

U. S. DEPARTMENT OF COMMERCE
RADIO DIVISION

RADIO SERVICE BULLETIN

ISSUED MONTHLY

Washington, February 28, 1930—No. 155

CONTENTS

	Page		Page
New stations.....	2	Miscellaneous—Continued.	
Alterations and corrections.....	5	Bolivia and Persia ratify the international radiotelegraph convention.....	28
Miscellaneous:		An act to require apparatus and operators for radio communication on certain ocean steamers, approved June 24, 1910, as amended July 23, 1912.....	28
List of vessels equipped with a radiocompass.	25	Lost commercial radio operators' licenses.....	29
Transmission of weather forecasts and navigational warnings by Canadian coast stations.....	26	Applying the visual double modulation type radio range to the airways.....	29
Restrictions effective January 1, 1930, governing the use of certain frequencies and spark transmitters.....	28	Improvement of radio measurement methods.....	30
New international list of frequencies of radio stations.....	28	Improvements in visual indicator for aircraft radiobeacon.....	30
Map of radiotelegraph stations.....	28		

ABBREVIATIONS AND SYMBOLS

The necessary corrections to the list of Commercial and Government Radio Stations of the United States and to the International Lists of Radio Stations, appearing in this bulletin under the heading "Alterations and Corrections," are published after the stations affected in the following order:

Name	= Name of station.
Loc.	= Geographical location. W=west longitude. N=north latitude. S=south latitude. E=east longitude.
Call	= Call signal (letters) assigned.
Type	= Type of wave classified as follows: A1=continuous wave (tube), A, arc=continuous wave, A2=interrupted continuous wave, A3=phone, B=spark.
Fy.	= Frequency in kilocycles; normal frequency in italics; wavelength in meters in parentheses.
Service	= Nature of service maintained: PG=general public (ship to shore), PR=limited public (limited to public correspondence between fixed stations), P=private (limited commercial and special), O=Government business exclusively.
Class	= FX=fixed station (point-to-point service), RG=radio-compass station, FA=aeronautical station, AB=aviation beacon, RF=circular radiobeacon, B=ship station, FC=coast station.
House	= Hours of operation: N=continuous service, X=no regular hour, Y=sunrise to sunset.
Accounts	= Message accounts settled by.
I. R. T. Co.	= Intercity Radio Telegraph Co.
M. R. T. Co.	= Mackay Radio & Telegraph Co.
R. C. A.	= Radio Corporation of America.
R. M. C. A.	= Radiomarine Corporation of America.
T. R. T. Co.	= Tropical Radio Telegraph Co.
C. w.	= Continuous wave.
I. c. w.	= Interrupted continuous wave.
A. c.	= Alternating current.
V. t.	= Vacuum tube.
M. a.	= Meters-amperes.
U. S. L.	= Applies only to the list of Commercial and Government Radio Stations of the United States.
△	= Equipped with a radio compass (direction finder).

NEW STATIONS

Commercial land stations, alphabetically, by names of stations

[Additions to the List of Commercial and Government Radio Stations of the United States, edition of June 30, 1929, and to the International List of Fixed and Land Stations, published by the Berne bureau]

Station	Class	Call signal	Frequency in kilocycles; meters in parentheses	Service	Hours	Owner
Flint, Mich. ¹	FX	WPDF	2,416 (124.17)	P	X	City of Flint, police department.
Miami, Fla. (Dinner Key). ¹	FA, FX	WGF	3,070 (97.7), 5,690 (52.72), 12,210 (24.51).	P	X	New York, Rio & Buenos Aires Line (Inc.).
New York, N. Y. ¹	FA, FX	WGE	do	P	X	Do.
St. Paul, Minn. ¹	FX	WPDS	2,416 (124.17)	P	X	City of St. Paul, Department of Public Safety.
San Juan, Porto Rico. ²	FA, FX	WGD	3,070 (97.7), 5,690 (52.72), 12,210 (24.51).	P	X	New York, Rio & Buenos Aires Line (Inc.).
Youngstown, Ohio ³	FX	WPDG	2,416 (124.17)	P	X	City of Youngstown, police department.

