as convenient rest. Built-in cord set. 1000 Watts, 110-120 Volt AC operation. Weight, $\frac{3}{4}$ lbs. Underwriters' Listed.

Samson "Magic Eye" Automatic Iron

Light flashes on when iron is plugged in, goes out when correct ironing temperature is reached. Shows when current goes on and off while ironing. Finger-tip control dial automatically selects proper temperature for every fabric. Ironing surface is $\frac{1}{8}$ " from heating element—heats quickly and stays hot. Beveled tapered toe. Air cooled bakelite handle in grained walnut finish. Convenient heel rest. Nickel chrome element embedded in solid steel rock. Approved 7 ft. built-in cord with wire guard. 1000 Watts. For 110-120 volt AC operation. Underwriters' Listed.

Toasters and Coffee Makers

Samson Automatic 2-Slice Pop-Up Toaster

The year's best buy in Automatic Toasters

D18269—List, \$9.95.
YOUR PRICE,
Each

\$6.67

Toasts one or two slices of bread on both sides at the same time, automatically shuts off current and pops toast out when done to just the right color and crispness. Utmost simplicity of operation. Just drop in bread, set for kind of toast desired, press down lever and the toaster takes care of everything else. Tray at bottom catches all crumbs and is easily removed for cleaning. The graceful lines of the lustrous chrome body are enhanced by a richly embossed design. Base and handles of grained walnut bakelite add the proper touch of contrasting color. Equipped with detachable 7' 3" cord for easy access to any outlet. Underwriters' Listed. Operates on 110-120 volts AC only. 800 Watts.

Automatic Electric Toasters

A—Toastswell Automatic

D18374—List, \$9.95. **\$6.88**
YOUR PRICE

Toasts two slices of bread on both sides at the same time to any desired shade. When toast is finished, the toaster returns to low heat and the selective pop-out feature raises toast to any desired height, or leaves the toast in toasting oven to stay hot until ready to serve. "Time Master" automatically lengthens toasting period when toaster is cold. Modernistic lines, triple chrome plated, bakelite handles. Nichrome element with Lava insulation. Size 7 1/2 x 6 1/2 x 4 1/2". 600 Watts. 105-120 volt AC-DC. Includes cord and plug.

Toastswell Automatic Waffle

D18266—List, \$9.95. YOUR PRICE, Each.....\$6.80

Many new exclusive features make this Toastswell Waffle iron of the finest available. This completely automatic waffle iron does everything but make the batter. Has a special thermostatic control that enables anyone to make perfect waffles, without any previous experience, light or dark as desired. Pilot light shining through a ruby jewel shows when to pour in batter and when waffle is completed. When signal light goes out the thermostat automatically shuts off the current, indicating that the baker is ready for more batter or that a waffle is ready to be served. 8" heavy cast aluminum grids with extra outer ring to prevent overflow. Smart new styling with massive square base, streamlined dome and modern etched design. Made of heavy gauge steel, chrome plated. Has black bakelite handles and feet. Size $11\frac{1}{2} \times 15\frac{1}{2} \times 10\frac{1}{2}$ ". 660 Watt nichrome element. For 110-120 volt AC. Complete with detachable cord set.

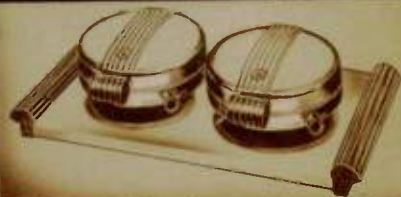

White Cross Twin Waffle

D18267—List, \$8.95. YOUR PRICE, Each.....\$5.95

Beautiful new White Cross twin waffle iron that bakes two full size waffles quickly and evenly throughout. Each grid has heat indicator that tells when to start baking and when waffle is ready to serve. The styling of this attractive home appliance is as modern as tomorrow and as easy to look at as the crisp waffles it makes are delicious to eat. The new square shape is very much in demand because it matches the modern home or adds a smart touch of modernity to more conservative furnishings. Cast aluminum non-stick grids are $5\frac{1}{2} \times 5\frac{1}{2}$ " and require no preparatory treatment or breaking in. Special White Cross oven type nichrome heating elements distribute heat evenly to both top and bottom grids for uniform baking at all times. Full expansion hinges with concealed connecting nickel wires hold waffles firmly and evenly without crushing. Finished in bright durable chrome with walnut colored lifting and side handles. Comes complete with Underwriters' Approved detachable cord set and 660 Watts.

Handyhot Deluxe Automatic Twin Waffle

A De Luxe appliance in every respect, reflecting the modern trend of rich simplicity with full function. Fully automatic, bakes two 6" waffles at one time—or one grid can be used independently of the other if desired. Setting provided for light, medium or dark waffles. Has crystal light indicator which announces when greaseless grids are ready for batter and when waffle is baked, ready to serve. Expansion hinges assure evenly baked waffles. Lustrous non-tarnish chrome finish with natural Walnut wood handles and side rails. 800 Watts. Operates on 110-120 volt AC current only. Underwriters' listed. With twin plug cord set.

Broil King Electric Table Broiler

D18275—List, \$13.50.

YOUR PRICE.....

\$8.85

Broils, toasts, bakes and reheats delicious dishes right at the table. Has cooking area of 125 square inches—enough for eight good-sized chops, a 4 1/2 lb. steak, two broiling chickens (2-5 lbs. each), or 6 slices of toast. Instant direct heat quickly sears outside of food, sealing in all the natural juices and retaining full vitamin content. Has non-chip porcelain enameled drip pan and height wire grill adjustable to two heights. Automatic heat indicator and positive high-low heat regulation eliminate all guesswork. High chromium content heating element is enclosed in a black-glazed chip-proof refractory plate. Element is easily removed for cleaning it and the broiler. Broiler is quickly cleaned by wiping with dish cloth soaked in hot soap suds. Two-piece hinged construction with triple-plated chromium surface. Handsome bakelite trim. Handles and legs are heat-proof. Equipped with detachable cord set and two-heat plug. Rated at 1000 Watts high heat and 450 Watts low heat. 110-125 Volts AC-DC operation. Underwriters' Approved.

YOUR PRICE.....

\$7.95

A cast aluminum electric table broiler made in just a lifetime. Cooks steaks and chops, rare, medium and well done in from 8 to 10 minutes. Serve piping hot right from the circular platter to the plate, right at the table. The heavy cast aluminum top eliminates heat loss and lowers current consumption. Economical for all meats, fish, broasted sandwiches, etc. First aid for the chafé house—always ready for unexpected guests, just bring out the Hollywood Broiler and have a tasty meal ready in 15 minutes. Adds attractiveness to the table. Easy to operate. Results are always good because heat is controlled. So burning or sticking. Broiling rack furnished for the steaks and chops. Other meats broil right on cast aluminum steak platter. All juices collect in three grooves with gravy well at one end. Has air-cooled bakelite feet and handles. For 110-125 volt AC-DC. Furnished with cord and plug set.

Simple in construction, sturdy, removable, aluminum element in the broiler top.

EVERHOT De Luxe Electric Roaster

Cooks a Full Meal at One Time for the Whole Family

Features

- Turn-a-Knob Cover Lifter • 18 quart. (22 lb. Turkey) Capacity
- Adjustable Automatic Temperature Control 150° to 550°
- Heating Element Surrounds Cooking Well • Hi-reflector Rust-proof Hinged Cover • Utensil Elevating Rack • 6 Piece Utensil Set • Built-in Timer on Floor Cabinet.

D18515—A—Everhot De Luxe Electric Roaster. Equipped with large inset pan, rack, drip pan, 6 piece White Vitreous enameled utensil set, recipe book and card set. List Price, \$24.95. **\$16.21**
YOUR PRICE

Cooking the electric way is easier, faster, less laborious and results are surer. With the new Everhot electric roaster anyone with a minimum of experience can prepare an appetizing meal. Everhot saves time and labor and cooks better because it retains all the natural flavor of the food, all the beautiful delicious juices. Roasts, bakes, grills, broils or fries a complete meal for the whole family at one time. Adjustable Thermostatic Temperature Control from 150° to 550° to suit the requirements of practically any type of cooking. Once set temperature is held constantly at any desired level. Signal light shows when heat is on. Heavy insulation keeps heat in, prevents wasted heat or overheated kitchen. End-head heating element surrounds cooking well and guarantees perfect results. Knob Control Cover Lifter. Heat reflecting rustproof cover opens and closes with a slight turn of the cool white bakelite knob on front of roaster. Inspect or remove food without touching cover—no danger of burns or scalds. Cover has adjustable ventilator. 18 quart capacity, large enough to hold a 22 lb. turkey. Accessories included. Removable inner roasting pan, drip pan, adjustable utensil elevating rack, and broiling rack. 6 piece white vitreous enameled utensil set including one open meat pan, 18-10 lb. (10-qt capacity), one 3½ quart covered vegetable pan, and two covered vegetable pans with a total capacity of 3½ quarts. All accessories quickly and easily removed for cleaning. Outside of roaster is finished in colorfast baked white enamel with pearl gray and chrome trim. Oven and inset pans are vitreous enameled. Air cooled bakelite handles. Overall outside dimensions, 23" x 15½" x 12½". Underwriters Approved. 1520 Watts. For 105-125 volt AC operation.

Accessories

D18590—B—Streamlined Cabinet with built-in timer clock. Timer Clock puts roaster into operation at any desired time and turns it off after selected time interval. Cabinet has ample space for all accessories including broiler and griddle. White porcelain enamel finish to match roaster, size 3" high 24" wide 15" deep. List \$11.95.

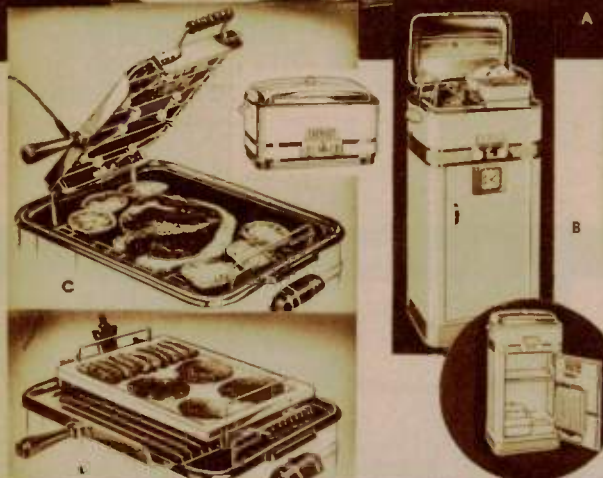

YOUR PRICE \$7.76
←Door fixture holds broiler, leaving extra room in cabinet for utensils and other appliances.

D18591—C—Broiler Attachment. Fits on roaster body in place of cover. Scientifically designed to concentrate heat rays on every inch of broiling surface. 1500 Watt element is easily removed for cleaning. List \$3.45.

Everhot Electric Table Grill

HOTEL-QUALITY BROILING AND FRYING AT LOW COST . . .

An attractive versatile table grill that combines the principal features of the electric stove and electric broiler. Broils, Toasts, Stews or Fries quickly and efficiently. Easily changed for different cooking operations. A complete breakfast or supper can be prepared right at the table so that the hostess can be with her guests and at the same time prepare a tasty, appetizing meal. Quick-sear broiler seals flavor in. Holds a good sized steak or two halves of a spring chicken. Broiler rack is adjustable in height for either thick or thin steaks and chops. Toasts six slices of bread in five minutes from a cold start. Removable broiling pan can be used on top of grill for stewing and quick heating of soups, meats and leftovers. Thick aluminum combination top and griddle does better frying with less grease. Griddle has surplus grease collector and is removable for easy cleaning. Acts as heat reflector during broiling. Makes perfect pancakes, bacon and eggs, etc. Size of griddle, 12" x 14". Grill has beautiful chrome body with walnut handles and feet. Will not mar table top. Two heats obtained by plugging into different terminals. Hinged element has bakelite safety lifting handle. Complete with dark blue removable heater cord. 1500 Watts. For 105-120 volt AC operation.

MAKE EXTRA PROFITS ON THESE AUTOMOTIVE ITEMS EVERYONE NEEDS

DeLuxe Hot Water Heater For All Cars

C18353—Single Blower Unit. As illustrated but without individual (rear) defroster blower fan. Has outlet on side for attaching windshield defroster unit. List, \$16.95. **\$8.15**

C18352 — With Dual Blower Unit. Separate fan drives warm air through the defroster outlets and also directs air to the driver's feet. Defroster attachments are not included. List Price, \$19.95. **\$9.52**

YOUR PRICE.....
Fits any make or model car or truck and floods warm air into all parts of the car. A powerful 6 volt silent running electric motor drives the fan, forcing air under high pressure through the 48 tube 3", 4 row tubular core heating unit. Motor has self-aligning, oil-less bearings. Illuminated glassless rheostat switch controls the speed of the motor to regulate the amount of heat. Entire heater is sturdily constructed and attractively designed. Finished in red-brown crackle enamel. Two adjustable defrosters at front point the heat in any direction. Opening at lower front directs heat to floor. Supplied with all necessary fittings, hose and mounting hardware for quick installation.

Custom Defroster Attachment

We can supply a windshield defroster attachment for either of the above heaters to exactly fit the vents provided in most late model cars (1937, '38, '39 and '40) having entire installation concealed behind dash board. Older type cars not having vents use a universal model with rubber suction cups for exposed attachment to windshield.

FAMOUS GILBERT ERECTOR

REG. U.S. PAT. OFF.

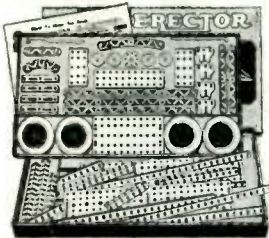

Re-designed—Modernized—Electrified

The World's Greatest Construction Toy

More new things to build than ever before. Erector sets are fast selling because they are the only construction sets that use the square girders that simulate real construction work. They are easy to assemble and any young boy can easily duplicate the many interesting items shown in the "How-to-Make-'Em Book" which is included with each set. These sets help make the boy constructive minded and help him to gain much valuable knowledge in engineering. Packed in attractively colored boxes which also serve as display cases.

