John J. Mullaney, being first duly sworn upon oath, deposes and states that he is a graduate electrical engineer with a B.E.E. from Catholic University, and his qualifications are known to the Federal Communications Commission, and that he is an associate engineer in the firm of John H. Mullaney, Consulting Radio Engineers, Inc., and that firm has been retained by Mid County Communications, an applicant for a new FM broadcast station in Nederland, Texas.

He states that various calculations and exhibits associated with this application were prepared by him personally under the direction of John H. Mullaney, P.E. Affiant further states that all facts contained herein are true of his own knowledge except where stated to be on information or belief, and as to those facts, he believes them to be true.

  
John J. Mullaney  
Associate Engineer

Subscribed and sworn to before me this 22nd day of June 1981.

( S E A L )

  
Joyce A. Mullaney  
Notary Public

My Commission Expires: July 1, 1982.

FM BROADCAST ENGINEERING DATA		Name of applicant  Mid County Communications									
1. Purpose of authorization applied for: (Indicate by check mark)											
(If application is for a new station or for any of the changes numbered F through S, complete all paragraphs of this form; if change F is of a character which will change coverage or increase the overall height of the antenna structure more than 20 feet, answer all paragraphs, otherwise complete only paragraphs 2 and 9 and the appropriate other paragraphs; for changes G through L, complete only paragraph 2 and the appropriate other paragraphs; for change J, complete only paragraphs 2 and S.)											
<p>A. <input checked="" type="checkbox"/> Construct a new station</p> <p>B. <input type="checkbox"/> Change effective radiated power</p> <p>C. <input type="checkbox"/> Change antenna height above average terrain</p> <p>D. <input type="checkbox"/> Change transmitter location</p> <p>E. <input type="checkbox"/> Change frequency</p>		<p>F. <input type="checkbox"/> Change antenna system</p> <p>G. <input type="checkbox"/> Change transmitter</p> <p>H. <input type="checkbox"/> Install auxiliary or alternate main transmitter</p> <p>I. <input type="checkbox"/> Other changes (specify)</p> <p>J. <input type="checkbox"/> Change studio location</p>									
If this is not for a new station, summarize briefly the nature of the changes proposed.											
2. Facilities requested		9.(a) Antenna structure:									
Frequency  92.1 Mc/s.	Channel No.  221A	<p>Is the proposed construction in the immediate vicinity or does it serve to modify the construction of any standard broadcast station, FM broadcast station, television broadcast station, or other class of radio station? YES <input checked="" type="checkbox"/> NO <input type="checkbox"/></p> <p>If "Yes", attach as Exhibit No. EE complete engineering data thereon.</p> <p style="text-align: center;">KYKR - FM</p> <p>Submit as Exhibit No. EE a vertical plan sketch for the proposed total structure (including supporting building if any) giving heights above ground in feet for all significant features.</p>									
Effective Radiated Power  Horizontal 3 kw Vertical 3 kw	Antenna height above average terrain  Horizontal 300 feet Vertical 300 feet	Overall height in feet above ground. (Without obstruction lighting)  496	Overall height in feet above mean sea level. (Without obstruction lighting)  511								
3. Station location		<p>Overall height in feet above ground. (With obstruction lighting)  499</p> <p>Overall height in feet above mean sea level. (With obstruction lighting)  514</p>									
4. Transmitter location (principal community)		<p>State Texas City or town Nederland</p>									
5. Main studio location		<p>State TBD City or town Vidor</p>									
6. Remote control point location		<p>Street Address (or other identification) - - - North latitude 30° 03' 39" West longitude 93° 58' 49"</p>									
7. Transmitter		<p>(b) Antenna data</p> <table border="1"> <tr> <td>Make Harris</td> <td>Type No. or description FML-3E</td> </tr> <tr> <td>No. of sections 3 H/V</td> <td>Antenna power gain 1.5</td> </tr> <tr> <td>Horizontal</td> <td>Horizontal 1.5</td> </tr> <tr> <td>Vertical</td> <td>Vertical 1.5</td> </tr> </table> <p>If directional antenna is proposed, give full details including horizontal and vertical plane radiation patterns, as Exhibit No. --</p>		Make Harris	Type No. or description FML-3E	No. of sections 3 H/V	Antenna power gain 1.5	Horizontal	Horizontal 1.5	Vertical	Vertical 1.5
Make Harris	Type No. or description FML-3E										
No. of sections 3 H/V	Antenna power gain 1.5										
Horizontal	Horizontal 1.5										
Vertical	Vertical 1.5										
<p>(If the above transmitter has not been accepted for licensing by the F.C.C., attach as Exhibit No. -- a complete showing of transmitter details. Showing should include schematic diagram and full details of frequency control. If changes are to be made in licensed transmitter include schematic diagram and give full details of change.)</p>		<p>Is electrical or mechanical beam tilting proposed? YES <input type="checkbox"/> NO <input checked="" type="checkbox"/></p> <p>If so, describe fully in Exhibit No. Including horizontal and pertinent vertical radiation patterns.</p> <p>Will antenna be altered to provide null fill-in? YES <input type="checkbox"/> NO <input checked="" type="checkbox"/></p> <p>If yes, describe fully in Exhibit No.</p>									
8. Modulation monitor											
<p>Make Belar</p>		<p>Type No. FMM-1</p>									

