Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section.

Surco

- WIRE
- CABLES
- TUBING

Available in a wide range of sizes . . . for operation under extreme temperature conditions.

MULTI-CONDUCTOR CABLES

Available with conductor sizes ranging up from #32 AWG. Vinyl, "Surflene", Teflon, polyethylene or silicone-rubber insulation furnished. Shielding and choice of appropriate jackets. Made to specification for special applications, with close dimensional tolerance control. "Spiralon" color-coding facilitates identification, even among hundreds of conductors.

NEW! HARNESS CONSTRUCTION

Multi-conductor constructions available as bulk cable or fabricated to required lengths with proper break-outs and terminations. Color coded vinyl insulation in complete size range presents neat appearance and facilitates fabrication.

COAXIAL CABLES

"Surco" coaxial cables include many types, with special characteristics such as low capacity, extra flexibility, small diameter, microphone, 2-conductor, and many special designs. Approved to Military Specifications JAN-C-17A, MIL-C-17B, and MIL-C-8721.

IMPROVED AIRCRAFT WIRE

Small diameter MD wire (vinyl, glass-braid, nylon) and standard Surprenant ASG sandwich construction (vinyl, glass-braid, vinyl, nylon). Both give excellent overload-safety, high and low temperature utility, good electrical properties; both carry approval to MIL-W-5086A. Other approvals to MIL-C-7078A, MIL-W-7072A, MIL-W-5274A.

HIGH TEMPERATURE AIRCRAFT WIRE made and approved to MIL-W-8777A and MIL-W-7139A.

"SURCO" TUBING

Vinyl, nylon, polyethylene, silicone-rubber, Kel-F, Teflon and neoprene tubing available. Wide variety of sizes, temperature ranges, electrical, and physical characteristics.

MINIATURE COAXIAL CABLES

Extruded low-loss Teflon dielectric. Low capacitance, stable electrical characteristics. Jackets of nylon, Kel-F, Teflon. O. D. 1/8 inch for 95 ohm cable.

"SPIRALON"

Surco "Spiralon" color-coding available on all vinyl, nylon, Teflon, Kel-F wire insulation with or without nylon jackets. As many as 3 spiral stripes in MIL-STD-104 colors, providing almost unlimited color identifications.

SILICONE RUBBER INSULATION

MIL-W-16878B, Types F and FF, for 600 and 1000 volt service up to 400°F continuously. Color-coding offered. Remains flexible at —100°F. Braided and jacketed constructions available for increased mechanical strength.

MINIATURE WIRE AND CABLE

Conductor sizes down to No. 32 AWG stranded, No. 30 AWG solid. Close manufacturing control permits small finished diameters on both single and multi-conductor cable. Wide color range; shielding and/or nylon jacket optional. Choice of many types of insulating compounds.

"SURCO" A-10 105°C INSULATION

Outstanding vinyl insulating compound developed in our own laboratories. Excellent mechanical, thermal, and dielectric properties. U/L approved for continuous 105°C operation without additional covering. Used in insulated wire conforming to MIL-W-16878B, Types B, C, and D, with or without nylon jackets or synthetic braids.

UL AND CSA APPLIANCE WIRE

80°C, 90°C, and 105°C approvals in a range of sizes, wall-thicknesses, and voltage-ratings. Color-coded insulation with or without nylon jackets, solid or stranded conductors.

EXTRUDED-TEFLON HOOK-UP WIRE

Available in all flexible strandings from No. 6 through No. 32 AWG, conforms to all requirements of MIL-W-16878B, Types E and EE; also made to NAS-703 Specification. Solid colors and "Spiralon" codings. Operable over the range from —90° to +210°C, continuously. Non-flammability complete chemical inertness, excellent electrical characteristics. Also in special thin-walls (0.005-0.008").

Tubing too. All colors, wide range of sizes.

NEW! RIBBON CABLES

Multi-conductor ribbon-cable. No lacings or overbraids. Available in vinyl insulation, completely color-coded wide range of sizes, continuous or cut-lengths. Great economies in weight and bulk.

"SURFLENE" INSULATED WIRE AND TUBING

"Surflene" (Kel-F) insulated wire manufactured to MIL-W-12349 (135°C, continuous). 15 solid colors or spiral stripes. Special thin-walls down to 0.008". Also available as jacketing and as slip-on tubing.

COLOR TV

ONLY TELECHROME INCORPORATED MAKES THEM ALL

COMPLETE FACILITIES FOR TV STATIONS, MANUFACTURERS & LABORATORIES

Finest color film chains, colorplexing, transmitting, analyzing, monitoring, testing equipment

617-BR AUTOMATIC BALANCE CONTROL FOR ALL COLORPLEXERS

(Regardless of Manufacture)

An ingenious circuit locks the entire encoding equipment in balance within 20 seconds after being turned on. Thereafter balance is held under even the most difficult operating conditions.

1003-A VIDEO TRANSMISSION TEST SIGNAL GENERATOR

Portable

Completely self-contained, portable. Produces multi-frequency burst, stairstep, modulated stairstep, white window, composite synch. Regulated power supply. 12¼" standard rack mounting or in carrying case.

700-A 3V COLOR FILM CHAIN

Finest in quality, lowest in price. 3V provides greatest latitude in selection of color films. Designed specifically for broadcast application, requires little space. Multiplexes 35 or 16mm film, slides, opaques.

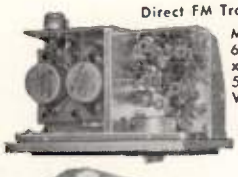
1073-A SINE-SQUARED SQUARE WAVE GENERATOR

Newest test unit produces new type of wave forms for testing any part or all of a TV or pulse system for amplitude and phase characteristics. "Go-No-Go" indication simplicity.

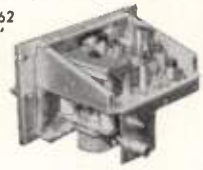
1601-AR CHROMASCOPE

New secondary phase standard for accurate reading to .01°

Signal Certification Equipment. Accurately measures the performance alignment, and phase errors of color TV equipment. Presents on a cathode ray screen a continuous polar plot of the phase and amplitudes of all colors in a composite color video signal. Capable of a .2° accuracy with 1604-AR phase magnifier.



1008-A VERTICAL INTERVAL TEST SIGNAL KEYER

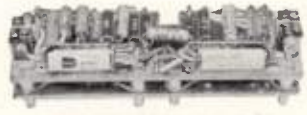


Inserts any wave form into vertical interval during program time for correcting facilities manually or automatically.

TELEMETERING TRANSMITTERS • High Power in Small Packages

Direct FM Transmitters Crystal controlled 215-235 megacycles. 125kc deviation.

Model 1462
6" x 4⅛" x 3¾"
50 to 80 Watts



Model 1463
5 19/32" x 3 13/16" x 4"
15 to 30 Watts

Model 1472
4" x 1.5" x 2.7"
2 Watts

Model 1460
5" x 4⅜" x 3 5/16
RF Amplifier
15 to 30 Watts

Model 800—4.5" x 1.3" x 1.4"

SUB-CARRIER OSCILLATOR. Deviation stability ±1% of band width. Deviation linearity less than 1% of band width under all conditions measured from a straight line drawn between end points.

636-B CHROMALYZER

Portable Precision Color Bar Generator for checking color broadcast studio and transmission facilities, receivers and monitors. Can be tied into a system. Provides complete composite color signals at 100 or 75% chroma.

1603-AR PHASE SLOPE (ENVELOPE DELAY) CURVE TRACER

Instantaneous scope or meter reading of the envelope delay and amplitude characteristics of any network, video amplifier, or systems. Precise-time swing. Has separate transmitter and receiver units which allow one way or loop measurements.

DELIVERY 30 DAYS

Literature on these and more than 150 additional instruments by TELECHROME are available on request.

HOW TMI KEEPS THE FINGER OF TECHNOLOGY ON YOUR MAGNETIC CORES...

EVERY STEP OF THE WAY !

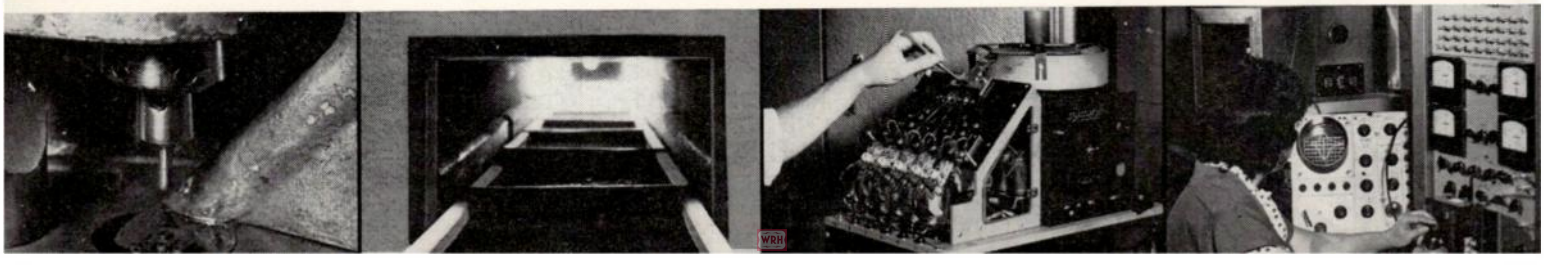
Magnetic core making is a fine art at Telemeter Magnetics, Inc., where experienced technologists follow the production of your cores from specifications to the most painstaking methods of precision manufacture, testing, and quality control. Facilities include advanced production and test equipment. Magnetic core pioneers from the beginning, TMI today is headquarters for everything in magnetic core storage, including complete memories and systems.

For details, circle #177 on Reader Service Card

MAGNETIC CORES FOR STORAGE

TYPE	Turnover Time *microseconds*	Minimum Signal *millivolts*	Maximum Noise *millivolts*	Pulse Width *microseconds*	Amplitude *Amperes*	Rise Time *microseconds*
80T1	1.25	140	15	2	0.82	0.2
80T1B	1.25	110	10	2	0.82	0.2
80T5	4.0	40	4	6	0.36	0.6
50T1	1.0	60	5	2	0.50	0.2

MAGNETIC CORES FOR SWITCHING



TYPE	Br/Bs	Major Loop Drive (NI)	Q Volt-Sec per Turn	O.D.	I.D.	Height
197T5	0.93	1.9	1.5	0.189"	0.9"	0.09"
375T5	0.95	2.5	1.8	0.375"	0.280"	0.125"

0/1 **TELEMETER MAGNETICS Inc.**

2245 Pontius Avenue, Los Angeles 64, California *Eastern Regional Office: 306 H St. N.W., Washington 13, D.C.*

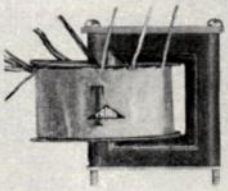
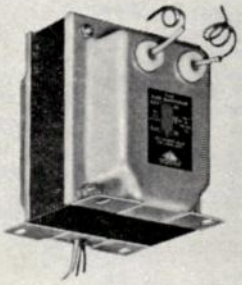
TRANSFORMER NEWS

FROM TRIAD





TRIAD OFFERS 940 STOCK ITEMS, PLUS SPECIALS

Shown, right, are several of the 940 transformers immediately available from our catalog. Many specific items are made to meet military specification requirements, and all are made to meet Signal Corps standards. (See below.) You name the application—Triad has the solution. Occasionally requirements are so unusual that no Triad standard catalog transformer will serve. Then we build to special requirements, using the most modern equipment in the industry.

NEW CATALOG OUT—General Catalog TR-58 on Triad Quality Engineered Transformers contains all Triad types, plus specifications and prices. We will gladly mail you a copy on request.

TRIAD

RIQAP

(Reduced Inspection—Quality Assurance Plan) Your own incoming inspection and field service requirements are reduced to a minimum when you specify Triad. All Triad Transformers are manufactured under this Signal Corps approved plan for quality assurance. RIQAP is awarded only to those companies who continue to maintain Signal Corps standards.

TRIAD TRANSFORMER CORPORATION

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section.

A WINCO POWER SUPPLY DESIGNED TO YOUR EXACT NEED

Wincharger engineers have solved many formidable power problems for both the military and civilian companies. If you have an application with special problems of vibration, altitude, heat, shock, humidity or regulation, tell us about it. Wincharger engineers will design a power supply to fit your exact needs. Problem solving is a specialty at Wincharger.

ALTERNATORS

Brushless alternator for emergency AC aircraft power or missile power supply systems.

SPECIFICATIONS

Weight—20.5 lbs.
Rated Output—4.0 KVA at 80% power factor
Ambient Temp.—100° C.
Temp. Rise—40° C.
Voltage Regulation—plus or minus 5%
Speed—1200 RPM plus or minus 5%
Voltage—208/120, 3 phase—400 cycle

TRANSISTORIZED POWER SUPPLIES

Design capitalizes on the inherent advantage of transistorized equipment . . . stresses retrofit, which means they can be used to replace vibrators and dynamotors in existing aircraft if so desired.

SPECIFICATIONS

3 sizes—25, 50 and 100 watts with overload capacities up to 100% for short periods.
Volt Ripple—less than 1%
Efficiency—85%

ALTERDYNES

An urgent Armed Forces requirement for AC power coupled with a conventional dynamotor for automatic-tuning, necessitated the development of this special Alterdyne.

SPECIFICATIONS

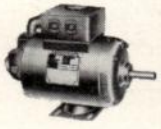
Input—Nominal 27.5 Volts DC.
Output No 1—250 Volts DC at 300 Mils.
Output No. 2—43 Volts DC at 10 Mils
Output No. 3—115 Volts—400 Cycle AC 30 Watts
Temperature Range—Minus 40° C to plus 45° C.
Duty—Continuous

DYNAMOTORS

As higher-altitude jet aircraft were developed, dynamotors were required that would operate at 80,000 feet. The result—this Winco dynamotor to operate at higher altitudes.

SPECIFICATIONS

Input—Nominal 27.5 Volts DC
Output No. 1—600 Volts DC at 550 Mils.
Output No. 2—250 Volts DC at 150 Mils.
Unfiltered Ripple Maximum—1%
Duty Cycle—5 Minutes On
5 minutes Off
And Repeat.
Temperature Range—Minus 55° C to plus 85° C.
R.P.M.—8,500
Altitude—80,000 feet.



INVERTERS

Literally thousands of each of the Winco Inverters from 20 VA to 6½ KVA have been manufactured on a mass-production basis at low-cost without sacrifice of high quality standards.

SPECIFICATIONS

Model No. 3186
Input—Nominal 27.5 Volts DC.
Output—115 Volts, 400 Cycle 1 phase, 2500 VA.
Temperature Rise—50° C.
R.P.M.—6,000 Approx.
Altitude—50,000 feet.

AC & DC BALL BEARING
GENERATORS

Complete line from 500 watts to 10 KW. 1800 or 3600 RPM. Units equipped with terminal box or complete controls. Application engineering service available fo special adaptations.

PORTABLE POWER
GENERATORS

Equipped with Automatic CONSERV-er. Brings engine to full power when load is applied, reduces to idling speed when tool is turned off—all automatically. 300 watts to 10 KW.

1959 IRE DIRECTORY

DIRECTORY I COMMUNICATIONS

20 major groups
96 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications

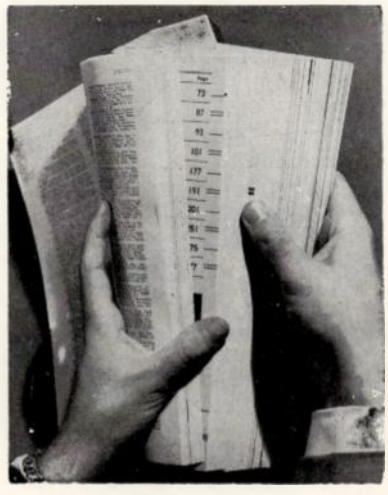
II. Components

III. Controls & Instruments

IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 852 subproducts in alphabetical order, consult the pink section preceding page 1.



The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 141, 241, 275, 461, and 519.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

AINSLIE ANTENNAS

.....for the 100-500 mc BAND

MODEL CF121M — 12 ft. diameter with dipole exciter. Gain 23 db at 500 mc. Minimum side lobes 20 db (or better). Cross Polarization 20 db (or better).

Low VSWR at any frequency in the band. Accomplished through adjustable balun and reflector assembly.

STOCK REFLECTORS—4 in. to 10 ft. diameter solid spun. 4 ft. to 18 ft. diameter mesh. Larger sizes or special shapes on request. Antennas up to 10,000 mc.

Weatherized & corrosion resistant. Rugged, lightweight.

PROMPT DELIVERY
Any type antenna or reflector precision-built to your specifications.

Write for complete performance data sheets.

MODEL CF141M with 14' diameter reflector available

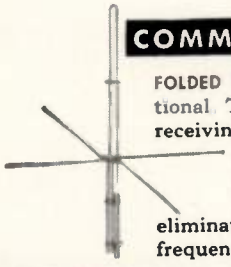
ANTENNAS
ANTENNA SYSTEMS
TRANSMISSION LINES

The ANDREW product line covers the related fields of antennas for communication and broadcasting, and transmission lines to connect these antennas to transmitters, receivers or other electronic equipment.

PARABOLIC ANTENNAS

Type P4-59 4-foot antenna with waveguide horn for 5925-6425 mc.

A wide selection of standard models in a complete range of sizes and frequencies is stocked for immediate delivery. Special antennas are designed and manufactured to meet individual requirements. Here is a representative selection of stock antennas.



TYPE NUMBERS OF STOCK PARABOLIC ANTENNAS

Frequency Range	ANDREW Type Number			
(MC)	4 ft. dia.	6 ft. dia.	8 ft. dia.	10 ft. dia.
890- 960	P4- 8	P6- 8		P10- 8
1700-1850	P4-17	P6-17		P10-17
1850-1990	P4-18	P6-18		P10-18
1990-2110	P4-18	P6-18		P10-18
2450-2700	P4-24	P6-24		P10-24
3700-4200			P8-37	
5925-6425	P4-59	P6-59	P8-59	P10-59
6575-7125	P4-65	P6-65	P8-65	P10-65
7125-7425	P4-71	P6-71	P8-71	P10-71

Tower or roof mounts are available for all sizes of ANDREW parabolic antennas. They must be ordered separately. T4 is a tower mount for four or six-foot antennas. For roof mounting, order Type M4. Mounts for eight and ten-foot antennas are designed for either tower or roof mounting. Order Type T8 for either of these antennas. Most standard ANDREW mounts include elevation and azimuth adjustments of at least ± 5°.

Dish and feed heaters are available as standard items and are recommended for antennas above 5000 mc in ice areas.

COMMUNICATIONS ANTENNAS

FOLDED UNIPOLES (25 mc to 174 mc) omnidirectional. The ideal fixed station transmitting and receiving antenna. Inexpensive, lightweight and easy to install. Some lower frequency models incorporate new design changes which increase wind load ratings and eliminate field cutting of vertical elements to frequency.

HIGH GAIN—for 148-174 mc, 400-470 mc. ANDREW High Gain omnidirectional antennas will increase your coverage and multiply benefits by the number of mobile units in the system. Type numbers, frequency and gain are shown below.

Omnidirectional Pattern		
Type 3000	148-174 mc	6.3 db
Type 3006	148-174 mc	9.0 db
Type 212	450-470 mc	10.0 db
Type 4000	450-470 mc	7.6 db
Type 4002	450-470 mc	5.0 db
Type 4010	400-420 mc	7.5 db

Offset Omnidirectional Pattern		
Type 201	450-470 mc	10.8 db in max. dir.
Type 3004	148-174 mc	8.1 db in max. dir.

CORNER REFLECTORS. Unidirectional antennas for 25-174 mc, 400-470 mc, and 890-960 mc. Preferred for their high gain and stable operation under severe weather conditions. Also may be utilized for low power TV transmitting in directional and omnidirectional arrays.

TRANSMISSION LINES

HELIAX, flexible air dielectric cable combines the efficiency of the finest copper cables with handling ease of solid dielectric types. Available in two sizes, 7/8", Type HO and 1 5/8", Type H1, with complete series of pressurized end fittings. Type HO may now be used up to 5000 mc.

RIGID AND SEMI-FLEXIBLE. Complete range of sizes for UHF and VHF systems. Semi-flexible soft copper cable in 3/8" and 7/8" sizes, rigid copper line 7/8" to 9" sizes. Adaptors and fittings available from stock. New 50 ohm, 6 1/8" line now available for high power applications.

WAVEGUIDE. High efficiency aluminum or copper clad steel waveguide in sizes ranging from 9 3/4" to 21" for UHF systems. Includes accessories for complete line installation.

COAXIAL SWITCH. Automatic, 50 ohm, 3 1/8", UHF and VHF. This new, automatic switch now allows high power communication systems, as well as VHF and UHF television stations, the convenience of four-second switching of 3 1/8" coaxial transmission line at powers up to 10 kw at 1000 mc. Both automatic and manual models include automatic high voltage disabling switch and remote position indicating lights.

ANTENNA SYSTEMS AND PLANNING

ANDREW Corporation offers engineering assistance in the planning of your antenna-transmission line system at no cost to you. Contact the nearest ANDREW office for this consulting service.

Be sure your library contains Andrew catalog 21 and the new product supplement, 21S.

...it's all GENERAL BRONZE

It is called Integrated Antenna System Planning at General Bronze. Every mechanical and electrical function essential to your needs is studied, and the related products developed and produced —all as part of one coordinated project.

This concentration of responsibility and authority in a single design, development and production team, concerned only with your specific requirements, assures maximum efficiency for your application. Because there are no pre-designed models forced to serve a multitude of needs, there is no averaging of requirements.

General Bronze specializes in Integrated Antenna Systems for scatter propagation, telemetering, radar, radio astronomy, missile tracking, communication studies.

ANTENNAS — *Airborne, ground support and missile tracking.* From specialized airborne to larger radio telescopes. S.V.E.*—Swept Volume Efficiency — a new concept in VHF-UHF antenna design allows swept volume reductions as great as 10 times for large VHF-UHF rotating antennas, or conversely gain improvements of 50 to 200% in the SAME volume. Ideal for shipborne and airborne radar, and UHF communication.

WAVEGUIDE ANTENNA FEEDS AND HORNS — Antenna feed designs for radar and scatter propagation to solve your antenna feed problem. Famous DEW line design achieves highest gain, broadest band, lowest VSWR.

RADIO ASTRONOMY AND SCATTER COMMUNICATION — Antenna microwave systems and components to meet the exacting requirements of the field. Specialists in both airborne and scatter communication who have developed numerous proprietary designs are at your service.

HIGH POWER ROTARY JOINTS — Single and multiple channel, VHF and UHF for high and low power applications. Standard designs are now in production. Design facilities to meet your special requirements.

PEDESTALS, TOWERS AND SUPPORTS — All types, all sizes, specially designed to attain the application requirements.

SERVO CONTROL SYSTEMS — For micro-precision control of mammoth systems. New "Eddy-Current" clutch servo control systems eliminate need for motor-generator sets and DC drive motors assuring no drift, high reliability, simplicity.

For your antenna system requirements, rely on General Bronze. Write today for information on your specific antenna system needs.

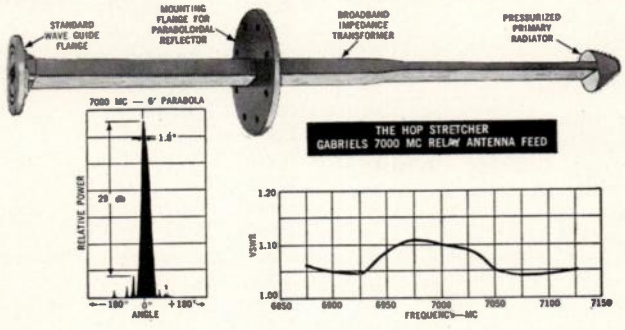
Gabriel electronics division

THE GABRIEL COMPANY

INTEGRATED ANTENNA PROGRAMS

33,000 mc



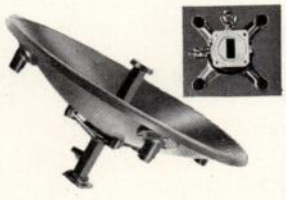
25 mc

RESEARCH DEVELOPMENT PRODUCTION

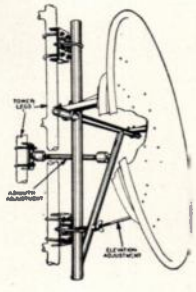
New Products

The HOP-STRETCHER feeds offer higher gain, lower sidelobe levels and more desirable beam-widths for center-fed parabolic antennas. This feed was developed for S, X, K_u and K_a bands.

Technical features of X-band antenna • Sidelobes at least 24 db down on 4, 6, 8 and 10 ft. reflectors • High gain efficiency, 65-70%

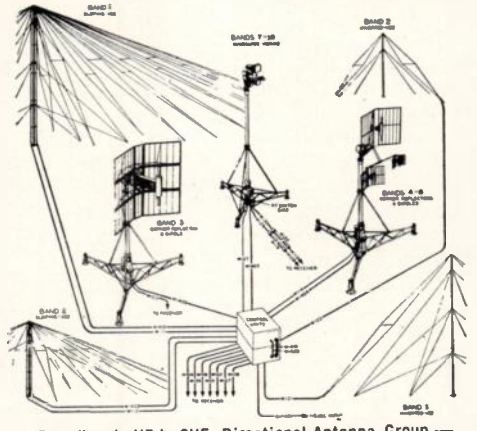


THE HOP STRETCHER
GABRIELS 7000 MC RELAY ANTENNA FEED



The new hi gain 3 kmc Cylindrical Coaxial Feed provides similar E and H-plane patterns, minimum side and backlobes, and negligible squint. Rear-mounted, with easy polarization adjustment to any angle.

7000 mc Offset Antenna. Ideal for installations where passive reflectors are utilized — VSWR less than 1.1:1 over 5900-8500 mc — Sidelobes at least 24 db down — gain is 41 db at 7000 mc. Elliptically shaped reinforced fiberglas reflector.



The new X-band parabolic antenna with standard feed. Features variable polarizing adjustment, 0 to 90°. Manually locked in position.

The new universal 3-point suspension mounting bracket for 2, 4, 6, 8 and 10 ft. parabolic reflectors.

Features • Independent azimuth adjustment. • Independent elevation adjustment. • Adaptable for mounting in all locations.

Broadband, HF-to-SHF, Directional Antenna Group — Remotely controlled.

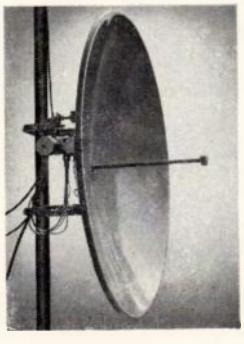
Low-drag Airborne Flush-mount Antenna.
Beacon — Countermeasures — Homing — Navigation

Missile Antennas — Telemetering, Destruct, Guidance
ICBM, Surface-to-Air, Air-to-Air, and Surface-to-Surface.

Radar Antennas

- Shipborne Search
- Harbor Control
- Airborne Height Finding
- Land Base Search

Designed, developed, and constructed to military specifications with improved strength-to-weight ratio and component reliability.



Aleutian Line—Dew Line
Low loss, heavy duty duplex feed horns for Tropospheric Scatter Radio Communication Systems.

Motorized Passive Reflector
For maximum point-to-point transmission in microwave relay links. Fast, accurate, easy adjustment from remote location. Manually adjusted reflectors also available.

GABRIEL'S STANDARD MICROWAVE PARABOLIC ANTENNAS

...Contributing millions of trouble-free operational hours for industry and the military.

- 7000 mc — Broadband (5925-7425 mc) high gain > 40 db low sidelobes — low VSWR < 1.13:1 over band.
- 4000 mc — Narrow-beam broadband (3700-4200 mc) — low VSWR < 1.2:1 — gain > 37 db.
- 2000 mc — Available in offset and center-fed feeds. Narrow-beam broadband (1750-2110 mc) — high gain > 28 db low VSWR < 1.3:1 over band
- 940 mc — All weather radome covered feed — gain > 22 db low VSWR < 1.25:1.

The Gabriel Electronics Division is one of the world leaders in microwave relay link antennas, and the more complex antennas. They are dedicated to improve and extend the state-of-the-art in antennas and antenna components.

Call or write to GABRIEL ELECTRONICS DIVISION for counsel on your antenna needs.

THE WORLD'S LARGEST ANTENNAS

ARE COMING FROM KENNEDY

Kennedy builds them big — to meet the expanding needs of electronics. And Kennedy builds them rugged — to withstand the most demanding conditions of climate. What's more, we have the complete facilities and engineering skills to develop, design, build, and erect any antenna system within the realm of creative engineering imagination.

For more complete information, send for your free copy of the handy file-size Kennedy Antenna Equipment folder.

WAVE GUIDE COMPONENTS...

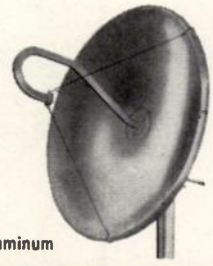
ANTENNAS

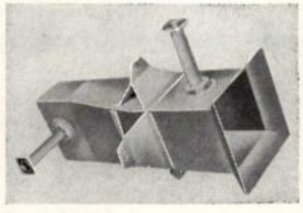
MINITRACK ANTENNA



Horizontally or vertically mounted arrays similar to this MINITRACK antenna can be designed for individual beam requirements or you can select from a number of existing designs.

PARABOLIC ANTENNAS FROM 4-FT. TO 19-FT.

Mesh sizes from 4-ft. to 19-ft. and spun sizes from 4-ft. to 6-ft. Frequency bands from 806-960 mc, 1700-2400 mc and 5925-7450 mc. Other bands available on special order. Variety of mountings.

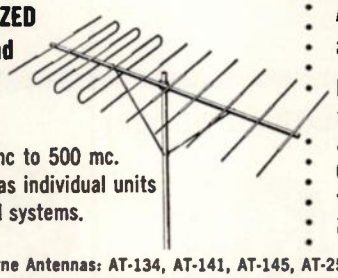


6-Ft. Expanded Aluminum Mesh 4-Ft. Spun Aluminum

28-FT., 32-FT. AND 60-FT. PARABOLICS

Expanded aluminum mesh. Ground mounted or tower mounted. Unique design allows rapid, simple erection.

Dual polarized horns supplied to meet your requirements at reasonable cost.



28-Ft. Diameter Parabolic and Ground Mount

Other TACO Products

RUGGEDIZED YAGIS and SCREEN YAGIS:

from 30 mc to 500 mc. Available as individual units or stacked systems.

HELICAL ANTENNAS and MOUNTS

Mechanical mount for azimuth and elevation. Electromechanical remote mounts also available. Helicals available in 4, 6, or 8 turns from 215-265 mc. Other frequencies on special order. Mount illustrated is H-M-1.

Airborne Antennas: AT-134, AT-141, AT-145, AT-256, AT-450, AT-500, G-812, G-833, G-838
Ground Antennas: AT-150, AT-197, AS-390, AS-505, AS-541, AS-542, AS-543, AS-544, AS-554
Corner Reflector Antennas: 152-174 mc Unipole Antennas: 30-50 mc

AMATEURS find ROHN TOWERS *BEST* because

● wide selection

—just the *right* tower for *your* particular purpose. Available in 4 major models and in sizes from 45 to 300 ft! Heavy duty model big enough for biggest antennas that hams require.

● specially designed

—amateurs rave about the special "Fold-Over" Rohn Towers! No need to work "off the ground" on your antenna—merely fold completely over and then crank right back up. Thousands of hams acclaim that this is the *best* tower ever designed for them!

● hot dipped galvanized

—permanent, no-maintenance finish—stays bright and new.

● superior construction

—these towers rated to handle the equivalent of about any load you require —made by precision machines—fully tested—easily shipped and installed. Thousands in use coast-to-coast.

● Designed and manufactured by largest exclusive manufacturer of TV Communications towers. Get the *full facts*—then you'll buy ROHN!

Precision Personified!

. . . From electronic cabinets to radar reflectors, Washington Aluminum designs and fabricates to your specification with tolerances to meet the most rigid requirements.

Complete packaged cabinets are available, including basic structure, side panels, doors, front panels, and interior chassis and frame structures necessary to support electronic equipment.

Reflector tolerances on both circular parabolic and rectangular parabolic antennas meet the most rigid specifications, depending upon operational frequency range.

PIPELINE TO PRECISION

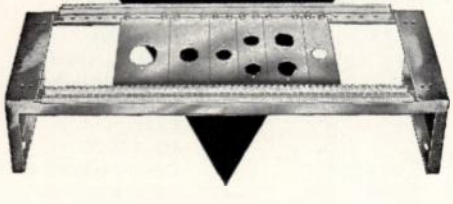
Model WWVC STANDARD FREQUENCY COMPARATOR

A highly sensitive (better than 1 uv on all frequencies) crystal controlled receiver for utilizing transmissions of the National Bureau of Standards stations WWV and WWVH. Used for precise audio and radio frequency standards work as well as accurate time interval measurements. Available in cabinet or for rack mounting using a 5¼" panel.

Model SR-7 WWV RECEIVER

This receiver is the dual conversion type. Dimensions: 3-15/16" x 11" x 8½" deep. Available in upright or vertical models, or as rack mounted model. Noise limiter, antenna trimmer and provision for an oscilloscope or head phone are incorporated.

Model AK-8 ANTENNA KIT



This special antenna is designed to provide optimum response to signals from WWV and WWVH on 2.5, 5, 10, 15 and 20 mc. Includes modification kit for receiver with all wire, 50' of coaxial cable and suitable fittings to provide outstanding performance. Antenna is completely assembled; needs only one support for satisfactory operation.

Benchpak Model BP 200A Adjustable POWER SUPPLY

Hi range 150V to 300V; Lo range 0 to 150V. 150 MA available throughout (200 MA at high end of each range) plus a fixed 150V 50 MA at all times. 4" wide x 8" deep x 7½" high; weight 14 lbs.

CHANGEABLE CHASSIS

SPEED-CHASSIS

The Speed-Chassis is a flexible breadboard assembly with interchangeable socket arrangements which can be mounted on a relay rack if desired. Shield cover and panel are available to make successful breadboard assemblies both permanent and neat.

alfax is revolutionizing graphic recording!

"ELECTRICITY IS THE INK"

ALFAX PAPER AND ALDEN ADJUSTERLESS RECORDING TECHNIQUES MAKE POSSIBLE—

• ***New Accuracies and Resolution in Direct Graphic Recording!***

Record full range of your electronic signal outputs—monitor processes and operations directly and instantaneously on Alfax Paper —no pens or ink—up to 17 step permanent tone shades.

Magazine Fact Finder— 2 Channels Plus Timing

Here is a compact Magazine Recorder which will permanently record two separate operations and automatically print a recurring time signal on the Alfax Tape. Simple to install—they will operate unattended — remotely or on the spot.

Multi-Channel Fact Finder— 30 Channels Plus Timing

Record thirty channels of on-off data by merely supplying current to writing styli—no pens or inks—simple motion switches are easily installed to make or break writing current to Alfax Paper. Ideal for monitoring production operations and processes, this compact, rugged recorder is portable for lab, factory and field use.

Alden "Flying Spot" Component Recorders

Get hi-resolution tone shade recordings on Alfax Paper of detecting instruments using scanning or sweep methods to collect data. Synchronize Alden "Flying Spot" with sweep or rep rate of your equipment—use direct signal outputs to mark Alfax with tone shades proportional to signal variations. Ideal for sonar, radar, facsimile, ultrasonic and magnetic flaw detection etc.

Alden Curve Plotters

The Basic Helix Recorder with special electronics can provide continuous, automatic curve plotting of phenomena converted to voltage. Any number of channels can be recorded simultaneously along with standard or reference signals so that the information is instantly and permanently self-calibrated.

• ***Fastest, Most Accurate Means of Communication!***

New high and low speed Alden facsimile recording systems using Alfax Paper are the most accurate means of communication today —are simple to install and operate virtually unattended.

High Speed Selective Dispatch Facsimile System

Specially designed to permit selection of pertinent data from any copy — letters, dispatches, reports, etc. — for instant transmission to wherever needed—yet complete reproductions can also be sent. 72 square inches of copy, 1800 words of newspaper type, or 900 words of typewriter text can be transmitted and received per minute.

Continuous Reproduction Facsimile System

Extremely high quality reproduction of large copy: such as newspapers, weather maps, blueprints, finished advertising layout, drawings, photographs, etc., can be transmitted easily with this equipment. Copy is scanned flat and reproduction automatically on remote continuous recorder.

Alden Giant Bulletin System

Fastest, accurate means of disseminating information to large groups of people. Automatically provides changing "up to the minute" bulletins 4 feet wide and up to 10 feet high and as much as 12 square feet of copy per minute, enlarged 10 times from remote flat-copy scanner as sent either by wire or a microwave system.

AMPEX

World Leader in Precision Magnetic Tape Recording Instruments

Ampex Tape Recorders are in service throughout the world in television and radio stations, and in professional sound recording studios . . . wherever finest quality is required.

VR-1000 *Videotape* Recorder*
First commercially available Videotape Recorder. Magnetically records what the TV camera "sees," in either black and white or color. Playbacks look "live."

MODEL 300 *Magnetic Tape Recorder*
Standard of the professional recording industry, it consistently delivers the finest in audio reproduction. Available in as many as 8 channels, in console and rack mounting.

MODEL 351 *Magnetic Tape Recorder*
First choice of the broadcasting industry. Features printed circuits and miniature tubes. Available in console, rack and portable models, with one or two channels. Sold by dealers.

MODEL 3200 *Magnetic Tape Duplicator*
High speed duplication, with superb fidelity, of recorded master tapes. Makes up to 10 copies at one time. Available with one, two or four channel heads.

Fully illustrated brochures, complete with specifications, are available on each recorder and the duplicator. Technical bulletins are also available on the following subjects: VIDEOTAPE RECORDING • VIDEOTAPE SPLICING • MULTI-CHANNEL RECORDING • MULTI-CHANNEL TECHNIQUES • Write for the copies you want, today.

Tenth Year of Leadership

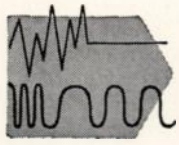
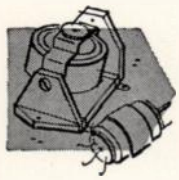
NEW!

DC to DC and DC to AC solid-state power converters voltage regulated, frequency controlled, for missiles, telemetering, gyros, servos



Interelectronics Interverter solid-state thyratron-like elements and magnetic components convert DC to any number of voltage regulated or controlled frequency AC or filtered DC outputs from 1 to 1800 watts. Light weight, compact, 90% or better conversion efficiency.



Ultra-reliable in operation, no moving parts, unharmed by shorting output or reversing input polarity. Complies with MIL specs for shock, acceleration, vibration, temperature, RF noise.

Now in use in major missiles, powering telemetering transmitters, radar beacons, electronic equipment. Single and polyphase AC output units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics — first and most experienced in the DC input solid-state power supply field, produces its own solid-state gating elements, all magnetic components, has the most complete facilities and know-how—has designed and delivered more working KVA than any other firm!

For complete engineering data write Interelectronics today, or call LUdlow 4-6200 in N. Y.

GENERAL DEVICES, INC. ANNOUNCES

its new and expanded product line and facilities as part of a well organized plan now in operation. The company has moved to modify, improve and expand its organization and to considerably increase its financial working base. Its Multichannel Products Division is the first specialized operation of its kind in the country dealing exclusively with multichannel instrumentation and related problems. The Division is made up of three major sections each of which provide the latest technology in the field.

MULTICHANNEL SYSTEMS PRODUCTS SECTION

This section is capable of complete theoretical analyses of multichannel problems including the choice of basic modulation methods, the application of information theory, practical considerations in providing optimum systems for given applications, ground and airborne radio link systems; creation of standard and special telemetery and data handling systems, particularly FM-FM, PWM and PCM systems. Equipment is currently available for systems and for portions of systems from the end instruments to the final record or computer. All electronic (non-mechanical) systems are now available. Applications range from commercial plant installations on the ground to complex minimum equipment space instrumentation installations.

—*A booklet dealing with the choice and application of sampling devices entitled: "Electronic and Electro-mechanical Sampling Devices for Instrumentation", is available upon request.*

The only combined high and low level PDM multicoder miniaturized and qualified for the most rugged applications.

Switches shown above represent typical applications, namely drift compensation of analog computer amplifiers, high performance aircraft telemetering and ICBM nose instrumentation.

MULTICHANNEL ELECTROMECHANICAL PRODUCTS SECTION

This section is largely concerned with research and development, design and manufacture of multicontact high speed sampling switches for widely diverse applications. Although the Company developments involve all forms of multichannel switching principles including magnetic, capacitative and mercury forms, two forms based on the unique developments over the past year are being produced on a regular basis in large quantities. For applications allowing high contact resistance the Company has a well proven and qualified Perma-Brush self-lubricating wiping arrangement. For low contact resistance applications a unique metallic wiper design is used. The multi-contact switch group represents the greatest concentration of experience in the Country capable of stating quickly and reliably how any requirement can or cannot be met. Applications include radio and wired telemetering systems, cathode ray tube displays, computers, multipoint checkout equipment, multi channel tape storage systems.

—*Send for customer requirement data sheet for mechanical switch applications. (GDI 4-56A)*

MULTICHANNEL ELECTRONIC SWITCH PRODUCTS SECTION

This section comprises a group of specialists in the development and design of multichannel switches using non-mechanical methods. Together with its engineering model shop and specialized production capacity, it is able to appraise and fulfill any practical switching requirement. Technically it employs a number of approaches including solid state, electronic and in some cases entirely passive elements to effect the required switching process with no moving or wearing parts. Many U. S. and Foreign Patents have been applied for. An intimate knowledge of the related systems circuitry makes it possible to provide custom designs for maximum performance and minimum cost.

—*Send for customer requirement data sheet for electronic switch applications. (GDI 4-58C)*

Typical high level solid state electronic commutators (Electrocoms) available with mating keyers or subcarrier oscillators, standard 45x20 and 30 channel types capable of any of three standard sampling rates.

GENERAL DEVICES, INC.

P. O. BOX 253, PRINCETON, NEW JERSEY

PHONE: DAVIS 9-2323 — TWX: Monmouth Junction N. J. 271X

OFFICES IN DALLAS, LOS ANGELES NEW YORK STATE, NEW ENGLAND AND CANADA

GDI is in need of a few top engineers with experience in these fields who would like to join our company at a responsible level and share in the success of our rapidly growing organization. Send resume to Executive Office, Princeton, N. J.

AN/APR-4 RECEIVERS

with all five Tuning Units covering 38 to 4,000MC.; versatile, accurate and compact, the aristocrat of lab receivers in this range. Complete with wideband discone antenna, wavetraps, 100 page manual, plugs, cables and mobile accessories as required.

The AN/APR 4 has been our specialty for over ten years. Over 40 hours of laboratory time is invested in each complete set immediately prior to shipment, so that we can not only guarantee it to pass A-N specifications, but to have the inevitable mass-production irregularities corrected and the latest improvements added. We maintain a complete stock of spare parts and expect to service our customers' sets indefinitely. Write for data sheet and quotation. Also, prior models SCR-587, RDO and AN/APR-1.

TEST EQUIPMENT

of highest quality, new and reconditioned, military surplus and top commercial brands in stock at money-saving prices. Let us quote to your requirements.

POWER AMPLIFIER

MODEL A-3052-2

This companion unit to the Model 3115 Transmitter is employed to achieve 25 to 100 watts r-f power with as little as 2 watts input. The same rugged design criteria are inherent with this instrument as are designed into the Transmitter. It is also approved for use in several missile system programs.

- Frequency—215-260 mc.
- Temperature— −55°C to +75°C
- Shock—100g
- Vibration—20g, 20-2000 cps
- Altitude—0-70,000 ft.

Bulletin RAD B-102

MULTICOUPLER for TELEMETRY RECEIVERS

- 9 Channels
- 55-85 db Interchannel Isolation

Designed to the exacting specifications of an advanced ground telemetry receiving system used in missile range instrumentation. Provides for coupling up to nine receivers into a single antenna output. High degree of isolation between outputs (55-85 db) effectively eliminates crosstalk and impedance problems. Tuning range of 216-255 mc and a bandwidth of 30 mc.

Bulletin RAD B-106

MODEL 4-100

FM TELEMETERING TRANSMITTER

MODEL 3115

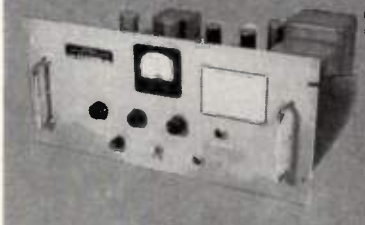
This new improved model, approved for use in several missile systems, is designed for extreme environmental conditions: 100g shock for 6 milliseconds, 20-2000 cps vibration at 10g, −55° to +75° C, 70,000 ft. altitude. Subminiaturized and crystal-controlled. Spurious output better than 60 db below carrier in the telemetering band.

- Power output—2 watts nominal
- Frequency—215-260 mc
- Weight—32 ounces
- Sensitivity—1.13 vrms
- Deviation—150 kc with 1% linearity
- Output Impedance—50 ohms nominal
- Stability—0.01%

Bulletin RAD B-102

MIXER-MONITOR

MODEL 7-100



This system is capable of accepting as many as four incoming signals from various sources including time and reference, and mixing these signals for recording on a magnetic tape for further processing. Controls provide attenuation and monitoring of individual input signals and the output. Frequency response 300 cps to 100 kc with less than 0.3% harmonic distortion.

Bulletin RAD B-101

RECEIVER PHASE-LOCK DEMODULATOR

This demodulator applies the advantages of advanced demodulation techniques currently used in FM/FM telemetry receivers. When used with popular receivers, the receiver improvement threshold is lowered by a minimum of 6 db. In this manner, greater range capability is provided for existing systems with no increase in transmitter power. Installation and operation are simplified to the extreme. No soldering is required for connecting to the receiver.

Bulletin RAD B-110

MODEL 8-100

FIXED STYLI RECORDER

MODEL 3-100

Utilizing 640 individual styli writing on electrosensitive paper this recorder is unique in its variety of applications. *As an on-off recorder-indicator,* it monitors as many as 640 individual circuits at one time. *As a data recorder,* (in the ADAR System) it plots digital data in analog form for immediate analysis. *As a high-speed printer,* it records digital outputs from electronic computers at the rate of 400 lines per second; each line may contain as many as 102 characters. Features: real-time viewing, 100" per second chart speed, no photographic developing, transient response equal to 50-microsecond squarewave.

the three sides to sell in RADIO AND ELECTRONICS

The fellows who write the big orders in this business know their market. And they know that hitting that market with year-in, year-out consistency is a three-way proposition. The reason is simple. The radio and electronics engineers of America believe in and wholeheartedly support these three *Institute of Radio Engineers'* services.

Proceedings of the IRE

Here's the engineer's monthly fact sheet — with more pages, more editorial features, and more readers than any publication in its field. Over 52,000 radio-electronics engineers read *Proceedings* because they want to know what's going on and they've discovered *Proceedings* is the place to find out. It's on top of the latest developments in this fast-moving, fast-expanding field.

IRE directory

More than 1,000 pages long, with circulation well above the 50,000 mark, this unique annual covers the radio-electronics industry from stem to stern. In the Directory you'll find a pinpointed classification of 3,500 manufacturers and 1,500 distributors of radio and electronic equipment along with the products they handle. To help you clinch the sale the *IRE Directory* lists the business phone numbers of 3,200 firms. No wonder they call the *IRE Directory* the "Bluebook" of the radio-electronics industry.

Radio Engineering Show

The radio-electronics "spectacular" held annually at New York's mammoth Coliseum. Here's your personal introduction to 50,000 radio-electronics engineers — the men who use the products you sell and manufacture. They're eager to see your new equipment, to listen to your new ideas. This year, don't pass up this golden opportunity to meet them on their home grounds.

For all the details:

MUrray Hill 2-6606

1959 IRE DIRECTORY

DIRECTORY II COMPONENTS

46 major groups
424 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications

II. Components

III. Controls & Instruments

IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 852 subproducts in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 141, 241, 275, 461, and 519.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

advances in **RF** *techniques*

In recent years, Applied Research Inc. has contributed notably to the state of the art with unique originations in RF components and equipments. Much must remain undiscussed; the production items below are representative.

Broadband RF Amplifiers

40-1000 mcs

Model HFW Amplifiers cover an octave of frequency. Their truly exceptional performance features low noise, high gain with low power drain.

SPECIFICATIONS (condensed) — *Model HFW-302*

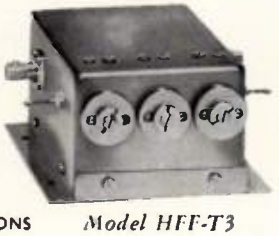
Input freq.	300 to 600 mcs
Input, output VSWR	Less than 1.5 in pass band
Noise figure, average	7 db
Gain	20 db

UHF Converters

300-900 mcs

Model UHC-R Converters provide the ultimate ir sensitivity and performance, featuring low noise, high image and spurious rejection, minimum adjacent channel interference.

TYPICAL SPECIFICATIONS (condensed)



(Model UHC-R-4.5)

Input freq.	400-525 mcs
RF bandwidth	10 mcs
Noise figure	5.5 db
Output bandwidth	5 mcs
Converter gain	50 db (min.) overall

Bandpass Filters

30-2000 mcs

Model HFF and HFF-T Bandpass Filters are rugged, reversible in operation, remarkable in performance (which approximates theoretical expectations). Advanced filter designs are also available for antenna couplers and diplexers

SPECIFICATIONS (condensed) — *Model HFF-T3*

Center freq	425 mcs
Bandwidth	50 mcs
Insertion loss	0.15 db
VSWR	1.03 in passband

RF Multiplexers

40-2000 mcs

Type RFM Multiplexers operate over an octave of frequency with outputs divided into channels of equal bandwidths, overlapping to eliminate dead spots. Multiple resonant circuits in each channel minimize cross-channel interference and provide very sharp skirt selectivity.

TYPICAL SPECIFICATIONS (condensed)

(Model RFM-102)

Freq. range	100-200 mcs
No. of output channels	5
Bandwidth/channel	20 mcs
Peak-valley ratio/filter	1 db
Overall insertion loss	2 db
Input-output impedance	50 ohms

Attenuators and Terminations

DC-1000 mcs

HFA-50 and HFA-75 Fixed Pad Attenuators; HFT-50 and HFT-75 Coaxial Terminations have impedances of 52.5 and 75 ohms; VSWR is 1.2 maximum, up to 1000 mcs. Nominal attenuation is 2, 3, 6, 10, or 20 db. BNC connectors are standard. *Prices are realistically reasonable.*

Attenuators and terminations are also available with Type N connectors, for use in the DC-3000 mcs range.

Literature is available on all ARI systems and equipments.

MAGNETIC AMPLIFIERS

MILITARY & INDUSTRIAL

PRECISION TYPES, for analog computing, telemetering, industrial and nuclear controls, data logging; 60 and 400 CPS.

Input, 100 microamperes, DC
Output, 15 volts, DC
Gain, to 1,000,000 per stage
Linearity, to 1%
Balance, to 0.2%
Temperature, to 100° C.

RELAY AND MONITOR TYPES, for relay preamplification missile checkout systems, data logic and switching controls . . . in linear and snap-action types; 60 and 400 CPS.

Input, one microwatt, DC
Output, one watt, AC or DC

SEND FOR LITERATURE . . .

DETAILED ENGINEERING BULLETINS are available from the factory or from our many field representatives . . .

HI-PERFORMANCE TYPES, for electro-hydraulic valves, tape and machine controls, and other fast response requirements; 400 CPS.

Input, 300 microamperes, DC
Output, 15 volts, DC
Response, to 100 CPS.

CYCLEMAG FREQUENCY DETECTORS, for tachometers, speed measurement, frequency control systems . . .

Input, one watt, AC
Output, to 1 milliampere, DC
Frequencies, to 2000 CPS.

CUSTOM DESIGNS often solve tough design problems. Acromag's experience working with wire drawing machines, missile systems, nuclear reactors, auto-pilots, and industrial instrumentation . . . is yours for the asking . . .

ULTRASONICS

SOLID DELAY LINES

Specialty research and development applications in computer and radar work, etc. Standard units are now available in fused quartz and zero temperature coefficient glasses. Containers will meet all applicable JAN specifications.

PRECISION ATTENUATOR ATT-693, ATT-650

The use of 93 ohms rather than 50 or 75 allows operation at a higher signal to noise level than common, while 1 watt precision resistors give a safety margin with intense sources.

The 122 db range ensures that all practical measurements can be made in one box. The switches and case are selected for long, trouble-free life.

Range	0-122 db
Steps	1 db
Impedance	50 or 93
Accuracy	1 db Max. absolute Error
	½ db Relative Error
Standing Wave Ratio	50 MC 1.05
	100 MC 1.08
	150 MC 1.15
	300 MC 1.5
	500 MC 1.9

WIDE BAND AMPLIFIER—WA-600

Designed to allow complete coverage of the 6-60 MC range without adjustment or change in I.F. strips. The output is available either at the original frequency or from a full wave detector.

Input Frequency	6-60 MC to 3 db points
Gain	80-90 db
Video Bandwidth	10 MC
Noise Figure	11-13 db
Input Impedance	93 ohms (1 watt)
Output Impedance	Cathode Follower Terminated Externally
Output Voltage	10 volts Positive-max.
Output Power for Preamplifier (Min.)	125 DC reg. @ 20 MA 6.3v @ 350 MC

Choice of D.C. Amplifier Flat to 2 KC for band pass measurements with Wobbulator.

HIGH POWER PULSED OSCILLATOR PG-650

Pulsed oscillators eliminate difficulties from low level c.w. radiation occurring with pulsed amplifiers. The PG-650 is exceptionally phase stable as well as powerful and has many features that are unique and versatile—such as its push-pull operation with low harmonic content.

Frequency Range	5-80 MC* in 7 ranges
Rise Time (Max.)	0.5 usec
R. F. Output Voltage (Min.)	0-300 peak to peak into 93 ohms
P.R.F. (external trigger)	0-3000 C.P.S.
P.R.F. Internal	50-2500 locking on 60
Pulse Length	1½-10 usec
Trigger Delay Internal	12-100 usec
Trigger to Pulse Jitter (Max.)	.005 usec
Pulse to Pulse Jitter (Max.)	.03%
Noise Output Between Pulses	Thermal Noise from Termination
R. F. Leakage	Negligible

** This range may be extended with special coils from 0.5 to 150 MC*

Please write for our Bulletins on other Test Equipment and Delay Lines.

ARENBERG ULTRASONIC LABORATORY, INC.

94 Green Street ● Jamaica Plain 30, Mass.
Phone: JAmaica 2-8640

MODEL 395A

Includes two Mod. 600 and power supply

SPECIFICATIONS FOR MODEL 600, AND FOR EACH AMPLIFIER SECTION OF MODEL 395A

Bandpass	200 cps to 50 mcs
Gain	40 db ± 1½ db (into matched load)
Input & Output Zo	90 ohms
Pulse Rise Time	10 microsecs
Gain Control Range	20 db

PRICE
395A—$495; 600—$225

MODEL 600

WIDE BAND AMPLIFIERS

SPECIFICATIONS

500 SERIES

400 MODEL

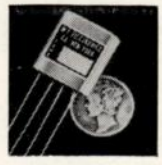
TRAVELING WAVE
LOW NOISE
MICROWAVE AMPLIFIER

LEL TWT-10 CM



The TWT-10 CM has been designed specifically for use with RCA Traveling Wave Tubes and will accommodate six of the various types currently available from RCA. Amplifiers for other RCA types available on special order.

The TWT-10 CM features tube helix protection thru incorporation of a high sensitivity relay circuit. Noise figures of less than seven db over a wide band of frequencies can be obtained.

LEL, Inc. 380 OAK STREET COPIAGUE, N. Y.

FOR USE WHERE SPACE IS AT A PREMIUM

- 6 volt input
- Operation from −25 to 50°C
- 1/5 cubic inch

FLIP FLOP, Type 11—50 KC input
SAWTOOTH GENERATOR, Type 17
MULTIVIBRATOR, Type 12—400 cps
ONE SHOT MULTIVIBRATOR, Type 18 • AMPLIFIER, Type 15—30 cps to 30 KC
MEMORY AMPLIFIER, Type 19

FIXED FREQUENCY OSCILLATORS

- 12 volts DC
- 28 volts DC
- Standard frequencies. from 400 cps to 30 KC

TINY TRANSISTORIZED AMPLIFIER— Model M-10

This amplifier is small and completely self-contained. A matched earpiece is included for audio use.
Input Impedance—150 kilohms
Voltage Gain—1000 or greater
Power Gain—85 DB
100 microvolts input for full output

ECONOMICAL FLIP FLOPS FOR COUNTER USE

Low current, 12 volts, ½ cubic in. Indicating Flip Flop, Type 20, directly indicates the count
Low Speed F.F., Type 21—30 KC • Medium Speed F.F., Type 22—150 KC • High Speed F.F., Type 23—300 KC

TRANSISTORIZED PACKAGES MADE TO YOUR REQUIREMENTS

MAGNETIC RESEARCH CORPORATION

Serving Industry and Defense

AN OUTSTANDING LINE OF ALL-MAGNETIC COMPONENTS, SYSTEMS AND MAGNETICALLY REGULATED POWER SUPPLIES

Stablvolt 60 Cycle DC Power Supplies

These new DC power supplies feature line transient suppression, fast response and achieve the highest degree of reliability. Designed for a broad range of applications, they are recommended wherever accurate, trouble-free performance is desired. Dual magnetic regulation plus the most modern electrical and mechanical design techniques are combined in these competitively priced power supplies. Built and guaranteed for the most rugged duty by Stablvolt* and available in a wide range of voltages and currents.
*Reg. Trade Mark.

Magnestat Magnetic Servo Amplifier Series

Complete series of precisely engineered Magnetic Servo Amplifiers is available from stock. Magnestats are available ranging from smallest model rated at 3 watts with a frequency response of from 0 to 30 cps to largest 40 watt model with a frequency response of from 0 to 10 cps. These units have sinusoidal phase reversing output, with transistor or tube control . . . a.c. or d.c. input. They have been qualification tested and meet stringent requirements encountered in aircraft and missile control systems.

Micromag Low-level Magnetic DC Signal Amplifier

The Micromag is a drift-free d.c. signal amplifier designed for use in aircraft and missile telemetering instrumentation. It produces ripple-free 5 VDC output from 10 millivolt d.c. input for the amplification of signals from thermocouples and strain gauges. It provides extremely stable linear d.c. voltage amplification with gain changes of less than 2% for temperature change of 100°C. and less than ½% for line voltage changes of from 105 V. to 125 V.

Line Regulators

Designed to insure proper operation of equipment where changes in AC voltage could cause malfunctioning or loss of accuracy. Regulation held within plus or minus .5% against line changes between 100-130V., load changes from 2.5-25 amperes, and frequency changes between 380 and 420 cps. Response time less than 10 milliseconds. Output wave form distortion is 5% maximum. Output voltage continuously adjustable between 110 and 120 volts. Available in military and commercial design.

6 Channel Universal Temperature Measuring System

This new versatile system is the result of six years of extensive laboratory and field experience in temperature measuring problems with features found in no other comparable system. This unit has been designed to cover the entire practical temperature range. The Magnetic DC Amplifiers have exceedingly high gain stability even under adverse conditions and are absolutely drift-free. The Wheatstone plug-in bridges are completely interchangeable.

Thermocouple measurements are made without the use of ice baths or ovens and thermistor and resistance thermometer measurements are made without the use of any additional power supply. The low-level d.c. magnetic amplifiers produce 0 to 5 V output.

Servomag Industrial Magnetic Servo Amplifier Series

New Servomag amplifier series has been designed to fill the long standing need for a rugged maintenance free power amplifier for the stepless control of high power AC or DC Servo motors. Servomags exceeds the response time of rotating amplifiers by very wide margin, allowing the use of simplified control circuitry with greatly reduced servo stability problems.

Delivers phase reversible AC (or polarity reversible DC) in response to phase reversing AC signals or polarity reversible signals; has outstanding zero stability as well as high gain stability. Amplifier designed to take severe overloads and output can be short-circuited without damage.