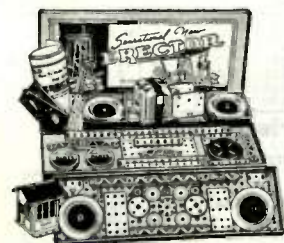

Built With No. 7 1/2 or Over

Model 3 1/2 Erector

D18551—
List Price, \$3.50.
YOUR PRICE
\$2.29

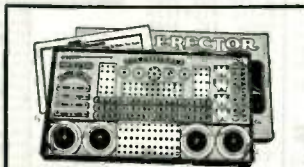

The Intermediate Set. A very fine inexpensive set with a great variety of building possibilities. Will build derricks, walking beam engine, lift bridge, snow remover, trucks, wagons, etc. Includes many new big base plates, a number of various sized angle, curved and straight girders, 4 large and 4 small wheels, shafts and assembling hardware and tools. How-to-Make-'Em Book is also supplied which shows many interesting items that may be duplicated with this set. Packed in attractively colored box, size 18x10x1 1/4".

Model 6 1/2 Erector

D18553—
List Price, \$7.95.
YOUR PRICE
\$5.19

The First Set With Electric Motor that operates on 110 volts 60 cycle AC. Builds airplane ride, windmill pump, airplane house, pile driver, etc. Also includes 4 miniature tender's house, various sized curved, straight and angle girders, large and small base plates, 4 large and many small wheels, shafts, assembling tools, hardware and How-to-Make-'Em Book. Packed in metal cabinet, size 16 1/4 x 8 1/4 x 2 3/4".

Model 2 1/2 Erector

D18550—List, \$2.50. **\$1.64**
YOUR PRICE.....

The Apprentice Set. Has many parts to build a number of things such as ferris wheel, draw bridge, elevator, cranes, etc. Includes 4 big red wheels, small wheels, shafts, curved and straight, long and short girders, base plates and many other small parts, assembling tools and hardware. How-to-Make-'Em Book shows many interesting items that may be easily duplicated with this set. Packed in attractive box, size 18x10 x 1 1/4".

Model 4 1/2 Erector

D18552—
List Price, \$5.00.
YOUR PRICE
\$3.26

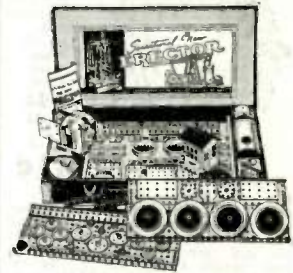

The Set with the Powerful Mechanical Motor. No wires, batteries or transformer are necessary. Builds windmill, bridges, trip hammer, trucks, and many other interesting things that may be easily duplicated from the How-to-Make-'Em Book. Contains various sized curved, straight and angle girders, 4 large and 4 small wheels, shafts, large and small base plates, turret discs, small house, assembling tools and hardware. Packed in hinge cover cardboard box, size 18x10x 2 3/4".

Model 7 1/2 Erector

D18554—
List Price, 10.00.
YOUR PRICE
\$6.54

The Engineer's Set. Builds the walking beam engine illustrated above and also trucks, derricks, etc. Includes electric 110 volt 60 cycle AC motor with gear shift. Operates two movements each of which can be independently started, stopped or reversed. Includes boiler and an increased number of other parts as supplied with No. 6 1/2 Erector. Packed in metal cabinet, size 18 1/2 x 10 1/2 x 2 3/4".

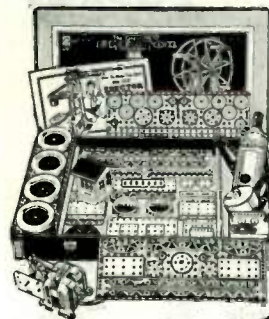

Model 8 1/2 Erector

With Whistle

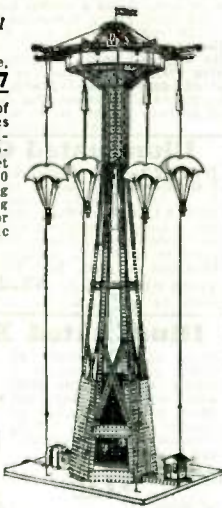

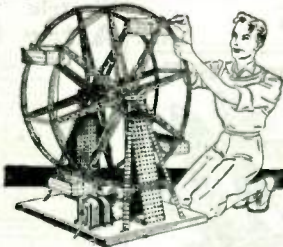

Builds Ferris Wheel
Magnetic Crane

D18555—List Price,
\$12.95.
YOUR PRICE.....**\$8.47**

Builds a great number of electrically operated devices which may easily be duplicated from the How-to-Make-'Em Book. This set features whistle, lights, 110 volt 60 cycle AC reversing electric engine and lifting magnet which is used for constructing magnetic cranes, derricks, etc.

Model 8 1/2 Also includes an increased number of various sized, curved, straight and angle girders, base plates, end plates, shafts and 4 large truck wheels, many small wheels and gears, steam boiler, miniature tender's house, turret discs, assembling hardware, tools, etc. Packed in sturdy metal cabinet, size 20 1/4 x 12 1/4 x 2 3/4".

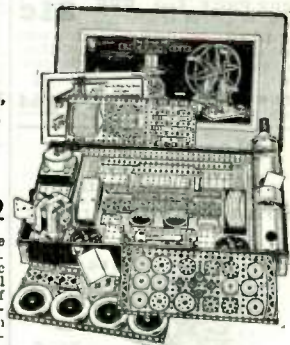

Model 9 1/2 Erector

With Whistle and
Parts to Build
Parachute Jump

Also Builds
Automobiles, Trucks,
Giant Power Plants,
Derricks, Etc.

D18556—
List Price, \$18.95
YOUR PRICE.....**\$12.39**

The Automotive Set. The greatest of all Erector sets. The most complete electric set on the market. Will build a great number of large motor operated devices such as mammoth walking beam engine, elevator, trucks, etc. Includes 110 volt, 60 cycle AC electric engine with reversible gears, electric lifting magnet, auto chassis parts, steam boiler, whistle, giant fly wheel, electric lights, miniature tender's house and a great number of various sized straight, curved, angle, channel and lattice girders, various sized base plates, end plates and shafts, 4 large truck wheels, many small wheels and gears, turret plates, and a large supply of assembling hardware with tools. How-to-Make-'Em Book offers many construction suggestions that are easily duplicated. Packed in colorful, sturdy metal cabinet with hinged cover, size 22 1/4 x 13 1/4 x 2 3/4".

No. 5

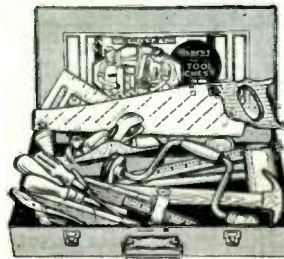

Gilbert Carpenter Tool Chests

All real, quality tools—practical for play or actual carpentry use about the home. Each kit contains all necessary tools to do a good job of carpentry. A sensible gift for the constructive minded lad. Packed in strong steel cabinets. Inexpensive and useful.

Model 5

D18557—List, \$5.00. **\$3.26**
YOUR PRICE.....

An inexpensive outfit containing 15 pieces of better grade tools for the young carpenter. Includes 16" crosscut saw, 7" die cast plane, brace with two jaw screw chuck and many other popular tools. Assembled in blue metal case with brass carrying handle. Size 18 x 10 1/4 x 2 3/4". Wt. 9 1/4 lbs.

Model 10

D18558—List, \$10.00. **\$6.54**
YOUR PRICE.....

The deluxe chest, containing 30 pieces. Includes 16" crosscut and rip saw, scroll saw, chisels, level, 8 1/4" plane, soldering iron, brace with wood augur bits, and many other popular tools. Packed in blue metal case with brass carrying handle and reinforced corners. Size 22 x 13 1/4 x 3". Wt. 19 lbs.

GILBERT SCIENTIFIC TOYS

New Gilbert Chemistry Sets

Newly designed in Gilbert's chemical laboratory in collaboration with one of America's outstanding chemical research laboratories under the direction of Treat B. Johnson, Yale University, Ph. D., a recognized authority on chemistry. These sets are up-

to-date with new chemicals, equipment and apparatus. Experiments as never previously offered in toy sets can be performed. Packed in useful sturdy wood cabinet with hinged doors. Chemicals are conveniently located.

Above—No. 6 Senior Chemistry Laboratory

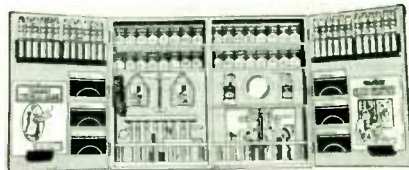

D18559—List Price, \$5.00. **\$3.26**
YOUR PRICE

Imagine making colored fire! Testing foods for their elements! Making sparklers, soda water! Tanning leather!! More than 400 exciting chemical feats can be easily performed with this combination chemistry and glass blowing outfit. Contains 63 pieces of chemicals and apparatus including chemistry and glass blowing manual. Packed in two door blue finished wooden laboratory cabinet with five feet of shelf space and test tube racks. Size 26 1/4 x 2 1/2 x 2 1/4".

Below—No. 15 Master Scientists Chemistry Laboratory

D18560—List Price, \$15.00. **\$9.80**
YOUR PRICE

This unrivaled Chemistry Laboratory is the finest set for the student or young scientists. Performs over 800 experiments. Many of these experiments were never before offered in experimental chemistry and include dry-ice experiments, artificial refrigeration, ethyl gas, lacquers, paints, testing of foods, electro-chemistry, electro plating, electrolysis, etc. Includes new chemicals, apparatus and equipment with four big manuals giving experiments in chemistry, glass blowing, mineralogy and chemical magic. Also includes scales, beaker, flask, alcohol lamp, gas generator, thermometer. Packed in blue finished wooden laboratory cabinet with over nine feet of shelf space and test tube racks. Size 51 1/2 x 14 1/2 x 2 1/4" overall.

Above—No. 10 Inventor's Chemistry Laboratory

D18561—List Price, \$10.00. **\$6.54**
YOUR PRICE

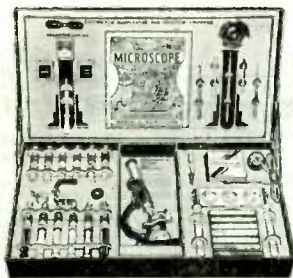

Contains rows and rows of chemicals. With this laboratory outfit you can delve into the wizardry of chemical magic and perform many astonishing experiments. Contains 100 pieces of chemicals and apparatus, including scales and three big books describing over 600 experiments in chemistry, glass blowing and chemical magic. Packed in large blue finished wooden laboratory cabinet with double hinged doors and 7 1/2 feet of shelf space and test tube racks. Articles are conveniently located so that they can be kept in neat order at all times. Size 39 1/4 x 14 1/2 x 2 1/4" overall.

Gilbert Polarizing Microscopes

Open the Door to a New Wonderland of Nature's Hidden Colors

The invisible becomes visible! Startling colors, otherwise invisible, blaze forth under polarized light in gorgeous effects. Stems of plants, fish scales, crystals, wing cases of beetles, sections of minerals, human hair, natural fibers—all are found to have beautiful natural colors. The colors have always been there, but ordinary microscopes do not reveal them—only through a Polarizing Microscope can they be seen. The intermingling play of vivid colors and delicate tints—the rich color patterns produced in plant stems—

are beyond description. They must be seen to be appreciated. The polarizing microscope is one of the most fascinating of optical instruments. It does all that an ordinary microscope does and in addition makes possible the detection of properties and characteristics that could not be done otherwise. Gilbert polarizing microscopes are equipped with a polarizer which fits underneath the stage and an analyzer that is placed over the eyepiece, when these two items are removed it becomes an ordinary microscope.

No. 5 Microscope Set

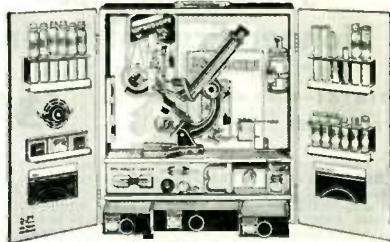

D18562—List Price, \$5.00. **\$3.26**
YOUR PRICE

Contains 38 pieces of apparatus, chemicals, and equipment including microscope, 110 volt sub-stage light, slides, specimens, stains, dissecting kit, large dissecting piece with magnifying lens and an illustrated manual showing how to do 213 experiments. Microscope has high magnifying power of 50, 90 and 210 diameters with rack and pinion focusing. Housed in colorful cardboard box, size 18x10x2 1/4".

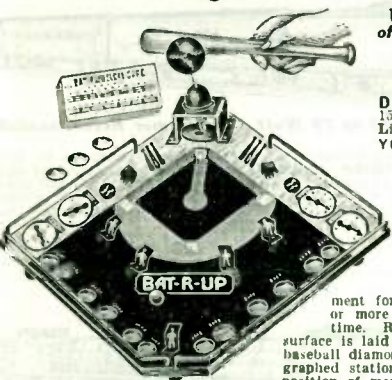

No. 10 Microscope Set

D18563—List, \$10.00. **\$6.54**
YOUR PRICE

A deluxe outfit in wooden cabinet that is really adaptable for advanced work. Contains a professional type microscope equipped with three different objective lenses mounted in turret giving from 95 to 400 power magnification. Microscope has rack and pinion focusing and is equipped with a polarizing device and sub-stage light. Also includes an unusually complete illustrated manual of things to do, 4 piece magnifying unit, dissecting needles, 9 vials of chemicals and stains, prepared slide and extra glass slides, bench microtome, alcohol lamp, adequate supply of specimens, labels, and cover glasses. Cabinet size 14 1/2 x 26 x 3 3/4".

Bat-R-Up Baseball Game

With All the Thrills of a Big League Game
Real Bat and Ball

Action—Skill
Excitement

D18564—No. 100. Size 15x15" with 12" bat. List, \$1.00. **69¢**
YOUR PRICE

D18565—No. 200. Size 18x18" with 15" bat. List, \$2.00. **\$1.39**
YOUR PRICE

A strikingly colored and realistically designed baseball game which will provide many hours of exciting entertainment for the entire family. Two or more persons can play at one time. Radically new, the playing surface is laid out just like a regulation baseball diamond with attractively lithographed stationary metal players taking position of men on the field and formed to catch balls hit directly at them for out-puts and double plays. Provides all the thrilling plays of a regular baseball game.