10. Transmission line proposed to supply power to the antenna from the transmitter

Make	Type No.	Description
Andrew	HJ7-50A	Air Heliax
Size (nominal transverse dimension) in inches	Length in feet	Rated efficiency in percent for this length
1-5/8	320	86.9

11. Proposed operation

Transmitter power output in kilowatts	Power dissipation within transmission line in kilowatts
2.3	0.3
Antenna input power in kilowatts	Effective radiated power in kilowatts (Must be same as shown in Para. 2)
2.0	Horizontal 3.0 Vertical 3.0

12. Will the studios, microphones, and other equipment proposed for transmission of programs be designed for compliance with the FM Technical Standards?

Yes  No

13. If this application is for modification of construction permit state briefly as Exhibit No. — — —, the present status of construction and indicate when it is expected that construction will be completed.

14. Attach as Exhibit No. EE map(s) (Sectional Aeronautical Charts where obtainable) of the area proposed to be served and shown drawn thereon:

- (a) Proposed transmitter location and the radials along which the profile graphs have been prepared;
- (b) The 3.16 ,v/m and the 1 mv/m contours predicted;
- (c) On the map(s) showing the 3.16 mV/m contour, clearly indicate the legal boundaries of the principal community proposed to be served. Submit a statement identifying the source relied upon for the placement of the boundaries;
- (d) Scale of miles.

Areas and population: (latest census.)

Area (sq. mi.) within 1 mv/m contour	Population within 1 mv/m contour
594#	297,000

15. (a) Attach as Exhibit No. EE a map(s) (topographic where obtainable, such as U. S. Geological Survey quadrangles) for the area within 15 miles of the proposed transmitter location and shown drawn thereon the following date:

1. Proposed transmitter location—accurately plotted;
2. Transmitter location and call letters of all radio stations (except amateur) and the location of established commercial and government receiving stations within 2 miles of the proposed transmitter location;
3. Proposed location of main studio;
4. Character of the area within 2 miles of proposed transmitter location, suitably designated as to residential, business, industrial, and rural nature;
5. At least eight radials each extending to a distance of ten or more miles from the proposed transmitter location, one or more of which must extend through the principal city or cities to be served.
6. If the proposed transmitter location is outside the boundaries of the principal community proposed to be served, the topography of the intervening area must be clearly shown.

b. Attach as Exhibit No. EE profile graphs for the radials in (a)(5) above. Each graph shall show the elevation of the antenna radiation center. Identify each graph by its bearing from the proposed transmitter location. Direction true north shall be zero azimuth and angles measure clockwise. Show source of topographical data on each.

16. From the profile graphs in 15(b), for the eight mile distance between two and ten miles from the proposed transmitter location, and in accordance with the procedure prescribed in Section 73.313 of the Commission Rules, supply the following tabulation of data:

Radial bearing (degrees true)	Average elevation of radial (2-10 mi.) in feet above mean sea level	Height in feet of antenna radiation center above average elevation of radial 2-10 mi.)	Predicted distance in miles to the 3.16mv/m contour	Predicted distance in miles to the 1mv/m con-
0	21	290	7.9	14.2
45	15	296	7.9	14.3
90	11	300	8.0	14.4
135	3	308	8.1	14.6
180	8	303	8.0	14.5
225	11	300	8.0	14.4
270	13	298	8.0	14.4
315	7	304	8.0	14.5
(*) 186	9	302	8.0	14.5
	(11.13)	(299.88)	300	feet (horizontal)
	Average 11		300	feet (vertical)

Antenna height above average terrain \_\_\_\_\_ feet (vertical)  
(Average of above listed heights -- must be identical with Paragraph 2)

\*Radial over principal community if not included above. Do not include in Average.

