RADIO'S JOURNAL OF RECORD

June 13, 2001

Serving Radio Since 1984

Vol. 18 Issue. 20

Big enough to go it alone

Clear Channel stunned the Big Apple when it pulled out of NYMRAD, the New York Market Radio Association (a story the M Street Daily fax broke June 11). Simply put, Clear Channel believes it's now big enough to go it alone in New York when it comes to promoting radio as an advertising medium. The effects on NYMRAD are still unclear. There's a June 28 board meeting

scheduled, just before CC's scheduled July 1 pullout. But coming on top of Viacom/Infinity withdrawing from the NAB, Clear Channel demonstrates that things really are changing in a fundamental way. CC Radio chief Randy Michaels has been saying it. So has Mel Karmazin. The playing field will never look the same.

Infinity bets on talk and rock

M Street Format Trend: The ballyhooed signing of Opie &

Anthony isn't just another syndication deal. Infinity has committed to putting the afternoon drive team into 22 of its markets, virtually blanketing the top 10 markets.

There's a second ingredient in the "talk and rock" mix: The also-ballyhooed re-signing of currently-syndicated Don & Mike. For some longtime Infinity rockers, that means a decided shift away from a music identity (probably rock or classic rock) that features a talk-based morning show (maybe Howard Stern). To something that more closely resembles talk – but talk that's targeted at 18-49 males. We're already seeing it at Infinity rocker WYSP, Philadelphia (94.1), which was the first out-of-town station to add Opie & Anthony in afternoon drive.

TRANSACTION BRIEF	15

Regional consolidators gain traction – and investors

In a brief 5-day period, Charlie Banta's Millennium Radio Group committed \$200M to buy 8 stations in New Jersey from Press and Nassau. That's on top of the 3 Atlantic City stations and 1 LMA that Millennium is acquiring from Citadel for \$20M. Banta's not alone in his strategy of creating a "state-wide distribution system", as he tells M Street. But he is being more public about it than most:

Regional consolidators like Keymarket, Commonwealth and Pamal are choosing to keep quiet about their intentions – so as not to alert potential sellers. Lenders love the selling and programming efficiencies promised by regional consolidators. And for many operators – it's the only way to compete with giants like Clear Channel (now operating in nearly every Arbitron-rated market), Infinity, Citadel, Cumulus, Cox, and the other "big guys."

Our roots are in broadcasting. Our skill in RF engineering is unparalleled. Our track record in tower construction and operation is unsurpassed. We build towers. You lease them. It's an experience you can rely on.

To find out more about American Tower, call our broadcast development and sales office at 781.461.6780, fax us at 781.329.2096 or visit us at www.americantower.com.

Radio. hear and now.

You may order the most comprehensive listing of all the radio stations in the U.S. and Canada: The M Street Radio Directory, Ninth Edition (10th edition coming in July 20 01) for \$65.00 (plus \$7 S&H).

Slight delay: The FCC won't take up newspaper-broadcast cross-ownership this month. That's despite the fact that a Notice of Proposed Rulemaking got bumped from the May monthly meeting agenda at the last second. The time's still not right and the item is not on the agenda for the June 20 meeting. Why not? Two new Commissioners are still getting their feet wet (Abernathy and Copps), and the third isn't even in the building yet (see the next story). We do expect the FCC to launch a Notice of Proposed Rulemaking on the rule forbidding newspapers from owning radio or TV in the same local market. But it won't be out until Chairman Powell feels it's ready.

Oops: There was a little White House oversight about new FCC Com. Kevin Martin. Unless Bush acts to fix the problem with a quick recess appointment to cover the days between now and July 1, Martin can't start his new job until July — even though his nomination was approved by the Senate along with Kathleen Abernathy's and Michael Copps. Here's why: Both Abernathy and Copps' are technically assuming the remaining portions of existing terms (for Harold Furchtgott-Roth and Susan Ness). Martin was supposed to be nominated to serve both the last month of departed Chairman Bill Kennard's term, and his own separate 5-year term, beginning July 1. Somehow, the Senate voted to approve only Martin's own term, not the balance of Kennard's. Abernathy and Copps have already moved into their 8th floor offices and begun naming interim staffs. Martin may be conducting the same activities — but not at the Portals. Meanwhile, Furchtgott-Roth and Ness have now ended their service at the FCC.

Yes, Virginia, there's no indecency crackdown (with apologies to the little girl who asked about the existence of Santa). That's right, despite the notoriety of the FCC's \$7,000 fine against Citadel's KKMG, Pueblo, CO for playing a radio edit of Eminem's "Real Slim Shady" — M Street hears that the Commission is NOT hell-bent on some new crusade to clean up the airwaves. It will deal with complaints as they're presented. And the KKMG fine demonstrates that the Commission won't let a licensee hide behind the argument that it was playing the record label's

"radio edit" of a potentially offensive song. It's always, always, always the licensee who is ultimately responsible.

