Forward Thinking: Radio Versus Print

We'd argue that radio can reach more people than print — but the Forward Association disagrees with us. To preserve its unique newspaper franchise, it will eventually accept \$78 million in ESPN Radio money and (through an LMA) turn over its WEVD, New York (1050) to Disney/ABC. The current talk format of WEVD, named for American progressive politician Eugene V. Debs, will disappear on August 31, to be replaced by ESPN Radio Network. The Forward's mission has been to reach Jewish readers — and particularly those who don't speak English — through its various newspapers. But M Street

notes that Forward has now sold one FM station and LMA'd out another one. If Forward had chosen to stay in the radio business over the years, instead of using radio to subsidize its money-losing print operation — it would be a small giant in ethnic radio, and able to reach any linguistic minority it wanted to. But Forward is committed to print. Now Disney/ABC is finally able to score a New York-market affiliate for its ESPN brand, and its money gives it the chance to become the third sports-talk station in the Big Apple. (We got curious and checked: The "WSPN" calls belong to a non-com licensed to Skidmore College in Saratoga Springs, NY. Will ABC execs travel up the Thruway?)

Playing Scrabble with Arbitron

Or maybe "Word Scramble", or "Spill 'n' Spell." When you subscribe to Arbitron, you live with the numbers they give you, using Maximiser or other tools to do a little re-arranging within a single market. But there's going to be a whole new game next year, thanks to Clear Channel's groundbreaking new contract with Arbitron — made possible through what Arbitron calls "regional

cont. page 4

See you in New Orleans...

The NAB Radio Show is where policymakers, broadcasters and vendors get to rub elbows, stroll the French Quarter, and devour those out-of-this-world "beignets" at Café du Monde. We hope we'll see you there, September 5-7. And if you can't be there, M Street will cover it for you, start to finish.

TRANSACTION BRIEF	15

Fall Forecast: Not just whistling "Dixie" on Capitol Hill

Fritz Hollings isn't just whistling Dixie when it comes to throwing up caution flags over media consolidation, and now that he's boss of the Senate Commerce Committee, and now that the Democrats control the Senate — Bush and the Powell FCC are forced to take the Senate very seriously. There's one effect already: The FCC apparently won't take up the newspaper-

broadcast cross-ownership ban this Summer. There are probably other issues Michael Powell would like to move on, and the Commission's approval of Tribune's temporary pickup of a TV second station in Connecticut — under the "failed station" rule — may shine a light on its intentions. What's important about the WTTX-TV, Waterbury

case is that Tribune also owns the state's dominant newspaper, the Hartford Courant. The FCC gave Tribune a 6-month waiver, to keep WTTX on the air. In a much bigger case, the Powell FCC voted 3-2 to clear Rupert Murdoch's \$5.35B purchase of the Chris Craft TV group. We should get more insight into the Commission's thinking in New Orleans at the NAB.

The M Street Journal is published bi-weekly and available on the website in PDF format. Weekly updates are also available on the website. Subscriptions are available for \$159 per year, or \$46 per quarter. You may order the most comprehensive listing of all the radio stations in the U.S. and Canada: The M Street Radio Directory, Ninth Edition (10th edition coming in July 2001) for \$65.00 (plus \$7 S&H).

The FCC's 3-2 Republican-Democratic split shows up immediately on ownership issues. 3-2 was the vote when the FCC approved Rupert Murdoch's \$5.35B purchase of the Chris Craft TV group. Chairman Powell says "in multiple-station, multiple-market transactions, it is common for the combined entity to create temporary violations of our ownership rules." The New York-market "temporary violation" is the one that really stands out: For the next 2 years, News Corp. will be allowed to own two VHF TV stations plus the New York Post daily newspaper. News Corp. already owns the Post and Fox affiliate WNYW/Channel 5. The Chris Craft deal adds UPN affiliate WWOR/Channel 9. Both Democrats on the FCC strongly dissented. Gloria Tristani says the decision "shows the lengths the Commission will go to avoid standing in the way of media mergers." Newly-seated Democrat Michael Copps says it "stretches the statutes, denies operative Commission rules, and omits critically important consideration of public interest." The FCC also voted to allow News Corp. to exceed the 35% national TV cap while the courts review that issue. The D.C. Circuit Court of Appeals will hear arguments on that in September.

Several applicants apply to be the interim operator of Mike Rice's revoked licenses — including Rice himself. The FCC stripped Rice of licenses in Indiana and Missouri after holding hearings on his prison sentence for having sex with minors and on his alleged misrepresentation to the Commission. Those stations are in a Twilight Zone situation as the FCC takes applications for interim operators, headed toward an auction of the licenses and CPs that could take years to resolve (given the FCC's problems with FM auctions). Rice has lost literally millions of dollars in assets, and is now filing to become interim operator, under the former name of "Contemporary Media." His rationale? He tells M Street that under the FCC's own character standards, he's now fully entitled to be a licensee, since his offense occurred over 10 years ago. As it stands, those stations, including WBOW, Terre Haute (640) remain on the air under Rice's temporary management — but not the "interim operator" status he seeks. The FCC continues the "Twilight Zone" situation by treating Rice's stations as new CPs and (apparently) deleting their current calls.