Stablvolt 400 cps Power Supplies

Features magnetic flux oscillator circuitry to provide precision regulated 5V transient-free d.c. output voltage. The unit is a tubeless, dual magnetic system which effectively isolates line voltage transients from the output and regulates d.c. to 0.1% accuracy. Current capacity is 1 ampere. Short circuit proof, no fusing required. The units are hermetically sealed with all components cast in thermosetting plastic, meet MIL-T-27 and MIL-E-5272-A specifications. Operates on standard 115 V-400 cycle aircraft supply mains.

Magnetic Frequency Discriminators

Produce a well filtered 0-5 V DC output voltage in response to a frequency deviation. One application is the measuring of the power frequency of aircraft and missile power sources and frequency deviation from their normal value.

Power input requirement for units is approximately 2½ watts. Supply voltage can vary between 95 and 150 volts. Output variation is less than ½% or less than 25 millivolts for line voltage variations from 105 to 125 volts; slightly higher for the extremes of the supply voltage limits.

Two representative models of the new line are the FD-400 for 400 cycle power sources and the FD-2000 for inverters operating at 2000 cps; also available for frequencies up to 10 KC.

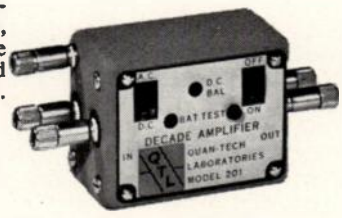
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

NEW

AC Microammeter

Model 30

Enables rapid, accurate AC current measurements and observations of wave forms in transistors, magnetic amplifiers, small servo systems, etc. A clamp-on probe and an insertion probe are provided with each instrument.



Sensitivity: 3 ua to 100 ma full scale (300 ua to 100 ma—clamp on probe).
Frequency: ±2% 100 ∿ to 100 KC (±5% 100 ∿ to 100 KC—clamp on probe).
Input impedance: 2 ohms—3 ua to 1 ma; negligible 300 ua to 100 ma.
Price: $290.00

CONCEPTS

DC-Coupled Decade Amplifier

Extremely compact and stable, a completely self-contained miniature amplifier. Its DC response, low noise, and freedom from microphonics make it exceptionally useful with DC oscilloscopes and in sub-sonic as well as conventional applications.

Gain: 10 ±2%, flat within ±2% DC to 100 KC.
Input: 400k ohms and 30 mmf, 20 uv input noise.
Output: 100 ohms, 1 volt P-P max, ½% distortion.
Batteries: Three ZM 9 mercury cells, life 600 hrs.
Price: $85.00

Model 201

IN

Isolation Amplifier

Useful as a Differential or Isolation Amplifier. Supplements voltmeters and oscilloscopes in the measurement of AC voltages whose reference is not at ground potential as in servo systems, motors, magnetic amplifiers etc.

Frequency Response: ±½ db 30 ∿ —100 KC; —3 db at 5 ∿ and 1 MC.
Voltage gain: 1, 0.1, 0.01, 0.001.
Input Impedance: 100k ohm and 50 mmf.
Output: Nominally 20 ohms, 1V. P-P max.
Mercury Battery: Life 600 hours.
Price: $135.00

Model 202

ELECTRONIC

Regulated, Transistorized Power Supplies

Model 104 Power Supply features 0.1% regulation and three metered ranges of voltage and current. Models 101, 102, and 103 (not shown) are compact, lightweight supplies providing voltage metering and 0.25% regulation. Continuous adjustment and overload protection on all models.

Model 101: 0-8 volts DC, 0-2 amps.	Price $175.00
Model 102: 0-14 volts DC, 0-1 amp.	Price $175.00
Model 103: 0-30 volts DC, 0-½ amp.	Price $175.00
Model 104: 0-50 volts DC, 0-1 amp.	Price $325.00

Model 104

STODDART RADIO INTERFERENCE
AND FIELD INTENSITY MEASURING EQUIPMENT

covering a frequency range of 30 cps to 1000 mc

NM-40A (AN/URM-41)
30 cps to 15 kc

SELECTIVE OPERATION/Specifications

Sensitivity: For a one-to-one signal-to-noise ratio, the sensitivity of the NM-40A is better than 0.15 microvolt from 1000 to 15,000 cps, 0.25 microvolt from 300 to 1000 cps and 1.0 microvolt from 30 to 300 cps, when used as a selective two-terminal voltmeter with its narrowest bandwidth and an input impedance of 100,000 ohms.

Spurious Responses:

$2F_0' >$ 60db down from F_0
$3F_0' >$ 55db down from F_0
All others > 75 db down
} where F_0 is any input signal using selective operation

WIDEBAND OPERATION/Specifications

Frequency Response: 30 cps to 15 kcs, ±0.5 db.

Sensitivity: 15 microvolts sensitivity at input impedance of 100,000 ohms.
Input Impedance: 50, 600, 10,000 and 100,000 ohms.
The NM-40A may also be used as an ultra-sensitive AUDIO frequency WAVE ANALYZER.

NM-10A (AN/URM-6B)
14 kc to 250 kc

GENERAL SPECIFICATIONS:

Sensitivity: Electrostatic pickup using rod antennas, one microvolt-per-meter to 2 volts-per-meter. Electro-magnetic pickup using shielded loop antennas, 10 microvolts-per-meter to 100 volts-per-meter. As a two-terminal voltmeter, either balanced or unbalanced, one microvolt to one volt.

Effective Random Noise Bandwidth: Varies from approximately 55 cps to 400 cps over the frequency range. Calibration charts give exact figures for each frequency.

Image Rejection: Better than 50 db.

I.F. Rejection: Greater than 60 db.

The equipment is of sturdy drip-proof construction and may be operated for prolonged periods in driving rain or snow with no deleterious effects.

NM-20B (AN/PRM-1A)
150 kc to 25 mc

GENERAL SPECIFICATIONS:

Sensitivity: As a two-terminal voltmeter, either balanced or unbalanced, one microvolt to one volt. Electrostatic pickup using rod antenna, two microvolts-per-meter to 2 volts-per-meter. Electromagnetic pickup using shielded loop antenna, 100 microvolts-per-meter to 100,000 microvolts-per-meter.

Image Rejection: Better than 50 db.

I.F. Rejection: Greater than 45 db.

BFO is provided for c.w. reception.

NM-30A (AN-URM-47)
20 mc to 400 mc

Sensitivity: Radiated pick-up using a calibrated, tuned dipole (without reflector), one to ten microvolts-per-meter, depending on frequency. Conducted pick-up via 50-ohm matched coaxial line, one microvolt from 20 to 240 Mc, five microvolts from 240 to 400 Mc.

Spurious Response Rejection: Better than 40 db.

I.F. Rejection: Greater than 60 db.

NM-50A (AN/URM-17)
375 mc to 1000 mc

Sensitivity: Radiated pick-up using a calibrated, tuned dipole (without reflector) 100 to 350 microvolts-per-meter, depending on frequency. Conducted pick-up via 50-ohm matched coaxial line, 10 microvolts.

Effective Random Noise Bandwidth: Approximately one megacycle over entire frequency range.

Image Rejection: Better than 40 db.

Spurious Response Rejection: Better than 40 db.

I.F. Rejection: Greater than 80 db.

STODDART COAXIAL ATTENUATORS AND TERMINATIONS

made with exclusive Stoddart Filmistors for highly accurate and stable resistive values from dc to 3000 mc.

Protected under Stoddart Patents

2, 6 AND 10-POSITION
TURRET ATTENUATORS
WITH SIMPLE
"PULL-TURN-PUSH" OPERATION,
SMALL AND RUGGED

ATTENUATOR PADS

Available in any conceivable combination of male and female Type C and Type N connectors. Maximum length of 3" for any attenuation value.

GENERAL SPECIFICATIONS
VSWR: Less than 1.2 to 3000 mc.
Characteristic Impedance: 50 ohms.
Attenuation Value: Any value from 0 db to 60 db including fractional values.
Accuracy: ±0.5 db; values above 50 db have rated accuracy of attenuation through 1000 mc only.
Power Rating: 1.0 watt sine wave.

COAXIAL TERMINATIONS

Small-stable-50 or 70 ohms

½-Watt: 50 ohms impedance, TNC or BNC connectors, dc to 1000 mc, VSWR less than 1.2.

1-Watt: 50 ohms impedance, dc to 3000 mc or dc to 7000 mc, Type N or Type C connectors, male or female; VSWR less than 1.2, 70 ohm, Type N, male or female terminations available.

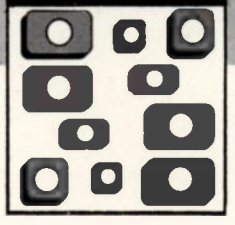
FOR ALL YOUR DRY BATTERY NEEDS

BURGESS

SERVES YOU BETTER!

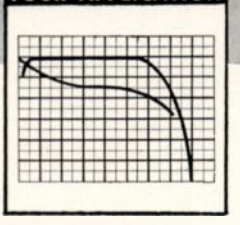
MOST COMPLETE LINE OF STANDARD BATTERIES



2 out of 3 industrial-electronic engineers specify Burgess Batteries! That's because the Burgess line of dry batteries is the most complete and dependable one-source line on the market! There's a Burgess Battery for almost every conceivable dry battery application. Choose from over 5,000 types already designed.

FREE DESIGN SERVICE FOR NEW APPLICATIONS

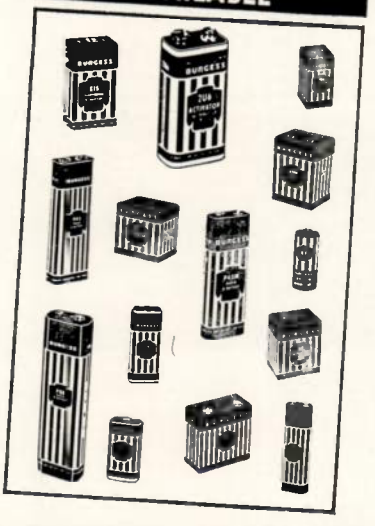
For those special applications, skilled Burgess Engineers offer you a FREE design consultation service. When your particular problem has been solved, Burgess will manufacture the exact battery to fit your needs, regardless of quantity required!



CHOOSE FROM MANY CELL SIZES

UNLIMITED RANGE OF VOLTAGES

CAPACITY TAILORED TO YOUR APPLICATION



BURGESS *Exclusive*

WAFER CELL CONSTRUCTION

Gives Greatest Selection of Dry Batteries

The revolutionary Wafer Cell offers a 30% increase in battery life at no increase in size. This exclusive Burgess construction consists of a sandwich of manganese dioxide mix between two flat electrodes of zinc and carbon with spots of hot silver wax applied to each exposed pole of the cell, allowing perfect electrical contacts throughout and almost complete absence of vibration. Cells are wrapped in Mylar film and packed in such modern materials as aluminum for compactness, long shelf life, excetional service life, outstanding dependability.

HUNDREDS OF TYPES AVAILABLE

TRANSISTOR ACTIVATORS

Burgess Activator Batteries for transistor circuits are smaller and more compact in size. Yet they deliver 30% more power because of the patented "wafer-cell" construction. Burgess Activators give you compact power, uniform performance, longer shelf life . . . all combined with modern packaging.

RESERVE BATTERIES

Can be stored dry for years. Activated only when immersed in water. No handling of dangerous electrolyte, no spilling or leaking! Wider range of efficient operating temperatures than any other type of battery.

HIS HEART IS A YARDNEY SILVERCEL® BATTERY!

Because YARDNEY SILVERCEL® Batteries are up to 5 times smaller and 6 times lighter than any other batteries of equal capacity, they power measuring devices inside "Hurricane Sam", an artificial man used to perfect jet escape techniques. Today, imaginative engineers are also using SILVERCEL® Batteries in communications, portable power supplies, telemetering and instrumentation . . . either as standard or custom-built models. Couldn't you use these light, compact, powerful SILVERCEL® Batteries? Write for complete data today.

YARDNEY ELECTRIC CORP.

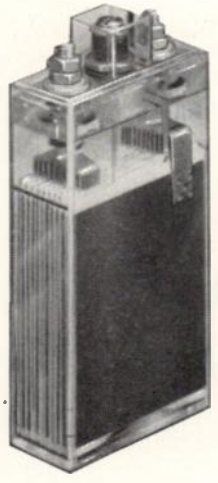
NICKEL CADMIUM STORAGE BATTERIES by NICAD



for AIRCRAFT · MISSILES · ELECTRONICS · COMMUNICATIONS

NICAD—pioneer in the United States in the development, manufacture, and proper application of Pocket Plate and Miniaturized Sintered Plate types of Nickel Cadmium Storage Batteries, offers a complete line of this vital equipment . . . with capacities and engineered construction to meet every demand for constant, lasting, and dependable service.

NICAD batteries—with a long history of superior performance in a wide variety of critical applications—constantly are in demand where there is a vital need for highly reliable and durable equipment.

SINTERED PLATE Capacities ½ AH to 150 AH

USES:
Missile & Rocket Control
Guidance Systems
Communications Equipment
Data Processing Equipment
Alarm & Signal Systems
Aircraft Engine Starting
Microwave & Telemetering
Portable Electronic Equipment
Instruments

ADVANTAGES:
Matchless Reliability • Sustained Voltage at Heavy Discharge Rates • Rapid Charge Acceptance • Long Life • Extreme Temperature Operation (from —60 to 200° F) • Discharges in any position • Easy Maintenance • Pressure Sealed • Steel Encased • Small, Lightweight • No Corrosive Fumes

CHARACTERISTICS:
Nominal voltage per cell: 1.2 volts (a 6 volt battery consists of 5 cells)
Temperature range: —60°F to +200°F
Maximum Discharge Current: up to 25 times rated ampere hour capacity
Capacity at—60°F: up to 90% at low rates
Internal resistance very low: 0.001 ohms for 10 AH type cell
Full Charge: by constant potential in one hour at 1.55 volts per cell
Full Charge: by constant potential in six hours at 1.43 volts per cell
Charge, trickle: 1.35 volts per cell to maintain a charged battery
Gassing Discharge: None
Gassing Charge: virtually none below 1.47 volts per cell
Vibration resistance: excellent
Shock: 80G
Altitude: pressure release valve opens 25 P.S.I. above ambient
Cycle life: no known limit
Storage life: no known limit in any state of charge
Charge retention: up to 70% after one year at room temperature
Orientation: any position on discharge

POCKET PLATE Capacities 10 AH to 2048 AH

USES:
Stationary Engine Cranking
Standby Power & Control
Signal & Alarm Systems
Switchgear Tripping & Closing
Ground Power Supply
Laboratory d-c Supply
Emergency Lighting
Locomotive Starting

ADVANTAGES:
Matchless Reliability • Seldom Requires Maintenance • Exceptionally Long Life • Virtually Indestructible • Excellent Voltage Regulation • Sustained Voltage at Heavy Discharge rates • No Corrosive Fumes • Withstands High Ambients • No Sulphation • All-steel Construction

BUILDING THE FUTURE IS A BIG JOB!

The radio-electronic engineers who form the membership of the Institute of Radio Engineers must remain years ahead of actual production, in order to pave the way for the products of tomorrow, through research and development today.

The special issues of "Proceedings of the IRE" help these men transform the theory of today into the production lines of tomorrow. Pictured above are the October 1951 Color Television Issue; November 1952 Transistor Issue; and January 1953 UHF Issue (all now out of print). In 1958, IRE published special issues on Radio Astronomy (January 1958) and Transistors (June 1958).

Special issues on special subjects are more than usually helpful, but every issue of "Proceedings of the IRE" is filled with facts and figures!

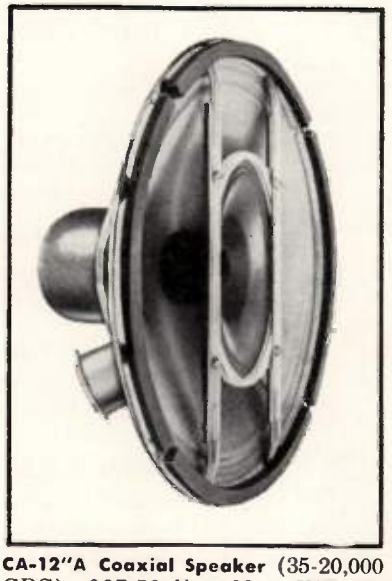
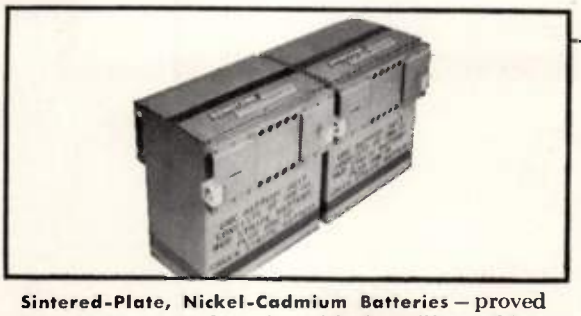
More sound for your dollar from

Sonotone



Electronic Applications Division

Ceramic Cartridge Leadership from 3T monophonic to 8T compatible stereophonic. Choice of 50 manufacturers.



Tape Heads—3/1,000,000ths of an inch accuracy, 3 microvolts sensitivity with response 20-15,000 cps assures the highest professional quality. The price? Bargain low.

CA-12"A Coaxial Speaker (35-20,000 CPS)—$27.50 list. New WR-8", perfect for second stereo speaker, (55-15,000 CPS) only $12.00 list.

Miniature and Subminiature Tubes designed to solve problems in civilian and military applications like the "Nike" and the "Corporal" missiles.

Sintered-Plate, Nickel-Cadmium Batteries—proved in over 10 years of service with the military. Now used in missiles and SAC bombers where ruggedness and dependability are a must.

air · marine motors, inc.

Designers and manufacturers of sub-fractional h.p. motors, blowers and fans . . .

. . . application engineered and proven by environmental laboratory testing, to customer or MIL specifications.

Air-Marine manufactures electric motors for the following general performance ranges:

- **HORSEPOWER** . . . . . 1/500th to 1/2 h.p.
- **SPEEDS** . . . . . 3600 rpm max. at 60 cps
  24,000 rpm max. at 400 cps
  Dual and Variable Speed Units
- **FREQUENCY** . . . . . Fixed . . . 50, 60 or 400 cps
  Variable . . . 50 to 450 cps, and 320 to 1,000 cps
  Special . . . as required
- **VOLTAGE** . . . . . Standard 115V and 230V
  Special . . . as required
- **PHASE** . . . . . 1, 2 or 3 phase
- **SIZE** . . . . . 1" O.D. to 4 3/4" O.D.
- **BLOWER CAPACITY** . . . . . To 1,000 CFM air delivery for blowers and fans depending on Static Pressure encountered.

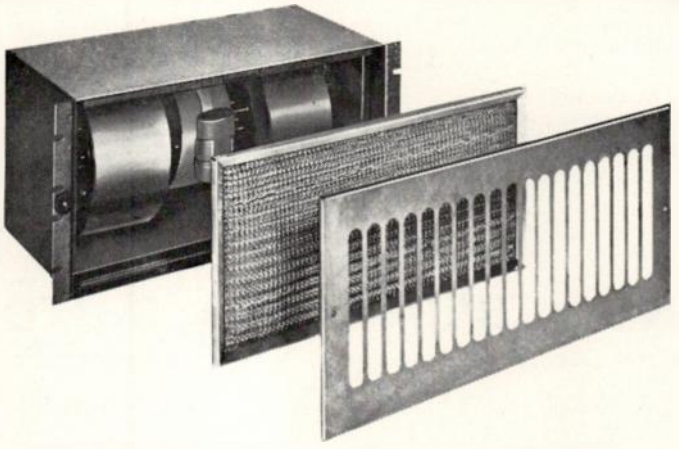
TYPES OF SUB-FRACTIONAL MOTORS MANUFACTURED:

Induction, Hysteresis Synchronous, Reluctance, Synchronous, Servo, Gear, and High Slip Induction.

BLOWER AND FAN TYPES OFFERED

Centrifugal and Vane Axial Blowers, Blower Housings, Axial Flow Fans.

SERVICES OFFERED



Complete design and development
Air delivery measurement
Environmental testing.

McLEAN
Your Best Source For...

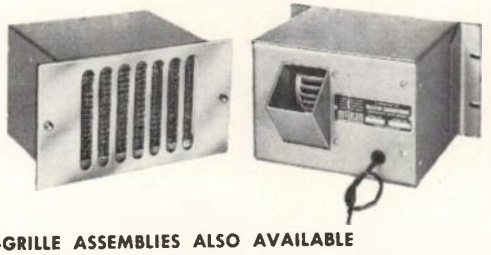
RACK MOUNTED
FANS and BLOWERS*
*PATENTED

STANDARD RACK MOUNTED FANS & BLOWERS

Over 15 models available in panel heights of 3½" to 12¼" in increments of 1¾". Range, 80 to 1200 cfm. All units feature quiet operation, no electrical noise and maximum air delivery. Blower units provide better air delivery against pressure and higher velocity for faster cooling. Highly reliable, rubber mounted, 115 volts, 60 cycle motors. Also Mil. Spec. and DC motors available. Permanent filters. Smart, heavy gauge, stainless steel grilles.

RECESSED MODELS

Provide higher performance with minimum panel height. Filter and blower are recessed into the unused portion of the open base commercial type rack. Fit 3½", 5¼", 7", 8¾" and 10½" panel heights and deliver 150 cfm to 1200 cfm. Highly reliable, rubber mounted, 115 volts, 60 cycle motors. Mil. Spec. and DC motors available. Permanent filters.

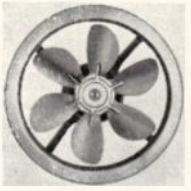


REVERSIBLE FAN

Easy-to-install Filter Box Propeller Fan gives wide choice of cfm's and great mounting flexibility. Operates as blow or suck without rework. Compact, low-cost. Long, service-free life. Operates from various power sources.

HALF PANEL WIDTHS

For narrow racks or where space is a problem. Fit half the width of standard 19" racks leaving balance of space for other components. Blower model (5¼" high) delivers 100 cfm. Fan model (7" high) delivers 225 cfm. Powered by highly reliable, rubber mounted, 115 volts, 60 cycle motors. Mil. Spec. and DC motors available. Permanent type filter.



HALF PANEL WIDTH FILTER-GRILLE ASSEMBLIES ALSO AVAILABLE

MIL. SPEC. BLOWERS

Meet most rigid specifications. Mount in any position. Deliver 10 cfm. Fit 3¾" cube. Continuous duty, totally enclosed motor, 1/300 hp. 115 volts, 60 cycle, 3400 rpm.

RING TYPE FANS

175 to 395 cfm. Fan diameters 6½" and 8". Motors totally enclosed, highly reliable, 115 volts, 60 cycle, 3000 rpm. Mil. Spec. and DC motors available. Other sizes available.

FREE! Engineering Booklet on Forced Air Cooling. Describes air convection methods. Includes design data, tables, charts, etc.

FREE! 34 page catalog loaded with helpful data. Shows complete line of fans, blowers.

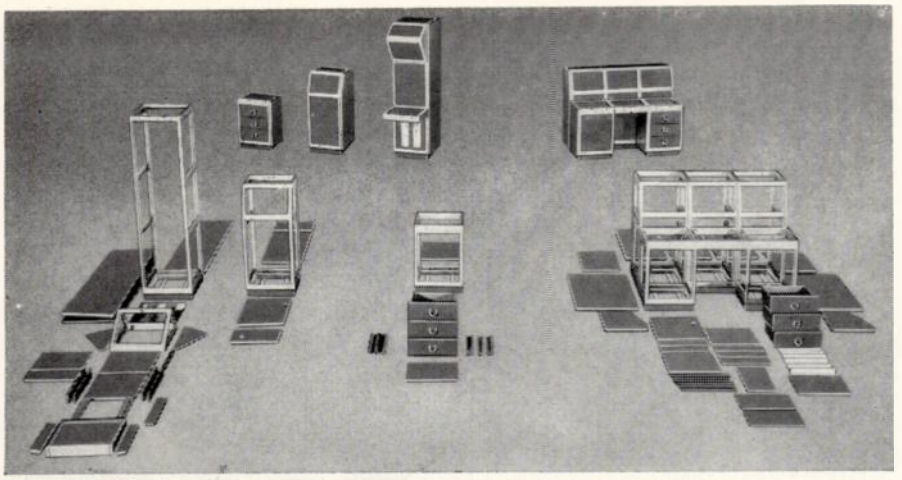
CRAIG HELICOP-HUTS - Lightweight, all-weather flying shelters for all types of electronic systems. Available in a family of sizes.

The Helicop-Hut is just one of many different types of Craig shelters and vans for all system applications . . . capable of accommodating countless possible equipment layouts . . . traveling swiftly by air, land or sea and arriving safely, ready to operate.

- For all systems—missilry, meteorology, communications, navigation, etc.
- Lightweight, rugged, insulated
- Built to military specifications — meet your needs exactly
- Complete installation service — no installation problems. All "packaged" systems are ready to operate when they leave our plant.



Write today for complete information.

SOLVE THE CABINET HOUSING PROBLEM WITH PAR-METAL UNIVERSAL CABINET RACK ASSEMBLIES

Only PAR-METAL Universal Cabinet Racks have these adjustable features:

• Solid Sides or Open Sides. Open sides have detachable side panel arrangement. Front Doors are optional equipment. • Single units, or any arrangement of "multi-racks." • Vertical Side Supports for adjustable brackets, shelves, and sliding devices. • Heights: 48⅛" 67⅜", 76⅛", 83⅛" • Depths: 18", 24". Panel Widths: 19", 24", 30". • Finishes: Black ripple, grey ripple, primer coat only, grey hammertone enamel, medium grey enamel.

Is it possible to embody "custom-quality" in a standardized unit? *Par-Metal* answers definitely "yes" . . . Indeed, you'll be delighted how easily you can fill your needs with a distinctive Housing from our line of *completely welded* standardized units. And *you'll save money too*—not to mention the time and fuss connected with blueprints when ordering "special" equipment. So give us your problem in metal and enjoy a quick, economical solution.

Write for our 28-page Catalog, listing prices, and complete constructional information on *Par-Metal Universal Cabinet Racks*, and standard accessories which are used with these units.

NEW ARCO
STANDARD CAPACITORS

- High Precision
- High Long Term Stability
- Miniaturized
- Light Weight
- Low Cost
- Versatile

The new line of ARCO Standard Capacitors is designed to provide high precision, versatile laboratory standards at moderate prices. The units are much smaller and lighter than other designs of comparable accuracy. Use of multiples and combinations does not become unwieldy. The banana plug terminals are detachable. Their removal leaves a threaded 6-32 bushing for easy attachment of terminals of another design.

The ARCO Standard Capacitor line will find wide application in use as calibration standards, breadboard components, circuit simulation devices; even precision components in stable frequency or timing networks.

Specifications:

ACCURACY OF CALIBRATION
±0.1% +0.5 mmf. of nominal printed on capacitor at 1000 cycles frequency and 24°C.

LONG TERM STABILITY
±0.05% +0.1 mmf.

INSULATION RESISTANCE
5000 megohm-microfarads or 50,000 megohms, whichever is the lesser.

TEMPERATURE COEFFICIENT
.0001 to .1 mfd.
+40 ±15ppm/°C
0.2 to 0.5 mfd.
—130 ±10 ppm/°C.

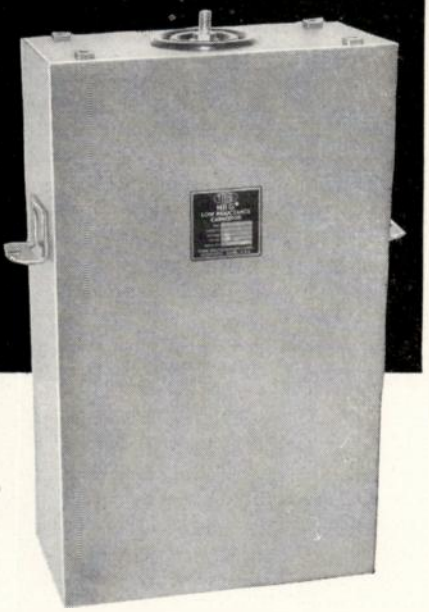
MAXIMUM VOLTAGE
.0001 to 0.04 mfd.
500 volts peak.
.05 to 0.5 mfd.
300 volts peak.

DISSIPATION FACTOR
.0001 to .0004 mfd. — 0.15%
.0005 to .001 mfd. — 0.1%
.002 to 0.5 mfd. — 0.05%

CASE SIZE
All standards have mounting base 1-9/16" long by 15/16" wide. .0001 to 0.1 mfd. is 1-5/16" high. 0.2 to 0.5 mfd. is 2-7/32" high. Height dimension excludes banana plugs.

COMPLETE SETS OF PRECISION STANDARDS

KIT #SS-32
Complete Set of 32 Precision Standards ranging from .0001 to .5 mfd.
Net Price $510.00
Including handsome, durable carrying case (Dimensions: 11⅜W x 9⅜H x 3⅝D) plus 4 POSITION ADAPTER



KIT #SS-23
Complete Set of 23 Precision Standards ranging from .001 to .5 mfd.
Net Price $405.00
Including handsome, durable carrying case (Dimensions: 11⅜W x 7-5/16H x 3⅝D) plus 4 POSITION ADAPTER

THE NRG-200 SERIES OF LOW-INDUCTANCE THERMONUCLEAR ENERGY-STORAGE CAPACITORS

NRG-200 SERIES SPECIFICATIONS				
Type No.	Watt Seconds	Rating		Self Inductance (Microhenries)
		Mfd.	DC Peak	
NRG-201	1000	5.0	20 KV	.04
NRG-202	1500	7.5	20 KV	.045
NRG-203	2000	10.0	20 KV	055
NRG-204	3000	15.0	20 KV	.06

Tobe now announces the availability of a series of reliable, low-cost energy-storage capacitors for thermonuclear equipment and similar applications. The NRG-200 series capacitors have a minimum life expectancy of 1000 operations, and may be operated at ambient temperatures up to 40°C. Maximum permissible reversal voltage is 90%. They can be discharged into a very low-impedance load with complete safety.

For further technical information or engineering aid, write Tobe Deutschmann Corporation, Norwood, Mass.

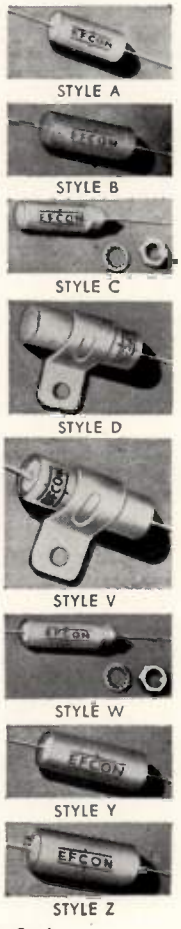
EFCON ...

measure of performance in miniature capacitors



There can be only one rule — one measure of EFCON capacitor performance — CLOSE TOLERANCE PERFORMANCE. Consider EFCON'S proven advantages:

- low dielectric absorption
- negative temperature coefficient in the order of 100 PPM/C
- the lowest dissipation factor of any film capacitors
- tested DC voltage of at least 200% of rated voltage at 25°C.

Efcon Polystyrene, Mylar and Teflon capacitors are available in tubes from .001 to 2 mfds. Hermetically sealed rectangular containers are available up to 10 mfds. in tolerances of closer than ±1%.

Specify EFCON for precision applications, and you specify the standard for the electronics industry. Send for applications bulletin.

NEW CATALOG SUMMARY

presenting . . . Jennings Vacuum Components, inherently qualified by their unique use of a vacuum dielectric, to help you solve many difficult design problems of high voltage in limited spaces.

A few minutes inspection of the wide range of vacuum components in this new product bulletin will reveal many design possibilities that ordinary electronic components cannot achieve. The bulletin contains valuable data and specifications on the latest types of Jennings Fixed and Variable Capacitors, Power Switches, Coaxial Relays, Triggered Spark Gaps, Transfer Relays and High Voltage Measuring Equipment.

Jennings vacuum capacitors, switches and relays are manufactured for operation at both high and low voltage levels; some are engineered for unusually high resistance to shock and vibration. Their use in either commercial or military equipment has proved exceptionally reliable under difficult operating conditions.

Mailing the coupon entails no sales follow-up unless you outline a specific application.

WHAT IS AVAILABLE FROM PYRAMID?

CAPACITORS! A complete line of DRY ELECTROLYTICS, TANTALUM, MYLAR and PAPER in standard and miniaturized styles, featuring many new types for today's newest circuit applications. All are made to standards which meet or exceed the rigid requirements of military specifications MIL-C-25, MIL-C-62 and MIL-C-3965.

SELENIUM RECTIFIERS! A complete line of radio and TV types featuring the now famous KOOL-SEL® design... the first truly new rectifier design in over two decades.

CAPACITOR TEST EQUIPMENT! Model CRA-2 Capacitor-Resistor Analyzer featuring QUICK-CHECK in circuit testing. Moderately priced.

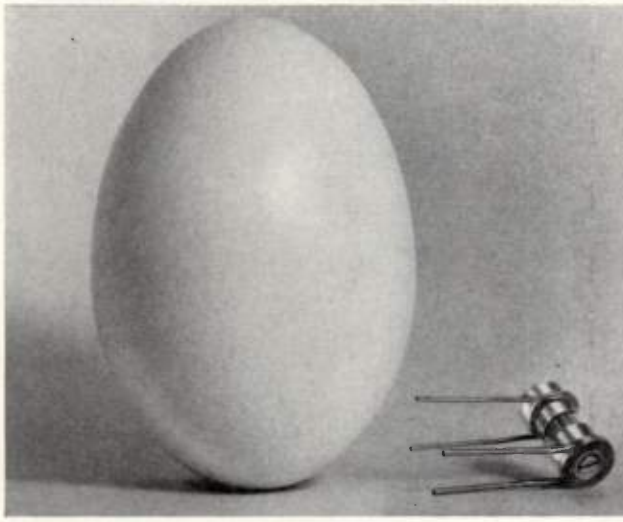
LC TUNERS

Now . . . a precision variable trimmer capacitor and variable inductance in a single compact assembly. One adjustment tunes both capacitance and inductance smoothly and accurately. Special glass and invar design with low temperature coefficient . . . high stability under severe shock and vibration conditions . . . miniaturized construction . . . make JFD LC Tuners highly suitable for your critical high frequency circuits. Windings, cores and capacitor plates can be made to meet your particular requirements. Write for bulletin.



model LC-J1A Tuner — 1.0–17.0 Pf. capacitance range; .032–.042 Mh. inductance range; 450 to 1000 Mc. self-resonating frequency range

NEW FROM JFD Electronics

SEALCAPS

For the first time—completely sealed miniature trimmers that lock out moisture, offer higher insulation resistance and dielectric strength. Air-tight, water-tight seal, together with closed end glass cylinder, maintains constant pressure that prevents corona and voltage breakdown at high altitudes. Sealcaps also embody all electrical and mechanical features of performance-proved JFD variable trimmer capacitors. Available unpotted or encapsulated in epoxy resin for a dielectric strength of over 5000 volts d.c. In 5 capacitance ranges from 0.8-4.5 to 0.8-30.0 Pf. Write for Bulletin 207A.

MINIATURE QUARTZ TRIMMER CAPACITORS

This new series of trimmers combines the superior electrical characteristics of quartz dielectric with the compact physical construction of the popular JFD miniature glass piston capacitor. High Q, ultra low loss operation, extreme stability, fine tuning resolution and approximately zero temperature coefficient are some of their advantages—along with the other superior properties of standard JFD piston capacitors. Furnished in standard panel, lead and lug and 4-wire lead mounting printed circuit types. Write for Bulletin No. 210A.

Vitramon®
INTRODUCES
3 NEW
CAPACITORS
with greater flexibility
. . . extreme miniaturization!

The latest additions to the growing line of "Vitramon" Capacitors feature smaller mounting area, lower inductance, and more versatility of application — *plus* all the phenomenal electrical characteristics for which "Vitramon" Capacitors are noted — fine silver electrodes fused to pure porcelain enamel, perfectly bonded to provide *stability, wide temperature range, humidity immunity, low loss, low noise.*

NEW RADIAL SERIES

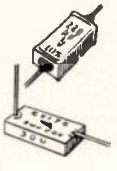
An extension of the A/R Series, giving minimum size at 300 volt rating up to 100 mmf.

- Thin design — 5/64" to 7/64"
- Versatile mounting — can be used axially, radially, or on edge
- Ideal for minute circuit assemblies

NEW PARALLEL SERIES

Features both leads from one small face for miniature printed board applications

- Tiny mounting area — 11/64" x 9/32"
- Lead spacing 0.2"
- Capacitance through 1000 mmf. at 100 vdc
- Designed for automatic insertion
- Packed for cartridge feeding



NEW CO-AXIAL SERIES

Offers feed-through and stand-off geometry, retaining traditional excellent electrical properties typical of "Vitramon" Capacitors. Provides terminal usable as stud, eyelet, or connecting wire

- Compatible with MIL-C-10950B requirements
- Very low inductance
- Flexible leads
- Maximum height from mounting surface 1/4" for 1000 mmf. unit

Standard Axial Series and Axial Radial Series

These two rugged, standard capacitor series have capacities from 0.5 mmf. to 6800 mmf. Standard tolerance is ±5% of nominal, with a minimum of ±0.25 mmf. Closer tolerances also available.

GRANT'S MARK II THINSLIDE

Yes, you asked for it. Design engineers throughout the nation asked for it . . . a continuous ball bearing action slide to fit standard cabinets, without cabinet modification!

THE MARK II THINSLIDE. Of extruded aluminum, only ½" in overall width . . . whose inner and intermediate members pass smoothly through the space between sliding unit and standard rack. With stainless steel balls, accurately fitted to members, the Mark II is quietly, quickly extended fully from rack . . . exposing all parts immediately and with almost no effort!

WRITE NOW FOR COMPLETE DATA ON THE MARK II THINSLIDE . . . the slide that you've been waiting for!

The MARK II offers tilt and locking devices as well . . . your unit can be pivoted to plus 45 and 90 degree positions for greatest accessibility. And you'll be amazed at the moderate cost of the Mark II . . . how quickly it will pay for itself by allowing your equipment to be serviced and maintained in jig-time instead of down-time!

IF THE QUESTION IS ACCESSIBILITY . . . THE ANSWER IS GRANT.

ONE SOURCE

MIL SPEC QUALITY

MODEL FC
Ventilated Cabinet on dolly with casters...shows air flow control panel, panel-mounted blower, modular universal chassis mounted on 'Chassis-Trak' with manual 'Detent' tilt control, plain handles.

VENTILATED RELAY RACK CABINETS
• Modular construction • Fully controlled built-in cross-ventilation system • 19", 24", 30" panels • Vertical panel space as needed.

MODULAR CONSOLES
Customer may specify: Shape to fit 'U' or 'L' floor plan; Panel angle 15°, 30°, 45°, 60°; Panel spaces in multiples of 1¾".
Specify also, for cabinets or consoles: 12-gauge or heavy duty 3/16" steel frame; Channel base, casters or dolly with casters; Depths: 18", 24", 28", 30", 36"; any MIL or commercial finish.

PANEL MOUNTING BLOWERS
• Cooling capacity—600-1200 CFM output • ¼ or ⅓ HP • Compact—mount as standard 8¾" panels.

UNIVERSAL CHASSIS—two types: Full Chassis Plate or Modular Multiple Sub Chassis • Steel or aluminum .062 side frames; ⅛" or 3/16" aluminum front panels • All parts drilled for assembly • Customer may specify all dimensions, materials.

HANDLES: blank, push-button panel lock, trigger for tilt lock, positive screw-down clamp type.

'CHASSIS-TRAK'*—offers ready access to entire chassis • Extra strong • Ultra thin—mount 17" chassis in 17¾" opening • Finger touch releases chassis for removal • 10"—24" long—double extension • MIL Spec finish • Roller and high capacity types available.

chassis-trak® slides

for rack-mounted electronic equipment

Either roller or solid bearing slides are available from stock. The "Detent" model locks in 7 tilt positions. The "Basic" model tilts with no lock assembly. The "EZ Mount" model tilts from mounting on front cabinet rail. These models are available in either lightweight or heavy-duty styles.

Chassis-Trak slides, formed from cold rolled-steel, give complete accessibility and faster servicing . . . and the ultra-thin design means you can cut engineering costs by mounting 17" chassis in 19" standard stock racks. Plus, a wide bearing area design increases rigidity and reduces the possibility of binding due to misalignment.

In addition to the standard slides in stock, Chassis-Trak engineers will custom-build slides for special installations. All slides meet specifications for government or military projects and RETMA standards.

Select the right slide for your application

Encapsulated Inductances

Millen DESIGNED for APPLICATION encapsulated coils provide another advance in the r-f inductor field. Modern application requires miniature, heat and cold resistant, hermetically sealed, and abrasion resistant r-f inductor assemblies. The James Millen Manufacturing Company has pioneered many advances in the r-f inductor field, including the now standard 4 pi r-f choke, the axial lead r-f choke, and the miniature r-f choke. Developments have now made possible another advance, the No. 34301 and No. J301 encapsulated inductors—hermetically sealed—miniature size. Ambient temperature minus 55 degrees to plus 100 degrees C.

NO. J301 MINIATURE ENCAPSULATED INDUCTANCES

DESIGNED for APPLICATION miniature inductances are: extremely small (see table at right)—hermetically sealed—wound on axial lead Carbonyl cores—color coded. Coils are available in RETMA standard values plus 25, 50, 150, 250, 350, 500, and 2500 microhenries. Coils are three layer solenoids up to 350 microhenries. From 360 to 2500 microhenries coils are pi-wound. Current rating 50 to 600 milliamperes depending on coil size. Inductance ± 5%. Special coils on order.

NO. 34301 STANDARD ENCAPSULATED INDUCTANCES

Encapsulated DESIGNED for APPLICATION axial lead phenolic form r-f inductances. Hermetically sealed—heat resistant—abrasion proof—color coded. 1 to 350 microhenries available in RETMA standard values plus 25, 50, 150, 250, and 350 microhenries. Inductance ± 5%. Values available in same progression as J301 coils listed in the table at the right. Solenoid winding for 1 to 15 microhenries. Universal pi winding from 20 microhenries to 350 microhenries. Current rating 250 to 1500 milliamperes, depending on coil size. Ambient temperature range—minus 55 degrees to plus 100 degrees Centigrade. Size: ⅜ inches diameter × ⅞ inches long. Special coils on order.

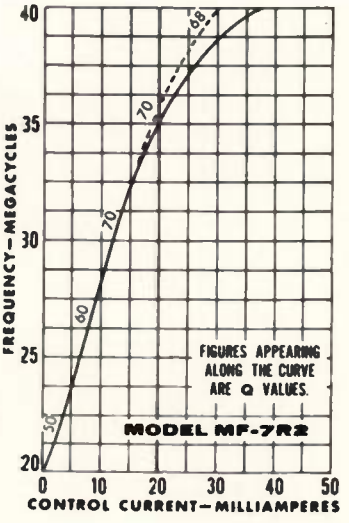
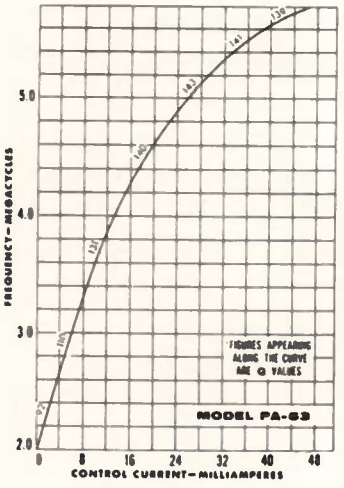
VARI-L ELECTRICALLY Variable Inductors

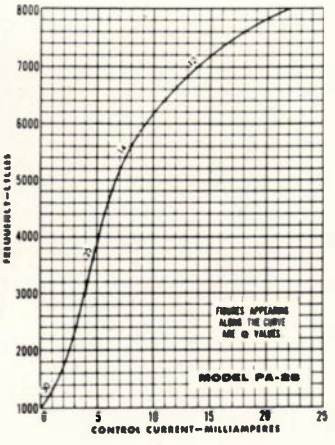


The Convenient and Reliable Method for Non-Mechanical Frequency Control

We offer six years experience in the exclusive field of high-frequency saturable-core reactors for such equipment as sweep oscillators, receivers, modulators, spectrum analyzers and frequency synthesizers. We carry on continuous research in such areas as evaluation of core materials, packaging techniques, and custom-design applications. A stock line is maintained for rapid service to designers, representative types being described below and in more details in our catalog. Samples of special inductors usually take only a week or two for delivery. Write for a quotation on a Vari-L inductor to your specifications.



MF-82 Typical Freq. Range, 0-40 ma: 100 to 150 mc. Starting Inductance 0.2 μh, ±10%. PM Bias, sealed in steel can (dotted curve shows performance of MF-82C, same as above but in copper can).



Typical Freq. Range, 0-40 ma: 20 to 40 mc. Starting Inductance 1.5 uh, ±10%. PM Bias, sealed in steel can (dotted curve shows performance of MF-7R2C, same as above but in copper can). **MF-7R2**

PA-63 Typical Freq. Range, 0-50 ma: 2.0 to 5.8 mc. Starting Inductance 45 μh, ±10%. PM Bias, epoxy-embedded.

Typical Freq. Range, 0-50 ma: 1000 to 8000 cps. Starting Inductance 4.0 henries, ±10%. PM Bias, epoxy-embedded. **PA-28**

Today's requirements call for miniaturization,

but...

HOW

SMALL

IS

MINIATURE?

Automatic
MAKES THEM ALL!

Unit engineered to fit all available sub-miniature cables, AUTOMATIC'S Sub-Miniature Connectors are available in three types; BAYONET, PUSH-ON AND THREADED COUPLING.

Special receptacles available for printed circuit applications.

CHECK THESE FEATURES:
No special tools required for assembly. Foolproof clamping insures accurate alignment . . . positive contact . . . extra strong grip. Exclusive internal-parts design allows outside dimensions of connectors to remain constant regardless of cable dimensions.

For BAYONET, PUSH-ON and THREADED SUB-MINIATURE and MICRO-MINIATURE COAXIAL CABLE CONNECTORS, always specify AUTOMATIC. Our engineers are always ready to discuss your special requirements.

Write, wire or phone for free technical information.

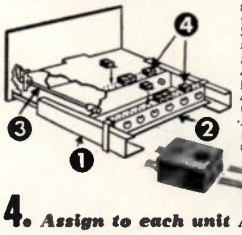
Design Electronic Controls for RELIABILITY IN SERVICE with Alden Components for PLUG-IN UNIT CONSTRUCTION

Be sure your Engineers are working with the Alden Handbook of plug-in unit design. Presents complete line of basic components of tremendous flexibility for adapting your equipment to plug-in construction.

REQUEST FREE 250-PAGE "ALDEN HANDBOOK"

1. *Unitize your circuitry in compact vertical planes using Alden Terminal Card Mounting System.*

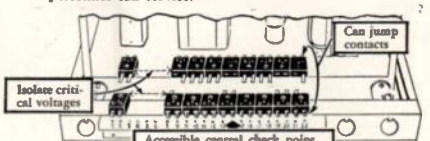
You can use Alden Terminal Mounting Card with Alden Miniature Terminals, Jumper Strip and Sockets staked to accommodate any circuitry — making complete units ready for housing. Components snap into unique Alden Terminals, are held ready for soldering.



2. To mount this vertical circuitry, ALDEN PLUG-IN PACKAGES AND CHASSIS give tremendous variety with standard components

Alden components provide standard plug-in or slide-in housings—with spares, your circuits become units replaceable in 30 seconds.

3. Give chassis easily traceable interconnects and 30-second replacement with ALDEN SERVE-A-UNIT KIT



IT'S AS SIMPLE AS THIS

Arrange Alden Side Rails (1) and Alden Lock Frame (2) to suit your chassis. Alden Serve-A-Unit Locks (3) mount in your chassis to engage pre-punched holes in Alden Lock Frame (2) to pilot, draw in, lock or eject. Arrange Alden Back Connectors (4) in orderly row on Alden Lock Frame. Mount mating Alden Back Connectors on your Chassis.

ALDEN BACK CONNECTORS

GIVING YOU 1) Chassis that plugs in, locks and ejects with half turn of the wrist. 2) leads so beautifully organized, accessible and identified that non-technical personnel can service.

4. *Assign to each unit ALDEN SENSING ELEMENTS — to spot trouble instantly:*

9140 N. Main St., Brockton 64, Mass.

From Alden's Line of Ready-made Components for Unitized Plug-in Unit Construction.

eliminate your connector problems with Continental Connectors

FOR GUIDED MISSILES . . . COMMUNICATIONS . . . COMPUTERS

We Are Not Thinking Reliability . . . We Have Reliability!

You can solve a greater percentage of precision connector problems more easily when you are familiar with the diversified line of Continental Connectors. Every type—from ultra-miniaturized pin and socket connectors to the largest precision molded printed circuit connector known—is made to meet precise standards of reliability. Just a few are shown . . . The ruggedized micro-miniature with up to 44 contacts; the miniature with up to 104 contacts; and largest known precision molded printed circuit connector. Continental manufactures many other connectors for guided missiles, communications, and computers, including printed circuit types for 1/16", 3/32" or 1/8" printed boards, hermetic seal and power types. Hoods, polarizing screwlocks and protective shells are also available for various series. Solve your next connector problem in advance by writing for complete technical specifications on Continental Connectors. Write today to Electronic Sales Division, DeJUR-Amsco Corporation, 45-01 Northern Boulevard, Long Island City 1, New York. (Exclusive Sales Agent)

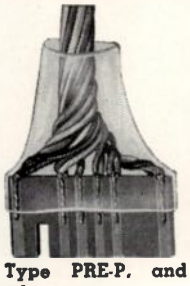
CIRCON



SPECIALIZED MINIATURE and SUB-MINIATURE ELECTRONIC-INSTRUMENT

EQUIPMENT

PRINTED CIRCUIT CONNECTORS

FEMALE—Compression loaded Female Connectors give a wide range of flexibility of contact arrangement, cabling, and design application. They are open end design for all standard circuit thicknesses in one and two ampere models. 4, 12, 24, 36, 48, and 60 contacts—IN STOCK

MALE Connectors in compatible sizes give two-way cabling to precision printed or instrument circuits with highest contact performance. All connectors exceed temperature requirements MIL-E-5400, humidity MIL-P-15035, Type PRE-P, and conform to N.E.M.A. tolerances.

MINIATURE PRECISION HARDWARE

Finest premium quality instrument and electronic hardware. Instrument screws, nuts, split lock and flat washers. Gold plated, shot burnished instrument rivets and eyelets. Hundreds of sizes start at 1/32" x 1/16" and up in 1/32" increments—IN STOCK

MICROMINIATURE Terminal Lugs for extremely compact printed circuits and other electronic and instrument applications.

MINIATURE and SUBMINIATURE INDICATOR LAMP ASSEMBLIES

Smaller size for printed or regular circuits. Over 1000 on a 12" panel. Available in 1.3, 2.7 6, 14, 28 volts and neon. Wide range of light intensities for both low-level and high-level applications. Standard and special message indications and colors including numerals, warnings, letters, and labels. Circon "Litestrip" of ten indicator lamps reading from 0 to 9 in stock. Finest quality materials and sealed construction for military end use and finest commercial applications.

DAGE Coaxial Cable RF CONNECTORS

meet all your circuit design, mounting and environmental requirements

DM series

DESIGNED FOR SUB-MINIATURE APPLICATIONS

- Only half the size of standard BNCs
- Twelve polarity groups—two and three lug
- Vibration proof bayonet locking (MIL-C-5015)
- Teflon insulators permit use over wide temperature range with low electric loss
- .002″ silver plating and gold flash affords excellent corrosion resistance

SHOWN ACTUAL SIZE

BNC series

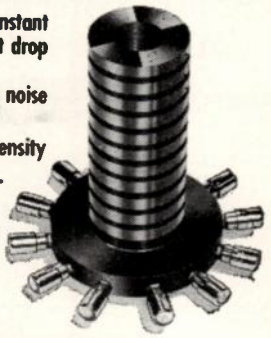
BNC connectors are designed for use with miniature RF cables. Small, lightweight and weatherproof, all have the quick-disconnect bayonet locking feature. Teflon insulators assure low electric loss at high temperatures. Manufactured to MIL-C-3608 specs. Frequency limit: 10,000 mc.

N series

Low voltage, constant impedance connectors for use with medium sized cables. Provide excellent VSWR at frequencies up to 10,000 mc. Available in both weatherproof and non-weatherproof types. Screw type coupling ring locking. Maximum voltage: 500v. Meet MIL-C-71A specs.

C series

A newly developed line of weatherproof connectors for use with medium sized RF cables. Features several design improvements over other connectors, including improved clamping mechanism for excellent cable grip, and a silicone rubber gasket for moisture-proof sealing.



Write for your free copy of Catalog No. 301. It contains complete engineering data on all Dage RF Coaxial Cable Connectors. Remember, too, that Dage engineers will be glad to help on any connector problem.

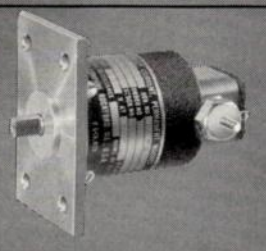
THE MARK OF QUALITY

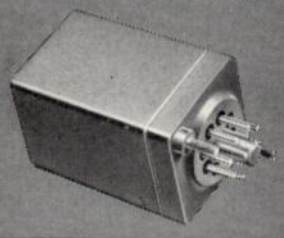
BARBER COLMAN

VERSATILE, RELIABLE ELECTRICAL COMPONENTS FOR YOUR PRODUCTS



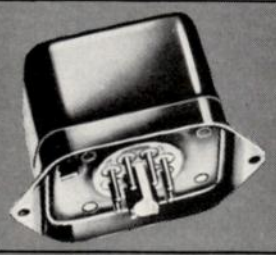
d-c motors

Small, high-quality d-c motors for industrial equipment and aircraft control applications. Output up to 1/10 hp . . . permanent magnet and split series types . . . various mountings and speeds. Offered with gearheads or blowers. Radio noise filters available.



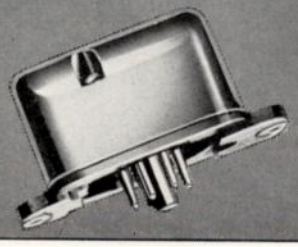
a-c 400 cycle motors

Precision missile and aircraft a-c motors designed to MIL-M-7969a. The capacitor type, four-pole motor features a balanced winding permitting reversal with an SPDT switch. A 400-cycle brake is available. Typical rating is .020 horsepower at 9700 rpm and 83 watts input, intermittent duty.



tach generators

For accurate speed indication and servo rate control applications. Supply up to 40 volts per 1,000 rpm within plus or minus 0.5% linearity. Standard temperature range is −65° to +200°F, but units have been made for −65° to +500°F ambient.



polarized d-c relays

Ultra-sensitive polarized d-c relays capable of operating on input powers *as low as 40* microwatts. Available with three types of adjustment: null-seeking . . . symmetrical magnetic-latching . . . or conventional form C snap-acting. Can also be supplied with integral transistor preamplifiers.

choppers

Feature extremely low driving power . . . low noise level . . . excellent stability . . . long contact life. Convert a low-level d-c signal into a low-level a-c signal which can be amplified to operate control apparatus. Can also be used as a synchronous rectifier to convert low-level a-c signals to d-c without loss.

resonant relays

Characterized especially by low operating power and narrow band width. Coil impedance is high enough to be operated in the plate circuit of a vacuum tube without impedance matching devices. Can be supplied tuned to any frequency between 115 and 400 cps.

TECHNICAL BULLETINS AVAILABLE on all of the above products. Write today for copies.

JAMES

CHOPPERS

INSTRUMENT CHOPPERS

Modulate and demodulate signals as low as one microvolt; center pivot design for operation over wide range of temperature, vibration, shock; shielded for minimum residual noise. Models operate from D.C. switching to 500 Cps.

NEW

MILITARY CHOPPERS

Using the JAMES low noise level chopper mechanism; packaged in new miniaturized 7 and 9 pin plug-in or wire-in models. Designed to provide high reliability of operation over extremes of environment; for missile and airborne applications.

INSTRUMENT TRANSFORMERS

For use in low level applications. A complete standard line for input, interstage, power and output. Consult JAMES with your transformer problems.

NEW

TRANSISTOR AND VIBRATOR POWER SUPPLIES

Designed for custom applications in military and industrial use. Complete equipments for D.C. to D.C. power conversion.

COMMERCIAL TRANSFORMERS

Designed for all power and audio applications. Manufactured to rigid specifications.

JAMES is the complete source of critical components for low level D.C. amplifications, supplying choppers, transformers and chopper drivers.

Write for engineering literature.

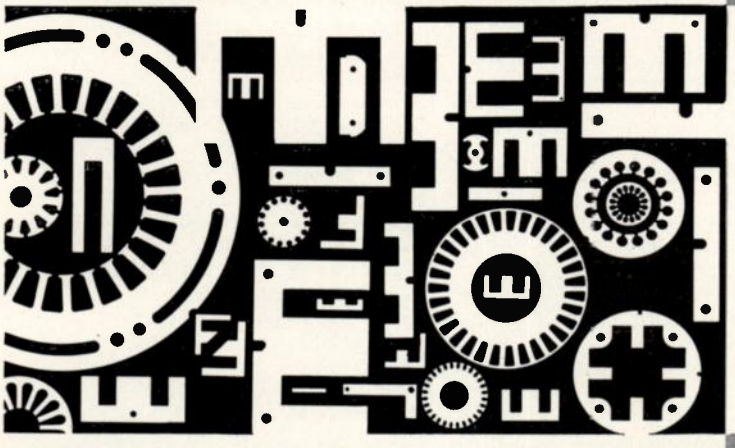
DESIGNews

Magnetic Metals Company designs and produces stamped and tape wound cores and shields for the electrical and electronic industries

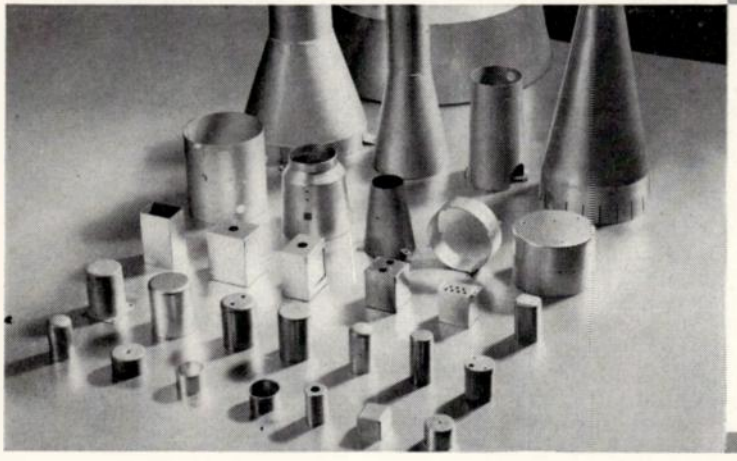


The ultimate in tape wound cores

CENTRICORES

Precision manufacturing methods are used to obtain closely matched magnetic characteristics, including high thermal stability. Centricores matched at room temperature will remain matched over wide temperature ranges.

► **SEND FOR BULLETIN D7.**



Mass-produced... Precision-made

Magnetic Core Laminations

Motor laminations are produced to close specifications from customer-owned dies. Our representative will discuss your needs. Transformer laminations in a wide variety of shapes and sizes are made from standard dies.

► **SEND FOR BULLETIN A1.**

Drawn or formed

MAGNETIC SHIELDS

Provide efficient protection of sensitive electrical equipment against stray magnetic fields, and effect a high ratio of field strength reduction. A wide range of single and multiple shield structures are available from existing tools.

► **SEND FOR BULLETIN F1.**

MAGNETIC METALS COMPANY

NEW...

TWIN-CONTACT MINIATURE DC-AC CHOPPERS

For 50-60-94-120 Cycle Use

A new design feature — twin contacts—exclusive with Stevens-Arnold, achieves the maximum in chopper reliability. Now available in 22 different types, both single and double pole, Stevens-Arnold miniature choppers are built to rigid commercial specifications, with emphasis on long life and low noise level. Please write for Catalog 515.

DC-AC CHOPPERS

For 0–500 Cycle Use

All the usual military specifications are met with liberal factors of safety. Before any Chopper is shipped, it is tested twice over the range of −65°C +85°C to give double proof of stamina. Each production lot sample life tested. Please write for Catalog 280.