No Dials to Spin

No dials to spin to get base hits, double plays or putouts. The player uses a real wooden bat to strike a rubber ball mounted on a pivoting device which in turn drives a small rubber ball out into the playing field. A revolving ball carrier enables the player to place the ball in such position so as to skillfully direct his hit between the players and into the holes drilled along the outer edge to indicate various hits and strikes. 3 Metal discs are supplied to serve as bases. Dials are for score keeping of runs, balls, strikes and outs. The diamond is made of an attractively colored 3 plywood panel with guard rail to prevent the ball from leaving it and getting lost. Complete with playing instructions and score card pad for keeping track of runs and innings. Four rubber feet on board prevent marring table surface.

Carron Electric Toy Phonograph

With Acoustic Pickup and Electric Motor

An electric toy phonograph that plays up to 12" records. Just the thing for the children's room or small apartments. Completely self-contained. Has a constant speed, nonetheless synchronous motor for 110 volt, 60 cycle AC operation, eliminating the tedious "winding-up." The acoustical pickup reproduces with good tone and volume. Attractive walnut veneer cabinet with contrasting trim. Size 12 1/2 x 9 1/4". Ship. wt. 5 1/4 lbs.

D15355—Model 504T. List Price, \$6.95. **\$4.38**
YOUR PRICE

Telephone Set

C9963—Set of Two Phones and 70 ft. Single Conductor Wire for covering a distance up to 35 ft. Less batteries. **\$2.65**
YOUR PRICE

Realistic, cradle type metal telephone set, ideal for all inter-communication purposes. Suitable for useful applications as well as for entertainment use. Has clear natural tone. Requires two 1 1/2 volt dry cells at each phone to cover distance up to 750 ft. 4 Dry cells at each phone for distances up to 3000 ft. Only two wires required between phones. Has push button with buzzer at each phone for signaling persons to answer phone.

GILBERT AMERICAN FLYER "O" GAUGE TRAINS

The World's Most Complete Line of Scale Model Trains and Equipment

NEW 3/16" SCALE FOR "O" GAUGE TRACK

American Flyer 1/16" Scale Model Trains combine the size advantages of smaller track gauge trains with the mechanical advantages of "O" gauge train sets. Correctly proportioned and constructed for true railroad realism. Permit extensive track layouts in small space.

Automatic remote control allows operation of locomotive in either direction. Momentary interruption of current throws a relay which reverses direction of train.

Automatic Car Couplers. All American Flyer Trains are equipped with modernized automatic couplers. Cars are brought closer together and coupling or uncoupling is simple and positive in action.

Remote and Manual Control Car Uncoupling. Uncoupling mechanism is built into track section. Uncouples cars as fast as they pass by. Operates only with the new style automatic car couplers, with which all American Flyer Trains are now equipped.

The Following Trains are "O" Gauge
With Remote Control, Automatic Coupling
and Lever Operated Uncoupling.

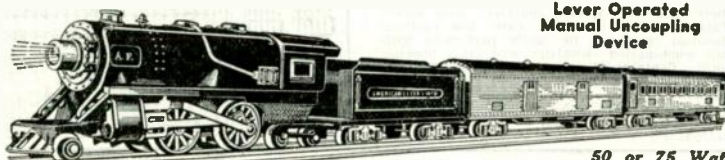

Lever Operated
Manual Uncoupling
Device

2 Car—Steam Type Pioneer Passenger Train

38" Long—19 Pcs.—140" Track

NEW "SAFETY-FIRST" TRANSFORMERS

No. 9B

15 Volt Maximum Output Guards Against Burning Out Operating Equipment

Provides proper voltage for operating electric trains and other electrical toys. Instrument panel shows "Miles Per Hour." Control handle is replica of control used on regular trains. All models except 5 and 6 have built-in circuit breaker with resetting switch which protects the transformer from burning out. Red jewel light indicates when there is a short circuit. Green jewel pilot light indicates when transformer is in proper operation. All models for 105-120 volt, 50-60 cycle AC operation. Underwriter's approved. See train pages for the transformers recommended for the various trains.

No. 9B Twin transformer makes possible operation of trains on separate track layouts at two different rates of speed.

Improved "O" Gauge Design

Improved flexible track for use with other "O" gauge rigid track equipment and trains. Provides many interesting track layouts, with quick removals and alterations. Can be curved in any direction and stays put in place. Consists of multiple track segments mounted on realistic natural wood ties. Strong enough to carry the weight of a 200 lb. man. 10 Foot length is supplied in two pieces, one 4 ft., other 6 feet long.

Track Terminal provides electrical pick-up from rails for operating other track equipment.

Reversible Switch for either left or right turns. Fits "O" gauge track equipment. Automatically sets itself, permitting trains to run in either direction without wrecks. Has lever for manual operation.

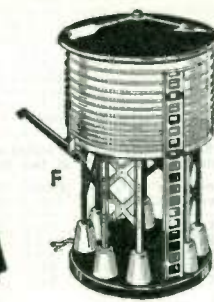

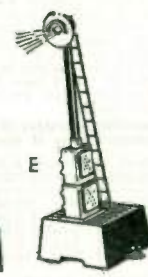

7 1/2 Foot All-Metal Viaduct

Streamline design with track underpass. Comes in seven easily and quickly assembled sections. For use with 10 ft. section of Flex-i-Track. Track is not included.

3/16" Scale Tru-Model Cars

For "O" Gauge Track

Pressed Steel Construction With Automatic Couplers

Completely assembled and finished. Correctly designed and proportioned for Tru-Model railroad realism. Can be used with any of the "O" gauge train sets (except Switcher Freight Train) listed on the preceding pages. Cars are vividly colored in electrically baked-on enamel. All cars have 8 wheels with nickel journal boxes on double trucks. Automatic couplers couple cars close together on either straight or curve track. Equipped with all necessary hand rails, ladders and brake wheels.

D18180—Pt. 478. 7 1/4" Box Car with sliding doors.

D18181—Pt. 486. 6 1/2" Hopper Car with manual control lever operated dumping doors.

D18182—Pt. 480. 7 1/4" Oil Tank Car.

D18183—Pt. 482. 7 1/4" Log Car with six realistic lgs.

List Price, \$2.00.

YOUR PRICE, Each... \$131

FLOODLIGHT CAR

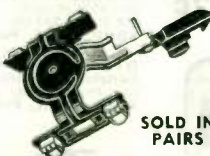

D18184—Pt. 488. 7 1/4" Long. Light turns on swivel base and tilts to any angle. Same 3/8" scale Tru-Model design with automatic couplers as above cars.

List Price, \$3.00.

YOUR PRICE..... \$196

AUTOMATIC COUPLER POSITIVE IN ACTION

SOLD IN PAIRS

New Automatic Couplers

D18082—Pt. 676. For use with "O" gauge track equipment. Converts cars with old style couplers to new, positive action type. Coupler is assembled to truck housing. Wheels and axles are not included. Old wheels and axles easily spring into truck housing. Sold in pairs only.

List Price, 75c.

YOUR PRICE, Per Pair 49c

AUTOMATIC ARMY CAR

D18185—Pt. 472. Automatic Unloading Flat Car with Armored Army Truck. Platform on car swivels and shoots armored army truck down incline by electric push-button remote control. Incorporates same features, design and finish as above cars.

List Price, \$3.95.

YOUR PRICE..... \$259

Gilbert-American Flyer Ho Tru-Model Miniature Trains

Many Outstanding features to bring complete TRU-MODEL Realism to Miniature Railroading

Realism is the keynote of these spectacular miniature trains. Built to miniature scale from railroad blueprints—they are real trains in every detail of actual railroad construction. Smaller size permits elaborate track layouts in small space. Die cast locomotive, tender and cars equipped with bakelite wheels and automatic couplers. Realistic HO gauge 2 rail track with solid drawn rails mounted on roadbed base. Remote Directional Control instantly starts train in forward or reverse direction; separate control box is used for reverse operation. Motor has 20 to 1 gear reduction for greater pulling power. Brass wheels on tender trucks act as current collectors eliminating center rail.

3 Car-HO Gauge N.Y.C. Hudson

Freight Train

Steam Type
31" Long—100" Track
D18100 — Model
HO-103. Less trans-
former. 50 or 75 Watt
transformer recommended.
List, \$19.95.

YOUR PRICE... **\$13.03**

A realistic miniature train incorporating features mentioned above. Consists of: LOCOMOTIVE and TENDER—14" long overall, die cast. Locomotive—14 wheel, 4-6-4 type with lucite headlight and realistic eccentric arm triple action piston rods, side rods and connecting rods. Tender—bunker type with imitation coal and 12 wheels on double trucks. 3 CARS—die cast with 8 wheels on double trucks. Includes 5 1/2" Lehigh New England Gondola, 5 1/2" Merchants Dispatch and 4 1/2"

3.5 mm. Scale
With Electric Remote
Directional Control and Automatic Coupler

3 Car-HO Gauge N.Y.C. Hudson

Passenger Train

Steam Type
42" Long—100" Track
D18173 — Model
HO-104. Less trans-
former. 50 or 75 Watt
transformer recommended.
List, \$22.95.

YOUR PRICE... **\$14.99**

A matching companion to above freight train. Consists of: LOCOMOTIVE and TENDER as described above. 3 CARS, each 9" long, die cast with 8 wheels on double trucks. Includes Baggage-Mail car and 2 Passenger Coaches finished in

3.5 mm. Scale
With Electric Remote
Directional Control and Automatic Coupling

Caboose. COUPLING—automatic on every car. FINISH—locomotive and tender in realistic locomotive black. Cars are colored in baked enamel. TRACK—2 rail HO Gauge. Includes 12—7 1/2" curved track sections forming a circle with 100" track length. Track connection terminal included. CONTROL BOX provides instant directional control of train operation.

green baked-on enamel. Also includes 12—7 1/2" curved track sections, track terminal and remote directional control box as above.

HO TRU-MODEL TRAIN AND CAR KITS

American Flyer kits are extremely easy to assemble. All matching, drilling and tapping has been done—no soldering is required. They can be put together

with ordinary household tools. Each kit is complete with all parts, instructions, correct colored paints, brush and proper decalcomanias.

4 CAR FREIGHT TRAIN KIT

D18111—Model HO-110K. Complete kit to build a N.Y.C. die cast freight train as described in above complete train set except includes 4 cars: Gondola, Refrigerator, Oil Tank Car and Caboose. Armature field, gears and drive wheels are assembled to engine frame. Less transformer and track sections.

3 CAR PASS. TRAIN KIT

D18174—Model HO-111K. Complete kit to build a 3 car N.Y.C. die-cast passenger train as described in above complete train outfit. Less transformer and track sections.

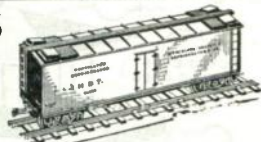

List Price, \$14.95. YOUR PRICE, Either Model, Each..... **\$9.77**

HO CAR KITS

Easy to Assemble

Cars are of die-cast construction exactly similar to those supplied with complete train kits. All necessary parts and paints are supplied.

CROSSOVER

D18114 — Pt. HO-262 Track Crossover at 98° angle. Realistic roadbed base. Size: 10x10". List, \$2.00. YOUR PRICE..... **\$1.31**

TRACK SECTIONS

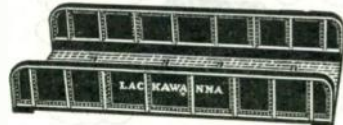

Solid drawn rails mounted on realistic roadbed base. D18112—HO-261—8" Straight D18113—HO-260—8" Curved D18128—HO-263—4" Straight D18128—HO-264—4" Curved List, 40c. YOUR PRICE, Each... **27c**

TRACK SWITCHES

Permits building of many interesting track layouts. Sold only in pairs. D18116—Pt. HO-268. Electrically remote controlled switches with signal lights to show direction of rails. Control box included. List Price, \$10.00. YOUR PRICE, Per Pair..... **\$6.54**

D18115—Pt. HO-265. Manually Operated Switches controlled by hand lever. List Price, \$5.00. YOUR PRICE, Per Pair..... **\$3.27**

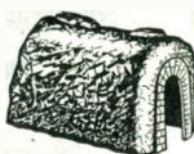

BRIDGE

D18179 — Pt. HO-254. Modern girder type Bridge. Authentically designed and built to correct scale dimensions. Finished in red. List Price, \$1.50. YOUR PRICE..... **98c**

TUNNEL

D18178 — Pt. HO-12. Realistic colored tunnel. Constructed in correct HO Tru-Model proportions. 8" long. List, \$1.00. YOUR PRICE..... **65c**

BLOCK SIGNAL

D18077—Pt. HO-252. Block Signal mounted on rugged base. Permits one train to follow another on a single track without danger of collision. Equipped with ladder. Lights show Red and Green. Electrically operated. List Price, \$3.95. YOUR PRICE..... **\$2.59**

SIGNAL TOWER

D18076 — Pt. HO-256. Signal Tower with stairs. Top floor has electric light. Brilliantly colored. Die cast. List Price, \$2.95. YOUR PRICE..... **\$1.93**

PASSENGER AND FREIGHT STATION

D18075 — Pt. HO-258. Combination Station. Freight section has raised platform and sliding door. Regulation bay window ticket office. Station mounted on raised platform and illuminated with one light. List Price, \$2.95. YOUR PRICE..... **\$1.93**

Popular Amateur Equipment

Premax VR136 Vertical Antenna

For 20 Meters

Easily erected on any flat surface. Requires no guide wires for support. Six telescopic sections adjustable from 7 to 34 ft. Locking clamps provide positive contact between all sections. Made of high tensile copper-nickel-steel tubing, heavily cadmium plated for high RF conductivity and weather resistance. Bottom tube is 1 1/2" dia., top 3/4" dia. Heavy duty lapp insulator with mounting bracket.