¹ Type A3.² Type A1, A2, A3.³ Loc. 93° 08' 00" W., 44° 58' 00" N. (approximate); type A1, A3.⁴ Type A2, A3.*Commercial ship stations, alphabetically, by name of vessels*

[Additions to the List of Commercial and Government Radio Stations of the United States, edition of June 30, 1929, and to the International List of Ship Stations, published by the Berne Bureau]

[Addition to the List of Commercial and Government Radio Stations of the United States, edition of June 30, 1929, and to the International List of Fixed and Land Stations published by the Berne bureau]

Station	Call signal	Frequency in kilocycles, meters in parentheses	Serv- ice	Hours	Owner
Oceanographer ¹	NEDF	375 (800), 400 (750), 425 (700), 468 (640), 500 (600).	O	X	Department of Commerce, Coast and Geodetic Survey.

¹ Type, A2.

Government land and ship stations, alphabetically, by call signals

Call signal	Name of station	Call signal	Name of station
NDF	South Manchester, Conn., (third district reserve unit)	NEDF	Oceanographer
NEB	David National Airport, David, R. P.	NHC	Panama City National Airport, Panama, R. P.
		WZAA	Pope Field (Fort Bragg), N. C.

Airway radiobeacon stations

[Additions to the List of Radio Stations of the United States, edition of June 30, 1929, and to the International List of Aircraft Stations published by the Berne bureau]

Station and geographical location	Frequency and type for emission	Power (height of aerial and intensity of current at base)	Characteristic signal	Hours
Bellefonte, Pa.: 77° 43' 00" W., 40° 54' 00" N. (approximate).	A2-303 (990)-----		N and A (— and ——) N. and NW. quadrants have a characteristic starting with a dash.	N.
Cicero (Chicago), Ill.: 87° 45' 00" W., 41° 47' 00" N. (approximate).	A2-350 (855)-----		do-----	N.
Cleveland, Ohio: 81° 51' 00" W., 41° 24' 00" N. (approximate).	A2-344 (870)-----		do-----	N.
Des Moines, Iowa: 93° 30' 00" W., 41° 39' 00" N. (approximate).	A2-306 (980)-----		do-----	In accordance with regular flying schedules and upon request.
Goshen, Ind.: 85° 49' 00" W., 41° 32' 00" N. (approximate).	A2-321 (935)-----		do-----	N (operates in conjunction with weather broadcasts of Bryan, Ohio).
Key West, Fla.: 81° 47' 00" W., 24° 32' 00" N. (approximate).	A2-286 (1,050)-----		do-----	Operates upon request only.
Sterling, Ill.-----	A2-327 (915)-----		do-----	In accordance with regular flying schedules and upon request (operates in conjunction with weather broadcasts of Iowa City, Iowa).

ALTERATIONS AND CORRECTIONS**COMMERCIAL LAND STATIONS**

[Alterations and corrections to be made to the List of Commercial and Government Radio Stations of the United States, edition of June 30, 1929, and to the International List of Fixed and Land Stations, published by the Berne bureau]

AKRON, N. Y.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,665 (64.44), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

ASBOSO, P. I., Radio (Bataanes).—Hours, ship service 40 to 50 minutes of each from 7 a. m. to 8 p. m., continuous from 8 p. m. to 7 a. m.

BANTANGAS, P. I., Radio (Bantangas).—Hours, ship service 40 to 50 minutes of each hour from 7 a. m. to 8 p. m., continuous from 8 p. m. to 7 a. m.

BELLE ISLE, MICH.—Read Detroit (Belle Isle), Mich.; loc. (approximate) 82° 59' 00" W., 42° 20' 00"'; type, strike out A1.

BRUNSWICK, OHIO (WNDB).—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

CEBU, P. I. (KTL).—Fy., add 5,465 (54.89), 5,475 (54.79), 5,485 (54.69), 5,495 (54.59), 8,930 (33.59).