ULTRA HIGH SPEED RELAYS

Operating time 200 microseconds. Mount in any position. Will cover the range of −65°C +85°C and are factory sealed. Please write for Catalog 337.

RESONANT RELAYS

Permit remote control by radio or carrier current through frequency discrimination. Relays operate only when energized at rating and reject all other frequencies. Eleven types are offered in the range of 153–442 cycles. Please write for Catalog 335.

Performance-Guaranteed Products by MAGNETICS, inc.

TAPE WOUND CORES

Only Magnetics, Inc. offers *guaranteed* maximum and minimum performance limits for tape wound cores. They are available immediately from stock made from Hy Mu-80, 48 Alloy or Orthonol®. Cores are dry-hydrogen annealed to meet performance specifications.

Inside Diameters	0.375-in. to 4.000-in.
Outside Diameters	0.5000-in. to 5.000-in.
Heights	0.125-in. to 2.000-in.
Tape Thickness	.001, .002, .004, .006

NOTE: All AIEE Proposed Standard Sizes are included.

Only Magnetics, Inc. offers cores in phenolic core boxes and aluminum core boxes, in standard paint finish or with the revolutionary new GVB (Guaranteed Voltage Breakdown) finish. GVB cores can be vacuum impregnated and will withstand 1,000 volts at 60 cycles with bare copper wire. Aluminum boxed cores will withstand temperatures to at least 450°F. All core tests are in accordance with those proposed by the AIEE Working Group on Core Matching and Grading.

***For Complete Details:* Write for Tape Wound Core Catalog TWC-200**

BOBBIN CORES

Performance-Guaranteed tape wound bobbin cores are made from 4-79 Mo Permalloy or Orthonol®. Only Magnetics, Inc. offers stainless steel and ceramic bobbin cores with "Poly Caps"—cores protected by a special tough glass polyester to permit handling without special tools. This cap will not deflect or distort with temperature, and permits normal potting without affecting core properties.

Bobbin Diameters	from 0.125-in. through 0.625-in.
Tape Widths*	from 0.0312-in. through 0.250-in.
Tape Thickness	from 0.000125-in. through 0.001-in.

**Over ¼-in. wide bobbin not standard, but furnished on request.*

***For Complete Details:* Write for Bobbin Core Bulletin BC-202**

MOLYBDENUM PERMALLOY POWDER CORES

Only Magnetics, Inc. offers guaranteed realistic inductance limits for both temperature stabilized and non-stabilized molybdenum permalloy powder cores. Performance-Guaranteed, they are available in a variety of standard sizes and permeabilities. Cores can be graded and color-coded within the guaranteed inductance limits at slight extra cost.

Inside Diameters	0.225 to 0.950-in.
Outside Diameters	0.375 to 1.570-in.
Heights	0.140 to 0.570-in.
Permeabilities	14, 26, 60, 125

Finishes: Powder Cores may be furnished with standard baked enamel and wax tight varnish finishes, or with no finish at all. All cores with finishes which will sustain 500 or more volts may be wound directly with heavy Formex-coated wire.

***For Complete Details:* Write for Powder Core Bulletin PC-203**

MAGNETIC LAMINATIONS

"Performance-Guaranteed" magnetic laminations are available in Hy Mu-80, 48 Alloy and Orthonol®. Standard shapes include DU-1, DU-37, DU-50, EE-24-25, EE-26-27, EE-28-29, EE-186-187, EI-11, EI-12, EI-21, EI-75, EI-187, EI-375, EI-625, F-12, F-12(Modified), F-13, F-20, F-21, F-187, Ring, UBE, UI-312 and UI-375. Standard gauges are 0.014-in. and 0.006-in. Laminations are dry-hydrogen annealed to meet performance specifications. Special shapes can be produced to fit individual customer specifications. These include rotor, stator, and recording head laminations using customer-owned dies.

***For Complete Details:* Write for Magnetic Laminations Catalog ML-301**

MAGNETIC SHIELDS

"Performance-Guaranteed" shields, for protection of electronic measuring devices from moderate or high flux external fields, are usually made from MuMetal or 48 Alloy, respectively, but can be made from any other commercially available magnetic and non-magnetic materials when required. Shields are usually .025-in. thick, but other thickness such as .014, .020, .031 and .062 can be supplied. Shields can be fabricated or drawn, and can be painted, lacquered or unfinished. They are dry-hydrogen annealed for highest field attenuations.

BLILEY CRYSTAL FILTERS

BFN-5: 5 MC FILTER

STANDARD DESIGN—CUSTOM DESIGN

Bliley filter networks are custom designed to meet individual equipment requirements over the range 2 mc to 20 mc; bandwidths from 100 cycles to 100 kc. Complete facilities are available for the development and evaluation of special filter requirements.

TYPICAL PERFORMANCE CHARACTERISTICS
(standard designs)

MODEL	FREQ.	BANDWIDTH at 6 db.	BANDWIDTH at 60 db.	FORM FACTOR	IMPEDANCE
BFN-5	5.0 mc	3.5 kc.	12 kc.	3.5	1600 ohms
BFN-11	10.7 mc	30.0 kc.	55 kc.	1.8	2700 ohms
BFN-13	13.0 mc	30.0 kc.	55 kc.	1.8	1500 ohms

Bliley filter networks are now available in three standard designs with characteristics selected for general application in communications systems and particularly in SSB equipment. The compact size and rugged construction of the units makes them especially suitable for use in mobile and miniaturized equipment.

BLILEY CRYSTALS *for* COMPLETE SPECTRUM COVERAGE

MILITARY AND COMMERCIAL CRYSTALS

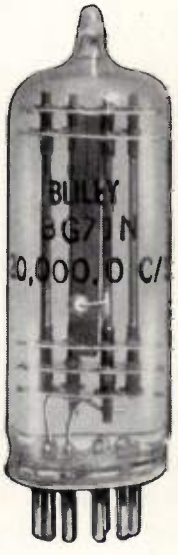
BH6 SERIES

BH9 SERIES

BANTAM BX

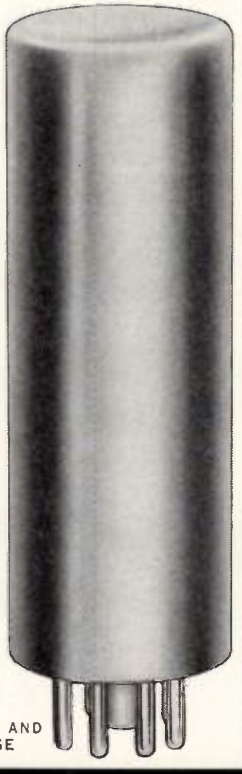
BH9, BX and BH6 Series. Miniature and subminiature units hermetically sealed. For range 4 kc. to 125 mc. Military units meet or exceed MIL-C-3098B. BH6, BH9 and BX Series available as plug in or with wire leads.

Special designs are available to meet vibration up to 2000 cps. at 5G. for airborne and missile environments. New exclusive Bliley development for high temperature operation up to 185°C. may be specified for range 40 kc. to 600 kc.



Technical bulletins are available on the complete line of Bliley products. Request information on your specific requirements.

HIGH STABILITY CRYSTALS



BG6 SERIES

Vacuum mounting and special processing combine high stability with minimum aging in Bliley's sealed-in-glass series. These advanced designs for frequency range 4 kc. to 125 mc are ideal where precision performance and long term reliability are premium considerations. Supplied with temperature control ovens (Bliley types BTC-2 or TCO-11C) where required.

BG7 SERIES

BTC-2 CRYSTAL AND OVEN PACKAGE

CRYSTAL OVENS

TCO-1 SERIES

Oven Type	For Use With Bliley Crystals	Stability	Operating Voltages
BTC-2	Supplied only complete with BG6 Crystal	±0.5°C.	6.3 or 26.0
TCO-11 Series	BG6 or BG7 Series	±0.25°C.	115
TCO-14 Series	2-BH6A	±2°C.	6.3, 12.6 or 26.5
TCO-2L	2-BH9A	±4°C.	6.3 or 12.6

BLILEY BUILDS COMPONENT OVENS FOR TRANSISTORS, COILS AND OTHER CIRCUIT ELEMENTS REQUIRING TEMPERATURE STABILIZATION.

TCO-11 SERIES

CRYSTALS

OVENS

CRYSTAL FILTERS

PACKAGED OSCILLATORS

CRYSTALS Bulova crystals are available for any frequency from 4 KC through 100 mc. Featured are the ST "shock mounted" series from 16 KC through 500 KC. Crystals are available to meet all current military specifications.

OVENS A complete line of ovens from the multi-purpose AM-100 to the specific application BHC series. Temperature stabilization can be held as close as .1°C. Crystal ovens are available which will hold up to 20 units in the subminiature series.

CRYSTAL FILTERS Bulova filters can be supplied with center frequencies from 10 KC through 20 mc. Bandwidths of .01% to 8% of center frequency. Slope factors 60/6. Ratio of bandwidth at 60 db to bandwidth of 6 db as steep as 1.4/1 with single sideband filters having greater slope.

PACKAGED OSCILLATORS A complete range of frequencies from 8 KC through 70 mc is available as tube type or transistorized oscillators. The Bulova OS-1 (picture above) will maintain an accuracy of .0012% over −55°C. to +80°C. ambient. This tube type oscillator is available from 180 KC through 50 mc.

Bulova "custom engineering" services are available to fulfill your every frequency control requirement.

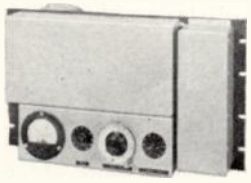
McCoy

Quality QUARTZ CRYSTALS

Standard of excellence for the crystal industry. Produced in frequencies from 500 k.c. to 200 m.c. to meet government or your own specifications. Standard size or Subminiature; Glass or Metal Cases; Plug-in or wire leads.

Quality CRYSTAL FILTERS

from 10 m.c. to 30 m.c., with band width of 0.1% to 0.3% of center frequency.



For additional information on your specific needs, write, wire or phone us. Our research section will be glad to assist you.

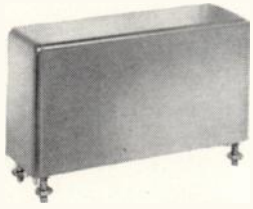
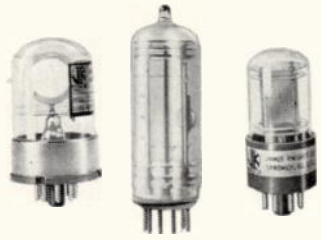
JK PRODUCTS

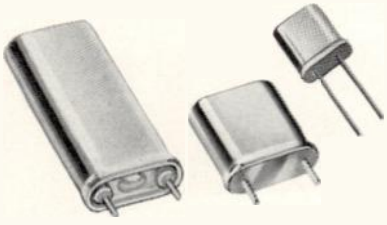
PACKAGED FREQUENCY MANAGEMENT



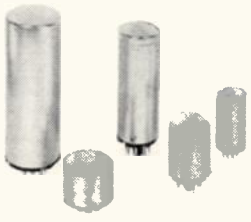
JK Sulzer Frequency Standard: For your most precise laboratory measurements, the JK SULZER 1 megacycle Frequency Standard provides stability of better than 1 part in 10^9 per day. Frequency is variable over a range of 0.9 cycles or more, and capable of being reset to 5 parts in 10^{10}.



JK Thermystal: An advanced-design frequency control unit combining plug-in simplicity with extreme precision. ***Frequency stability:*** 30 to 900 kc, ±.0001%; 1000 kc to 150 mc, ±.00005%.



JK Transistor Oscillator: Complete, compact, precise plug-in signal source providing fixed temperature and humidity environment for transistor and circuitry elements. ***Frequency stability:*** (24-hr. period) 1 part in 10^6.



JK Crystal Filters: Compact, rugged, hermetically-sealed and stable, JK CRYSTAL FILTERS (band pass filters) have a ***Frequency Range:*** 1 mc to 17.5 mc., and are available for special filtering purposes to 150 mc. ***Band Width*** at 6 db: 0.0% to 4% of nominal on all frequencies, and up to 12% for certain frequencies.

JK Glasline Crystals: For ultra stable frequency control, JK GLASLINE CRYSTALS provide unprecedented stability and reliability. Compact, evacuated and hermetically-sealed against moisture, contamination, shock, and barometric pressure. Over a complete range at 800 cycles to 5 mc. and up

JK Military Types: Hermetically-sealed, JK MILITARY TYPE CRYSTALS are metal-cased and in ***Frequency Ranges:*** 16 kc to 100 mc.

JK Ovens: Capable of maintaining set temperatures around components or circuitry with less than ±1° C. variation over the range of −55° to +100° C., JK OVENS are light, compact, inexpensive, uniform and reliable.

THE JAMES KNIGHTS COMPANY—SANDWICH, ILLINOIS

DELAY LINES CONTINUOUSLY VARIABLE AND FIXED

TAPPED DELAY LINES — 4T, 6T, 7T, 8T, and 9T:
Impedance: 50 ohms to 2000 ohms. Delay: 0.1 us to 100 us.
Rise Time: Less than 4% of the total time delay. Meet MIL specifications.

STEP VARIABLE DELAY LINES — Type 601-2-3 Series:
Equal input and output impedance. Total time delay up to 27 us. Rise time better than 5% of the total time delay.

Type 7T or 505

CONTINUOUSLY VARIABLE DELAY LINES:
Type 500 Series: Resolution time less than 8×10^{-11} second. Total time delay up to 1 us.
Type 521 & 801 Series: Resolution time less than 8×10^{-11} second. Total time delay up to 1000 us. Rise time less than 5% of the total time delay.

Formerly ADVANCE
249 Terhune Ave., Passaic, N. J.

PHASE METERS

0.0001 CPS TO 500 MC

Type 405 Series: Direct reading in degrees. Accuracy ¼° relative, 1° absolute. Type 405 — 8 cps to 100 kc; **Type 405H** — 8 cps to 500 kc; Type 405L — 1 cps to 20 kc.

Type 202 Vectorlyzer: 1° full scale sensitivity, accuracy 2%; 15 cps to 500 mc.

Phase Indicator, Type 205 and 205A: Accuracy 0.1°; 100 kc to 15 mc.

Type 410: Tubeless, transistorless; direct reading in degrees.

Type 405

Type 208: Accuracy 0.1°; continuously variable from 0 to 360°.

Type 206: Measures time interval down to 8×10^{-11} second.

LET SHEROLD SOLVE
YOUR CRYSTAL PROBLEMS

Complete, advanced engineering laboratory is at your disposal.

Whether your need is for one special frequency crystal—or thousands, you can be assured of quality manufacture and unexcelled performance when you specify Sherold . . . now one of the country's largest exclusive producers of crystals for military and commercial requirements.

Write for complete data on your requirements.

BLILEY
SOLID ULTRASONIC
DELAY LINES

3 to 4500 MICROSECONDS

SINGLE ENDED RINGING: DELAY TIME: 6.10 USEC.

TEMPERATURE CONTROLLED SINGLE ENDED: DELAY TIME 13.34 USEC.

DOUBLE ENDED RINGING: DELAY TIME: 6 USEC.

SET OF TEN MATCHED LINES: DELAY TIME: 700 USEC.

SET OF THREE MATCHED LINES: DELAY TIME: 2780 USEC.

BLILEY SOLID ULTRASONIC DELAY LINES ARE CUSTOM ENGINEERED FOR EACH APPLICATION. EXCEPTIONAL PERFORMANCE CHARACTERISTICS SUCH AS LOW LOSS AND ATTENUATION OF SPURIOUS RESPONSE RESULT FROM A COMPLETE APPRECIATION OF THE CRITICAL FACTORS INVOLVED. BLILEY DELAY LINES MAY BE SPECIFIED WITH QUARTZ OR BARIUM TITANATE TRANSDUCERS AND WITH TEMPERATURE CONTROLLED ASSEMBLIES. BLILEY, WITH COMPLETE FACILITIES FOR PRODUCTION, TEST AND EVALUATION, IS YOUR MOST DEPENDABLE SOURCE. REQUEST BULLETIN #48 FOR DETAILED INFORMATION.

BREW'S experienced personnel can solve your Delay Line Problems.

- Competent Engineers
- Latest Testing Equipment
- Modern Assembly Line
- Special Prototype Equipment
- Quality Control on Short or Long Runs

Founded in 1946 for design, development and manufacture of delay lines.

Brew offers you the "one source" for Distributed Constant, Lumped Constant, and Ultrasonic Delay Lines. You and your product will benefit from Brew's modern and complete production facilities, pioneer experience, and complete cooperation from our personnel.

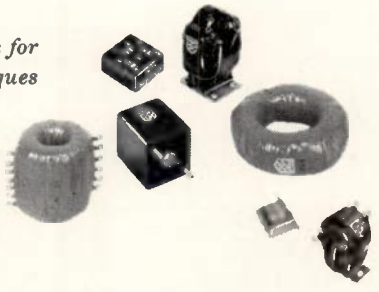
ESC . . . WORLD LEADER IN CUSTOM-BUILT DELAY LINES!

- *1st in sales*
- *1st company devoted exclusively to the manufacture of custom-built delay lines*
- *1st in research, design, development of custom-built delay lines, variable delay lines, continuously variable delay lines*
- *1st to submit the most definitive laboratory reports with all prototypes*

ESC is the manufacturer of the remarkable Delay Line Model 51-43 – a totally new Delay Line with a 145 to 1 delay-to-rise-time ratio. Write for complete data.



CUSTOM-BUILT and STOCK PULSE TRANSFORMERS

medium and low-power transformers
filters of all types • pulse-forming networks
miniature plug-in encapsulated circuit assemblies

Every prototype delay line and pulse transformer report you receive from ESC includes submitted electrical requirements, photo-oscillograms (which indicate input and output pulse shape and output rise-time), the test equipment used, and an evaluation of the electrical characteristics of the unit. You can be sure that ESC specifications are at once realistic and economical, particularly aimed at eliminating costly, time-consuming overspecification.

Write today for literature and technical data.

exceptional employment opportunities for engineers experienced in pulse techniques

CUSTOM & STANDARD

Delay Lines

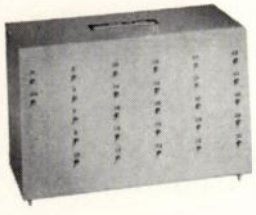
Control Electronics Co. Inc. is a leading designer and mass producer of electromagnetic Delay Lines. A representative group is shown here with the available ranges of delays, bandwidths and impedances. Further information is readily available from our Engineering Dept.

BUILT TO MIL SPECS. FAST PROTOTYPE SERVICE . . . DELIVERY 1 TO 3 WEEKS.

Distributed Constant Delay Lines

CEC DISTRIBUTED CONSTANT DELAY LINE FEATURES

- Lowest cost — reliable performance
- Maximum delay to rise time ratios
- Maximum delay per cubic inch
- Delays to 30 μ secs.
- Impedances: 200 to 10,000 Ω
- Bandwidths to 20 mcs
- Linear phase shift



Variable Delay Lines

Infinite, incremental or decade variable delay lines available in any range of delays and impedances.

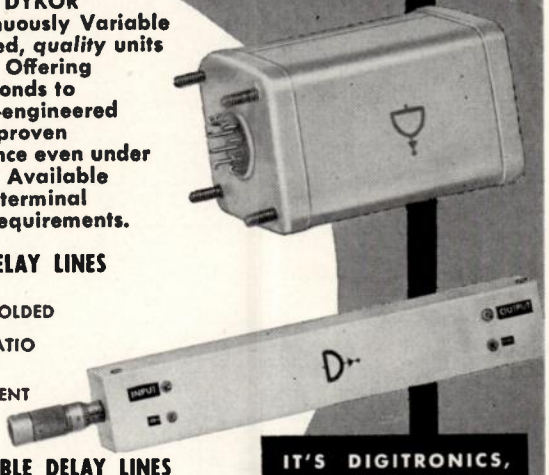
Lumped Constant Delay Lines

DELAYS TO 20,000 MICROSECONDS.
BANDWIDTHS to 500 MCS.
Zo FROM 50 TO 10,000 OHMS.

Multi-tapped Lumped Constants available in many configurations

System Delay Lines

Complete delay and pulse systems designed to your needs.



NOTE: Data Sheets on request

IF IT'S DELAY LINES YOU NEED ...

CONSULT DIGITRONICS CORP., designers and manufacturers of high reliability, minimum volume DYKOR* Lumped-Constant and Continuously Variable Delay Lines . . . custom-crafted, *quality* units at the lowest possible price. Offering delays of from milli-microseconds to multi-milliseconds, precision-engineered DYKOR Delay Lines deliver proven long life and peak performance even under the most adverse conditions. Available in delays, shapes, sizes and terminal arrangements to suit your requirements.

DYKOR LUMPED-CONSTANT DELAY LINES
FEATURING—
- HERMETICALLY SEALED, EPOXY-MOLDED OR OPEN CONSTRUCTION
- HIGHEST DELAY-TO-RISE TIME RATIO
- EXTREME ACCURACY
- WIDE TEMPERATURE RANGE
- LOWEST TEMPERATURE COEFFICIENT
- MEET ALL APPLICABLE MIL SPECIFICATIONS

DYKOR CONTINUOUSLY VARIABLE DELAY LINES
FEATURING—
- INFINITE RESOLUTION
- NO SLIDING CONTACTS
- LOWEST TEMPERATURE COEFFICIENT
- HIGHEST DELAY-TO-RISE TIME RATIO
- EXTREME ACCURACY
- GREATER VERSATILITY IN USE

IT'S DIGITRONICS, TOO, FOR DIGITAL HANDLING AND CONTROL SYSTEM DESIGN AND ENGINEERING!

For details, circle #290 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

when rf power must be absorbed or accurately measured...

"Thruline"

DIRECTIONAL RF WATTMETERS

Direct reading . . "thru" type . . . for measuring forward or reflected power in complete systems under operating conditions . . . inserted between transmitter and antenna or load . . . full scale power and frequency range determined by plug-in elements.

Model	Line	Impedance	Frequency ELEMENTS Power		Connector
43	RG-8/U etc.	50 ohms	25-60; 50-125 100-250; 250-500; 400-1000 mc	10; 25; 50; 100; 250; 500 W	N; C; HN; UHF
4712	1⅝	50 ohms	200-500 400-1000 mc	.5; 1.0; 1.5; 2.5; 5.0 KW	Rtma Std.
460	3⅛	50 ohms	200-500 mc	1; 2.5; 5; 10	Flange
480	3⅛	51.5 ohms	400-1000 mc	25; 50 KW	Sleeve Bullet
490	6⅛	51.5 ohms	200-500 mc	25; 50 and 100 KW	

COAXIAL RF FILTERS

Designs utilize both distributed and lumped constant . . . insertion loss and VSWR are very low in pass band . . . high attenuation in stop band . . . new miniature filters as light as 5 ounces. Will produce in quantity to your specs.

	Low Pass	Low Pass	Low Pass	Low Pass	High Pass	Band Pass
Models	5310	5311	522	819-1200	530	5131
Cut Off	90 mc	160 mc	400 mc	1200 mc	420 mc	45 mc & 105 mc
Stop Band	100-180 mc	180-320 mc	500-1200 mc	1900-4000 mc	100-375 mc	33.7-39.7 mc 120-1000 mc
Max. Power	100W	100W	150W	3.5KW	50W	25W
Min. Stop Band Atten.	55db	55db	55db	40db	60db	25db 40db
VSWR in p.b.	1.5	1.5	1.35	2 to 1	2.5	1.6
Connectors	Female N		Male-Female N			Female BNC

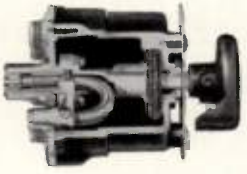
Chart shows characteristics of typical Filters

NOMINAL 50 OHM

You will find dependable coaxial line instruments and accessories at Bird Electronic. Specialization in this field, backed by a constantly growing engineering staff and enlarged physical facilities, has resulted in the continuous development of new designs to meet specific requirements. If you are searching for more than a standard product for field or laboratory use, turn to Bird Electronic. Our years of experience in this field may assist you in the solution of your problem.

"Termaline" RF ABSORPTION WATTMETERS

Portable . . . direct reading . . . non-radiating "load" type wattmeter . . . used in field or laboratory to measure and absorb power . . . accuracy ± 5% of full scale . . . VSWR 1.1 to 1 maximum over operating range.



Model	Freq. Range	Max. Power	Power Range Scales	Input Connector
611	30-500 mc	60W	0-15; 0-60	Female N
612	30-500 mc	80W	0-20; 0-80	
67	30-500 mc	500W	0-25; 0-100; 0-500	Coplanar with Adapter to UG-21/U. (optional) RG-17 & RG-19 cable assemblies: adapters to rigid lines
67C*	30-500 mc	2500W	0-100; 0-500; 0-2500	
824*	30-220 mc	5000W	0-5000	

*Water cooled (other available models described in specification sheets)

COAXIAL SWITCHES

Small compact design permits the "Coaxwitch" selector to be incorporated into many electronic units where repeated channel switching is required. Finger-tip operation: pull knob, rotate and push in to make contact.

Model	74	71B	72R	62-2
Positions	Six	Eight	Reversing Switch	Two
Coaxial Circuits	One	One	Two	Two
Connector	Type N female connectors are standard on all models to receive UG-21/U series plug. Use adapters with other cables and connectors.			

"Termaline" RF LOAD RESISTORS

Reflection-free terminations for 50 ohm coaxial lines . . . low VSWR . . . non-radiating . . . water cooled ratings 2500 W to 50 KW . . . air cooled rating to 1500 W.

Model	Max. Power	Freq. Range	Max.* VSWR	Connector
80	5W	0-1KMC	1.1	"N", "C", "BNC"
80A	20W	0-500MC	1.1	N Female
81	50W	0-1KMC	1.1	
81B	80W	0-1KMC	1.1	
82A	500W	0-1KMC	1.1	Coplanar with Adapter to UG-21/U
883	1.2KW	0-1KMC	1.1	LC
888	1.5KW	0-1KMC	1.1	3⅛ Flanged

*Other VSWR requirements can usually be met by special selection.

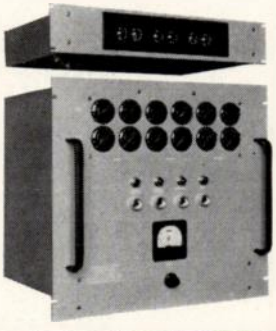
RAPID ACCESS in Analog Data Reduction Systems

DIGITAL TIMING GENERATOR

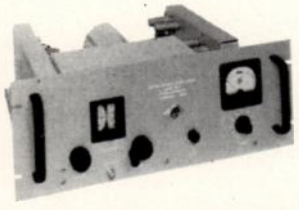


MODEL 201 for Tape Indexing generates numerically coded timing signals which are recorded on the magnetic tape throughout the data recording periods, providing a precise digital index in terms of elapsed time.

Write for Technical Bulletin TSG

MODEL 206A IS A MILITARIZED AIRBORNE VERSION OF MODEL 201.

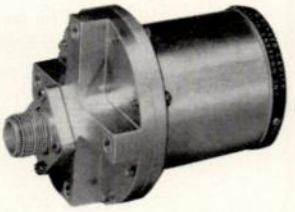
MAGNETIC TAPE SEARCH UNIT



MODEL 202 for Tape Searching operates during data reduction periods. This instrument automatically locates and selects for controlled playback the tape data included between a "sequence start time" and a "sequence end time" specified by panel dial settings. Model 202 may be modified to search for timing formats other than those originated by Model 201.

ULTRA STABLE OSCILLATOR

One Megacycle Signal Source



STABILITY: 1 PART IN 10^9 PER DAY

For precise time measurements or frequency control, Model 101C features include: A crystal oven without moving parts that is stabilized to better than 0.01°C. by temperature-sensitive resistance bridge, and dissipation in oscillator crystal which is stabilized at a power level of less than one microwatt. MULTIPLIERS and DIVIDERS are available for other frequency values with corresponding stability. *Write for Bulletin USO.*

HIGH POWER TELEMETERING DIPLEXERS

for Severe Environment

These instruments feed signals from 2 - 100 watt transmitters into a single missile antenna system and are designed to satisfy military requirements for use in test missiles and supersonic aircraft. Frequency Range: fixed-tuned between 215 to 250 Mc/s; Attenuation: less than 0.3 db; Size: each cavity approx. 3" x 4"; Weight of total system: 3.7 pounds, (2 diplexers + circuitry). *Write for Bulletin 1231.*

Please call or write for name of Hycon Eastern Representative in your area. (Telephone: Cambridge, Mass., UNiversity 4-7200)

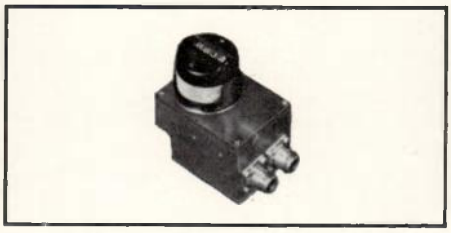
BAND-PASS/BAND-SUPPRESSION filter used in simultaneous operation of Air-Traffic-Control equipments from a common antenna. Isolates adjacent channels better than 30 db, with negligible loss in pass frequencies. Notch-valley response adaptable to other frequencies, more complex requirements. Similar units possible with exceptionally light weight for special applications.

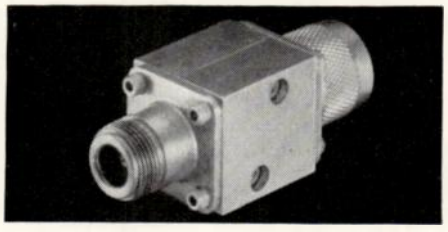
MICROPHASE R. F. FILTERS FOR AIRCRAFT, MISSILES

• FLEXIBILITY OF DESIGN

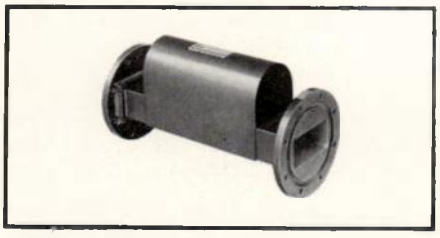


• HIGH PERFORMANCE

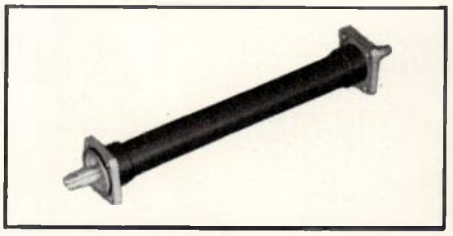
• RELIABILITY . . .



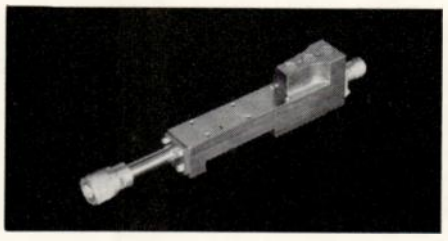
Meet your critical filter needs, including severe shock and high temperature requirements. These are typical examples.



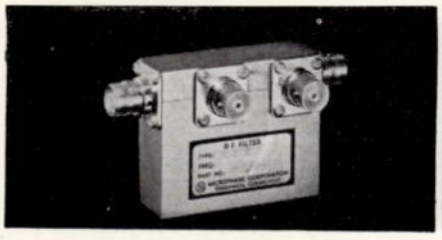
CONTINUOUSLY-MATCHED FILTER NETWORK. The impedance is approximately 50 Ohms resistive in the stop bands. Provides VSWR of 2.5:1 maximum near cutoff frequencies. Low-, high-, and band-pass filters can be manufactured with similar characteristics from VHF through X Band.



PRESELECTOR, tunable from 2600 to 3000 mc. Employs iris-coupled quarter-wave cavities; gang-tuned, temperature-compensated, excellent resettability. Third connector for special-purpose monitoring output, which continuously monitors the passband about 15 db below filter level.

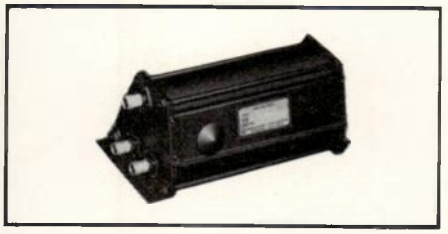


HIGH PASS – A split-block unit with a minimum attenuation of 60 db in the stopband. Insertion loss in the 7-to-12-kmc passband is a maximum of 1.0 db. Sharper cutoffs available. Similar designs in the VHF to X bands, Silver-plated, rhodium-flashed; weighs only 4¼ ounces.



NARROW-BAND MATCHED LOW-PASS WAVEGUIDE filter, designed to eliminate higher-order harmonics. Passband VSWR is less than 1.1:1; stopband attenuation more than 60 db up to 12 kmc. Available up to K band with 8% rise from 1 db to 60 db. Also high-pass waveguide filters.

HIGH-POWER LOW-PASS filter handling up to megawatt powers. Maximum VSWR is 1.15:1, insertion loss less than 0.2 db. Stopband attenuation is minimum 60 db. They may be supplied with a variety of RETMA flanges to work in rigid lines of different sizes.



WIDE-BAND-PASS filter with a sharp-cutoff skirt selectivity. Passband insertion loss is under 1 db and maximum VSWR is 2:1. This unit is reduced in weight for airborne applications. Band widths up to 8:1 are available; frequency range from 10 to 12 kmc.

TRIPLEXER – Divides UHF, VHF and L-Bands with 40 db isolation. Whole frequency spectrum is usable because power is divided equally at crossovers with negligible loss. Unit has maximum VSWR less than 2.6:1, weighs 14 oz., comes with choice of connectors. Unit is available with 60 db isolation in slightly larger size.

MULTI-SECTION, COUPLED-TUNED filter with typical Tchebysheff response. Passband ripple as low as 0.2 db. VSWR can be kept to below 1.15:1 for phase-tracking requirements. Band widths of 0.01 fc to 0.25 fc, with a mid-frequency range of up to 4000 mc, are available.

TELEMETERING TRIPLEXER. Extremely lightweight, for airborne and missile applications. Couples three inputs to a common antenna with under 1.5 db with adjacent channels isolated better than 15 db. Ruggedly built for rigid environmental conditions.

MC μ/φ

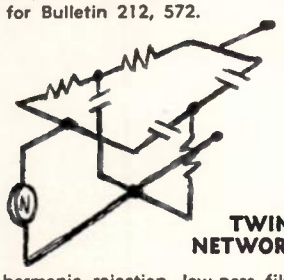
FILTERS
NETWORKS

TOROIDAL WAVE FILTERS

Hermetically sealed LC filters with stable toroidal inductors.

Low, high, bandpass models available over wide impedance and frequency ranges. Stud-mounting and plug-ins. Stock and special designs such as interstage filters. Write today, orders filled promptly, competitive prices. Ask for LC bulletins.



ACTIVE FILTERS

Plug-in amplifier-feedback network pairs for use as filters or bandpass amplifiers.

Widely used where LC filter sections are impractical.

Available with:
Tuned circuit response Q to 40, center frequency 1 cps to 500 cps.
Bandpass response with center frequency 5 to 500 cps.

Ask for Bulletin 212, 572.

TWIN-T NETWORKS

For harmonic rejection, low-pass filtering, feedback circuits. Hermetically sealed, stable, plug-in or stud mounted. Null frequencies 1 cps to 50 kc, wide range of impedance levels. Quick delivery, ask for bulletin 500.

Complete engineering service for special filter and network designs. Instrumentation and control problems invited. Manufacturing facilities for prototypes or a thousand units. Fast delivery at competitive prices. Inquiries answered promptly. Let us put you on our mailing list for bulletins and our "Network Notes."

. . . You'll find the Type and Size Fuse you need

• • • IN THE COMPLETE LINE OF BUSS AND FUSETRON FUSES

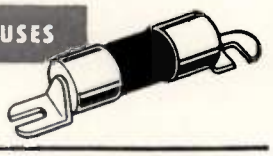
The following is only a representative selection. The complete BUSS line of fuses includes: single-element, quick-blowing type; single-element for normal circuit protection type; dual-element, slow blowing type and signal or visual indicating types . . . ranging in size from 1/500 ampere up — plus a companion line of fuse clips, blocks and holders.

FUSETRON TYPE N and TYPE C FUSES and FUSEHOLDERS

Especially suitable for protection of TV

Ears on fuses match slots in holder.

Marking on fuse and fuseholder in direct view.

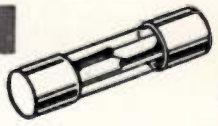


Safeguard against use of wrong size and type of fuse.

BUSS KTK HIGH INTERRUPTING CAPACITY FUSES

$^{13}/_{32}$ x 1½ inch. Capable of safely interrupting 68,000 amps.

FUSETRON ACK CLAMP TYPE FUSES



20 to 300 amp., Dual-element type.

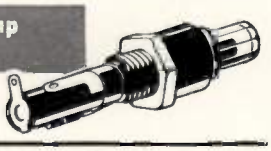
BUSS ACO AIRCRAFT FUSES

Mechanical Indicating — Limiter type 1 to 75 amp.

BUSS AGX FAST ACTING FUSES

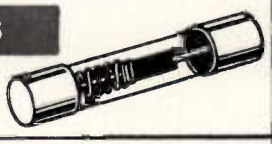
¼ x 1 in. Glass tube 1/500 to 2 amp.

BUSS Series HJ and HK Non-Indicating FUSEHOLDERS



Panel mounted for ¼ x 1 inch and ¼ x 1¼ inch fuses

BUSS GLD SIGNAL ACTIVATING FUSES



¼ x 1¼ inch Silverplated pin pops out when fuse is blown and activates signal or alarm.

BUSS Series HJ and HK Lamp Indicating FUSEHOLDERS

Panel mounted for ¼ x 1 inch and ¼ x 1¼ in. fuses.

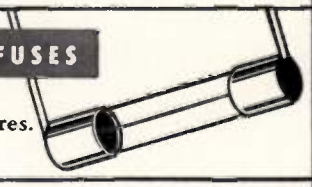
FUSETRON MDL FUSES

¼ x 1¼ inch. Dual-element — slow blowing type 1/100 to 30 amp.

BUSS No. 4051 ONE-PIECE CLIP and TERMINAL

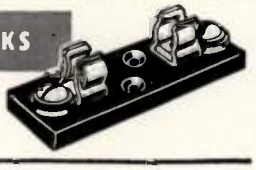
Solder type terminal for ¼ inch fuses.

BUSS ABC CERAMIC TUBE FUSES



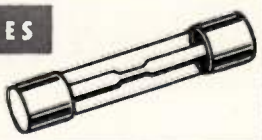
¼ x 1¼ inch High interrupting capacity fuses ¼ to 30 amp.

BUSS No. 4409 FUSE BLOCKS



Small Base, solder type Side Terminals.

BUSS GJV PIG TAIL FUSES



⅛ to 6 amp. Solder into circuit wires.

BUSS No. 4512 FUSE BLOCKS

Full Base, Screw type Terminals.

BUSS SFE STANDARD FUSES

Fuses of different amperages are different lengths — to make it impossible to insert too large a size.

For more detailed information to help you select fuses and fuseholders to meet your electrical protection needs . . . Write for BUSS bulletin SFB.

Or tell us your problem and let our Fuse Engineers assist you in getting the protection you require.

FUSETRON FNM FIBRE TUBE FUSES

$^{13}/_{32}$ x 1½ inch. Dual-element — slow blowing type.

SPECIAL TERMINALS, SAPPHIRE-TO-METAL SEALS AND MAGNETRON WELLS AVAILABLE

High alumina ceramic and metal parts are brazed together to form a high-strength, long-life, molecular seal.

Stock sizes for up to 100 KV-DC operating voltages available for short delivery.

For complete information, brochure, spec sheets and price lists, write or phone: Ceramaseal, Inc., New Lebanon Center. N. Y. West Lebanon 3-5851.

There are

3 SPECIFIC WAYS

in which "Proceedings of the I R E" serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I R E" publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I R E" carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of-product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order*. Wherever radio engineering activity is the greatest, companies employ I R E members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I R E," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I R E" is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

JACK PANELS and PATCH CORDS

Standard broadcast (audio and video) as well as custom built jack panels as used in a wide range of instrumentation and control applications requiring either regular switchboard or coaxial types of jacks. A complete selection of patch cords to fill all types of applications. Size range of special panels from two up to jumbo sizes with about one thousand jacks per panel.

JACKS — PLUGS — KEYS

A complete selection of standard types of jacks and plugs plus an extensive line of coaxial types suitable for pulse circuitry, microwave, and video applications. Push button and turn type keys with a very wide variety of circuit combinations using well established telephone switchboard designs are available.

HEADSETS

Thirty-five years of continuous production has produced fourteen basic types ranging from substantially all military types to specialized low cost units suitable for incorporating in toys as a sound generating device. All basic types produced in a wide assortment of variations.

Write for bulletins on these and the many additional standard stock items as well as an almost unlimited variety of manufactured-to-order products falling within the product classifications shown above.

Magnetic materials?

Here's the latest from THOMAS & SKINNER

Permanent Magnet Design
(Bulletin No. 158)—Covers application, design problems and testing procedures for the design engineer. Provides details of permanent magnet alloys and comparative properties, including exclusive T&S Alnico 5Cb (patented).

Electrical Laminations
(Bulletin No. L-1057) — Data on standard, special and Mil-T electrical laminations. Covers materials, specifications, typical value curves and T&S OrthoSil® laminations.

OrthoSil Wound Cores
(Bulletin WC-356)—Describes wound "C" and toroidal cores, complete with specifications and value curves. Lists part numbers for standard 4 and 12 mil cores.

SiFeMag® Tapes
(request SiFeMag Catalog)—Offers data on T&S magnetic tapes for 400 to 200,000 cycle applications and for pulse components . . . in strip 1, 2, 4, 5 and 7 mils.

Select the bulletins you need . . . and write Thomas & Skinner today.

CUSTOM DESIGNED TO SAVE SPACE AND WEIGHT

TOUGH and TINY... the A. W. HAYDON CO.'S unique line of SUB-MINIATURE TIMING DEVICES

CUSTOM DESIGNED TO MEET MILITARY REQUIREMENTS

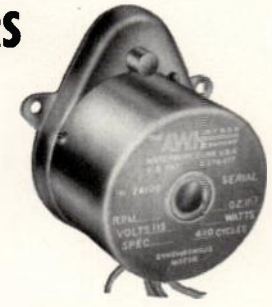
REPEAT CYCLE TIMERS
Write for Bulletin AWH-RC-301

TIME DELAY RELAYS
Write for Bulletin AWH-TD-502

features

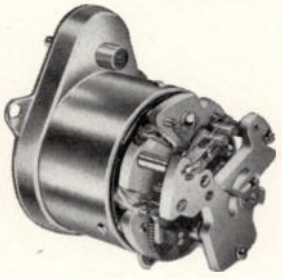
Hermetically Sealed Housings
1/4 the size of standard designs
1/2 the weight of standard designs
Direct Current or 400 Cycle
Aircraft & Missile Applications
Wide range of timing programs
Timers have 1 x 2 inch cross section.
Indicators only 1 1/4 inch diameter.

Miniature Motors and Custom Devices also available.



ELAPSED TIME INDICATORS
Dial face or Digital (as shown)
Square or Compact Flange Mounting (as shown)
Write for Bulletin AWH-ET-602

TIME-PROVEN STANDARDS OR TEST-PROVEN SUB-MINIATURES . . . ALL DESIGNED FOR RELIABLE OPERATION IN YOUR APPLICATION



TIMING AND CONTROL DEVICES BY THE A. W. HAYDON COMPANY ARE RECOGNIZED AS THE MOST DEPENDABLE PERFORMERS IN THE FIELD.

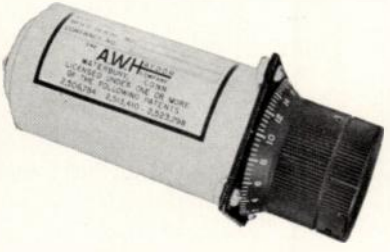
400 CYCLE MOTORS

Reversible — Light weight (8 ounces). 115 volts ± 10%; 55 milliamps. Torque: 0.025 oz-in at 3000 rpm. Meet Military Requirements. Write for Bulletin AWH MO 803.

GOVERNED DC MOTORS

The A. W. Haydon Company now offers 3 series of Chronometrically Governed DC Motors. Each designed to do the same job in a different application.
5700 Series — non-military applications where extreme temperature, vibration and shock are not experienced.
5600 Series — Aircraft and military applications where extreme temperature and moderate vibration and shock are encountered.
5800 Series — Aircraft and missile applications where extreme temperature, vibration, and shock are encountered.
Write for Bulletin AWH MO 800, -801, -802, -804.

MINIATURE HERMETICALLY SEALED TIMERS



Supplied in 2½" diameter housing. Optional mounting and electrical termination.

TIME DELAY RELAYS
Single or multiple switching. Delay periods from 2 seconds to 3 hours. Write for Bulletin AWH TD 400.

REPEAT CYCLE TIMERS
Single or multiple switching. Wide Range of Time Cycles. Write for Bulletin AWH RC 200.

SPECIAL TIME DELAY RELAY

Supplied in 2.2" diameter housing. Precision unit: ± 1% accuracy. Meets military requirements. Adjustable over wide range. Write for Bulletin AWH TD 500.

PROPORTIONAL DELAYED RESET TIME DELAY RELAY

Provides a controlled reset rate. Designed to meet special applications. Hermetically sealed or enclosed in dust cover. Meets military requirements. Write for Bulletin AWH TD 402.

STOP CLOCKS

Precision Movement — Electrical Reset. Temperature Range −55° C. to 85°C. Option on Mounting, Electrical Termination, Calibration Range. 20-30 Volt D.C. Write for Bulletin AWH-ET-700. 115 Volt, 400 CPS. Write for Bulletin AWH-ET-701.

OTHER BULLETINS AVAILABLE ON REQUEST
(or write for complete catalog).

AWH-MS-101-102	Application Data Sheets
AWH-RC-201	Basic Repeat Cycle Timers
AWH-RC-300	Precision Interval Timers
AWH-TD-401	Hermetic Adjustable Time Delay Relays
AWH-TD-403	Basic Time Delay Relays
AWH-TD-404-405	Dial Adjustable Time Delay Relays
AWH-TD-406	Basic Hermetic Time Delay Relays
AWH-ET-600-601	Elapsed Time Indicators
AWH-MO-805	Basic Direct Current Timing Motors

Many other specials also available, such as Electronic Time Delay Relays, Intervalometers, Reversible 60 CPS Motors.

RUGGEDIZED METERS

1½" Square

Meets MIL-M-10304 (SIG.C.) Accurate within ±3% of full scale deflection. Basic d-c ranges 0-100 d-c ua, 0-1 d-c ma, and 0-10 d-c mv. RF and VU meters and other ranges also available.

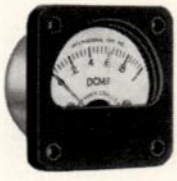
SUB-MINIATURE ROTARY SWITCH

Wafer size 1" x ⅞". Twelve positions per deck . . one to three decks. One, two, three or four poles per deck. Shorting or non-shorting contacts. Positive indexing with 30° spacing.

SPECIALISTS
in Sub-Miniature Panel Meters

FIRST in U.S. to manufacture 1" diameter meter.
FIRST to produce 1" and 1½" illuminated meters.
FIRST to produce 1½" self-contained DB and VU meters.
FIRST to produce Miniature Side Indicators.

1" ROUND



MODEL 100

1" barrel diameter. Full 90° scale arc, scale length .770". VU, DB and Illuminated meters also available with external accessory attached.

MODEL 150

1½" ROUND and SQUARE

MODEL 153

1½" barrel diameter. Full 90° scale arc, scale length 1.322". Model 153 meets MIL-M-3823 requirements. Also available: self-contained VU and DB meters — illuminated meters with lamp housing attached.

MODEL 1135
Single Horizontal Mounting

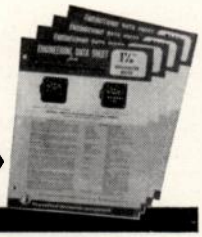
SIDE INDICATORS*

- GREATER READABILITY
- REDUCES PANEL AREA ⅓ OVEF CONVENTIONAL METER INSTALLATIONS OF SAME SCALE LENGTH
- HORIZONTAL OR VERTICAL MOUNTING

THREE SIZES AVAILABLE:

MODEL 1120—Scale length 1.3".
MODEL 1135—Scale length 2.1". Front external zero adjuster.
MODEL 1145—Scale length 2.75". Front external zero adjuster.

MODEL 1120



MODEL 1145
Single Horizontal Mounting

International Instruments' components lead the way for miniaturization through practical engineering design.

RAWSON METERS

MULTIMETERS® and REGULAR METERS
AC and DC types, multiple ranges, accuracy — ½ of 1%. 2 microamperes to 1 ampere DC. 2 milliamperes to 3 amperes AC.

ELECTROSTATIC VOLTMETERS
Ranges 100 V to 35,000 V, AC or DC. Resistance exceeds million megohms. Can measure static electricity.

FLUXMETERS
Laboratory and production measurements on magnets and magnetic circuits. Single push button return-to-zero.

ROTATING COIL GAUSSMETERS
Our most recent development for measuring magnetic field strengths. Measures from a few gausses to 120 kilogausses.

WATTMETERS
New type, high frequencies, low power factors, very low wattages — *write for new bulletin.*

Kearfott

PRECISION COMPONENTS IN PRODUCTION

GYROS

3 Gyro Platforms, Floated Rate Integrating Gyros, Vertical, Free, Directional, Rate Gyros and Gyro operated Rate Switches—compact, lightweight, hermetically sealed.

SYNCHROS

Transmitters, Control Transformers, Resolvers, Repeaters, and Differentials in Bu Ord Sizes 15, 11 and 8. High accuracy and environmental resistance.

ELECTRONICS

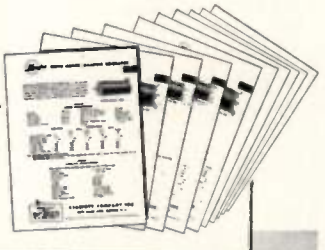
Miniature and subminiature Transistorized Servo Amplifiers and Magnetic Amplifiers "potted" for convenience of installation and long life.

SERVO MOTORS

High torque, low inertia Servo Motors, Servo Motor-Generators, Inertial and Viscous damped Servo Motors ¾" to 1¾" Diameter.

MECHANICAL DEVICES

Counters, Electro-Mechanical Computers, Hermetic Rotary Seals, Aircraft Instruments and High Temperature Resistant, Chemically Inert, Machinable Ceramics.



SYSTEMS

Aircraft Navigational Systems

Industrial Servo Systems

Servo Analog-to-Digital, Digital-to-Analog Converters

Electro-Hydraulic Servo Systems

Bulletin giving physical and technical data on the various Kearfott Products will be sent on request. The Kearfott organization is available to assist in the development and manufacture of other precision components you may require.

THE MARK OF QUALITY

BARBER COLMAN

a-c small motors

wide variety . . . fast delivery

HIGH QUALITY AT LOW COST

Put these high-quality, precision-made motors into your product and be assured of long, trouble-free service — at a reasonable price. Look at these "plus" features:

- High torque — Small size
- Large oil reservoirs
- Porous bronze or ball bearings
- Long life, rugged construction
- Exceptionally quiet-running

UNIDIRECTIONAL

High torque for quick, positive starting. Excellent for driving dictating machines, pumps, vending machines, fans, blowers, office machines, vaporizers, and other applications requiring dependable performance under adverse operating conditions. Up to 1/20 hp.

REVERSIBLE

Adaptable to a variety of control circuits and power requirements. Outstanding for various applications requiring a compact, powerful, fast-reversing motor . . . such as servo-mechanisms, remote switching and positioning devices, recording instruments, voltage regulators. Available with or without gear trains. Open or enclosed types. Up to 1/25 hp.

SYNCHRONOUS

These motors combine accurate timing and high torque with light weight and compactness. Widely used for x-ray timers, microfilm cameras, recorders, timers, and viscometers. Develop 30 times the power of ordinary clock motors.

GEARED

Available with enclosed or open gear reductions. Precision-machined gears running on accurate centers assure long life under heavy loads. Wide range of gear ratios. Used extensively in vending machines, electric signs, displays, high-voltage switchgear and remote positioning controls.

FREE CATALOG HELPS SELECT MOTOR NEEDED . . .

Get the helpful condensed catalog of Barber-Colman shaded pole small motors. Contains complete descriptions of above motors, shows typical specifications, performance characteristics, control circuit diagrams. Write for your copy.

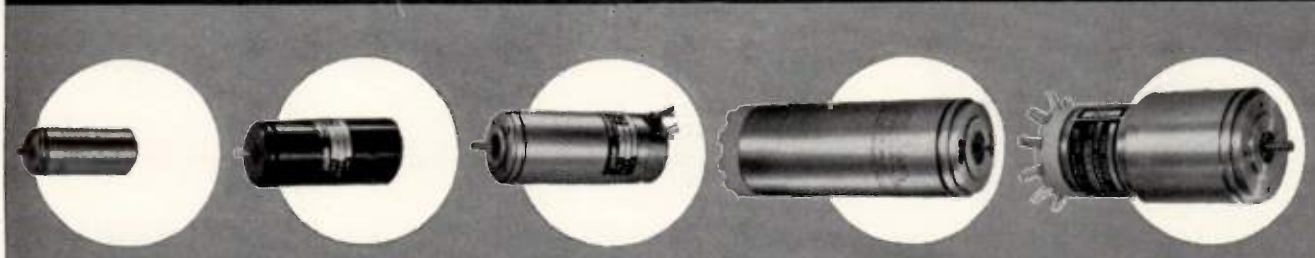
COMPLETE LINE 125° C



SERVO MOTOR TACH GENERATORS

to your precise specification

Oster®

- Both Dampirg and Integrating types available with parameters to your requirement.
- Complete size range: 8, 10, 11, 15, 18. Can be designed with gear train.
- —54°C to +125°C ambient temperature range.
- Designed to MIL-E-5272.
- Assembled under closely controlled environmental conditions.

In this brochure—complete facts on DIALCO's

DATALITES®

For the Computer-Automation Industries

DATALITES by DIALCO are ultra-miniature Indicator Lights specially designed to meet the critical requirements of the computer-automation fields. Made in 2 basic styles: *Lamp Holders with* DIALCO'S own *replaceable Lamp Cartridges* (see above); or integrated DATALITES *with Built-in Neon Lamps* which are *not replaceable* (see below). Ultra-compact, single units mount in 3/8" clearance hole; the twin-lamp assembly mounts in 3/4" clearance hole.

DATALITES have fully insulated terminals and conform to all applicable military specifications. Integrated units are available *with or without built-in resistors.* The cylindrical lenses can be hot-stamped with digits, letters, etc. Complete details in *Brochure L-160.* Send for it now.

The **BEST** *way to fill your*
MINIATURE LIGHTING NEEDS

This quick-reference, fully illustrated catalog is packed with information about pilot—dial—signal—indicator—illuminating lighting units and lampholders of all types. In the big DRAKE line you'll find practical answers to virtually any Miniature Lighting requirement. And of course, our decades of specialized experience are at your service to help with unusual problems —our engineers will gladly discuss them with you!

CHICAGO MINIATURE LAMPS

(Standard or Special Design)

for

- **AIRCRAFT**
- **FLASHLIGHTS—LANTERNS**
- **INDICATORS, RADIOS, COIN MACHINES**
- **6-8 VOLT, 12-16 VOLT AUTOMOTIVE AND MOTOR COACH LAMPS**
- **APPLIANCES—INDUSTRIAL SEWING MACHINES**

Photograph Twice actual size.

This photo shows two models of the smallest commercially designed, long-life lamp ever made, designed and produced by Chicago Miniature Lamp Works for use on new jet transport planes, etc.
The life expectancy of 7 years of continuous burning is phenomenal.

Whether your requirements are for one of the standard types of miniature lamps, or if you need a special lamp for a new product development, Chicago Miniature Lamp Works offers a dependable source of supply.

This company, with many years of experience in the miniature lamp design and manufacture, has the facilities to produce any type or style of miniature lamp. Standard lamps are, of course, available in all regular sizes and in any quantity.

Make Chicago Miniature Lamp Works your source of supply for all your miniature lamp requirements.

(patent applied for)

TRANS-ELEC

MINI-LITE

New Miniature transistorized control panel light that mounts in just 30 seconds!

Simply insert this indicator light in a ⅜" panel-hole, tighten the collar nut and plug in the taper pins. It's completely mounted and hooked up in 30 seconds . . . no soldering needed! The transistor controlled NE-2E neon lamp functions down to a 3.0 volt signal. This brand new self-contained display light unit is available in a variety of circuits for computers, data processors, signal systems and transistorized automatic control devices. Body only ½" in diameter and 1¼" long. *For complete data on the Mini-Lite and other control panel components, write us or phone WEst 9-6754.*

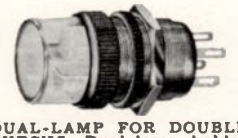
Save space and maintenance costs with

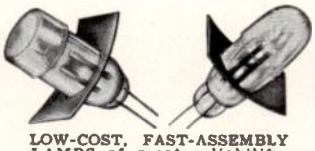
E-LITE MINIATURE INDICATOR LIGHTS

fine materials, simple design, 100% quality control

GENERAL PURPOSE AND DATA READOUT INDICATORS



With replaceable or permanent lamps, neon or incandescent. Clear or colored lenses, short or long, wide or narrow, up to three digits, front or side illumination (or both), with or without current-limiting resistors. Need a ⅜" mounting hole.



1 DH has replaceable bulbs, long, fluted lens. Takes 3 digits. Other lens available.

1 AG permanent-bulb indicator. Flat lens is also available.

DUAL-LAMP FOR DOUBLE CHECKS. Dual-lamp holder model 1FH can monitor circuits many ways.

LOW-COST, FAST-ASSEMBLY LAMPS of great reliability. Snap-on assembly. 1 B 2, round lens. 1 B 9, flat lens (carries one digit).

FOR TRANSISTOR CIRCUITS Low voltage, low current indicator. 1 AD has built-in diode-resistor network.

ELDEMA *corporation*

AC POWER SOURCE

the BEHLMAN INVERTRON®

The Silent, Dependable INVERTRON Features:

POWER OUTPUT RATINGS from milliwatts to kilowatts

OUTPUT FREQUENCIES — fixed or variable — from subsonic to supersonic

ACCURACY to .001% for fixed frequencies — to .1% for variable frequencies

SINE WAVE distortion never greater than 2%, with .5% or less available

REGULATION from no load to full load . . . standard 1% — with .5% or better available

Negligible Interaction between output frequency, voltage and load.

MODEL 161-D-1
POWER OUTPUT: 160 VA single phase, FREQUENCY: 350 to 450 cps variable, FREQUENCY ACCURACY: 0.5% (0.2% and 0.1% available), INPUT: 115v 60 cps single phase, OVERALL SIZE: 22" wide x 10" high x 15" deep.

ELECTRONICALLY REGULATED
D. C. CONSTANT VOLTAGE
POWER SUPPLIES

The output voltage is continuously variable from 200 to 325 volts D.C. for load currents of 0 to 100 M.A. with an input voltage of 105 to 125 volts 60 cycle. Regulation is better than 1%. An isolated A.C. voltage of 6.3 volts at 3 amperes is available at the output terminal connections.

MODEL 3 ILLUSTRATED

MODEL 3 CAB. MTG., VOLTMETER	$69.50
MODEL 1 RELAY RACK MTG.	$52.50
MODEL 2 SUB-CHASSIS MTG.	$49.50
DUAL RACK MOUNT FOR MODEL 2 Mounts Two Model 2 Units in 8¾"	$9.00

*POWER SUPPLY FOR DC MINIATURIZED!

The 5 KVDC/5ma unit occupies only 2½ x 3¾ x 3¾ inches, weighs 3¾ LBS. Hermetically sealed, highest quality selenium rectifiers. Long-life, quality capacitors . . . LOW RIPPLE OF 1%! Lightweight, compact. Positive or negative terminal can be grounded to case. Stand-off high voltage terminals for safety. Made for 110 volts, 60 cycles.

Also complete line of quality film capacitors. POLYETHYLENE, ACETATE, TEFLON®, POLYSTYRENE, and MYLAR®.

to choose *the right* power supply

● For research . . . transistors . . . automation . . . strain gauges . . . obviously, no power supply will do every job. That's why E/M Regulated-Power Supplies are application-engineered.