After 17 years, the FCC finally resolves the nighttime interference question for WTOP, KSTP and WLQV. They all share the same frequency — 1500 KHz, and the same dilemma of a metro that has grown outside of the station's nighttime directional coverage. Around 1984, they applied for permission to allow greater "mutual interference" in their nulls, and a relaxation of the strict clear channel AM rules. Finally, the FCC has notified the licensees their plan is being accepted. All three will benefit: Bonneville's WTOP, Washington, D.C. picks up coverage in suburbs like Montgomery County, MD. Hubbard's KSTP, St. Paul adds areas like Woodbury, MN and western Wisconsin. Midwest's WLQV, Detroit gains coverage around the Motor City with a new 10-kw authorization. WTOP's problem grew so severe that it bought an FM to cover part of the Virginia suburbs, then also began simulcasting WTOP on the Frederick-licensed 820 that it owns (WXTR).

A 15-year fight over a new FM in Asheville, NC has an unexpected O. Henry ending. The Zeb Lee family takes a stunning loss, as the FCC reverses the findings of its own Administrative Law Judge and Review Board to award the CP for a class A at 96.5 to Liberty Productions — which received a substantial loan from Cumulus in 1999. This is the famous "Biltmore Forest" case, named after the city of license, and it's produced some of the most bizarre sights we've witnessed in years — including at one time, two parties broadcasting on 96.5 at the same time. Bottom line: Orion Communications, started by Zeb Lee and continued by his family after his death, loses again. Two other parties are also out. Liberty gets the CP, as the FCC accepts its winning auction bid of \$2,336,000. The station is actually on the air now as rocker WZLS, operated temporarily by Orion through an STA. FCC Commissioner Gloria Tristani strongly dissented from the decision, claiming it "renders our rule against misrepresentation almost unenforceable."

Cumulus removes an albatross from around its neck by reaching a settlement agreement over class action lawsuits.

Terms are better than

some expected: Cumulus agrees to pay \$13 million cash and 240,000 shares to settle its class action suit with shareholders. And insurance will cover more than half the cash portion of the settlement (\$7,250,000 of the \$13 million). The shareholder lawsuits started piling up as soon as Cumulus made that infamous March 16, 2000 confession about restating revenues and expenses for Q1, Q2 and Q3 of 1999. Still to come: a final "stipulation of settlement" and approval by a judge. Now it's up to CEO Lew Dickey to produce results that will build confidence among still-jittery shareholders.

That's being cruel to the good stations owned by Clear Channel, Cox, Citadel and plenty of others. But even the list of Legendary Station nominees looks a little odd, by historical standards: KNIX, Phoenix; KSL, Salt Lake City; WDAF, Kansas City; WHAS, Louisville; And WQXR, New York City. That's two for Clear Channel, one for Bonneville, one for Entercom, one for the New York Times. Ballots mail to NAB members in early July and they're due back to KPMG Peat Marwick by August 6. Read up on the final nominees in 22 categories at "NAB.org."

Arguments are breaking out over how to report revenues to third parties like Miller Kaplan. M Street hears that some managers are squabbling about reporting (or not reporting) Non Traditional Revenue (NTR) from station concerts and events, and income from off-air activities like dating services. There's also the question of how to treat network revenues and sports revenues. The arguing has gotten public in Los Angeles: Infinity declined to report its pacings for one week. (Though contrary to the gossip, it didn't withhold monthly revenue figures.) We hear that George Nadel Rivin at Miller Kaplan is working on a new uniform revenue reporting standard. Southern California Broadcasters Association exec Mary Beth Garber tells M Street that consistent reporting standards for revenues are "good for advertisers, good for stations, and good for Wall Street."

Like to eat those "pickled pigs feet"? (Ugh!) Then you'll love this year's \$100,000 award-winning radio ad. And if you find that questionable delicacy a little disgusting, you'll also enjoy DDB/Chicago's very funny "Pickled Pigs Feet Eater" ad for Bud Light, which wins this year's \$100,000 Radio Mercury Award. DDB/Chicago also won the top prize last year, making it the first back-to-back winner in the 10 years since the RAB and the Radio Creative Fund launched the Mercurys in 1982, with the objective of encouraging agencies to pay more attention to radio. The RAB's offering a CD with all 48 of the finalists, for delivery in mid-July. E-mail "Mercury@RAB.com" or call 212-681-7212. M Street enjoyed the sentiments of Lifetime Achievement Award Winner Stan Richards, of the Dallas-based Richards Group: "Radio is such a marvelous medium for a writer." He can't fathom why agencies "tend to discount radio" in their creative output: "The senior guy does the TV, but the kid who joined three weeks ago" is assigned to write the radio spot.

