DEPARTMENT OF COMMERCE,
BUREAU OF NAVIGATION,
Washington, August 1, 1919.

To collectors of customs, radio inspectors, and others concerned:

This publication, which was discontinued during the war, is issued monthly by the Bureau of Navigation, Department of Commerce, and distributed to the United States officers engaged in or concerned with the enforcement of the radio laws for their guidance and instruction, and to those concerned with the operation of Government and commercial radio stations for their information.

The Radio Service Bulletin supersedes the quarterly supplements to the List of Radio Stations of the United States and contains information concerning Government, commercial, and special stations only.

The Bulletin contains tables of new stations, alterations, and corrections under headings, so that the List of Radio Stations of the United States and the List of Radiotelegraph Stations published by the international bureau at Berne, may be brought up to date. Additions, alterations, and corrections should be entered in these two publications promptly on receipt of the Bulletin.

Amendments to or changes in the Radio Laws and Regulations of the United States (edition of Aug. 15, 1919) are printed in this Bulletin in such a manner that they may be clipped and pasted in their proper places in that publication.

Items of general interest concerning the enforcement of the radio laws are printed in the Bulletin from time to time, as occasion warrants.

E. T. CHAMBERLAIN,
Commissioner of Navigation.

Approved:
WILLIAM C. REDFIELD,
Secretary of Commerce.

MISCELLANEOUS.

LOSS OF OPERATOR'S LICENSES.

The Bureau is receiving an unusually large number of requests for duplicates of lost radio operators' licenses. In a number of cases the loss of the license is apparently due to carelessness, and in the future where this is evident the Bureau will withhold the issuance of a duplicate for at least 30 days.

RANGE OF AMATEUR STATIONS.

On January 21 the Bureau received a radiogram from an amateur radio station in Hartford, Conn., which was sent direct to an amateur station in Washington, using a wave length of 200 meters. This indicates the range of such stations on a 200-meter wave length when the apparatus is efficient.

CHANGE OF MARCONI CO.

The Radio Corporation of America now operates and controls all stations formerly operated and controlled by the Marconi Wireless Telegraph Co. of America.