D16958—Vertical Antenna. Includes 136M mast and IP-44 insulator as illustrated. Ship. wt., 29 lbs. **YOUR PRICE.....\$17⁶⁴**

For 10 Meters

C16959—Model 318M. Consists of 3 section telescopic mast adjustable from 8 to 17 ft. Construction and finish similar to above. Bottom section is 3/4" dia., top 1/2". No insulator supplied. **YOUR PRICE.....\$4⁴¹**

Porcelain Insulators with Mounting Bracket for 318M Mast

D16960—Model 2P-24. For mounting on horizontal surfaces. **YOUR PRICE.....\$2⁹⁴**

D16961—Model 2-WP. Wall mount. For mounting on vertical surfaces. Ship. wt. 5 lbs. **YOUR PRICE.....\$4⁴¹**

D16962—Model 318DP. For wall mounting, a center fed vertical. Requires two 318M masts. Ship. wt., 14 lbs. **YOUR PRICE.....\$6⁶¹**

Premax Rotomount

A rope pull operated turntable which will support the largest rotary beam antennas. Revolves 1 1/2 revolutions in either direction. Heavy gauge black enameled steel construction. Equipped with stranded copper cable leads from pulley but no rope. Platform size, 9x12".

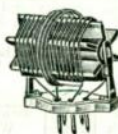

Premax Rotary Beam Antenna Elements

The Premax Rotary Beam Elements listed below are adaptable to almost any of the beam antenna developments that have or will appear in the leading handbooks and periodicals. Made of special cadmium plated steel, reinforced by corrugations for stiffness and light weight. The 2, 3 and 4 section type are telescopic, adjustable to any length down to approximately 5 feet. Sold only in pairs. "Hairpin" tuning bar for determining proper length is included.

Coto Pee-Wee Coils

For power inputs up to 100 watts. Wound on skeleton form of low loss slotted Steatite. Length 2 1/4". Dia. 1 3/4". Link types are not variable. Steatite base fits standard 5 prong socket. Capacity required varies from 30 mmfd. on 10 meters to 140 mmfd. on 160. 140 mmfd. Variable condenser will tune all coils.

Bud Bandswitch Coils

Covers 10, 20, 40, 80, 160 Meter Bands

D13495 — For capacity coupled oscillator and buffer stages with inputs up to 50 watts. Isolantite insulated band switch. A 100 mmfd. cond. tunes all bands. Inst. and dial plate inc. **YOUR PRICE.....\$3²³**
D13496 — C. T. center linked band switch assembles similar to above. For use in PP grid or plate circuits or single ended plate neutralized circuits. **YOUR PRICE.....\$5²⁹**
D13497—Identical to above but handles up to 100 Watts. **YOUR PRICE.....\$5⁸⁸**

Wood Tower

D16992—Model WT100. For roof mounting any beam antenna, etc. Tower is 10 feet high, 24" sq. at base and 9" at top. Thoroughly reinforced. Cut, drilled and painted ready to set up. Bolts included. Net wt. 40 lbs. **YOUR PRICE.....\$13²³**

Mobile Antennas

For amateur, police, marine and other commercial applications. Designed for rough usage coupled with efficient, dependable performance.

Antenna Rods

Multiple solid rod sections are of varying diameters for tapering effect. Non-telescopic. Very flexible. Supplied in cadmium plated steel or polished stainless steel. Plain bottom end, 1/4" in diameter.

C13450—Type C1-21—Suited for 80, 40 and 20 meter bands. Rated 600 Ma. continuous. 1.1 Mh. 8 ohms. Size, 3 1/2"x1 1/2". With vertical mounting bracket. **YOUR PRICE.....73c**

C13498—Type C1-20. As above but for 160, 80 and 40 meter bands. 3.6 Mh. 11 Ohms. **YOUR PRICE. Either Type....73c**

Coto-Coil Lo-Loss Transmitting Coils

Highly efficient plug-in type transmitting coils. Rigid construction with heavy copper wire wound on slotted Cellulose Acetate ribs with the turns securely locked with lo-loss cement. All coils are fitted with plugs for rapid coil change. Type "TV" and "BT" are for use in capacity coupled circuits. Type "TL" and "BTL" have center fixed link adjusted for highest efficiency. Type "TVL" and "BTVL" have center variable link allowing adjustment of coupling to obtain variations in power output. All link coils are center-tapped, and can be used in single or push pull stacks. All coils tune with a 35 mmfd. condenser, except 160 meter type requiring 75 mmfd. Coils are supplied without mounting base.

1 Kw. Coils

160 Meter coils wound with #12 wire, others with #10 wire. Base 8" long.

Plate Supply Transformers

DC Voltage ratings are from a two section filter and include voltage drop through rectifier tubes. All have electrostatic shielding between primary and secondary windings. Secondaries are center tapped. Primaries for 105-120 volt, 50-60 cycle AC operation and tapped for voltage variation adjustment.

*Has 30 Volt Bias Tap. †Designed for double rectifier, will deliver both ratings simultaneously. ‡Has Filament Windings: 5 Volts at 3 Amps., 6.3 Volts at 3 Amps. Ct., 7.5 Volts at 2.5 Amps. Ct.

Low Level Matching Transformers

Only the most popular types are listed here. A complete line to fit all applications is available, write us of your needs. Transformers are specially wound to give very low leakage reactance and provide best frequency response.

Low Impedance Source (Microphone, Line, Mixer) to Grid

Multi-Match Driver Transformers

Variable ratios on each transformer permit this series to handle all driver transformer requirements usually encountered in amateur circuits. C.H.T. Series are especially recommended for high quality installations. Have Plug-In Jack Terminals Board for quick and accurate matching without soldering. Completely protected against varying climatic conditions.

Keys-Crystals-Relays FOR THE AMATEUR

Junior

Martin Flash Keys

Semi-automatic transmitting instruments. All models feature perfect control, easy adjustment, new high speeds and durability. Simple to operate. Unconditionally guaranteed. Left hand keys \$2.00 extra.

Model 1. For the professional or advanced amateur operator. Reliable single action, easily adjusted for any speed. Heavy coin silver contacts. Closing circuit switch. Split pendulum weight. Base size, 6"x 3 1/2"x 1/2". Weight, 3 1/2 lbs. With cord as illustrated.

D9482—Black crackle finish. \$10.29

D9483—Chrome finish. \$11.71

D9484—Junior Model. Has all features of professional model but is smaller and lighter in construction. Base size, 6"x 2 1/2"x 1/2". Black crackle finish. Cord not supplied. **\$8.08**

D9485—Amateur Model. An outstanding value. Now every amateur can own a Martin Flash Key. Similar in appearance to Junior model. Base size, 6"x 3 1/2"x 1/2". Black crackle finish. Weight, 2 lbs. **\$5.15**

McElroy Speed Keys

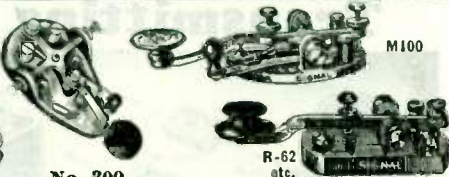

Quality semi-automatic transmitting keys. Built by T. R. McElroy, world champion telegrapher. Professional Mac Key, Model P500. Conforms with U.S. Navy specification for "Speed Key." Smooth, easy operation; perfect sending. Moving parts are chrome-plated brass. 3/4" silver contacts. Patented dot stabilizer. Bakelite insulation. Circuit closing switch. Parkerized base casting and super-structure are black crackle finished. Net weight, 4 1/2 lbs. Heavy enough to stay in position. Mac recommends one paddle which is mounted on key. Extra paddle included for those who prefer two.

D9475—Base size, 3"x 6 1/2"x 1/2". \$7.50

D9477—Net weight, 4 lbs. \$9.50

Super streamspeed. Model S609SC. The most attractive semi-automatic key made. The streamlined base and all metal parts are finished in polished chrome. Mechanically perfect, the rhythmic dots and dashes are easily received. Feather touch operation permits long periods of sending without fatigue. 3/4" coin silver contacts. Beryllium copper main and U spring. Coil springs, bearings and pins of finest stainless steel. Truly Mac's masterpiece.

D9477—Net weight, 4 lbs. \$9.50

No. 300

Signal Straight Keys

D9486—Model M100. Designed for skilled operators. Dual adjustments for tension and lever action. Platinor contacts. Lacquered brass base, nickel plated parts. With circuit switch. **\$175**

D9487—R48. Less circuit switch. \$165

YOUR PRICE.

Standard Keys

Heavy rectangular cast base. Stays in place. All parts brass with lacquer finish. Navy type key knob. **D9488—R62. 3/4" Contacts. \$206**

D9489—R63. 1/2" Contacts. \$212

D9490—R64. 3/8" Contacts. \$227

D9491—Model R50. Similar to above types. Heavy black crackle finished cast base. Coin silver contacts. Nickel plated parts. \$88c

YOUR PRICE.

McElroy Straight Keys

D9478—Streamline DeLuxe Model 300. The cast streamlined base and all metal parts are finished in polished chrome. Bronze bearing screws, finely balanced key lever, heavy 3/4" contacts. Has circuit closing switch. **\$285**

D9479—As above but with black plastic base and less circuit closing switch. \$100

YOUR PRICE.

Hi-Power Frequency Control Crystals

Designed to give peak performance in amateur bands, featuring high activity, high efficiency and low drift. Precision ground highest grade, selected quality Brazilian quartz crystal mounted in round bakelite holder, 1 1/2"x 1/2". Fits 5 prong socket or Amphenol Crystal socket. Face plate is stamped with exact frequency of crystal. Available in two types:

The "Ruby." Temperature coefficient of 4 cycles or less per MC per degree centigrade. Alumilite contact electrodes with extremely hard, polished surface.

The "Emerald." Temperature coefficient of 10 cycles or less per MC per degree centigrade. Nickel silver electrodes insure excellent contact.

The Emerald

The Ruby

Unmounted Crystal

Similar to "Emerald" type. Size, 1" sq. Specify frequency.

Crystal Holder

Type AH C9504—PRICE \$1.00

Stock Num.	For Band Meters	± KC	Mfg. Type	Your Price
C9500	160	10	AH10	\$2.35
C9501	160	1	AH10	3.25
C9502	80	10	AH10	2.35
C9503	80	1	AH10	3.25

Square molded bakelite plug-in type holder for 160 and 80 meter crystals up to 1" square. Nickel silver electrodes. Fits 5 prong socket.

McElroy Audio Oscillator

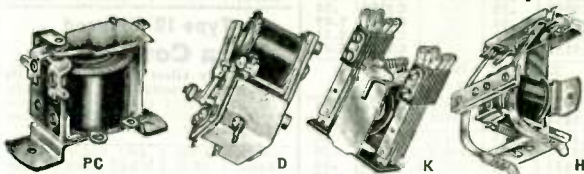

A high quality practice oscillator at an exceptionally low price. Built by T. R. McElroy, world champion telegrapher, the user is assured of perfect clean tone. Its provisions for connecting key and headphones. Operated direct from the 110 volt AC or DC line. Requires only one 117LGT tube. Tube socket is located on top of attractive black plastic case. Highly recommended for schools, clubs as well as individual use. Regardless of how much you pay, you cannot get a better oscillator.

D9480—Less tube. \$285

D1155—117LGT Sylvania tube for above. \$113

YOUR PRICE.

Allied Transmitter and Industrial Relays

Type PC. High quality, compact relays having a multitude of applications. Especially suited for remote control of electrical equipment, amateur uses, etc. Size, 2 1/4"x 1 1/2"x 1/2" high. Top movement insulated from base. SPDT switch action contacts rated 5 amperes at 125 volts A.C.

C4993—For use in plate circuits of tubes. 2500 Ohm coil closes contact at 8 Ma., opens at 5 Ma. \$97c

C4989—As above but with 5000 ohm coil. \$211

C4990—With 6 volt DC coil. \$92c

D4991—With 6 V. AC coil. \$113

C4992—With 110 V. AC coil. \$123

Radolek can supply Relays for any purpose, either Amateur or Industrial. Send us your order. It will be filled at Lowest Prices.

Type D. Contacts rated at 10 amps. 125 volts A.C. Vacuum impregnated layer wound coils. D.P.D.T. switch action. For antenna transfer, filament control, dynamotor starting, etc.

D4950—With 6 V. AC coil. \$245

D4951—With 110 V. AC coil. \$245

D4955—With 6 V. AC coil. \$319

D4956—With 110 V. AC coil. \$319

YOUR PRICE.

Gordon Heavy Duty R.F. Relays

D4957—1 Kw. D.P.D.T. Heavy Duty Relay. \$882

High power D.P.D.T. relay which will handle one kilowatt easily. Ideal for antenna changeover, multi-band transmitter tank switching, beam antennas and 60 cycle power switching. Insulation is low-loss Alslmag 100, the finest of all ceramic insulators. Losses are negligible even at 10 Mc. Has husky 3/4" coin silver, self wiping contacts. Switch action has a 4 lb. pull which makes positive contact instantly. All contacts spaced 1/4" apart to eliminate capacity effects and to guard against high potential flash-overs. Actuated by 110 volt, 50-60 cycle solenoid coil. Practically hum-free. Absolutely no contact chatter or bounce. Size, 4 1/2"x 5 1/2"x 3".

Amphenol Crystal Socket

An ultra-low-loss socket for use with crystals mounted in standard holders. Molded from transparent polystyrene. Takes the place of 5 contact socket usually used.

D12185—YOUR PRICE. \$18c

CORNELL

DUBILIER

Transmitting

Condensers

Types 4 and 9 Mica Condensers

Best grade India mica dielectric and non-magnetic foil provides high break-down voltage, low power factor and reduces losses. Moulded bakelite case. Accuracy $\pm 10\%$. Also available in low loss bakelite and higher tolerances at slightly higher prices.

Type 86 High Voltage Mica Condensers

Particularly suited for high frequency transmitting work. Special mica stack eliminates corona losses. Vacuum impregnation and best grade India ruby mica dielectric. Glazed porcelain case. Size: 2 1/4" high, 2 1/4" deep, 3 1/4" Mtg. Ctr.

High Voltage Dykanol Condensers

Dykanol Filled—Dykanol Impregnated—Fire Proof

Filled and impregnated with a dielectric material having characteristics far superior to wax, tar, oil, etc. Extraordinary low power factor and high insulation resistance. Dykanol is non-inflammable, non-oxidizable and has no flash or fire point. Purest aluminum foil and best grade multi-laminated

Kraft tissue are used. Glazed terminal insulators; bakelite insulators used on lower voltage types. Mounted in hermetically sealed aluminum containers insulated from the condenser (except stud mounting type). Conservatively rated; may be safely operated continuously at 10% above rated voltages.