Before you make a choice, send for a personal copy of Bulletin No. 350. A wide variety of standard models are described, ranging from the popular Model 212A (with a 0—100 V dc output) to the extra-heavy-duty 1000 volt units. Current ratings go as high as 15 amperes.

And if you're looking for "A New Approach to Practical Control" . . . make sure you also request Bulletin No. 765.

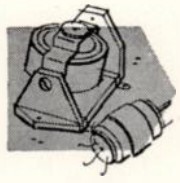
NEW!

DC to DC and DC to AC solid-state power converters voltage regulated, frequency controlled, for missiles, telemetering, gyros, servos



Interelectronics Interverter solid-state thyratron-like elements and magnetic components convert DC to any number of voltage regulated or controlled frequency AC or filtered DC outputs from 1 to 1800 watts. Light weight, compact, 90% or better conversion efficiency.

Ultra-reliable in operation, no moving parts, unharmed by shorting output or reversing input polarity. Complies with MIL specs for shock, acceleration, vibration, temperature, RF noise.

Now in use in major missiles, powering telemetering transmitters, radar beacons, electronic equipment. Single and polyphase AC output units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics — first and most experienced in the DC input solid-state power supply field, produces its own solid-state gating elements, all magnetic components, has the most complete facilities and know-how—has designed and delivered more working KVA than any other firm!

For complete engineering data write Interelectronics today, or call LUdlow 4-6200 in N. Y.

ULTRA-HIGH REGULATION POWER SUPPLIES

Model UHR-240

FEATURES

- LOAD REGULATION TO 0.001%
- EXTREMELY LOW OUTPUT IMPEDANCE TO 1 MC WITH NO PEAKS
- RIPPLE LESS THAN 100 MICROVOLTS

Model	Voltage	Current	Impedance		Other Outputs		Price
			D.C.	A.C.	Bias	Heaters	
UHR-240*	0-500v	0-500ma	0.005 ohms	0.05 ohms	0-150v, 0-5ma	6.3v ac, 10a 6.3v ac, 10a 5-13v dc, 2.5a	$625.00
UHR-245*	150-500v	0-500ma	0.01 ohms	0.05 ohms	—	6.3v ac, 10a 6.3v ac, 10a	$425.00
UHR-220**	0-500v	0-200ma	0.01 ohms	0.1 ohms	0-150v, 0.5ma	6.3v ac, 5a 6.3v ac, 5a	$390.00
UHR-230R Dual Supply consisting of two Models UHR-220, Rack Mounted							$790.00
UHR-225**	150-500v	0-200ma	0.02 ohms	0.1 ohms	—	6.3v ac, 5a 6.3v ac, 5a	$275.00
UHR-235R Dual Supply consisting of two Models UHR-225, Rack Mounted							$560.00

*Available for rack mounting at $5.00 additional. **Available for rack mounting at $10.00 additional

VARIABLE ELECTRONIC FILTERS

Model 330

FEATURES

- ULTRA-LOW FREQUENCY COVERAGE
- FREQUENCY RANGE 100,000 to 1 IN ONE INSTRUMENT
- DIRECT FREQUENCY CALIBRATION

Model	Type	Frequency Range	Frequency Accuracy	Noise & Hum	Price
310-AB*	Band Pass	20 cps to 200 kc	10%	1 mv	$295.00
330-A*	Band Pass	.02 cps to 2 kc	5%	0.1 mv	$475.00
330-M*	Band Pass	0.2 cps to 20 kc	5%	0.1 mv	$475.00
340-A	Servo	.01 cps to 100 cps	5%	10 mv	$385.00
350-A*	Rejection	.02 cps to 2 kc	5%	0.1 mv	$475.00
360-A*	Rejection	20 cps to 200 kc	10%	5 mv	$295.00

*Available for rack mounting at $5.00 additional.

WIDE RANGE RC OSCILLATORS

Model 420-A

FEATURES

- EXCEPTIONAL STABILITY
- WIDE FREQUENCY RANGE
- LOW DISTORTION

Model	Frequency Range	Frequency Accuracy	Output	Distortion	Price
400-A	.009 cps to 1.1 kc	2%	25 mw/10v	1%	$375.00
400-C***	.009 cps to 1.1 kc	2%	100 mw/10v	1%	$395.00
410-A***	.02 cps to 20 kc	2%	10 mw/5v	1/10%	$1050.00
420-A	.35 cps to 52 kc	2%	25 mw/10v	1%	$315.00
420-C***	.35 cps to 52 kc	2%	100 mw/10v	1%	$345.00
430-AB	4.5 cps to 520 kc	2%	50 mw/10v	1%	$145.00
440-A**	.001 cps to 100 kc	1%*	100 mw/10v	1/10%*	$550.00
440-B**	1 cps to 1 kc	1/20%*	100 mw/10v	1/10%	$950.00

All oscillators except 430-AB and 440-B have both sine wave and square wave outputs.
*Higher at end of range **Push Button Operation in Models 440 ONLY. ***Rack panel construction

ULTRA-LOW DISTORTION POWER AMPLIFIER

Model UF-101

FEATURES

- DISTORTION LESS THAN 0.005% AT 50 WATTS
- DYNAMIC RANGE 110 DB
- 50 WATTS OUTPUT FROM 15 CPS TO 30 KC

SPECIFICATIONS

POWER OUTPUT.....50 watts from 15 cps to 30 kc
FEEDBACK.....80 db
FREQUENCY RESPONSE ±0.5 db from 0.5 cps to 30kc
±3 db from 0.03 cps to 70 kc
DYNAMIC RANGE.....110 db
OUTPUT IMPEDANCE.....2, 4, 8, 16 and 450 ohms
VOLTAGE GAIN.....14 db or 30 db to 16 ohm output
PRICE.....$425.00

Available for rack mounting at $5.00 additional.
Typical harmonic distortion at 1,000 cps is 0.003% in voltage at 50 watts.

HIGH POWER at TRANSISTOR VOLTAGES

Model DV 60-2 Transistor POWER SUPPLY

$110

Thorough and versatile! Efficiently powers all transistor circuits. Unparalleled performance and price.

- AC OPERATED, delivers 0-60 volts DC at currents up to 1000 milliamperes.
- SUPERIOR to conventional DC power supplies specified for vacuum tube high voltage range and offering erratic reactions when used at low transistor voltages.
- CONTINUOUSLY VARIABLE, equivalent to a battery. High power.
- RIPPLE SUPPRESSION below .05% at rated current, by two section choke input filter.
- COMPLETE CONTROLS, front panel switch-type magnetic circuit breaker, neon pilot light, Powerstat output control, multirange voltmeter and milliameter and output binding posts. Meters accurate to 2%, readable at distance. Height 10⅜", Width 7", Depth 9¼", 21 lbs.

FROM MILLIWATTS TO KILOWATTS

HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT

We have sold quantities of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units, so that you will have many years of dependable service. Only a few of our standard models are shown below. Quotations on special supplies cheerfully given.

PRECISE MEASUREMENTS COMPANY

HIGH VOLTAGE POWER SUPPLIES

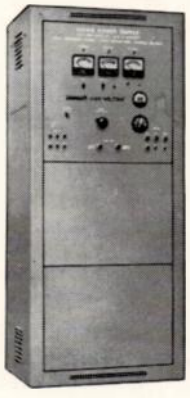
One of the most popular power supplies on the market. Completely redesigned for greater ruggedness and convenience of operation. Widely used for powering electronic equipment and for routine breakdown and insulation testing. Output voltage is filtered D.C. which is adjustable with convenient front panel control. Input is 115 Volt, 60 cycle A.C. Equipment is available without meter, with one meter (4½"), with two meters, or with larger 6" precision 1% mirror scale movement. Regulated models offer closely stabilized output voltage regardless of line or load changes.

Model		Maximum Voltage	Price	Price Regulated Model
6001	With Kilovolt Meter	1,000	$75.00	
6000		2,500	60.00	
6000-A	With Kilovolt Meter	2,500	80.00	$120.00
6005		5,000	75.00	
6005-A	With Kilovolt Meter	5,000	95.00	135.00
6010		10,000	85.00	
6010-A	With Kilovolt Meter	10,000	105.00	145.00
6015		15,000	95.00	
6015-A	With Kilovolt Meter	15,000	115.00	155.00
6025		25,000	115.00	
6025-A	With Kilovolt Meter	25,000	155.00	205.00

MIRROR SCALE HIGHER ACCURACY METERS: Recommended where more exact settings or measurements are needed. Meter size has been increased to 6 inches for easier reading. Price $35.00 additional on any meter equipped model.

TWO METER MODEL ..... ADD $35.00

INDUSTRIAL POWER SUPPLIES



These industrial type power supplies are built for service and efficiency. All employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. Polarity reversing models (as illustrated) can be had at additional cost.

Model	Voltage	Current	Price
F-500V	0-500	3 Amp	$800.00

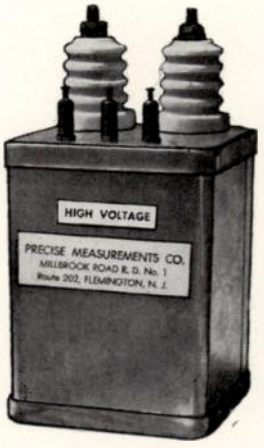
F-6050-T	0-50,000	½ MA	680.00
F-6100-T	0-100,000	½ MA	1180.00

Regulated types available

HEAVY DUTY POWER SUPPLIES

For use in applications where high voltages at extra high currents are required. Illustrated is our 100 KW Model, rated for 0 to 7,000 Volts at 14 Amperes DC. This unit is housed in a single convenient cabinet. Output voltage is regulated against line and load changes. Voltage is smoothly adjustable from zero to full output. Automatic circuits protect against overvoltage or over current conditions, turning off main power in a split second. Use of special transformer construction allows constant load drain at full rated output. All power supplies in this series are available with fixed or adjustable output and with or without regulation.

Model	Voltage	Current
A-30	3000	5 amperes
A-31	3000	10 amperes
A-32	3000	20 amperes
A-50	5000	5 amperes
A-51	5000	10 amperes
A-72	7000	14 amperes
A-100	10,000	5 amperes
A-110	10,000	10 amperes



TRANSFORMERS, HIGH VOLTAGE

For experimental, industrial or production applications. These units are small and compact and rated for constant service. Primary designed for 105/115/125 Volts 60 Cycle. Secondary completely isolated and has half voltage tap. Only standard models are listed, other voltages and currents available on order. We can wind specials for any frequency or voltage.

Model	Voltage	Model	Voltage
1 KVT	1 KV	10 KVT	10 KV
2 KVT	2 KV	15 KVT	15 KV
3 KVT	3 KV	25 KVT	25 KV
5 KVT	5 KV	50 KVT	50 KV

PACKAGED POWER SUPPLIES

These conveniently packaged power units will be found ideal for applications requiring minimum size and weight. Features isolated high voltage terminals permitting either the positive or negative side to be grounded. Rectifier tubes are operated from separate filament transformers so that DC output voltage can be varied from zero to full rated value. Selenium rectifier types have extra cells to assure operation under high line voltage or light loading. All standard units have well filtered DC output. Power packs with AC output available on order.

Model	Output Voltage	Current	Model	Output Voltage	Current
05-KV-5MA	500 Volts DC	5 Ma.	20-KV-1MA	20 KV DC	1 Ma.

- Both D.C. Terminals are above ground and isolated from the A.C. Line.
- Panel Type Carrying Handles.
- Convection Cooled Continuous Duty Ratings.

GENERAL PURPOSE UNIT

OUTPUT: 0-6 V.D.C., 50 Amps.
INPUT: 115 V.A.C., 60 CPS, 1 Phase
FEATURES: 3½" Meters, 2% Accuracy, Line & Load Fuses, Switch, Pilot Light, Binding Posts.
MODEL GK34 ... Bench
Bulletin No. 178

AIRCRAFT BATTERY SUBSTITUTE

OUTPUT: 0-28 V.D.C., 20 Amps., 1% Ripple.
INPUT: 115 V.A.C., 60 CPS, 1 phase.
REGULATION: 1/10 Load 33 Volts Full Load 28 Volts
FEATURES: Ammeter overcurrent protection circuit prevents needle 'slam' when starting inverters & motors.
MODEL KM88 ....Rack Mount
MODEL KM88B....Bench
Bulletin No. 100

DUAL RANGE POWER SUPPLY

OUTPUT: 0-32/64 V.D.C., 40/20 Amps.
RIPPLE: Within 1% of average D.C.
INPUT: 115 V.A.C., 60 CPS. 1 Phase
FEATURES: Thermal overload protection, indicating line and load fuses, overload warning light, dual range voltmeter.
MODEL KM95 ....Rack Mount
MODEL KM95B....Bench
Bulletin No. 103

Stable Power Sources for Electronic Instrumentation

TRANSISTORIZED POWER SOURCES

MODEL 1550
Range: 1-15 volts DC, continuously adjustable at 0-5 amperes.
Price $289.50

Features ROBOTEC CIRCUITRY available with both Volt & Ammeter

MODEL 1515
Range: 1-15 volts DC, continuously adjustable at 0-1.5 amperes.
Price: $159.50

MODEL 5015
Range: 1-50 volts DC, continuously adjustable at 0-1.5 amperes.
Price: $249.50

Features ROBOTEC CIRCUITRY and HEATRAN

ELECTRICAL SPECIFICATIONS:

INPUT: 105-125 volts, 55-440 cycles.

OUTPUT: 0-100 volts d-c continuously variable at 0.500 ma.

REGULATION: 25 millivolts or .05% (whichever is greater).

RIPPLE: Less than 1.0 millivolts rms. max (1515-250 microvolts).

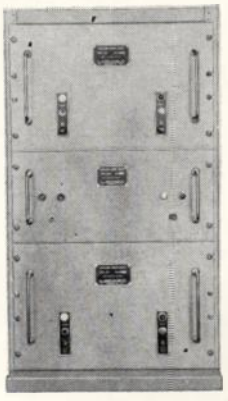
SOURCE IMPEDANCE: .05 ohms to 20 kc, 0.5 ohms to 1 megacycle

TEMPERATURE: Continuous duty at full load to 50°C ambient.

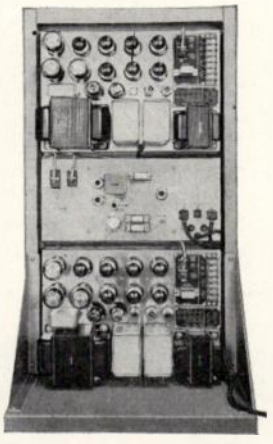
Either positive or negative terminal may be grounded.

FEATURES:

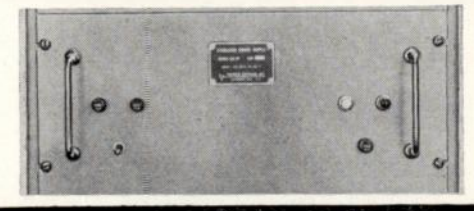
- Transistors protected against external short circuit.
- Thermal electrical design eliminates forced air cooling.
- Balanced differential d-c input amplifier for maximum stability.
- Semiconductor components employed throughout.
- Silicon diode references and rectifiers.
- Computer quality electrolytic with minimum ten year life expectancy and two year minimum shelf life.
- Line and load circuits separately fused.
- Fifty hour pre-aging of instruments prior to test insures field service reliability.
- Portable. Measures 5¾" x 8¾" x 11½".
- Modular package construction suitable for multi-unit rack mounting on standard 8¾" x 19" rack panels.
- Supplies may be connected in series to provide increased voltage output at rated current.



0.01% COMPUTER POWER SOURCE



and VOLTAGE REFERENCE



Model CU-2T, precision control unit illustrated at right, is designed to operate in conjunction with any pair of power supplies listed on Pages 2 & 3 of brochure BG-58, to provide regulation and "tracking" to 0.01% for operational amplifier or similar service. Error voltages from both power supplies are referenced to a .005% zener junction diode network in a temperature stabilized oven. Output voltages may be identical or maintain fixed voltage ratios. These units are conventionally supplied with one output voltage source positive and the other negative with respect to ground or common. The Model CU-2T may also be employed to stabilize a single power source or any pair of power sources having a common output terminal.

Typical of this system is Model D305-CS (illustrated at right).

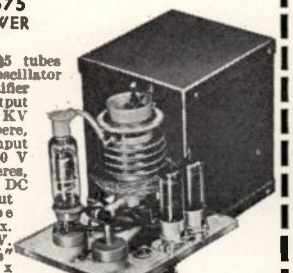
SPELLMAN HIGH VOLTAGE POWER SUPPLIES



MODEL LAB-60 RF TYPE
Continuously Variable 0-60 KV DC Regulated Power Supply
Current output 1 ma. at 60 KV. 2 ma may be drawn from 50 KV to 0. Supplied with either positive polarity or negative polarity output. Regulation stability—1% at 1 ma 21¾" wide x 22¾" high x 18" deep.
LAB-60 Complete with meter .....695.00 Net
LAB-60 PN Reversible polarity model of above .....$745.00 Net

MODEL LAB-80 REGULATED DC POWER SUPPLY
Continuously variable 0 to 90 KV DC Power Supply. Output current 1 ma. at 80 KV. 2 ma. from 40 KV down. Voltage regulations better than 1% throughout voltage range. Panel dimensions 19" wide x 26" high x 18" deep.
Rear view—less cabinet
LAB-80 Complete with HV meter .....$900 Net
Specify polarity output—positive or negative

MODEL 4575
4½ KV POWER SUPPLY
Utilizes two 6AQ5 tubes as a parallel oscillator feeding a 1X2 rectifier tube. For an output voltage of 4½ KV DC at 1 milliampere, the low voltage input requirement is 250 V at 50 milliamperes. By varying the DC input the output voltage can be varied from approx. 1 KV to 7½ KV. Dimensions: 5⅝" high x 5" deep x 4¼" wide. In completely enclosed metal housing.
Less low voltage DC supply .....$32.50 Net

MODEL RG-30—Continuously Variable 15-30 KV Regulated DC Power Supply with regulated focus
Incorporates a voltage tap in the range of 4 to 6 KV for use with 5WP15, 5TP4 and flying spot tubes. Regulations better than .5% at 1 milliampere. In wide use for color tube development work, transcription recording systems. Also available with focus and convergence voltage taps for RCA Tri-Color tubes at slight additional cost. This model can be adjusted for 40 KV output at .5 milliampere for new 40 KV projection tubes.

19½" wide x 12¼" high x 13" deep .....$295 Net
With meter installed on front panel .....$345 Net

Sola Electric Co.

SOLA AC and DC VOLTAGE REGULATION...

Automatic, instantaneous, maintenance-free

Sola Constant Voltage Transformers and Regulated DC Power Supplies provide dependable regulated output voltage which is unaffected by changes in input voltage. Sola transformers are static-magnetic regulators with completely automatic, continuous regulation. Response time is usually 1.5 cycles or less. There are no moving or renewable parts to require maintenance. Sola Regulated DC Power Supplies are built around these transformers, in combination with semi-conductor rectifiers and high capacitance filter sections.

Constant Voltage Transformers

Sola Constant Voltage Transformers

STANDARD TRANSFORMER *available in a wide variety of ratings from 15 va to 10 kva. Most models feature regulation within ±1% with primary voltage variations as great as ±15%.*

HARMONIC-FREE TYPE *designed for use with equipment requiring a stabilized source of undistorted voltage. Available in capacities from 60va to 2000va. These units provide ±1% regulated output with less than 3% total rms harmonic content.*

ADJUSTABLE, HARMONIC-FREE TYPE *for selecting any voltage from 0-130, stabilized within ±1%, with total rms harmonic content less than 3%. One outlet variable from 0-130v and one outlet fixed at 115v. Portable for use shop and laboratory.*

PLATE AND FILAMENT TYPE *delivers filament and plate voltages regulated within ±3% or less, with line voltage variations from 100-130v. Filament windings of 5v and 6.3v. Units are available from stock in three different ratings to cover most power supply requirements.*

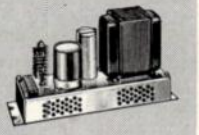
FILAMENT TYPE *provides a compact source of 6.3v supply regulated within ±1% to extend filament life and improve tube efficiency. Available in ratings from 2.4a to 25a for operation of extensive banks of electron tubes.*

CUSTOM-DESIGNED *units can be manufactured in quantity orders, from 1 va to 25,000va to suit your individual specifications. Custom designs can include special voltage ratios, special frequencies, compensation for frequency variation, multiple output voltage, three-phase service and military specifications.*

For details, circle #339 on Reader Service Card

Write for Circular 11-CV-170 for further information on Sola Constant Voltage Transformers

DC Power Supplies



Sola Constant Voltage DC Power Supplies

For intermittent... variable... pulse... or high current loads

Sola DC supplies combine Sola CV Transformers, semiconductor power rectifiers and high-capacitance filters. They are compact, low-weight units for handling loads in the "ampere" range; and for intermittent and pulse loads. They offer many important advantages in DC power supply:

- Ripple voltage of approximately 1% (rms) or less.
- Output regulation of ±1% or less with ±10% line voltage variations.
- Minimum output voltage change with wide, rapid load changes.
- Ability to withstand high, short-time overloads without damage to components.
- Exceedingly low output impedance.

FIXED DESIGNS *available in six stock models with ratings ranging from 24v @ 6a to 250v @ 1 a. Compact size, low weight, and moderate price in proportion to power output and performance.*

VARIABLE DESIGNS *offer adjustable, regulated source of DC test voltages for design development. Accessory handles provide portability and self-stacking. Six models ranging from 5v @ 7a to 400v @ 0.6a.*

Write for Bulletin 11-CV-235 for further information on Sola DC Power Supplies

GAP MATERIAL?

ASC Super-Hard 18 Karat Gold Gap material possesses the following properties:

- Hardness range C20 to C42
- Highly corrosion resistant
- Non magnetic
- Can be handled without crumbling

lower cost RI SELENIUM RECTIFIERS with soldered leads

SINGLE CELL disc rectifiers for low voltage circuits

TOUGH EPOXY COATING

model no.	cell size	continuous DC rating in ma
1011	¼"	6
1012	⅜"	13
1013	½"	24
1014	⅝"	36
1015	¾"	54

- Current ratings are for single phase half wave
- RMS rating is 26 volts per cell
- PIV rating is 37 volts per cell

By applying quantity production methods, Radio Industries can now offer single cell Selenium Disc Rectifier units at surprisingly low costs. Soldered directly to the electrodes, the leads have a positive electrical contact for the life of the rectifier, eliminating all problems of connection intermittence. Uniform performance is assured for every unit.

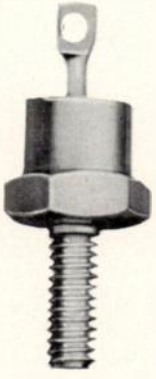
YOU CAN BE SURE...IF IT'S Westinghouse

FOR SILICON RECTIFIERS • FOR SILICON AND GERMANIUM TRANSISTORS

Westinghouse has perfected a wide selection of rectifiers and transistors for electrical and electronic applications. Every device has been carefully designed and thoroughly tested to assure long life, high reliability, and excellent mechanical stability (units meet or exceed applicable military environmental requirements).

Westinghouse rectifiers and transistors have unique capabilities with respect to efficiency, power output, and space and weight considerations. For complete technical data, call your Westinghouse representative or write directly to Westinghouse Electric Corporation, Semiconductor Department, Youngwood, Pa.

LOW POWER SILICON RECTIFIERS



types 1N1227 series (305) and 1N1217 series (320)—Provide d-c average forward currents up to 1.6 amperes per cell half wave, single-phase (with proper heat sink) with maximum peak inverse voltage up to 1000 volts. For power supply applications.

types 1N1217A series (307), 1N1227A series (308), and 1N1537 series (352)—Provide d-c average forward currents up to 1.6 amperes per cell half wave, single-phase (with proper heat sink) with maximum peak inverse voltage up to 600 volts. For mag-amp applications.

types 1N1169 and 1N1486—Provide d-c average forward currents up to 500 ma per cell half wave, single-phase with peak inverse voltage of 400 and 500 volts respectively. For radio and TV applications.

MEDIUM POWER SILICON RECTIFIERS

1N1341 series (341)—Provide d-c average forward currents up to 6 amperes per cell half wave single-phase (with proper heat sink and cooling) with a maximum peak inverse voltage up to 600 volts.

1N1199 series (304)—Provide d-c average forward currents up to 12 amperes per cell half wave single-phase (with proper heat sink and cooling) with a maximum peak inverse voltage up to 600 volts.

1N1191 series (303)—Provide d-c average forward currents up to 18 amperes per cell half wave single-phase (with proper heat sink and cooling) with a maximum peak inverse voltage up to 600 volts.

1N1183 series (302)—Provide d-c average forward currents up to 35 amperes per cell half wave single-phase (with proper heat sink and cooling) with a maximum peak inverse voltage up to 600 volts.

GERMANIUM TRANSISTORS

types 2N59, 2N60, 2N61, 2N609, 2N610, and 2N611—Medium power, for use as matched pairs in Class B audio amplifiers.

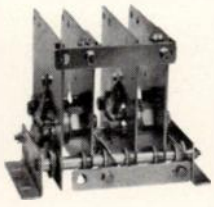
types 2N402 and 2N612—For application as a driver in transistorized audio amplifiers.

types 2N403 and 2N613—Medium power application in Class A audio output stages and as high gain drivers.

types 2N614 and 2N615—For application as IF amplifiers at 455 KC.

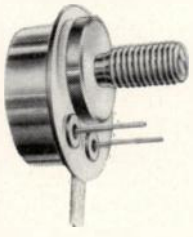
type 2N616—For application as a reflex amplifier in transistorized radio receivers.

type 2N617—For application as a converter in transistorized radio receivers.



HIGH POWER SILICON RECTIFIERS

1N1660 series (329), 319, 322, and 326—Provide d-c average forward currents up to 160 amperes per cell half wave single-phase (with proper heat sink and cooling) with a maximum peak inverse voltage up to 500 volts.



1N1670 series (339), 327, and 328—Provide d-c average forward currents up to 240 amperes per cell half wave single-phase (with proper heat sink and cooling) with a maximum peak inverse voltage up to 500 volts.

SILICON BRIDGE ASSEMBLIES

Available in a variety of standard as well as special designs. These assemblies are designed for either forced air or natural convection cooling. Nickel copper plates and other materials used in these assemblies have been chosen to insure satisfactory performance in corrosive atmospheres and ambient temperatures.

SILICON POWER TRANSISTORS

types 107-2 and 107-5—First members of a unique new family of Silicon Power Transistors developed to function at high voltages and high operating temperatures with high efficiency. As a d-c switch, handling 1.5 kw (300 volts at 5 amperes) efficiency is better than 99%. Type 107-2 is rated at 2 amperes, type 107-5 at 5 amperes.

ACE

Potentiometers - Trimmers - Relays

RELIABILITY IN MINIATURIZATION

ACEPOT® -500
ACEPOT X-500*

Sub-miniature, linear and non-linear potentiometers. Single turn unit, ½" size, ±2% resistance tolerance and ±0.3% ind. linearity.

actual size

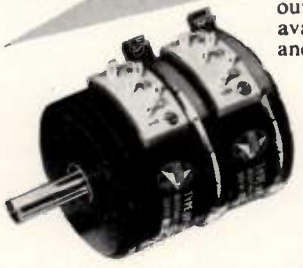
Size	½" x ½"
Weight	0.25 ounce
Resistance Range	10Ω to 500K
Resistance Tolerance	±2%
Linearity	±0.3% Ind.
Temperature*	−55°C to 125°C
Mechanical Angle	330° Nominal
Electrical Angle	325° std. ≷ available
Resolution	0.12% for 50 K Others comparable
Torque**	.035 oz./in. at 20°C (Bronze)
Power	2 W for 60°C. rise
Mounting	Threaded bushing, servo, flush or flanged. Ganged up to 6 cups.

* X-500 new high temperature potentiometer. Range: −55°C to 150°C.

**Jewel bearing Acepot torque of .014 ounce/inch.

ACEOHM®

Sub-miniature trimmers . . . high temperature, humidity proof for severe environment.



actual size

Size	1¼" x ¼" x 5/16" Standard Mounting holes
Weight	0.2 ounce
Resistance Range	10 Ω to 75K — Special to 150K
Mechanical Rotation	30 Turns on lead screw, adjustable over 100% of winding
Power Rating	.5 watts at 200°C
Temperature Range	−55 to 200°C
Resolution	.13% for 75K. Other resistances comparable
Dielectric Strength	1000 volt DC for 60 sec.
Load Life	100 hours at 225°C
Capacitance	Extremely low distributed capacity (moulded hi temp. phenolic case & cover)

Completely sealed element. Meets and surpasses all applicable requirements of MIL-E-5272A and MIL Stand. 202.

ACEPOT®

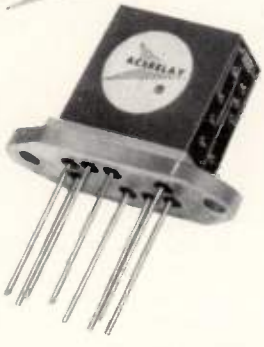
Sub-miniature and standard non-linear and linear potentiometers. 0.25% terminal conformity without padding resistors. Immediately available in sine, cosine, square law and log functions in AIA sizes.

	Sine-cosine	Double Sided Square-law
Size	3"	3"
Resistance	20K ±5% driving	25K ±5% driving
Conformity	½% pk-pk	±0.25%
Function angle	360°	±180°
Power	4 watts	3 watts
Mounting	Servo	Servo

Submit your design requirements to our Engineering Group for evaluation and quotations.

ACESET®

Sub-miniature Trimmers. Heat dissipation . . . 2 watts at 60°C. Immediate delivery in resistances of 50Ω to 100 K.



actual size

Size	½" x 5/16"
Weight	⅓ ounce, including lock washer and nuts
Resistance Range	50Ω to 100K ±10% std. tol.
Linearity	±5%
Temperature Range	−55°C to +125°C
Mechanical Rotation	330° Nominal
Electrical Angle	320° Nominal
Power	2 watts for 60°C. rise
Mounting	¼"-32 threaded bushing

ACERELAY* Model 220

Postage stamp size. Bifurcated contacts with extreme wipe providing low contact resistance for dry circuitry. Contact area hermetically *welded* from coil avoiding contamination and assuring unmatched reliability.

Size	.80" x .88" x .45"
Weight	.6 oz.
Contacts	Bifurcated 2 Form C*
Contact Rating	2 A. Resistive
Coil Resistance	To 10,000 Ω std.
Vibration	5-2000 cps at 20 G min.
Shock	50 G min.
Life	100,000 oper. min.
Header Type	8 pin per MIL. spec. MS 24250 Type Y configuration Plug-in, or Solder Leads
Temperature	−65°C to +125°C
Mounting	Socket or integral Bracket

*Double pole double throw break before make.

ACETRIM®

Sub-miniature trimmers . . . A wide range of resistances are available in this low-cost, space and weight saving unit.

actual size

Size	½" x ½"
Weight	0.25 ounce
Resistance Range	10Ω to 150K ±5% std. tol.
Linearity	±3%
Temperature	−55°C to 125°C (to 150°C on special order)
Mechanical Rotation	330° Nominal
Electrical Angle	325° std. ≷ available
Power	2W for 60°C rise
Mounting	Threaded bushing, printed circuit, flush, flanged, ganged.

Exact requirements for your particular applications, can be custom designed and mass produced with short lead time. All units are anti-fungus treated and fully sealed against dust, moisture and humidity. Meets applicable JAN-MIL specs including shock and vibration. Send us your specifications for engineering assistance on designs and applications. Complete Fact File and Application Data Sheets available on request. CALL, wire or teletype Dept. L at Ace Electronics Associates, Inc., 99 Dover Street, Somerville, Mass. SOmerset 6-5130, TWX SMVL 181.

AMPERITE PREFERRED

by design engineers—because they're
MOST COMPACT • SIMPLEST • MOST ECONOMICAL
HERMETICALLY SEALED

Thermostatic DELAY RELAYS

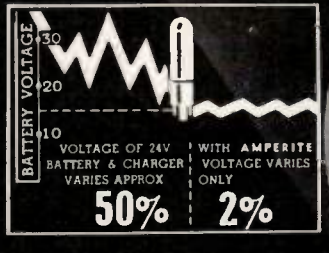
2 to 180 Seconds

Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.

Hermetically sealed. Not affected by altitude, moisture, or climate changes.

SPST only—normally open or closed.

Compensated for ambient temperature changes from —55° to +70° C. Heaters consume approximately 2 W. and may be operated continuously. The units are **rugged, explosion-proof, long-lived, and—inexpensive!**



TYPES: Standard Radio Octal, and 9-Pin Miniature . . . List Price, $4.00. Standard Delays

Also — **Amperite Differential Relays:** Used for automatic overload, under-voltage or under-current protection.

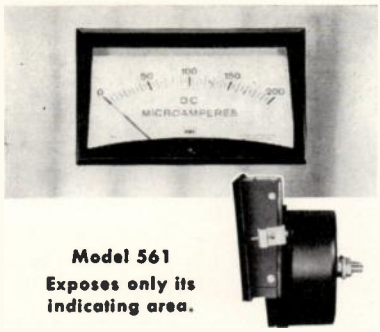
PROBLEM? Send for Bulletin No. TR-81

BALLAST REGULATORS

Amperite Regulators are designed to keep the current in a circuit **automatically regulated** at a definite value (for example, 0.5 amp.) . . . For currents of 60 ma. to 5 amps. Operate on A.C., D.C., or Pulsating Current.

Hermetically sealed, they are not affected by changes in altitude, ambient temperature (—55° to +90° C.), or humidity . . . Rugged, light, compact, most inexpensive . . . . . List Price, $3.00.

Write for 4-page Technical Bulletin No. AB-51



AMPERITE CO. Inc., 561 Broadway, New York 12, N. Y.

Telephone: CAnal 6-1446

In Canada: Atlas Radio Corp., Ltd., 50 Wingold Ave., Toronto 10

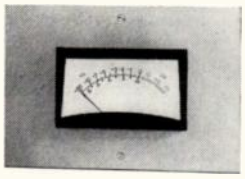
api PANEL METERS

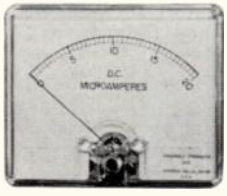


Model 561
Exposes only its indicating area.

Model 561 panel meter has a big 5" x 2⅞" dial, yet takes 15% less panel space than usual 4½" rectangular meters. Behind-the-panel mounting hides entire case—meter projects only 3/16" from panel front.

Can be illuminated by back of panel light through window at top. Window and dial are slanted back for easy reading. No positioning holes needed—meter is snugged to panel by rear screw-on clamps.

Black satin finish is standard—no extra charge for gray in quantities. Other colors extra. Ranges: 0/5 microamperes to 0/50 amperes; 0/5 millivolts to 0/500 volts.



MODEL 561 VU METERS

The Assembly Products VU meter meets American Standard C16.5-1954. Buff dial with red and black numerals. Response time for a step change of 0.3-second, ±10%. Overshoot is 1 to 1.5%.

Model 261

Model 451

D'Arsonval movements, Alnico magnets, tubing or knife-edge pointers. AC meters are rectifier type. DC accuracy, 2%; AC 3%. Better accuracies available. Zero right, zero center meters or up to two-thirds of range suppressed. AC and DC meters in multiple ranges. Special dials in colors, black face, your name, etc. Mirror scales.

STYLES: API PANEL METERS

Ruggedized-Sealed: 2½, 3½, 4½-inch round metal case, sealed zero adjust, shock-mounted movement.

Black Bakelite: 2½", round or square, 3½" round or square, 4½" rectangular. (Other colors and illumination in 4½" size.)

Clear Plastic: 2½", 3¾" and 4½" rectangular.

Send For Catalog:

36-PAGE CATALOG 4-E DESCRIBES COMPLETE PRODUCT LINE—includes circuitry, response time, prices, discounts, etc.

api METER-RELAYS

Indicating meters with built-in locking contacts for control or alarm. Trip point adjustable.

Ranges: 0-5 Ua. to 0-50 A., 0-5 Mv. to 0-500 V. AC or DC. tMin. AC voltage range 0-250 Mv.) Thermocouple temp. ranges, −400 to +3000°F.

Model 255-C

Model 461-C Bakelite

Model 451-C

Life: 10 to 20 million operations.

Accuracy:
Point of contact: ¼% to 1%.
Indicating: ±2% of full scale at any point of dial. Can be 1%.

Contacts:
Rating: Standard is 5-25 milliamperes at 75-125 volts DC. Optional ratings to 250 Ma, 6 to 250 volts., DC.

Arrangement: High Limit (makes on increase of signal), Low Limit (makes on decrease of signal), Double (both high and low contacts.)

Case Styles
Ruggedized-sealed metal cases are 2½, 3½, and 4½" round. shock-mounted movement, gasket-sealed. Black Bakelite... glass front, 4½" rectangular case. Other colors on special order. Clear Plastic 2½, 3¾, and 4½" rectangular.

MIL Specs:
Ruggedized-sealed meter-relays will meet these specs: Shock: 1 and 3-foot drops, 400 lb. hammer, 3 planes. Vibration: MIL-M-10304A.
Salt Spray: QQ-M-151A Temp.: −30°/+70°C. Sealing: MIL-M-6A.

VHS METER-RELAY
(Very High Sensitivity)

Plastic Case, or Solder-Sealed Metal Case. 1⅜ x 2" approx.
Connections: 9-pin octal style, or miniature, or solder.
Weight: 4 ounces.
Sensitivity: From 0.2 Ua to 10 Amp., 0.1 Mv to 500 volts. AC relays are rectifier type.
Accuracy: Trip point to 2% (depends on sensitivity). Differential and repeatability 1%.
Shock & Vibration: Operates at 10 G or more, 5-55 cycles. Non-operating, withstands 10 G or more, 5 to 2,000 cycles; shocks of 10 G or more.
Contacts: SPST or SPDT, 5-25 Ma DC. Other ratings to ½ Amp. AC.

LIAD MULTI-CONTACT METER-RELAY

The LIAD consists of a D'Arsonval meter movement with one or several contacts carried on the moving pointer, a printed circuit scale (95 angular degrees), and a device for gripping the pointer and its contacts to the scale contact bars.

The unique combination of contact closures resulting from this gripping tells the level of the signal—and can be transmitted or used for telemetering; automatic production testing or grading; maximum value reading; simple quantitative read-out, etc.

but AEMCO did it . . . and built it fast!

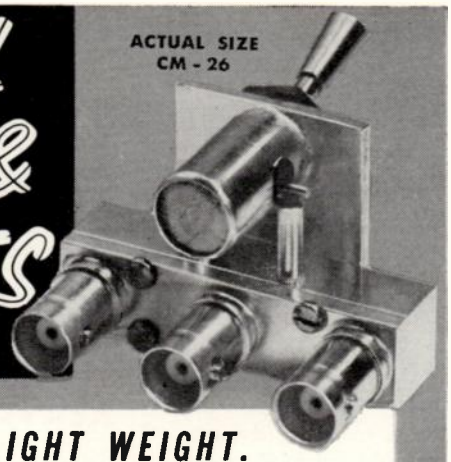
Typical of AEMCO ingenuity, the compact Type 134-3468 high voltage relay illustrated above was designed to meet rigid customer requirements of reliability and cost. Although AEMCO manufactures a complete line of hundreds of standard relays, development and manufacture of relays such as this are right "up our alley." Want fast service on protypes and development models? Want experienced, imaginative engineering with an eye to production economy? Then contact AEMCO—the firm that's building relays for more than a hundred outstanding firms.

*Hermetically sealed enclosure with rigid mounting bracket to withstand vibration requirements up to 10 G's—500 CPS. Designed for custom application, contacts are gold alloy SPDT dry circuit, with NC contact grounded and NO contact insulated for 10,000 V peak at 2 to 4 mcs.

Need relays? ask AEMCO

AEMCO offers a complete line of relays in a wide choice of spring and coil combinations, operating potentials, and contact ratings. If one of hundreds of standard AEMCO relay types does not exactly meet your requirements, we will be happy to design and manufacture a unit to meet or exceed your requirements.

AEMCO also manufactures a complete line of Sequence and Automatic Re-Set Timers, Time Switches and Sign Flashers.



WRITE TODAY
Your inquiries are invited. Ask for your free copy of Relay Catalog describing all standard relays in the AEMCO line.

COAXIAL RELAYS & SWITCHES

- **SMALL SIZE • LIGHT WEIGHT.**
- **LOW COST • EXTREME RELIABILITY.**

Low VSWR not only through the UHF frequencies but in many types into the microwave range.

Excellent Crosstalk Figures — Most types ground the output(s) when not connected to the common input.

Any Connector Type with almost any orientation.

Fast Operation — 15 milliseconds for CR types operated by DC.

Long Life — 1,000,000 cycles minimum for CR types, 100,000 for CM types.

Low Coil Consumption — Approximately 2W for most DC operated coils, 6VA for most AC coils.

Teflon RF Insulation in all types using BNC, UHF, N, or C connectors.

Resistant to Military Environmental Conditions of temperature, shock, humidity, and salt spray.

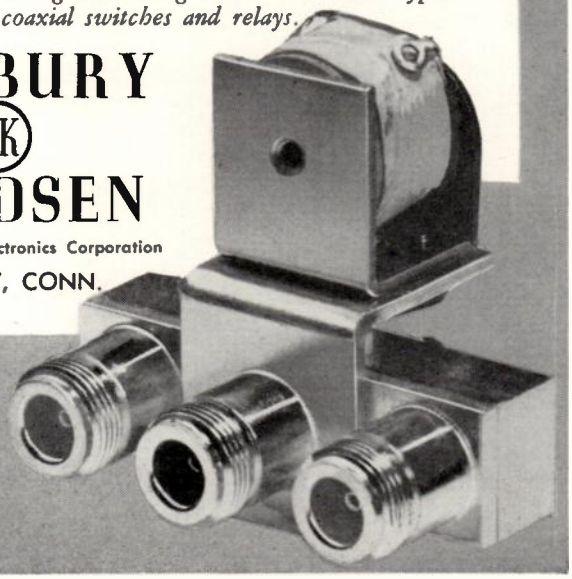
Resistor Terminations in types intended for video switching and similar applications.

Remote Electrical or Toggle-Actuated Manual Operation available in most types.

Access to Contacts Without Disassembly provided in CR and CM types.

Twin Silver Contacts on switches rated for powers exceeding 250 watts.

Fine Silver Contacts — On special order Palladium contacts can be supplied in most types.



Complex Switching Accomplished by crossover, DPDT, and multiposition types.

Write for our catalog describing these and other types of coaxial switches and relays.

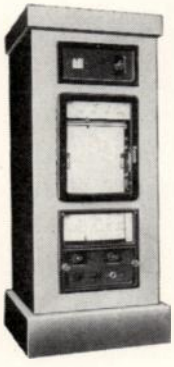
CURTISS-WRIGHT PRECISION INSTRUMENTS

backed by years of experience in producing complex electronic equipment

A combination Micro-microammeter and Millivoltmeter.

- 10, 100, and 1000 mv scales
- 10^{-5} to 10^{-14} amperes full scale
- Short response time
- 10^{15} ohm input resistance
- Less than 1 mv drift per day
- ± 2% accuracy

DYNAMIC CAPACITOR ELECTROMETERS

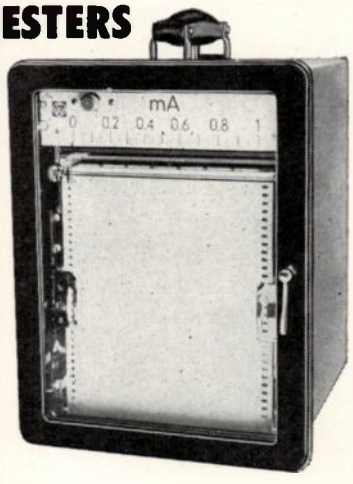


A direct reading millivoltmeter of 10 mv full scale sensitivity with an input resistance of 10^{15} ohms . . . uses exclusive dynamic capacitor as d-c inverter for stable a-c amplification. As a micro-microammeter, provides full scale sensitivity of 10^{-14} amperes, permitting measurements to 10^{-15} amperes. Convenience and accuracy increased by guard ring terminal, and switches for range selection and polarity reversal.

DEVR DISTORTION ELIMINATING VOLTAGE REGULATORS

- 60-cycle and new 400-cycle regulators
- Furnish 1.4 KVA of distortion-free, ± 1% electronically regulated power
- Quick response . . . 400-cycle in less than 1/20 cycle; 60-cycle in less than 1/50 cycle
- Simultaneously provide 4 KVA of ± 1% electromechanically regulated power
- Introduce no phase shift between input and output

RECORDERS—CONTROLLERS—INSULATION TESTERS



Indicating Controllers

Accurately indicate and control temperatures and other variables expressed in millivolts, microamperes and changes of resistance. "On-off" type . . . ranges from 30°-100° F. to 30°-3,000° F. Repeatability of control 0.2%; accuracy of indication ± 1%. Zero time lag response. Can be combined into systems for varied demands.

Strip Chart Recorders

Standard size (illustrated) up to 3 channels; also double size up to 6 channels and miniature sizes. Rectilinear, inkless and ink recording in one unit. Three speed transmission plus 60:1 speed change from hours to minutes. Accuracy 1%. Wide choice of ranges and chart drives. Shockproof movement; splash and dustproof steel case.

Insulation Testers

Small, extremely rugged, portable megohm-meters with built-in hand-cranked test voltage generator. Patented mechanical rectifier permits generation of up to 5000V. Easy hand-cranking, accuracy ± 1.5%. Scale length 2¾". Wide range of test voltages and measuring ranges.

THERMAL TIME DELAY RELAYS *for military and industrial applications*

H SERIES
high vibration resistance

S SERIES
s-p., d-t snap-action contacts

K SERIES
economical, low-cost

Ten series of standard Curtiss-Wright thermal relays are available for immediate delivery . . . or *special custom designs* can be engineered and produced on order. Curtiss-Wright design and production experience is at your service to help solve problems in time delay relays. In addition to those illustrated, series immediately available include:

IR — TR and STR . . . instant reset, voltage compensated

MR and CR . . . double-throw contacts, fast reset, no contact chatter

G and W . . . economical, low-cost

'DIAMOND H' RELAYS

NEW . . . High Speed Polarized Relays

Fast action with freedom from bounce, plus high sensitivity and consistent operation with low distortion, are provided by small, rugged Series P Polarized Relays. SPDT, with two independent coils, they will handle over 1,000 pulses per second. Various coil resistances up to 5,000 ohms each coil. Contact ratings vary with switching speed but range from 60 MA to 2A with voltages to 120 AC or DC, dependent upon amperages employed.

Aircraft-Missile Series R & S Relays

Miniature, hermetically sealed 4PDT, Series R & S relays provide excellent reliability over their long service life. Electrically and physically interchangeable, the two series differ only in that Series S coils are separately sealed within the sealed cases, with organic matter eliminated from the switch mechanism for greatest reliability in dry circuits. Contacts MA to 10 A.

General Purpose AC, DC Relays

Series W Power Relays are DPDT, double break-double make; measure only 1½" x 1½" x 1⅞", but are rated to 25 A, resistive, at 112-230 V, AC, 1 HP 115 V, AC, 2 HP, 230 V, AC. Socket, panel and sidewall mountings are standard; others available to meet special needs. 12 possible contact arrangements, including sequencing.

"Diamond H" engineers are prepared to work with you to develop variations on these relays to meet your specific requirements. Tell us your needs . . . by phone or letter.

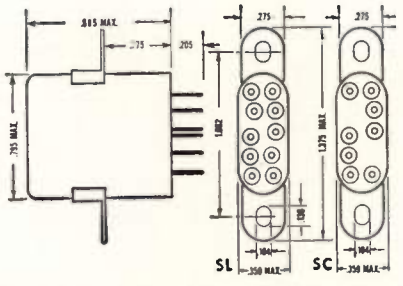
P&B MICRO-MINIATURE RELAYS LEAD IN

performance

SHOCK: 100g* VIBRATION: 30g to 2000 cps*



*NO CONTACT OPENING

New P&B crystal-case size relays, the SC and the SL (magnetic latching), show amazing shock and vibration capabilities. They absorb shocks of 100g and vibrations 30g to 2000 cps. without contact openings!

A highly efficient magnetic structure utilizing a permanent magnet makes possible at least twice the contact pressure found in DPDT relays of comparable size. One watt of power for three milliseconds operates either relay. Transfer time is unusually fast —0.5 milliseconds maximum.

For more information, contact your P&B sales engineer, or write Potter & Brumfield, Princeton, Indiana.

SL—dual coil latching relay. Operates on a 1 watt, 3 ms. pulse at nominal voltage. Permanent magnet latch locks the armature in either position.

SC—non-latching relay with series-connected dual coils. Operates on approximately 1 watt at nominal voltage. Coils must remain energized to hold the armature in the operate position.

SC and SL Series Engineering Data

GENERAL:
Insulation Resistance: 10,000 megohms, min.
Breakdown Voltage: 1,000 V. RMS.
Shock: 100g.
Vibration: 30g 55 to 2000 cps.; 0.195" max. excursions from 10-55 cps.
Temperature Range: —65° C. to + 125° C.
Weight: 15 grams without mounting bracket.
Operate Time: 3 MS. max. with 550 ohm coil @ 24 V. DC. (SL: 630 ohm coil at 24 V. DC).
Transfer Time: 0.5 MS max.
Terminals: (1) Plug-in for microminiature receptacle of printed circuit board.
(2) Hook end solder for 2 #24 AWG wires.
(3) 3" flexible leads.
Enclosure: Hermetically sealed.

CONTACTS:
Arrangement: 2 Form C.
Material: Gold flashed palladium.
Load: 2 amps @ 28 V. DC, resistive; 1 amp @ 115 V. 60 cycles AC, resistive.
Pressure: SC—16 grams min.; SL—20 grams min.

COIL:
Power: Approx. 1.0 watt at Nominal Voltage.
Resistance: SL—40 to 1400 ohms; SC—35 to 1250 ohms.
Duty: Continuous.

MOUNTINGS:
Bracket, stud and plug-in.

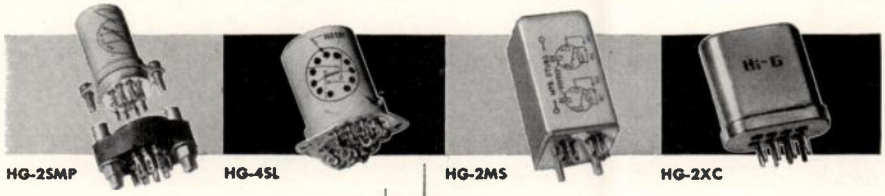
MINIATURE AND SUB-MINIATURE

relays by Hi-G

HG-2SM

Rugged and reliable relays are manufactured at Hi-G in a wide range of standard units... and to customer order with special designs to meet your particular requirements.



Complete experimental and prototype facilities permit Hi-G engineering personnel to study and evaluate your relay needs.

New, complete illustrated specification sheet available. Write for your free copy today.

And for information on special relay units, send your specifications to Hi-G for study and recommendations at no obligation.

rugged / reliable / shock and vibration resistant

GENERAL SPECIFICATIONS

Size	1.79" long (maximum) 1.063" in diameter (maximum)
Weight	3.0 ounces
Nominal Operating Voltage	26.5 volts
Contact Metal	gold alloy
Contact Bounce	less than 250 microseconds
Temperature Rating	— 65° C to + 200° C
Shock	55 g
Vibration	2,000 cps at 25 g

a new 4PDT relay to meet all requirements of MIL-R-25018!

Don't compromise with the Class C, Type II, Grade 3 requirements of MS 24114-9, MIL-R-25018. You don't have to any more. Now Union Switch & Signal has a 4PDT, rotary-armature relay designed to meet these specifications *completely*. It is the first of its type to do so. In fact, it *exceeds* some of the rugged requirements.

Here is the kind of performance you can expect from this new relay:

High operating temperature. Even at an ambient temperature of 200° C, this relay gives optimum performance. The use of ceramic material provides consistently high insulation resistance. As a result, you can install this relay closer to engines. You often can use it *without* temperature controlled boxes. Always, you will find it supremely rugged and reliable.

High in shock resistance. This new UNION Relay withstands shock *greater* than 55 g for 11 milliseconds—and continues to operate. In vibration tests, it shows no contact chatter up to 2,000 cycles at an acceleration of 25 g.

New high in contact reliability. Contact reliability of this relay is *six times* that of comparable devices because of its new 2-button, bifurcated contacts. Bifurcation also increases current carrying capacity (each button easily handles a full 2-ampere load) . . . and makes gold alloy contacts practical for both low- and high-level loads.

Contact reliability is enhanced, too, by the ceramic insulation which contains no volatile material to contaminate contacts and by separate hermetic sealing of the magnet coil.

New torsion-type rotary-armature suspension improves resistance to thermal shock . . . increases reliability over the entire temperature range . . . and greatly extends the operating life of this new 4PDT relay. Call or send the coupon for complete information about this and other miniature relays manufactured by Union Switch & Signal.

COMPLETE FACTS

Union Switch & Signal, Advertising Dept.
Division of Westinghouse Air Brake Co.
Pittsburgh 18, Pennsylvania

Please send the following:

☐ Complete description of your new 4PDT relay which meets every requirement of MIL-R-25018. ☐ Catalog of other miniature dc and ac relays which you manufacture to MIL-R-25018, MIL-R-6106C, and MIL-R-5757C requirements. ☐ Description of your Digital and Alpha-Numerical Indicators for data display.

Name .....

Position .....

Firm .....

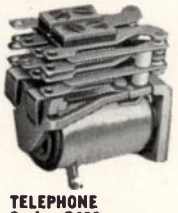
WRH

PRICE ELECTRIC
. . . Reliable Relays for Industrial and Military Use

MICRO-MINIATURE
Style 6
Lightweight, crystal can type relay is simple, reliable and versatile. Ideal for miniaturized assemblies. Termination can be provided to meet most requirements.



SUB-MINIATURE
Style 506
For Low Level Circuits and General Purpose use. Meets requirements of MIL-R-25018. Available with solder or plug type termination.

MINIATURE
Series 300
electro-poise®
A counter balanced relay with separately sealed contact chamber. Meets the following MIL Specifications: MIL-R-5757C, MIL-R-25018 (USAF) Class B; Type 11, Grade 3; and Drawing MS-24115 (USAF)

MULTIPOLE
Series 2100
For military and commercial applications. Available in 2 frame sizes providing up to 6 PDT contact combinations. Available hermetically sealed.

TELEPHONE
Series 5400
For communications and other circuit control applications. Available in any standard voltage to 115 VDC. Resists 15 G vibration through 500 cycles. Available hermetically sealed.

HIGH CURRENT
Series 8200
200 amp, high shock relay for aircraft and missile use. Temperature range from −65° C to +125° C. DC only.

Price Electric has a complete line of relays to meet your requirements. Write for literature and specifications.

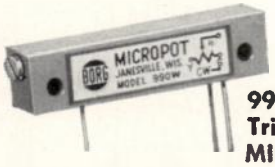
Why Gamble?



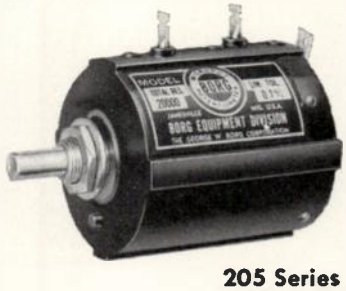
THERE'S A BORG MICROPOT® TO MEET YOUR EXACT SPECIFICATIONS!

BORG MICROPOTS... the Ultimate in Multi-Turn Precision Potentiometers

1100 Series MICROPOTS

A precision MICROPOT that offers your products a price advantage in today's competitive markets. Lug or lead type terminals. Accurate . . . dependable . . . long lived.

990 Series Trimming MICROPOTS



Small in size, lightweight, rugged and dependable. Three types of terminals . . . printed circuit, solder lugs or insulated wire leads.

Borg offers a complete line of high-precision, linear potentiometers called MICROPOTS. Precision is Borg's business . . . that's why MICROPOTS offer so many exclusive advantages. Superior design and production methods make Borg MICROPOTS available in any quantity. Write today for the name of your nearest Borg Jobber or "Tech-Rep."

900 Series MICROPOTS

Standard ten-turn and three-turn models to fit most special design needs. Extremely accurate and dependable under adverse environmental conditions including severe vibration and shock.

205 Series MICROPOTS

A quality MICROPOT. Designed for both military and commercial applications. Proven in many different mobile and stationary types of electronic circuitry.

DeJUR

..one source for all single turn precision potentiometers...

from ½" to 5"

- LINEAR AND NON-LINEAR
- HIGH PRECISION SINE-COSINE
- EXTERNAL PHASING, BALL BEARING

WIDE RANGE STANDARD LINE – You can solve most design problems with DeJUR'S standard line of precision potentiometers. Chances are we already make the potentiometer you need, or can design one for you. Here are some highlights on three types:

HIGH PRECISION, SINE-COSINE SERIES C-178–1⅞" diameter model is available in accuracies up to ± 0.3% peak-to-peak. Ball bearing construction, anodized aluminum housing. Multi-finger brush contacts. 2" and 3" diameters also available.

EXTERNAL PHASING SERIES C-200–2" diameter, sleeve or ball bearing. Stainless steel clamp ring ganging for unlimited phasing. Taps are field insertable without drilling. Available with any type mounting and shaft configuration.

HIGH RESOLUTION, HIGH ACCURACY – Available in 2", 3" and 5" diameters (Series HP-200, HP-300, HP-500). Linearity to ± 0.05%. Any electrical angle. Up to 30 taps. Ganging multiple, 0.368. Housings are of one-piece, glass reinforced Alkyd, and have anodized aluminum end plates.

DeJUR WINDINGS PROVIDE OPTIMUM RELIABILITY – All potentiometers are made by exclusive DeJUR bonding and cleaning methods that add to their high precision and long life. These production methods mean improved linearity, no loose turns, and no change in wire contour and winding resistance.

you're always sure with **DeJUR**

GIANNINI *Precision* POTENTIOMETERS

Ready for rapid delivery...meet rigid requirements

1¾" dia. Sine-Cosine Potentiometers which conform to desired function within 1% of peak-to-peak amplitude are also available.

ITEM:
Model 1437 (NAS-710, style RRI5)
RESISTANCE: 100 to 160,000 Ω
LINEARITY: 0.5% to 0.1%
RESOLUTION: to 3900 wires

ITEM:
Model 1750 (NAS-710, Style RRI8)
RESISTANCE: 100 to 300,000 Ω
LINEARITY: 0.5 to 0.1%
RESOLUTION: to 5,000 wires

ITEM:
Other Models from ⅞" to 3" diameter. Ganged units are externally phaseable.

Giannini measures & controls:

ω	β	θ	ψ̇	τ	v	ϕ

Precision Potentiometers by RATTRAY

— including

- MINIATURE TYPES
- SUB-MINIATURES
- MULTI-GANG UNITS
- STANDARD TYPES

— featuring

- HIGH ACCURACY
- LOW TORQUE
- EXCELLENT RESOLUTION
- LOW NOISE

Rattray experience-engineered precision potentiometers are supplied in types that meet most electronic applications. Complete research and development facilities, and unique winding techniques, make it possible to produce custom designs to the most critical military and commercial specifications. All-metal construction of mounting and aligning surfaces provides precise mechanical interchangeability. Precise electrical performance is obtained by detailed quality checks throughout production. Special winding machines assure high resolution and function accuracy.

New Handbook Available —
28 pages of engineering data on Rattray precision potentiometers with helpful technical information for designers and engineers.

Call or write Rattray now for catalog or quotations on your potentiometer applications.

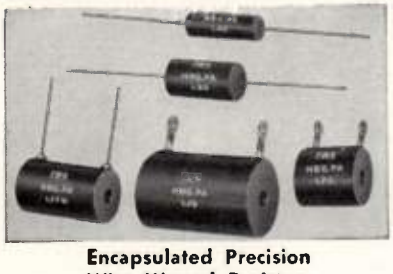
rpc

HIGH QUALITY RESISTORS FOR ELECTRONICS

RPC is a widely recognized supplier of high quality resistors to industry, Government Agencies and the Armed Forces. Advanced production methods, modern equipment and scientific skill enables RPC to manufacture resistors of *highest quality* in *large quantities* at *reasonable cost*. Modern manufacturing plant is completely air conditioned and equipped with electronic dust precipitators to insure highest production accuracy. RPC resistors are specified for use in instruments, electronic computers, radiation equipment, aircraft equipment and scientific instruments.