#Water area of Sabine Lake subtracted

## 17. Environmental statement. See Part I, Subpart I of the rules.

Would a Commission grant of this application be a major action as defined by Section 1.1305 of the Commission's rules?

YES  If yes, submit as Exhibit No. a narrative statement in accordance with Section 1.1311 of the rules.  
NO  If no, explain briefly

Existing tower

No change in overall height

I certify that I represent the applicant in the capacity indicated below and that I have examined the foregoing statement of technical information and that it is true to the best of my knowledge and belief.

ENGINEERING EXHIBIT EE:

MID COUNTY COMMUNICATIONS  
NEDERLAND, TEXAS  
CH. 221A 3 KW 300' HAAT

NARRATIVE STATEMENT:

I. GENERAL:

This engineering statement has been prepared on behalf of Mid County Communications. The purpose of this statement is to request a construction permit to build a new FM broadcast facility on Channel 221A at Nederland, Texas.

The application is not a major environmental impact, as defined by Section 1.1305 of the Commission's Rules, since an existing tower will be used with no change in overall height.

Answers to questions contained in F.C.C. Form 301, Sections V-B, are incorporated in the following paragraphs and figures.

II. ENGINEERING DISCUSSION:

A. Proposed Location:

The applicant proposes to locate on the existing tower of KYKR-FM. The geographic coordinates are:

Latitude: 30° 03' 39"  
Longitude: 93° 58' 49"

The proposed site is approximately 5 miles north of the City of License, Nederland, Texas.

B. Antenna System and Tower:

A Harris FML-3E, 3-bay circular polarized FM antenna will be side mounted at 286 to 306 foot level of an existing 499 foot AGL tower. The antenna has a power gain of 1.5 H/V and will have a center of radiation of 296 feet AGL or 311 feet AMSL (Figure 4, Tower Sketch).

Nederland, Texas

JOHN H. MULLANEY  
CONSULTING RADIO ENGINEERS, INC.

The antenna will be fed by 320 feet of 1-5/8" Andrew air heliax, type HJ7-50A, with a rated efficiency of 86.9 percent for this length.

C. Transmitter:

The applicant plans to install a Harris FM-2.5K FM transmitter, which is type accepted for this service. The transmitter will be operated at 2.3 KW which is within its rated power.

D. Channel Allocation:

The proposed site is in accordance with the required mileage separations as set forth in Section 73.207(a). Figure 5 is a channel allocation study from the proposed site.

E. Terrain Profile Data & Coverage:

Terrain profile data was taken from current U.S. Geological Survey quad maps of the area in the usual manner set forth in the Rules. This data has been plotted and submitted as Figure 2A through 2I of this report. The maps from which the data was taken have been photo-reduced and are submitted as Figures 3A through 3J of this report.

The predicted service contours, as shown in Figure 1 of the attached report, were computed using a mathematical model adapted for computer use of data shown in Figure 1 of Section 73.333 (replacement of the Commission's Rules, the so-called "new" F(50,50) curves). This is the Commission's computer program TV FM FS REPORT RS-76-01, dated January 1976.

F. Terrain Profile to City of License:

Figure 2I is a terrain profile plot for radial N-186°-E which is the direct path to Nederland, Texas. This figure illustrates that there is direct line-of-sight to the entire city of license.

The City Limits of Nederland have been outlined on figures 3E and 3H. The farthest portion of the city is 7.944 FCC miles from the proposed site (see figure 3E). The geographic coordinates are:

Latitude: 29° 56' 46"  
Longitude: 93° 59' 38"

The City Grade contour (70 dBu) extends 8.02 miles in this direction and therefore encompasses the entire City of License.

G. Coverage Area and Population:

The area contained within the 60 dbu (1.0 mVm) contour was computed mathematically.

The population within this contour was obtained by assuming a uniform distribution of population within minor civil divisions.

H. Other Services in Area:

This is the existing site of KYKR-FM which operates on channel 227C in Port Arthur, Texas. The following is a list of other known services within 5 miles of the proposed site:

1.) KEAM (AM)	CP 1510 KHz.	0.04 miles
2.) KDLF (AM)	1150 KHz.	2.14 miles
3.) KQXY (FM)	231C	3.95 miles

Based on the type of transmitter proposed, no intermodulation problems with existing transmitting facilities would be expected. In the unlikely event some problems would occur, the applicant will correct such cases in accordance with the Commission's rules.