RIP, veteran broker Kevin Cox. Kevin was one of the brokers from the Chapman firm who split in 1990 to open Media Services Group. Before doing brokerage work Cox had been a VP at NBC Radio Network and Executive VP of RKO Radio Reps, and station manager at Metromedia's WIP, Philadelphia. Media Services Group reports Kevin Cox died at his home in suburban Philadelphia after a long battle with ALS: Lou Gehrig's Disease.

WCBS won't win any Marconis in New Orleans on September 7.

MARCONI Radio AWARDS

Neither will WINS, KNX, KMOX, KDKA, WCCO, WWJ or KYW. We're 100% sure of that, because all of those fine stations are owned by Infinity – and Viacom/Infinity pulled its membership from the NAB earlier this year, and thus is ineligible to participate in the Marconi voting. Somebody jokingly compared the competition to the 1980 Olympics, where the U.S. boycotted the Olympics because of the Russian invasion of Afghanistan.

www.contelec.com

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. The transactions are arranged in descending order of sales price. When known, broker notices are included.

New Jersey: Charlie Banta's Millennium Radio Group makes two major strikes in the Garden State —

#1, Millennium pays \$110M for 3 NJ stations from Press Communications. Those are hybrid talk/oldies "New Jersey 101.5" WKXW, Trenton, a class B at 101.5. Its south Jersey simulcast partner WBSS-FM, Millville, a B at 97.3. And adult standards WBUD, Trenton at 1260 (5-kw day, 2.5-kw night, DA-2). Banta's Millennium Radio Group already has a toehold in New Jersey with the pending \$20M purchase of Citadel's cluster in Atlantic City, which M Street expects to close around July 1. Does \$110M sound like a boatload of money? Garden Staters believe WKXW bills in the mid-teens, and is a major player in most of the wealthy state's Arbitron markets, from Monmouth-Ocean (#49) to Middlesex-Somerset-Union (#33) and Trenton (#139).

#2, Adding to its new base of "New Jersey 101.5" WKXW, Millennium wraps up the Jersey Shore with the \$90M pickup of 5 stations from Nassau Broadcasting Partners. The properties: Hot AC "The Point" WJLK at 94.3, a class A licensed to Asbury Park. Adult standards WOBM at 1160, licensed to Lakewood, with 5000 watts day, 8900 night, DA-2. AC "Ocean" WOBM-FM at 92.7, an A licensed to Toms River. CHR "B98.5" WBBO at 98.5, an A licensed to Ocean Acres. Adult standards WADB at 1310, licensed to Asbury Park (the onetime WJLK-AM), with 2500 watts day 1000 watts night, DA-2. We won't be surprised if the FCC throws red flags at these deals. The proceeds should nearly relieve Lou Mercatanti's Nassau of debt, as Nassau concentrates on central New Jersey, Allentown, PA and the Philadelphia area.

Bryan-College Station, TX: Clear Channel fills out its cluster with the \$2.5M acquisition of KBMA, Bryan (99.5). Class A "La Fabulosa" pulled a 4.9 share 12+ in the Fall 2000 Arbitron for Bryan-College Station, TX — but the FCC red-flags this sale to Clear Channel. CC currently holds two other stations there: country "Aggie 95" KAGG, with an 11.3 share. While AC KKYS scored even higher, with a 17.6. Tejano KBMA is being sold by Felix Torres's Mexican American Communications

Eau Claire, WI: David Nelson files to buy a sixth station, and it's the CP for a new class C3 FM at 99.9. Nelson's acquiring the Construction Permit for the Cornell, WI-licensed station from Lawrence Busse for \$403,200. Nelson's currently running a 5-station cluster that includes "Wax 104" WAXX, a recent Marconi winner and double-digit-share country station. Competitor Clear Channel just filed to acquire classic rock WISM-FM — its 7th station in Eau Claire.

Northern Michigan: WHST, Tawas City (106.1) will go non-commercial when Northern Christian Radio takes over. WHST has been doing hot AC as "Mix" for seller Northern Radio Network, but

the buyer is asking the FCC to re-license it as a non-commercial station to be operated as a satellite of its religious-formatted WPHN, Gaylord, MI at 90.5. Buyer also owns WOLW, Cadillac at 91.1, run the same way. Seller Northern Radio Network still has other stations in Michigan, such as WHAK-AM/FM, Rogers City and WHSB, Alpena.