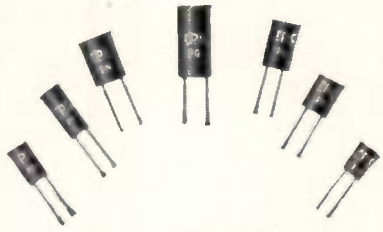


Test equipment and standards for checking and calibrating are equalled by only a few of this country's outstanding laboratories. Our ability to produce resistors of highest quality coupled with prompt delivery have established RPC as a leading manufacturer of resistors. Small or large orders are promptly filled.

Representatives in principal cities. For full information send for latest catalog.

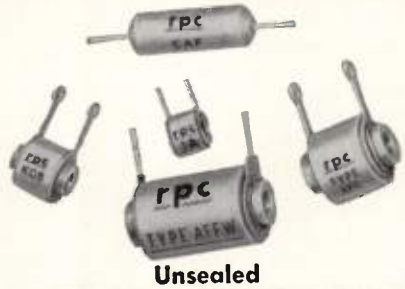
High Frequency Resistors

Used where requirements call for very low inductance and skin effect in circuits involving pulses and steep wave fronts. Depending on size and resistance value, these resistors are usable at frequencies to over 400 mc. Resistance values range from 20 ohms to 100 megohms with tolerance of 20% to 5%. 2 types available.
TYPE F resistors (shown) in 10 sizes from 9/16" long x 0.10" diameter to 6½" long x 9/16" diameter, with lugs or wire leads. Power ratings ¼ to 10 watts.
TYPE G resistors (not shown), in 6 sizes up to 18½" long. Power ratings 10 to 100 watts.



Encapsulated Precision Wire Wound Resistors

RPC Type L Encapsulated Resistors will withstand temperature and humidity cycling, salt water immersion and extremes of altitude, humidity, corrosion and shock without electrical or mechanical deterioration. Type L resistors are available in many sizes and styles ranging from sub-miniature to standard with lug terminals, axial or radial wire leads. Available for operation at 105° C. or 125° C. ambient temperatures. These resistors will meet all applicable requirements of MIL-R-93A, Amdt. 4 and MIL-R-9444. Type L can be furnished with all resistance alloys and resistance tolerances from 1% to .02%.



High Megohm Resistors

Type H Resistors are used in electrometer circuits, radiation equipment and as high resistance standards. Resistance available to 100 million megohms. (10^{14} ohms). For utmost stability under adverse conditions Type HSD and HSK Hermetically Sealed are recommended. Seven sizes from ¾ inch to 3 inches long are available. Voltage rating to 15,000 volts. Low temperature and voltage coefficients. Standard resistance tolerance 10%. Tolerance of 5% and 3% available. Also matched pairs 2% tolerance.

Printed Circuit Precision Resistors

To meet the requirements for printed circuitry, RPC has developed Type P Encapsulated Wire Wound Precision Resistors. Miniature, single ended units designed for easy rapid mounting on printed circuit panels with no support other than the wire leads. Many newly developed techniques are employed in the manufacture of Type P Resistors. These units can be operated in ambient temperatures up to 125°C. and will withstand all applicable tests of MIL-R-93A, Amdt. 4. Available in 7 sizes, rated from 1/10 watt to .4 watt. ¼" diameter by 5/16" long to ⅜" diameter by ¾" long. Resistance values to 2 megohms. Tolerances from 1% to 0.05%.

Unsealed Precision Wire Wound Resistors

Unsealed precision resistors are wound on steatite forms and are used for all general requirements. They can be furnished with all resistance alloys in tolerances from 1% to .02%. These resistors will meet the requirements of MIL-R-93A, Amdt. 2, characteristic B. Special winding techniques, impregnation and thermal aging result in resistors of exceptional stability. They are available in a wide variety of sizes, styles and terminal types. Matched resistors, networks and special assemblies can be supplied.

High Voltage Resistors

Type B Resistors are stable compact units for use up to 40 KV. These resistors are used for VT voltmeter multipliers, high resistance voltage dividers, bleeders, high resistance standards and in radiation equipment. They can be furnished in resistance to 100,000 megohms. Available as tapped resistors and matched pairs. Sizes range from a 1 watt resistor 1 inch long x 5/16 inch diameter rated at 3500 volts, to a 10 watt resistor 6½ inches long x 5/8 inch diameter rated at 40 KV. Low temperature and voltage coefficients. Standard resistance tolerance 15%. Tolerances of 10%, 5% and 3% available. Tolerance of 2% available in matched pairs.

• TRIMMER POTS

Single turn and multiturn
Wirewound and film resistance elements
Wide range of resistance values
Rotary and box types
Temperature range to 225°C
Metal casings and hermetically sealed molded plastic
Threaded bushing mountings, except box types that offer printed current lugs, tinned leads or standard 3 wire lead mountings.

• PRECISION PANEL CONTROLS

High accuracy of terminal conformity
Wide range of standard resistance values in pots ranging in size from ½" diam. to 3" diam. Commercial types available in addition to those manufactured to meet military specifications.

• PRECISION SERVO TYPE POTS

Linear and non-linear single and multiturn wirewound pots in a range of sizes from ⅞" diam. to 3" diam.
High accuracy, ultra reliable, long life precision provide incomparable performance characteristics.
Unique, new film resistance in hermetically sealed moisture-proof units provide operation up to 225°C, assuring extreme accuracy and reliability under the most severe environmental conditions.
Sine-Cosine pots from ⅞" diam. to 3" diam. in addition to many special designs.

• TRANSLATORY POTS

For lineal motion with both linear and non-linear resistance functions.
Range of stroke lengths from 2½" to 12".

• Accelerometers • Transducers • Clutches • Switches Commutators • Drivers • Dials and Knobs

TRU OHM PRODUCTS

America's TOP Line

FIXED VITREOUS ENAMELED RESISTORS

As the world's largest producers of wire-wound resistors, we offer the finest quality . . . the fastest service from stock or to specifications . . . and the assurance that you are receiving the best value in vitreous enameled resistors.

FIXED VITREOUS ENAMELED RESISTORS are available from 3 watts to 200 watts . . . with a large variety of special mountings.

The next time you need resistors, send us your requirements and find out why we are growing so rapidly . . . are truly the TOF line in the world! Our latest catalog is available upon request.

Tru-Ohm Resistors and Rheostats are designed to meet and exceed MIL-R-26c and MIL-R-22a Specifications.

From 747 pages in 1949 to 2400 pages in 1957—that's how advertising in "Proceedings of the I R E" sprouted in eight short years. It's a whopping 321% increase.

Not to be outdone, the annual IRE DIRECTORY also shows a mushroom advertising growth of 280%—from 133 pages in 1949 to 373 pages this year.

So rapid is progress in the radio-electronic field, so far-reaching is each new engineering achievement, manufacturers must run to keep from standing still. It's the radio engineers—designing, planning, producing and buying—who are the backbone and brains of this vast industry. They are the "thinking engineers"—members of The Institute of Radio Engineers—the men you most want to sell.

Engineers are educated to specify and buy.

VECO THERMISTORS, VARISTORS RATED HIGHEST QUALITY BY INDEPENDENT LABORATORIES

What's behind this quality? — it's VECO's ever-constant research, development and engineering program, designed to keep abreast of today's fast-changing industry. Backed by one of the country's largest and finest equipped plants, VECO works hand-in-hand with customers to improve existing products and develop new applications utilizing Thermistors and Varistors.

VECO also publishes technical and educational literature to tell customers of the uses and characteristics of Thermistors and Varistors. A new Technical Catalog, covering over 250 VECO stock items, and an educational series entitled "Meet The VECO Thermistor" are available. Write or call for your free copy today!

Also Manufacturers of **VECO**

- **Gas Analysis and Chromatography Cells**
- **Combustion Analyzers**
- **Temperature-Sensing Devices**
- **Low Temperature (Lox Probes)** (Pat. Applied For)
- **Tap-A-Therm** (Multi-Tapped Thermistors) (Pat. Applied For)
- **Custom-Built, Constant Temperature Baths and Controls**
- **Compactrol** (Electronic Controls) (Pat. Applied For)

MINIATURE PRECISION POTENTIOMETERS

Diameters: ½", ⅞", 1 1/16", 1⅛", 1⅝"

Resistance Ranges: From 1 ohm to 500 kilohms (wire wound)

Temperature Ranges: −55° to 125°C Standard
150°C Special — also 300°C "Hot Pot"

PANEL METERS

Sizes. 2½" square, 2½" and 3½" round, 3½" square, 4½" square, 4½" square (front illuminated).

Ranges: D.C. Types — microamperes, milliamperes, amperes, millivolts, volts
A.C. Rectifier Types — microamperes, milliamperes, volts

Types: Zero Left, Zero Right, Zero Center, Suppressed Zero

EPOXY ENCAPSULATED CHOKES AND IMPEDANCE TESTED R.F. CHOKES

Ranges: 0.1 μh to 200 MH — small physical size — high temperature 125°C — MIL-C-15305A, Grade 1, Class B.

CERAMIC SLUG TUNED COIL FORMS AND PHENOLIC COIL FORMS

Complete lines, starting with diameter of .205 — ¼", ⅜", ½" — various lengths

TORQUE WATCH® GAUGES

Immediate delivery — 38 models for measuring starting (breakaway), moving and stall torques. Accurately hand-gauge all torques between 0.005 and 40 ounce inches.

POTENTIOMETER TEST STATIONS

Test angles, linearity, conformity, resistance, and noise.

OTHER WATERS PRODUCTS

Pot Hook® Panel Mounts, Instruments, Precision Toroids

you get

ADVANCED PRECISION PRODUCTS

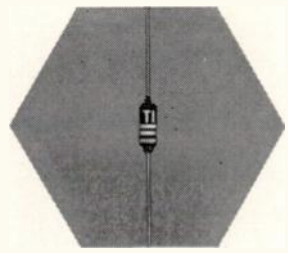
first from T/I

You are assured of the reliability your applications require and the economy that follows when you buy from the leader of the semiconductor industry.

Transistors: Select your transistors from the industry's widest line . . . GERMANIUM high frequency, VHF, radio converter and IF, audio output, general purpose and phototransistors . . . SILICON high temperature switching, medium power, high power, high frequency, and small signal transistors. *(There are more TI types of silicon transistors than the silicon types of any other manufacturer.)*

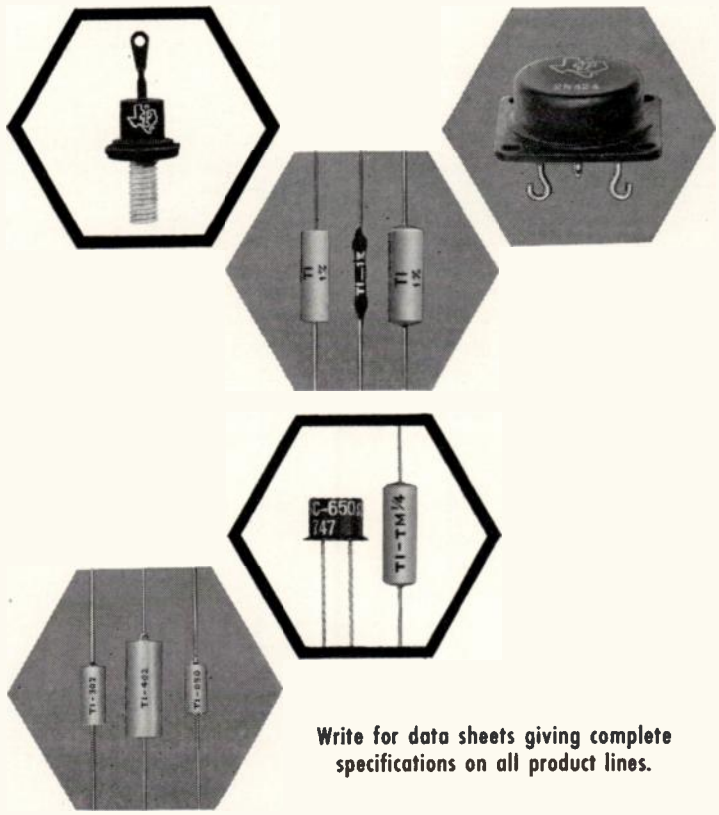
Silicon Diodes: Look to new ruggedized TI 600V, 400mA and 0.3 μ sec recovery time glass diodes for your general purpose and computer applications.

TI 100% tested, diffused junction diodes provide stability, reliability and long service life in extreme heat, shock and vibration conditions.



For your miniature circuitry, select from a wide line of voltage regulator and general purpose, metal-case diodes.

Silicon Rectifiers: New design freedom and reliability for your miniature high voltage power supplies! Get instant operation at high temperatures . . . with zero filament power . . . when you use TI single junction 1500 volt silicon rectifiers and 3 amp diffused silicon rectifiers with PIV ratings to 600 volts.



Precision Carbon Film Resistors: Outstanding accuracy and reliability are yours with TI precision carbon film resistors. Seven sizes from ⅛ to 2 watts with resistance values from 25 ohms to 30 megohms are available in 1, 2, and 5% tolerances. Special values, modifications and tolerances will be supplied to your specifications.

***Sensistor* Silicon Resistors:** For your temperature sensing and temperature conpensating applications, *sensistor* silicon resistors provide *a positive temperature coefficient of resistance (+ 0.7%/°C) plus a constant rate of change.* Values range from 100 to 1000 ohms in ⅛ and ¼ W ratings.

***tan*-TI-*cap* Solid Tantalum Capacitors:** *Immediate availability* in production quantities assures prompt delivery of small size, leakproof *tan*-TI-*cap* tantalum capacitors for your miniaturized circuit requirements. Values range from 4 to 20 μf in ratings from 6 to 35 volts.

industry's widest line/rapid delivery

KODAK EKTRON DETECTORS

Semi-conductive resistors with photosensitive area of any size or shape

Kodak Ektron Detectors consist simply of depositions on glass, fitted with leads. They are available either unmounted, mounted in pronged housings, or embedded in infrared-collecting lenses.

Order of response to tungsten illumination approximates emissive-type phototubes of same sensitive area. Sensitivity peaks at about 2.2 microns in the infrared. Various kinds have time constants from 10 to 1000 microseconds, some with appreciable sensitivity to 5 microns when cooled.

Kodak Ektron Detectors provide a unique combination of wide spectral response, high signal-to-noise ratio for the infrared, overall ruggedness, availability in very small size and in complex, precise arrays and mosaics.

2N1032C			X	X	80	15	1.5	100	75	10	—	250 (d)

(a) Vce rating. Equivalent Vcb's are 20-50% higher. (b) Collector dissipation is the difference between the maximum junction temperature and the mounting base temperature divided by the thermal resistance. (c) hfe, AC current gain as noted with (*). All others represent hFE, DC current gain. (d) Square wave output power. (e) Push-pull output. (f) 2N1031, 2N1032 series have lugs. 2N677, 2N678 series have straight pins. 2N1029, 2N1030 series have flying leads.

There is a Bendix power transistor to help you get the right power and gain on *your* job. When you buy Bendix you enjoy extra quality at no extra cost: low leakage, life stability, high breakdown voltage, low thermal resistance, and controlled temperature variation. Our volume production enables immediate delivery on most models. For details or help on circuitry problems, write: SEMICONDUCTOR PRODUCTS, BENDIX AVIATION CORPORATION, LONG BRANCH, NEW JERSEY.

The Lepel Line of induction heating equipment represents the most advanced thought in the field of electronics as well as the most practical and efficient source of heat yet developed for industrial heating.

If you are interested in induction heating you are invited to send samples of the work with specifications. Our engineers will process and return the completed job with full data and recommendations without any cost or obligations.

TYPICAL INDUCTION HEATING APPLICATIONS IN THE MANUFACTURE OF TRANSISTORS

SOLDERING TRANSISTOR ASSEMBLIES BY INDUCTION HEATING

Concentrator-type coil creates high intensity, restricted heating at joint of nickel shell and tinned glass, thus causing solder to flow for permanent seal.

SINGLE CRYSTAL PULLER

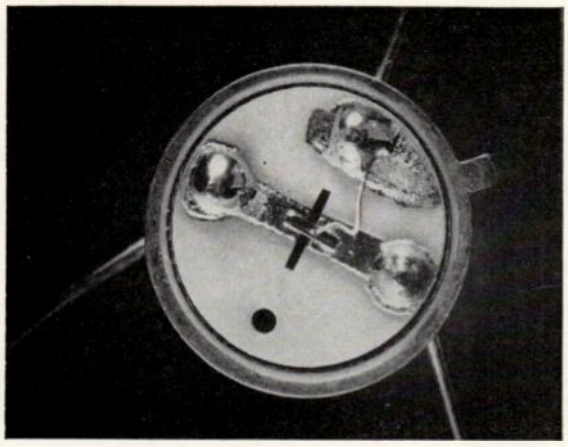
General arrangement for pulling single crystals. Induction heating coil is shown surrounding quartz tube containing crucible with molten germanium in suitable atmosphere.

MULTIPLE ZONE REFINING

Induction heating apparatus used in zone refining. The six coils shown provide simultaneous molten zones in the ingot as it passes through the tube containing the protective atmosphere.

Electronic Tube Generators from 1 kw to 100 kw.
Spark Gap Converters from 2 kw to 30 kw.

WRITE FOR THE NEW LEPEL CATALOG . . . 36 illustrated pages packed with valuable information.



All Lepel equipment is certified to comply with the requirements of the Federal Communications Commission.

LEPEL HIGH FREQUENCY LABORATORIES, INC.
55th STREET and 37th AVENUE, WOODSIDE 77, NEW YORK CITY, N. Y.

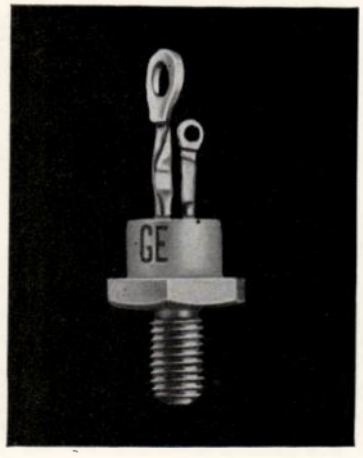
NEW FROM GENERAL ELECTRIC

Fixed-Bed Mounting guards against major causes of transistor failure



Photomicrograph of transistor showing Fixed-Bed construction. Critical elements resist impact like a solid block—no suspended parts to shake loose.

IN G.E.'s new Fixed-Bed Mounting, critical elements of the transistor are welded flat on a solid disk of ceramic. Any impact must be great enough to damage the disk itself before failure can occur.

With their many suspended parts, standard upright headers are subject to inertial stress at a number of points. General Electric's Fixed-Bed Mounting eliminates all but one of those parts. There is no thermal stress. Heat conduction is greater, making possible increased power dissipation. Fixed-Bed Mounted units have exceeded all standard shock, centrifuge and temperature-cycling tests. Watch for G-E transistors made with this advanced technique.

New Controlled Rectifier

does the job of a thyratron, relay, switch, circuit breaker, magnetic amplifier . . . in fact, its uses are limited only by your imagination!

Neither a transistor nor a rectifier, this revolutionary device combines features of both. In the reverse direction it acts as a standard rectifier. But it also blocks forward current until either a critical breakover voltage is exceeded or a signal applied to the third lead. Then it switches to a conducting state and performs like a forward-based silicon rectifier.

G.E.'s controlled rectifier offers switching speeds in micro-seconds and complete control of current turn-on without complicated circuitry. Similar to the gas thyratron, yet provides faster firing and recovery, low forward voltage drop, and has no filament to warm up and consume power. It operates at temperatures up to 125°C, voltages up to 300v and currents up to 16 amperes. General Electric Company, Semiconductor Products Dept, Electronics Park, Syracuse, N. Y.

Grayhill — Switches • Test Clips • Binding Posts • Test Jacks Molded Washers and Sockets

Grayhill Miniature Rotary Tap Switches

SERIES 12—Miniature Tap Switch, suitable for military equipment which will be subjected to environmental conditions such as salt spray, humidity, etc. Soldered contacts and lugs insure proper contact and minimum resistance.

Available 1 to 10 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make). Switch rotates 360° with 10 positions—stops provided with 9 or less positions.

Threaded bushing, .250" long—3/8—32 thread. Diameter of switch including terminals 1.016". Rated to break—1 amp., 115 V., AC., resistive. To carry—5 amps., 115 V., AC.

SERIES 24—Positive Detent Action and better feel for precision requirements.

Available 1 to 10 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make). 360° rotation with 10 positions—stops provided for less than 10 positions.

Bushings, .250" long—3/8—32 thread. Diameter of switch including terminals 1.01".

Rated to break—1 amp., 115 V., AC., resistive.

To carry—5 amps., 115 V., AC.

Spring Return Rotary Switch

Similar to Series 24 except with spring return to center position. Provides momentary contact on either side of center position only. Available in 1 to 3 decks, either shorting or non-shorting type. Also with up to 4 detent positions plus spring return position to right or left.

Grayhill Binding Posts

SERIES 29

29-3
1/2" Mounting Hole. Available in Red, Black and 6 other colors.

29-1
3/8" Mounting Hole. Available in Red or Black.

29B11
Phenolic Base for duo mounting of 29-1 Binding Posts on 3/4" Centers. Red or Black.

29-33
Spring Loaded Binding Post. 1/2" Mounting Hole. Available in Red or Black.

29-43
Spring Loaded Binding Plug.

29-41
Screw Type Binding Plug.

29-42
Twin Binding Plug. Black Phenolic Base. 3/4" Centers.
29-44 With Spring Loaded Heads.

* Metal parts ..... Nickel Plated Brass
* Molded parts ..... Thermosetting Plastic
* Washers ..... Non-turn "D" Style
* Cross-hole ..... Flush
* Integral solder lug and 2 Hex Nuts

SERIES 22-11 TRANSISTOR SOCKET

Designed for JETEC 30 packaging. Leads fit on 100 MIL grid for printed circuit. Socket fits thru 3/8" hole. For rivet or #2 screw fastening. Wrap around, silver plated beryllium copper contacts with gold flash. Bottom has molded-in terminal numbers—Key rib for alignment with transistor tab on top. Molded of Mica-Filled phenolic per MIL-M-14.

Grayhill Push Button Switches

SERIES 2000 SNAP ACTION SWITCH

Momentary contact, snap action, single pole—single throw. Overall length including solder type terminals 1.922". Mounting bushing 15/32-32 thread. Rated 10 amps. 115 volts AC resistive—Approx. life, 50,000 operations.

No. 2201—Normally Open—Red Button
No. 2202—Normally Closed—Black Button

SERIES 4000 SILENT ACTION SWITCH

Momentary contact, single pole—single throw. Overall length including solder type terminals 1.531". Mounting bushing 15/32-32 thread. Rated 1/2 amp. 115 volts AC resistive. Approx. life, 800,000 operations.

No. 4001—Normally Open—Red Button
No. 4002—Normally Closed—Black Button

SERIES 35-1 DOUBLE POLE SWITCH

Momentary contact, silent action, double pole—single throw. Overall length including solder type terminals 1.266". Mounting bushing 15/32-32 thread. Rated 1/2 amp. 115 volts AC resistive. Approx. life 100,000 operations.

No. 35-1—Normally Open—Red Button

SERIES 34—For Taper Pin Solderless Wiring

Momentary contact, silent action, single pole—single throw switch. Three female receptacles with built-in short between two of them for "in-and-out" wiring with A-MP No. 53 Taper Pins. Mounting bushing 3/8-32 thread. Overall length .969". Rated 1/2 amp. 115 volts AC resistive. Life over 100,000 operations.

No. 34-1—Normally Open—Red Button

SERIES 23-1 MINIATURE SWITCH

Momentary contact, silent action, single pole—single throw. Mounting bushing 5/16-32 thread. Rated 1/4 amp. 115 volts AC resistive. Approx. life 500,000 operations. Diameter .500". Overall length including solder type terminals 1.047".

No. 23-1—Normally Open—Red Button

SERIES 30-1 SUB-MINIATURE SWITCH

Momentary contact, silent action, single pole—single throw. Mounting bushing 1/4-32 thread. Rated 1/10 amp. 115 volts AC resistive. Approx. life 500,000 operations. Diameter .375". Overall length including solder type terminals .984".

No. 30-1—Normally Open—Red Button
No. 30-2—Normally Closed—Black Button

SERIES 39-1 ULTRA-MINIATURE SWITCH

Momentary contact, silent action, single pole-single throw. Rated 1/10 amp. 115 volts AC resistive. Approx. life 1,000,000 operations. Diameter .250". Overall length including solder type terminals .615".

No. 39-1—Normally Open—Red Button

Grayhill Printed Circuit Test Jacks

SERIES 31

For use on printed circuits as a test point to feed AF, RF and Pulse signals, check and feed DC voltages, monitor signals during test, alignment, etc. For use with standard .081"-.0825" phone tip plugs. Rivets to board like an eyelet.

Dims.—Extends .250" above mounting board, rivet dia.—.114".

No. 31-1—For 1/16" board
No. 31-2—For 3/32" board
No. 31-3—For 1/8" board

Plastic Sleeves

for Series 31 Test Jacks

Snap-on, plastic insulators permanently lock in place over Grayhill Test Jacks. Dims. Dia..245" Height—.290"
No. 31B—Plastic Sleeves, available in 8 colors for coding.

Grayhill Test Clips

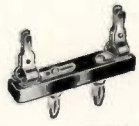
SERIES 16

Completely insulated (including hinge pin). Alligator type. Contact resistance approx. .0015 ohms. .008" silver overlay on contact surfaces. Terminals—silver plated.
Body of clip is molded phenolic per MIL-M-14.
No. 16-B (Black)
No. 16-R (Red)

No. 2-0 Threaded Stud

No. 2-1 Banana Plug

No. 2-4 Threaded Stud with Insulating Washers



No. 2-6 Pin Plug

SERIES 2

The basic spring clip is available in 4 styles of mounting as illustrated. Mounted on panel of test equipment, they permit fast lead connections without manual opening and closing of jaws. Also useful in bread board work and laying out harnesses.

Grayhill Plug-In Adapter

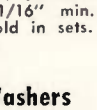
Designed for testing resistors, capacitors, and similar pigtail type components on standard test equipment. Banana Plug spacing adjustable 3/4" to 1 1/4" centers.
No. 2-7 Plug-in Adapter.

Grayhill Stand-Off Insulators

Mica-filled phenolic bodies for low loss at high frequencies, high dielectric strength, low moisture absorption and high fungus resistance. Silver plated brass solder terminals. Extends above mounting panel—.938". Diameter .312"
No. 18-1—Female, No. 4-40 Thread
No. 18-2—Male, No. 4-40 Thread

Grayhill Coil Forms

Molded of mica-filled phenolic for low loss at high frequencies, low moisture absorption, high dielectric strength and resistance to fungus growth. Tinned Copper wire leads. Patented anchor posts.
Dimensions—length—.500" to 1.000"
Dia.—.125" to .250"
Lead wire diameter—.025" to .040"



Grayhill Mating Insulating Washers

To insulate jacks with .375" dia. bushings from mounting panel. Back of panel washer has indexing hole fitting non-turn tab of the jack. Shoulder dimensioned for 1/16" min. panel thickness. Sold in sets.
No. 21B78-1 Natural Mica-filled Phenolic
No. 21B78-2 Black Electrical Grade

Grayhill Molded Insulating Washers

Available in sizes for No. 4 to .375" screw in natural mica-filled phenolic or black electrical grade insulating material.

CUNNINGHAM CROSSBAR SWITCH

- **FUNCTION AND OPERATION**

By means of a coordinate system of select and hold magnets operated sequentially, a mechanical operation is performed at a crosspoint. This mechanical operation in turn makes electrical connection at the crosspoint, establishing a circuit to one of 100 crosspoint terminations. Each circuit may have 1 to 6 wires (poles).

OUTSTANDING FEATURES

- Switches up to 70 mc.
- Low crosstalk
- Fast quiet operation
- Long life
- High Insulation resistance
- Plug-in connections
- Twin gold contacts
- Compact design
- Low operating power
- Applications in: Signal Distribution, Programming, Computer Systems, Radio and Television Signal Switching

SIGNAL CARRYING CHARACTERISTICS

CROSSTALK—down 55 db. at 4 mc. in a 10 x 10 switch with 75 ohm termination under the worst condition (parallel input paths connected to parallel output paths). The addition of shields in the link direction gives a 75 ohm characteristic impedence through the switch and further reduces the crosstalk.
BRIDGING CAPACITY—to ground between an input conductor connected to an output conductor in a 10 x 10 switch is 15 mnfd.
BREAKDOWN VOLTAGE—occurs at not less than 1500 VAC between switching conductors and frame and across switching contacts.
INSULATION RESISTANCE—Special materials give insulation resistance at 10,000 megohms—conductors to frame and between conductors.
CONDUCTOR RESISTANCE—through longest path in in a 10 x 10 switch is 0.3 ohms.
CURRENT CARRYING CAPACITY—Contacts will carry 100 milliamps non-inductive load at 50 VDC for 20 million operations. Increasing current to 1.0 amp decreases life below 1,000,000 operations.
CONTACT BOUNCE—is less than 200 micro-seconds on make. No bounce on break.
TIMING—Switch can be set up in 15 milliseconds at normal operate voltage. Scanning speeds of 60 ops are attained with transistor drive circuits. See bulletin 58-212 for additional information.
TERMINAL TYPES—(1) A-MP Taper Tab Connectors (A-MP Series 78) may be used on all switching and coil terminals (except off-normal switch terminals).

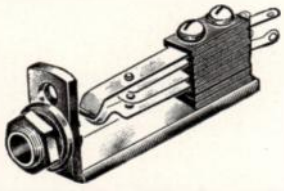
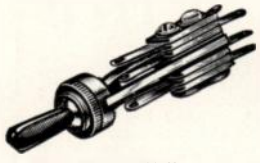
"Sets the Standard"

IN ELECTRONIC COMPONENTS



FOR RADIO — TELEVISION — HI-FI — MUSICAL INSTRUMENTS — ELECTRONIC CONTROLS AND COMPUTERS.

JACKS



FOR MILITARY AND INDUSTRIAL EQUIPMENT—MOST COMPLETE LINE

Available in all common and many special circuits.
"LITTEL-JAX"—require minimum panel space.
"TINI-JAX"—similar to "Littel-Jax"—subminiature in design.
"SF-JAX"—short frame design—innumerable circuits.
"LF-JAX"—long frame design—all circuits.
"EXTENSION JAX"—for cable extensions.
"SHIELDED JAX"—shield assembled into and made a part of Jack.

TELEPHONE & MILITARY JACKS

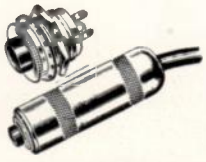
"T-JAX"—a conventional telephone switchboard design—all standard circuits and military specifications.
"M-JAX"—(illustrated) a heavy duty design used in heavy industrial equipment.

"LEV-R-SWITCH"

A lever action switch requires only single hole for mounting. Available in numerable circuits; various contact materials.

"FF-SWITCH"

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

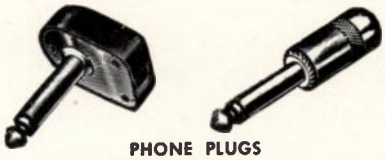


"LITTEL & TINY-SWITCHES"

"Littel-Switch"—rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.
"Tiny-Switch" — similar to "Littel-Switch", except sub-miniature design.

"MINI-MIX"

Miniature 2-input Audio Mixer connects directly to equipment—no external cables.



BUTTON AND CORD SWITCHES

"Button-Switches"—unusually small push button switch, completely enclosed.
"Cord-Switches"— cord mounted or pendant switch. Ideal for "hold" in hand operation.

"ADAPTERS"

For connecting equipment having different type connectors.

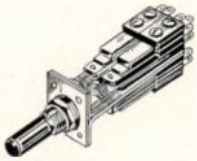
Complete line of CONNECTORS—Microphone and Phono. JACK COVERS

PHONE PLUGS

THE LARGEST VARIETY OF STYLES, SIZES AND TYPES

"LITTEL-PLUG"—small—fits standard Jacks—(also MIL type).
"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".
"LUG-PLUG"—small—low cost.
"STANDARD"—conventional size, heavy terminals —rugged design. 2 and 3 conductor types.
"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.

JACK PANELS

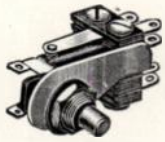


Black pherolic strip, reinforced with steel, supports Switchcraft "T-JAX" and "MT-JAX". Single or double row panels accommodate up to 52 Jacks—common and special circuits.

MOLDED CABLE ASSEMBLIES

(Audio Jumpers)

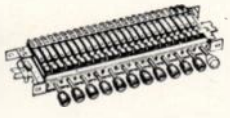
Plugs molded directly to various cable combinations. Shielded and unshielded. Various lengths.



"TELEVER SWITCHES"

Series 6000

Rugged telephone type; 3" depth behind panel. Welded cross bar Palladium contacts rated at 3 amps, 300 watts maximum, non-inductive A. C. load. Locking and non-locking types.



Series 16000

Same design as series 6000, features single hole mounting; Unique feature, "non-locking" type can easily be converted to "locking" by removing "stop plate."

"RS-SWITCH"

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or non-locking action.

"MULTI-SWITCH"

Features choice of switching functions. 1 to 37 stations possible, single frame or ganged assemblies. Illuminated or non-illuminated buttons.

Illustrated are representative parts of the regular line. Send for Catalog No. S-58. Inquiries on custom-made components will receive prompt attention. Switchcraft components are carried by all leading Radio Parts Jobbers.

TRAVELING WAVE TUBE SOLENOIDS

Anodized aluminum for lightest weight

Choice of foil or wire, aluminum or copper for optimum design

Air cooled or liquid cooled by any of the new coolant materials

Designed for your system to military or commercial specifications.

Conferences between system designers, tube manufacturers, and solenoid engineers result in best possible designs. Most of the tube manufacturers welcome these conferences since this may make the best possible use of tubes in systems.

CURRENT REGULATED POWER SUPPLIES

Laboratory models from 500 watts to 10 kilowatts

Specially designed units for military or commercial systems

Five to one current adjustment with one small potentiometer

ELECTROMAGNETS and SPECIAL FOCUS COILS

Designed and built to your commercial or military specifications

Producing a wide variety of quality products while meeting on-time delivery schedules is the most challenging of modern business problems. Too frequently you, the customer, must choose between quality and delivery to meet your own commitments in this complex missile age. Statham Instruments, Inc. is proud of its performance record in meeting both quality *and* delivery demands simultaneously. We invite your challenge to "prove it" on any precision instrument problem. *Statham Instruments, Inc. / 12401 W. Olympic Blvd., Dept. IR / Los Angeles 64, Calif.*

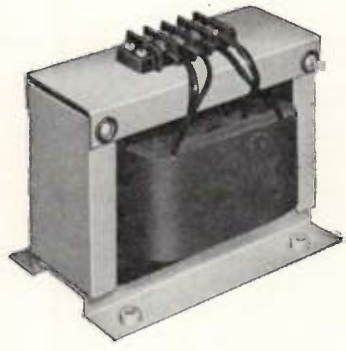
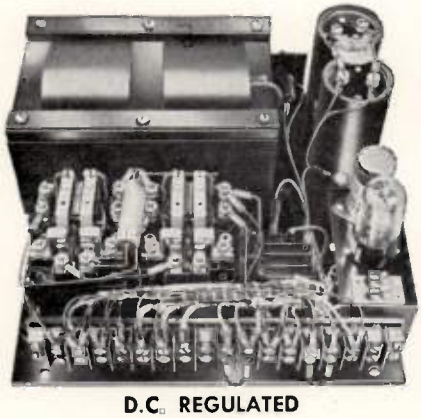
HIGH FREQUENCY
AVIATION TRANSFORMER



HIGH TEMPERATURE
TRANSFORMERS

If you need transformers or other components for an application where quality performance and long life are essential factors, then get in touch with Acme Electric engineers.



If you need engineering help with a design, we have a staff of qualified engineers to assist you. If you need quantity production quickly, we have every modern facility and carry large stocks of basic supplies to ship your production requirements as your needs demand. And, with our modern production equipment, experienced assemblers, we quote prices that are usually competitive.

MINIATURES

When you need transformers or other electronic assemblies for special purposes, Caledonia offers:

1. Engineers, experienced in communications circuitry and transformer design, who know how to *design* for special problems of weight, size, temperature, high voltage, etc.
2. A streamlined plant, equipped to *produce* your specialty in the quantity you want.
3. Strict standards of quality control, with complete facilities to *test* the product in our plant, including facilities for qualification tests in accordance with MIL-T-27A.

CONTROL REACTORS

RATED TO FIT YOUR JOB...

A standardized line of control units, each designed to do *one* job better, and at less cost!

The curves show the principle, but for complete performance data write for CMC's manual.

"A Look Inside Tomorrow's Engineering." An easily read control manual with all data charted and described. Get yours!

ELECTRAN Transformers

Transformers, Saturable Reactors, Chokes, Special Windings and Electronic Devices. Milliwatts to 50 KVA, single or polyphase in all frequencies.

Complete design and engineering service. All modern techniques, encapsulation, casting, military and commercial construction.

And, we've got one asset you'll find especially helpful: WE *TRY* HARDER!

Per Mil-T-27, EIA and ASA Specifications

Moloney engineers are pioneers in the use of grain-oriented, high permeability, silicon steel for transformer cores. This engineering background and experience enables the Moloney Electric Company to produce highest quality transformers that offer the maximum in reliability, endurance and efficiency with a minimum of size and weight.

HIGHLAND ENGINEERING

- **TRANSFORMERS**
- **CHOKES**
- **ASSEMBLIES**

for all Industrial and Electronic Applications. Open or cased. Capacities 5VA-50 KVA. Specializing in quality, service and delivery on Transformers and Inductors to suit your particular requirements. Special units built from standard parts at competitive prices and deliveries. MIL-T specifications.

Send us details of your specifications or requirements which will have our prompt attention.

W. R. SPITTAL & STAFF

HIGHLAND ENGINEERING CO.

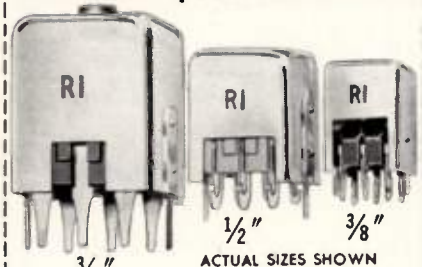
RI·tran

I. F. TRANSFORMERS for TUBE application



wired or printed circuit

Simplified design uses one-piece coil forms, with Koilock teeth. All wiring attachments made above base. For diversified circuit applications, including 1500 K.C. I.F., A.M. I.F., F.M. I.F., Discriminator, Ratio Detector and Video I.F.

I. F. TRANSFORMERS for TRANSISTORIZED application

wired or printed circuit

ACTUAL SIZES SHOWN

Radio Industries has engineered these transformers to cover ranges of unloaded "Q" from 45 to 200, with shunt capacities ranging from 65 to 470 and match impedance requirements.

VARIETY OF TERMINAL LUGS

TRANSFORMERS FILTERS·SERVO AND MAGNETIC AMPLIFIERS

Made to Military and Commercial Specifications for 60, 400, 1000 cycles and other frequencies. Cased and potted or cast in resin.

Power and Audio Transformers; Magnetic Amplifiers; Modulators; High Pass, Low Pass, Band Pass and Band Rejection Filters.

Consult us for Special Designs, Applications and Subminiaturization. Protctypes given immediate attention.

CUSTOM DESIGNED TRANSFORMERS *for* RELIABILITY

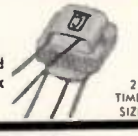
HERMETIC
Ceramic compression terminals. Stud type mounting. Schematic. Baked enamel finish, MIL-T-27A.

ENCAPSULATED HIPERSIL
Bracket mounting. Epoxy impregnation and coating. Resists environmental extremes.

SUB-MINIATURE MIL CASE
Hermetic. Ceramic compression terminals. 3/4" x 3/4" x 1 1/8" H. Wt. 1 1/8 oz. MIL-T-27A Grade 4, class R.

MINIATURE MOLDED
Epoxy cast. Resists environmental extremes. For plug-in printed circuits. .040 pins 7/8" x 1 5/32" x 7/8" H. Wt. 1 3/4 oz.

ENCAPSULATED POWER
Bracket mounting. Used in portable equipment where terminals must be brought out from Transformer.



HIGH TEMPERATURE OPEN FRAME
For Airborne Applications, Teflon, Mylar, and Silicone insulations used. Flat bracket mounting.

HERMETIC
High compression glass bead terminals. Rectangular flange mounting. Full schematic information.

ULTRA-MINIATURE (UM-F)
Resin impregnated. 4" color coded leads for dip soldering. Size 3/8" x 3/8" x 3/8". Wt. .08 oz.

Need a **PROVEN** tube that indicates and counts?

dekatron*

The only cold-cathode glow transfer counting tube **WITH OVER 10 YEARS OF SERVICE RELIABILITY AND PERFORMANCE.** Simple circuitry. Electronic speed and accuracy up to 20,000 counts/sec. For counting, sorting, programming, unit flow, packaging and many other applications. Continuous visual reference to total count. For detailed information, request Technical Data Sheet IC4001.

High Gm Tetrode—From LM Ericsson!

The type 7150 is a tetrode for use from audio frequencies up to about 300 Mc/s. It may also be used in a triode connection, where it is very useful as a low noise input amplifier. Below are partial characteristics for typical operation.

Tetrode Operation	
Heater Voltage	6.3 volts
Heater Current	450 milliamps
Plate Supply Voltage	135 volts
Cathode Bias Resistor	260 ohms
Plate Current	26 milliamps
Transconductance	34,000 umhos
Triode Operation (grounded grid)	
Heater Voltage	6.3 volts
Heater Current	450 milliamps
Plate Supply Voltage	125 volts
Cathode Bias Resistor	33 ohms
Plate Current	34 milliamps
Transconductance	47,000 umhos.

For complete information write LM Ericsson's U.S. agents

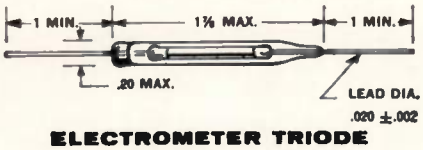
NOTE: 1: 1% and 2% tolerance available only below 20 meg.
2: 1%, 2% and 5% tolerance available only below 100 meg.
3: 1% and 2% tolerance available only below 100 meg.

DIMENSIONS

HI-MEG RESISTORS

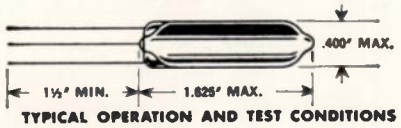
GLASS SEAL: HI-MEGS are vacuum sealed in a glass envelope which is treated with a special silicone varnish which keeps the resistor relatively free from the effects of moisture.



RESISTANCE: HI-MEG resistors are available in values from 10^8 to 10^{14} ohms.

TOLERANCE: HI-MEG resistors can be supplied in the following tolerances: 1% below 10^{12} ohms, 2% and 5% below 10^{13} ohms, and 10% over the entire range.

MAXIMUM WORKING VOLTAGE: 1000 volts.



MAXIMUM OPERATING AMBIENT TEMPERATURE: 100° C.

POWER RATING: The power rating for any HI-MEG resistor is equal to one divided by the resistance in megohms.

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into four fundamental indexes into which 100 basic classifications have been organized.

For detailed identification, these 100 products and services, grouped in the 4 indexes, are further defined into 852 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Communications" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is four directories in one

POWER TUBES
Planar-Lighthouse Types

Class of Service	Frequency for Max. Ratings —Megacycles	Typical Performance
Class A RF Amplifiers		
GL-2C40	3370	8.5 db noise, 15 db gain at 700 mc
GL-2C40-A	3370	8.5 db noise, 15 db gain at 700 mc
Class A_1 Amplifiers		
GL-6299 (ceramic)	3000	13.2 db noise, greater than 10 db gain 8.2 db noise at 1200 mc, greater than 15 db gain 4 to 5 db noise at 400 mc, greater than 17 db gain
Class C RF Amplifiers and CW Oscillators		
GL-2C40	3370	0.075 watts output
GL-2C40-A	3370	0.075 watts output
GL-2C43	1500	frequency multiplier service—tripling to 300 mc two tubes in push-pull—4.4 watts output
GL-6442 (ceramic)	2500	2.0 watts output
GL-6897 (ceramic)	2500	17 watts output 40 watts output at 500 mc
Plate-pulsed Power Oscillators		
GL-2C40-A	3370	300 watts peak output at 3000 mc
GL-2C43	3370	1.75 kilowatts peak output
GL-6442 (ceramic)	4000	2.0 kilowatts peak output at 3500 mc

For application assistance and for delivery and price information on the above types and on other G-E Power Tubes, call or wire your Power Tube representative.

EASTERN REGION SALES OFFICE
General Electric Co.—Power Tube Sales
200 Main Avenue, Clifton, N. J.

One Source for All Your Requirements

Raytheon, world's largest manufacturer of magnetrons and klystrons, offers the widest selection of microwave oscillators in the industry, including selected traveling wave tubes and reliable combinations of magnetrons and klystrons. This leadership results in mass production economies which mean important savings for you.

The list shown on this page includes only part of the tube selection available to you.

Contact Power Tube Sales for further details on any of the above types and classified and developmental types not yet listed. Complete Magnetron, Klystron and Special Tube Data Booklets available on request.

Also Available—A line of Backward Wave Oscillators, Traveling Wave Tubes, Storage Tubes and Other Special Types.

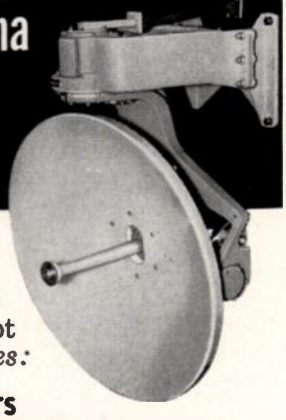
Constant Current
1 μa to 30 amps

- Rapid manual or automatic switching to desired current levels.
- High accuracy and stability.
- Current can be electronically switched, pulsed, swept, modulated and programmed.

Ideal for Rapid Testing of:

- Semiconductors
- Electromagnetic Components
- Other Current-Sensitive Devices

- Model CG-1 1 ma — 600 ma
- Model CG-11 Transistorized .05 — 5 amps
- Model CG-12 Transistorized .5 — 30 amps



For further data, write for Bulletin E-1M

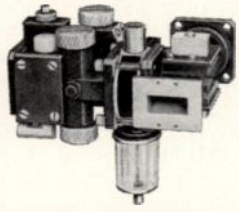
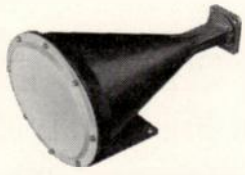
Complete line of Microwave Components

From Magnetron Through Antenna Designed and Produced by Airtron INC.

Whether it is "Standard" plumbing or designing an entirely new waveguide system, Airtron's *complete* facilities can substantially reduce the time and expense between concept and reality. *Here are just a few examples:*



FERRITE COMPONENTS
Duplexers, waveguide switches, high and low power load isolators, variable absorption attenuators and other devices are the result of a continuous ferrite development program. All ferrite materials used are specially compounded and fired in Airtron's Ferrite Research Development Laboratory. Complete facilities permit design and production to meet any specific need.



ROTARY JOINTS. Waveguide rotary joints of the coaxial or high power circular waveguide type in many frequency ranges designed for maximum VSWR performance. Produced in volume to your specifications or designed to meet your requirements.

WAVEGUIDE SWITCHES. For frequent, rapid switching to or from noise sources, signal generators, dummy loads, etc. Reversing switches for dual channel systems in GCA or microwave relay radars. Low VSWR, excellent crosstalk characteristics, and high peak power performance. Switching tees, ferrite switches and other special designs.

PRECISION CAST BALANCED MIXERS. Low noise figures over a broad bandwidth are achieved by compact balanced mixer design and use of latest type crystals. Equipped with coaxial or waveguide crystal mounts for frequencies up to 40,000 mc. Standard and special types available. Mixer-Preamp packages designed to meet your requirements.

ANTENNAS AND ASSOCIATED COMPONENTS. Horn antennas and feeds for fire control, countermeasure, guided missile, navigational or weather radars. Designed to your specifications and produced in the Airtron precision casting foundry. Complete with rotary joints, flexible sections and associated waveguide assemblies.

FLEXIBLE WAVEGUIDE ASSEMBLIES. Flexible double ridge waveguide for airborne commercial weather radar. Beryllium copper flexible in convolute or type S construction. Waveguide sizes from Ka-Band to 9.750" x 4.875" I.D. in standard lengths or preformed to your installation.

OTHER AIRTRON PRODUCTS

Twists, Magnetron Transitions • Double Ridge Waveguide Components • RF and Pressure Contact Flanges and Gaskets • Quick Disconnects • Directional Couplers • Short-Slot Hybrids • Antenna Components • Test Horns • Dummy Loads • Flexible Coaxial Transmission Lines • Waveguide Bending and Twisting To Your Specification •

TEST EQUIPMENT

STANDING WAVE AMPLIFIER

- RANGE: 60 db
- INPUT ATTENUATOR: 50 db. in steps of 5 or 10 db.
- SENSITIVITY: 1 microvolt across 200 ohms
- AMPLIFIER FREQUENCIES: Wideband, 400 cycles tunable ±5%, 1000 cycles tunable ±5%
- AMPLIFIER: Q 25 ±5
- METER SCALES: VSWR 1-4, VSWR 3-10, DB 0-10
- SIZE: 14¼" d, 8½" w, 10½" h
- PRICE: $195.00.

WWV RECEIVER

- FREQUENCIES: 2.5, 5.0, 10.0, 15.0, 20.0, 25.0 Mc
- SENSITIVITY: better than 1.0 microvolt for standard output
- SELECTIVITY: 10 Kc.
- INPUT: dual
- OUTPUT: 600 ohms and self contained speaker
- TUNING EYE: zero beat indicator
- SIZE: 14¼" d, 8½" w, and 10½" h
- PRICE: $195.00.

SWEEP OSCILLATOR

- Amplitude Stabilized
- 2.5-7.5 Mc 7.5-25.0 Mc
- 2.5-25 Volts output

TELEMETERING TRANSMITTERS

TWO CHANNEL • FREQUENCY: 215-235 Mcs. • POWER OUTPUT: 50 Watts Peak • SIZE: 5½" dia. 4¼" long

MICROWAVE COMPONENTS

Designed—Manufactured by Gorham

One source for design, consultation and quality-controlled manufacturing services for your specific requirement . . . from individual waveguide components to basic designs for microwave antennas and systems.

Custom Manufacturers of:

- CAVITY TYPE TUNERS • SLIP RING ASSEMBLIES
- CAST MICROWAVE COMPONENTS
- FABRICATED WAVE GUIDES
- ELECTRO MECHANICAL ASSEMBLIES

GORHAM MANUFACTURING CO. *Industrial Division Providence 7, R. I.*

WAVEGUIDE SECTOR SCAN ROTARY JOINTS

LIECO announces a series of Step Twist Rotary Joints for scanning a ± 90° sector. These sector scan joints are broadband, covering the entire usable waveguide frequency band (approximately 40%). The maximum VSWR is below 1.15. For narrower bandwidths the VSWR can be held well below 1.10. The sector scan joints are short, have input and output on the same axis and are capable of being pressurized. LIECO is producing these units in all standard waveguide sizes in the frequency range from 2.60 to 40.0 kmc. The joints can be supplied fabricated from either brass or aluminum. Sector Scan Joints for particular requirements will be produced to your specifications.

SPECIFICATIONS

MODEL NO.	WAVEGUIDE RG-( )/U	TERMINATING FLANGES CHOKE UG-( )/U	TERMINATING FLANGES COVER* UG-( )/U	FREQUENCY BAND kmc/s.	APPROX. LENGTH Inches
27EI	48	54A	53	2.60-3.95	6 7/8

1959 IRE DIRECTORY

DIRECTORY III CONTROLS & INSTRUMENTS

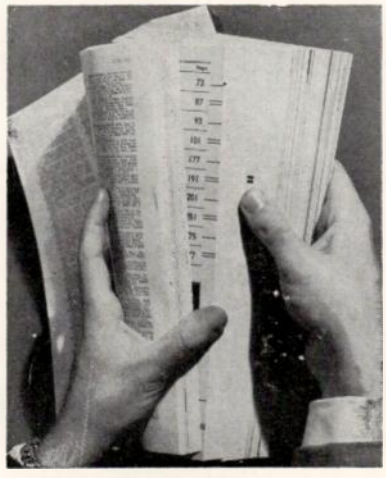
16 major groups
160 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications
II. Components
III. Controls & Instruments
IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 852 subproducts in alphabetical order, consult the pink section preceding page 1.



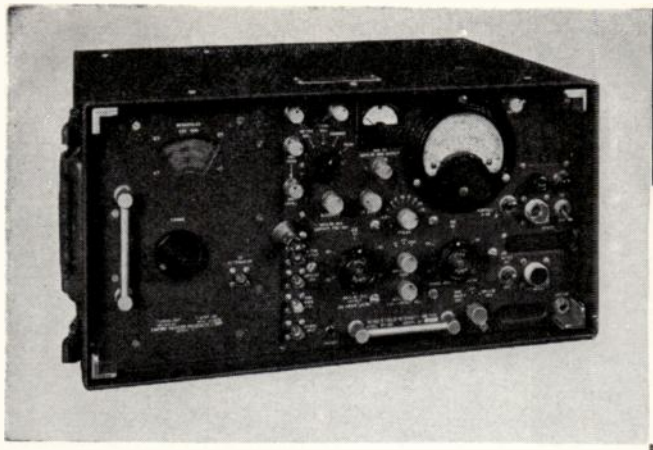
The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 141, 241, 275, 461, and 519.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!



LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

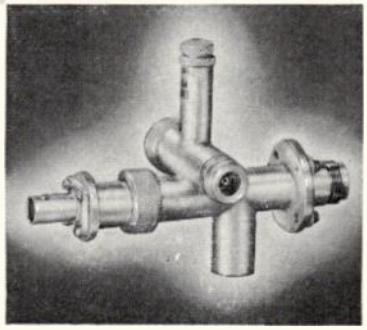
Empire's Reputation is built on Quality

AMPLITUDE MODULATION METER, Model MM-120

(Commercial equivalent of AN/USM-65) 15 KC to 1000 MC

Two quick change tuning heads • Measurement of modulation depth and envelop distortion of signal generators and transmitters • Measures levels as low as 0.01 volts • Full scale reading, 30%, 50% and 100%.

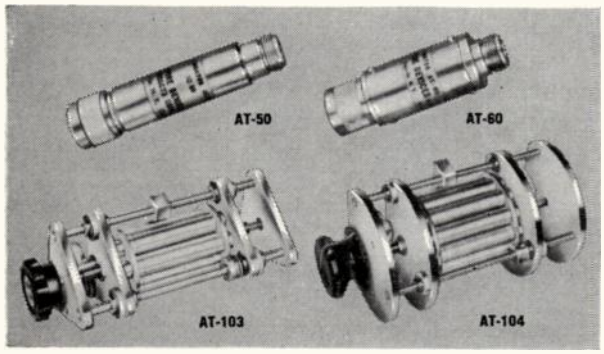


NOISE AND FIELD INTENSITY METER, Model NF-105

(Commercial equivalent of AN/URM-7) 150 KC to 1000 MC

Four quick-change tuning heads • Single knob tuning for easy scanning Built-in impulse generator serves as calibrator • Carrier and peak reading VTVM • Aural slideback • Coaxial step attenuators • Regulated "A" and "B" supply.

NOISE AND FIELD INTENSITY METER, Model NF-112



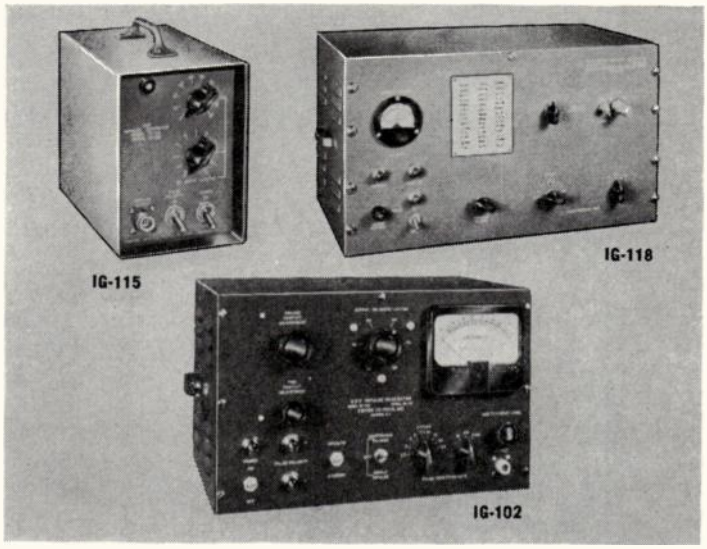
1000 MC to 10,000 MC

COAXIAL CRYSTAL MIXER, Model CM-107

Broad Band, Fixed Tuned • 225 MC to 5600 MC in 8 models • Input and L.O. VSWR better than 2 to 1 • L.O. rejection at IF output better than 30 DB.

CRYSTAL DETECTOR, Model DT-123

UHF ATTENUATORS, Models AT-50, AT-60



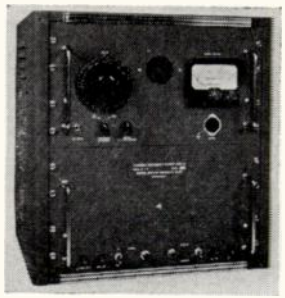
50 ohm resistive T-networks of concentric line construction.
FREQUENCY RANGE:
AT-50: DC to 4000 MC.
AT-60: DC to 3000 MC.
VSWR: Better than 1.2 at all frequencies.
ACCURACY: ±½ DB.
RATED POWER:
AT-50: 1W continuous, 1KW peak
AT-60: 2W continuous, 2KW peak

STEP ATTENUATORS, Models AT-103, AT-104

These units use AT-50 pads in 6 step and 12 step coaxial turret arrangements respectively.

UHF ATTENUATOR PANELS Model AT-106

Attenuator panels — high attenuation with fine resolution.



UHF IMPULSE GENERATORS, Models IG-102, IG-115, IG-118

Model	Flat Spectrum (±½ DB)	Peak Output Level	Repetition Rate
IG-102	10 KC to 1000 MC	70,000 μV/MC	2.5 to 2500 cycles
IG-115	10 KC to 1000 MC	100,000 μV/MC	60 cycles
IG-118	100 MC to 10,000 MC	9,000 μV/MC	2.5 to 2500 cycles

VARIABLE FREQUENCY POWER SUPPLIES, Models VP-410, VP-1000

POWER OUTPUT: 400W, 1000W respectively
VOLTAGE REGULATION: 2%, no load to full load
HARMONIC DISTORTION: 5% maximum, total

POWER DIVIDERS, Model PD-90

FREQUENCY RANGE: 800 to 10,000 MC in 5 models

Send for our Catalog No. N-357

EMPIRE DEVICES PRODUCTS CORP.
AMSTERDAM, NEW YORK
VICTOR 2-8400

MANUFACTURERS OF:
FIELD INTENSITY METERS • DISTORTION ANALYZERS • IMPULSE GENERATORS • COAXIAL ATTENUATORS • CRYSTAL MIXERS

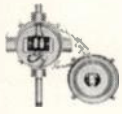
HUGHEY and PHILLIPS, INC.

Specialists in Obstruction Lighting Equipment and Controls

BEACON OBSTRUCTION LIGHTS, designed to meet specifications of CAA, FCC, and Canadian DOT.



300MM Beacon | Single Obstruction Light | Double Obstruction Light

You'll find Hughey & Phillips have obstruction lights for every job. The engineering of each light offers maximum efficiency and simplified installation and maintenance. Whether you need bottom or side entrance conduit fitting types, there is a model to meet your requirements.

SPECIAL CAST ALUMINUM WATERTIGHT JUNCTION BOXES, offering a wide choice in types of terminals, cable support, and factory installed screw cap receptacles.

Hughey & Phillips have pioneered in the use of adequate junction boxes with proper terminals, and built in cable support to meet NEC requirements.