CEBU, P. I., Radio.—Hours, ship service 40 to 50 minutes of each hour from 7 a. m. to 8 p. m., continuous from 8 p. m. to 7 a. m.

CEIBA, P. R., Radio.—Hours, 8 to 11 a. m., 1 to 5 and 6.30 to 7.30 p. m.

COLUMBUS, OHIO (WNDM).—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

DAVAO, P. I., Radio (Mindanao).—Hours, ship service 40 to 50 minutes of each hour from 7 a. m. to 8 p. m., continuous from 8 p. m. to 7 a. m.

DAYTON, OHIO.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

GUAM, GUAM, Radio.—Type, strike out A3; fy., strike out 7,445 (40.30), 14,890 (20.15), 16,575 (18.10), 18,820 (15.94), 22,660 (13.239); add 6,515 (46.05), 11,080 (27.08), 11,140 (26.93), 11,200 (26.79), 16,580 (18.094), 22,100 (13.575), 22,160 (13.538).

HONOLULU, HAWAII (KGS).—Read Honolulu (Kaena Point), Hawaii; loc. $158^{\circ} 16' 36''$ W., $21^{\circ} 34' 36''$ N.; fy., strike out 7,437.5 (40.34), 14,875 (20.175), 22,660 (13.239); add 22,700 (13.216).

HONOLULU, HAWAII, Radio (KYG).—Loc. $158^{\circ} 16' 36''$ W., $21^{\circ} 34' 36''$ N.; type, add A3; fy., add 4,116 (72.886), 6,515 (46.05), 11,020 (27.22), 11,080 (27.08), 11,140 (26.93).

ILOILO, P. I. (KTJ).—Fy., 3,355 (56.02), 5,365 (55.91), 7,400 (40.54), 7,415 (40.46).

ILOILO, P. I., Radio.—Hours, ship service 40 to 50 minutes of each hour from 7 a. m. to 8 p. m., continuous from 8 p. m. to 7 a. m.

LEGASPI, P. I., Radio.—Hours, ship service 40 to 50 minutes of each hour from 7 a. m. to 8 p. m., continuous from 8 p. m. to 7 a. m.

MANILA, P. I., Radio (KAA).—Fy., strike out 187.5 (1,600), add 125 (2,400), 187 (1,605).

MANILA, P. I. (KAX).—Fy., add 19,980 (15.015).

MANILA, P. I. (KAY).—Fy., 14,980 (20.03).

MANILA, P. I. (KAZ).—Fy., add 9,990 (30.03).

MANILA, P. I. (KBI).—Fy., add 21,140 (14.191).

MANILA, P. I. (KBJ).—Fy., 13,240 (22.66).

MANILA, P. I. (KBK).—Fy., add 6,680 (44.91).

MANILA, P. L (KTN).—Fy., add 5,705 (52.585), 5,720 (52.45), 5,735 (52.31), 5,765 (52.038), 8,120 (36.95), 9,110 (32.93), 9,990 (30.03).

MANILA, P. I. (KTO).—Fy., add 16,240 (18.473).

MANILA, P. I. (KTP).—Fy., add 8,120 (36.95).

MANILA, P. I. (KUS).—Fy., 18,220 (16.465).

MANILA, P. I. (KUV).—Fy., 12,280 (24.43).

MANILA, P. I. (KUW).—Fy., 9,110 (32.93).

MILFORD, OHIO.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

MILWAUKEE, Wis.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

MUSSELROCK, CALIF. (KGQ).—Read Mussel Rock, Calif.; loc. $122^{\circ} 29' 00''$ W., $37^{\circ} 39' 00''$ N. (approximate); fy., strike out 7,437.5 (40.34), 14,875 (20.175), 22,660 (13.239); add 22,700 (13.216).

MUSSELL ROCK, CALIF., Radio.—Read Mussel Rock, Calif., Radio.; type, add A3; fy., strike out 11,200 (26.79); add 4,116 (72.886), 6,515 (46.05), 11,020 (27.22), 22,100 (13.575), 22,160 (13.538).