Bridgeport, CT: Brokered-time specialist Otto Miller buys WDJZ (1530). Otto previously managed stations in New York City for Arthur Liu's Multicultural Broadcasting, and he's been buying (and sometimes selling) his own stations since he struck out on his own. This \$425,000 deal is for 5-kw daytimer WDJZ, licensed to Bridgeport, CT. It's already doing Spanish-language religion and ethnic programming for seller Candido Carrelo. Looks as if Carrelo retains WFNW, Naugatuck, CT, which gets much of its programming from WDJZ. Miller owns Baltimore-area WJSS and Alexandria's KTTT.

Western Kentucky: Hart County Communications buys its first FM. That's "Kickin' Country" WKNK, a class A at 99.1 licensed to Edmonton. Seller is Metcalfe Communications (Judy Crabtree), and buyer is Hart County Communications, which has classic country WLOC, Munfordville, KY. Principals of Hart County are Dewayne Forbis, James Tapp, Mary Shelton, Preston Thompson and Terry Shelton, and they're paying Metcalfe \$350,000. There's an LMA prior to closing on WKNK.

Duluth-Superior: Duke Wright's Midwest Communications buys the Shockley stations from breakup specialist Roger Ohlrich. In January Roger bought all the Shockley radio and TV stations from husband and wife Terry and Sandy Shockley. He spun the Rochester, MN Fox TV back to them, sold their Wisconsin TV properties to Quincy Newspapers — but kept the six radio stations in Duluth-Superior. Now they're going. Here's what Duke Wright gets: full-service KDAL, Duluth at 610. Soft AC KDAL-FM, Duluth at 95.7. Rock KRBR, Superior at 102.5. "Cat Country" KTCO, Duluth at 98.9. Sports WDSM, Superior at 710 KHz. And Radio Disney affiliate KXTP, Superior at 970. There was an immediate LMA. Kalil & Co. brokered Ohlrich's sale of the radio stations, just as it did the Shockley-to-Ohlrich transaction.

Chicago, IL: Jon Yinger's Midwest Broadcasting takes over WAUR as part of a \$4M purchase. This is the station that Brad Saul hoped to buy for the Radio Center for People with Disabilities. But now Catholic Radio Network deals WAUR to Detroit-based owner and broker Jon Yinger for \$4 million. Yinger starts a one-year LMA and has the option to purchase WAUR at any point during the next 12 months. It's got 2500 watts day, 4200 night, DA-2.

*"You just have to speak
to the right people."*

Shannon Black, on-air talent at KRQQ FM, at the VADIS DC console.

"After looking at several options, we decided on the VADIS platform and DC consoles from KLOTZ," says John Decker, Chief Engineer, Capstar Communications, Tucson. "Why? First, our install would be much faster since most of the plant wiring could be reduced to a simple Ethernet line and a fiber optic cable connecting each room with our rack room.

"Secondly, all four stations were to be housed in the same facility, and we had to share audio sources all around the plant. This is a function that is part of the KLOTZ system. Our entire plant is now based on a digital audio 'backbone' that provides an improved audio signal.

"We also purchased five DC consoles. The air talent finds the DC consoles simple to operate. They can put any source in our plant on any fader of the console with a simple LCD button in the meter bridge. Giving the operator the ability to call up any source to a fader is great since each operator prefers a different arrangement of sources on the console."

- ■ ■ Installed in world class facilities
- ■ ■ Integrated platform concept
- ■ ■ Fiber optic networking
- ■ ■ Any audio source, anywhere

RADIO'S JOURNAL OF RECORD

June 27, 2001

Serving Radio Since 1984

Vol. 18 Issue 21

Raunch, Hoaxes and Payola

Yes, radio is a whipping boy again: "The media" – newspapers and TV – are happy to say negative things about the radio industry, and lately radio's supplied plenty of fodder. Such as: The FCC's \$7,000 indecency fine against KKMG, Pueblo, CO for airing the radio edit of Eminem's "Real Slim Shady." The L.A. Times' allegations of more payola investigations. Kramer & Twitch's phony report about Britney Spears and boyfriend Justin Timberlake being killed. And we haven't even mentioned the wild pig in Tampa. All those stories have been

printed in papers in the U.S., Canada and around the world. But maybe the public

Kramer & Twitch

isn't as shocked as it used to be: syndicated columnist Bob Greene says about the payola stories, "Nobody cares." And just two weeks after Clear Channel's KEGG, Dallas fired Kramer & Twitch, Infinity's WKRK-FM, Detroit hired them for a better airshift. Makes you wonder why folks used to get upset over the remarks of a guy named Howard Stern...

The Big Two

Clear Channel (with a  Duncan - estimated \$3,794,000,000 in 2000 revenues) and Infinity (\$2,495,000,000) are clearly the Big Two radio groups to emerge from Jim  Duncan's analysis of 2000 radio revenues. #3 is Cox Radio – with \$482,000,000, less than one-fifth the size of #2 Infinity.