The FCC revokes the licenses of two stations in the Virgin Islands. Administrative Law Judge Richard Sippel denies Family Broadcasting's Motion for Summary Decision and takes the final step of officially revoking the licenses for WSTX-AM/FM, Christiansted. The Commission found that Family Broadcasting principal Gerard Luz A. James was operating from an

unauthorized location, and then misrepresented the situation. James may choose to appeal outside the FCC, but these stations may be up for auction/reassignment: WSTX (970) and WSTX-FM (100.3). They're currently simulcasting calypso music.

A \$300,000 "voluntary contribution" by American Tower Systems will clean the record on a list of tower complaints at the Commission, thanks to a newly-published Consent Decree. The FCC originally slammed ATS — a spinoff of the onetime American Radio Systems — with \$212,000 in fines, citing problems with tower registration for new and existing towers, lighting, painting, and ownership changes. But ATC sat down with the Commission and detailed its proposed "compliance plan", and now the FCC is basically accepting that through a consent decree. That ends the investigation and obliges the FCC to treat the original notices of violation and liability as "null, void and expunged." The consent decree lasts for 36 months.

The FCC's "red flag" is no longer killing deals. We've analyzed the outcome of several recent transfer app filings and concluded that the Mass Media Bureau's "red flag" designation under the so-called "processing guidelines" doesn't mean much, these days. The red flag is nearly 3 years old, and Chairman Kennard never presented an underlying policy for it: It simply appeared one day on the listing of some transfer apps. In practical terms, the Mass Media Bureau staff pulls the BIA revenues on the relevant radio market, and stamps a "red flag" if the transfer involves 50% or more revenue in the hands of one owner, or 70% or more in the hands of two. That's even if the transfer involves an existing cluster. That "red flag" was enough to stall or even kill deals under Kennard (ask Journal about the delay in getting approval for its Great Empire deal). Today, under Powell — one observer says "It might slow the deal down 30 days, maybe a little longer." But that's it. The one exception: If the proposed acquisition draws a petition.

Broadcasters are filing lots of objections against would-be Low Power FMs. We even spotted one "Petition for Immediate Dismissal with Prejudice", filed against Edgardo Colon's request for a new 88.5 in Philadelphia, PA. Just guessing, but that's got to be the University of Pennsylvania's WXPB, also at 88.5 and also licensed to Philadelphia. We don't understand how the FCC gave that app a second look, much less published it. M Street is also seeing plenty of informal objections and formal motions to dismiss.

cont. TOP STORIES from PAGE 1

aggregation" or "national database." It will allow subscribers to play Scrabble with geography and create custom geographies, across more than one market, or even across one market and an un-rated area. It's a new selling tool that Clear Channel's Randy Michaels thinks will revolutionize the way radio is sold. Arbitron says it's always been open to the idea. Of course, this new "game" won't be easy to open up: M Street notes that the new regional aggregation approach will need approval from bodies like the Arbitron Advisory Council and possibly outside groups, too. There are a million methodological details to work out — and then the media buyers will see how they like it. One thing's for sure: Arbitron will never be the same.

Citadel — Arbitron's other hold-out group — signs up. Citadel didn't even know that Arbitron and Clear Channel were at loggerheads, when it began its own tough negotiations. COO Bob Proffitt tells M Street "we had some frustrating moments, but we did come to a fair deal" with Arbitron. Citadel had a different negotiating situation from Clear Channel: With Citadel, it WAS all about the money. Though Citadel, like other Arbitron subscribers, should enjoy the benefits of the "national database"/"regional aggregation" tool that Clear Channel was able to extract from Arbitron.

Infinity's Opie & Anthony crusade continues. The hot afternoon duo finally cracks Boston — doing afternoons, live, on modern rock and Stern affiliate WBCN (104.1). We believe there was heavy local resistance at WBCN, but Opie & Anthony debuted August 7. Meanwhile, the O&A team is hitting Seattle and Portland on the AM dial. In Seattle, talk returns to 1090, as KYCW shelves classic country to pick up Premiere's Jim Rome (9am-noon), Westwood's Ron & Fez (noon-3), Opie & Anthony (3-7pm) and Phil Hendrie (7-10pm). It will use the Sporting News Radio Network late nights. For now, Opie & Anthony will also be heard in mornings — but we expect that's temporary, until Twisted Radio host Bob Rivers' non-compete ends in Seattle. Down in Portland, Infinity ditches classic country on 970 to do "Extreme Talk", also aimed at younger males.

KUPL will pick up calls of KUFO, parallel to rocker KUFO-FM. The lineup at 970 includes Don & Mike (9am-1pm), Opie & Anthony (1-5), Sports Junkies (5-8pm) and Ron & Fez (8-midnight). Meanwhile Bob Rivers (5-9am) hits the air immediately in Portland.