I. National Environmental Policy Act of 1969:

The Report and Order implementing the Environmental Policy Act (DO-19555) sets forth the maximum permissible exposure level for humans as  $10 \text{ mW/cm}^2$ .

In the following formula:

$$d = \frac{(\text{EIRP})^{.5}}{5.4024}$$

EIRP is the radiation in watts and d is equal to the closest distance in feet that a human can come to an operating antenna.

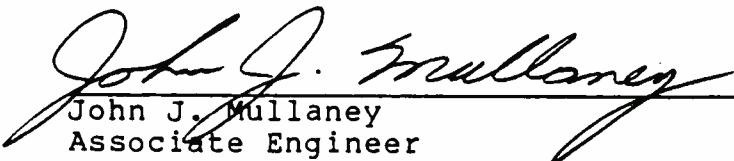

Nederland, Texas

JOHN H. MULLANEY  
CONSULTING RADIO ENGINEERS, INC.

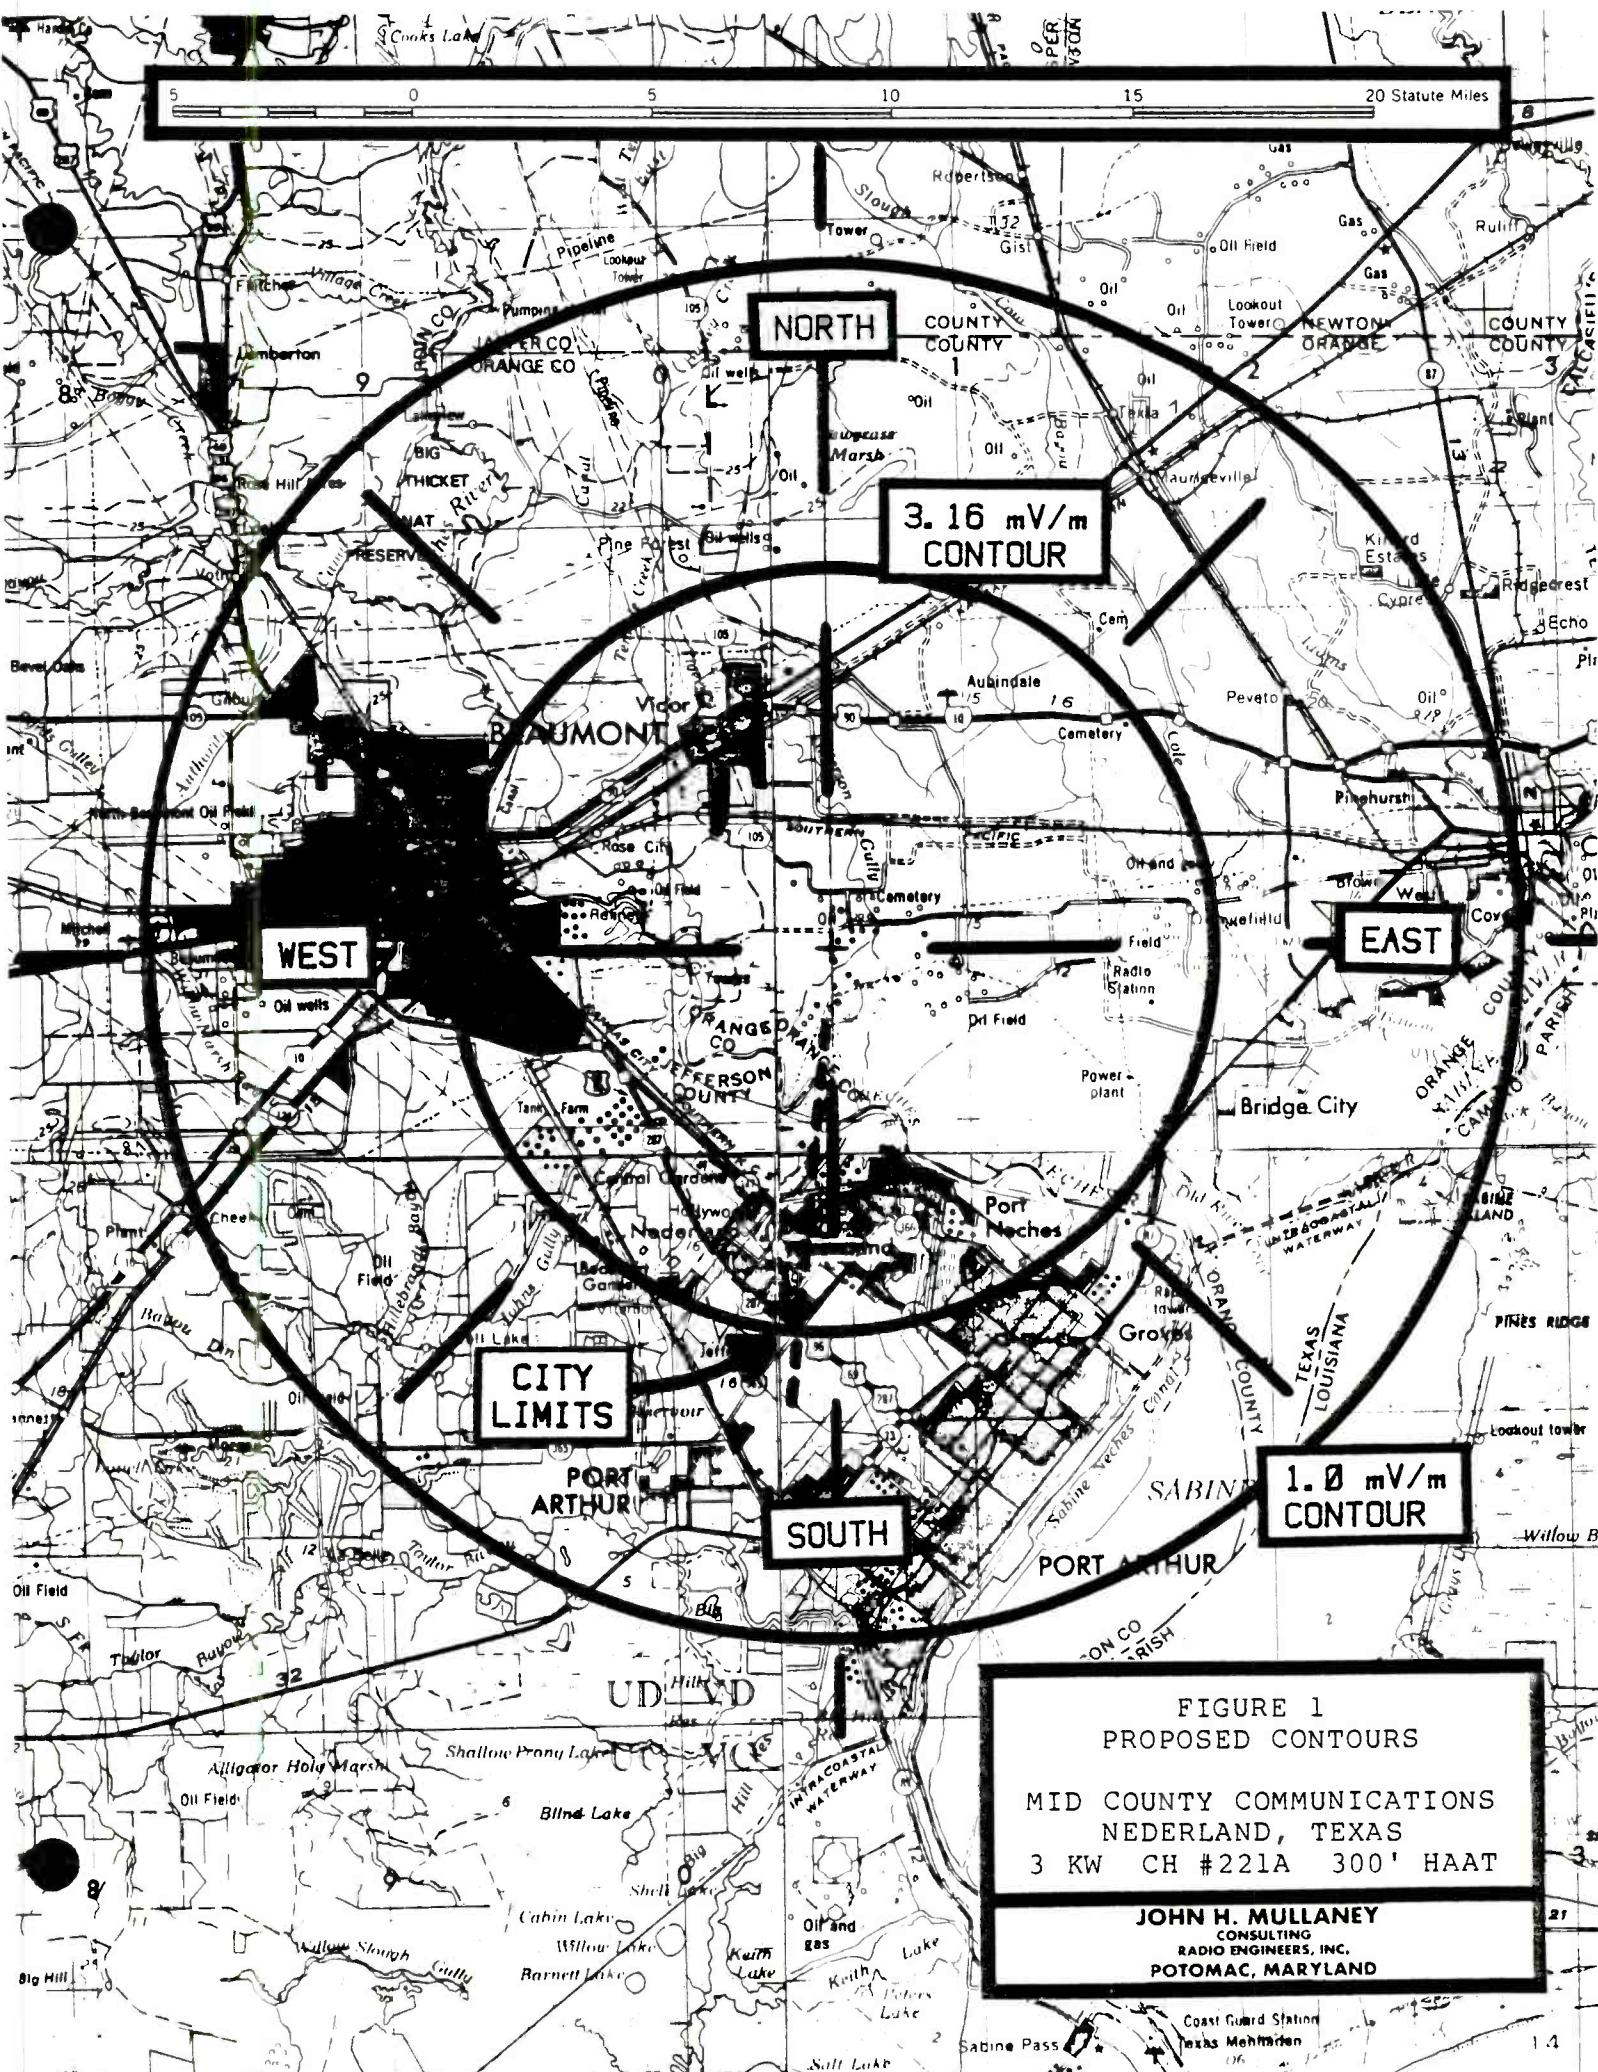

The application of the above equation, in our case, results in a minimum distance of 10.14 feet from the antenna. Inasmuch as the lowest element on the proposed antenna will be approximately 300 feet above ground level, it is self-evident that no hazard from radiation will exist.