Radio's level of consolidation made the spotlight thanks to a Washington Post column signed by Senators Fritz Hollings (D-SC) and Byron Dorgan (D-ND). They said that just four groups control 90% of the nation's radio revenue. And warned that other industries shouldn't

be allowed to consolidate the way radio has. They even called it a "frenzy."

Fritz Hollings (D-SC) Byron Dorgan (D-ND)

Duncan shows that the Senators' analysis is way off: The Big Two have about 37% of the pie. And the top four (adding Cox and ABC) are certainly big – but they did about 42.2%. Not 90%.

THE TAYLOR REPORT Don't tell FCC Chairman Powell he leans toward business and automatic deregulation. Streaming is back in – and in the headlines of the mainstream press. Radio One proves Atlanta is "Hot-Lanta" ... pg 4

TOP STORIES	1
WASHINGTON THIS WEEK	3
THE TAYLOR REPORT	4
FORMAT CHANGES	5-6
TECHNICAL RECORD	7-14
TRANSACTION BRIEF	15

Like Bill Murray's "Groundhog Day" movie, EEO just won't go away

The federal courts keep knocking down the FCC's attempts at crafting EEO recruitment and reporting rules that can pass constitutional muster, but the Commission – now led by Republican Chairman Michael Powell – keeps coming back for another replay. The full D.C. Circuit Court of Appeals has just rejected the FCC's request for partial review, and

Powell vows to return for another try before the end of the year. He's looking for regs that "increase employment opportunity in a manner that complies with the judicial limitations." For now, state broadcasters associations have won their battle. But just like "Groundhog Day", they'd better be prepared to rewind, and do it all over again.

Don't tell Chairman Powell he's pro-business. He's quickly gotten sensitive to that charge. In fact, ending the newspaper-broadcast cross-ownership ban is just one of the controversial issues Powell has taken heat on from consumer groups and Democrats in the 5 short months that he's been FCC Chairman. At the June 21 Federal Communications Bar Association luncheon Powell fired back: He said "Everything we do is about consumers", and "deregulation for its own sake is not responsible policy."

Federal courts may be leaning toward deregulation. The D.C. Circuit Court of Appeals rules that Sinclair gets to keep its TV duopolies, for now. This is important because it demonstrates again that the federal courts are ready to blow up some of the FCC's long-held rules about media ownership. Sinclair was facing an FCC divestiture deadline of August 6 — but it won a stay from the appellate court, allowing Sinclair to retain its LMAs in Dayton, Charleston, SC, Columbus, OH and Charleston, WV. The courts previously invalidated the FCC's cable ownership caps, and Viacom wants them to blast away the FCC's 35% national TV cap.

Virgin Islands operator Family Broadcasting moves a step closer to license revocation. The Commission rejects Family's Petition for Reconsideration on procedural grounds and continues to threaten Family with a Show Cause order leading to possible license revocation. The FCC found both technical problems (operating WSTX-FM, Christiansted at 100.3 from an unauthorized location) and problems with misrepresentation. Principal Gerard Luz A. James asked to let he and his wife convey all their stock in WSTX and WSTX-FM to their

children. The Commission says Family is just trying to stave off a possible fine of as much as \$275,000 and revocation of both licenses.

Hardball in political advertising: On the eve of the New Jersey gubernatorial primary, Republican candidate Bret Schundler threatened radio stations with legal action if they took an ad

Bret Schundler, schundler.org

from his competitor. Schundler's attorneys warned stations they'd face legal consequences, according to the NJ Broadcasters Association. It faxed out a reminder that federal law requires broadcasters to run commercials from candidates, and they can't be sued for doing so. Schundler was fighting allegations of Republican primary rival Bob Franks that he'd used money from a scholarship fund for his own campaign purposes. The upshot: Schundler whipped rival Bob Franks, 57% to 43%.

Infinity's not in the NAB – and that hurts the association in the pocketbook. The NAB misses the dues Mel Karmazin was paying, even though NAB exec John David tells the Radio Board that membership is at near-record levels and it continues to add members. But the new memberships don't make up for the

Mel Karmazin, Associated Press

loss of Infinity, because big stations in big markets pay stiffer membership dues than daytimers in unrated markets. Karmazin and Sumner Redstone pulled Viacom out of the NAB because of the TV Board's position on the 35% national cap, and Infinity radio fell under the heading of "innocent bystander."

Clear Channel's return to streaming (using Hiwire) is focusing attention on broadcasters streaming on the **hiwire** web — as opposed to the Internet-only radio stories most papers have been writing about. That's because it's such a big return — 250 stations in the top 50 markets. That could help transform the marketplace and create a more visible ad medium. The big "hiccup" in streaming occurred in April with the agency and buying service demands about AFTRA-talent spots. Now CC and others are plugging in ad-insertion solutions to get back online.

