

Vibrating type of retifier and stepdown transformer outfit for recharging storage batteries on the usual alterniating current supply line. The vibrating reed, which appears under the handle, rectifies both side of the alternating current so that direct current is obtained. The volume of direct current is indicated by the ammeter. The CALL LETTER, is published monthly, as the only official publication of the Northwest Vintage Radio Society which is a nonprofit organization incorporated in the State of Oregon. Meetings are held on the 2nd Saturday of each month (July and August omitted) at the Buena Vista Clubhouse in Oregon City.

President---- Bill DeVey 635-6746 Vice President--- Jerry Talbott 649-6717 Treasurer----- Ed Charman 654-7387 Recording Secretary- Dan Howard 761-7799 Corresponding Secretary ------Dick Karman 288-1285 Librarian----- Chuck Kibler 678-5066 In July, your editor, representing the Northwest Vintage Radio Society met with the membership of the Buena Vista Club.

As reported, the Buena Vista Club will retain it's identity with a reduced number of meetings & activities; and has taken a new position on clubhouse rental.

First, the Buena Vista Club will not carry insurance for the building. Instead they will require a "hold harmless" agreement to be signed in good faith by any organization using the clubhouse.

Second, the Buena Vista Club will not rent the clubhouse during the months from November to March. This will cut down on maintenance and eliminate the need to check on the plumbing and heat.

The Northwest Vintage Radio Society has tentatively made an agreement with the Buena Vista Club.

1) NWVRS will be able to use the clubhouse year 'round. During those winter months where the society will be the sole users, the society will be responsible for any minor seasonal maintenance, i.e.: draining the plumbing or fixing it if we fail to drain it, heating the building as needed, shoveling snow or repairing storm damage.

2) NVWRS will pay the Buena Vista club \$10.00 per use and periodically assist in building maintenance.

3) NWVRS will enter into a "hold harmless" agreement which will absolve the Buena Vista Club of any civil liabilities stemming from the maintenance and upkeep of the building or facilities.

If these terms are agreeable with the membership we will adopt them & proceed with further arrangements. All arrangements will be on a year by year basis.

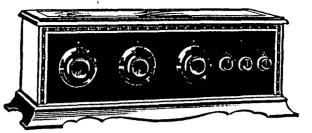

I Suppose it was only in jest--Vintage Radio Cats weren't impressed When a member chose to wear A large "Devil-may-care", Victor Phono dog there on his chest!

Joe loves to create new gear, With parts from the twenties I hear, This must be the reason This Bi-cen-ten season, Is all full of static , I fear!

Of Iris, I collect a few old Cultivars, Another buff dotes on <u>old</u> timey cars, Some amass this and that, But a pox on the cat, Who gathers old rauchy cigars!

> From the Tom James Collection Originally from Volume II,1976

The Receiver of the Year

The year has brought forth one outstanding radio receiver—the Deresnadyne. It is the most advanced and talked about on the market.

The Deresnadyne is remarkable first of all for its one of purity of tone and fidelity of reproduction. And tone is what counts after you've owned a set a while. It is not merely a plaything it do for the fan but a musical power instrument of the greatest and most lasting De Luxe Model

utility. The Deresnadyne is remarkable for its selectivity. In this respect it has no superior. Local or outside stations it brings them in without interference.

It is remarkable for its distance. In one evening one owner got Calgary, Havana, Springfield, Mass., and Los Angeles.

Above all the Deresnadyne is remarkable because it does not sacrifice tone to power or vice versa. It combines them. It is not a Neu-

> trodyne. It is not a Heterodyne. It is new in principle as well as results. Buy it at your dealer's.

RADIO in the family

JUST A THOUGHT

I'm listening to the radio
 It's something great & grand.
It's power, why it's filled with mystery,
 Something I can't understand.

We hear the news of all the world We hear what's going on, Speeches, news, and music Comes to you and me From here, from there, from land, from skies From ships, and over sea.

And then if one pauses to think As you listen from a cozy chair We know it has taken years & inventor's skill And we know God's power is there.

The <u>Masonic Analyst</u> in November of 1934 printed this poem written by Miss Marie Ballard. Marie wrote the poem as a patient at the Shriner's Children's Hospital the year before, while listening to a radio just outside her cubicle.