Designed for
Intermittent
Use of 20
3 Second Starts
Per Hour

For use on 105-120 volt 50-60 cycle AC only. Dry Electrolytic condensers designed to exactly replace the original unit used for starting of Refrigerators and other motor driven equipment. The correct replacement condenser for practically any Electric Refrigerator made can be selected by referring to the illustrations at left and the listing given below. A replacement guide is included with each condenser or sent separately on request.

TRANSMITTING RECEIVING

Variable Condensers

Universal Replacement Variable Condensers

With Shaft Out of Both Ends and With Reversible Trimmers

Tuned Radio Frequency type for replacement or new work. Tuning shaft out of both ends permits either clockwise or counter clockwise rotation by simply reversing the position of the condenser. Removable trimmers can be attached to long or short side.

Heavy aluminum plates. High end shields. Ball bearing races. Frames are steel, cadmium plated. Compact Size. End plates 2 1/2" x 3 1/2". Length: 2 section 2 1/2", 3 section 3 1/2", 3/4" diam., 1" long shafts. Capacity of each section is 375 Mmfd. maximum, 15 Mmfd. minimum.

C8954—2 Gang. **\$1.21** C8956—3 Gang. **\$1.81**

YOUR PRICE

Cardwell Transmitting Condensers

Midway Featherweight

For low and medium power transmitters and receivers where light weight and small space are factors. Ideal for portable and aircraft equipment. Panel mounting space only 2 1/2" x 3" condenser open. 1/4" Shaft; aluminum frame; brass bearings. Supplied with aluminum mounting feet. G.E. Mylex insulation.

D13574—Ceramic.	Net 26c

AUTOMATIC PUSH-BUTTON TUNERS

Push a button—there's your station—tuned in automatically and perfectly. No knob twisting, twirling or waiting. Station is tuned in immediately as button is depressed. No motor is used. Tuner is not affected by receiver dial setting.

C10990—6 Push Buttons. List, \$3.50. **\$2.35**

YOUR PRICE..

A compact trimmer condenser unit for use with superhet receivers. Simple connections. Supplied complete with escutcheon, call letters, knobs and instructions. C9680—Special antenna coil for use with above, required on radios having preselector stage using 3 gang condenser. **55c**

REPLACE- MENT Coils For Every Service Need

Meissner Phono Oscillator Coil

With this coil and other components anyone can construct either a "wireless" or a direct-connected, phonograph oscillator to permit the reproduction of recordings through any radio set without altering the receiver. May be incorporated either in the receiver or with the record player. Tuning knob on top of coil makes it possible to tune the oscillator to any point in the broadcast band which is clear of interference. Coil is thoroughly impregnated against moisture. Black crackle finished shield can, 1 1/2" sq. x 3 1/2" high. Complete instructions and diagram for building a "Wireless" record player included. C9788—List, \$2.50.
YOUR PRICE \$1.47

Popular Coil Replacements

A Exactly duplicate original coil. Wherever coil is complete with trimmers, sliders etc. it is referred to as an assembly; otherwise coil only is furnished. **B** Coil repair service listed below.

I. F. Transformers In Metal Shield with Double Tuning Condensers

For use as replacements or in new set design. Can be used in any combination required for the I. F. stages. The tuning condensers are of the mica compression type, on Isolantite bases and are adjustable from the top of the shield can. Leads are color coded. Diagram is furnished with each unit. Double Tuned.

New Triple Tuned I. F. Transformers

Greater High Fidelity with Increased Selectivity and Sensitivity.
456 Kc.
C9786—Input.
C9787—Output.
List Price, \$3.00.
YOUR PRICE \$1.32 EACH

Greater High Fidelity reproduction without any sacrifice of sensitivity or selectivity. The selectivity curve has a flat top over practically the entire 10 Kc. range which permits reception over the complete audio range—no cutting of side bands yet positive 10 Kc. separation. One stage of Triple Tuned I. F. gives twice the selectivity of a Double Tuned stage. Triple pole windings are each individually tuned. Adjusting trimmers are at side of shield can. Frequency range variable from 360 to 480 Kc. Easy to install. Metal shield 2" square by 5" high. Spade bolt mounts. Diagram included.

Primary Replacement Windings

For Antenna or R. F. Coils
Slip over type high impedance silk covered enamel wire windings. For replacing burned-out antenna and R. F. primaries. Defective primary section is removed from original coil and primary replacement collar slides in place.

Coil Repair and Renewal Service

Antenna, R. F., I. F., and Oscillator Coils
Guaranteed Performance
In practically every instance the defective coil will be checked against and rebuilt according to the original manufacturer's specifications. This special engineering service insures receiving an exact duplicate of the original. We guarantee that the re-manufactured coil will be returned to you in perfect working condition and with electrical characteristics exactly like the original. Most re-manufactured coils will give performance far superior to the original.

Price List
R. F. Antenna and single section I. F. coils.
KX11959—**YOUR PRICE \$1.45**

Send Defective Coil And Requested Information
Send original defective coil with following information: Receiver name and model, state bands covered, number and types of tubes used, number of sections in gang condenser. If coil is shielded include shield. If the coil you send is identified as a regularly stocked item we will immediately ship an exact duplicate at the lowest dealer price.

Meissner Coils For Replacement and Carron Coils

Meissner Replacement Coils

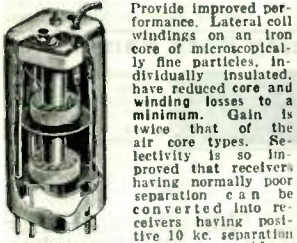

Plastic I. F. Transformers

A compact high quality double tuned I.F. of a new type construction that is not affected by temperature or humidity. Windings are thoroughly impregnated with special low loss compound. Dowel and trimmer bases are of molded plastic. New type "floating" trimmer construction practically eliminates drift. May be peaked at any point within exceptionally wide frequency range. Aluminum can size 1 1/2" square x 2 1/2" high. Mfg. Ctrs. 1 1/2".

Iron Core Ferrocart I.F. Transformer

Provide improved performance. Lateral coil windings on an iron core of microscopically fine particles, individually insulated, have reduced core and winding losses to a minimum. Gain is twice that of the air core types. Selectivity is so improved that receivers having normally poor separation can be converted into receivers having positive 10 kc. separation or better. Only one I.F. in an old receiver need be replaced. In all cases, use of these I.F. transformers as replacement, will give results far superior to those obtained from the original unit. Microphonic noises are eliminated. Gain is doubled. Signal is increased. Complete instructions and recommendations for circuit improvements are included. Complete shielding prevents dust particles, etc., from shorting trimmer condensers. Double tuned mica compensators. Dimensions of shield: 1 1/2" square x 3 1/2" high.

Compact High Impedance Antenna and R.F. Coils

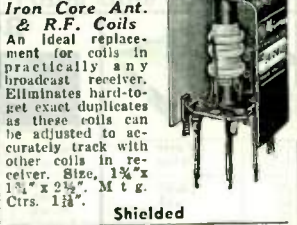

A new series of compact high impedance Litz wound coils. Covers the broadcast band 190-550 meters when used with a .000365 mfd. (.00035) variable condenser. We recommend that a complete set of coils be replaced in a receiver in order to obtain maximum efficiency. Coils are precision machine wound and use the best of materials. Thoroughly impregnated and impervious to moisture. Will efficiently replace the broadcast band coils of practically any receiver. Compact size allows use of these coils in even the smallest set. These coils can be readily substituted for the old Type Enamel Wire Wound Coils and will furnish approximately 20 per cent higher gain and increased selectivity over the broadcast band. Coils are wound on 5/8" dia. forms 1 1/2" long.

Iron Core Ant. & R.F. Coils

New iron core antenna and R.F. coils for use as replacements and for modernization of old radios. The higher gain and increased selectivity of these coils will improve broadcast reception. Iron core and lateral windings on these coils produce a very compact unit.

Designed to cover the broadcast band with a .000365 Mfd. (.350 to 370 Mmfd.) condenser. Size 1 1/2" x 1 1/2" x 2 1/2". Mfg. Ctrs. Complete instructions and recommendations for improving old radios are included. High impedance type.

Hallcrafters RECEIVERS

The New Model SX-24 Skyrider Defiant

A nine tube communication receiver tuning from 540 Kc. to 43.5 mc. in four bands, (540 to 1730 Kc., 1.7 to 5.1 mc., 5 to 15.7 mc., 15.2 to 43.5 Mc.) that offers the amateur many ingenious features and performance found only in higher priced Hallcrafters receivers. The band spread dial is accurately calibrated directly in frequencies for the amateur bands and indicates the exact frequency of the received signal, performing as a high quality frequency meter. The main tuning dial is also directly calibrated and both are translucent illuminated. The "S" meter is very sensitive and is calibrated in both S units and DB's. Selectivity is variable over a wide range in six steps providing for all practical requirements of phone or C.W. from single signal razor sharpness to broad tuned I.F. A double balance bridge circuit using a Biley crystal in a new Hallcrafters low capacity holder rejects unwanted signals even when extremely close to the desired frequency.

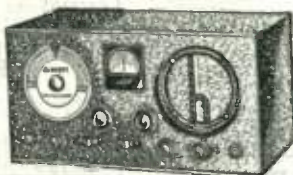

A new type noise limiter is built in reducing man made interference to a new low level on the ultra high frequency bands. Frequency stability is especially high, variations in line voltage cause practically no change in the oscillator frequency. Terminals are also provided on the rear of the chassis for connection to a stand-by relay for break-in operation. 12 Controls on panel as follows: R.F. Gain, Band Switch, Selectivity Switch, Crystal Phasing, Audio Gain, Pitch Control, Main Tuning Control, Bandspread Tuning Control, Tone Control Switch, Automatic Noise Limiter Switch, Send-Receive Switch and BFO Switch. Uses 9 Tubes: 3-6BK7, 1-6K8, 1-6SQ7, 1-6F6G, 1-7B, 1-6H6, and 1-80. Operates on 110-120 volt 50-60 cycle AC current. For battery operation use C18024—Hallcrafters Model SX24 Skyrider Defiant. Complete with tubes and crystal but less speaker. Wt., 56 lbs.

YOUR CASH PRICE..... \$69.50

C18010—The Sky Buddy Model S-19R, including built in Speaker and Tubes.
YOUR CASH PRICE..... \$29.50
Or \$5.90 down and \$2.26 monthly for 12 months.

The new Hallcrafters Sky Buddy covers everything on the air from 44 Mc. to 545 Kc., including the 10, 20, 40, 80 and 160 meter amateur bands. Has sensitivity and selectivity usually found only on communications receivers selling at many times its modest price. Has AF Gain Control; Band Switch; Combined AVC and Beat Oscillator Switch; Phone Jack, Send-Receive Switch; Pitch Control. The speaker is an integral part of the receiver. Bandspread is better than A.R.R.L. Handbook recommendations for bandspread against scale calibration. Equipped for either Doublet or Marconi Antenna. Tube Complement: 1-6K3G, 1-6K7B, 1-6Q7G, 1-7B, 1-80. For 110-120 volt, 50-60 cycle, AC current only. For battery operation use the inverter listed on the preceding page. Size, 17 1/2" x 8 1/2" x 8 1/2". Ship. wt., 20 lbs.

Model 5-10 Meter Skyrider

C18011—Skyrider 5-10 (Model S-21), complete with tubes and speaker.
YOUR CASH PRICE..... \$69.50
Or \$13.90 down and \$5.33 monthly for 12 months.

C18012—SM18 Carrier Level Meter.
YOUR CASH PRICE..... \$10.00
Or \$2.00 down and \$1.50 monthly for 6 months.

This receiver is designed for the amateur who needs and wants the exacting performance required for superior ultra-high frequency reception. The Skyrider 5-10 covers the radio spectrum from 68MC to 27MC in two bands with a degree of sensitivity and selectivity that offers unparalleled reception of the ultra high frequencies. The recently developed RK1852 tube, with a gain increase of 6 to 1, is used as an RF amplifier through which an ultra high frequency sensitivity of better than 1 microvolt is obtained for this receiver. Separate Band Spread Dial. Logging is easy and accurate. Equipped with Inertia Tuning control. 8 Tubes used: 1852, 6L7, 6J5, 6K7, 6P7G, 6F6G, 6H6, 80. Sturdy steel cabinet finished in grey. Size, 18 1/2" x 9 1/2" x 8 1/2". Ship. wt., 34 lbs. For 110-120 volts, 50-60 cycle operation.

Model S-22 Skyrider Marine

C18022—Model S22 Skyrider Marine complete with tubes and speaker. For 110 volt, AC-DC operation.

YOUR CASH PRICE..... \$64.50
Or \$12.90 down and \$4.94 monthly for 12 months.

• 4 Bands—16.2 to 2150 meters (140 Kc. to 18.5 Mc.). • 8 Tubes. • Automatic Volume Control. • Tone Control. • Head Phone Jacks. • Beat Frequency Oscillator. • Individual Coils for Each Band. • Sensitivity Control. • "S" Meter Terminals.

An 8 Tube Superheterodyne for commercial frequencies. Band No. 1—2150 to 645 meters (140 to 465 Kc.). Band No. 2—645 to 199 meters (465 to 1510 Kc.). Band No. 3—177 to 53 meters (1.7 to 5.8 Mc.). Band No. 4—54.5 to 16.2 meters (5.8 to 18.5 Mc.). The Main Tuning Dial is directly calibrated and a separate dial is supplied for efficient mechanical Band Spread. Excellent sensitivity and selectivity and improved image rejection at the higher frequencies are attained through the use of 1600 Kc. i.f. transformers. Ideal for marine work. Special emphasis has been placed on its 600 and 700 meter operation. Built-in speaker. R.F. Gain, Band Switch, Tone Control, Pitch Control, Send-Receive Switch, Phone Jack. Each band operated through individual coils. The sturdy metal cabinet is finished in black crystal with chrome trim. Designed for operation on 110 Volt. AC-DC only. For battery operation use inverter on preceding page.

Improved S-20R Sky Champion

C18009—Hallcrafters Model S20R Sky Champion. Including built in speaker and tubes.

YOUR CASH PRICE..... \$49.50

Or \$9.90 down and \$3.79 for 12 months.