Now that #6-ranked group Citadel has gone private in a \$2 billion acquisition by Forstmann Little, expect it to go into acquisition mode— and to fortify current markets. The June 26 closing (at \$26 a share) happened just as planned, and we expect Citadel's Larry Wilson to get back into action. The new Duncan rankings put Citadel's 2000 revenue at \$368 million, with 204 stations — just behind #5 Entercom at \$392 million.

The rhythmic oldies format took another major-market hit. Greater Media bowed to the ratings and knocked

off "Jammin' Gold" WEJM in Philadelphia at 95.7. It replaced the O'Jays and Motown with a hot AC named "Mix." And in Pittsburgh, Clear Channel laid off four staffers at rhythmic oldies WJII (104.7), though keeping the format in place and using lots of cyberjocking from other markets. Clear Channel has kept rhythmic oldies on stations like WJII and New York-market WTJM (105.1), but has adjusted the approach much closer to urban AC. New York is now "The Heart & Soul of New York" and featuring soul classics.

Arbitron will rate Mexico City beginning this Fall. It's Arbitron's first syndicated radio measurement outside the U.S., and it has enough support to pull it off from both Mexican station owners and agencies (many of them Mexican affiliates of giants like BBDO, Leo Burnett and McCann). M Street notes that at presstime, Arbitron still hadn't renewed its #1 U.S. client, Clear Channel, in many of its U.S. markets. But Clear Channel-affiliated Grupo Acir is supporting the expansion to Mexico City. The first quarterly book there will be Fall 2001, delivered in February 2002. And catch this: Arbitron is employing 100% electronic delivery of the estimates. No printed books.

Role model for Clear Channel? Jacksonville is putting TV, outdoor and 11 radio stations under one roof in a new 120,000-square foot facility. Is this the future for Clear Channel, at least in some markets? The new facility will house two TV stations (Fox affiliate WAWS-TV, Channel 30 and UPN affiliate WTEV, Channel 47). The 7 radio stations that Clear Channel owns, including country FMs WQIK and "Rooster" WROO. The 4 stations that Clear Channel sells via a Joint Sales Agreement with Mark Jorgenson's Concord Media. And they're building a new 30,000-square foot building behind the current TV facility to house CC's local outdoor operations.

RIP, Maurie Webster and Norm Goldsmith. The industry has lost two old friends — and if you didn't know either Maurie or Norm yourself, you probably know somebody who has a 6-degrees-of-separation kind of relationship with them. Maurie Webster worked at CBS Radio Network, was president of the New York Market Radio group (NYMRAD) for 15 years, and mentored plenty of younger broadcasters. While talented and colorful sales trainer and former group head Norm Goldsmith died after a heart operation in Napa, CA — and left \$15,000 for his pals to have a party with.

TRANSACTION BRIEF

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. The transactions are arranged in descending order of sales price. When known, broker notices are included.

Macon-to-Atlanta, GA: Radio One's buying WPEZ, Macon (107.9) for \$55M and moving it northwest to Atlanta. That news came after Radio One blew up the urban AC "Magic" format on one of its two existing Atlanta FMs (WAMJ, Roswell at 107.5), and took it smooth jazz. Now it appears Radio One may be creating another place to park the urban AC format: Move-in WPEZ, which will re-license from Macon to Hampton, GA and downgrade from a C1 to a C2. Seller is U.S. Broadcasting, which got FCC permission for the technical change on January 4 – and now is reaping the benefits. Radio One begins an LMA-to-buy with WPEZ on September 1 and will presumably debut its new format then. George Reed and Tom McKinley of Media Services Group repped U.S. Broadcasting in the sale.

Springfield, Illinois: Clear Channel buys Ben and Sam Stratemeyers' 80s-based WXAJ (99.7) for \$2.8M. WXAJ is a recent Class B sign-on licensed to Hillsboro, IL, south of the state capital of Springfield, and northeast of St. Louis. Seller Union Broadcasting is comprised of brothers Ben and Sam Stratemeyer. Separately, Ben and Sam are dealing their dance-CHR WKIB, Anna, IL to Withers for \$2 million. Both deals were brokered by Greg Guy of Patrick Communications.

Frankfort, KY: Clear Channel buys 5 stations from Commonwealth for \$3.8M. Commonwealth is one of those quiet regional consolidators we mentioned in the June 13 M Street Journal, and it's a little surprising that Glasgow, KY-based Brereton Jones and Steve Newberry are dealing away this cluster in their home state. The stations are oldies WFKY at 1490 (1-kw fulltime, ND); all-news WKYW, a class A at 104.9; AC "Star" WKED-FM, a class A at 103.7; oldies WCND, Shelbyville at 940 (250-w day, 10-w night); and "Thunder Country" WTHQ, Shelbyville, an A at 101.7.