Marie Ballard was no different than the other children in the hospital. She went on to attend Franklin High. She eventually met a boy named Tom, and they were married. Their first son they named Richard; we know him as Dick Howard. He and Dan have contributed much to our society. Johnny Roventini was working as a page boy in the Hotel New Yorker for \$15 a week when Advertising man, Milton Biow, sent him on a "fool's errand" in the hotel lobby, calling for Philip Morris. No sooner were the words said, than he became one of the worlds few living trademarks.

"Call for Philip Morris" with the strains of "On the Trail" from the "Grand Canyon Suite", were first heard April 17, 1933.

Johnny was immediately signed to a lifetime contract which started at \$20,000 per year. Not bad for the stale end of the depression.

Johnny "stepped out of storefronts" everywhere for 20 years. He appeared on radio in "the Rudy Vallee show", Break the Bank",Crime Doctor", "One man's Opinion", "The Kate Smith Show", "Casey, Crime Photographer", "It pays to be Ignorant", not to mention, "The Philip Morris Playhouse", & "Johnny Presents".

He became so much in demand, broadcasting on both the East and West Coast, that "Johnny Juniors" were trained. Several page boys were hired but only the original Johnny could hit a perfect B-flat every time.

In the early fifties, Philip Morris discontinued using Johnny's picture and voice in their advertising. During the 50's and 60's, except when traveling, Johnny stayed near his Brooklyn home, where his normal sized brother acted as his chauffeur and bodyguard.

Author Richard Lamparski, in 1967, reported that Johnny was an active golfer and the Captain of his own cruiser. In 1976, radio show collector John Dunning writes that Johnny is still under contract to Philip Morris.

Your editor often hears that familiar "Call for Philip Morris" on radio shows tenderly preserved on tape and record, but how often do we forget Johnny Roventini, 49" tall? 1933

Eighty million Americans went to the movies each week, children paying a dime, adults a quarter,. On that screen Fred Astaire & Ginger Rogers danced together for the first time in "Fly Me Down To Rio", and Walt Disney's studios released "The Three Little Pigs".

Popular songs were "Smoke Gets In Your Eyes", "Boulevard of Broken Dreams", and "The Easter Parade"

Roosevelt was in the White House, the Volstead act (prohibition) was repealed, Fiorello H. LaGuardia was elected mayor of New York City.

In Portland, KXL was broadcasting from the Multnomah Hotel with 100 watts; KEX originated (with 5,000 watts) from the Terminal Sales building; and KOIN came out of the New Heathman Hotel. All these they buildings still stand. But had different addresses in 1933. For that was the year that Portland began renumbering all of their addresses into one, contiguous street numbering scheme.

A small news item in Portland was the abundance of trolley cars. The local trolley company began burning the excess cars instead of mothballing them. The big news that summer was also fire. That was the year of the first Tillimook burn which devastated the coast range.

National news came from such notable voices as Lowell Thomas, David Lawrence; and H.V. Kaltenborn.

Radio was more than news. Amos & Andy was in it's fourth season and was heard 5 times each week at 7 pm. Ovaltine was pushing "Lil Orphan Annie" for her second year. Fleischmann was sponsoring Rudy Vallee Show, and Johnny began his famous "CAAAALLL FFFOOORRR PHILLLIPPPP MORRRASSSSS". While "alphabet soup" agencies came from the Federal Government, Tubes had a few of their own. In April RCA marketed the "pentagrid converter". From Britain, Cossor introduced the DD/pen, and Lissen produced the Vari-mu pen.

On the outside, radios had a new look. Atwater Kent, General Electric & others came out with the six-legged consoles. Some of the spindle-legged beauties were still "high-boys" while others displayed legs of only 6 inches. The AK model 711 with 11 tubes sold for \$150.00.

It was doubless a less expensive set that the patients at the Shriner's childred's hosital were listening to when a high school student named Marie Ballard was there in October (see page 6).

"Midget" radios were popular & nearly every line touting a cathedral for under \$50.00. Philco sold their Model 60B for \$29.50.

Amateur radio operators were busy saving their pennies to buy the newest superhetrodynes, like National's line of crystal filtered sets.

Over all, radio was helping the nation forget the depression and it worked.

SWAP SHOP

WANTED:

A speaker appropriate for the Atwater Kent mod. 46. Show quality or fixer upper. E.N. Morrell, 12369 39th Place Yuma, Arizona 85365.