Viacom's Bill Figenshu offers advertisers a \$100,000 guarantee that KIKK-FM, Houston will stay country. His "Dear Advertiser" letter comes as the station deals with a nasty Spring Arbitron (3.0 to 1.6) and makes significant changes to both airstaff and playlist. But it's staying country: Figenshu's personal guarantee is good to any active advertiser "throughout my tenure as Senior Vice President at Infinity." On the air, KIKK-FM (95.7) pulls back from its flirtation with Americana and re-focuses on mainstream country — particularly country music that "sounds like Texas."

It's a home-run baseball book so far. The Spring Arbitrons seem to be showing surprisingly strong listening for play-by-play on the radio — Just ask KIRO, home of Ichiro and the Seattle Mariners. Entercom's KIRO blasted an amazing 5.0 to 9.7 between Winter and Spring — nearly a 100% jump because of the Mariners. In the tough New York market, the Yanks helped WABC pick up a full share. One researcher notes that Arbitron's People Meter may be very, very good to baseball — diarykeepers don't always associate the station with the game when they fill out their radio listening. That could partially explain why nighttime and weekend listening was up in the Spring People Meter test in Wilmington, DE — Panel members were listening to the Phillies play-by-play.

John Hogan becomes President/COO of Clear Channel Radio. Chief Operating Officer, working with CEO Randy Michaels, is the job vacated by Kenny O'Keefe at the end of the second quarter. John Hogan is currently a Senior VP based in Atlanta. He and Clear Channel Radio CEO Randy Michaels have worked together since the Jacor days — for more than 15 years. Also at Clear Channel Radio, Jerry Kersting is CC's new Chief Financial Officer. Kersting's the "dealmaker" who handled the nuts and bolts of last year's divestitures from the AMFM Inc. merger.

Infinity's backing a collective contest for non-Infinity stations in non-Infinity markets. Yes, it's an unusual-sounding deal for Infinity, coming out of Columbus, OH. That's where Infinity's GM Dave Robbins is working with Columbus-based The Positioning Works and Don Hallett. Collective contesting generates larger prizes because it ties together multiple stations (which must make the required on-air legal disclosures). Hallett's been involved in strategizing previous collective contest promos. Reach Hallett at (866) Radio-25. Participation is on a first-come basis for what may be the first independent collective contesting initiative.

Music Buddha's "Song Sonar" joins the online music-testing fray. Current vendors like RateTheMusic promise to capture the rapidly-changing tastes of PI listeners, and are typically offered as a link off of the station's website. Music Buddha's Song Sonar has three "modules": Sonic Response, Add-Worthy, and Imager (which shows songs that are the station's current "image" songs by daypart). The service offers live, real-time data, to monitor how listener response changes while you're making adjustments to the playlist. More at "www.MusicBuddha.com."

Jones adds two country shows and subtracts one. Jones debuts a new 7-night-a-week overnight country show, starring John Hendricks, which nicely dovetails with (though doesn't require) the "Lia" show that clears 7-midnight. Meanwhile, Jones is dropping the weekly syndicated Crook & Chase country countdown, and introducing (on Labor Day Weekend), a new Great American Country countdown, hosted by GAC cable-TV personality Dallas Turner.

From Chicago, the Radio Hall of Fame's Class of 2001 — Four of them: Eddie "Rochester" Anderson, Jack Benny's longtime comic sidekick. Paul Harvey Aurandt. Bob Uecker, play-by-play voice of the Milwaukee Brewers. And KMOX, St. Louis legend Jack Carney. Those four men will be inducted into the Chicago-based Radio Hall of Fame in a black-tie ceremony on Sunday, November 3. The Hall's Bruce DuMont plans a "Tribute to Bob Hope" for this year's awards, the 10th anniversary of the Radio Hall of Fame.

TRANSACTION BRIEF

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. When known, broker notices are included. Fax releases to Tom Taylor, (609) 883-5696.

New York, NY

ABC finally scores a New York City affiliate for ESPN Radio with an LMA and \$78M purchase option for WEVD (1050). The LMA that puts ESPN on WEVD full-time begins September 1, and it will expand a beachhead that began when ABC finagled the clearance of Dan Patrick on WEVD from 1-4pm. Terms of the deal: ABC will LMA WEVD for up to two years. Then it has the option of buying it for \$78M. For the seller, the important thing is that the proceeds go into the Forward newspaper operations. The Forward publishes Jewish papers in English, Yiddish and (since 1995) Russian. We expect Forward to ask the IRS for permission to return to its former not-for-profit status. WEVD at 1050 has a 50,000-watt signal, but it's highly directionalized. WEVD does a fine job covering the five boroughs, plus territory to the north and east. But it's severely limited to the south, in New Jersey. ESPN Radio 1050 will become the market's third all-sports signal, after WFAN and Sporting News Radio's WSNR (620). 1050 was the original home of Jeff Smulyan's pioneering all-sports "Fan", before Smulyan acquired then-WNBC and moved WFAN down to 660.