Bangor, ME: Clear Channel shifts WGLUY (102.1) to Mark Jorgenson's Concord Media. We'd bet the divestiture in Bangor (Arbitron market #274) is related to Clear Channel's \$3.75M deal to buy standards WABI (910) and CHR "B97" WWBX from Charles Hutchins' Gopher Hill Communications. CC may need to divest WGLUY to make the Gopher Hill deal work. Oldies "Y102" WGLUY is a Class C2 at 102.1 and it did a 2.8 share I2+ in the Fall Arbitron

Lexington, KY: Lynn Martin acquires Jack Mortenson's "Star 92" WSTL, Carlisle (92.1). Will Martin keep WSTL doing contemporary Christian? It's one to watch. His current Lexington-Fayette stations include sports WLXG (1300), hot AC WCDA (106.3), AC WGKS (96.9) and (pending closing) urban WBTF. Something else to watch: a pending upgrade to make WSTL a C2 facility. Meanwhile, Blue Chip must find a new buyer for Lexington-market WLXO, Stamping Ground (96.1). Lynn Martin was originally supposed to acquire both of Blue Chip's Lexington FMs (WLXO and WBTF). But the FCC local-ownership rules force him to choose, and Martin will buy WSTL and pass on WLXO.

Victoria, TX: Clear Channel pays \$650,000 for Tejano KVLTV (92.3). That gives CC a third FM there, alongside "Kix 108" KIXS and classic rock KLUB. The new addition to the family is KVLTV, which the seller picked up only a little more than a year ago for \$350,000. Now Gerald Benavides' Paisano Communications deals the Class A facility to Clear Channel. Broker: Bill Whitley of Media Services Group.

Amarillo, TX: KPQZ (100.9) goes into receivership, for the second time in less than four years. Court-appointed receiver Roger Cox is asking the FCC to transfer control of the company that owns KPQZ, Mandujano y Asosios, to him. That's pursuant to a Texas state court receivership proceeding. The irony is that Socorro Mandujano and her group themselves acquired the station out of receivership, in a deal with then-receiver Robert R. Sanders. That was in 1998. Class C1 KPQZ is doing a variety of Spanish-language programming, and pulled a 2.7 share I2+ in the Fall Arbitron.