Box with terminals, cable support, and receptacle in cover. ⟶

⟵ Box with factory installed screw cap receptacles.

Box with ⟶ special terminals and cable support.

SPECIAL CONTROL UNITS, designed for both indoor and outdoor installation.

- Photo-Electric Control Units
- Beacon Flashers
- Combination Photo Control & Beacon Flashers
- Lamp Failure Indicator System
- Controls with Autotransformer system . . . pioneered by Hughey and Phillips for tall towers . . . increases lamp life.

Photo Control, three circuit flasher, with autotransformers. (outdoor housing)

MICROWAVE TOWER LIGHTING CONTROL

Special control and alarm systems for unattended stations

- Photo-Electric Control
- Beacon Flasher
- Lamp Failure Alarm

Photo control, flasher and Lamp Failure Alarm

Complete kits for: Tower Obstruction lighting, sleet melter power and control. SPECIAL KITS prepared to meet your individual requirements.

Send for descriptive literature

When your plans specify tower lighting . .You should specify

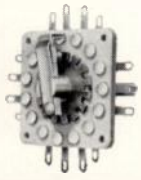
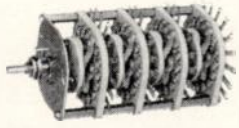
Shallcross

PRECISION WIREWOUND RESISTORS



Small, Shallcross "P-Type" encapsulated resistors offer unmatched stability and reliability for critical applications. All are reverse-pi wound on multiple-section epoxy resin bobbins, then hermetically-sealed in a tough epoxy coating.

"P-Type" resistors are offered in a complete range of commercial and military types with radial leads, axial leads, or lug terminals. Military types meet or exceed MIL-R-93A (85°C ambient) and MIL-R-9444 (125°C ambient) requirements—including salt water immersion tests. Standard tolerances—1%, 0.5%, 0.25%, 0.1%, and 0.05%. Close tolerances and matched pairs a specialty. *Write for Bulletin L-30.*



ROTARY SELECTOR SWITCHES

STANDARD SWITCHES

Single-Pole, instrument-type switches using silicone-impregnated steatite or phenolic decks. ¼" laminated silver or solid brass contacts and multiple-leaf wiper arms. Positive, long-life ball-bearing detent. Up to 4 decks. Many optional special features. *Bulletin L-31.*

OVAL CERAMIC SWITCHES

Assembled by Shallcross from stock, interchangeable parts, the "12,000" Series offers custom-built quality without the delay and cost of specials. Solid silver contacts and collector rings on steatite decks. 0.0025 Ω contact resistance. 1 to 3 poles per deck, up to 10 decks. Adjustable stop. Optional detent. *Bulletin L-32.*

MINIATURE SWITCHES

Only 1¾" square by 1" deep for first deck, ⅝" for additional decks. Silver alloy button contacts and multi-leaf wipers maintain low contact resistance. Glass fibre Silicone-laminate decks for outstanding humidity, moisture and salt-spray resistance. 1 to 4 poles per deck. 1 or 2 hole mounting. Easily-positioned, adjustable stops. *Bulletin L-45A.*

BRIDGES

Field & Lab Types for Precise DC Resistance Measurements . . . 1 micro-ohm to 10^6 megohms.
Bulletin L-19B

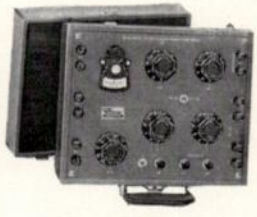
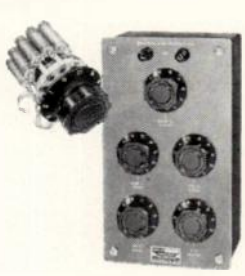
6101



617 series

6320



638-R

Model Number	Measurement Accuracy	Maximum Setting	Minimum Setting	Circuit	Special Features
6100	±0.1% +0.01Ω (.1Ω to 1.011 MegΩ)	1.011 MegΩ	0.001Ω	Fault Location—Wheatstone	Fault Location by Murray, Varley, Hilborn & Fisher Loop Tests.
6101	±0.1% +0.01Ω (1Ω to 11.11 MegΩ)	11.11 MegΩ	0.001Ω	Wheatstone	Four dial rheostat usable as decade box.
6320	±0.02% +0.01Ω (1Ω to 11.11 MegΩ)	111.11 MegΩ	0.000001Ω	Wheatstone	Most accurate five dial Shallcross bridge for direct resistance measurement.
	±0.05% to ±20% on separate "+" and "—" percent selectors. (1Ω to 10 MegΩ)	11.111 MegΩ	0.0001Ω	Percent Limit	Rapid "GO-NO GO" percent limit testing. Built-in adjustable comparison standard.
638-R	±0.75% or better (.001Ω to 1Ω)	11.11Ω	0.000001Ω	Kelvin	Overlapping Kelvin and Wheatstone ranges selected with single ratio dial.
	±0.2% +0.01Ω (1Ω to 11.11 MegΩ)	11.11 MegΩ	.001Ω	Wheatstone	
6350	±1%, (10Ω to 10 MegΩ) ±2%, (10 MegΩ to 10,000 MegΩ) ±5%, (above 10,000 MegΩ)	1.111×10^6 MegΩ	0.01Ω	Wheatstone with d-c Amplifier	Modular construction dual range power supply, null indicator-amplifier, for 115V. 60 cycle operation.
617 Series	±0.1% to ±20% on separate "+" and "—" selectors from a minimum resistance consistent with number of dials in use to the maximum settings.	111,111Ω 1,111,110Ω 11,111,100Ω	0.1Ω *1Ω 10Ω	Percent Limit	For rapid "GO-NO GO" percent limit testing. Hand or foot operated for production testing. All models also usable for direct resistance measurements. Binding post for external d-c power supply.
	†±0.2% +0.01Ω from a minimum consistent with number of dials in use to the maximum setting.	111,111Ω 1,111,110Ω 11,111,100Ω	0.1Ω *1Ω 10Ω	Wheatstone	

† Except 617B and 617J ±0.1% ±0.01Ω. * Except 617G, 0.01Ω.

DECADE RESISTANCES

Available as single unmounted decades or as complete decade resistance boxes with 1 to 6 dials. Steps as low as 0.01 ohm; total resistance as high as 11,111,100 ohms.

Remarkably rugged and accurately-calibrated for maintained stability in rough lab, classroom and production line work. Uses impregnated Shallcross precision wirewound resistors mounted on steatite switch decks. Large button contacts of silver or brass. *Write for Bulletin L-17A.*

DECADE VOLTAGE DIVIDERS

Laboratory-type voltage dividers used in bridge circuits, for measuring rotary potentiometer linearity, in synchro-test delta bridge circuits, and in other uses requiring maintained accuracy and high resolution. Kelvin-Varley or Potentiometer circuits available in eight 4 and 5 dial models.

Impregnated Shallcross precision wirewound resistors used throughout. Steatite instrument switches assure uniformly low contact resistance. *Bulletin L-16B.*

THE COMPLETE PACKAGED
VecTroL®
Thyratron Grid Control

Available from Stock
- Patented supersensitive circuitry avoids need for preamplifier
- 1 Package controls 1 or 2 thyratrons
- Failsafe—No bias needed
- 4 isolated D.C. control windings
- Insulation tested at 1500-2500 volts

All Thyratron Control Applications
- Motor and generator controls
- Regulated power supplies
- Servoamplifiers
- Electronic temperature controls
- Process control instrumentation
- Automation speed program controls

PRECISION COUNTING DEVICES

MINIATURE DECIMAL COUNTER 2416
Decimal indications from 000 to 999 with return to 000. Reversible and continuous rotation. Speed: 1500 rpm max. int., 500 rpm cont. Torque: .2 in.-oz. at 20°C. Wgt.: .5 oz. Specifications are typical, and may be changed to suit requirements.

Bowmar designs and produces precision counting devices of all types and in all quantities to customer specifications. Miniature size, unusual configurations, light weight and high speed operation are features most often designed into Bowmar counters. Applications, although unlimited, generally include navigational, fire control, missile tracking and computing systems.

BUILD YOUR SYSTEM
with 3C-PAC® Digital Modules

- All PACs are transistorized, compact, low power, plug-in, printed circuits.
- M-PACs: DC to 100KC modules. Flip-flops, pulse amplifiers, gates and associated static circuits. Write for illustrated 20-page Catalog M.
- T-PACs: One megacycle modules. Dynamic circuits, plug-in power supply. Series includes a random access magnetic core memory. Write for illustrated 16-page Catalog T.
- Computer Control offers complete services for problem analysis and digital system design, construction, programming and operation.

5-Megacycle Digital Test Equipment Offers Flexibility for Years of Service . . .

Transistorized Models Include:

Inverter — 102
Diode — 110
Flip-Flop — 201
Delay — 301
Clock — 401
Pulse Amplifier — 601
Pulse Generator — 410
Tube Pulser — 650
Level Amplifier — 666
Relay — 801

All models use the same power voltages (−3v, −15v and +10v) thus allowing any arrangement of building blocks in the mounting panel. All logical signals are available on the graphic front panels. Logical interconnections are made with patch cords using miniature stacking banana jacks. Standard power connections are made from the back.

The outstanding flexibility of DEC Building Blocks makes them useful for many types of computer applications.

DEC Catalog contains complete descriptions and prices. It is available from:

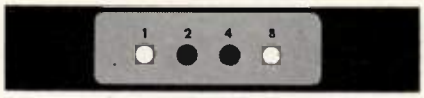
DO YOU WANT TO...

GENERATE PULSES



DELAY PULSES

WIDEN PULSES

REGISTER PULSES

COUNT PULSES

SUM PULSES

DO BINARY LOGIC

DRIVE TRANSISTOR CIRCUITS

The logic functions are built into miniaturized 2¼" x 10" slide-in units. Most units contain 10 functions or stages — others at least three. They are all designed to work together, and are easily interconnected by simple patch cords at the rear of the units. Operating rates are up to 200 K.C.

A single regulated power supply can handle up to 15 units, and fits into the small portable rack. Only two voltages (- 10V, - 20V) are required for the system operation.

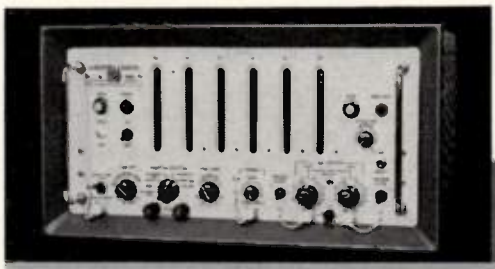
NORTHEASTERN ENGINEERING

ELECTRONIC COUNTERS with ADVANCED DESIGN



MODEL 14-20A

VERSATILITY achieved by plug-ins which: extend frequency range — increase sensitivity — measure time intervals.

FEATURES — Accuracy as high as 1 part in 1,000,000 ± 1 count using internal oscillator. Stability long time 2 parts/million/week
short time 1 part/million/day

MEASURES Frequency — time intervals — periods — time and freq. ratios — freq. drift — — total events — regular or random pulses.

10 MC Direct Reading, with frequency measurements to 220 MC made simply and with extreme accuracy with plug-in converter.

14-20A Basic Unit
14-21 Converter 100 MC
14-22 Converter 220 MC
14-23 Video Amplifier
14-24 Time Interval

Price on application

MODEL 13-20

MEASURES Frequency — time interval — periods — time and frequency ratios — frequency drift — total events — regular or random pulses.

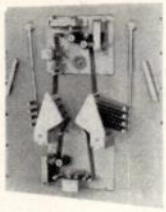
VERSATILITY — provisions for printer readout; scope connector; marker pulse output from 0.0001 to 1 sec in steps of ten; secondary standard output frequencies 10 cps; 1 KC, 100 KC and 1 MC.

Price on application.

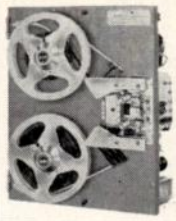
1.1 MC DIRECT READING with automatic placement of decimal point, no interpolation.

FEATURES — self checking of counting and gating circuits; Accuracy ± 1 count; stability 1 part in 10^4; period measurements 0 to 50 KC; time interval measurements 3 microseconds to 100,000 seconds.

PLUG-IN DECADE COUNTERS



MODEL 140-40	Max rate: 40 kc. Input: neg 50-150 v. Power: 6.3 vac @ 1.2 a; 300 vdc @ 9 ma.
MODEL 140-100	Max rate: 100 kc. Input: neg 70-180 v. Power: 6.3 vac @ 1.2 a; 300 vdc @ 14 ma.
MODEL 140-1100	Max rate: 1.1 mc. Input: neg 20 v. Power: 6.3 vac @ 1.2 a; 300 vdc @ 47 ma.
MODEL 120-100	Preset, 100 kc max rate. Input: neg 70-180 v. Power: 6.3 vac. @ 1.5 a; 300 vdc @ 17 ma



Price on application

NEW CONTROLLED TEMPERATURE EQUIPMENT by Hotpack

CONTROLLED ENVIRONMENTAL ROOMS

Heated • Humidified
Dehumidified • Refrigerated

• Standard sizes and temp. ranges • Controlled air velocity — Simulated sunlight — Special furniture • Controlled temp. to 100°C within ± ½°C • Controlled temp. to 0°C within ± ½°C • Controlled humidity to 98% RH within 2% • Controlled dehumidity to 3% RH within 2% • Chamber 16 sq. ft. — 150 sq. ft. — 7 ft. high.

Controlled Humidity and Temperature Oven

Two temperature ranges —
35°C to 100°C ± ½°C
0°C to 100°C ± ½°C
20%-98% RH within 5% RH

• Four sizes available • Designed for pilot plant, laboratory and industrial testing of chemicals, plastics, metals, electrical insulation, packaging, etc. . . meets rigid government specifications!

Forced Draft Oven

Improved temp. range —
35°C-280°C within ±½°C
±1°C of the control temp.

• 3 heat switch—no temp. "overshoot" or "undershoot" • Exclusive visa-glass instrument cover protects control dials • Compact, Speedy come-up time plus ease of operation

Recirculating Oven

New working range —
finger tip control
from 100°F to 1000°F!

• Indicating-control ing thermostat • Super insulation • Limistat-overtemperature protection • Stainless steel interior • Four sizes available

ENVIRONMENTAL
TESTING
FACILITIES

with complete engineering "know-how"

ALTITUDE HUMIDITY
TEMPERATURE RAIN
VIBRATION SUNSHINE
ACCELERATION SHOCK
SALT SPRAY FUNGUS
EXPLOSION IMMERSION
SAND AND DUST
RADIO NOISE

General Testing Laboratories offers you these advantages:

1. Our competent staff of engineers and technicians, are available for analyzing and helping you with your environmental testing requirements, in compliance with industrial and Government specifications including MIL-E-5272A and related tests.

2. To assure accurate and dependable tests, our modern, up-to-date facilities are devoted exclusively to giving quick service and reliable data for the proving of your products under any weather and environmental condition.

Phone or write today for a personal discussion of your test problems.

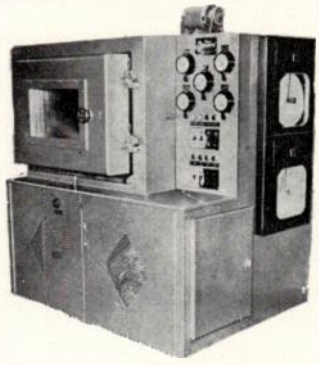
You can DEPEND on --



Standard
TEST CABINETS

FOR ACCURATE DEPENDABLE ENVIRONMENTAL TESTS

self-contained units to meet every condition

HIGH and LOW TEMPERATURES, ALTITUDE, HUMIDITY, FUNGUS, SAND and DUST, SALT SPRAY, RAIN and SUNSHINE, EXPLOSION and SPECIAL APPLICATIONS.

Every Standard test cabinet is designed for reliable and accurate testing, along with years of care-free durable operation. Whatever the simulated condition is desired to test your product accurately . . . correctly, there is a Standard cabinet to do the job. All guaranteed to give high level performance — the result of a decade of engineering skill and experience in designing and fabricating test equipment. Why not look into the many outstanding features offered by Standard today . . . send for our illustrated Catalog No. 59.

NEW

General Purpose Transistor Test Set — KP-2

with Semiconductor Regulated Power Supplies for ease of operation

For **LABORATORY** research and quality control applications

- Common Base or Common Emitter
- Current Range — 100 μa to 1 amp. (special models to 2 amp.)
- Collector Voltage Range — 0 to 100 v.
- Frequency Range — 100 cps to 200 kc
- Direct measurement of h parameters plus α and β cutoff
- Meter indication of DC parameters, I_{CO}, I_{EO}, BV_{CER}, V_{EBF}

Designers of custom test equipment for specific applications (e.g., automatic and production test sets). B-A transistor test sets are designed by transistor circuit engineers.

Other Baird-Atomic Transistor Test Equipment Available:

TRANSISTOR TEST SET — GP-4

The transistor tester that measures: h parameters and equivalent T coefficients . . . NPN and PNP junction and surface-barrier transistors . . . grounded-base or emitter circuits . . . alpha and beta cut-off . . . I_{CO} . . . and C_C. Measurement frequency from 100 c.p.s. to 1 mc.

TRANSISTOR BETA h_{ie} TESTER — KT-1

Portable, lightweight transistor tester measures Beta h_{ie} and I_{CO}. Completely self-contained with a transistorized 1 kc oscillator and batteries, featuring printed-circuit construction and meter overload protection.

Two transistor sockets — one standard sccket for in-line or JETEC cases, plus easy insertion socket for long lead transistors.

ALSO: Minority Carrier Lifetime Test Set

Semiconductor Resistivity Test Set

For specific applications, modified versions of standard instruments are available.
Write for complete technical information.

HIGH POTENTIAL Tests

Leakage . . Breakdown . . Shorts with HYPOT®

Test to 150 KV, DC or AC. Measure leakage, detect shorts, and forecast insulation breakdown. Meet applicable MIL and ASPM requirements. Safely protects personnel and equipment. Mobility for laboratory, plant, and field usage. Write your requirements. Models with special facilities supplied promptly.

Automatic Accept-Reject Tests
Leakage . . Breakdown . . Shorts

High potential AC tests to 10,000 V with HYPOT Jr. Visual and audible indications of breakdown. Leakage indicator light now adjustable, .3 to 3 ma. Ties into automatic test fixtures. Laboratory accuracy in portable, self-powered units. Write for bulletins.

Resistance to 50,000 Megohms Measured at 500 V-DC with VIBROTEST®

Insulation resistance under high potential, plus AC and DC voltage ranges. Self-powered VIBROTEST eliminates cranking, leveling, and needless weight. Write for application data and description of models.

Precision Ohmmeter - Direct Reading

For example, measure 1.2 ohms to an accuracy of 6 milliohms. Compensation for resistance of leads and clips, and for internal resistance of battery. Standard resistor built in for instant calibration. Multi-range, covering from 0-50 to 0-100,000 ohms. Write for bulletin.

***Special Instrumentation* for High Potential Breakdown Testing**

Your problem receives immediate attention at ARI, plus specialized facilities and 23 years' experience. Phone or write today.

BEC

INSTRUMENTS FOR LABORATORY and PRODUCTION

NEW SENSITIVE VOLTMETERS

DC MILLIVOLTMETERS

Model 97-A DC Voltmeter-Amplifier

- Range: 10 microvolts to 1000 volts
- Accuracy: 3% full scale
- Input Resistance: 10 megohms to 100 megohms

Price $325

Model 98-A Differential DC Voltmeter

- Range: 10 microvolts to 1000 volts
- Accuracy: 3% full scale
- Common Mode Rejection: 80 DB

Price $395

RF MILLIVOLTMETERS

- Range: Model 91-C—1 millivolt to 3 volts
  Model 91-CA— 0.3 millivolt to 3 volts
- Frequency Range: 50KC to 600 MC
- Accuracy: 5% to 200 MC
  10% to 600 MC
- High impedance probe and 52 ohm adapter
- 300 volt probe adapter available

Model 91-C Price $395
Model 91-CA Price $495

THREE TERMINAL

CAPACITANCE BRIDGE

- Cap. Range: .0002 mmf to 11,000 mmf
- Approx. Accuracy: ± (0.25% + .001 mmf)
- Measures direct or grounded capacitance and conductance
- Self-contained oscillator and detector
- Ideal for temperature coefficient measurements

Model 74-C Price $935

RF DISTORTION METER and VOLTMETER

- Freq. Range: Model 85-B—1 to 100 MC
  Model 85-C—0.1 to 6 MC
- Sensitivity: 60DB below 1 volt
- Input Impedance: approx. 50 ohms
- Same Voltmeter features as 91-C above

Models 85-B and 85-C Price $740

UHF GRID DIP METER

- Widest Freq. Range: 300 to 1000 MC
- Small, lightweight probe
- High sensitivity for both capacitive and inductive coupling
- Frequency Accuracy: ±2%

Model 101-B Price $275

Boonton ELECTRONICS Corp.

look what $24.50 buys in test equipment!

HEATHKITS GIVE YOU TWICE AS MUCH equipment for every dollar invested

The famous model V-7A Vacuum-Tube-Voltmeter is a perfect example of the high-quality instruments available from Heath at ½ the price you would expect to pay! Complete, only $24.50

Get the most out of your test equipment budget by utilizing HEATHKIT instruments in your laboratory or on your production line. Get high quality equipment, without paying the usual premium price, by dealing directly with the manufacturer, and by letting engineers or technicians assemble Heathkits between rush periods. Comprehensive instructions insure minimum construction time. You'll get more equipment for the same investment, and be able to fill your needs by choosing from the more than 100 different electronic kits by Heath. These are the most popular "do-it-yourself" kits in the world, so why not investigate their possibilities in your particular area of activity! Write for the free Heathkit catalog now!

Contains detailed descriptions of Heathkit models available, including VTVM's, scopes, generators, testers, bridges, power supplies, etc.

FREE catalog

Mail coupon below for your copy—Now!

Also describes Heathkit ham gear and hi-fi equipment in kit form. 100 interesting and profitable "do-it-yourself" projects!

PHAZOR Pat. Pend. PHASE METER MODEL 200A

$349.50 F.O.B. New York, N. Y.

Measures phase shift in transformers, amplifiers, filters, and phase displacement networks.

- Measures from 0 to 360 degrees.
- Readings not affected by noise and harmonics.
- Phase shifts of the order of .01 degree can be measured employing special circuit techniques.
- Measures in-phase and quadrature components separately.

Manufacturers of
PHASE METERS • NULL DETECTORS • IMPEDANCE COMPARATORS • POWER OSCILLATORS • VACUUM TUBE VOLTMETERS • FREQUENCY STANDARDS • AUTOMATIC HI-POT

MEASURING AND TESTING EQUIPMENT

As a member of the I. T. & T. system, Federal has drawn on world-wide scientific developments and engineering experience to assemble the finest domestic and imported electronic test instruments to extend the range of instrumentation beyond anything previously available. Federal instruments are not mere duplicates of existing equipment. Many unique design features set them apart and permit measurements to heretofore unobtainable levels of precision.

TERA-OHMMETERS

Type FT	Test Voltage	Resistance Range
H-4	Variable, 100 to 1,000 v.	20 MΩ to 5,000 TΩ*
H	Variable, 100 to 1,000 v.	2 MΩ to 500 TΩ
F2-500	100 and 500 v.	2 MΩ to 5 TΩ 10 MΩ to 25 TΩ
F3-500	100 and 500 v.	20 MΩ to 50 TΩ 100 MΩ to 250 TΩ
F2-10	10 and 100 v.	0.2 MΩ to 0.5 TΩ 2 MΩ to 5 TΩ
F3-10	10 and 100 v.	2 MΩ to 5 TΩ 20 MΩ to 50 TΩ
F2-3	3 and 100 v.	5,000 Ω to 0.15 TΩ 2 MΩ to 5 TΩ
F3-3	3 and 100 v.	50,000 Ω to 1.5 TΩ 20 MΩ to 50 TΩ
D-1	100 v.	0.2 MΩ to 0.5 TΩ
D-2	100 v.	2 MΩ to 5 TΩ
D-3	100 v.	20 MΩ to 50 TΩ

* 1 TΩ = 10^{12}Ω

VOLTMETERS AND POWER METERS

Type Ft	Description	Application	Frequency	Range
URI	Multimeter	General purpose measurements; AC, DC voltage, current, and resistance	DC-200 mc	AC-DC to 1,000 v. 10Ω to 1,000 MΩ .002-1 amp
URV	RF Millivoltmeter	Millivolt measurements through the UHF range	0.1 to 2,400 mc	3 mv. to 500 v.
UBM	Tunable Indicating Amplifier	Voltage indicator; Bridge detector	45 cps to 600 kc	1 μv.-100 v.
NRD	Microwave Power Meter	Accurate Measurement of UHF Power	DC to 3,200 mc	1 to 200MW

SIGNAL SOURCES

Type Ft	Description	Frequency Range	Accuracy	Max. Output
SBF	Wide Band Signal Generator	10 cps to 10 mc	1 %	10 v.
SMLR	Power Signal Generator	100 kc to 30 mc	1 %	10 v.
SMLM	Power Signal Generator	30 to 300 mc	1 %	3 v.
SDAF	AM-FM Signal Generator	170 to 620 mc	1 %	0.5 v.
SDR	UHF Signal Generator	300 to 1,000 mc	1 %	4 v.
SCR	Standard Signal Generator	1,000 to 1,900 mc	1 %	3 v.
SBR	UHF Signal Generator	1,600 to 2,400 mc	1 %	0.25 v.
SMCB	SHF Signal Generator	1,700 to 4,600 mc	1 %	20 mv.
XUA	Frequency Synthesizer	10 cps to 30 mc	2 parts in 10^7	1 v.

IMPEDANCE MEASURING EQUIPMENT

Type Ft	Description	Range: Impedance	Range: Frequency	Accuracy
RGV	Precision Resistance Bridge	0.01Ω to 100 MΩ	DC	0.1%
LCB	Precision L-C Bridge	10μh to 1000h .01 to 1 MΩ 10,000μμf to 1000μf	50 cps to 20 kc	0.3%
LARU	Inductance Meter	0.1μh to 1h	2.2 kc to 4.7 mc	1%
KARU	Capacitance Meter	0.5μμf to 10μf	1.5 to 175 kc	1%
VKB	Dielectric Test Bridge	10μμf to 1μf	50 cps to 300 kc	1%
VLU	Admittance Meter	0-1000μμf 1KΩ-200 MΩ	0.1 to 10 mc	1%
KKH	Direct Capacitance Bridge	.003 to 30μμf	500 kc	2%
KZS	Tolerance Bridge	10μμf to 1μf 10Ω to 1 MΩ 100μh to 2mh	17 kc	Dependent on Range Selected
LMM	Slotted Line	.03 to 1 reflection coefficient	80 to 300 mc	2%
LMD	Slotted Line	.02 to 1 reflection coefficient	300-3,000 mc	2%
ZDU	Diagraph	1 to 2500Ω	30-300 mc	2%
ZDD	Diagraph	1 to 2500Ω	300-2,400 mc	3%
ZUP	Reflectometer	.005 to 1 reflection coefficient	10-600 mc	1%
ZPD	Reflectometer	02 to 1 reflection coefficient	300-2,400 mc	1%
VLUK	Admittance Meter	0 to 100μμf 1000Ω-10 MΩ	10-100 mc	1%

FREQUENCY MEASURING EQUIPMENT

Type FT	Description	Range	Accuracy
XZB	Table model—Decade Frequency Measuring System	10 cps to 600 mc	1 part in 10^7
XZA	Decade Frequency Measuring System with Master Crystal Oscillator	10 cps to 1,000 mc	1 part in 10^9
WIK	Portable Frequency Measuring System	10 cps to 1,000 mc	1 part in 10^7

LARGE SCREEN OSCILLOSCOPES and ACCESSORIES

Type	Screen Size	Sensitivity	Sweep Range
1735D	17"	10 mv./in. to 100 v./in.	10 μsec. per inch to 1 sec. per inch
2135D	21"	10 mv./in to 100 v./in.	10 μsec. per inch to 1 sec. per inch
1740D	17"	1 mv./in. to 100 v./in.	10 μsec. per inch to 1 sec. per inch
2140D	21"	1 mv./in. to 100 v./in.	10 μsec. per inch to 1 sec. per inch
1770A	17"	1v./in. to 10 v./in.	Monitor Scope, contains no sweep.
DC-40BG	17"	1 mv. full scale	Bar Graph presentation of 40 DC signals.
AC-40BG	17"	50 mv. full scale	Bar Graph presentation of 40 AC signals.
200K			Swept Frequency Generator —20 cps to 200 kc

In addition to those instruments listed above, many others, including capacitance standards and precision attenuators, are available. Write for complete information and specifications on the entire line of Federal instruments.

KEITHLEY INSTRUMENTS

for electronic measurement and control

ELECTROMETERS

6 MODELS AVAILABLE. Illustrated is Model 610 with these dc voltage, current and resistance ranges: 10 mv to 100 volts, 3 amperes to 10^{-13} ampere, and 10 ohms to 10^{14} ohms full scale. Also serves as dc amplifier with gains to 1,000. Accessory probes are available to facilitate measurements and extend upper voltage range to 30 kv. Input resistance is selectable from one ohm to over 10^{14} ohms.

Five other electrometers include both line-operated and battery models with convenient accessories for extended use.

MICRO-MICROAMMETERS

6 MODELS. The 410 (illustrated) has 20 ranges from 3 x 10^{-13} to 10^{-3} ampere full scale (two per decade); zero drift below 2% of full scale in 24 hours. Other models include: micro-microammeters with linear or log scale meters, with or without contact-meter relays; and Log n period amplifiers.

AMPLIFIERS

2 MODELS. AC Decade Isolation Amplifier Model 102B shown above has stabilized decade gains from 0.1 to 1000, a selectable bandwidth of 2 cps to 150 kc or to 1.7 mc and noise below 20 microvolts. Mid-band gain accuracy is 2%; 400 megohm 3$\mu\mu$f input impedance. Also available, Model 303, dc to 20 kc.

MEGOHMMETERS

3 MODELS. Model 500 above measures 10 to 10,000 megohms on a single extended scale. Model 501, a similar portable instrument with a 0.01 to 10,000 megohm scale. Model 510 is line-operated, 10^{7} to 10^{15} ohm range; 5, 50 and 500-volt test potentials.

measures current without adding resistance: 0.001 μa full scale reading

The Model REL-500 Precision Universal Meter is so versatile and broad-ranged that it performs as a voltage stability meter, a millivoltmeter, a micromicroammeter, a megohmmeter, a capacity meter, a pH meter, and as an electrostatic voltmeter.
It is so accurate that it performs all these functions with greater precision than most specialized single-purpose meters.

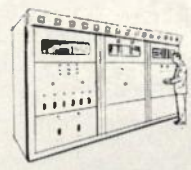
Random, Complex and Sine Wave VIBRATION TESTING SYSTEMS

PROVE your product's reliability



Whether you think of vibration testing as a means of prototype shake-down, or as a full quality control test on production runs, there's a Ling system for the job. Parts, components or even an entire missile, airplane or other major package can be tested to desired specifications with one of Ling's line of complete systems.

These systems include high-powered vibration generators with output ratings from 1 to 90 KVA, operating consoles, electro-mechanical shakers and accessory equipment as necessary for any specific test requirement.

Ling vibration systems are capable of producing a wide variety of tests, ranging from simple sine-wave sweeps to the exact reproduction of random or complex vibrations which are tape recorded from actual missile flights.

Among the new developments in high powered electronics by Ling is a packaged vibration test system—the Sine-O-Matic. This compact unit contains everything necessary for fully automatic or programmed sine wave testing in a single, desk-type console. Only the shaker is separate.

Another example of Ling's leadership is a complete mobile testing laboratory capable of field testing an entire airplane, missile or any large component. Ling sales engineers will be happy to discuss your own vibration testing requirements, whether for a standard system or in solving advanced vibration test problems.

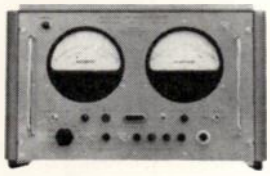
Test Equipment

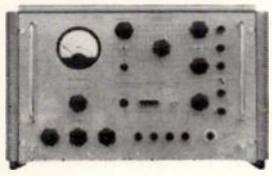
SIMPLIFIES



Servo Analysis

Take advantage of Solartron—WORLD'S foremost servo test equipment source. The Solartron Decade Oscillator and Resolved Components Indicator combination gives you a packaged system able to handle servo function analysis, laboratory and production testing requirements.

Solartron's matched units are off-the-shelf-ready for use. Before attempting the design and building of your own costly servo test units or any other possible solutions to your requirements—call or write Solartron first!



SPECIFICATIONS? Sure—like these: frequency—.5 cps—1 Kcps; unwanted frequencies 40 db. down; input impedance 10M. BUT, for complete information on Solartron servo test instrumentation, write today for free booklet, T. F. A., Solartron, Inc., 10761 Burbank Blvd., North Hollywood, Calif.

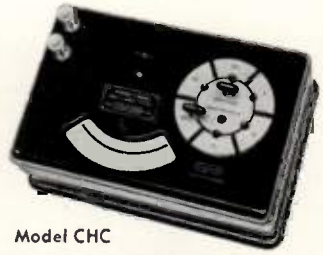
SENSITIVE RESEARCH INSTRUMENT CORPORATION

Model C

POLYRANGERS

Multirange DC Reference Standard .25% accurate current and voltage measuring instrument. 14 ranges from 1.5 ma. and 3V. to 3 amps. and 750 V. 6.3" scale length. Other Polyrangers with as many as 88 ranges self-contained available for AC or AC-DC use.



Model BS

Model THACH

LABORATORY STANDARDS

"Self Checking" DC Volt-Amp-Milliammeter. .05% accurate. 12" vernier scale. 25 full scale ranges from 1.5 ma. and .3 V. to 15 amps. and 1500 V. Internal standard cell. Other DC laboratory standards available with an accuracy of .1% and full scale ranges starting from 30 microamps or 50 mv.

"Self Checking" Volt-Amp-Milliammeter. Accuracy .2% DC and AC 7 cps — 4 kcps. 6.3" scale length. 19 full scale ranges from 10 ma. and 1 volt to 5 amps. and 1000 V. Internal standard cell. Other AC standards available with an accuracy of .1% with full scale ranges from 10 ma. and 10V.

Model CHC

AMMETERS

Heavy current DC use. .2% accurate. Self-contained. Ranges switched by changing a single-plug connection. 6.3" scale length. Full scale ranges between 1 and 100 amps. Other instruments available as millivoltmeters with external laboratory standard shunts. Ranges up to 1,000 amps.

Model FM

FLUXMETERS

Single or multirange. Basic sensitivity 10,000 maxwells per division using a single turn search coil. Accuracy .5%. 5.2" scale length. Available with general purpose 10 turn search coil with a mean area of 8 square centimeters.

Model CRV

CREST VOLTMETERS

Measures RMS, positive and negative peaks of 10 per second or faster. Basic instrument is electrostatic voltmeter with accuracy of 1%. Ranges up to 100 KV. full scale. Input impedance 10,000 megohms. For AC or repetitive pulsed DC.

Model FRE

FREQUENCY METERS

Expanded scale, direct reading, single and multirange low audio frequency measuring instruments of the differential coil permanent magnet type. Accuracy .25%. 6.3" scale length.

Model RFV

VOLTMETERS

True RMS responding. Full scale ranges from 1 V. to 300 V. Accuracy .5% on DC to 1 megacycle. Usable up to 10 megacycles. Other thermocouple instruments available for all current and voltage measurements.

Model UTS

TEST SETS

Replaces over 200 individual DC current, voltage and resistance measuring instruments. Accuracy .5%. Contains 3 instruments that may either be a millivoltmeter, voltmeter, milliammeter, or ammeter, and 1 microammeter. Portable. Other test sets available for AC and magnetic testing.

Model UPP

Type EW

PANEL INSTRUMENTS

AC and/or DC edgewise panel instruments with the same electrical specifications as Reference Standard portable models. Accuracies to .25%. Scale lengths to 7". Up to eight ranges switch controlled and self-contained. Full scale ranges start from 1 microamp or 1 mv. DC and 1 ma. or 200 mv. AC.

The New Model 77

VACUUM TUBE VOLTMETER

WITH NEW 6" FULL-VIEW METER

Compare it to any peak-to-peak V. T. V. M. made by any other manufacturer at any price!

- V Model 77 completely wired and calibrated with accessories (including probe, test leads and portable carrying case) sells for only $42.50.
- V Model 77 employs a sensitive six inch meter. Extra large meter scale enables us to print all calibrations in large easy-to-read type.
- V Model 77 uses new improved SICO printed circuitry.
- V Model 77 employs a 12AU7 as D.C. amplifier and two 9006's as peak-to-peak voltage rectifiers to assure maximum stability.
- V Model 77 uses a selenium-rectified power supply resulting in less heat and thus reducing possibility of damage or value changes of delicate components.
- V Model 77 meter is virtually burn-out proof. The sensitive 400 microampere meter is isolated from the measuring circuit by a balanced push-pull amplifier.
- V Model 77 uses selected 1% zero temperature coefficient resistors as multipliers. This assures unchanging accurate readings on all ranges.

AS A DC VOLTMETER
The Model 77 is indispensable in Hi-Fi Amplifier servicing and a must for Black and White and color TV Receiver servicing where circuit loading cannot be tolerated.

AS AN ELECTRONIC OHMMETER
Because of its wide range of measurement leaky capacitors show up glaringly. Because of its sensitivity and low loading, intermittents are easily found, isolated and repaired.

AS AN AC VOLTMETER
Measures RMS values if sine wave, and peak-to-peak value if complex wave. Pedestal voltages that determine the "black" level in TV receivers are easily read.

Specifications

• DC VOLTS—0 to 3/15/75/150/300/750/1,500 volts at 11 megohms input resistance • AC VOLTS (RMS)—0 to 3/15/75/150/300/750/1,500 volts • AC VOLTS (Peak to Peak)—0 to 8/40/200/400/800/2,000 volts • ELECTRONIC OHMMETER—0 to 1,000 ohms/10,000 ohms/100,000 ohms/1 megohm/10 megohms/100 megohms/1,000 megohms • DECIBELS —10 db to + 18 db, + 10 db to + 38 db, + 30 db to + 58 db. All based on 0 db = .006 watts (6 mw) into a 500 ohm line (1.73v). • ZERO CENTER METER—For discriminator alignment with full scale range of 0 to 1.5/7.5/37.5/75/150/375/750 volts at 11 megohms input resistance.

Model 77 comes complete with operating instructions, probe and test leads. Use it on the bench—use it on calls. A streamlined carrying case, included at no extra charge, accommodates the tester, instruction book, probe and leads. Operates on 110-120 volt 60 cycle. Only..... **$42.50 NET**

FORTY-SIX YEARS OF RADIO-ELECTRONIC HISTORY

are recorded in "Proceedings of the IRE." The photo above shows the issues from 1912 through 1947—eleven years of rapid advances and earth-shaking accomplishments are not even included in this panorama of progress! Since publication of its first issue, "Proceedings of the IRE" has paced and pioneered in every field of radio from the first vacuum tube through today's giant computers and tiny transistors. The engineers who write, read and use this magazine have transformed the world in forty-six short years! Is it any wonder that so many advertisers believe these engineers must learn about their products in the fact-packed advertising pages of "Proceedings of the IRE"?

THE MOSELEY

AUTOGRAF trade mark X-Y RECORDER & ACCESSORIES

Model 1 AUTOGRAF

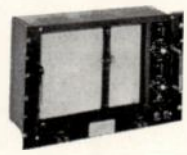
A portable drum type X-Y Recorder; accepts 8½"x11" paper; independent servo-actuated drives for each axis; input ranges 5 MV to 100 volts; 200,000 ohms/volt input resistance; less than 1 second plotting speed for full scale travel; ±0.25% accuracy and resolution; available for use as curve follower.

Model 2A AUTOGRAF

Flat-bed bench type X-Y Recorder; accepts up to 11"x17" paper; input ranges 5 MV to 150 volts; input filters; zero offset; built-in vacuum paper hold-down; 200,000 ohms/volt input resistance; less than 1 second plotting speed for full scale travel; inputs for curve follower, point plotter, card or tape translator; ±0.25% accuracy and resolution.

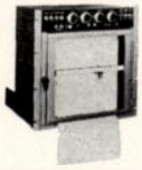
Model 3 AUTOGRAF

Flat-bed table-top X-Y Recorder; accepts 8½"x11" paper; input ranges 5 MV to 500 volts, calibrated or continuous; input filters; zero offset; positive clamp-type paper hold-down; 200,000 ohms/volt input resistance; ½ second plotting speed for full scale travel; ±0.25% accuracy and resolution.



Model 3S AUTOGRAF

Identical to Model 3 except has added feature of a built-in TIME BASE or SWEEP CIRCUIT. Five calibrated time intervals of 5, 10, 50, 100, and 500 seconds for full scale X-axis pen travel (2 inches/sec. to 0.2 inches/sec.). Combination X-axis range control permits standard two-variable plotting or one variable plotted against time.



Model 4 AUTOGRAF

Rack mounting X-Y Recorder; vertical flat recording surface; accepts up to 11"x17" paper; built-in vacuum paper hold-down; input ranges 5 MV to 150 volts, calibrated or continuous; input filters; zero offset; 200,000 ohms/volt input resistance; less than 1 second plotting speed for full scale travel; ±0.25% accuracy and resolution; inputs for curve follower, point plotter, card or tape translator; 19¼" panel.

Model 5 AUTOGRAF

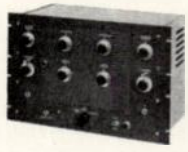
Rack mounting X-Y Recorder; vertical flat recording surface; accepts 8½"x11" paper; positive clamp-type paper hold-down; input ranges 5 MV to 500 volts; input filters; zero offset; 200,000 ohms/volt input resistance; ½ second plotting speed for full scale travel; 0.25% accuracy and resolution; 12¼" panel.

Model 6 AUTOGRAF

An AUTOMATIC FRAME ADVANCE X-Y Recorder identical electrically to Models 2A or 4. Features continuous chart roll (approx. 100 charts per roll), automatic, manual, or remote control of chart advance, vacuum paper hold-down, 10" x 10" plotting area completely visible, single chart tear-off or rolled chart storage.

Model F-1
Curve Follower Adaptor

An adaptor unit designed for use directly with Model 2A or 4 AUTOGRAF; converts graphic information to voltage or point form from conducting curves; may also be used with Models 1, 3, and 5 with suitable modification of recorders: 10 inches per second reproducing rate; furnished with all necessary installation accesscries.



Type D-1
Character Printer

A solenoid-plunger type die replacing pen assembly on a Model 2A AUTOGRAF to permit identification of curves obtained from plotting digital information. Consists of complete kit with instructions for installation and minor recorder wiring changes.

Model 40A Keyboard

Full keyboard type; 30 keys for each axis; also available in 10 key; connects directly to Model 2A and 4 AUTOGRAF; built-in regulated power supply; plots from zero to ±1999 on each axis; 0.10% digital to analog conversion accuracy; special circuits for calibration, error detection, and selection of 'hold" or "automatic clear" on each axis.

Model 30A
Card Translator

For use with Model 2A or 4 AUTOGRAF to convert output pulses from IBM Summary Punch to analog voltages for automatic plotting; speed of 50 cards per minute, maximum; 10, 20, 50, 100, or 200 counts per inch; calibration by switch or calibrator card; automatic or manual feed; 0.10% accuracy; mounted on 12¼" standard panel, 11½" deep.

Model 50
Tape Translator

For use with Model 2A or 4 AUTOGRAF to plot digital information from perforated paper tape in conjunction with standard tape reader; standard model accepts 1-2-4-8 binary code; other codes available on special order; maximum speed, 60 points per minute; zero offset of 100 to 900 points; plotting scale steps of 10, 20, 50, 100, and 200 points/inch.

Model 60
Logarithmic
Converter

Converts DC or AC input voltages to DC voltages proportional to the logarithm of the amplitude of the input voltage; self contained power supply; better than 60 db dynamic range; 20 to 20,000 cps; accuracy ±½db; output ranges, 5, 10, 20 db per inch; speed 20 db per second.

Model 20
DC Voltmeter

A high accuracy servo-actuated, multi-range DC Voltmeter with large, easy to read scale; eleven ranges from 3 MV to 300 volts, full scale; internal calibration cell; input resistance, 200,000 ohms/volt up to 30 volt scale, 20,000 ohms/volt on 300 volt scale; zero left and zero center adjustment feature; 0.25% accuracy on all ranges.

Clary Printer and Model C-1 (2, 3)
Accessory Panel

A Clary Printer, Model 1900, is specially wired for use with a Coleman Digitizer and Moseley Accessory Panel to provide "on demand" printed readout of DC signals from the Model 20 DC Voltmeter. Also may be used for readout from shaft rotation. Available for 3, 4, and 5 decade Digitizers.

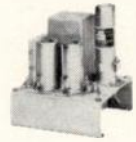
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

FREQUENCY STANDARDS



*3⅛" high
400 - 1000 cy.

PRECISION FORK UNIT
TYPE 50

Size 1" dia. x 3¾" H. Wght., 4 oz.*

Frequencies: 240 to 1000 cycles
Accuracies:—
Type 50 (±.02% at —65° to 85°C)
Type R50 (±.002% at 15° to 35°C)
Double triode and 5 pigtail parts required
Input, Tube heater voltage and B voltage
Output, approx. 5V into 200,000 ohms

FREQUENCY STANDARD
TYPE 50L

Size 3¾" x 4½" x 5½" High
Weight, 2 lbs.

Frequencies: 50, 60, 75 or 100 cycles
Accuracies:—
Type 50L (±.02% at —65° to 85°C)
Type R50L (±.002% at 15° to 35°C)
Output, 3V into 200,000 ohms
Input, 150 to 300V, B (6V at .6 amps.)

*3½" high
400 to 500 cy.
optional

PRECISION FORK UNIT
TYPE 2003

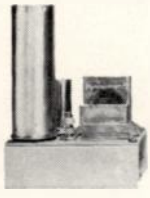
Size 1½" dia. x 4½" H. Wght. 8 oz.*

Frequencies: 200 to 4000 cycles
Accuracies:—
Type 2003 (±.02% at —65° to 85°C)
Type R2003 (±.002% at 15° to 35°C)
Type W2003 (±.005% at —65° to 85°C)
Double triode and 5 pigtail parts required
Input and output same as Type 50, above

FREQUENCY STANDARD
TYPE 2005

Size, 8" x 8" x 7¼" High
Weight, 14 lbs.

Frequencies: 50 to 400 cycles (Specify)
Accuracy: ±.001% from 20° to 30°C
Output, 10 Watts at 115 Volts
Input, 115V. (50 to 400 cycles)



FREQUENCY STANDARD *NEW*
TYPE 2007-6
TRANSISTORIZED, Silicon Type
Size 1⅛" dia. x 3½" H. Wght. 7 ozs.
Frequencies: 400 — 500 or 1000 cycles
Accuracies:
2007-6 (± .02% at —50° to +85°C)
R2007-6 (±.002% at +15° to +35°C)
W2007-6 (±.005% at —65° to +125°C)
Input: 10 to 30 Volts, D. C., at 6 ma.
Output: Multitap, 75 to 100,000 ohms

FREQUENCY STANDARD
TYPE 2121A

Size
8¾" x 19" panel
Weight, 25 lbs.
Output: 115V
60 cycles, 10 Watt
Accuracy:
±.001% from 20° to 30°C
Input, 115V (50 to 400 cycles)

FREQUENCY STANDARD
TYPE 2001-2

Size 3¾" x 4½" x 6" H., Wght. 26 oz.

Frequencies: 200 to 3000 cycles
Accuracy: ±.001% at 20° to 30°C
Output: 5V. at 250,000 ohms
Input: Heater voltage, 6.3 - 12 - 28
B voltage, 100 to 300 V., at 5 to 10 ma.

FREQUENCY STANDARD
TYPE 2111C

Size, with cover
10" x 17" x 9" H.
Panel model
10" x 19" x 8¾" H.
Weight, 25 lbs.
Frequencies: 50 to 1000 cycles
Accuracy: (±.002% at 15° to 35°C)
Output: 115V, 75W. Input: 115V, 50 to 75 cycles.

ACCESSORY UNITS
for TYPE 2001-2

L—For low frequencies multi-vibrator type, 40-200 cy.
D—For low frequencies counter type, 40-200 cy.
H—For high freqs, up to 20 KC.
M—Power Amplifier, 2W output.
P—Power supply.

This organization makes frequency standards within a range of 30 to 30,000 cycles. They are used extensively by aviation, industry, government departments, armed forces—where maximum accuracy and durability are required.

new FORK OSCILLATOR—
Stability 1 part in 10,000,000

Improvements in the amplifier circuitry have minimized frequency excursions caused by variables such as temperature, plate supply voltage, tube aging, etc.

Fork employs compact oven developed for this unit.

Fork **FK5-A** Standard frequencies (1600, 1800 or 2000 cps). **$350.00.**

Also furnished without oven. *Write for detailed specifications.*

specialized ELECTRONIC TESTING EQUIPMENT

SOFT- AND HARD-TUBE PULSE MODULATORS

Widest selection of standard modulators covering all useful power levels. Precision-engineered designs for operation and test of magnetrons, klystrons, traveling wave tubes, pulse transformers, waveguide components and related devices. All models adaptable to individual specifications.

Peak power outputs from 16 kw. to 30 megawatts and higher. Average output powers to 60 kilowatts and higher. Typical features include: continuously adjustable voltage control; discrete or variable pulse widths; internally- and externally-controllable repetition frequencies; synchronized auxiliary outputs; pulse-shape monitoring circuits; source and load overload protection.

20-megawatt soft-tube modulator, Model 150

HIGH-VOLTAGE POWER SUPPLIES

High-voltage DC and AC types, single- or multiple-output, regulations and stabilities to 0.01%. Standard and custom designs from bench-top models to large mobile units to satisfy your specific tube testing or production problems: highly-regulated supplies uniquely suited for test and operation of traveling wave tubes, backward wave oscillators and similar tube types; unregulated high-power supplies for systems testing; complete power sources for controlling all aspects of tube production. Also many models for general power-source applications in engineering laboratories and industrial plants.

Highly-regulated, multiple-output high-voltage supply, Model M-224

TUBE TESTERS AND CHECKERS

Designed to perform MIL or special-purpose tests, for virtually every type of tube: high-power vacuum diodes, triodes and tetrodes; C-R tubes; phototubes; magnetrons, thyratrons and gas tubes.

The wide variety includes static-characteristics checkers, aging and conditioning sets, emission and life testers, test oscillators, cathode-interface resistance measuring sets, and special equipment for tube R&D work.

Cathode-Interface Resistance Test Set, Model 186

Transmitting-Tube Static-Characteristics Measuring Set, Model 166

precision COMMUNICATIONS INSTRUMENTATION

CRYSTAL FREQUENCY SYNTHESIZERS

Disciplined incremental and continuous-coverage oscillators, approaching the "black-box" equivalent of a crystal with thousands of selectable frequencies. Ideal for SSB Systems—as transmitter exciters or receiver VFO's, ultra-stable signal generators, frequency meters, FSK exciters, and similar applications where exactness, operating convenience and equipment dependability are mandatory.

SERIES 182. Three Models cover from 18 mc to 410 mc, with zero-error readability and resettability, frequency stability 1 part in 10^7, spurious signals down 80 db.

Other models:

A-200, continuously tunable 2-32 mc. stability of 1 part in 10^6 any frequency.

N-245, incremental tuning 2-32 mc. stability of 1 part in 10^8 any frequency.

N-248, subminiaturized, 18-36 mc. stability of 1 part in 10^7 any frequency.

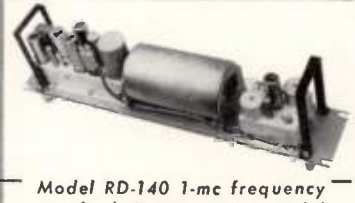
Other frequency ranges available.

Incremental Crystal Synthesizer, Series 182

FREQUENCY STANDARDS

1-MC HARMONIC REFERENCE OSCILLATOR. A laboratory-level frequency standard plus a jitter-free millimicrosecond pulse source for harmonic measurements. Built-in balanced mixer enables direct determination of unknown frequencies up to 1000 mc. Stability better than 1 part in 10^8 day. Fundamental tunable $\pm$25 cycles.

1-MC, 100-MC and 1-KMC STANDARDS. Exceptionally compact, highly stable, low-cost crystal-controlled oscillators suitable as reference sources or master oscillators in frequency control systems. Stabilities better than 1 part in 10^8 per day. Modifications to meet individual frequency requirements.



Model RD-110 Harmonic Reference Oscillator

PROPORTIONALLY-CONTROLLED OVEN SYSTEMS

Non-cycling systems for precise temperature control of crystals, oscillator circuits, thermocouples and other components. Oven temperature held to within 1/1000 of ambient changes. Ovens can be set at any point from 10°C to 100°C above ambient with vernier adjustment available.

Model RD-130, for rack mounting.

Model RD-132, transistorized sub-assembly version

Model RD-140 1-mc frequency standard, incorporating model RD-130 proportional oven system.

FOR THE WIRE AND CABLE INDUSTRY

Manson builds special testing apparatus including *High-Potential Test Sets* having voltages to 100KV and/or power capacities to 100KVA; *Velocity of Propagation Meters* for measuring coaxial cables to MIL-C-17B; *Flammability Testers* in two Models for cables up to 3" diameter.

NEW! DRY CALORIMETERS

FOR ALL WAVEGUIDES FROM 1 to 24 KMC (with Adapters)

Measures Power up to 2,000 Watts

- Simple to operate.
- Direct Reading.
- Uses NO Thermometers.
- Uses NO Flow Meters.
- Does not have to be connected to power line.

Measures 5 watts full scale and 50 watts full scale. 7 to 24 KMC with Adapters.

Measures 10,000 watts.

Measures 5,000 watts.

Measures 150 watts.

High & Low Power CALORIMETERS

DC—12 KMC • 1 TO 20,000 WATTS

- Direct Reading
- Simple to Operate
- Uses NO Thermometers
- Uses NO Flow Meters
- Can be Calibrated in the Field

High & Low Power LIQUID DUMMY LOADS

FOR CALORIMETRIC USE

COAXIAL & WAVEGUIDE

DC to 12 KMC • 1 to 20,000 watts

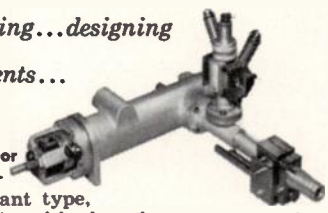
NOW...ANY MICROWAVE COMPONENT CAN BE BUILT AND ENGINEERED TO YOUR PARTICULAR APPLICATION

Regardless of complexity, design or tolerance problems—you can get UHF or microwave components that are job-engineered to your application. All units are delivered, *electrically tested and proven*, ready for immediate operation.

Components can be built from your prints or can be designed and built to integrate with the application. Close and confidential coordination is maintained from drawing board stage to installation.

Range of assemblies is practically unlimited—from dc. to over 40,000 mc., military or industrial. Typical examples are these components, delivered ready for field use:

Telemetering . . .



Tuneable S-Band Transmitter Cavity— re-entrant type, pulse output 150 w., operates at extreme altitudes and under extreme conditions of temperature, humidity and salt spray.

Improving signal-to-noise ratio . . . selectivity...

Tuneable UHF Pre-Selector— relatively low frequency coaxial resonator with very low insertion loss, extreme selectivity and very high signal-to-noise ratio. Especially adapted to use in aircraft or in crowded communication bands.

Calibrating...designing S-Band components...

S-Band Signal Generator Cavity— re-entrant type, complete with thermistor mount and calibrated variable attenuator. Frequency range 2700 to 3400 mc.

•

Get the facts on our complete design, engineering and mechanical fabrication facilities. Have us quote on your needs—cavities, mixers, duplexers, multipliers, rotary joints, twists, bends and other components or assemblies.

Contact us today. Request catalog.

PULSE GENERATORS

1310A Time Delay Generator—precision delays 10 us to 10 sec in 5 ranges, accurate width gate output.

2120A Pulse Generator—fully calibrated .1—1000 us pulse width, 0—10,000 us delay, 10 cps—100 kc, 80v from 93 ohms, .02 us rise time.

Model 2125B

2125B Pulse Generator—fast rise time general purpose unit, 10 cps—100 kc. Pulse width .07—100 us, delay or advance 0—100 us.

2140A Double Pulse Generator—high power independently controlled outputs, separate or mixed. 10 cps—100 kc. Calibrated widths & separation.

2150A Pulse Burst Generator—5 pulse output, on-off coding, independent delay, width, and provision for delay modulation.

3420 Pulse Oscillator — wide range trigger generator 100 cps to 3.3 mc, half period outputs each ±25v .1 us wide.

3450B Megacycle Pulse Generator—200 cps to 2 mc, 0—100 us pulse delay, 1—100 us pulse width, ±50v output.

3460A Megacycle Double Pulse Generator—.1—100 us separately controlled pulse widths, 0—100 us separation, 200 cps to 2 mc, ±35v into 93 ohms separate or mixed.

4120A Variable Pulse Generator—economical compact unit 33 cps to 330 kc, 1—100 us pulse delay, .25—100 us pulse width, ±50v output.

5100A Series Pulse Code Generators — for core testing & word generation, clock rates to 1 mc, multi-channel 10 bit code with interval repeat, current output 50 ma to 5 amp per channel.

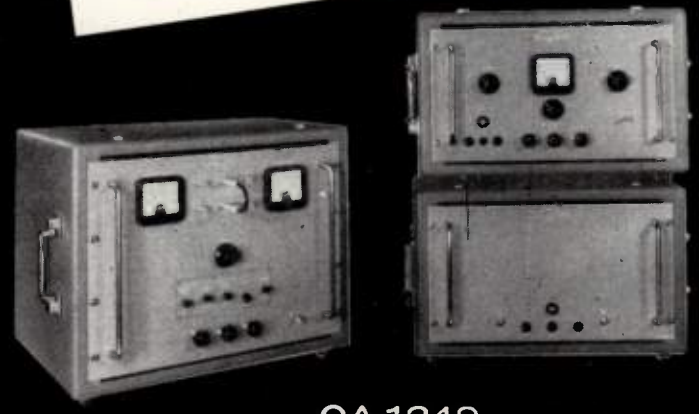
6020B Voltage & Current Calibrator—.5% accuracy measurements of DC, sine wave, or pulse voltages.

ELECTRONIC COUNTERS

7240B Preset Counter & Digital Frequency Divider for control & laboratory applications. Preset capacity is 1 to 9,999.

7340C Frequency Indicator & Counter—low cost reliable unit for RPM, flow measurement, etc. Reads 0.1 to 99,990 events per second.

7550B Time Interval & Frequency Meter—compact 5 decade universal counter. Measures frequency, period, interval, etc. Counting rate to 100 kc.



Write for detailed data and catalog 3-57 BG covering related instruments.

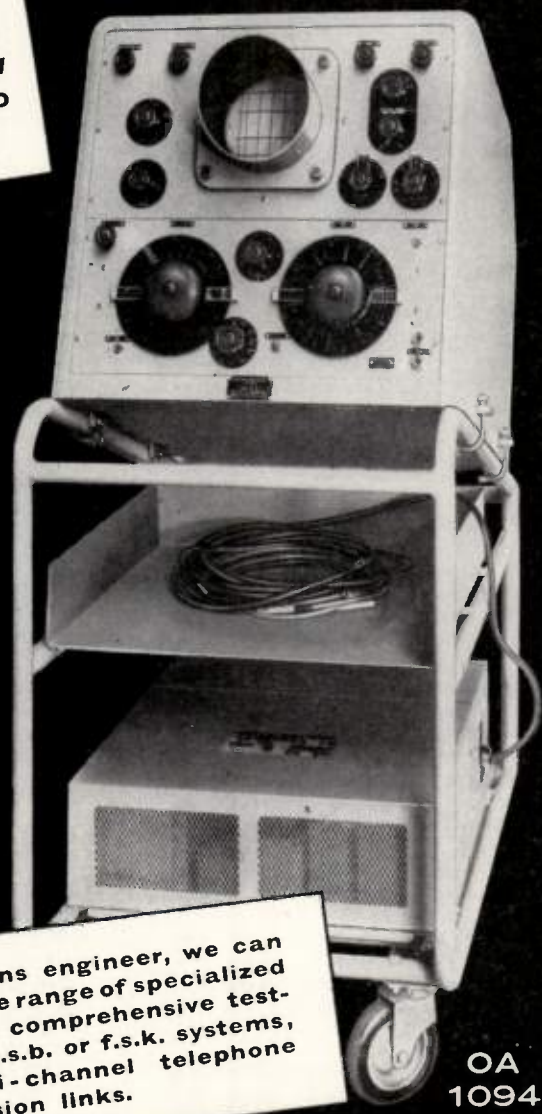
UNIQUE!