Portland, OR

Salem buys itself a new contemporary Christian "Fish" for \$35.8M. This ranks as one of the year's big move-in stories. KJUN went on the air in 1999 licensed to Tillamook, OR, and then Thunderegg partners George Kriste, Lance Anderson, Ernie Hopseker and Bob Case came into the picture. They moved KJUN into Portland by re-licensing it to Scappoose, and now sell it for nearly \$36 million. Salem will take over the station via an LMA in the fourth quarter. As for the latest "Fish" outlet, Salem's Ed Atsinger says "Portland is a very strong market for Christian music." One other person should be smiling at the early-2002 closing: original KJUN principal Brian Lord, who remained a principal in this deal. Broker for Thunderegg: Gary Stevens.

Atlanta, GA

Radio One begins a \$30,000-a-month agreement to LMA the future Class A at 102.5 licensed to Mableton, GA. The permittee of 102.5 is Mableton Investment Group, and Radio One says it will change the calls from WAVE to WAMJ, giving it the calls currently attached to its own 107.5. Radio One's using this opportunity — gaining a fourth FM in Atlanta — to realign its cluster there. Here's the drill: #1, WHTA at 97.5 remains urban as "Hot 97.5." #2, 107.5, which just abandoned urban AC for smooth jazz, takes new calls of WJZZ. #3, The WAMJ calls move from 107.5 to the new 102.5 — format TBA. #4, WPEZ, the move-in at 107.9 that Radio One is buying. It's now country — but that will change.

Stuart, FL

WSTU (1450) is being acquired by former WNSW GM George Kalman. Kalman tells M Street he's planning to use WNSW as the new base for his syndicated adult standards shows. Those are the 12-year-old "Weekend with Perry", focusing on Perry Como; and the soon-to-launch "Make Believe Ballroom", hosted by Lee Arnold. WSTU is currently doing

oldies. Seller is Resort Radio Systems. WSTU's facility is a 1-kw non-directional fulltimer at 1450 KHz.

Lancaster, SC

Spanish-language operator Estuardo Rodriguez buys WAGL, Lancaster (1560) for \$700,000. Rodriguez already operates Spanish-language WLLN, Lillington, NC, so this purchase makes him a group, by M Street's definition. We'd expect a format change at WAGL, near Rock Hill, SC. WAGL's currently doing a mix of country, talk and southern gospel. Seller is Len Phillips' Palmetto Broadcasting System. WAGL is a 50-kw directional daytimer, and the brokers are Bruce Houston and David Houston of Blackburn.

Albany, NY

Jim Morrell's Pamal Broadcasting does something unusual — it sells a station (WIZR, Johnstown, NY at 930). The former Albany Broadcasting is selling off an AM that's essentially a daytimer to Joseph Isabel, who's already holding adult standards WCSS, Amsterdam, NY at 1490. This deal has Isabel's "IZ Communications" acquiring WIZR, which is basically doing soft AC, using ABC's 45+ soft AC format. It's got 1-kw day, 28-w night, ND. In Pamal's Capital District home market, it retains properties such as CHR "Fly 92" WFLY and soft AC WYJB. Broker on the \$550,000 sale of WIZR from Pamal to Joseph Isabel: Dick Kozacko.

Outside Grand Rapids, MI

Duke Wright's Midwest group is paying \$1,450,000 for classic rock WYVN, Saugatuck (92.7). Midwest is also compensating seller Chris Conrad \$50,000 for a three-year non-compete within 50 miles of the Saugatuck signal contour. Wright has properties in nearby Grand Rapids (AC WHTC), Battle Creek (including country WNNW-FM) and Kalamazoo (hot AC WFAT), and now acquires class A WYVN in Saugatuck, MI from Chris Conrad, who's based in Holland, MI.

Outside of Idaho Falls, ID

Ryan Frandsen's Sand Hill Media lays out \$1.2M for the on-air soft AC "Q FM" KADQ-FM, and a future FM (the CP for KOSZ, a new class C1 at 107.1). Seller is Ted Austin, Jr., who has owned KADQ, Rexburg, ID at 94.3 for quite a few years. It's a C2. Broker: Greg Merrill of Media Services Group.

Could Be Anywhere, USA:

Dealmaking has been markedly quiet so far in 2001, though Clear Channel's been pulling off more "tuck-in" and new-market deals than you might think. But look for lots of quiet deal-talk at the NAB Radio Show in New Orleans. Brokers and group heads are seldom seen palavering on the exhibit floor — but they often get together for discreet chats in nearby hotels. We expect some action out of the NAB Radio Show, as always — sooner or later.

**"You just have to speak
to the right people."**

Shannon Black, on-air talent at KRQQ FM, at the VADIS DC Console.

"After looking at several options, we decided on the VADIS platform and DC consoles from KLOTZ," says John Decker, Chief Engineer, Capstar Communications, Tucson. "Why? First, our install would be much faster since most of the plant wiring could be reduced to a simple Ethernet line and a fiber optic cable connecting each room with our rack room.