NEW BRUNSWICK, N. J. (WNDP).—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

PASADENA, CALIF.—Type, A3.

PEORIA, ILL.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

PORT ARTHUR, TEX., Radio.—Loc. 93° 38' 02" W., 29° 50' 24" N.; type, add A2.

SAYVILLE, N. Y. (WML).—Fy., strike out 7,662.5 (38.65), 7,737.5 (38.78), 7,752.5 (38.70), 8,980 (33.41), 10,820 (27.73), 13,015 (23.05), 14,695 (20.415), 14,725 (20.375), 14,755 (20.335), 17,680 (16.968), 19,560 (15.337), 19,600 (15.306).

SOUTH LYON, MICH.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

SPRINGFIELD, ILL.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

TRENTON, N. J.—Type, add A2; fy., 3,310 (90.63), 4,565 (65.71), 4,585 (65.43), 4,605 (65.14), 4,615 (65), 4,625 (64.86), 4,635 (64.72), 4,645 (64.58), 4,655 (64.44), 4,665 (64.30), 4,675 (64.17), 4,685 (64.03), 4,695 (63.89), 4,705 (63.76), 5,095 (58.88), 5,105 (58.76), 5,115 (58.65), 5,125 (58.53), 5,135 (58.42), 5,145 (58.30), 5,155 (58.19), 5,165 (58.08), 5,175 (57.97), 5,185 (57.85), 5,195 (57.74), 5,205 (57.63), 5,885 (50.97), 5,900 (50.84).

⁴ Seasonal only; accompanies fishing fleet in summer.

RESTRICTIONS EFFECTIVE JANUARY 1, 1930, GOVERNING THE USE OF CERTAIN FREQUENCIES AND SPARK TRANSMITTERS

The attention of radio companies, shipowners, and all others concerned is invited to the following provisions of the International Radiotelegraph Convention, Washington, 1927:

1. No new transmitting installations using type B waves shall be made in mobile stations beginning January 1, 1930, except when these transmitters working on full power shall dissipate less than 300 watts measured at the input of the supply transformer at audible frequency (art. 5, par. 8, subpar. 2, and art. 16, par. 1, subpar. 2).

2. The use of waves of type B of a frequency below 375 kilocycles (wave length above 800 meters) is forbidden beginning January 1, 1930, subject to provisions of paragraph 1 of article 5, and except for existing land stations (art. 5, par. 8, subpar. 1).

3. Mobile stations must be established in such a manner as to conform, with reference to frequencies and types of waves, to the general provisions constituting the subject matter of article 5. In accordance with these provisions, the use, by mobile stations, of damped waves (type B), of a frequency below 375 kilocycles (wave length above 800 meters) is forbidden beginning January 1, 1930 (art. 16, par. 1, subpar. 1).

4. The use of the wave of type B of 1,000 kilocycles (300 meters) for traffic shall be forbidden, at all hours, beginning January 1, 1930, at the latest. However, this same wave of type B of 1,000 kilocycles (300 meters) can be continued in use indefinitely, and without restriction as to hours, by stations on board fishing vessels, for radio compass bearings between themselves, provided they do not interfere with broadcasting (art. 16, par. 3, subpar. 4).

NEW INTERNATIONAL LIST OF FREQUENCIES OF RADIO STATIONS

The International Bureau of the Telegraph Union, Radiotelegraph Service, Berne, Switzerland, contemplates issuing within the near future such a list. The price will be 32 francs, Swiss gold (about \$6.18), including supplements to the end of the current year and postage. All remittances should be forwarded direct to the Berne Bureau.

MAP OF RADIOTELEGRAPH STATIONS

The International Bureau of the Telegraph Union, Radiotelegraph Service, Berne, Switzerland, now has available for distribution such a map. The price is 2 francs, 10 centimes, Swiss gold (about 41 cents), including postage. All remittances should be forwarded direct to the Berne Bureau.