THREE UNIQUE INSTRUMENTS WHICH ILLUSTRATE THE REAL CONTRIBUTION *MARCONI INSTRUMENTS* ARE MAKING IN THE FIELD OF COMMUNICATION INSTRUMENTATION

OA 1249

OA 1259

OA 1094

For the communications engineer, we can supply an incomparable range of specialized instruments providing comprehensive testing facilities for HF s.s.b. or f.s.k. systems, and VHF/UHF multi-channel telephone or television links.

WHITE NOISE TEST SET OA 1249

Measures baseband intermodulation and noise in multi-channel link equipment. Suitable for radio or coaxial systems operating 60, 120, 240, 600, or 960 channels. Measurement by noise-in-slot technique simulates busy traffic conditions.

DERIVATIVE TEST SET OA 1259

For fast and accurate linearity adjustments on multi-channel link modulators and demodulators. Generator sweeps ± 20 mc on i-f center frequencies from 65 to 75 mc. Oscilloscope unit displays 1st derivative - or slope - of response against instantaneous i-f.

H.F. SPECTRUM ANALYSER OA 1094

Simplifies distortion analysis, identification of unwanted components, in s.s.b. transmitters and drives. Basic frequency range: 3 to 30 mc; optional i-f extension unit for 0 to 30 mc. Maximum spectrum width: 30 kc. Amplitude range: 0 to -60 db. Resolution: 6, 30 and 150 cps. Sweep duration: 0·1 to 30 sec.

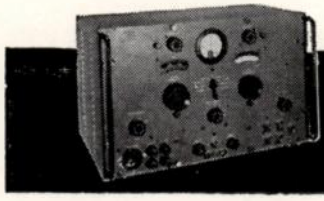
Pilots Check Out

NAVIGATION RECEIVER ACCURACY

ARC Type H-14A Signal Generator Checks Omni/Localizer Equipment

ARC's H-14A Signal Generator provides a simple and dependable means of checking *omnirange* and *localizer receivers* in aircraft on the field, by sending out on the hangar antenna a continuous test identifying signal that blankets the field. Tuned to this signal, individual pilots or whole squadrons can quickly test their own equipment. Voice can be transmitted simultaneously with signal. The instrument will check 24 omni courses, omni course sensitivity, operation of TO-FROM meter and flag-alarms, left-center-right on 90/150 cps localizer, receiver frequency calibration, reciprocal course accuracy, and receiver output. The H-14A is also widely used for making quantitative measurements on the bench during receiver maintenance. Input power is 160 watts, 115 volts 60 cps.



The H-16A Standard Course Checker measures the accuracy of the indicated omni course in ARC's H-14A or other omni signal generator to better than ½ degree. It features a built-in method of checking its own precision.

ARC's Type H-12 Signal Generator (900-2100 mc) is equal to military TS-419 U, and provides a reliable source of CW or pulsed rf. Internal circuits provide control of width, rate and delay of internally-generated pulses. Complete specifications on request.

Dependable Airborne Electronic Equipment Since 1928

Aircraft Radio Corporation BOONTON, NEW JERSEY

Miniaturized Automatic Direction Finders • Omni/Loc Receivers • Course Directors • UHF and VHF Receivers and Transmitters
LF Receivers and Loop Direction Finders • 10-Channel Isolation Amplifiers • 8-Watt Audio Amplifiers
Interphone Amplifiers • Omnirange Signal Generators and Standard Course Checkers • 900-2100 Mc Signal Generators

Precision Instruments

Model 120

Phase Angle Meter and Monitor

- ***Direct Reading Without Ambiguity:***
Phase angle is read directly on a large 4½" meter. The Coarse Meter Scale is graduated from 0° to 360° in 5° divisions. A selector switch cancels out all but the last 30° of any measured phase angle, providing a vernier reading on a 0° to 30° scale which is graduated in 0.5° divisions.
- ***High Accuracy Over a Wide Frequency And Amplitude Range:***
An accuracy of ± 1 degree is obtained over the frequency range of 20 cps to 20,000 cps and from 2 to 30 volt peak input. At frequencies of 20,000 to 100,000 cps phase measurements can be made at slightly reduced accuracy.
- ***Accepts Sinusoidal or Complex Wave Forms:***
Since the method of phase detection is based on the point of zero cross-over, any type of wave form is acceptable which does not cross the zero axis more than once in a given direction per cycle.
- ***Recorder Output:***
An output is available which is suitable for use with recording equipment. It provides 0 to 10 volts DC corresponding to a phase angle of 0 to 360°.
- ***Rugged:***
Originally designed for Military use, as Monitor, Phase AN/URM-67

Precision Pulse Delay Generator

Model 131

- Ranges: 100 to 999,900 yards in 100 yard steps.
- Accuracy: ± 5 yards or 0.01%.
- Input Trigger: 50 to 5,000 P.P.S. random source accepts up to 10% jitter.
- Pulse Widths: 0.1, 0.6, and 4.0 μ secs.
- Rise Time: 0.05 μ secs.
- Amplitude: Up to ± 50 volts into 75.Ω
- Output: Strobe and Trains—Train spacing 1,000, 10,000 or 100,000 yds.
- Internal Trigger Generator: 50 to 500 and 500 to 5,000 P.P.S.
- Power Requirements: 115 volts ± 10%; 50 to 450 cycles, 300 watts.
- Also available: Model 130 with range of 1 to 10,000 μ secs. in 0.1 μ sec. step.

VHF-UHF Frequency Calibrator

Model 121

- Wide Frequency Range:
Covers entire spectrum from 50 mc to 11,000 mc without the use of tuning controls.

- Ease of Operation:
A flick of the switch delivers the full spectrum. A switch provides a choice of 50 mc or 100 mc spacing. The amplitudes of the marker signals are adjusted by an output level control.

- Accurate:
(±) 0.005% at any frequency, unaffected by temperature or input power variations.

- Compact; Rugged; Light Weight:
Built to the same specifications as its Military equivalent of Test Set AN/USM-45.

PANORAMIC'S *long and specialized experience in electronic measurement guarantees reliable instrumentation to speed your research and development projects...solve your production testing problems*

Panoramic's widely accepted and completely dependable SPECTRUM ANALYZERS provide stable displays for rapid accurate analyses — 0.5 cps to 44,000 mc

For low frequencies—

Model LF-2 0.5-2,250 cps
- 0.1-20 cps resolution
- Six sweep widths—2 to 500 cps
- 10-sec.-16-min. scan intervals
- Built-in-chart recorder
- High stability

Model LP-1a 20-22,500 cps
- Broad range log freq. scale 40-cps-20 kc
- 200, 1000 or 5000 cps linear segments centered anywhere from 0-20 kc
- Linear and 2-decade log amplitude scales

For the ultrasonic range—

Model SB-7bZ 1-300 kc
- Continuously variable sweep width (0-200 kc), C.F. and I.F. bandwidth
- Linear, 2-decade log and 2.5 db expanded amplitude scales
- Discriminator controlled linearity and stability

Model SB-15 0.1-525 kc

- Continuously variable C.F., sweep width, scan rate and I.F. bandwidth
- Linear, 2-decade log and 2.5 db expanded amplitude scales
- Highly versatile for varied applications

For RF • VHF • UHF analysis up to 1000 mc—

Model SB-12a Panalyzor Type T-100

- 60 db dynamic range
- 10 cps resolution capability
- 100 kc max. sweep width
- Critically designed for sensitive analyses . . . testing SSB systems

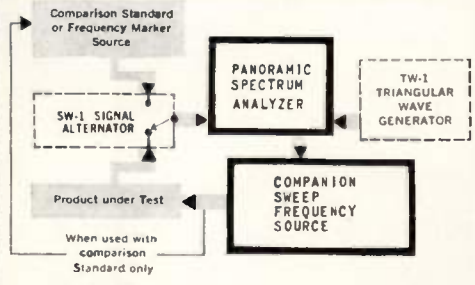
Model SB-8b Panalyzor in 3 Types
- Max. sweep width ranges 200 kc to 10 mc
- Resolution ranges of 50 cps to 100 kc
- Continuously variable sweep width, resolution and scan rate
- Lin, log and power amplitude scales

Model SB-3 Panalyzors in 5 Types
- General purpose workhorse
- Max. sweep width ranges of 50 kc-6 mc
- Resolution ranges 1 kc to 50 kc
- 3" CRT
- Line synchronized sweep rate
- Continuously variable sweep width

Panadaptors Model SA-8b in 3 Types; Model SA-3 in 11 Types
- Designed to operate with receivers with I.F.'s from 455 kc to 30 mc
- Show signals on either side of frequency to which receiver is tuned
- Max. sweep width ranges 50 kc to 10 mc

For high frequencies—

Model SPA-1 50-4,000 mc



- High inherent stability
- Sensitivities up to —100 dbm with internal preamplifier
- Continuously variable sweep width (10 mc-0), resolution, scan rate and differential markers (±50 kc to ±5 mc)
- Lin, log and power amplitude scales

Model SPA-4 10-44,000 mc
- Single tuning head has same sensitivity as multi-tuning head analyzers
- Continuously variable sweep width (70 mc to 0) and resolution (1 to 80 kc)
- Calibrated power, voltage and log amplitude scales
- Careful shielding avoids interference

dependable **CERTIFIED SPECIFICATIONS** *for accurate data*

Designed and constructed to meet performance specifications over long periods of hard usage, Panoramic instruments are PROVED PERFORMERS in laboratories, plants and military installations all over the world.

Panoramic's unique 0.5 to 500,000 cps CURVE TRACING INSTRUMENTATION SYSTEMS provide single line response to fundamental frequency only . . . discriminate against noise and hum . . . have virtually unlimited dynamic range.

Frequency Response Indicators operate with appropriate Panoramic Spectrum Analyzer and accessory instruments—

0.5-2,250 cps MODEL G-5 with LF-1 or LF-2
20-22,500 cps MODEL G-2 with LP-1a or AP-1
1-300 kc MODEL G-3 with SB-7bZ
0.1-525 kc MODEL G-15 with SB-15

Sweep Generator operates with oscilloscope indicator and Panoramic accessory instruments—

Model SG-1 20-200,000 cps
- 2 fixed log, 2 adjustable linear, sweep widths, individually calibrated
- Passive null type internal markers

ACCESSORY INSTRUMENTS—

Model TW-1 Triangular Wave Generator
- Permits tracing response of highly selective networks
- Produces continuously variable linear bi-directional time base to adjust scan rate for true response

Model SW-1 Signal Alternator
- Bi-stable switch alternates analysis between two inputs on successive scans
- Facilitates precise comparisons of production models with standard and the injection of calibrating markers

Panoramic's specially designed TELEMETERING TEST INSTRUMENTS provide a simple, reliable, almost instantaneous method of checking airborne packages and ground station equipment in FM/FM Systems.

Model TMI-1a Telemetering Indicator
- Basic instrument displays frequency vs. amplitude of composite signal components
- Frequency range 350 cps to 85 kc log, ± 50 cps to ± 10 kc linear segments centered anywhere between 0-70 kc
- Lin and log amplitude scales
- Automatic optimum resolution

Simultaneous 11-Point Calibrator
- Generates simultaneously extremely precise calibrating frequencies for all IRIG channels in system
- 11-point calibrations automatically sequenced or individually adjustable
- Simple, reliable operation
- Compact packaging
- Ideal for automatic discriminator calibration and as reference for data reduction

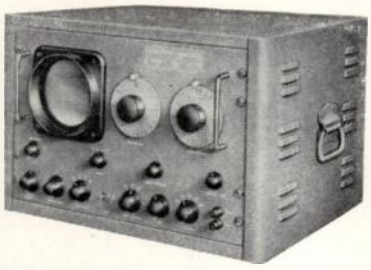
Model TMC-1 Subcarrier Deviation Indicator and 3-Point Calibrator
- Built-in channel selector
- Furnishes 3 frequencies, channel by channel for discriminator calibration
- Sets max. deviation limits and C.F. of subcarrier oscillators with TMI-1a
- Long term freq. accuracy 0.02%

Model TMC-307a 7-Point Calibrator
- Furnishes 7 equally spaced frequencies for discriminator calibration
- Long term freq. accuracy 0.02%
- Use with TMI-1a and CHS-1 Channel Selector for multi-point calibration of subcarrier oscillators

PANORAMIC
RADIO PRODUCTS, INC.

the pioneer is the leader

Specialized experience, rigid quality controls, continuous product improvement and far-sighted development techniques assure the finest in instrumentation for the analysis of measurement problems.



Send for our current CATALOG DIGEST and ask to be put on our regular mailing list for The PANORAMIC ANALYZER featuring application data.

SPECTRUM ANALYZERS
TELEMETERING
CALIBRATORS

Model SS-100

SPECTRUM ANALYZERS

MODEL SS-5	1 cycle to 5 KC Resolution to 2 cycles.
MODEL SS-100	13.5 cycles to 110 KC Resolution to 27 cycles.
MODEL SS-500	75 cycles to 500 KC Resolution to 150 cycles.
MODEL UR-10	100 KC to 10 MC Resolution to 500 cycles.

Synchronous Sweep Generators and Variable Rate Attachments available for all Spectrum Analyzers.

SINGLE SIDEBAND SPECTRUM MONITOR MODEL MD-500

500 kc center frequency
0-100 kc sweep width
Resolution to 10 cycles.

The MD-500 has a built-in frequency converter for operation to over 500 m.c.

TELEMETERING CALIBRATORS

Telemetering calibrators designed to give separate crystal controlled calibrating frequencies for the 23 telemetering subcarrier channels.

Calibrators available with 11, 9, 7, 5, or 3 points with crystal oscillators accurate to ± .005%, ± .001%, or ± .00025%.

PROBESCOPE calibrators exceed all Inter-range Instrument Group Specifications.

Test and Service Products

For MAGNET CHARGING, TREATING and CALIBRATION

MODEL 1221 is used for small magnets. Its 10,000 ampere-turn output will saturate about 2" of Alnico V. Operates by condenser discharge method thru plug-in fixtures. Uses only 30 watts at 115 v. For continuous duty; charging cycle averages 3 sec. Price $180.

MODEL 107A is a versatile, condenser discharge magnetizer for most medium size magnets of either simple or complex pole configuration. It provides ranges of 12,000 and 24,000 ampere-turns and is capable of saturating most instrument magnets, including the core type mechanisms, using the standard flat bar, adapters or wire-wound fixtures. Can be used for continuous duty production magnetizing; average charging cycle is under 5 sec. Weight is 75 lbs. Size 12 x 7 x 17. Operates from 115-volt, 60-cycle line. Price $530.

MODEL 1500 is designed for production, research and instrument repair work. It will magnetize the new cobalt platinum and barium ferrite materials as well as all the Alnicos. It will saturate large switchboard meter assemblies and all panel type instruments and uses most existing adapters designed for the Model 107A. Wire-wound fixtures are plugged into the front panel through a safety interlock system providing maximum operator protection. Operates from 115-volt, 60-cycle line. Size 11 x 20 x 15; weight 125 lbs. Price $945.

MODEL 942 will saturate Alnico magnets weighing up to 34 lbs. and high flux ceramic magnets of any shape or pole configuration. Operates on condenser discharge principle from regular 115-volt, 60-cycle line. Produces charging outputs (depending on number of 100 μf condensers employed) from 100,000 to 200,000 ampere-turns through plug-in transformers, up to 3600 watt-seconds using wire-wound fixtures. Adapters for multi-pole rotors, rod, bar, ring and various other shapes available. Equipped with extensive system of safety interlocks for complete operator protection. Designed for continuous production use with low power consumption. Price of basic unit is less than $2100.

MODEL 889A de-magnetizes saturated magnets to any desired level of flux. Provides a precision method for rapidly treating permanent magnets, including the new core type instrument mechanisms. Used with Model 206A Booster or Model 107A Charger. Price $247.

MODEL 1295 is a stable, all transistorized Gaussmeter which provides a conservative accuracy of 3% over nine full-scale ranges: 0-100, 200, 500, 1 K, 2 K, 5 K, 10 K, 20 K and 20 K + gausses, using a single probe. Two standard reference magnets having ¾% accuracy are supplied. Weight is 12 lbs. Operates from battery or 115-volt, 50-400 cycle line. Price $420.

For ELECTRICAL INSTRUMENT CALIBRATION

A Model for Every Purpose and Price Range

MODEL 829 checks AC and DC meters of all types and ranges. Compact cabinet contains power supply, special Weston standard meters, Wheatstone Bridge and all circuits for quick, convenient instrument calibration to 0.5% accuracy by non-technical personnel. Automatic protection for both operator and instrument under test is provided by interlocks and high voltage discharge circuits. Net price $2650.

DUAL POTENTIOMETER DC STANDARD

Model 262B

MODEL 262B Dual Potentiometer Standards for calibrating meters to 0.1% through a range of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Uses L & N Brooks Mod. 7 pot. and Weston Mod. 5 standard cells. Voltage and current ranges are separate for the calibration of wattmeters. Operates on 105/125 volts, 50/1600 cycles, 350 watts, with internal voltage regulator. Operator is protected by interlocks. Price $15,600.

Also available are MODELS 261B and 454 Standards for calibrating AC meters to 0.5% through ranges of 10 millivolts to 1500 volts and 1 microampere to 200 amperes; MODEL 260C Standards for DC meters to 0.5% over ranges of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Accuracy of 0.25% using charts. These standards have been used for 8 years by the government services and leading industrial organizations.

For CRYSTAL TESTING

FOUR MODELS developed for Signal Corps under national crystal testing standardization program to measure resonance and anti-resonance resistance of quartz crystals including those covered by MIL-C-3098B. Capacitance, inductance and PI of crystal can be determined.

MODEL 459A (Improved TS-330/TSM) covers 800 kc to 15 mc, for 0.002% crystals, 0-9900 ohms. Operates from 115/230 v, 50-1000 cps. Price $1125.

MODEL 531 (TS-683/TSM) Crystal Impedance Meter covers range of 10-140 mc for 10-150 ohm crystals. Twelve fixed calibrating resistors of 10, 22, 30, 40, 51, 60, 68, 82, 91, 100, 120 and 150 ohms, plus a 100-ohm var. resistor for determining crystal resistance. Anti-resonance adapter also provided. Operates from 115/230 v, 50-1000 cps source. Price $590.

MODEL 541A (TS-710/TSM) for 10-1100 kc range crystals with resistances from 200 ohms to 0.5 megohms. An internal load capacitance is calibrated from 15 to 105 mmf with accuracy better than ±0.5 mmf. Power dissipated in crystal measured by built-in VTVM and ohmmeter. For 115/230 v, 50-1000 cps operation. Price $860.

MODEL 1207 (AN/TSM-15) covers range of 75-200 mc for 10-125 ohm crystals. Crystal voltage at series resonance is measured within 10%, effective resistance within ±5 ohms, and the power calculated. 18 C_o cancellation inductances and 1 uncompensated var. resistor supplied; 5 compensated var. resistors available. 115/230 v, 50-1000 cps. Price $1050.

DIGIVERTER

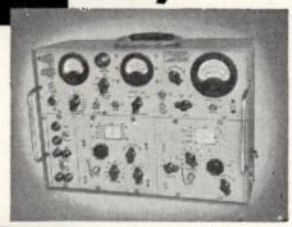
DIRECT READING, digital converter fits all vertical DCU system counters; changes random vertical numerals to easy reading "in-line" display. No modifications to counter. Remote readout also available.

DIGIDEC

DIGITAL CONVERTER for individual decade counter units provides "in-line" reading for OEM installation, or in special purpose test and computing equipment. DIGIDEC mounts over neon strip; replaces mask.

Variable Frequency Power Supplies

MODEL 150 is a stable, single phase, 150 VA power source of laboratory quality. Output frequency is continuously adjustable between 380 and 2400 cps with stability of 0.1% ±2 cycles. Price $575.



Prices are FOB Boonton, N. J. & subject to change without notice. *Send for product literature.*

Radio Frequency Laboratories, Inc. BOONTON N.J., U.S.A.

Designers and Manufacturers of Electronic Equipment since 1922

QUALITY INSTRUMENTS FOR PRECISION TESTING OF *Tomorrow's Circuitry*

RT-500 RECEIVER-TRANSMITTER TESTER

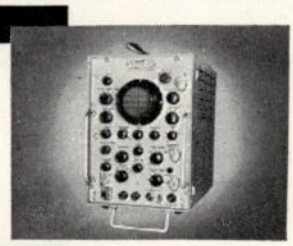
Equivalent to AN/TRM-1. Laboratory-quality portable instrument, designed to measure performance on transmitting and receiving equipment.

- Frequency Range: 190 KC to 400 MC
- Signal Generator Output: 2.5 to 100,000 microvolts into 50 ohms
- Transmitter Tester Power Range: 3 to 100 watts
- Volt/Milliwatt Meter: multi-range meter measures AC, DC volts and milliwatts

SG-25 STANDARD SIGNAL GENERATOR

Equivalent to AN/URM-25D. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

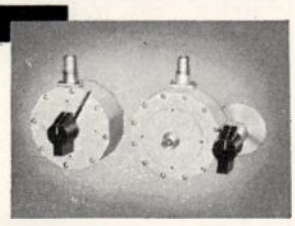
- Frequency Range: 10 KC to 50 MC in 8 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- High Output: 2.0 volts, 500 ohms impedance



SG-26 STANDARD SIGNAL GENERATOR

Equivalent to AN/URM-26B. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

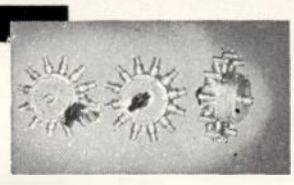
- Frequency Range: 4 to 405 MC in 6 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- Output Impedance: 50 ohms nominal



PO-400 PULSE OSCILLOSCOPE

Equivalent to AN/USM-38. Precision portable oscilloscope for analyzing amplitude and time characteristics of complex electrical waveforms.

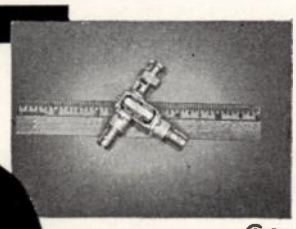
- Transient Response: 0.06 microseconds (rise time)
- Square Wave Response: less than 5% drop at 50 cycles
- Deflection Sensitivity: 0.1V RMS per inch
- Sweep: 1 to 100,000 microseconds per inch, triggered or recurrent



AT-120 R. F. STEP ATTENUATOR

Designed for use in output systems of signal generators, precision microvolters, IF strips of microwave receivers, etc.

- Frequency Range: 0 to 1000 MC
- Attenuation Range: up to 120 db in ten steps
- Output Impedance: 50 ohms standard, 75 ohms optional
- VSWR: 1.1 up to 500 MC, 1.2 up to 1000 MC



CS-200 SERIES COAXIAL SWITCHES

For all types of coaxial switching.

- Positions: up to 12
- Nominal Impedance: 5 ohms
- VSWR: 1.2 up to 500 MC, 1.3 up to 1000 MC
- Cross-talk for 12 Position: greater than 75 db down at 1000 MC

CM-300 CRYSTAL DETECTOR MOUNT

For general purpose in RF monitoring 50 or 75 ohm coaxial systems. Can be used with Trad Attenuator AT-120.

- Frequency Range: 10 to 1000 MC
- Accuracy: ½ db
- Impedance: available in 50, 75, 100, 150 and 225 ohms
- Maximum Signal Output: 2.5 V RMS

Trad has a complete, diversified line of electronic products, some of which are listed here. All products are available for speedy delivery. Trad's national representative organization is now being expanded. Interested reps may write or call George Trad at Prospect 6-7445 for appointment.

FOR SERVO COMPONENTS...

DYNAMIC
INSTRUMENT CORP.
THE SERVO SPECIALIST

Builder of miniature, high temperature, precision servo components of proven performance and dependability. Dynamic Instrument Corp.'s manufacturing skills are concentrated on servo components only.

NEW SERVOMOTOR

DYNAMIC's new A/C Servo Motor, developed for the Navy Bureau of Ordnance

- High torques at low control field power.
- Exceptionally rapid response.
- Fast stall acceleration.
- Superior internal damping.
- Rigid adherence to military requirements.
- Very low cost – due to radically simplified design.

Miniature 60 cycle Servo Motor, Size 11 Model M-100 (4 Frame Sizes: 5, 8, 10, 11) Pat. Pend.

MECHANICAL CHARACTERISTICS

Rotor Inertia (gm-cm²)	1.4
Torque at Stall (oz. in.)	.73
No Load Speed (rpm)	1450
Time Constant (SEC)	.005
Theoretical Stall Acceleration	35,000 (RAD/SEC²)
Operating Temperature Range	400°F.
Damping (DYNE-CM-SEC)	300.

ELECTRICAL DATA	FIXED PHASE	CONTROL PHASE
Voltage	115	115
Current (Stall)—MA	42	42
Power (Stall)—Watts	3.5	3.5
Effective R (Stall)—Ohms	3800	3800

NEW MAGNETIC CLUTCH

DYNAMIC's Magnetic Clutches, Brakes, and Clutch Brakes offer exceptionally high torques and long life.

- Highest output torques.
- Low control power.
- –85°F. to 400°F. operation temperature range.
- Fast response time.
- Extra long life under full rated loads.
- New design provides outstanding reliability.

Model D-103 Size 11 Clutch
(4 Frame Sizes: 11 models in each frame size)

TYPICAL CHARACTERISTICS

Output Torque	65 oz. in.
Breakaway Torque (energized)	.10 oz. in.
Breakaway Torque (de-energized)	.03 oz. in.
Inertia (outer shaft)	5.1×10^{-6}
Inertia (inner shaft)	4.7×10^{-6}
Backlash (engaged)	0
Power Consumption	3 watts
Response Time	As low as 3 millisecs
Weight	4.2 oz.
Max. Recommended Speed	10,000 rpm

ENGINEERING SERVICES

Application engineering for all Dynamic Instrument Corp. products. ALL TO MILITARY STANDARDS WHERE REQUIRED! Whatever your servo component needs, let DYNAMIC build the right one to your specifications.

Phone or wire us for information or consultation. 24 HOUR SERVICE.

NOISE FIGURE MEASUREMENT . . . NOISE GENERATORS

Mega-Node Sr.

INST.	RANGE	NOISE FIG. RANGE	PRICE
MEGA-NODE	5-220mc	0-16db @ 50 ohms 0-23.8db @ 300 ohms	$325.
MEGA-NODE SR	10-3000mc	0.20db @ 50 ohms	790.
MICROWAVE	1120-26,500mc	Fluorescent Tubes 15.8 ± .25db	270-690.
MEGA-NODES		Inert Gas Tubes 15.28 ± .1db	(with power supply)
RADA-NODE	5-26,500mc	0-23.8 ± .25db IF strips @ 30 and 60mc	$1,395 covering range 5mc to 400mc
MEGA-NODE 175-A	50-500mc	0-19db, 300 ohms	325.
MEGA-NODE 403-A	3-500mc	0-19db, 50 ohms	325.

SPECTRUM ANALYSIS

Sonalyzer
Model 30

INST.	DESCRIPTION	FREQ. RANGE	FEATURES	PRICE
VIBRALYZER	Vibration Frequency Analyzer	5-4400cps	Displays amplitude vs frequency vs time. Provides permanent record	$2500.
SONA-GRAPH	Sound spectrograph for frequency analysis of audio energy	85-8000cps	Records frequency and intensity to time	1995.
ECHO-VOX SR	Provides variable periods of time delay at audio frequencies	40-12,000cps	20 to 1600 millisecond delay range	1495.
SONA-STRETCHER	Speech stretcher for slowing speech to ½ normal tempo	100-4000cps	Has phono & tape recorder inputs	950.
AUTO-VOX	Variable audio time delay. Dual Channel Input.	40-12,000cps	Negative to positive passing through zero. Delay range: —100 to +720ms	1795.
SONALYZER MODEL 30	A 30-Channel all-electronic spectrum analyzer providing immediate visible display of complex waveforms up to 20,000 cps			1995.

OTHER INSTRUMENTS

Transalyzer

INST.	RANGE	RANGE OF MEASUREMENT	FEATURES	PRICE
KILO-Q	20cps-1mc	Q, 0-12.5, 0-25, 0-50, 0-125, 0-250, 0-500	60 mmf-.1mf Cap. Range	$895.
MICROLTER 50 VTVM	100cps-50mc	Full Scale: 1mv-1V in 7 ranges	May be used as 50mc video amp.	495.
TRANSALYZER	50kc-50mc	Measures Alpha and Alpha Cutoff—Collector and Emitter Current, 3 Voltages—Emitter to Base, Emitter to Collector, and Base to Collector		1595.
MEGA-MATCH	10mc-1000mc	Contin. tuned sweeping oscillator	Displays reflected energy. Checks matching impedance	895.
UTILATOR	4.5-220mc	Fundamental Freq. Utility Oscillator	0.7V rms into 70 ohms metered AGC'd	295.
GAIN SET	Complete Equipment for Making Precision Measurements of Gain or Loss in Components and Systems			1995.
MEGA-PIX	TV Sound-Picture	Color or Black and White Transmitter	.25V output into 70 ohms	925.
RADA-PULSER SR	Pulsed-Carrier Generator, 12-80 mc. continuously variable carrier frequency and pulse width			745.
AUDIOLATOR	15cps-15kc	Transistorized audio oscillator, battery operated. Flat to ±0.5 db over range. Output 1.0V rms at 600ohms		149.50
TRANSIFIER	15cps-15mc	Transistorized battery operated amplifier giving 10 db and 20 db gain		85.

A NEW LINE OF FROM

Precision Test Equipment JERROLD

FOR ACCURATE QUANTITATIVE MEASUREMENTS...
USING SWEEP FREQUENCY GENERATOR TECHNIQUES...

WIDE BAND SWEEP FREQUENCY GENERATOR • MODEL 900

$1260

Recommended wherever unusual versatility, high stability and constancy of output are essential. **SWEEP WIDTHS—AS WIDE AS 300 MC . . . FROM 200 KC to 1,000 MC.**

VHF SWEEP RANGE

Center frequency continuously variable from 0.2 MC to 250 MC. Sweep width continuously variable from a minimum of 0.1 MC, at any center frequency setting, to a maximum of 250 MC at a center frequency setting of 125 MC. Maximum output voltage variation is ±0.5 db with a minimum output of 0.4 volts RMS into a 50 ohm load.

UHF SWEEP RANGE

Center frequency continuously variable from 275 MC to 900 MC. Sweep width continuously variable from a minimum of 0.1 MC, at any center frequency setting, to a maximum of 100 MC at a center frequency of 275 MC, and to a maximum of 300 MC at a center frequency of 850 MC. Maximum output voltage variation is ±1.5 db with a minimum output of 0.5 volts RMS into a 50 ohm load.

$250

A HIGH SPEED COAXIAL SWITCH • MODEL FD-30

For the simultaneous display of two channels or voltages on an oscilloscope . . .

Frequency range of coaxial circuit is from DC to 250 MC with a VSWR of less than 1.1 at 50 or 75 ohms impedance. Switch contacts "Mercury-Wetted" with an adjustable switch rate of 30, 15 or 10 cps.

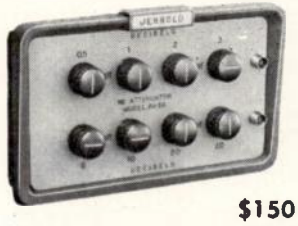
WIDE BAND SWEEP GENERATORS MODELS 601 and 602

Portable, wide band instruments designed for the test and alignment of LF, IF, and RF circuitry. The Generators feature an electronic, saturable reactor sweep circuit with a maximum sweep deviation of approximately 5 to 1. RF output on all ranges is fundamental.

MODEL 601

12 MC to 225 MC in eleven overlapping ranges. RF output of 1.0 volt RMS. Output flat with ± ½ db.

MODEL 602



4 MC to 112 MC in eleven overlapping ranges. RF output of 2.5 volts RMS. Output flat within ± ½ db.

Other Generators available on special order to cover any portion of the frecuency range from 15 KC to 225 MC.

$395

VARIABLE, LABORATORY ATTENUATORS MODELS AV-50 and AV-75

$150

Variable, switch-type attenuators from DC to 500 MC. The attenuators feature: 0 to 62.5 db attenuation, in 0.5 db steps; low insertion loss of ¼ db at 250 MC, and ½ db at 500 MC; VSWR of less than 1.15 at 250 MC, and less than 1.4 at 500 MC; newly developed rotary, coaxial switches that utilize a floating rotor with dual wiping, self aligning contacts mounted in a "Tel-F" dielectric; completely shielded switch sections; and rugged, compact design. Model AV-50 is 50 ohms with BNC connectors, and Model AV-75 is 75 ohms with Jerrold "F" Series connectors.

NOTE: New equipment, not ready for cataloguing at this time, features: Sweep Widths . . . up to 400 MC.; Sweep Outputs . . . up to 20 DBM.; Output Flatness . . . to ± 0.05 DB.; and Spectrum Coverage . . . from 15 KC. to 1,400 MC. For further information on all equipment, write: Dept. 23.

18 major groups
172 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications
II. Components
III. Controls & Instruments
IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 852 subproducts in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 141, 241, 275, 461, and 519.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

HUDSON WIRE COMPANY

makers of quality fine wire for over 55 years

America's pioneer wire specialists offer you wire products conforming to MIL and NAS specifications in the types and sizes you need!

HIGH TEMPERATURE TEFLON* INSULATED HOOK-UP & MISSILE WIRES & CABLES

(—90°C to +250°C) Conductors: 4% Silver Plated Copper (XC), Nickel Plated Copper (XN), Silver Plated Copperweld (XCW), Special Constructions (XSP), Silver Plated Aluminum (XA, at 47% the weight of copper with equal conductance) and Reinforced Core (XR, which provides a sheath of steel wires over an aluminum or copper core.) Insulations: Extruded Teflon* and Taped Teflon*. Colors: All solids & stripes. Sizes AWG 8 to 32.

HIGH TEMPERATURE TEFLON* INSULATED MAGNET WIRES (—90°C to +250°C)

Conductors: Soft or Annealed Copper per JAN-W-583. Insulations: Single, Double, Triple or Quad thickness. Sizes AWG 30 to 46.

FILM & FABRIC INSULATED MAGNET WIRES

Conductors: Conventional Copper. Film Insulations: Enamel, EZ-Sol (nylon), Hud-Sol (polyurethane), Formvar and Siliclad (silicone) all single and heavy. Film Sizes AWG 14 to .0006. Fabric Insulations: Celanese, Nylon, Silk, Cotton and Orlon, all single & heavy over bare wire or film. Fabric Colors: All solids and tracers. Fabric sizes AWG 20 to 40. All combinations of Film & Fabric insulations are available.

THERMO-PLASTIC INSULATED HOOK-UP & ELECTRONIC WIRES (105°C, 90°C, 80°C)

Conductors: Tin Plated Copper and other metals. Constructions: Solid, Stranded or Multi-Harness. Insulations: Polyvinyl and Polyethylene. Colors: All solid. Sizes AWG 10 to 24.

SPECIAL INSULATED WIRES

High Frequency Litzendraht. Voice Coil. Bifilar & Trifilar Formvar. Pig-Tail Leads. Braided Wires. Loop Wires. Silver Plated Nickel. Aluminum. Special Servings of Nylon & Celanese in colors.

STRANDED & BUNCHED WIRES

Conductors: Bare wires in a wide choice of non-ferrous metals. Coated and Clad wires in Silver Plated, Tin Plated, Nickel Plated and Copperclad. Concentric stranding, Bunched stranding, Rope stranding in finished Sizes AWG 10 to 32.

Hudson also manufactures a full line of Solid Round Bare Wires, Silver Plated Wires, Fuse Wires and Flat Wires, Electrical and Mechanical

HAVEG "TEFLON"* WIRE & CABLE

HAVEG®

*Trade name for du Pont's Tetrafluoroethylene Resin.

HOOK-UP WIRE—EXTRUDED
sizes A.W.G. 10 through A.W.G. 32, per MIL-W-16878B Type E and EE, and NAS 703, Type U Class A and C. Fifteen colors—one, two or three stripes.

HOOK-UP WIRE—FUSED WRAPPED
sizes A.W.G. 8 through A.W.G. 32 per MIL-W-16878B Type E. Ten solid colors, one or two stripes.

HOOK-UP WIRE—MINIATURE THIN WALL
extruded or fused wrapped insulation of .004 to .007 A.W.G. 22 through A.W.G. 32. Ten solid colors and stripes.

SHIELDED LEAD WIRE
extruded or fused wrapped, sizes A.W.G. 8 through A.W.G. 30 per MIL-W-16878B Type E and EE, and NAS 703, Type S Class A and C.

LEAD WIRE—HIGH TEMPERATURE
tape wrapped "Teflon" impregnated fiberglass braid. Sizes A.W.G. 6 through A.W.G. 28, 600 Volt (R.M.S.) and 1000 Volt (R.M.S.). Ten solid colors and braided stripes.

MINIATURE CABLES—Single or Multi-Conductor
extruded or fused wrapped primary insulation, shielded and jacketed with "Teflon", lacquered nylon braid, extruded nylon, silicone, or Teflon lacquered fiberglass or extruded vinyl. Sizes A.W.G. 18 through A.W.G. 30.

AIR FRAME WIRE
tape wrapped with a "Teflon" impregnated fiberglass braid per MIL-W-7139A. Sizes A.W.G. 6 through A.W.G. 22 in ten colors.

COAXIAL CABLES
Miniature coaxial cables with extruded primary insulation, shielded and jacketed with "Teflon", lacquered nylon braid, extruded nylon, silicone, or Teflon lacquered fiberglass or extruded vinyl. Available in 50, 75 and 95 O.H.Ms.

Request individual Bulletins for engineering data . . . and complete catalog of Haveg Wire and Cable constructions.

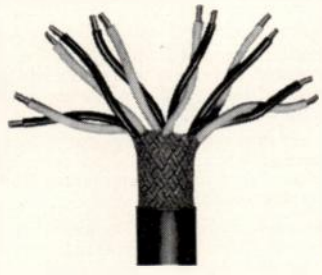
LEWIS WIRE PRODUCTS

MULTI-CONDUCTOR CABLES for MISSILES and ELECTRONIC APPLICATIONS



Combining the light weight, superior dielectric properties, heat resistance and solvent resistance of teflon*insulated conductors with the tough abrasion, temperature and solvent resistance of a woven nylon jacket, nylon finished, a cable has been made available that is particularly suited for use in missiles and electronic applications.

Individual wires having silver plated copper strands, insulated with teflon suitably color-coded in accordance with MIL-W-16878B, Type E, are cabled together and jacketed with a tough nylon braid with a nylon finish applied overall.
Available in various conductor sizes as required or in combinations of sizes consistent with standard manufacture.

Cables may be shielded with #36 tinned copper braid applied directly over the nylon braid and jacketed with a nylon braid or extruded PVC applied overall.

MULTI-CONDUCTOR CABLES OF THERMOCOUPLE MATERIALS

For permanent conduit installations, thermocouple wire cables are constructed to customers' specifications. Illustrated LEWIS Part PFN-9, a six pair, #16 solid iron-constantan (JX) cable with individual conductors PVC insulated and color coded white and red, twisted together then cabled with a #36 tinned copper shield woven overall and finally a 3/64 inch black PVC jacket applied over the shielding braid. A center core of asbestos fibers is used as an aid in forming the cable into a rounded contour.

Any thermocouple material may be made into such multi-conductor cables, or if desired, a cable combining electrical wires and thermocouple wires may be designed to fit your requirements. Cables to withstand environmental conditions of severe temperature extremes, moisture and abrasion are prepared with shielding braid on single or paired conductors or with an over-all shielding. Tell us of your requirements.

HIGH TEMPERATURE CABLE . . .

Suitable for operating temperatures up to 650°F with nickel-clad copper conductor and laminated insulation having superior dielectric strength and moisture resistance. In AWG sizes 22 thru 4/0. In accordance with MIL-C-25038.

EXTRA FLEXIBLE CABLE . . .

High Temperature and Moisture Resistant Electrical Cable. Lewis "EXFLEX" Cable, single and multi-conductor, superior for circuits on hinged or pivoted parts. Resistant to abrasion and temperatures to 500°F.

THERMOCOUPLE WIRE AND EXTENSION WIRE . . .

In iron-constantan, copper constantan, and chromel-alumel to MIL specifications or in custom constructions. Twisted and shielded, cabled, shielded and jacketed. Multi-pair cables, shield and jacketed for missile applications.

ELECTRONIC HOOKUP WIRE . . .

Teflon*insulated silver coated copper conductor with insulation in standard colors in accordance with MIL-W-16878B. Types E and EE.

The LEWIS ENGINEERING CO.
Naugatuck, Connecticut
WIRE DIVISION

By utilizing and combining the various qualities of fire, heat, abrasion and moisture resistance of asbestos, glass, silicones and Teflon*, we have developed many special wires and cables for avionic and electronic applications. We invite inquiries for cables and wire constructed to customers' specifications for special applications.

*DuPont Trade Mark

CALL THE MAN FROM TENSOLITE FOR HIGH-TEMPERATURE WIRE AND CABLE

Tensolite facilities are devoted exclusively to the engineering and manufacture of insulated wire and cable... featuring **TEFLON®** insulation for high temperature (—90 deg. C. to +250 deg. C.) applications. This specialization is your assurance of high quality in craftsmanship and materials, as well as prompt, efficient service at lowest possible cost.

HOOK-UP WIRE

TYPE E-EE
TO MIL-W-16878

FLEXOLON WIRE

A new concept in high temperature insulation developed by Tensolite's research and development laboratories. **FLEXOLON** wire provides the best properties of wrapped and extruded fluorocarbon insulation. Important features of this versatile hook-up and lead wire are:

- 250-foot minimum continuous production lengths guaranteed.
- Solid and striped combinations.
- Most flexible of all hook-up wire construction.
- High temperature range of —90 deg. C. to +250 deg. C.
- Greatest miniaturization in MIL-SPEC hook-up wire (smallest hook-up wire in the world).
- Abrasion-protected striping (the Color Guard Striping process).
- High dielectric strength (far exceeds required 600 V and 1000 V ratings).
- Consistent concentricity.
- Superior abrasion and cut-through resistance.

TENSOLON WIRE

Insulated with fluorocarbon high temperature resin.

Choose from:

Parallel wrapped ... utilizing an exclusive patented technique which assures greater concentricity and maximum flexibility (solid colors only).

Spiral wrapped ... with special cross-lapped construction and unlimited color coding; striping that meets commercial and military specifications.

Extruded ... featuring an extruded homogeneous fluorocarbon resin (solid and inked stripe combinations).

TENSOLEX WIRE

Insulated with extruded vinyl plastic.

Types B and C meet **MIL-W-16878.** They are high temperature hook-up wires rated for continuous use from —55 deg. C. to +105 deg. C. with or without nylon jackets.

Types WL and SRIR are manufactured in accordance with the joint Army-Navy specification **JAN-C-76** (Qualification approval Certificates Nos. 13725 and 13606A).

Types LW and MW are general purpose hook-up wires specifically designed for radio instrument, and military electronic applications. Designed to meet **MIL-W-76A,** they are recommended for use at temperatures up to 80 deg. C. in the internal wiring of electrical and electronic equipment.

TENSOLITE WRAPPED VINYL WIRE

Super-flexible wire designed for miniaturization applications at operating temperatures from —40 deg. C. to +60 deg. C.

AIRFRAME WIRE

TENSOLON AIRFRAME WIRE

Insulated with high-temperature resin, it is manufactured in compliance with **MIL-W-7139A.** Important features are:

- —90 deg. C. to +250 deg. C. temperature range.
- 600 Volt and prescribed overload operation.
- Rugged, abrasion resistant construction.
- Short-time emergency operation in event of fire.
- High resistance to chemicals.
- Excellent flexibility.

COAXIAL CABLE

TENSOLON
MINIATURE COAXIAL CABLE

Designed to meet **MIL-C-17B,** it is ideal for high frequency operation from —90 deg. C. to +250 deg. C. Insulation assures extremely low loss, high dielectric strength, and complete resistance to moisture and chemicals. A great variety of outer jackets permits the selection of cable well suited for many application requirements.

MULTI-CONDUCTORS

TENSOLON
MULTI-CONDUCTOR CABLE

Using conductors designed to meet **MIL-W-16878,** types E and EE. A large variety of standard and custom-designed constructions from single to 50 conductor assemblies are available.

TENSOLITE
MULTI-CONDUCTOR CABLE

Highly flexible, with vinyl insulation, it is available to meet a wide range of application requirements.

MAGNET WIRE

High temperature magnet wire — designed to meet **MIL-W-19583**—is ideal for coils and windings requiring high temperature application. It is supplied in wall thicknesses ST, HT, TT and QT in AWG sizes 18 through 44.

TELECOMMUNICATIONS ENGINEERS
- For 8 years, MSI has been serving the Industry including U.S. and International Governments.
- MSI has served Oil and Gas Companies, Power and Telephone Utilities, Broadcast and Industrial users, Federal, State and Local Governments, Transportation companies and Foreign Countries.
- MSI makes feasibility studies, does physical terrain surveys, engineers systems and supervises construction of Telecommunication networks—wire, carrier, radio, microwave, scatter, and television.
- MSI has also successfully done Independent Market Research and advised on advanced product development for the largest manufacturers of electronic communications equipment.
- MSI provides expert consultation in the preparation of proposals for extensive telecommunications networks in related military projects.
- We will gladly furnish our client list and the MSI successful performance history. Our experience is worldwide.

GASEAL®
Pressurized metal hermetic seals for easy installation anywhere without special tools. Withstand more than 850 degrees F., high pressures and altitudes. For any sealing configuration.

Best Insurance for Component and Systems Reliability!

Corrosion...dust...fungus...altitude...humidity...pressures. *True* hermetic sealing completely eliminates their usually disastrous effects on electronic and mechanical apparatus.

GHS offers uniquely qualified techniques and specially developed facilities in the field of hermetic sealing. They are guaranteed to add a *permanent plus* to your product reliability.

For inert gas filling, 100% mass spectrometer leak testing of any assembly, and every phase of *true* hermetic sealing to meet military or industrial specs, GHS in-plant services are unequalled.

The GHS Megpot®

Quickly, efficiently tests your components, insulation. Features 10 million megohms, 100, 200 or 500V DC, automatic "charge" and safety controls, non-destructive (as high as 5000V AC) high-potential test set with current limiting and automatic shut-off circuit. Portable.

Write for Specific Information . . . and use the GHS Advisory Services without obligation.

SO SAFE

they can't damage a cigarette ...let alone a wire or cable!

ARROW Staple Guns

Faster! Cheaper! Hold Better!

No short circuits possible! The driving blade automatically stops short, so staples can't damage wire covering.

T-75 For non-metallic sheathed cable up to ½" in diameter. Uses ⅜", ⅝", ⅞" tack-pointed staples. List: $15

T-25 For any wire up to ¼" in diameter (telephone, bell, thermostat, hi-fi, radiant heat, inter-com wires, etc.) Uses ⅜", ⅝", ⅝" round top staples. List: $15

T-25B for burglar alarm wiring, drives staples flush. List: $15

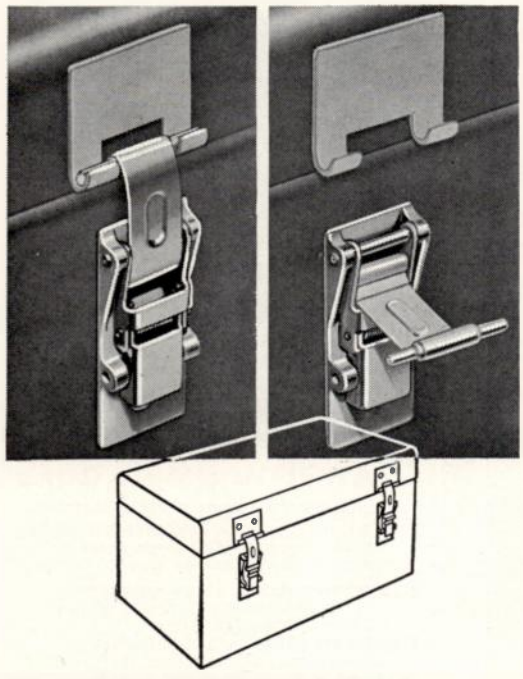
2 new QUICK OPERATING FASTENING DEVICES

CAMLOC®



MODEL 7C

HARNESS CLAMP

speeds up installation and maintenance

- Opens or closes with a quarter turn
- Clamp captive to structure
- Easily mounted with rivet or bolt
- Holds wire bundles, hose, cable, conduit
- Rounded edges prevent scarring, cutting
- Corrosion resistant
- Resists shock and vibration
- Sizes range from ¼" to 1¼"

Ask for Bulletin No. 7C

save space and weight with

MODEL 30L

MINIATURIZED

TOGGLE TENSION LATCH

- Ideal for equipment boxes stored in limited space
- Compact, light weight with shallow envelope
- Quickly operated with lift-lever release
- Ultimate strength 150 lbs.
- Provision for safety wire
- Simplified mounting with aluminum spot weld

made by the cost-saving

BEAD CHAIN

Multi-Swage Process

For Small Metal Parts

TRADE MARK

The advanced method for producing small metal parts — hollow or solid — headed, grooved, shouldered, etc., — dimensions about ¼" or less diameter and up to 1½" length. This high speed process usually requires runs of 100,000 pieces, other than stock items, to justify job set-up costs.

Contact Pins have a tightly swaged seam with hole through entire length for easy threading of lead wires. Ideal for plastic, ceramic, metal and other bases or panels.

Male & Female Friction Contacts are available to close tolerances, maintain "holding power" with ease of engagement and release.

Terminals in many special and standard types, including turret-type — for flared, rolled, split, spun and other assemblies.

BRADY

Self-Sticking

PERMA-CODE WIRE MARKERS

Positive "around-the-wire" identification for the electronic industry. Brady markers tell which wire goes where — quickly . . . increase production, cut costs . . . conform to NEMA-ASA, and MIL specifications. 3 stock sizes: 1½", ¾" and ½". 9 job tested materials.

- MINIATURE MARKERS permanently identify wires under 5/32" dia.
- BLUE-STREAK® RELEASE COATING assures fast distortion-free application.
- WRITE FOR *FREE* WORKING SAMPLES!

NYLON SCREWS
MOLDED TO
CLOSE TOLERANCES

Just one of the many kinds of fasteners automatically mass produced by GRC's exclusive molding methods for highest quality and uniformity . . . greatest economy.

High strength to weight ratio . . . built-in electrical insulating properties . . . stability over a wide range of temperatures . . . non-magnetic, non-corrosive, chemical resistant, resilient and elastic . . . these unique GRC nylon screws are self-sealing, don't loosen under vibration, conform to irregular shapes, make possible radical product changes . . . improved design.

Natural color set and machine screws in standard head types available from stock in #2 through ¼" thread sizes, in lengths up to 1". Other colors and sizes to order.

Write, wire, phone TODAY for catalog and prices.

Specialists in Precision Molding of Intricate COIL FORMS

HYDRO
ENGINEERED PLASTICS

LOW COST FAST PRECISION MOLDING of NYLON* KEL-F* FIBERGLAS*
and other plastic materials

and other ELECTRONIC COMPONENTS comprising delicate MOLDED-IN METAL INSERTS

The use of "universal" molds of exclusive HYDRO design assures low-cost tooling and quick delivery of all types of coil forms. Precision tooling insures a flash-free product held to close tolerances. This service is particularly attractive for short runs where high mold costs can raise unit prices of component parts substantially. Similar savings are possible on many other electronic components. *May we quote on your requirements?*

HYDRO MOLDING COMPANY, INC.

Engineering and Manufacturing in Plastics

PLATTSBURGH, NEW YORK

GUDEBROD lacing tape *holds knots!*

Here is the lacing tape that solves the knotty problems in complicated harness work. Gudebrod Flat Braided Lacing Tape is the ultimate in knot strength and freedom from slip. The special Gudebrod method of applying finishes makes the tape stick like a fly's foot... knots just won't slip. Harnesses are firm and stable when tied with Gudebrod Lacing Tape.

For harness or winding applications—wherever unfailing performance under severe environment is vital—there is no substitute for proved Gudebrod quality. Write us your problems ...ask for samples of Gudebrod Lacing Tape today.

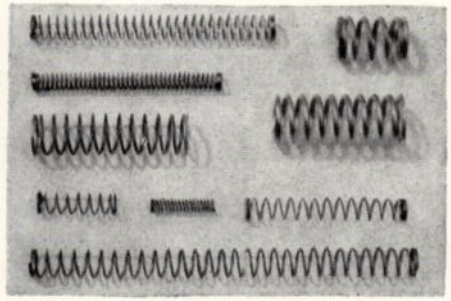
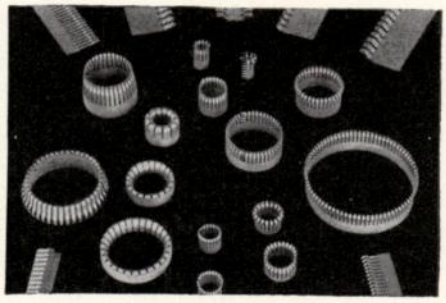
I-S SPRINGS of beryllium copper *can help you*



IMPROVE YOUR PRODUCT'S QUALITY, REDUCE YOUR COST, INCREASE YOUR PRODUCTION

Instrument Specialties Company specializes in the design and custom manufacture of age-hardened alloy springs. With our specially developed processes and machines, our engineers are able to realize the fullest performance potential from the superior spring materials around which I-S service to designers and manufacturers has been developed.

FOR HIGH PRODUCTION



STRIP SPRINGS

Fabricated from beryllium copper.
Easily handled, readily broken apart by hand or used in automatic or semi-automatic assembling devices and contact riveting machines.
Individual pieces may be broken off without trace of burr.
Eliminate sorting, untangling and handling of loose pieces.
Springs may be produced in strips to various shapes; formed angles may be held within plus or minus one degree.
Heat treated in multiple fixtures to insure uniformity, close tolerances and elimination of variations in spring-back.

COIL SPRINGS

Made from laboratory tested beryllium copper wire.
Special coiling and heat treating equipment insures 100% uniformity.
Guaranteed rigid tolerances held on diameter and load tests at specified deflection.
These factors combine to assure increased service life through higher endurance strength – make products perform more consistently by eliminating drift, set or fatigue. Furthermore, they eliminate expensive hand adjustment and reduce inspection costs of finished product.

FOR LOW ACTIVITY

HIGH FREQUENCY SPECIALTIES

We are equipped to supply standard mating parts for use with 2C-39, 2C-40, 2C-43 and 3C-37 tubes, or custom made parts in related fields.
Grounding strips and contact fingers can be supplied in standard or special contours.
"Flea" contacts for co-planer type subminiature tubes and transistors.

SHORT-RUN SERVICE

For those who need quick delivery of parts in pilot quantities or require a low-cost proving ground for spring designs. I-S methods eliminate expensive tooling. Laboratory controlled, precision produced—yet at lower cost than is possible with permanent, high-activity tools.
We are equipped to handle conventional beryllium copper stampings and screw machine products in short runs or in high production.

"MICRO ··· PROCESSED" I-S BERYLLIUM COPPER SPRINGS

A COMPLETE ENGINEERING AND SAMPLE SERVICE

When your product is in the design stage, let us show you how I-S springs of beryllium copper may be designed to fit your needs. Ample stock, flexible facilities, short set-up time speed production of sample lots and trial orders.

PRECISION

The Only **COMPLETE COIL FORM SERVICE** *Available...*

- SQUARE TUBES
- ROUND TUBES
- RESINITE COIL FORMS
- BOBBINS
- MANDRIL SERVICE
- FABRICATING SERVICE

SQUARE AND RECTANGULAR TUBES

Produced in any length, shape or size from 1/16" to 8", wall thickness from .010 to .125. Fabricated from dielectric kraft, fish paper, acetate, other patented materials or combinations. Bowed sidewall or Di-Formed construction.

ROUND TUBES

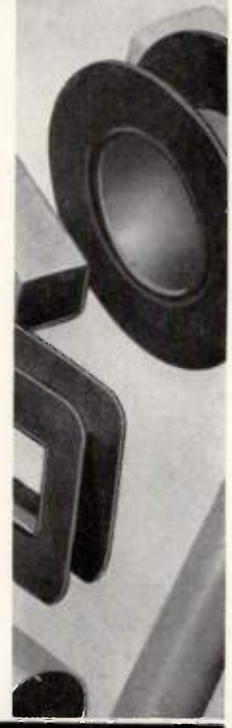
Produced in any decimal size up to 8" I. D. Fabricated from kraft, fish paper, cellulose acetate, mylar, polystyrene, quinterra, fibre glass and other dielectric materials.

RESINITE COIL FORMS

These coil forms have the highest resistivity of any resinated product. Furnished plain, embossed, internally threaded or triangular shape . . . also flyback transformer forms.

BOBBINS

Supplied round, square or rectangular. Cores fabricated from any of the above materials. Metal, asbestos, plastic or fibre flanges. Constructed to fit smaller spaces and permit multiple winding.



MANDRIL SERVICE

Accurately ground steel and aluminum coil mandrils at cost economy comparable to commonly used undependable wood or undersized steel mandrils.

FABRICATING SERVICE

We have modern high speed equipment to provide you with any special shape or form . . . rolled, spun, flared, punched or formed to your particular requirement.

Ask about Precision's complete coil form service. Request informative bulletin.

Sealectro PRESS-FIT® TEFLON† TERMINALS

ONE-PIECE Sealectro Teflon Terminals (eliminating hardware, such as screws, nuts, washers, lockwashers, sealing) save material, labor, time, trouble.

Here is **the outstanding selection** of types and sizes—over 800 different miniature and subminiature standoffs and feedthrus; jacks and plugs; connectors; taper-pin receptacles. Wide choice of lug styles and platings. And available in **nine RETMA code colors** for circuit and function designations.

Sealectro Insertion Tool Directory assures correct insertion of each Press-Fit type, while Sealectro's application-engineering service insures complete satisfaction.

Small Quantities: For the convenience of prototype designers, development labs, special equipment builders, experimenters and others, Sealectro Press-Fit terminals are stocked by industrial distributors. Sixty-odd types most generally used, are available locally.

Production Quantities: Deal directly with the Sealectro plant. The local Sealectro field representative is always "at your service!"

STANDOFFS

Wide selection of miniature sizes in voltage ratings up to 4000. For components stressing higher voltages rather than space-saving. Choice of lug styles and platings. In nine RETMA code colors.

Also in subminiature sizes for miniaturization programs. Operating voltages up to 750. Choice of lugs, platings, colors.

FEEDTHRUS

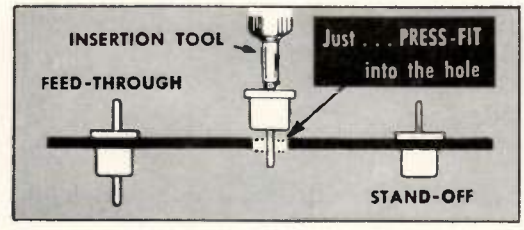
In miniature sizes and choice of lugs including hollow-tube style, facilitating connections through metal chassis or casing. Voltage ratings up to 5500 in larger sizes. Subminiature sizes for ultra space-saving, in voltage ratings up to 750. Choice of lug styles, platings, code colors.

JACKS

Rugged miniature and subminiature test-point jacks featuring either stamped or machined beryllium-copper contact members with bull-dog grip. Take standard instrument test probes or companion plug. Ideal for test points on metal panels, connecting to circuitry or components for external testing, and for unbreakable metal-plate patch-cord boards. In nine RETMA code colors. Plus New Right-Angle Printed-Circuit Jack. Write for samples.

PLUGS

Choice of types and sizes. Used in conjunction with Press-Fit jacks, and also as male member of breakaway connectors. Connecting wire slips through hollow-tube probe and is dip-soldered. In nine RETMA code colors.