"Secondly, all four stations were to be housed in the same facility, and we had to share audio sources all around the plant. This is a function that is part of the KLOTZ system. Our entire plant is now based on a digital audio 'backbone' that provides an improved audio signal.

"We also purchased five DC consoles. The air talent finds the DC consoles simple to operate. They can put any source in our plant on any fader of the console with a simple LCD button in the meter bridge. Giving the operator the ability to call up any source to a fader is great since each operator prefers a different arrangement of sources on the console."

- Installed in world class facilities
- Integrated platform concept
- Fiber optic networking
- Any audio source, anywhere

Passions are running high over the Amber Plan

And guess what? We hear key Congressional reps are already keenly aware of the abducted-child-alert plan and are tracking it. For broadcasters, the fast-spreading "Amber Alert plan" is producing a real fault line: Proponents of the abducted-child-alert plan in markets like Dallas rave about it. ABC's Tyler Cox tells M Street "To me, this is an opportunity for stations to do what they're licensed to do—it's not a burden." But some broadcasters are privately concerned

that it will be just that. We believe every U.S. broadcaster may soon be dealing with the Amber Plan, if the FCC includes some level of abducted-child alert in the next set of EAS revisions. You can get a good overview of how the plan works at the station level by visiting "www.WBAP.com" and clicking on "WBAP Features." And proponent Tyler Cox will present his case on an NAB Radio Show Panel on Friday, September 7 devoted to "Crisis Management."

Signs of life in the station-trading market

There's a pulse beating, even if the deals are "only" \$1 million to \$3 million, and even if the advertising slowdown persists like a bad cold. And it's not just Clear Channel that buying, though CC is the most commonly-seen name in this week's "Transaction Digest." CC picks up four stations in the Hudson Valley (ones it couldn't take last year), and adds stations in Beaumont, Parkersburg and Shamokin (PA). And Tele-Media begins what may be the process of unraveling the entire group by selling its four Albany, NY stations to Jim Morrell's Pamal Broadcasting and Ed Levine's Galaxy group. Overall, broker Larry Patrick says "the logjam may be breaking", and that could be because potential sellers are getting more realistic about station-trading multiples. Brokers tell us one thing, here in late summer 2001: They're busy.

TRANSACTION BRIEF	15

New FCC Chairman Michael Powell is earning respect from radio

Yes, so far, radio likes the new Michael Powell Commission, because execs tell us they know what to expect. The level of unpredictability under previous Chairman Bill Kennard perplexed many buyers, sellers, attorneys and brokers. Execs keep talking about "the process", and they're

pleased with the way it's now functioning under former military officer Powell. M Street expects the new Powell FCC to reveal more of its face at the NAB Radio Show, just after Labor Day. All three new Commissioners (Abernathy, Copps and Martin) will be on hand for the Friday morning "Policymaker's Breakfast", and we expect many FCC staffers to be in the Big Easy, too. If you can't be there (and lots of companies aren't sending their GMs, GSMS or PDs) — M Street will be at the NAB to cover it for you.

Sayonara, Mass Media Bureau? There's serious talk that the FCC's Mass Media Bureau may vanish as part of a rumored scheme to consolidate the Bureau into the cable bureau, to form a new super-bureau. The FCC is already committed to streamlining its processes, and over the last decade, it has actually handled more business with fewer staffers. And based on a recent analysis M Street conducted of the time-lapse between filings and approval, the Mass Media Bureau and other offices seem to be cranking stuff out quite expeditiously. We expect to hear much more about the Mass Media Bureau at the NAB Radio Show — but some of it may be off the record. Grizzled MMB Chief Roy Stewart was fielding questions about the "merger" story at this month's Texas Association of Broadcasters convention in San Antonio.

The FCC inspector started writing up violations at Radio One's Boston-market WBOT, Brockton (97.7) — and didn't quit until the grand total was \$21,500. The single biggest piece of that ticket was a \$10,000 fine for failing to have a public inspection file at the main studio (a charge Radio One disputes). The rest of the fines include \$8,000 for EAS equipment not installed (the FCC didn't like Radio One's excuses about shipping delays). \$500 for not having a local toll-free phone number, after Radio One took over WBOT and moved the main studio from Brockton to Boston (Radio One didn't know it was a toll call). \$2,000 for failing to have operating power logs. And \$1,000 for failing to have station logs. Radio One didn't help itself by asking for leniency based on its clean record. The FCC's Boston office had earlier found violations right there at WBOT.

Better check the FCC's recent list of Low Power FM filings. The Commission just "accepted for filing" 232 new apps — which is a long way from "granted", of course. These LPFM apps are all from the January filing window, and are now subject to objections and petitions to deny. They're all viewable online, by city of license and frequency, at "FCC.gov."