C18041—SM20—"S" Meter in separate meter housing.

YOUR PRICE..... \$10.00

Or \$2.00 down and \$1.50 monthly for 6 months.

• 9 Tubes. • 4 Bands Give Complete Coverage of 545 Kc. to 44 Mc. • Separate Bandspread Dial. • Individual Coils for each Band. • Flywheel Tuning. • Band Switch. • Beat Frequency Oscillator. • AVC Switch. • Excellent Sensitivity and Selectivity. • AF Control. • Sensitivity Control. • Noise Limiter.

A 9-Tube Communications Receiver with Pre-Selection and Built-in Speaker. complete in every respect offering the amateur a quality performance never before available at this price. 4 Bands provide full coverage from 545 Kc to 44 Mc. (approx. 7 meters). Incorporates controls as follows: RF Gain Control, Tone Control, Phone Jack, AVC Switch, Beat Oscillator Switch, Send-Receive Switch, AF Gain Control, Band Switch, BFO Switch and Pitch Control. Sensitivity and selectivity on all bands is extremely good. The separate bandspread on all amateur bands is better than A.R.R.L. Handbook recommendations for bandspread against scale calibrations. Speaker is an integral part of the receiver—nothing else to buy. Tube Complement: 6K7 RF Amp., 6K8, 1st Det. Mixer, HF osc., 6H6 Noise Limiter, 6BK7, 1st IF Amp., 6BK7, 2nd IF Amp., 6BQ7 2nd Det., AVC and 1st Audio, 6J5GT Beat Freq. Osc., 6F6G Output and 80 Rectifier. For operation on 110-120 volts, 50-60 cycle, AC current only. Size, 18 1/2" x 9 1/2" x 8 1/2". Wt., 34 lbs.

Model S-27 Communications Receiver

Frequency Modulation and Amplitude Modulation

D18029 — Model S-27 F.M. and A.M. Receiver, complete with tubes, but less speaker.

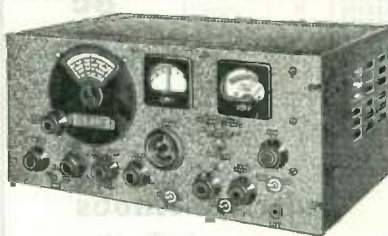

Your Price... \$175.00

Or \$35.00 Down and \$13.42 Monthly for 12 Months.

Tunes three bands, 27 to 46 mc., 45 to 84 mc., and 81 to 145 mc. on either Amplitude Modulated or Frequency Modulated Broadcasts. This fine 15 tube communications receiver should not be confused with ordinary home radios for A.M. and F.M. reception. All the refinements that Hallcrafters have incorporated in their famous "Ham" receivers have been built into this new unit: R.F. Gain Control; Antenna Trimmer; I.F. Selectivity Control; Volume, Pitch and Tone Control; 8-meter Adjustment; AVC On-Off Switch; Phone Jack; and Send-Receive Switch. Additional features are High gain 1852 tubes in iron core I.F. stages; Acorn tubes in R.F. and converter system; and beam power tubes in the final push-pull stage give a practically flat response over the entire audible range for high fidelity reception. Resistance coupling and degeneration (inverse feedback) are used for minimum distortion. Bass-boost circuit emphasizes low note response. Also has high frequency cut-off circuit for communication reception. Tubes used: 1-956, 1-954, 2-1852, 1-1853, 1-6BK7, 2-6H6, 1-6CRG, 1-6J5, 1-925, 1-5Z3, 1-VR-150, 2-6V6. Size, 19" x 14" x 9". Ship. wt., 75 lbs. For 110-120 volt, 50-60 cycle AC.

D18037—10" PM Speaker in Matching Cabinet

YOUR PRICE..... \$12.00

Model HT-7 Frequency Standard

Complies with F.C.C. regulations for amateur frequency measurements. Ideal for measuring transmitter frequency, checking calibrations and band-setting receivers, locating signals for skeds, setting E.C. oscillator frequencies within very close limits. Consists of a stable crystal oscillator with either 1000 or 100 Kc. output and a 10 Kc. multiplier and harmonic amplifier which produces accurate marker frequencies 10, 100 or 1000 Kc. apart on any range up to 30,000 Kc. May be set against any broadcast station or WWV for extreme accuracy. A tuned circuit increases the strength of the higher harmonics. Complete with tubes and crystal. Size, 5 1/2" x 8 1/2" x 7". Wt. 10 lbs. For 110 V. 50-60 cycle operation.

C18023—Model HT-7. Complete.

YOUR PRICE..... \$29.50

Or \$5.90 down and \$2.26 monthly for 12 months.

NEW EQUIPMENT

for the Amateur and Experimenter

AT LOWEST PRICES

2½ Meter Transceiver

D18044 — Abbott Model DK2. Less accessories. **YOUR PRICE.....\$1617**

A compact simple to operate portable transceiver that provides an excellent means of communication up to 30 miles distance. Housed in a sturdy steel carrying case that measures only 11½"x10½"x6½" and has room for all necessary batteries. Uses a 4 foot antenna which is supported on set by 2 ceramic insulators. Entire unit with batteries ready to operate weighs less than

25 lbs. Send and receive tuning is by means of a single control. Uses 2 tubes, 1-6J6GT and 1-6G6G. Batteries required: 4 - 6 Eveready Dry Cells and 3 or 4 2762 Eveready 45 Volt "B" batteries. For use with single button carbon microphone. Tubes, batteries, antenna, microphone and headset are not supplied.

Browning Frequency Monitor and Deviation Meter

5 Bands
5 to 160 Meters
D18068—Model BL-M3 with tubes. **YOUR PRICE.....\$3990**

A heterodyne type frequency meter with built-in mixing circuit to allow checking of transmitter frequency without the use of any auxiliary apparatus. 100-1000 Kc oscillator can be readily checked against WWV. Three additional oscillators cover the six amateur bands 160, 80, 40, 20, 10 and 5 meters. Calibrated 5½" dial permits accurate frequency checking. Electric eye indicator shows zero beat and frequency deviation of carrier. Accuracy greater than 2 parts in 10,000. Self powered 115 volts AC-DC. Cabinet finished in black crackle. Size, 14½"x8".

Browning Preselector

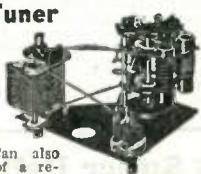

Tunes 5 bands
1.6 to 64. MC
D18067 — 5DXK Kit (Less 1852 tube). **YOUR PRICE.....\$1350**

D18066—5DXP Wired (Less 1852 tube). **YOUR PRICE.....\$1650**

In addition to serving as an efficient general coverage preselector on SVT receivers, this unit will serve to convert broadcast receivers for tuning short wave bands. Uses 1-1852 tube. Gain of 1000 or more. 25 to 70 DB added RF gain and image rejection ratios of over 500 may be obtained. Efficient on all bands. Covers 1.6 to 64 MC in 5 bands. 3½" nickel finished vernier dial. Cabinet size 7½"x8½".

Band Spread Tuner

Quality built band switching, band spread tuners that can be used as the nucleus of a ham band receiver which can be easily constructed at a cost considerably below that of standard manufactured units. Can also be used as the basis of a regenerative preselector with image rejection ratios of 500 or more. **YOUR PRICE.....\$600**

D17466—BL-5DX for 5 to 185 Meters. Covers the short wave spectrum in 5 bands with generous overlap. Electrical band spread is possible on any portion of the spectrum. Consists of 5 high Q, cathode tapped coils mounted on band switch; 200 mmf. Isolantite insulated tank condenser and 25 mmf. Isolantite insulated band spread condenser all mounted as an integral unit and wired. Trimmers are eliminated providing maximum L/C ratio. **YOUR PRICE.....\$480**

D17466—BL-5H For Amateur Bands. Designed exclusively for the Amateur. Covers the 10-20-40-80 and 160 meter bands, with each band spread out over entire tuning range. Consists of 5 high Q, cathode tapped coils rigidly mounted on band switch; 35 mmf. tuning condenser and band setting condenser. Grid leak and condenser also included.

Meissner Signal-Shifter

D18065 — Less tubes. **YOUR PRICE.....\$4405**

Will allow quick change of frequency over any amateur band from 10 through 160 meters. Has voltage regulation for the oscillator tube, dual rectifier tubes, and key-click filter for pure, chirpless output. Tuning dial has precision vernier scale. Can be linked coupled to transmitter for remote control. Equipped with "on", "standby" and "automatic" position switch. Uses 1-6F6, 1-6L6, 1-5X4G, 1-VR105, 1-VR105 tubes. Comes furnished with 80 meter coils. Size, 9x11½"x11½" deep. Cabinet finished in black or grey crackle. Operates on 115 volts 50-60 cycles.

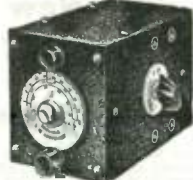

Additional coil sets:
D9663—10 meter band. **D9662**—20 meter band.
D9665—40 meter band. **D9664**—160 meter band.
YOUR PRICE.....\$245
Per Set.....
D1315—5 SYLVANIA TUBES for above. **\$440**
YOUR PRICE.....\$440

Browning Converter

For 5 and 10 Meters

D18043—Model BL510. **YOUR PRICE.....\$2490**

May be used with any set that can be tuned from 1500 KC to 5 MC. Especially designed for mobile use but operates satisfactorily with any reasonably sensitive receiver. Equipped with band switch and antenna change-over switch. By making minor adjustments to Trimming condensers converter can be made to tune over the entire range from 27 to 64 MC. Features Electrical band spread individual 5 and 10 meter oscillator and antenna circuits. Isolantite air tuned circuits, and 2½" silvered dial calibrated for 5 and 10 meters with separate 40-100 scale. Comes complete with 1-6K8 tube. Obtains power from radio with which used.

We Can Supply Other Transmitting Tubes

Gammatron Triodes

Gammatron tubes have elements supported directly on short, heavy wire leads brought directly to the envelope, eliminating all internal insulation. All have plate connection at top envelope. Extremely low interelectrode capacities. Easy to drive, operate at high efficiency on all bands. Nonex clear glass envelopes and use of Tantalum plates and grids allows safe operation at high element temperatures with no danger of breakdown or gas emissions. Types 24 and 54 have standard UX base; 254 and 354C have 50 watt base. *257 is a new beam power pentode with tantalum construction throughout. Base is similar to RCA-813.

Stancor Transmitter and Amplifier Kits

Model 25B 25 Watt CW Transmitter Kit

With
Self Contained
Antenna Tuning

D18000 — Model
25B Transmitter Kit
ready to assemble,
less tubes, coils and
crystals.
OUR PRICE \$124.95

The 25-B meets the requirements for a simple 6L6 transmitter with self-contained antenna tuning, operates on CW only with 25 watts input from 160 to 100 meters. The rig incorporates only the essentials, leaving off all the trimmings. Simplicity of circuit detail, construction, and operation will satisfy the beginner as well as the seasoned amateur. The 6L6 oscillator circuit is of the regenerative type using R.F. choke in the cathode. For the experimenter provision is made for other types of oscillator circuits such as triode, etc. Power supply using type 80 tube. Large choke and condenser insure well filtered supply as required by regulations. Resistor provides safe discharge of condensers and other voltage regulation. No high voltage on top chassis. Output may be connected to either low impedance or variable impedance matching network. Link coupling, various type feeder lines, or all types of antenna may be connected and easily tuned. Standard coils and crystals are used to cover all bands. Pilot light serves as tuning indicator and use. Keys in clean cut manner, suitable for field operation. A pilot light located in the center top of the high voltage power transformer and indicating serves both as a tuning indicator and use. All parts mount on a chassis 9½"x6½"x2", or operation from 105-120 volts 50-60 cycle AC.

Accessories

D1328—Kit of 1-6L6 and 1-80 Sylvania tubes for above transmitter. Includes 1-HK24.
OUR PRICE \$110

Use Coto Pee Wee end link coils described on page 143. Use HiPower Ruby or Emerald Crystals described on page 145

Model 110CM 100 Watt Transmitter Kit

Phone
and
CW

D18003—Model
110CM Transmitter
Kit ready to as-
semble, less tubes,
coils and crystals.
OUR PRICE \$477.75

The 110-CM transmitter is a high performance, multi-band, phone-CW unit, conservatively rated at 100 watts input, employing cathode modulation. Compact design permits the entire transmitter, modulator and power supply to be mounted on a 7"x10"x3" chassis which can be placed in a standard relay rack or cabinet. An RCA 812 is excited by a 6L6 "grid-plate" oscillator and cathode modulated by a pair of 6V6's. A 68J7 followed by a 6C5 provides adequate speech amplification from a crystal microphone. The operating range is from 7 to 30 MC. using only two ready-wound plug-in coils for each band. An RK80 and a 5Z3 operate in a dual rectifier system followed by adequate filter supply all necessary voltages to the various parts. A low impedance link-coupled output permits the use of any type of antenna. Complete metering of all essential circuits is provided by the ratcheting of a 0-200 D.C. milliammeter mounted in the panel. The Stancor 110-CM is especially applicable to installations requiring radiophone where limited physical space is available. To the confirmed brass pounder the 110-CM offers an economical and simple way to enjoy radiophone without tying up a large investment in modulating equipment. For operation from 105-120 volts 0-60 cycles AC.

Accessories

D1331—Kit of Hytron, Raytheon and Sylvania tubes for above transmitter. Includes: 1-HY40, 1-6L6, 1-68J7, 1-6C5, 2-6V6, 1-RK60, 1-5Z3.
OUR PRICE \$965

Model 10P 10 Watt Phone and CW Transmitter Kit

Covering
5 Band
Operation

D18001—Model 10P
Transmitter Kit ready
to assemble, less tubes,
coils and crystals.
YOUR PRICE \$20.58

The Stancor 10-P kit fulfills the need for an extremely compact phone-CW transmitter. Although thorough in every detail, its circuit simplicity and utter ease of operation delight both the beginner and seasoned amateur alike. The unique circuit design involves but one inexpensive plug-in coil for each band of operation. Further, only three crystals are used in covering all bands from 20 to 160 meters inclusive. A 635 untuned crystal oscillator and a 6L6 amplifier are employed in the radio frequency stages. For radiophone, a 6L6 in Class A serves both as a speech amplifier and plate modulator. The Class C, R.F. amplifier input ratings are 12 watts phone and 20 watts CW. Break-in procedure is accommodated by the simultaneous keying of both oscillator and amplifier. An 80 is used in the inexpensive, but adequate power supply. All types of antennae may be applied to the low impedance output terminals. All of the above mentioned features are self-contained in an attractive 10½"x6½"x6½" machine grey, crackle finished cabinet. The appearance is further enhanced by the special front panel escutcheon which has appropriate markings for the controls. Priced surprisingly low, the 10-P is truly a versatile piece of transmitting equipment. For operation from 105-120 volts 50-60 cycle AC.