BOLIVIA AND PERSIA RATIFY THE INTERNATIONAL RADIOTELEGRAPH CONVENTION

These countries deposited their ratifications of the International Radiotelegraph Convention with the Department of State, on January 25 and February 7, 1930, respectively.

AN ACT TO REQUIRE APPARATUS AND OPERATORS FOR RADIO COMMUNICATION ON CERTAIN OCEAN STEAMERS, APPROVED JUNE 24, 1910, AS AMENDED JULY 23, 1912¹

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That from and after October first, nineteen hundred and twelve, it shall be unlawful for any steamer of the United States or of any foreign country navigating the ocean or the Great Lakes and licensed to carry, or carrying, fifty or more persons, including passengers or crew or both, to leave or attempt to leave any port of the United States unless such steamer shall be equipped with an efficient apparatus for radio communication, in good working order, capable of transmitting and receiving messages over a distance of at least one hundred miles, day or night. An auxiliary power supply, independent of the vessel's main electric power plant, must be provided which will enable the sending set for at least four hours to send messages over a distance of at least one hundred miles, day or night, and efficient communication between the operator in the radio room and the bridge shall be maintained at all times.

The radio equipment must be in charge of two or more persons skilled in the use of such apparatus, one or other of whom shall be on duty at all times while the vessel is being navigated. Such equipment, operators, the regulation of their watches, and the transmission and receipt of messages, except as may be regulated by law or international agreement, shall be under the control of the master, in the case of a vessel of the United States, and every willful failure on the part of the master to enforce at sea the provisions of this paragraph as to equipment, operators, and watches shall subject him to a penalty of one hundred dollars.

That the provisions of this section shall not apply to steamers plying between ports, or places, less than two hundred miles apart.

SEC. 2. That this Act, so far as it relates to the Great Lakes, shall take effect on and after April first, nineteen hundred and thirteen, and so far as it relates to ocean cargo steamers shall take effect on and after July first, nineteen hundred and thirteen: *Provided*, That on cargo steamers, in lieu of the second operator provided for in this Act, there may be substituted a member of the crew or other person who shall be duly certified and entered in the ship's log as competent to receive and understand distress calls or other usual calls indicating danger, and to aid in maintaining a constant wireless watch so far as required for the safety of life.

The remaining sections of the act of June 24, 1910, which are unchanged, read as follows:

SEC. 2. That for the purpose of this Act apparatus for radio communication shall not be deemed to be efficient unless the company installing it shall contract in writing to exchange, and shall, in fact, exchange

¹ The amended act applies to vessels licensed to carry as well as those actually carrying 50 or more persons, etc. This act of 1910 as amended in 1912 was not repealed by the radio act of 1927, approved Feb. 23.

as far as may be physically practicable, to be determined by the master of the vessel, messages with shore or ship stations using other systems of radio communication.

SEC. 3. That the master or other person being in charge of any such vessel which leaves or attempts to leave any port of the United States in violation of any of the provisions of this Act shall, upon conviction, be fined in a sum not more than five thousand dollars, and any such fine shall be a lien upon such vessel, and such vessel may be libeled therefor in any district court of the United States within the jurisdiction of which such vessel shall arrive or depart, and the leaving or attempting to leave each and every port of the United States shall constitute a separate offense.

SEC. 4. That the Secretary of Commerce shall make such regulations as may be necessary to secure the proper execution of this Act by collectors of customs and other officers of the Government.

LOST COMMERCIAL RADIO OPERATORS' LICENSES

Hereunder is a list of radio operators' licenses which have been reported to this office as having been lost. Should any of them be found, they should be returned to this office for cancellation. Supervisors and others concerned should see that lost licenses are not being used by unauthorized persons.

APPLYING THE VISUAL DOUBLE MODULATION TYPE RADIO RANGE TO THE AIRWAYS

A paper of the above title, by H. Diamond, was published in the February issue of the Bureau of Standards Journal of Research. This paper deals with the methods which can be used for changing the angles between the courses worked out by radio range beacons and thereby obtaining alignment of the courses with the actual airways converging upon the airport where the radio range beacon is installed. A mathematical analysis is made of each method employed, and the amount of angular variation possible is tabulated. Sample calculations are made for actual airway routes to demonstrate the several methods. A number of circuit arrangements are described by which a single visual type radio range beacon may serve two, three, or four courses radiating from a given airport at arbitrary angles with each other.