Following a lengthy FCC revocation process, the Mike Rice stations are in legal limbo. In fact — they're practically invisible to the Commission. Look up "WBOW" at "FCC.gov", and it doesn't exist. The call letters aren't there and the technical facility has been deleted from the database, though the Terre Haute AM at 640 KHz is certainly on the air, and being operated by Rice under (apparently) Public Notice. Same for modern AC WZZQ, Terre Haute (107.5), and for the Rice stations in Missouri licensed to Lake Broadcasting, such as KBMX, Eldon. Meanwhile, Mike Rice tells M Street he's done his time and is fully qualified to get his eight revoked licenses and permits back — under the FCC's own character policy. He's waging his fight on several levels: Rice's Contemporary Media is among the parties filing to be "interim operators" of the 8 stations and

CPs in Indiana and Missouri that the FCC is threatening to rip out of his control. He's also ready to file to be their permanent licensee. And Rice tells M Street he's just filed an Application for Review to stop the revocations themselves, though the process is very far along. Other applicants to be interim operators of the Rice stations: Missouri Indiana Broadcasting, LLC, and Indacom, Inc.

There's still a battle-royal over streaming royalties — and the next legal move on streaming royalties is up to the six radio groups and the NAB. Bonneville, Cox, Emmis, Entercom, Infinity and Susquehanna lost a big round in Philadelphia, where U.S. District Court Judge Berle Schiller ruled against them in a suit which had been moved from New York City. What's next? The six groups, plaintiffs in the Philadelphia action, decide where to go from here, then consult with NAB executives in Washington. There's no timetable — except the ticking clock that could be piling up more back-royalties to be paid to labels once the streaming royalty rate is finally determined by a three-member panel. We'd be very surprised if this doesn't land back in the lap of Congress, where the NAB has friends.

Time's running out to prepare the initial filing for the 350-station FM Auction #37. The filing window for required Form 175 opens September 24 and closes October 5. This is the controversial auction that was abruptly bumped from May 9 back to December 5. About 350 CPs will be up for potential auction, depending on how the FCC juggles the appellate court decision about the bidding status of non-profits. Here are the rest of the key dates currently on the schedule: Up-front payments are due November 5 (one month before the auction). The mock auction is December 3 and — if all goes well — the auction itself commences on Wednesday, December 5.

Pay up early, as a convenience — but if you pay the FCC late, you fork over a 25% late fee. The FCC is allowing regulatory fees to be paid earlier than the normal "filing window", which is a nice surprise. The announced filing window for Fiscal Year 2001 is September 10-September 21, but this year the FCC's going to accept fee payments "at any time prior to this window." It's mailing public notices to licensees and permittees about the FY 2001 payments. Fees range from \$250 for a class C AM facility serving under 20,000 population, up to \$4,550 to a Class B, C, C1 or C2 FM with more than 1,000,000 population served. A CP for a new FM station will set you back \$925. The FCC is also rolling out its new "FeeFiler" software, available online and a darn handy time-saver for licensees and permittees who are paying for multiple facilities.

Trouble at Big City Radio: It may have to raise additional equity or restructure its debt. Phrases like "These matters raise substantial doubt about the company's ability to continue as a going concern" will earn careful scrutiny at the SEC. It's actually a stock phrase, and Big City management says it's working on solutions to the cash crisis. The problem: "Cash on hand is not sufficient to support the company's operations through December 31 and its growth strategy. Nor is it sufficient to fund the \$9.8M interest payment due on the notes [debt] on September 15." That's the big date that's looming on the calendar: the semi-annual interest payment on some pricy 11-1/4% notes. It's due September 15 and must be paid in cash.

Look for consolidation or operating agreements among independent syndicators.

NBG's acquisition of Glenn Fisher's operation for \$5.3M in July and the apparent sale of Las Vegas-based Talk America to somebody (identity still undisclosed) are just the beginning of this new phase in the business. One syndicator paints the picture in stark terms: "Premiere, Westwood and ABC are the big guys. The independents are now thinking about how to cooperate to compete with them." One name you can expect to hear in the Rumor Mill: New York-based **United Stations Radio Network**. It's got stability and also name recognition with veterans Nick Verbitsky and Dick Clark.

Spring Arbitrons in eight markets are still on ice. Arbitron continues to embargo markets such as Cleveland, and it refuses to say why — which baffles subscribers we've heard from. Arbitron says the reasons are not related to the recent contract imbroglios with Clear Channel and Citadel.

Take your ears to New Orleans, and help out DAB developer iBiquity. In New Orleans, the DAB testers are looking for experienced professionals "who know what radio should sound like." A sidebar of the NAB will be the National Radio System Committee's

scientifically-conducted "DAB Listening Test", and they're looking for participants who are PDs, GMs, and engineers. The tests will last two hours. Check "NAB.org" for info and the sign-up sheet. The NRSC will forward all test results to the FCC, which will be considering an in-band standard for FM Digital Audio Broadcasting this Fall. Meanwhile, in a new filing with the NRSC, **iBiquity says its new DAB system for FM beats analog and won't interfere with current FM signals.** Bob Struble's team delivered results of 95,000 hours of field tests on 11 radio stations to the National Radio Systems Committee. Struble sounds confident the NRSC will recommend iBiquity's in-band Digital Audio Broadcasting solution to the FCC. He expects FCC authorization for digital FM (not AM) in early 2002, with a big launch of commercial DAB equipment at the Spring NAB in Las Vegas.