Accessories

D1329—Kit of 4 Sylvania tubes for above transmitter. Includes 1-6J5, 2-6L6's, 1-80.
YOUR PRICE \$240

D10124—
Triplet Meter **\$2.94**

Model 414 14 Watt Public Address Amplifier Kit

Class A
With
6L6'S

D18004 — Model
414 P.A. Amplifier
Kit ready to as-
semble, with dust
cover but less tubes.
YOUR PRICE \$176.45

The 414 is an economical and compact A.C. amplifier with 14 watts output. Excellent audio response makes it ideal for small public address systems, window demonstrators, phonograph players, etc. Incorporates two high impedance input circuits as follows: One high gain input for medium output microphones (push pull, crystal, dynamic, or carbon), and one low gain input for phonograph pickup or carbon microphone (must be properly coupled through transformer). A single volume control is used for fading in either input. Includes tone control for attenuating high audio frequencies. Output transformer tapped to provide impedances of 4, 8 and 15 ohms. Tubes used are: 68J7 high gain input, 6C5 voltage amplifier, push pull 6L6's (pentode connected) Class A output, and 80 high voltage rectifier. Entire unit includes punched chassis, panel, and 10½"x6½"x6½" cabinet, finished in wrinkle gray. An escutcheon plate clearly marks inputs and controls. A jeweled pilot light is a ready indication that amplifier has been turned on. A dual binding post output strip allows the connection of one or more speakers. The desired output transformer impedance may be permanently connected to the output terminals and the others left unused until the need for their respective impedances arises. An alternative would be to ground the common starting terminal of the transformer and connect the two most desirable taps to the output posts. For operation from 105-120 volts 50-60 cycles AC.

Accessories

D1332—Kit of five matched Sylvania tubes for above amplifier.
YOUR PRICE \$290

Model 60P 60 Watt Phone and CW Transmitter Kit

Covers
5 Bands

D18002 — Model
60P Transmitter Kit
ready to assemble,
less tubes, coils and
crystals.
YOUR PRICE \$43.90

The 60-P presents an entirely self-contained phone-CW transmitter of modern design. Operation may be enjoyed on all amateur bands from 10 to 160 meters inclusive with a rated R.F. amplifier input of 60 watts. The efficient HK24 tube is employed as a Class C amplifier driven by a 6L6 in a harmonic type of crystal oscillator. Only two plug-in coils are necessary for each band of operation and three crystals suffice for all five bands. For radiophone, the audio channel consists of a 68J7 input stage, a 6N7 voltage amplifier-driver stage, and a pair of 6L6's in Class AB1 as modulators supplying 32 watts of audio. 100% plate modulation of the Class C amplifier is easily attained. The transmitter is powered by a dual rectification and filtration system, which provides the desired DC high voltages with excellent regulation. Other features are oscillator keying, ease of adjustment, and low impedance output termination. The standard dimensions of the 17"x10"x3" chassis and the 8½"x19" panel, allow the 60P to be housed in a rack type cabinet or to be mounted on a relay rack. Here is a transmitter that offers the amateur a compact, moderately powered, commercial type transmitter with which he can realize excellent results. For operation from 105-120 volts 50-60 cycles AC.

Accessories

D1330—Kit of 8 Raytheon I.K.K. and Sylvania tubes for above transmitter. Includes 1-HK24, 3-6L6's, 1-68J7, 1-6N7, 1-5Z3, 1-RK60.
YOUR PRICE \$1018

D18475—Bud Cabinet **\$7.35**

Model 430 30 Watt Public Address Amplifier Kit

D18005—Model
430 P.A. Amplifier
Kit ready to as-
semble, less dust
cover and less
tubes.
YOUR PRICE \$328.35

The 430 amplifier for public address system delivers full 30 watts undistorted audio power. Frequency response is uniform from 50 to 15,000 cycles. All inputs are high impedance as follows: two high gain and one low gain inputs. Two volume controls may be used for mixing. Sufficient gain for low output level microphones such as crystal, dynamic, or velocity types. Dual tone control unit allows independent control of either high or low frequencies. Output transformer provides impedances of 4, 8, 15, 250, or 500 ohms. A simple peak limiting circuit can be added, if desired, for use in P.A. as automatic volume control of speech only. The tube complement is as follows: two 68J7 high gain input channels, 6N7 voltage amplifier and electronic mixer, 6V6 (triode connected) driver, push pull 6L6's (pentode connected) Class AB1 output, and 5Z3 high voltage rectifier. Special circuit for increasing bass response. Well filtered power supply insures clear reproduction without disturbing noises. Chassis is of standard size 17"x10"x3", and can be fitted with dust cover or made to fit relay rack mounting. For operation from 105-120 volts 50-60 cycles AC.

Accessories

PHOTO CELLS--HEADPHONE UNITS

Worner Burglar Alarm

Provides Protection for Stores, Homes, Offices, etc. Adaptable for Other Uses.

D16470—Photo-Cell-Relay Unit and Light Source. Ready for operation. For use on 115 volt, 60 cycle AC lines. Less batteries.
YOUR PRICE.....\$27.34

Consists of two units: a source of invisible infra-red light and a sensitive photo-electric cell. The infra-red light is focused upon the photo-cell relay unit, either directly or reflected by mirrors. The maximum range of light projection is approximately 75'. Any interruption of this invisible light beam operates a relay that rings a built-in, battery operated bell, external bell or any other warning device of your choosing. Any break of the 115 volt wiring to the unit will sound the alarm also. The alarm will continue to ring until re-set by means of a keyless combination locking device on the relay unit. Both units are housed in black wrinkle finished metal cases. Size, Relay Unit, 6"x7"x4". Light Unit, 7"x15"x3". Uses two 1 1/2 Volt external dry cells.

D16471—External Alarm Signal. Consists of 5" alarm bell, batteries and 25' cable. Connects to ring simultaneously with bell in relay unit. Black wrinkle finished metal case. Size, 10x10x4".
YOUR PRICE.....\$7.64

D16472—Mirror with adjustable mounting bracket. Size, 8x12x2 1/4".
YOUR PRICE.....\$2.65

Eby Experimental Electric Eye Kit

C13881—Complete Electric Eye Kit. Easily assembled.
YOUR PRICE.....\$7.94

A popular kit for experimental purposes in electronics. Contains all necessary parts for building eight various electric eye circuits. Kit includes: Eby electric eye, Eby Sensitive Relay, amplifier tube, tube and eye sockets, potentiometer, resistors, condensers, terminal strip, all necessary hardware, punched and drilled chassis base and the Electric Eye Booklet. For use on 115 volts, 60 cycles AC.

Eby Electric Eye

C13880—YOUR PRICE.....\$2.06

Compact photo-cell, sensitive to both visible and invisible light. Reacts both to intensity and frequency of incident light rays. Sturdily constructed and housed in shock-proof and moisture proof bakelite case. Mounts in standard 4 prong socket. For use with other components in suitable circuits to operate relays in controlling electrical equipment. Size, 1 1/4" dia. x 3/4".

Eby Electric-Eye Booklet

C12542—YOUR PRICE.....29¢

Contains helpful information on the electric eye. Of particular interest to the technician interested in electronics. Describes in detail the principles of photoelectric covering theory and practice. Well illustrated. 30 Suggested circuit diagrams are also given. 32 Pages. Size, 8 1/2"x11".

Headphone Adapters

Adapts Any Radio for Headphone Reception.

D12182—For 4 prong tubes.
D12183—For 6 prong tubes.
D12184—For Octals.
YOUR PRICE, Each.....88¢

For adding crystal or magnetic headphones or magnetic speaker to any radio. Does not alter receiver circuit or operation. Wafer adapter slips under power tube and headset or external speaker connects to the combination screw and phone tip jack terminals on the bakelite coupler. Condenser in plate circuit. Two adapters required when used with push-pull tubes.

Nathaniel Baldwin

Famous Head Phones

C9405
Your Very Special Price

\$4.25

Type C

Manufactured by Nathaniel Baldwin at the special request of RADOLEK. This is without doubt your last chance to obtain a set of these prized head phones. World famous for many years because of their extreme sensitivity and great efficiency. Balanced armature units accurately matched and carefully tested. Used extensively by U. S. Signal Corps, Navy, and by professional operators. Moulded bakelite cases enclose units. While very sensitive they are very rugged and will stand up under hard usage. Complete with adjustable headband and cord. Fitted with MICA diaphragms.

Brush Crystal Headphones

A piezo electric headphone of exceptionally high quality and excellent frequency response from 100 to 10,000 c.p.s. Impedance 50,000 ohms. For amateur, experimental, hard of hearing and Public Address monitoring use. Phones are housed in dark red-brown plastic case. Net wt. 6 oz. Complete with 5' cord and adjustable headband.

C9419—YOUR PRICE...\$5.29

Communications Headphones

Especially designed for comfort and dependability. Can be worn for hours at a time without discomfort. Soft rubber jacket on phone insures good ear seal and safety against shock. Voiceless cord design allows greater freedom of movement. Electrical characteristics similar to general purpose type above. Net wt. 6 oz. Complete with 5' cord and adjustable headband.

C9418—YOUR PRICE.....\$7.06

Single Phone with Head Band

Electrical characteristics same as above phones. Metal headband with rubber cushion on the side opposite the phone. Complete with 5' cord. Net wt. 3 oz.

Ten for \$5.50

The Smallest Satisfactory Dynamic Speaker Made. Three Pole 2 inch mica-spider-web voice coil support. Low resistance Hum-Bucking coil. Handles 1 1/2 watt signal with surprising tone quality for such a small reproducer. Extends 2 1/4" back of baffle. Output Transformer not included. Low resistance field coil permits substitution of field in place of first filter choke.

Amplifier Handbook and P. A. Guide

D12568—YOUR PRICE.....25¢

Covers amplifiers and sound system installation. With the information contained in this book every man engaged in radio can have both a theoretical and practical knowledge of the functions and operation of sound systems. Explains all types of microphones, speakers, baffles, etc. Includes mathematical formulas. Many illustrations. Printed on fine paper. 80 Pages. Size 6 1/2"x9".

Static
Free

FREQUENCY MODULATION

Receivers-Adapters-Reproducers-Parts

High
Fidelity

Static-free radio, for years the dream of engineers and set owners alike, is now a practical reality. At last perfect radio reception, utilizing the entire audible tone range, and covering the complete volume range from dead silence to loudest symphonic fortissimo, is here. F-M reception entirely free from atmospheric, man-made or broadcast station interference, is today available at moderate cost, easily within reach of the large majority of set owners everywhere.

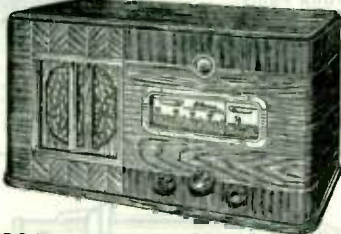

The money making possibilities from the sale of frequency modulation receivers and equipment are BIG. Many localities in the United States are already being served by frequency modulation transmitters, and others are rapidly being added. In addition, wide publicity being given F-M reception by national magazines and daily newspapers are creating a keen public interest. Cash in now on the greatest money making opportunity in radio since the "lush 20's."

Meissner Frequency Modulation Receivers

Table Model D17545—Uses same chassis and speaker as console model listed to the right. Housed in gracefully

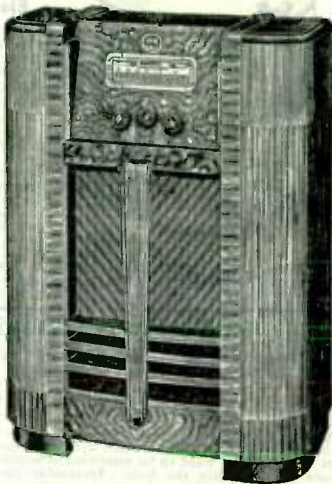

proportioned two toned walnut cabinet. Size 12 $\frac{1}{2}$ x22 $\frac{1}{2}$ x11" deep. Complete with tubes. List. \$99.25.
YOUR PRICE \$58³¹

Of Interest to P.A. Men
Each of the 3 F-M receiver models described, comes equipped with special shielded cable leading from detector stage for connecting tuner output to any external amplifier and speaker system.

**For Perfect
Radio Reception
Noiseless
Static-Free
High-Fidelity**

The new Frequency Modulation system of transmission and reception is now definitely out of the laboratory stage. New type transmitters are being built daily and many more are being planned. If you do not already have an F-M station serving your locality, a check with your local broadcasters should quickly reveal the possibilities of early service of this type in your community.

Console Model F-M Receiver

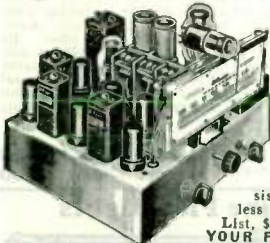

The F-M Receiver Chassis described to the left, attractively housed in an acoustically correct walnut console cabinet having grain walnut side and top panels with contrasting sileed-burl walnut inclined front panel. A Horizontal band of mahogany placed at the upper and lower portions of the cabinet and on either side of the speaker grill, serve to accentuate the attractiveness of this truly fine piece of radio furniture.

D17547—Meissner Console Type F-M receiver, complete with tubes, high fidelity tone chamber and P.M. Dynamic Speaker. For 110 V. 60 cye. AC operation. Size 41x30 $\frac{1}{4}$ x15 $\frac{1}{2}$ " deep. Ship. wt. 105 lbs.
List. \$135.00.
YOUR PRICE \$77⁹¹

Write us regarding any new developments in frequency modulation. Radolek will always have the latest information ready to pass on to you.