TAPER PIN

Individually-insulated precision-machined receptacles for standard taper pins, taking advantage of the simple, fast, economical Press-Fit installation. Available in feedthru and standoff types, as well as high-voltage designs with extra-long leakage path. In nine RETMA code colors.

* REG. T.M. PEND.

Install them FAST and TO LAST!

Fastest, simplest, most economical terminal installation, in three steps: (1) Punch or drill hole; (2) Countersink entrance edge according to Sealectro's time-tested specs; (3) With Sealectro-approved insertion tool in chuck of drillpress (power off) or hand arbor press, center over hole and apply pressure, smoothly and easily seating the Press-Fit terminal in place. That's all there is to it. And genuine Sealectro Press-Fit terminals stay put—for keeps!

Sealectro CONHEX*

SUB-MINIATURE R.F. CONNECTORS

Radically different. Provably *better*. And you can tell them at a glance—by their *hexagonal* bodies. The only connectors that can be wired and rewired in factory, lab, shop or field, *without special tools*. Typical advantages:

Successfully withstand pull-out strain in excess of 20 lbs.

Captivated contacts insure proper engagement of mating parts.

Clamping parts, insulators and contacts readily assembled on cable before insertion in connector body.

Gold-plated hex stock allows assembly with usual pliers or small wrench.

Contacts soldered to center conductor of cable, insuring proper connections.

No distortion of cable insulation that might affect electrical characteristics.

Flexible design accepts all RG-188/U MIL cable diameters.

50-OHM "CONHEX" TYPES SHOWN

Type 3000 Cable Plug	Type 3002 Panel Receptacle	Type 3004 Cable Feedthru
Type 3001 Cable Jack	Type 3003 Panel Jack	Type 3005 Right-Angle Plug

Also available in 75- and 95-ohm impedance sizes.

* TM reg. pend.

Send for them . .

The big Sealectro "Press-Fit" catalog acknowledged as the "bible" of Teflon terminals — is yours for the asking.

Also a free subscription to the bi-monthly TERMINALOGY, dealing with terminal developments, applications, installations.

Write on your business stationery!

Better Coils begin with PARAFORMED PAPER TUBES

- *No sharp outside edges to cut wire*
- *No need for wedges to tighten wire*
- *Permits winding coils to closer tolerances*
- *Allows faster stacking of wound coils*
- *Has full rigidity and physical strength*

ANY SIZE—SQUARE OR RECTANGULAR

PARAFORMED paper tubes simplify coil winding operations and speed production, yet cost no more. In the exclusive PARAFORM method of tube making, no artificial heat or pressure is used —*Paraforming* takes place at the time of spiral winding. Hi-Dielectric. Hi-Strength. Kraft, Fish Paper, Acetate, Red Rope or any combination wound on automatic machines. *Produced from stock arbors or special sizes engineered for you.* Can also be supplied in regular or with slight bow.

Write on company letterhead for **STOCK ARBOR LIST** *of over 2000 sizes*

FLEXIBLE SHAFTING

ENABLES YOU TO TRANSFER POWER OVER, UNDER, AND AROUND OBSTACLES ECONOMICALLY AND EFFICIENTLY

Circle Ess Flexible Shafts offer economical construction and low maintenance costs for remote control applications. Many manufacturers reduced expenditures, and saved space by using flexible shafting to eliminate alignment problems and ALL gearing. For complete information about Circle Ess Flexible Shaft assemblies and our Adapters used with Flexible Shafts write to us on your letterhead.

DELL

Precision Quality

FUSED QUARTZ

Clear Fused Quartz Custom Fabricated in Commercial or Optical Grades

Fused Quartz provides high transparency, high transmission of ultra-violet and thermal properties particularly adaptable for special light sources in therapeutic and photochemical equipment. Resists scratching and weathering; has excellent mechanical strength.

Let Dell supply Fused Quartz for —

- Absorption Cell Plates
- Windows
- Electrical Insulators
- Plungers
- Microscope Slides
- Cover Slips
- Cell Spacers
- Phase Shifters
- Delay Lines

Complete Optical Service on Precision Glass Fabrication including —

- IR Domes
- Filters
- Prisms
- Lenses
- Optical Flats
- Mirrors
- Commercial Flats
- Windows
- Attenuator Blanks

Precision drilling a specialty—tolerances held to specifications. Technical assistance is available to help solve your problems. Send for brochure.

NETIC CO-NETIC MAGNETIC SHIELDING

Non-Shock Sensitive, Non-Retentive, No Periodic Annealing, Shaped to Your Application

Permanently unaffected by shock or vibration from usage, drilling, cutting, punching, bending, etc. For maximum effectiveness, all possible joints are heli-arc welded. Sheds magnetic forces like a duck's back sheds water. Will not become magnetized. Permanently non-retentive — negligible residual magnetism. No periodic annealing required.

Provides simultaneous high and low intensity shielding as well as high and low frequency shielding or any one of them. Aids miniaturization by making possible placing components close together, even mounted on the shield itself. Can be furnished tinned, ready for soldering—without affecting shielding qualities. Available as raw material if desired for fabricating parts in your own plant.

Typical applications include tape container shields to protect broadcasting, military and automation tapes, cathode ray tube shields, photomultiplier tube shields, transformer shields, magnetron shielding, 7 & 9 pin tube shields, portable measuring chambers for simulated pressure, vacuum, altitude and non-pressurized testing of delicate instruments in laboratory or field, shields for motors, tape heads, submin. encap. uses.

NOW! Wrappable Foil 15" wide (Co-Netic) and 19 3/8" wide (Netic) simply, quickly shaped to enclose any component, insuring immunity from any interfering magnetic fields. Also aids miniaturization, increases your market.

MAGNETIC SHIELD DIVISION PERFECTION MICA CO.
1322 No. Elston Avenue • Chicago 22, Illinois

THE BATTELLE STORY ... more than 26 years of progress and service to industry and government in every field of industrial science.

We are proud of this record and the confidence placed in us by hundreds of the leading industrial organizations who bring many of their special research problems to us.

We are dedicated, therefore, to maintaining the high standard of our research performance.

Engineers and scientists who enjoy untangling knotty scientific research problems and thrive on individual responsibility in a climate of mutual respect and cooperation find careers at Battelle truly satisfying and attractive.

particular opportunities for electronics and physics research in

magnetics • computers • reliability • electrostatics • solid state • reactor controls • ultrasonics • electron tubes • components • feedback controls • communications •

for B.S., M.S., Ph.D. graduates

Career opportunities in practically all fields of technology exist at Battelle. Look into the possibilities in your field by writing to the...

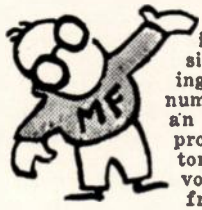
New York Testing Laboratories, INC.

"Serving Industry Since 1919"

- **For forty years, New York Testing Labs has set a standard for accuracy and quality . . . whatever the testing need, you'll find the experienced research and testing staff you want here.**
- Electronic testing on Switches, Plugs, Transformers, Resistors, Capacitors, Relays, Servo Units, Connectors, Potentiometers, Jacks, etc.
- Environmental testing in accordance with MIL-E-5272A Vibration, Shock, Explosion, Acceleration, Altitude, Cold, Humidity, Heat, Sand, Dust, Explosion, Fungus, Salt Spray, etc.
- Complete Chemical, X-Ray, Physical, Metallurgical Testing Facilities, Engineering, Research and Development, Product Evaluation.



Write or call for our free Facilities Brochure.

MARTIN HARD COATING

INSULATES AND PROTECTS ALUMINUM

Martin Hard Coating is a tough abrasion resistant coating applied to aluminum and its alloys by an electro-chemical process. As an insulator, it will withstand voltage breakdown from 500 to 3700 volts.

Typical applications include:

Transistors—
Coating the wafer to act as an insulator and heat sink to withstand breakdown voltage of 600 volts minimum and temperatures to melting point of aluminum.

Tuning Mechanisms—
Coating intricate and precision dial mechanisms offers remarkable resistance to industrial and salt atmospheric exposures.

Electronic Components—
Coating moveable parts on controls, tuning devices, switches, relays, connectors and any aluminum part that may be subjected to wear, gas fumes, moisture or dust.

Request your copy of "Martin Hard Coating" by writing to—

DO YOU NEED *Automation* FOR FINISHING WIRE LEADS WITH TERMINALS ATTACHED?

SOME EXAMPLES OF TERMINALS ATTACHED BY ARTOS MACHINE

NEW ARTOS TA-20-S Performs 4 Operations *Automatically!*

Artos TA-20-S with guard raised

1. Measures and cuts solid or stranded wire 2" to 250" in length.
2. Strips one or both ends of wire from 1/8" to 1".
3. Attaches any prefabricated terminal in strip form to one end of wire. (Artos Model CS-9-AT attaches terminals to BOTH ENDS OF WIRE simultaneously.)
4. Marks finished wire leads with code numbers and letters. (Available as optional attachment.)

PRODUCTION SPEEDS up to 3,000 finished pieces per hour. Can be operated by unskilled labor. Easily set up and adjusted to different lengths of wire and stripping—die units for different types of terminals simply and quickly changed.

ENGINEERING CONSULTATION . . . recommendations without obligation. Special adaptations made to fit requirements of your product. Machines for all types of wire lead finishing.

AGENTS THROUGHOUT THE WORLD

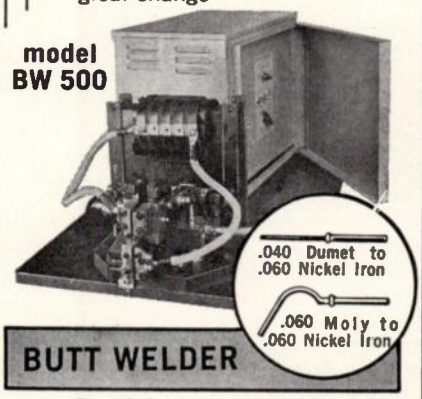
TWEEZER WELD

Precision Resistance Welding Equipment

NOW produce up to 6,000 welds per hour . . . automatically . . . with one operator.



model DC 80

BENCH MOUNTED STORED ENERGY WELDER

- New TW5 low friction welding head
- Stored energy panel of 80 Watt second capacity
- Discharge time of 0.0008 to 0.0012 second
- Permits welding of difficult materials, i.e.: copper, silver, tungsten, etc.
- Reliable welds without discoloration, deformation, metallurgical change

model BW 500

BUTT WELDER

- Precision low friction butt welding fixture
- Now widely used throughout the electronic industry
- Synchronous welding control
- Precision adjustments for aligning the wires
- Can be adapted to other Butt Welding applications

SONOCEN
ULTRASONIC CLEANING EQUIPMENT

For "micro-cleaning" of Tube and Transistor parts ● Switches and Relays ● Ball Bearings ● Circuit Boards ● CRT Necks ● Quartz Crystals ● Instrument Parts ● complete Chassis.

GENERATORS

Generators AP-50, AP-25, AP-10 with Transducer/Tank units.

MODEL	TANK VOLUME (Gals)	R F OUTPUT Watts Avg	Peak
AP- 10	0.6- 6	65	260
AP- 25	1.2- 12	125	500
AP- 50	2.5- 25	250	1,000
AP-100	5- 50	500	2,000
AP-200	10-100	1000	4,000
AP-500	30-300	3000	12,000

TRANSDUCERS

Immersible Transducers hermetically sealed in Stainless Steel: integral Transducer/Tank units from ½ to 25 gallon capacity.

INTEGRATED UNITS

C-Series Cabinet Units, R Series Roll-Around units, with optional filters, rinse and dryers.

GLASS WORKING LATHES

MODEL HSD

$1995.00 f.o.b. Grass Valley, Calif.

GENERAL SPECIFICATIONS

Maximum length overall	63½"
Maximum width overall	18½"
Maximum length spindle nose to spindle nose	36½"
Height	21¼"
Radial clearance above apron	9"
Spindle hole diameter	4½"
Approximate shipping weight	550 pounds
Net weight	Approx. 400 pounds

STANDARD EQUIPMENT

Variable speed pulley assembly
Two face plates
One collet draw-in bar
One twelve-fire single jet adjustable oxygen-gas or oxygen-hydrogen burner
Hand carburetion control
Foot pedal control of air or nitrogen supply and of oxygen-gas volume
Main air valve controlling air in either or both spindles
⅓ h.p. motor, 110 volt, single phase, single speed, 60 cycle, AC
Double end spindle adapters
Two motor belts
One motor pulley

DO YOU KNOW?

That a first class glassblowing job requires accurate alignment of rotational axes between the headstock and footstock?

That variable spindle speed gives another dimension to your technique?

That simple chucking attachments supply versatility for wide varieties of applications?

That special chucking for your industrial procedures, or laboratory practices are available?

That Litton Jet-mix fires are universally used in glassblowing to prevent reducing conditions?

That Litton Lathes have been the standard of the vacuum tube industry for 22 years, and have been constantly improved?

That you can get these precision tools at reasonable cost, in eight sizes, with swing from 8" to 42", and working length from 20" to 75½"?

Let us send you complete specifications and prices on our line of equipment and tools for the Vacuum Tube industry and for general research and development laboratory use.

High Speed, Versatile Toroid Winders for Production or Laboratory

These simple, rugged and versatile toroid winders, Models T and T-2, have been carefully scaled to cover the most used range of wire and core sizes.

MODEL T

High speed, single ring machine without slider or other projection on the bobbin permits maximum production through relatively small ID's. Has extra large wire capacity often eliminating expensive splices.

MODEL T-2

Adaptation of Model T designed for winding smaller coils while maintaining all the production advantages. These two high speed toroid winders supplement our complete line of winders that are tailored to encompass every winding production need.

Also power-fed models with wire capacity as heavy as No. 5 AWG

We'll be pleased to send you complete information. Write or phone:

All-purpose, versatile... ideal for laboratory and experimental use

From a wide variety of fine coil winding equipment for every need: Model W, available with adjustable cam traverse, winds every coil pattern except toroids. WX has a continuously variable feed or gain control; allows rapid set-up without changing gears.

MODEL W

The Models W and WX are the only commercial machines capable of winding Lattice-Bobbin-Interleaved-Single Layer-Bank-Interwoven coils.

MODEL WX

The perfect machine to cut costs and still provide exact set-up gear ratios for standard production machines. The Model WX and W are equally suitable for high production.

ONE CONVENIENT SOURCE
for ALL Your High and Ultra-High Vacuum Needs

Now that you've decided that you can make a better product cheaper by using high or ultra-high vacuum processing, why not do it the easy way? Save time, money, and frustration by taking advantage of the "one stop" service offered by NRC. This is your one convenient source of a complete line of high and ultra-high vacuum components, equipment, and systems, PLUS a wealth of practical information on how to use them profitably.

VACUUM PUMPS, GAUGES, VALVES

VACUUM PUMPS

Typical arrangement of versatile two inch "building block" pump kit for laboratory or production. Pressures to 10^{-7} mm Hg.

MECHANICAL

Single and two-stage from 1.25 to 400 CFM. Gas Ballast keeps pump oil uncontaminated by condensables.

BOOSTER AND DIFFUSION

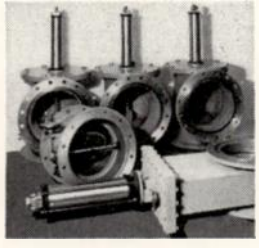
Oil and mercury. Capacities 10 to 40,000 CFM. Pressures below 10^{-7} mm Hg. Special low backstreaming models available.

MECHANICAL BOOSTER

Provides "clean" vacuum to below 10^{-3} mm Hg. Capacities 1000 to 12,000 CFM.

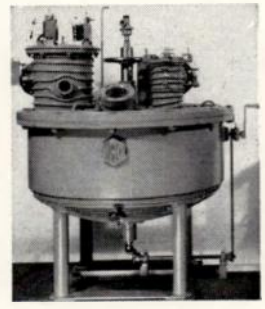
ULTRA-HIGH VACUUM PUMPS

Molecular drag, titanium adsorber, and ion pumps for very clean vacua to 10^{-12} mm Hg.



VACUUM GAUGES

Model 520 Alphatron® Ionization Gauge. Range 1000 — 0.0001 mm Hg.



Wide line of direct reading, total pressure gauges for accurate measurement from atmosphere to less than 10^{-12} mm Hg. Thermocouple, Pirani, and ionization gauges, including Alphatron®, burn-out proof, ultra-high vacuum, and conventional types.

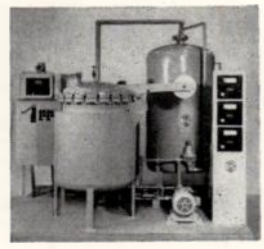
VACUUM VALVES AND HARDWARE

Air release, ball, throttling, high conductance, angle, wye, globe, and slide valves. Manual and air operation. Bronze, mild and stainless steel, aluminum. Bellows and O-ring sealed. Sizes from ⅛" to 36". ALSO seals, flexible connectors, cold traps, and accessories.

TANTALUM SINTERING AND OTHER VACUUM FURNACES

Three-zone indexing furnace Model 2915R for production tantalum sintering.

NRC has built and operated more high vacuum furnaces than any other organization in the world. Among these are batch and semi-continuous, resistance and induction, tantalum sintering furnaces. Other induction and resistance furnaces with capacities from 2 to 5000 lbs. Cold mold and skull arc furnaces with capacities from 2 to 10,000 lbs.



LEAK DETECTORS AND SYSTEMS

Inexpensive Model 4902 finds leaks as small as 10^{-6} cc/sec. Rugged, convenient, simple, fast recovering, it guarantees repetitive results.

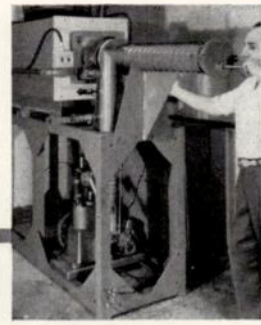
Bench, rotary, in-line, etc., systems for production line quality control of relay cases, transistor housings, hermetic and glass to metal seals, wave guides, etc. Halogen and helium sensitive detectors for leak locating in manufactured products and in vacuum and other process equipment.

VACUUM IMPREGNATING AND DRYING

Pilot plant or production line drying, degassing, and impregnating systems for improving the dependability and electrical characteristics of capacitors, transformers, cables, and other components.

HIGH ALTITUDE TEST CHAMBERS

Standard chambers with diameters, 12" to 66" for simulating altitudes to 100 miles. Special chambers for altitudes to 400 miles.



SEMI-CONDUCTOR PRODUCTION EQUIPMENT

Low-cost standard furnace for growing single crystals of silicon, germanium, and intermetallic compounds.

Belljar and tank vacuum metallizers, diameters 12" to 66", for depositing thin films to precisely controlled thicknesses of from one molecule to several mils.

Two-zone 5" diameter muffle vacuum heat treating furnace.

ULTRA-HIGH VACUUM SYSTEMS

Standard and special systems for pressures to 10^{-12} mm Hg. incorporating improved ultra-high vacuum components.

MODEL 999 BATTERY CHARGER

Model 999 Charger is a fully automatic, constant current type unit, capable of charging three batteries independently and simultaneously. Includes a discharge circuit designed specifically for the maintenance of silver-zinc batteries.

Constant current is maintained throughout the entire charging cycle except at the initial start when battery is practically a short circuit. At this point the charger surge is limited to less than ten amperes for the short duration required to bring battery terminal voltage up.

Charger terminal voltage automatically regulates to maintain current constant from a theoretical starting voltage of zero to a critical range of 28-28.5V.

At this level the battery is considered charged and charger automatically shuts off.

Charger is equipped with input line cord, three sets of charging leads with Cannon 11751 plug and one set of discharge leads.

Input: 115 volts, 1 phase, 50/60 cycles
Output: 3- independent outputs, each 5-6 A @28.5 Volts
Discharge Circuits: 1-75 Amps, 1-20 Amps

MAGNETIC AMPLIFIER REGULATED RECTIFIER—MODEL MAR 120-10

Input:	115 volts, 1 phase, 60 cycles
Output:	10 A @ 120 volts nominal ± 10%
Regulation:	Less than 1% from zero to full load with ± 10% line change
Ripple:	1% RMS
Response:	.2 seconds
Cooling:	Convection
Meters:	3½" Voltmeter and Ammeter
Cabinet Size:	28" H x 22" W x 15" D Wall or bench mounted

Model MAR 120-10 is a ruggedly constructed magnetic amplifier regulated power supply using high efficiency silicon diodes for reference circuits and germanium or silicon for the power rectifiers.

Narda SonBlasters offer the most complete line of lowest-cost mass-produced ultrasonic cleaners!

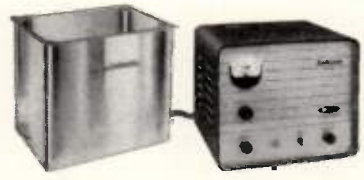
Narda's mass-production techniques assure you the most complete line of ultrasonic cleaners at the lowest prices in the industry! From the smallest 35-watt to the amazing 2500-watt unit with a tank capacity of 75 gallons, Narda's SonBlasters are available **now**—off-the-shelf—for immediate delivery. And with a full 2-year warranty besides!

What do **you** want to clean? Transistors, semi-conductors, other electronic, automotive, missile and avionic components, instruments, timing mechanisms—Narda's SonBlasters clean most any mechanical, electrical or horological part or assembly you can think of—and clean faster, better and cheaper.

No matter what you need in ultrasonic cleaning equipment, you'll find Narda's complete line of production-size units have the quality, power, performance, capacity and appearance of cleaners selling up to three times their price! Write for more details **now** and we'll include a free questionnaire to help determine the precise model you need. Address: Dept. IRED-19.

Generator G-202 **Transducerized Tank NT-202**
35 watts **Capacity: ⅜ gallon**

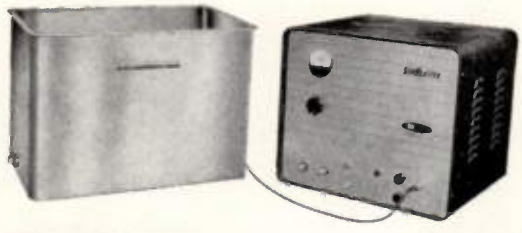
An amazingly efficient, yet inexpensive, ultrasonic cleaner. Duty cycle timer permits operator to turn the unit on, set it, and leave; the SonBlaster will turn off automatically at the end of the cycle. Four choices of timers—from 0-15 min. to 0-120 min. Also available without timer at slightly lower cost (G-201).



$220

Generator G-601 **Transducerized Tank NT-602**
60 watts **Capacity: 1 gallon**

A more powerful production-type unit, with a special circuit and selector switch permitting operator to alternate between two tanks, when items being cleaned require different solutions or a two-step process.



$350

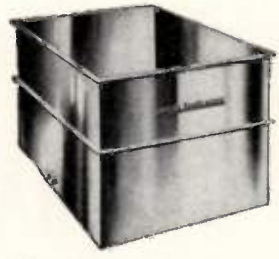
Transducerized Tank NT-1505 **Generator G-1501**
Capacity: 5 gallons **200 watts**

The lowest price in the industry for a tank of this capacity and activity. Generator also will operate 2, 3 or 4 submersible transducers at one time, with just a turn of the load selector switch on the front panel.

$695

Transducerized Tank NT-5001 **Generator G-5001**
Capacity: 10 gallons **500 watts**

Generator features standby switch for longer life and load selector switch on the front panel to operate up to 8 submersible transducers or 8 NT-602 or 2 NT-1505 transducerized tanks at one time. Larger tanks available on special order.



$1325

Submersible Transducer NT-605

Heli arc welded stainless case, hermetically sealed for safe, leak-proof immersion. Radiating face: 27 sq. in. Effective plane of radiation: 40-50 sq. in. (approximately 10" x 5"). Effective cavitation of volumes up to 1200 cu. in. at 24 in. tank height (5 gal.) and 2400 cu. in. at 48 in. tank height (10 gal.). Bulkhead electrical fitting on back allows all wiring connections to be made on outside of tank. For use in any arrangement or location in any shape tank you desire to use. Also available—model NT-604, identical with NT-605, except for pipe thread instead of bulkhead fitting, permitting electrical connections inside of tank.

$130

Transducerized Tank
NT-25001
Capacity: 75 gallons

Powerful unit drives the largest mass-produced industrial-size transducerized ultrasonic cleaning tank made! Also energizes up to 40 Narda 60-watt submersible transducers (NT-604 or -605). Capable of energizing tanks measuring up to 150 square feet of area by 2' or 3' high.

$4360

Generator G-25001
2500 watts

Consult with Narda for all your ultrasonic requirements. The SonBlaster catalog line of ultrasonic cleaning equipment ranges from 35 watts to 2.5 KW, and includes transducerized tanks as well as immersible transducers which can be adapted to any size or shape tank you may now be using. If ultrasonics can be applied to help improve your process, Narda will recommend the finest, most dependable equipment available—and at the lowest price in the industry!

For custom-designed installation and unique electro-acoustic applications, including cleaning, soldering, welding, drilling and non-destructive testing, consult our subsidiary, Alcar Instruments Inc., at the address below.

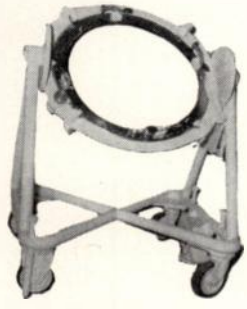
PRODUCTION FIXTURES



Attention Methods Engineers

Production Tool and Fixture assemblies save you time and money in your wiring and assembly departments. "Tiny-Fix," your third hand, positions miniature chassis, terminal boards and connectors in proper alignment which results in quicker and more efficient work.

The S-12-W above differs from our standard friction and index models in that it offers worm drive that gives positive positioning even under heavy stress. The PF-20-C floor model precision fixture is designed to level and rigidly support the bulky but delicate chassis assemblies required by recent developments in the missile and related industries. 36 inch height at pivotal centers permits the rotation of assemblies as wide as 50 inches through 360 degrees in two planes.

Adapters similar to those shown in the assembly fixtures above are designed by our engineering staff to meet your specific requirements.

Write us for our catalog and current list of firms now using our equipment in the electronic industry.

★STAR

PERFECT ALIGNMENT

of Electronic Tubes and Sockets—
in Seconds!
...Speeds Production and Servicing.

★Star Tube Pin Straighteners
featuring inserts of #303 stainless steel. Precision drilled and counterbored to exacting specifications.

MINIATURE TYPES

JE-13 with 8 holes for 7-pin tubes, and JE-15 with 10 holes for 9-pin tubes.

JE-13B with 8 holes for 7-pin tubes, and JE-15B with 10 holes for 9-pin tubes.

SUB-MINIATURE TYPES

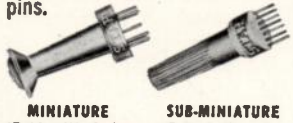
JE-5 with 9 holes for 8-pin tubes.

JE Mark IV with 7 inline holes for pinch-base tubes.

Miniature Dual Type

JE-22A1

2 inserts mounted in black anodized aluminum base. Smaller insert has 8 holes for 7-pin tubes. Larger insert, 10 holes for 9-pin tubes.

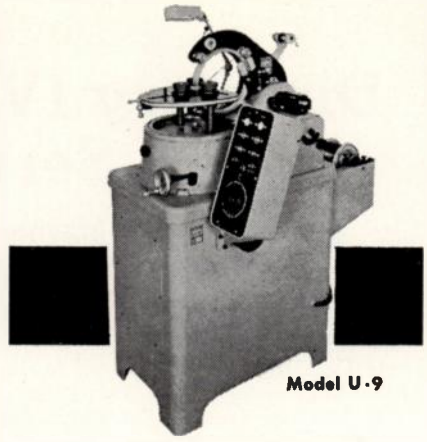


Sub-Miniature Dual Type

JE-20

Combination pin straightener and cut-off tool. Speeds up alignment and trimming of leads on flat press and round base tubes, also transistors.

★Star Socket Wiring Plugs
precision located stainless steel pins.



MINIATURE
JE-10 with 7 pins and JE-9 with 9 pins.

SUB-MINIATURE
JE-7 inline for pinch-base tube sockets.

Here's how to wind cross-wound coils

FASTER, BETTER

The new Leesona No. 111 Coil Winder is today's most efficient machine for cross-wound coils — specially designed for automatic production and fast, accurate setup to cut your costs and raise your profits.

Read the new bulletin about No. 111's *exclusive* features — automatic programming attachment — automatic pie-winding attachment — change gears that drop onto fixed centers without use of tools — and many more.

Cash in on coil windings' latest cost cutter. Send now for bulletin No. 111.

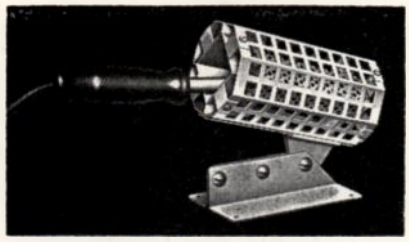
NEW GEARLESS MULTIPLE TRANSFORMER WINDER
with Instant Spiral/Rapid Traverse

7 TIME-SAVING FEATURES: 1) Unique wire carriage quickly shifts into coils' margin, adds extra turns for lead purposes. 2) Shorter set-up time. 3) No gear changing—pitch selector permits instant selection of turns per inch range. 4) Instantly adjustable winding width. 5) Winding cycle instantly reset by touching counter lever. 6) Instant spiral/rapid traverse device. 7) Front loading of tension permitted by compact machine design.

Model 405-AM multiple winds paper section power, audio, fluorescent ballast and similar transformer coil types up to 9" OD if round, 4½" OD if rectangular, 6" long, using wire sizes 16-44. Maximum center to center distance for adjustable wire guide rollers 23½", distance between head and tailstock 33" max. & 21" min., winding range 19-454 turns per inch, winding speed up to 2000 RPM, output end of spindle ⅞" flatted shaft. Furnished with motor, counter, brake, tailstock, tilting table paper feed & 20 tensions with new support bracket permitting vertical, horizontal & angular tension adjustment.



Reduce winding costs and time with Model 405-AM.

Braze and Metallize

with

MO-BRAZE*

To braze Molybdenum, Tungsten, Tantalum parts and structural members for vacuum tube sub-assemblies, furnace parts and similar applications.

MO-BRAZE*

To metallize Aluminum Oxide members of metal-to-ceramic seals.

*MO-BRAZE** (M.P. 1950—2000°C) forms joints of excellent hot strength and electrical conductivity. *MO-BRAZE** joints are stable in high vacuum up to 1900°C with vapor pressure of less than 1 x 10^{-4} mm Hg.

*MO-BRAZE** is available in powder form with an average particle size of 2-4 microns, or in the form of brazing rod, ⅛" diameter x 12" long.

*Learn how MO-BRAZE** can solve your problems of Fabricating Assemblies of Molybdenum, Tungsten, Tantalum for high temperature, vacuum or inert atmosphere operation . . . or fabricating metallized ceramics for ceramic to metal seals.

Make your Ferrites with

HIGH PURITY MAPICO® FERRIC OXIDES for TOP performance

These reactive synthetic MAPICOS, some especially developed for ferrite manufacture, are over 99% pure Fe_2O_3. Choice of suitable characteristics is made easy—many variations in particle-size and shape are available. Careful control contributes to uniformity of packing and shrinkage. Our iron oxide production experience and our ferrite research can help you accomplish best results. Manufactured in modern plants by modern methods. Experienced Columbian technicians are ready to cooperate in any problem involving the use of iron oxides for ferrite manufacture. For full data and a working sample, write . . . today!

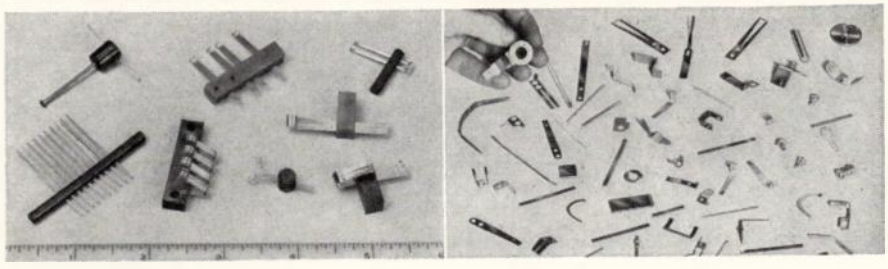
PRECIOUS METAL SPECIALISTS

RESEARCH AND DEVELOPMENT

A manufacturer of precious metal products for over 145 years, The J. M. Ney Company offers research experience and facilities second to none in this field. Research Department services are freely available to Design and Production Engineers; and include complete facilities for subjecting experimental and standard alloys to a full range of chemical, physical, electrical, mechanical and metallographic tests as well as tests simulating actual and accelerated conditions.



COMPLETE MANUFACTURING FACILITIES

Ney's modern new plant is ideally equipped to serve manufacturing needs for large or small quantity production of the simplest part or the most intricate assemblies. Ney manufacturing facilities include wire drawing equipment, two and four high rolling mills, punch presses up to 50 tons, automatic screw machines up to 1½" capacity, cold-heading, wire forming, welding and soldering equipment and a complete tool room.

- Molded assemblies
- Fine wire (resistance)
- Precious metal wire and plate
- Fabricated parts and assemblies using precious metal with base metal blades
- Welded assemblies
- Small screw machine and headed contacts
- Research and Engineering facilities
- Refining of precious metals

STANDARD AND CUSTOM-MADE PARTS

Ney products, either standard or made to customers' specifications, include molded contact assemblies for use with printed commutators, potentiometer windings, slip ring assemblies and printed rotary switches; sliding contacts; slip rings and assemblies; commutator segments and assemblies; brush and brush holder assemblies; and precious metal resistance wire. Ney engineers are available for consultation on all problems involving the use of precious metals.

Write for your copy of Ney Data Book, "NEY PRECIOUS METALS" (Bulletin R-12) or call our Engineering Department (Hartford, CHapel 2-2281).

PLASTIC MOLDED KNOBS

Available From STOCK MOLDS or CUSTOM MOLDED To Your Own Design

Huge selection of shapes, sizes and colors available from stock molds. Military knobs included. No tool charge, fast delivery. Can be modified or supplied with special shaft holes at nominal cost. Markings can be branded to specifications.

We can also supply special knobs custom molded and branded to your own design. Whatever your knob requirements may be, you'll save time and money by getting them from Rogan. Send for details and free catalog.

Complete Custom Molding Service

DEE PRINTED CIRCUIT SOLDER POTS
WITH MECHANICAL TYPE DIAL THERMOMETERS

25 SIZES MEET ALL REQUIREMENTS

New proven design with all controls on end of pot. Mechanical type dial thermometers to indicate solder temperature. Hydraulic thermostats. Walls and bottom of the solder cavities are smooth and free of all obstructions.

Temperature range 300° to 600° F. Temperature swing ± 2°. Wide variety of sizes up to eight feet long. All Voltages.

DEE SOLDER POTS

Precision Deep-Drawn Parts and Stampings at Low Cost

Johnson & Hoffman ingenuity can save you money while insuring product quality

The ability of Johnson & Hoffman to make precision metal stampings and deep-drawn parts at low cost is a result of its emphasis on creative engineering . . . ingenious design and tooling . . . combining two parts into one . . . or reducing the number of operations required to produce a given part.

Whatever your requirements, look to Johnson & Hoffman as your fast, reliable source of supply. We have an extensive line of standard designs and are equipped to develop new tooling for special parts you may need. Write for your free copy of Bulletin No. 80.

DEEP-DRAWN PARTS—parts made by drawing the metal into the desired shape. These parts include cups, eyelets, rings, flanges and grommets.

MATERIALS

Titanium, molybdenum, tungsten, stainless steel, brass, carbon steel, copper, aluminum, Berylco,* phosphor bronze, Inconel,† HC-4, 52 alloy, Kovar,‡ nickel silver, silver, Rodar.§

FINISHES

Electropolished, tumbled, plated.

SIZE LIMITATIONS

Johnson & Hoffman has facilities to produce a wide variety of parts to exacting close tolerances. Deep-drawn parts, for example, can be supplied from strip metals from .003 to .060 in. thick in sizes up to 2.75 in. OD and 3.75 in. in depth. These include plain or contoured cups, pierced or closed. Materials of other thicknesses can be used, depending on the contour of the part and the particular material. There is virtually no limit to the variety of stampings that can be produced. Complete information on these parts, plus microminiature parts, can be supplied on request.

WRITE FOR ESTIMATE

If you currently buy precision stampings or deep-drawn parts, ask Johnson & Hoffman for an estimate. Find out just how much you can save, while maintaining or possibly improving your product quality.

NEW ESSENTIAL

VAN NOSTRAND REFERENCE BOOKS

TRANSISTOR TECHNOLOGY. A series of books from the laboratories where they were first developed that brings together in three useful volumes a realistic sampling of the state of this rapidly moving field.

Volume I—ed. by H. E. Bridgers, J. H. Scaff and J. N. Shive. *The Bell Laboratories Series.* (1958). The basic principles of germanium transistor fabrication, fundamental to the understanding of the more advanced aspects of present-day transistor technology, with specific information on each step leading to production on a commercial scale. 426 Ill., 650 pp. $17.50

Volume II—ed. by F. J. Biondi. The technology of materials and principles of transistor design covering topics of recent principal importance in the field. 600 pp. Illus. Probably $15.00

Volume III—ed. by F. J. Biondi. Developments in transistor technology covering the preparation and structure of junction structure, preparation, fabrication technology, measurements and characterizations, and reliability studies. 448 pp. Illus. Probably $12.50

MISSILE ENGINEERING HANDBOOK—by C. W. Besserer, Senior Technical Staff. The Ramo-Wooldridge Corporation.

A carefully tabulated collection of data, formulas and other material useful to engineers, technicians and those planning to work in the general field of guided missiles. Tables, graphs and equations are largely self-explanatory, but some knowledge of fundamental development, accuracy and restraints is expected. 584 pp. About $14.50

ALGEBRA OF ELECTRONICS—by C. H. Page, Consultant to the Director, National Bureau of Standards.

Dr. Page's exploration of the circuit theory in terms of algebraic as well as graphical analysis is a definitive exposition of the subject, leading from a fundamental review of principles as simple as Ohm's Law through more complex differentiation and integration processes such as involved in the Fourier series. 340 pages, Illus. Probably $7.50

DIGITAL COMPUTOR COMPONENTS AND CIRCUITS—by R. K. Richards, author of *Arithmetic Operations in Digital Computors*

Here is information engineers need to reduce ideas about arithmetic and logic to a working machine. A reasonable familiarity with electrical and electronic fundamentals is all the background a reader needs to understand the material in this book, although the basic principles of logic functions and mechanized arithmetic, such as Boolean notation and brief discussions of counters and adders are included. 523 pages, Illus. $10.75

THE THEORY OF NETWORKS IN ELECTRICAL COMMUNICATION AND OTHER FIELDS—by F. E. Rogers, Lecturer in Telecommunications, Electronics and Electrical Measurements at the Polytechnic, London.

The author has organized this clear and comprehensive study to be an excellent source for the successful application of mathematical formulae to numerical problems. All important circuit theorums are explained with indication as to their application to the solution of network problems. 564 pages, Illus. $11.50

INTERNATIONAL DICTIONARY OF PHYSICS AND ELECTRONICS—Edited by Walter C. Michels et al. "This useful work is unique. It presents in a single volume of 1,004 pages definitions of a wide variety of terms in pure and applied physics. Here are explained clearly and succinctly . . . thousands of laws, relationships, equations and principles, as well as instruments and apparatus." Scientific American. Thumb-indexed 1004 pages, over 300 illus. $22.50

SOURCEBOOK ON ATOMIC ENERGY—2nd Ed., by Samuel Glasstone, Consultant to the Atomic Energy Commission.

This is the standard sourcebook on atomic and nuclear science today. It brings together all the important facts about past history, current status and possible future in a vital new field. New discoveries in research and development, the identification of hitherto unknown fundamental particles, the transmutation of new elements, advances in the use of isotopes, a whole chapter on nuclear reactors, and vastly improved experimental techniques and equipment are carefully presented. 641 pages, Illus. $4.40

Order for 10 days' FREE examination

D. VAN NOSTRAND COMPANY, INC., 120 Alexander Street, Princeton, New Jersey Dept. ID

Send me for 10 days' FREE examination the book(s) I have checked below. Within ten days I will remit purchase price plus small postage or return book(s) postpaid.

- ☐ Transistor Technology Vol. I @ $17.50
- ☐ Transistor Technology Vol. II @ about $15.00
- ☐ Transistor Technology Vol. III @ about $12.50
- ☐ Handbook of Guided Missile Technology @ about $14.50
- ☐ Algebra of Electronics @ about $7.50
- ☐ Digital Computor Components and Circuits @ $10.75
- ☐ The Theory of Networks in Electrical Communication and Other Fields @ $11.50
- ☐ International Dictionary of Physics and Electronics @ $22.50
- ☐ Sourcebook on Atomic Energy—2nd Ed. @ $4.40

From servo-mechanisms to electronic computers, "RADIO" is a way of THINKING!

Far-reaching progress in the radio-electronic field is no "happy accident." Television, electronic computers and the "radiation" power of the atom, rapidly being harnessed to industry, were not discovered . . . they were engineered.

From "fission" to "computation," these engineering achievements are accomplished through an enormous process of information exchange—the methodical and brilliant teaming together of engineering *thinking* to solve a problem. In radio this work has been done deliberately by a growing engineering society, through its meetings and published proceedings, which unleash the creative minds of men.

In 1957, "Proceedings of the I·R·E" published nearly 2000 text pages, exclusive of product news and departmental features. This is the word-count equivalent of eight 500-page textbooks on radio-electronics for engineers. It exceeds the contents of the next two contemporary publications put together. This "high" in genuine reader service was logically matched by advertising worth over a half-million dollars, by firms investing in the engineers' reading interest and benefiting by it.

Engineers are educated to specify and buy!

WILEY BOOKS

Your One *Complete* Guide to All Three Fields!

1. HANDBOOK OF AUTOMATION, COMPUTATION, AND CONTROL

Edited by E. M. GRABBE, SIMON RAMO, and DEAN E. WOOLDRIDGE, all of the Ramo-Wooldridge Corporation.

Available now—*VOLUME I:* CONTROL FUNDAMENTALS

The first volume of this comprehensive, up-to-date handbook provides essential background theory for modern control systems engineering. It covers information theory, operations research, general mathematics, feedback control, and much more.

1958 1020 pages Illus. $17.00

In preparation: VOLUME II: COMPUTERS AND DATA PROCESSING
VOLUME III: SYSTEMS AND COMPONENTS

2. NETWORK SYNTHESIS, Volume 1

By DAVID F. TUTTLE, Jr., Stanford University

Covers networks with two terminals. Features a 3-step procedure: obtaining a working knowledge of the properties of networks; investigating ways of approximating desired behavior; and carrying out the actual synthesis. 1958. 1176 pages. Illus. $23.50

3. SWITCHING CIRCUITS AND LOGICAL DESIGN

By SAMUEL H. CALDWELL, Massachusetts Institute of Technology

Treats the methods of handling problems of circuit synthesis, and presents principles of switching circuit design necessary for a knowledge of the complex applications of switching theory. 1958. 685 pages. Illus. $14.00

4. LOGICAL DESIGN OF DIGITAL COMPUTERS

By MONTGOMERY PHISTER, Jr., Thompson-Ramo-Wooldridge Products, Inc.

Discusses: Veitch Diagram method of simplification of Boolean equations; the "difference-equation" approach to memory elements; the Huffman-Moore model of digital systems; etc. 1958. 408 pages. Illus. $10.50

5. PRINCIPLES AND APPLICATIONS OF RANDOM NOISE THEORY

By JULIUS S. BENDAT, Ramo-Wooldridge Corporation

A comprehensive survey of fundamental ideas. Includes full treatment of Rice's representation of random noise, and development of the important Zero Crossing problem. 1958. 431 pages. $11.00

6. INTRODUCTION TO THE DESIGN OF SERVOMECHANISMS

By JOHN L. BOWER, University of California L.A.; and PETER M. SCHULTHEISS, Yale University

Stresses the importance of finding a systematic approach to design, with emphasis on basic feedback phenomena and feedback systems design rather than specific components. 1958. Approx. 510 pages. Prob. $13.00

7. PRINCIPLES OF NOISE

By J. J. FREEMAN, University of Maryland

Discusses principles, facts, and techniques used in noise analysis. Deals with such topics as probability, stationary random processes and their transformation, power spectra, etc. 1958. 299 pages. Illus. $9.25

8. TELEVISION IN SCIENCE AND INDUSTRY

By V. K. ZWORYKIN, E. G. RAMBERG, and L. E. FLORY, all of the RCA Laboratories

Explores the general function of industrial, or closed-circuit, television, and describes the tools which have been developed to realize it. 1958. 300 pages. Illus. $10.00

9. NOTES ON ANALOG-DIGITAL CONVERSION TECHNIQUES

Prepared by Staff Members of the M.I.T. Servomechanisms Laboratory; edited by ALFRED K. SUSSKIND, M.I.T.

Includes: the theory of sampling, quantizing, and coding; analysis and evaluation of basic coding and decoding methods for electrical and mechanical analog quantities; etc. A Technology Press Book, M.I.T. 1958. 410 pages. $10.00

The first and only independent magazine of its kind . . .

weekly

Missiles and Rockets

magazine of world astronautics

Brings you: accurate, authoritative coverage on all research and development pertaining to satellite science, missile design and production, propulsion systems, ground handling, launching techniques, equipment. Also covers astrionics, guidance, optics, tracking, telemetry, computing, and guidance-control systems.

Regular Features: News Trends . . . Rocket Engineering . . . Missile Production . . . Washington Trends . . . Soviet Affairs . . . World Astronautics . . . Space Medicine . . . Missile Business . . . Editorials . . . Missile Miscellany . . . New Products, with Subscriber Service offering data on new products, technical literature for the asking.

NEW ACADEMIC PRESS BOOKS

ADVANCES IN
Electronics and Electron Physics

Edited by L. MARTON, *National Bureau of Standards, Washington, D.C.*

VOLUME 10

Fall 1958, about 350 pp., illus., approx. $10.00

CONTENTS:

W. G. DOW, Nonuniform D-C Electron Flow in Magnetically Focused Cylindrical Beams
E. BILLIG and P. J. HOLMES, Defects in Diamond-Type Semiconductor Crystals
J. BROWN, Microwave Optics
W. J. LAWLESS, Developments in Computer Logical Organization
E. G. ROWE, On Some Aspects of Valve Reliability
J. E. DAY, Recent Developments in the Cathode-Ray Oscilloscope

AUTHOR INDEX—SUBJECT INDEX.

Detailed literature on previously published volumes available upon request

Electronics of Microwave Tubes

By W. J. KLEEN, *Siemens & Halske Aktiengesellschaft, and Technische Hochschule, Munich, Germany*
Translated from the German by P. A. LINDSAY, A. REDDISH, and C. R. RUSSELL, *Research Laboratories, The General Electric Company, Ltd., Wembley, England*
August 1958, 349 pp., illus., $9.00

Electronic Digital Computers

Their Use in Science and Engineering
By F. L. ALT, *National Bureau of Standards, Washington, D.C.*
August 1958, 336 pp., illus., $10.00

Science and Information Theory

By LEON BRILLOUIN, *Columbia University*
1956 (second printing, 1957), 320 pp., illus., $6.80

the reference which "works" for you...

HANDBOOK OF BASIC TV AM FM CIRCUITS

by Matthew Mandl $7.50

COMPREHENSIVE...
This book describes characteristics, functions, and applications and includes a detailed schematic for each of 136 standard circuits. Essential supplementary information is provided in the extensive appendix. All data is indexed.

AND CONVENIENT...
Arranged alphabetically, each circuit is treated as a compact and separate unit. The writing is clear and concise, not cluttered with unnecessary mathematics and formulas.

FOR ANY PHASE OF ELECTRONICS...
This wealth of material on transmitting, receiving, and general purpose circuits is applicable to such diverse fields as industrial electronics, high fidelity, and public address systems.

STUDY FREE FOR 10 DAYS WITHOUT OBLIGATION—CLIP AND MAIL TODAY

The Macmillan Company, Dept. IRE-3
60 Fifth Ave., New York 11, N. Y.

Please send me ..... copies of HANDBOOK OF BASIC CIRCUITS at $7.50. I will either remit the full price or return the book in 10 days. (Save: Enclose payment now and we will pay delivery charge.)

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

Directory IV. Materials & Services

Class 100. Distribution

5. Export & Import
10. Jobbers & wholesalers
15. Manufacturers representatives
20. Sales and service
25. Surplus dealers

The final section of the IRE DIRECTORY is the complement to manufacturing, which is distribution. It has proved to be a real service to IRE member engineers and executives to put into this book a list of annually checked jobbers, wholesalers, and distributors. Many of these firms are identified further by the initials REP, as member of "The Representatives," or NEDA, as member of the National Electronic Distributors Association. For convenience in locating distributional firms, the listings are arranged by states, and grouped alphabetically. Listings for U.S. territories and foreign firms follow the listings for the U.S.A.

United Mineral & Chemical Corporation

Specialists in insulators, conductors, semi-conductors—materials

Micas
Natural—Block, Condenser film, Splittings
Natural Fabricated—For Radio Tubes, Condensers, Appliances
Built Up—Plates, Tapes, Sheets and Fabricated Parts

Semi-Conductor Materials
High Purity Metals—Aluminum, Antimony, Arsenic, Bismuth, Cadmium, Cerium, Cesium, Gallium, Germanium, Indium, Lead, Molybdenum, Rhenium, Rubidium, Scandium, Selenium, Tantalum, Tellurium, Thallium, Tin, Tungsten and Alumina.

Condenser Foils
—Thin Aluminum, slick and dry
—Etched Aluminum, 99.99% pure

Phosphors
Photo-conductive materials
Electroluminescent
Cathode Ray
Scintillation
X-Ray

Resistors
Deposited Carbon high stability, for service equipment
Deposited Carbon low noise precision for measuring instruments
Deposited Carbon miniature types
Precision Wire-wound resistors

Rheostats—Standard and special designs

Capacitors—Ceramic

Terminals
Metallized hermetic with solder lugs or screw terminals

Military Packing Materials—To Government Specifications
Barrier materials—rolls, blankets, shrouds, bags
Rubberized hair
Caseliners
Paper—waterproof, creaseproof
Polyethelene—bags, sheets, liners
Tapes—pressure sensitive
Containers—metal, standard & custom

Production & Lab Test Equipment

Your inquiry will receive our prompt and interested attention.

*40th YEAR

Cameradio—truly a pioneer in the field of electronics since 1919—has built its reputation for dependability on prompt, expedient service and delivery of quality electronic equipment and components. Cameradio can fill virtually any requirement directly from complete stocks of "Everything Electronic." Cameradio's catalog is a ready reference for everyone and should be included in your library of indispensable volumes. Write for your 1959 copy.

How hard should your Advertising dollar work?

This is a question that has probably bothered all of us at one time or another in these days of rising costs and intense competition. If you haven't figured out the answer yet, don't feel too let down. Neither has anybody else — not even the so-called experts. Why? Because there is no answer. The advertising dollar's performance has never been governed by a minimum hour law. It remains, as always, your indentured slave, ready to work for you as hard, but *only* as hard as you want it to work.

A few industries in this country are fortunate in having a pace-setting publication to provide a constant standard by which to gauge the relative performance of their advertising dollar. The radio and electronics industry is one of those fortunate few. Its pace-setter for the past 12 years has been and continues to be the *IRE DIRECTORY*.

Service: There are thousands of things — big and small — that combine to make the *IRE DIRECTORY* the important name it is in radio and electronics. But they can all be summed up on one word: *Service*. Not in all the history of the industry has there been assembled between covers one guide that so completely fulfills this function.

The *IRE DIRECTORY and the PURCHASING DIRECTORY* today offers a complete listing of more than 50,000 engineers, 3,500 manufacturers and 1,500 companies in the field of radio and electronics. It offers a roster of more than 500 individual products in 100 product groups, a state-by-state list of some 1,500 distributors and manufacturers' representatives and the telephone numbers of 3,200 firms in the field.

More than just a buying index or a mere classification of manufacturers, distributors and engineers, *the IRE DIRECTORY is the complete, facts-and-figures story of an entire industry.*

Growth: And here's another sure sign of a pace-setter: *Growth.* Numbered among the more than 1,000 pages in the record breaking 1957-58 *IRE DIRECTORY* are 415 pages of advertising representing 555 blue chip firms serving the radio and electronics industry. *This is a gain of* 63 *advertisers in a single year* — a remarkable record of support from an industry that has never been careless with its advertising dollar.

The value that the radio and electronics industry — IRE members, manufacturers, distributors, advertisers — have placed on the *IRE DIRECTORY* can best be measured by the enthusiasm with which the 1957-58 issue has been received. Despite a mailing of 47,500 copies of the full directory to IRE members, the clamor for additional copies has resulted *in a sell-out of every available issue in stock.* The IRE *PURCHASING DIRECTORY*, which lists firms and products, met with such demand that firms were eagerly gobbling up battered salesmen's copies at $5 a piece — this, despite a printing of 5,000 issues.

Value: Results like these are no accidents. They are the legacy of 45 years of dedicated service to the needs of the radio and electronics industry.

But the *IRE DIRECTORY* is not content to rest on its laurels. A pace-setter never is. Already hard at work on the coming issue, the editors of the *DIRECTORY* have installed a permanent punch card system in order to handle the growing load of product and firm classifications. Heavy mailings of product questionnaires are underway. Firms are busily reporting new product lines as fast as they develop.

Paralleling this stepped-up activity is the continued surge of interest in the IRE Directory on the part of its advertisers. The old advertisers remain constant and the list of new advertisers grows larger. But old or new, large or small, they all have one thing in common: *They know how hard their advertising dollar can work.*

You find facts faster with the IRE DIRECTORY

Because the product listings in the IRE DIRECTORY are logically arranged the way an engineer thinks, under four great major classifications that cover the entire radio-engineering field, you can find the product you want, and the names of the firms who make it, faster and more easily than in "terminology-index" types of listings. Advertisements are logically positioned near the product listings which describe them, to give you more information on the companies you'll want to deal with, and the easy-to-use Reader Service Card brings you quick additional data.

"Distribution" listings are arranged alphabetically by states. For names and addresses of manufacturing firms, see Alphabetical Directory, pages 141-240.

WHERE SHARING PAYS OFF

SOME YEARS AGO we pointed out in "Proceedings of the IRE" that an amazing and unique characteristic of scientific men is their sense of responsibility to the past and to the future, expressed in their sharing with one another the new findings and discoveries of their science. The fact that engineers share information is a major contribution to the amazing growth of industrial progress and to our high standard of living.

Design Engineers seem to have an impelling need to publish. It is important and fortunate that they have had magazines *in which to publish*. Of Course, their articles make these magazines possible, just as the publishing organization's faith and courage gives them the vehicle for communication. A magazine is a three-way team of author, medium, and reader—mutually dependent.

Such a contribution of one to the other is the vital service of the periodical. The thundering pace of radio-electronics and its expression in communications; glorious hi-fi music; the brilliant, full-color picture; and that same radio principle bringing in a new era in industrial controls which makes automation practical; the amazing time-and-effort-saving electronic computer; and new fabulous developments already being discovered in research which will be made practical by the radio engineer—all these *could not have been possible* without the publication as a means of collating and organizing information, and distributing it to those who needed it and *knew how to work with it*.

These are generalities! But "Proceedings of the IRE" *is specific*. The Superheterodyne circuit, FM, TV, radar, the computer, color TV, the transistor, scatter propagation, solid state electronics (stereatronics) all were presented and developed *article by article* in the history-making issues of "Proceedings of the IRE." The impact on industry of this broad exchange of information among engineers has been enormous, creating new markets and even new ways of life.

FM is an excellent illustration of this "sharing." Consider particularly the "lead out time" needed in FM. In December 1935, an article by Armstrong (an IRE Member) in "Proceedings of the IRE" proved concusively to the engineering world that frequency modulation was an improvement *and practical*. (Today, FM is the audio side of every TV receiver.) This was the fourteenth article on frequency modulation *that has appeared in "Proceedings of the IRE,"* eight of them by Armstrong. It is now known that some of these articles which defined the weakness that had to be corrected, as well as some that amplified the discovery by further independent research, all helped make the final perfection possible.

At that time, in all the world, only four other articles on the subject had appeared. These were condensations of the "discussion" in "Proceedings of the IRE." Yet the final "Proceedings" article was published six years before the first FM broadcasting station went on the air. Engineers needed every bit of this "lead-out time" to do their work. The early publication in "Proceedings of the IRE" gave them just that; and thousands of engineers, who had followed this series, knew in December, 1935 that a great change had come and that they must design and tool up for it. Armstrong shared, "Proceedings" published, and an industry profited!

This is the traditional service of the "old-line" magazine. The author "shared"—the magazine "published"—the reader "studied" and industry progressed mightily through the three-way contribution. Truly, the reader contributes attention! This kind of publishing wins such attention, more than any other kind! It does the ground-work and sales-conviction building that comes years ahead of the final product news.

Advertising shares! The informative "ad" follows exactly the same pattern with exactly the same results. Again and again, display copy in "Proceedings of the IRE" has announced new developments or highlighted the engineering usage of a staple item. Year-after-year, we have seen tiny businesses start sharing their helpful information with readers in "Proceedings of the IRE" and as a result reap orders, prosper and grow. Today in aggregate, they are the giant industry identified as "Electronics."

It is said that the fundamental result of a magazine is to define a market. Since 1913, "Proceedings of the IRE" has defined an unfolding technical radio and electronic market by articles that stimulated the use of new products, and by presenting the manufacturers' stories of these new components, instruments and systems to engineers eager for as many new devices as would serve them well.

IRE DIRECTORY (Research Div.)
72 West 45 St.
NEW YORK 36, N.Y.

TANTALUM
Solid electrolyte, foil, wire and slug types.

MYLAR DIELECTRIC
Molded Tubular and Steatite-cased units.

HIGH RELIABILITY
Extra long-life twist-prong base electrolytics.

IMPREGNANTS
A guide to the selection of capacitors for specific applications.

TRANSISTOR CIRCUIT
Tubular electrolytics in ultra-small paper, metal and phenolic cases.

PRINTED WIRING
Encapsulated, plug-in and snap-in capacitors.

PULSE NETWORKS
Ultra-high voltage (to 200,000 volts) for filtering, energy storage and X-Ray.

METALIZED PAPER
"High Temperature" units, in metal, paper and "bathtub" type cases.

MOTOR START-RUN
Design Data. Aluminum can and bakelite case units.

FILTERS
R. F. attenuation feed-thru, and pi, in a variety of ratings and mountings.

MICA
Encapsulated, high-voltage and high-temperature types.

PAPER DIELECTRIC
Steatite-cased miniature and sub-miniature.

SHORTEST ROUTE TO THE SOLUTION WHEN IT COMES TO CAPACITOR CIRCUITRY

Any one of the above CORNELL-DUBILIER ENGINEERING BULLETINS can lead to the quick, dependable selection of just the right CAPACITOR for the application at hand. Concise, detailed data to save you hours of fruitless search. Just check off—on the coupon below—the class of capacitor on which you need information. There's no charge, of course,—and our engineering staff is always at your service for consultation.

CONSISTENT HI-DEPENDABILITY
CORNELL-DUBILIER CAPACITORS

CORNELL-DUBILIER ELECTRIC CORP.
333 Hamilton Blvd. South Plainfield, New Jersey

Please send me—without obligation—the C-D CAPACITOR ENGINEERING BULLETINS checked below.

Here are a few of the products made by General Radio . . . found wherever accurate measurement and dependable control are needed. These are precision instruments and standards for research and production in pure and applied science.

Though these products have different applications, they all have one thing in common — Quality. They are designed without "short cuts" by engineers whose goal it is to produce fine and reliable instrumentation that will withstand many years of hard use. G-R products are assembled from carefully selected components by skilled, experienced craftsmen. All adjustments are set well within advertised specifications by the Standardization Laboratory.

The Warranty Tag that is attached when all tests and calibrations have been completed carries with it the most comprehensive guarantee in the electronic measuring equipment industry. It certifies that the instrument will operate in full accordance with specifications *for a period of not less than two years.*

When You Buy GR You Get Reliability as well as Performance!

GENERAL RADIO COMPANY

275 Massachusetts Avenue, Cambridge 39, Massachusetts, U. S. A.