That was no baby crying — that was a PSA. There was a lot of wailing in Milwaukee at 7:20am on August 14: 50 straight seconds of a baby crying, followed by a PSA voiceover that said "No matter how much she cries, no matter how tired you are, no matter how frustrated you get — never, ever shake a baby." Emergency room docs and nurses know that "shaken baby syndrome" affects thousands of children a year. We salute the 18 stations in Milwaukee who agreed to air the "shaken baby" PSA at the same time. And kudos to the BVK ad agency for producing the spot and spreading the idea of a "roadblock" — making sure that if you tuned away from this powerful message on one station, you ran into it somewhere else.

It's a shoot-out between dueling country countdown shows. As veteran stars Lorianne Crook and Charlie Chase debut a new countdown show for United Stations on October 6, after leaving the fold at Jones. Over at Jones, its new Dallas Turner weekend GAC countdown show debuts over Labor Day Weekend. And contractually, **Crook & Chase can't appear on United Stations until October 6-7.** They're offering stations a five-

week gap-filling series of commercial-free shows hosted by country artists, but conspicuously devoid of Crook & Chase themselves.

Prediction: Arbitron's new "National Database" product could trigger a new wave of ownership consolidation. In a nutshell: A group like Infinity or Entercom may need to acquire a group like Citadel or Cumulus, just to keep up with Clear Channel. Here's the thinking: Arbitron's national database (or "regional aggregation") produces significant selling advantages for players with big regional footprints. They can go to a McDonald's franchise group and show ratings for an entire region or state. That's probably good for radio revenue, in the long run. But the company that reaps the most advantage from that approach will likely be Clear Channel, because it's got by far the most extensive national reach. (And we're not even talking about CC's radio-plus-outdoor reach.) Smaller companies could find themselves disadvantaged — not even aware there's a buy going down at the regional level.

There's a new nighttime sex and relationship talkshow in syndication, as Fisher Entertainment picks up San Diego's "Love Soup." Glenn Fisher, now working for Portland, OR-based NBG Radio Network, says he's already lined up 11 charter affiliates. Those include Bob Kieve's KARA, San Jose, Emmis' KKLT, Phoenix, Emmis-owned WENS, Indianapolis, and Simmons-owned KQMB, Salt Lake City. Licensed clinical psychologist Dr. Lori Pollick hosts the show on KFMB-FM, San Diego, which debuted only last December. "Love Soup with Dr. Lori" airs on "Star 100.7" from 8-10pm Pacific, Monday-Thursday. Check out excerpts of the show at "HiStar.com."

A Denver concert promoter says it's David vs. Goliath, and he's suing Clear Channel for antitrust. Denver's "Nobody In Particular" filed suit in U.S. District Court, alleging that CC uses the vertical integration of its concert promotion business (the former SFX, now Clear Channel Entertainment) and its radio station alliance to keep artists from doing business with its local rival. The Denver Post says the promoter wants damages and a jury trial. CC Radio's Pam Taylor tells the L.A. Times "We play by the rules and we will vigorously defend ourselves against this."

TRANSACTION BRIEF

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. When known, broker notices are included. Fax releases to Tom Taylor, (609) 883-5696.

Albany, NY:

Tele-Media sparks sell-off rumors after dealing its four Albany-area stations to Pamal and Galaxy. After all, Tele-Media exited the radio business once before, in the 1990s. Here's what just happened in Albany, where Pamal gets bigger in owner Jim Morrell's home town, and Ed Levine-run Galaxy gets a toe-hold in Albany. Call it Act 1: **Pamal buys 4 Tele-Media stations in Albany.** That's #1, WCPT (modern AC "Point"). #2, WKBE (also a modern AC "Point", but not simulcast). #3, WKLI-FM (soft AC). And #4, WABY (news/talk and soft AC). Tele-Media, led by Robert Tudek, reaps a total of \$7M for those four stations. **Pamal keeps two stations for its current cluster:** "Point" WCPT, a class A at 100.9 licensed to Albany. And the other "Point", WKBE, a BI at 100.3 licensed to Warrensburg. WCPT and WKBE join Jim Morrell's current group of six stations, including CHR "Fly 92.3" WFLY and soft AC WYJB (95.5). Meanwhile, in Act 2, Pamal spins two stations to Galaxy: soft AC WKLI-FM, an A at 94.5 licensed to Ravena. And news/talk and soft AC WABY at 1400, with 1-kw full-time. Stamford, CT-based Frank Boyle brokered the transactions.

Macon, GA:

U.S. Broadcasting is recycling \$4 million of Radio One's money to buy the CP for a new Class C2 FM at 95.1 MHz in Macon. Think of it as a kind of replacement signal: Macon-based U.S. Broadcasting is selling Atlanta move-in WPEZ to Radio One for \$55M. Now it's going to plow some of those greenbacks into buying the CP for a new 95.1 MHz facility in the Macon area. The seller is James Popwell, Sr., doing business as Broadcast Equities Corp. Popwell is involved in a half-dozen other Georgia stations and CPs, such as WKKN, Cordele. The CP he's selling to U.S. Broadcasting is known as WEGF, and it's a class C2 — 46-kw at 390 feet — licensed to Montezuma, GA. M Street notes that WEGF is upgrading from its original Class A status, covering 12,000 people, to a C2 that covers 330,000.