III. SUMMARY:

The applicant proposes to construct a new FM facility on Channel 221A at Nederland, Texas. This application is in compliance with the Commission's Rules.

  
John J. Mullaney  
Associate Engineer

Map, edited, and published by the Geological Survey  
Control by USGS and NGS/NGA

Previously by photogrammetry, revised by aerial photography,  
taken 1942. Prepared from U.S. Naval Engineers 1:62,500  
topographic quadrangle maps taken 1930. First edition 1950.

Projected projection: 1937 North American datum  
10,000 foot grid based on Texas coordinate system  
south central zone  
1000 meter horizontal, 1000 meter vertical grid lines  
Scale 1:24,000

Red dots indicate areas in which new permanent buildings are shown  
Previous edition in paper compiled from aerial photographs  
July 1974

Map, edited, and published by the Geological Survey  
Controlled by USGS and NOS, NOAA  
Data derived by photogrammetric methods from aerial photographs  
Year 1942. Topography from U.S. Corps of Engineers 1946 map  
Derived from aerial photographs taken 1959. Last checked 1962  
Geographic projection: 1927 North American Datum  
1:250,000 scale; grid based on 1950 coordinate system  
Centers of quadrangles are projected to 1950 coordinates  
1000-meter Universal Transverse Mercator grid lines  
Zone 15, shown in blue  
Red dots indicate areas in which only residential buildings are shown  
Review shown in purple computed from older photographs  
Years 1970 and 1974. The information has not been checked  
Purple line indicates extension of urban area

Map is not to scale.