Further details are given in the paper, which will also be available separately as Bureau of Standards Research Paper No. 148, obtainable by purchase from the Superintendent of Documents, Government Printing Office, Washington, D. C. The price has not been determined at this time.

IMPROVEMENT OF RADIO MEASUREMENT METHODS

The Bureau of Standards carries on work in the study and improvement of radio measurement methods and the application of these measurement methods to technical problems. In this connection, active work has been in progress recently on measurement of the radio-frequency properties of insulating materials and on the characteristics of radio receivers.

At the request of another Government department, a study of radio properties of mica was started. This includes among other properties the measurement of the phase difference, which is a measure of power loss in the material. This power loss is extremely small in mica. These measurements require the determination of very small changes in current, and interference from external sources may completely mask the effect which is looked for. To eliminate such interference a room completely inclosed with special copper screening has been built inside one of the rooms of the radio building. This shielded room makes it possible to carry on these and other very delicate measurements without any electrical disturbance.

In order to assist other Government departments in the preparation of specifications for the purchase of radio receivers, and in the testing of radio receivers of different types, the bureau has installed equipment for making sensitivity, selectivity, and fidelity measurements at all frequencies from 15 to 4,000 kilocycles. By the use of this equipment, tests are made throughout this frequency range which are similar to the tests outlined for broadcast receiving sets by the Institute of Radio Engineers.

There have been no publications on these lines of work, and none are planned as yet. When publications are prepared and issued they will be announced in these columns.

IMPROVEMENTS IN VISUAL INDICATOR FOR AIRCRAFT RADIODEACON

As a result of intensive research work on the tuned-reed course indicator developed by the Bureau of Standards for use with the directive radiobeacon system, an improved design has been developed of approximately twice the sensitivity of those used hitherto. This gain resulted from improvements in design of the permanent magnet used for polarizing the reed.

A test flight using this reed indicator showed that the useful distance range of the visual-type range beacon was increased to about 250 miles, as compared with 175 miles previously. The airplane passed directly over the radiobeacon tower at Hadley Field (transmitting aural signals on a frequency separated by 60 kilocycles from that at College Park), 170 miles distant from College Park, Md., without effect on the reed deflections. The sharpness of the beacon course at Hadley Field was $\pm 2\frac{1}{2}$ miles; this is slightly better than $\pm 1^{\circ}$.

Further increases in the sensitivity of the reed indicator are expected from the use of a nickel-steel alloy for the reed material having greater magnetic permeability than elinvar, the previously used material. Metallurgical experiments are in progress to determine whether this alloy can be made with suitable properties, particularly zero temperature coefficient of elasticity, which is necessary to avoid errors due to temperature changes.

The increase in sensitivity of the reed indicator is of immediate practical importance, since it extends the useful distance range of the beacon, reduces the effect of interference for a given distance range, and considerably simplifies the filter circuit problem in the simultaneous reception of radiotelephone and radiobeacon signals transmitted on the same carrier frequency.

Increase in sensitivity of the reed indicator has still another advantage. The number of reed frequencies available for directive radiobeacon service was previously limited to the range 65 to 120 cycles. The lower limit is set by the audio-frequency characteristics of aircraft receiving sets, and the upper limit by the reed sensitivity. With increased sensitivity, the upper limit may be advanced to about 150 cycles. This permits the use of at least eight reed frequencies, with sufficient separation between them to prevent beating effects. It therefore becomes possible to use four separate sets of modulation frequencies with the double-modulation or four-course beacons, and two sets with the triple-modulation or 12-course beacons. The use of different sets of modulation frequencies by near-by beacon stations will render very simple the problem of discrimination between different beacons. It will also reduce the total width of band of radio-frequencies required for operation of a given number of beacons.