Lake Tahoe, CA:

It's a race against time, getting this defaulted AM station back on the air before its license expires. California Judge Jane Myers ordered KTHO, South Lake Tahoe licensee Chris Kidd to cooperate in getting the FCC to approve the transfer of his station to Paradise Broadcasting. That was June 5. FCC documents say that Kidd didn't comply with the order, and on July 19 Judge Myers ordered Clerk of the Court Alan Slater to step in and file to take over as trustee. On August 1, the FCC granted Slater's app to take over from Chris Kidd — who owes Paradise Broadcasting \$300,000. Now Slater is filing to transfer KTHO (590) to Paradise Broadcasting. The clock is ticking, because KTHO is currently silent. If it doesn't resume broadcasting by October 18, Slater warns the license will expire.

Southwestern GA:

Small Town Radio buys its first four stations, and they ARE in small towns — Blakely, GA and Donalsonville, GA. Total compensation to the selling Kelley family will be about \$1.5M, including the employment contract for Gil Kelley, Jr., whose father has owned some of these stations for decades. Small Town's management includes former Root Communications executive Don Boyd. Here's what the Kelley family is selling: In Blakely, country/talk WBBK at 1260, and country "B93" WBBK-FM, a C3 at 93.1. Down south in Donalsonville, the Kelleys are selling country/talk WSEM at 1500 (simulcast on WBBK). And hot AC WGMK, a class A at 106.3. Both AMs are 1-kw daytimers. Broker on the sale: Doyle Hadden.

Beaumont, TX:

Cumulus pays \$2.1M to add an FM in a market where it's about to move another FM over to Houston. The new purchase is oldies KLOI, a Class C3 that's only been on the air a couple of years in Beaumont-Port Arthur, TX. Of course Lew Dickey-run Cumulus already has its eyes on Texas due to its impending move-in of KAYD (97.5) from Beaumont to Houston. This new acquisition — KLOI, Silsbee at 101.7 — is apparently supposed to stay home in Beaumont, and is temporarily simulcasting with Country KAYD-FM. Seller is San Antonio-based William G. Hill, who picked up majority control of KLOI through a transaction earlier this year involving Gerald Proctor.

Monroe, LA:

Mike Oesterle's ownership group pays nearly \$3M to enter Monroe, LA. The three stations on the block belong to Dan Hollingsworth's Ruston Broadcasting: "The Choice" urban KRUS, a one-kilowatt full-timer at 1490. Hot AC "B99.3" KNBB, a class C3. And country "Kix 107.5" KXKZ, a C. They're licensed to Ruston, LA, and they're all going to Michael Oesterle's Communications Capital Managers, LLC. Price: \$2.97M, with an escrow of \$200,000. Some familiar names are in the Oesterle ownership group: Woodward Stover. Charles McLavy. And Michael Starr. Oesterle and Stover are the Managing Members of the LLC. Charleston, SC-based Gordon Rice represented the seller.

Salt Lake City, UT:

To accomplish its TV swap with Rupert Murdoch, Clear Channel divests talk/sports KALL at 910 KHz. Lowry Mays is about to have his first TV property in Salt Lake (ABC affiliate KTVX), and that reduces the number of radio stations CC can hold there by one. (The FCC's max is 1 TV station/7 radio stations.) The station Clear Channel's going to divest is talk/sports KALL (910), which usually pulls close to a 2-share 12+. Buyer is Van Archer's Mercury Broadcasting, which already has three stations in Salt Lake that CC is providing sales services to: soft AC "Cosy" simulcast KOSY/KRAR and classic hits KCPX. The FCC required Murdoch's News Corp. to divest KTVX/Channel 4 in Salt Lake, and Clear Channel's going to pick up both it and KMOL, San Antonio, in exchange for Minneapolis-market WFTC-TV.

Our Secret is Behind the Scenes!

- ≡ Integrated platform concept
- ≡ Fiber optic networking
- ≡ Any audio source, anywhere

KLOTZ DIGITAL's unique VADIS Platform provides the perfect solution for facilities searching for the ultimate in digital audio integration. From single studio build-outs to new mega-facility operations, KLOTZ DIGITAL provides a cost effective and time saving option to traditional analog and digital facility installations. *Our secret is behind the scenes.* Fiber optic based, the VADIS Platform integrates all audio functions, combining operator tasks, reducing the need for

traditional wiring, and paving the way for effortless future expansion. And, the elimination of a central router means distribution of "any audio source anywhere at any time!"

Compare the costs for yourself. When it comes to savings, quality and performance...nobody even comes close. That's why the most sophisticated and technologically advanced facilities throughout the world choose KLOTZ DIGITAL.