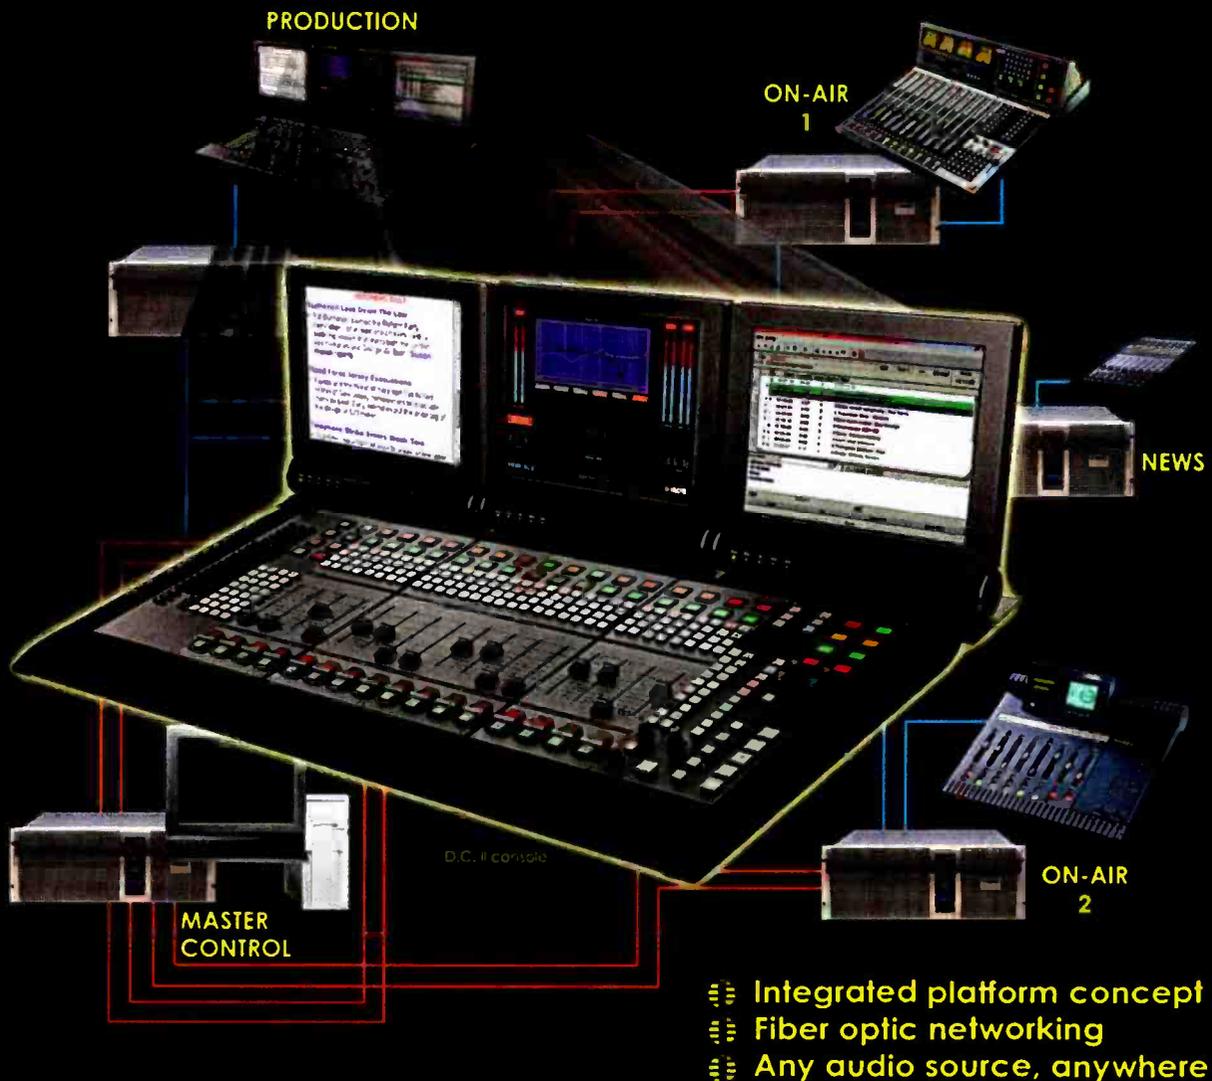

Linden, AL: The court-appointed receiver sells Bishop Willis-owned black gospel WNPT-FM (102.9 MHz) for \$450,000. This had to be a two-parter, because of the FCC rules about who's eligible to take a license. #1, WNPT-FM buyer Jason Schmitt gets the FCC license from receiver Beckham Palmer III. #2, Schmitt buys the physical property from Bishop Willis' main creditor, Ellis Parker. Parker picked up the tangible property of class C2 facility WNPT-FM, Linden, AL in a foreclosure sale on February 27.

Parkersburg, WV: Recent sign-on WVVV (96.9) sells for \$1.3M. Interesting for a couple of reasons: Buyer Bennco just sold in-market oldies WDMX to Clear Channel. And the station Bennco's buying is a product of a recent FM Auction: WVVV, licensed to Williamstown, WV. Seller is Ronald Bishop. Bennco had to certify to the FCC that there's no "unjust enrichment" in the \$1.3M deal, since Bennco had the same bidding credit as Bishop.

Tampa, FL: Salem buys a second Tampa AM for \$6,750,000 and will launch a new simulcast. Salem will throw the 570 KHz now known as WTBN into a simulcast with the 910 KHz facility it acquired in a swap with Cox. Here's the latest sale: Salem pays Mark Jorgenson's Synchronous Media Group/Concord Media \$6.75M for WTBN, Pinellas Park, FL. It's a low-end-of-the-dial signal at 570 with 5-kw day and night, but directional full-time. And the directional characteristic of the signal is what allows Salem to simulcast it with its existing Tampa-area AM, the Plant City-licensed 910. Salem will change calls on the 910 from WSUN to WTWD as it goes into the simulcast. Salem says the new format will use its Christian talk and teaching format, to be known as "Central Florida's Word." It begins an LMA with the 570 on July 16.

The M Street Group Owner Directory - 2001 Edition is now available. \$175.00. Call 1-800-248-4242 to order.

Our Secret is Behind the Scenes!

- Integrated platform concept
- Fiber optic networking
- Any audio source, anywhere

KLOTZ DIGITAL's unique VADIS Platform provides the perfect solution for facilities searching for the ultimate in digital audio integration. From single studio build-outs to new mega-facility operations, KLOTZ DIGITAL provides a cost effective and time saving option to traditional analog and digital facility installations. *Our secret is behind the scenes.* Fiber optic based, the VADIS Platform integrates all audio functions, combining operator tasks, reducing the need for

traditional wiring, and paving the way for effortless future expansion. And, the elimination of a central router means distribution of "any audio source anywhere at any time!" Compare the costs for yourself. When it comes to savings, quality and performance...nobody even comes close. That's why the most sophisticated and technologically advanced facilities throughout the world choose KLOTZ DIGITAL.