Complete F-M Receiver Chassis

A high-gain RF stage and mixer-oscillator tube feeds the 4.3 Mc IF signal into a 3 stage IF amplifier and limiter system; a special diode detector arrangement provides a distortion-free audio signal for the two-stage high-fidelity audio amplifier. Has VR150 voltage regulator tube, ceramic sockets and coil forms, and air trimmed discriminator and IF transformer. Large slide-rule type dial with illuminated scale is direct reading

42 to 50 Mc. AVC circuit minimizes or entirely eliminates fading. A 5-step tone control gives full adjustment of high and low frequency response. Maximum undistorted power output, 6 watts. Tubes used: one each, 6SA7, 6HE, 6SC7, 6AD8, 5U4G, 6CS, 6L6G, VR150 and two each 6NK7, and 1852 (6AC7). Chassis size 10x12x3". For 110 V. 60 cye. AC operation. Wt. 16 lbs. less tubes.

Each **25c**

Advertise your business in this inexpensive way. Ready for attachment to shirts, coveralls, jackets, caps, etc. Border and lettering embroidered in gold silk on royal blue background. Washable. Size approx. 5 1/2" times above illustrations.

Bakelite Test Case

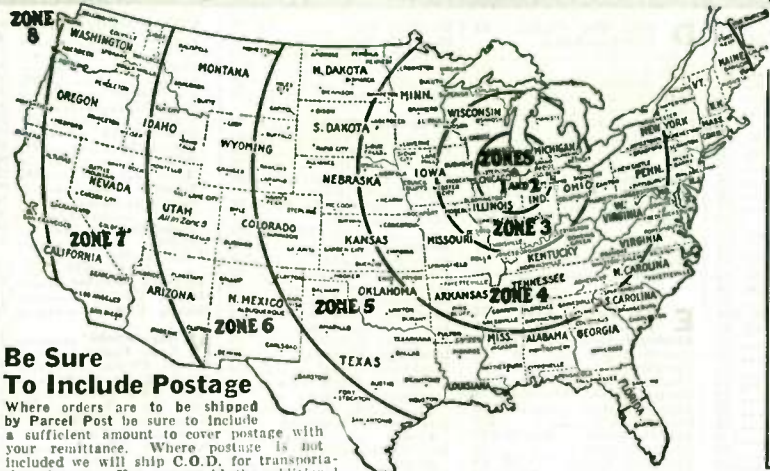

K12351—With top panel.

YOUR PRICE 59c

Polished brown bakelite with beveled bakelite top plate mounting with two insulated screws. Size of case 4 1/2" x 2 1/2" x 1 1/2". Inside depth 1 1/2". 2 3/4" between inside panel supports. Supplied with six 1/4" holes for small pin jacks, or wires. This is the ideal size small instrument case for small radio apparatus.

It's Easy to Figure Delivery Charges on Your Order

Be Sure To Include Postage

Where orders are to be shipped by Parcel Post be sure to include a sufficient amount to cover postage with your remittance. Where postage is not included we will ship C.O.D. for transportation charges. You can avoid the additional expense of C.O.D. collections by sending sufficient postage. Any excess amount sent for Parcel Post charges will be promptly credited.

NOTE:—To estimate Express charges for shipments under 100 pounds. The minimum charge for a one pound package sent by Express is 36c, ranging up to 42c for highest rate. Beginning with the minimum, charges are increased according to weight of package. For instance the 10 pound rate varies from 44c to \$1.00. The poundage rate varies from about 65% down to about 55% of the hundred pound rate for 50 pounds (from 80c to \$3.62) with the charges for intermediate weights above and below 50 lbs. in approx. proportion.

Fastest Delivery

We are constantly striving to "cut-time" and to set new speed records on our excellent Shipping Schedule. Most orders are shipped the same day they are received. You cannot afford unreasonable delay. Radiolek service means delivery right to your door of the exact merchandise you want, quickly and exactly as ordered.

Equipped For Service

The most modern stock and shipping equipment—a hustling organization and an experienced and capable management—all combine to give your orders the individual attention that you want.

Prices Quoted

Prices quoted are for usual commercial quantities. If you can use any items listed in larger quantity, please write for special quotation stating quantity you can use.
"List Prices" shown are those suggested by the manufacturers or by us and are intended as a guide to you in setting an average retail or installed price. "Your Price" or "Net Price" is the net price you pay. The cash discount has also been deducted.

SEND NO MONEY We Will Ship C.O.D.

You need not send a remittance with your order unless you wish to do so. We will ship C.O.D. any merchandise shown in our catalog, but we request that new customers on their first orders, or orders for heavy merchandise to be shipped to distant points be accompanied by a 25% deposit if to be shipped C.O.D. Most of our customers prefer to send cash with order, thereby eliminating delay and unnecessary expense of C.O.D. collection. You may remit by post office or express money-order, bank draft or personal check, as you prefer. If you send currency be sure to register the letter for we cannot be responsible for cash lost in the mails.

Prices Subject to Market Change

We expect to be able to maintain prices quoted during the life of this catalog. However we reserve the right to revise prices should market conditions compel us to do so. Should any prices advance we will protect you against increased prices for as long as is reasonably possible. We pledge ourselves not to profiteer—we will not raise prices unnecessarily. But where prices are advanced generally on primary markets we may be obliged to make adjustments.

On sales in the State of Illinois we reserve the right to increase our prices, to the extent of any increase in cost of doing business, that may be occasioned by the Illinois State Occupation (Sales) Tax Act.

Likewise on shipments to other states, should taxes of any nature be imposed we reserve the right to add the amount of such taxes to our sale prices.

How to Order

Send our orders on our convenient Purchase Order forms, or in any other manner convenient to you. Be sure to specify Stock Number and Price of each item. Print your Name and Address plainly.

We will ship C.O.D. Most of our customers prefer to send cash with order to avoid extra collection costs. All orders for heavy merchandise to be shipped to distant points should be accompanied by a 25% deposit.

Your Order Solicited

We solicit orders from those actively and commercially engaged in the radio industry. Manufacturers, Radio Dealers, Radio Servicemen—Industrial and Institutional Laboratories, Public Utilities, Schools, Colleges, Engineers, Experimenters, Radio Amateurs whether registered or not, and those recognized as engaged in developing the Art of Radio. We will also accept orders from the United States Government, Federal Institutions, State, County, Municipal and other governmental bodies and institutions.

Payment Terms

Our terms are cash with order or C.O.D. Catalog prices are Net—F.O.B. Chicago or factory. All Trade and Cash Discounts have been deducted. While we do not impose minimum order restrictions on our old customers, it will profit you to make up at least \$5.00 orders to avoid additional exchange charges. We will be obliged to pass on to you the exchange charge, made by the Banks, on all personal checks for less than \$5.00. C.O.D. orders from new customers should be accompanied by a 25% deposit.

Parcel Post Rates

The limit in size is 100 inches in length and girth combined. The postage on any parcel over 84 inches and weighing less than 10 pounds will be chargeable for 10 pounds at the zone rate.

Table for Packages Weighing ½ pound to 20 pounds

	Zones 1&2	Zone 3	Zone 4	Zone 5	Zone 6	Zone 7	Zone 8

19	.28	.45	.73	1.07	1.38	1.76	2.13
20	.29	.47	.77	1.12	1.45	1.85	2.24

For packages over 20 pounds and up to 70 pounds. ADD for each pound:

1.1c	2c	3½c	5c	7c	9c	11c
------	----	-----	----	----	----	-----

NOTE:—Packages weighing under ½ pound allow 1½¢ per ounce. Packages over ½ pound (8 ozs.) and not more than 1 pound take 1 pound rate.

Packages weighing over 1 pound and less than 2 pounds take the 2 pound rate. Always use the next higher pound rate for pounds and fractional pounds. **FOR EXAMPLE:**—1½ pounds requires 2 pound rate, 2½ pounds requires 3 pounds rate.

SHIPPING ALLOWANCE

On Orders of \$25.00 or Over

We will make a transportation allowance of 2% except where merchandise is already quoted prepaid and with the exception of Eveready Batteries.

This allowance can be applied on Parcel Post, Express or Freight Shipments. The allowance can be applied directly on Parcel Post Shipments. On Express and Freight Shipments it is usually necessary for us to make shipment charges collect, so that on Express and Freight Shipments you may make this deduction directly on your order or we will send you a credit for the amount of the allowance.

Remember

This transportation allowance of 2% applies only on orders for over \$25.00 and is not to be confused with the cash discount allowance of 2% which is already deducted from the Net Prices as quoted in this Profit Guide.

We Ship Subject to Inspection

We will ship any merchandise ordered, subject to your inspection if shipment is to go forward by express. In this manner, you may see the merchandise at the express office before you accept shipment, if you so prefer. If you desire inspection privileges, be sure to so state plainly on your order.

"HOT" Items to Increase Your Profits

Economy Portable P. A. System

With Crystal Microphone

P15055 — Complete Portable P.A. System. For 110-120 volt, AC or DC operation. **\$16.95**

YOUR PRICE

An amazingly low priced complete portable P.A. sound system. Includes a 4 tube AC-DC 3 watt amplifier with tubes, speaker, desk stand with removable base, crystal microphone and carrying case. Has a dozen of useful applications. Use it in restaurants, stores, clubs, homes, etc. for demonstration, speech amplification, entertainment, etc. Plays anywhere on AC or DC. Compact and easy to carry. Sets up in a jiffy—easy to use as a radio. Can be used with any record player having a high impedance pickup. Tubes used, 12J7, 12J5, 50L8, and 35Z5. Has tone control and volume control with on-off switch. Delivers surprisingly high output with good frequency response. Amplifier can be used up to 30 ft. away from the P.M. speaker which is mounted in the case. Fine durable airplane cloth covered case houses all equipment. Case size 10 1/2 x 4 1/2 x 7 1/2. Net wt. 7 lbs.

Magnetic Speakers

Very fine tone qualities. Heavy pressed steel frame, cadmium plated. Heavy magnet with improved balanced armature. Unit, D.C. resistance 1000 ohms. Will match most output tubes.

Your Favorite Programs Wherever You Are

5 Tube 110 V. AC-DC or Battery Super

Carry it with you wherever you go. Tune in political speeches, dance music or favorite programs of every kind—at home, in the car, in the boat, on the beach, in the country—everywhere. Operates from either self contained batteries or 105-120 Volt AC-DC line power. Illuminated airplane type dial covers entire broadcast band 540 to 1550 Kc. Built-in antenna eliminates dangerous, trailing antenna wire. No ground connection required. Automatic volume control minimizes fading. 5" P.M. dynamic speaker gives excellent tone quality. Beam power output gives maximum volume at low power cost. **Battery life 150 hours or better.** The neatly styled cabinet, ruggedly built, is covered with durable sun and water proof airplane cloth. Tubes: 1A7GT, 1N5GT, 1H5GT, 1T5GT, 50Y6GT. Size: 9¼"x14½"x5½" deep. Wt. packed, with batteries 18 lbs.

6 Tube Superhet

Walnut Cabinet—Tone Control

This 6 tube table model attracts the eye with its handsome appearance, and enchants the ear with its full, rich tone. As a piece of furniture it harmonizes with any setting, and adds a sparkling modern touch to any room. Latest 6 tube superhet circuit provides plenty of power to bring in any station with volume to spare. **Tuning range, 540 to 1720 Kc.** Built-in non-directional antenna eliminates aerial and ground connections. Soft, indirect lighting makes the square, airplane type dial easy to read. **Variable tone control** allows delicate shading and faithful reproduction of music and voices. **Full-sized dynamic speaker** assures accurate, full-bodied tone of exceptional quality and clarity. Cabinet is Walnut, hand rubbed to a lustrous finish, with an unusual decorative band of Zebra-wood along the bottom. Loudspeaker louvers are durable and decorative plastic. Size: 9 1/2" x 15 1/8" x 6 1/2". Tubes: 1-12A8GT, 1-12K7GT, 1-12Q7GT, 2-50L6GT, 1-35Z5GT. Operates on 105-120 volt AC-DC.

30 WATT PORTABLE Public Address SYSTEM

Will Handle Most of Your P. A. Requirements

This new 30 watt Portable P.A. system includes many new features never before included in a system of its size. Features increased operating efficiency, longer trouble free life and more adaptability to every type of installation.

Three Input Channels for two microphones and phonograph. Any two channels may be used at same time—two mikes or one mike and phono.

Dual Rectifiers for more stable and greater power output. Slow heater rectifiers allow other tube filaments to heat up before plate voltage is applied, preventing destructive power surges.

Treble-Bass Tone Controls in a newly designed feedback circuit eliminates distortion. Either low or high frequencies may be accentuated separately or at same time. Many variations possible, providing any tonal requirement.

True Electronic Mixing System provides any degree of blending or mixing of the three inputs without crosstalk between channels. Volume of any input channel can be adjusted without affecting volume level of other inputs.

Separate On-Off Switch. Power may be turned off without changing setting of controls.

Polarized Plug-In Connections provided for the three inputs and three speakers.

Speaker Impedance Selector Switch matches speaker impedance to amplifier by simply turning knob. Output impedances available are 2, 4, 8, 16 Ω , 250 and 300 ohms for line or voice coil connections.

Ready to Set Up and Operate In Just a Few Minutes

Radolek Amplifiers and Systems are easy to install and operate and are reliable in operation. You need not have sound or engineering ability or other technical knowledge to obtain best results. By following a few simple instructions anyone can quickly set up and take down this equipment without error. **No complicated wiring!** Just "plug-in" the easily identified connections and you're all set to go. **Speakers and microphones are supplied with cables connected to polarized plugs making it impossible to make wrong connection.** Complete installation and operating instructions included. Each individual system is carefully checked by Radolek Engineers. A thorough test of the complete system is made before shipment, assuring you of trouble free operation when you receive it.

See Pages 104 and 105 For Additional Information

Additional Systems, more complete information on amplifier and selection of microphones available with the 30 watt Portable System are given on page 104 and 105.

Phonograph Attachment

Consists of constant speed phono motor with 9" turntable and high grade crystal pickup mounted on amplifier protective shield. May be substituted in place of regular shield. Amplifier has plug in connection jacks mounted so that all connections are enclosed inside of shield. May be purchased with amplifier or added to amplifier at a later date.
